*1 bhool gai question

……

Question No: 1 explain the concept of hybrid vigour????
2: Explain dopamine ?
3: Write the functions Occipital lobe and tempora lobe?
4: What do you know about decent with modification ?
5: How u distinguish the child suffering from Aphasias and Conduction Aphasias?
6: In which part of brain Myelencephalon is located ???
7 : Why a cell is being migrated ????
8 : Write the name of Acetylcholine receptor ????
9 : Amnesia justify ???
10: Functions of sleep ??

……..

Psy610 final
Basic neuroanatomical axis
what do you know about affinity hypothesis
what is homostasis
write two hallucinogens and explain them
sodium potassium pump
explain process of transmission of neuron in details
how hunger is a motivated behaviour
cellular dehydration and osmoreceptors
heredity and DNA
regions include in telecephalon

……

psy610 final paper
Charcteristics of sleep.
Norepinehrine
Funtions of lobes
Obesity
Anaroxia se related the

……

3 mark Questions
1. cell Rerrangments
2. parts of Telencephalon
3. norepinephrine illustration
4: opoids
5.hellocigans
5 Marks Question.
6. Gentic varibilty vs Inbreeding
7: NA And Depression
8: charchteristic of Bio rythems
9: fuction of Lobes. Temporal and occipital
10. Resting Metabolic StatE.
