

Q1: A cause and effect relationship established in a natural environment is known as

- a) Field experiment
- b) Mall intercept survey
- c) Laboratory

Correct Answer: a) Field experiment

Q2: All of the following are tools of data collection as part of communication surveys

EXCEPT

- a) Interview schedule
- b) Questionnaire
- c) Interview Guide
- d) Laboratory Experiment

Correct Answer: d) Laboratory Experiment

Q3: Which of the following is a non-probability sampling technique?

- a) Convenience sampling
- b) Stratified random sampling
- c) Simple random sampling
- d) Systematic Random Sampling

Correct Answer: a) Convenience sampling

Q4: Another name for purposive sampling is

- a) Simple random sampling
- b) Judgmental sampling
- c) Cluster sampling
- d) Systematic sampling

Correct Answer: b) Judgmental sampling

Q5: The process of checking and adjusting the data for omissions, legibility, and consistency is known as:

- a) Editing
- b) Analysis
- c) Sampling
- d) Adjusting

Correct Answer: a) Editing

Q6: A set of rules stating that certain numbers are assigned to variable attributes is called:

- a) A coding procedure
- b) An observation unit
- c) Data cleaning

d) Data analysis

Correct Answer: a) A coding procedure

Q7: Which of the following is NOT included in data transformation?

- a) Changing data from their original form to a format that is more suitable
- b) Collapsing the number of categories
- c) Creating new variables
- d) Entering data in software

Correct Answer: d) Entering data in software

Q8: Statistical Package for the Social Sciences (SPSS) is used for

- a) Tabulation and statistical analysis
- b) Developing a theoretical framework
- c) Writing references
- d) Contacting respondents

Correct Answer: a) Tabulation and statistical analysis

Q9: A table that shows the relationship between two variables is known as:

- a) Dummy table
- b) Multivariate table
- c) Univariate table

d) Bivariate table

Correct Answer: d) Bivariate table

Q10: The total of columns and rows of a table is called:

a) Cell

b) Marginal

c) Header

d) Footer

Correct Answer: b) Marginal

Q11: The third variable that controls for an alternative explanation is called:

a) Dependent variable

b) Control variable

c) Independent variable

d) Moderating variable

Correct Answer: b) Control variable

Q12: "Does package size affect consumption rates in snack products?" is a typical

question in what type of research design?

a) Longitudinal research

b) Time-series research

c) Experimental research

d) Correlational research

Correct Answer: c) Experimental research

Q14: The experimental design that uses one group, and a pretest and posttest is called

a) One-group pretest posttest design

b) Posttest only control group design

c) One-shot case study

d) Solomon four-group design

Correct Answer: a) One-group pretest posttest design

Q15: Which one is NOT part of non-reactive research?

a) Physical traces

b) Archives

c) Observations

d) Interviews

Correct Answer: d) Interviews

Q16: In which of the following researches, people being studied are NOT aware that they are part of a research project?

a) Descriptive

b) Experiments

c) Non-reactive

d) Surveys

Correct Answer: c) Non-reactive

Q17: If Mr. Zain is observing the behavior of shoppers in a departmental store through a closed circuit TV, it is called

- a) Ethnography
- b) Non-Participant observation
- c) Participant Observation
- d) Experimental

Correct Answer: b) Non-Participant observation

Q18: All of the following are examples of historical comparative research EXCEPT

- a) Economic Forms
- b) Social Forms
- c) Civil Wars
- d) Motivation

Correct Answer: d) Motivation

Q20: Historical-Comparative research focuses on:

- a) Broad historical processes
- b) Comparing forms
- c) Tracing the development of social forms

d) All of the given

Correct Answer: d) All of the given

Q21: Ethical problems are less intense in H-C research than in other types of social research because:

- a) A researcher is less likely to have direct contact with people being studied
- b) Highly professional and responsible people are researched in this study
- c) Objective data is available, so there is less chance of personal involvement
- d) None of the given

Correct Answer: a) A researcher is less likely to have direct contact with people being studied

Q21: Secondary sources of data collection have the following limitations in Historical-Comparative research:

- a) Problem of reading the works of historians
- b) Transparency issue in historian selection procedure
- c) Problem of undefined concepts and the selection of evidence
- d) All of the given

Correct Answer: d) All of the given

Q22: Which type of question is more beneficial in focus group discussion?

- a) Open Ended

- b) Close Ended
- c) Guided
- d) Loaded

Correct Answer: a) Open Ended

Q23: The key factor concerning group size generally depends upon its

- a) Availability
- b) Purpose
- c) Funding
- d) None of the given

Correct Answer: b) Purpose

Q24: Scales and indexes help in condensing and simplifying the information, which is known as

- a) Data analysis
- b) Data scoring
- c) Data reduction
- d) Data accuracy

Correct Answer: c) Data reduction

Q25: Which of the following experimental designs has the given symbols: O1 X O2?

- a) Static group design

- b) Solomon four-group design
- c) None of the given options
- d) One-group pretest-posttest design

Correct Answer: d) One-group pretest-posttest design

Q26: When you are confident that experimental manipulation produces changes in the dependent variable, your study probably has good

- a) External
- b) Causal
- c) Construct
- d) Internal

Correct Answer: d) Internal

Q27: Research projects involving experimental manipulations are implemented in a natural environment, called as

- a) Secondary experiments
- b) Laboratory experiments
- c) Primary experiments
- d) Field experiments

Correct Answer: d) Field experiments

Q28: All of the following are the wake of interviews, EXCEPT

- a) Lack of Visual Med
- b) Distracting Physical Environment
- c) Less Participant Involvement
- d) Reduced Interviewer Bias

Correct Answer: d) Reduced Interviewer Bias

Q29: The cover letter is usually attached

- a) On the back side of the questionnaire
- b) Sequence does not make any issue
- c) None of the given options
- d) On the first page of the questionnaire

Correct Answer: d) On the first page of the questionnaire

Q30: The waiting programs to conduct an interview cover all of the following topics
EXCEPT

- a) How to ask survey questions?
- b) How to probe?
- c) How to record responses?
- d) How to do data analysis?

Correct Answer: d) How to do data analysis?

Q31: Which of the following can be the example(s) of an element?

- a) Families
- b) Organizations
- c) Corporations
- d) All of the given options

Correct Answer: d) All of the given options

Q32: Double and cluster sampling techniques are examples of

- a) Non-probability sampling
- b) Equal probability sampling
- c) Random probability sampling
- d) Probability sampling

Correct Answer: d) Probability sampling

Q33: Instead of using a list of random numbers, ----- is used in systematic random sampling

- a) Survey
- b) Cluster
- c) Element
- d) Sampling interval

Correct Answer: d) Sampling interval

Q34: Respondent's failure to answer a question is known as

- a) Response rate
- b) Item non-response
- c) Open-ended response
- d) Response bias

Correct Answer: b) Item non-response

Q35: Pilot testing also called pre-testing means a -----trial run of a particular component.

- a) Small scale
- b) Large scale
- c) Medium scale
- d) Macro scale

Correct Answer: a) Small scale

Q36: Observational methods cannot be used easily in

- a) Child studies
- b) Studies about attitudes
- c) Studies involving groups
- d) Animal studies

Correct Answer: a) b) Studies about attitudes

Q37: The observer receives little or no reactivity in the case of

- a) Participant observation
- b) One-way mirror observation
- c) Direct observation
- d) None of the given options

Correct Answer: b) One-way mirror observation

Q38: A simple video camera recording conversations has no researcher involved. This is known as:

- a) Participant observation
- b) Mechanical observation
- c) Structured observation
- d) Action research

Correct Answer: b) Mechanical observation

Q39: Which of the following statements is referred to as secondary analysis?

- a) Analyzing your own data in two different ways
- b) Working part-time on a project alongside other responsibilities
- c) Conducting a study of seconds, minutes, and other measures of time
- d) Analyzing existing data that has been collected by another person or organization

Correct Answer: d) Analyzing existing data that has been collected by another person or organization

Q40: All of the following are disadvantages of using secondary analysis, except

- a) The researcher's lack of familiarity with the data
- b) It is a relatively expensive and time-consuming process
- c) Hierarchical datasets can be very confusing
- d) The researcher has no control over the quality of the data

Correct Answer: b) It is a relatively expensive and time-consuming process
