IMPORTANT SUBJECTIVE / OBJECTIVE

Mid-Term PREPERATION [lesson wise]

Lesson 1-22

DON'T FORGET TO SUBSCRIBE THIS CAHNNEL

SUBSCRIBE https://youtu.be/loOC_t5ThJA?si=d_p4pcp4c5xe6VyU

Lesson 1 [topic 1-6]

Objective:

1. What is the primary focus of classroom management?

A) Grading student assignments

B) Establishing effective learning environments

2. Which element is NOT part of classroom management?

A) Schoolwide discipline

B) Memorizing textbooks

3. Why is integrating classroom management with the curriculum important?

A) To increase teacher workload

B) To foster effective teaching environment

4. What does the hidden curriculum include?

A) Official school rules

B) Unspoken messages about behavior

5. How does social-emotional learning benefit classroom management?

A) By increasing homework assignments

B) By fostering empathy and prosocial behavior

6. Which model provides a framework for understanding student behavior in classroom management?

A) Behaviorist approach

B) Technological approach

7. What is a teacher's role in addressing bullying?

A) Ignoring the behavior

B) Promoting empathy and respect

8. Why is identifying student needs important for teachers?

A) To increase competition among students

B) To tailor instruction and provide support

9. How can stakeholders contribute to effective classroom management?

A) By undermining school policies

B) By collaborating and communicating

10. What is the main goal of classroom management?

A) Assigning more homework

B) Establishing effective learning environments

11. classroom management embodies:

An organizational structure to support productive learning

Subjective:

1. What are the key elements of classroom management?

Classroom management encompasses

- schoolwide discipline,
- classroom discipline,
- rules, identifying student needs,
- stakeholder involvement,
- and social-emotional learning.

2. How does curriculum influence classroom management?

Curriculum integration with classroom management is crucial for effective management, as it involves

- planning objectives,
- communicating through lesson plans,
- and gaining commitment from stakeholders.

3. What is the hidden curriculum and its significance in classroom management?

The hidden curriculum, consisting of unspoken messages about behavior, values, and norms, influences student learning and behavior, necessitating the demonstration of appropriate behaviors by the school community.

4. Why is social-emotional learning important for classroom management?

Social-emotional learning fosters prosocial behaviors, empathy, and concern for others, leading to a more supportive and cooperative classroom environment, thereby reducing management issues.

5. What is the teacher's role in establishing effective classroom management?

Teachers play a vital role in implementing effective teaching strategies, creating an organizational structure conducive to learning, and promoting social-emotional development among students.

6. How does classroom management relate to the curriculum?

Classroom management principles must be integrated into the curriculum to ensure a cohesive approach to teaching and learning, emphasizing its importance in achieving educational goals.

7. How can teachers address bullying in the classroom?

Teachers can address bullying by fostering a positive classroom culture, implementing clear rules and consequences, promoting empathy and respect, and actively intervening to stop bullying behavior.

8. How can stakeholders contribute to effective classroom management?

Stakeholders, including students, teachers, parents, and administrators, play critical roles in supporting classroom management through collaboration, communication, and commitment to shared goals.

9. What is social-emotional learning?

Social emotional learning deals with the domain of 'affective education' and refers to: - Social networking - Communal feelings - Sharing and caring connections students have in schools

Lesson 2 [topic 7-11]

Objective:

1. Rules should: - Be for every stakeholder
2. Rules should Be en-cultured also through the hidden curriculum
3. Rules should Be properly documented.
4. Behavioural issues that are **most harmful need professional support services.**
5. **Behavioural** issues that are most harmful need professional support services.
6. : Students need to respect their **teachers** that come from the hidden curriculum.
7. Students need **to follow rules** which are mutually constructed by the students and teachers
8. **Stakeholders** are the people who have direct association with the schooling of a child.
9. It is very important make **parents aware of** school policies and expectations of school.
10. Adhere to policies and rules after the problem is **identified**
11. **Counselling** services is the key element of classroom management.
12. Behavioural issues need to be categorized from **least to most harmful.**

Subjective:

1. Why is classroom control essential for effective teaching and learning?

Classroom control ensures an environment where teaching and learning can occur without disruptions, allowing teachers to maintain authority and facilitate student engagement.

2. How can students contribute to classroom control?

- Students can contribute by acting responsibly,
- following mutually constructed rules,
- respecting teachers, and caring for their peers,
- all of which are integral to fostering a conducive learning environment.

3. Who are considered stakeholders in the schooling of a child?

- Parents, teachers,
- administrators, and students

are key stakeholders who play crucial roles in shaping school policies and ensuring effective classroom management.

4. What responsibilities do stakeholders have in maintaining classroom discipline?

- Stakeholders are obligated to abide by rules,
- maintain discipline, build rapport,
- and identify problems and solutions collaboratively to create a positive learning environment.

5. What are some behaviours that may require counselling intervention in schools?

Behaviours such as insulting, teasing, abusive, bullying, lying, stealing, aggression, lack of confidence, and being a victim of bullying necessitate counselling support to address underlying issues and promote student wellbeing.

6. How does the school handle the problem?

- Appropriate policies in place
- Adhere to policies and rules after the problem is identified
- Problems communicated to key informants
- Timely action
- Assurance that the problem is obliterated

7. Counselling Services in Schools?

Counselling services is the key element of classroom management, but unfortunately there are many schools where there are no counselling services. Counselling services are needed to identify the behavioural problems.

8. Behaviours that may require counselling?

- Students who insult others
- Students who tease others
- Students who abuse others
- Students who bully or harass others
- Students who lie
- Students who steal

- Students who are aggressive
- Students who lack confidence
- Students who are victims of bullying

Lesson 3 [topic 12-18]

Objective:

1. What are the options for seating arrangement in classrooms?

- A) Only group seating
- B) Group, individual, pair seating

2. What influences physical seating and classroom management?

- A) Only classroom size
- B) Location, campus, ambience, noise levels

3. How do warm teacher-student relationships affect classroom behavior?

- A) They have no impact on behavior
- B) Foster more positive behaviors

4. What are the two types of classroom management approaches?

- A) Explicit and implicit
- B) Overt and covert

5. classroom instruction should happen in a

Positive climate

6. When teachers have warm and **secure relationships** with students those students in return show more positive behaviours towards others in classroom,

7. There are **two types** of classroom management approaches

8. **Overt Management** approaches are those approaches in which teachers use an explicit effort to manage classroom based behavioural and management issues.

9. **Covert Management** Approaches are those approaches which have an implied existence.

10. **Intimidation** is an approach used by teachers to control student behaviour.

Subjective:

1. What are the choices available for seating arrangement in classrooms?

Seating options include group seating,

- individual seating,
- pair seating, and seating on carpets,
- each affecting classroom dynamics differently.

2. What factors influence physical seating and classroom management?

Factors such as the location of the school,

- purpose-built campus, class seating plan,
- playground availability, classroom ambience,
- furniture, lighting,
- and noise levels play significant roles in classroom management.

3. How do warm and secure relationships between teachers and students impact classroom behavior?

Warm and secure relationships fostered by teachers lead to more positive behaviors among students, resulting in fewer classroom management issues due to increased trust and respect.

4. What are the two types of classroom management approaches?

The two types of approaches are

1. overt management approaches, involving explicit efforts to manage behavior,
2. and covert management approaches, which are implied and based on schoolwide values and norms.

5. What are some intimidation techniques used by teachers?

Intimidation techniques include

- threats, sarcasm,
- ridicule, disapproval,
- psychological coercion,

and, in extreme cases, physical force, aimed at controlling student behavior.

6. What role does instruction play in managing classroom behavior?

Effective instruction, aligned with student needs and interests, creates a positive climate, engages students, and reduces problem behavior by focusing on relevant content and using appropriate teaching strategies.

Q. Classroom Instruction requires:

- A positive climate
- Selection of relevant content
- Competent use of appropriate teaching and learning strategies and skills
- Use of reasonable routines and procedures

Lesson 4 [topic 19-24]

Objective:

1. Social emotional management calls for **building healthy interpersonal relationships that support a positive classroom climate.**
2. There is a difference **between authoritative teacher and an authoritarian** teacher.
3. Authoritative teacher still maintains discipline but in a friendly manner unlike an **authoritarian teacher**
4. **Authoritarianism sets** and enforces rules in a dictatorial way, using obtrusive discipline as necessary.
5. **Behaviour modification** attempts to promote desirable behaviour and eliminate undesirable behaviour.
6. Students **are praised for** showing desirable behaviour.
7. **Response cost** is a fine that can cost a student reward that has been already earned.
8. . The nature of punishment can range from least to most punitive depending upon **the misbehaved action.**
9. **Social emotional management** calls for building healthy interpersonal relationships that support a positive classroom climate.
10. Socio-emotional management approach towards classroom **management has a lot to do with the teacher's action in the classroom**

Subjective:

1. What distinguishes an authoritative teacher from an authoritarian teacher?

- An authoritative teacher maintains discipline in a friendly manner,
- while an authoritarian teacher enforces rules in a dictatorial manner through commands and directives.

2. How does authoritarianism seek to control student behavior?

Authoritarian teachers use commands and directives, supplemented by monitoring, to establish control in the classroom, employing coercive power to enforce discipline.

3. What is the goal of behavior modification in classroom management?

Behavior modification aims

- to promote desirable behaviors
- and eliminate undesirable ones,
- targeting issues such as fear, misbehavior,
- substance abuse, learning difficulties, and criminal activity.

4. What are some behavior modification strategies used by teachers?

Strategies include praise for desirable behavior, rewards for expected behaviors, modeling by teachers, contingency contracting for misbehavior, response costs, and negative reinforcement or punishment

1. Praise: Students are praised for showing desirable behaviour.
2. Rewards: Students are rewarded for manifesting expected behaviours.
3. Modelling: Teachers model behaviours which they want their students to manifest.
4. Contingency contracting: The students are given contracts by teachers if they misbehave. These contracts may include class detention, no release for game time etc.
5. Response costs: Response cost is a fine that can cost a student reward that has been already earned
6. Negative reinforcement and punishment: A student is penalized for display of inappropriate behaviour. The nature of punishment can range from least to most punitive depending upon the misbehaved action.

5. What is cookbook management in classroom management?

Cookbook management is an eclectic approach involving a mix of prescribed "do's and don'ts" without a consistent rationale, often adapting effective approaches to suit specific situations or groups.

6. How does socioemotional management contribute to a positive classroom climate?

Socioemotional management involves building healthy interpersonal relationships, promoting empathy and prosocial behavior, and creating a supportive classroom community, leading to improved academic achievement and reduced problem behavior.

7. What actions can teachers take to manifest socioemotional skills in the classroom?

Teachers can smile, adopt a cognitive-affective stance in lesson planning, avoid dismissing student concerns, be authoritative yet not authoritarian, be sensitive to student needs, capitalize on interests, encourage team building, show genuine interest in students' lives, and provide emotional support.

8. What role does socioemotional management play in students' overall development?

Socioemotional management contributes to students' academic success, reduces problem behavior, and enhances the quality of relationships, helping students become responsible members of society.

Lesson 5 [topic 25-29]

Objective:

1. Covert management approaches should be a part of the: - **School culture – Curriculum**
2. Covert approaches are the: - **Core values and norms that students and teachers are expected to adhere to**

Subjective:

1. Who are considered problem students?

Problem students include those

- who are shy, lack confidence,
- exhibit aggression, or are victims of psychological trauma, among others.

2. How can the needs of problem students be determined?

The needs of problem students can be determined through

- student profiles,
- behavior portfolios,
- observation, interaction with peers,
- and liaising with parents or counselors.

3. What actions should be taken for problematic students?

Problematic students require

- constant monitoring,
- specialized programs,
- referrals to counselors,
- and close coordination among caregivers, peers, teachers, and administrative staff.

4. What characterizes the permissiveness approach in classroom management?

The permissiveness approach promotes

- maximum student freedom,
- allowing them to take responsibility for their own learning,
- albeit with potential dangers if not enforced responsibly.

5. What role do covert management approaches play in student and teacher assessment?

Covert management approaches are integrated into student and teacher assessment processes, ensuring alignment with school values and reinforcing positive behaviors.

6. Covert Management Strategies?

Covert management approaches can be used in:

- School Assembly
- Tutorials
- Lesson Plans
- Sport Activities
- Extra Curricular Activities
- Behavioural interactions
- Out of school interaction
- Information to all Stakeholders
- Reinforcement
- Part of student and teacher assessment

Lesson 6 [topic 30-35]

Objective:

1. Teacher who manages effectively create and maintain conditions in which students can learn efficiently.
2. in an organization classroom there should be a students corner where student can can go to read, draw or do other work.

3. in an organization classroom there should be a display of student work **where student work displayed on bulletin boards?**

4. **Norms** are unwritten rules stating what students should and should not do. They regulate and control behavior.

5. **Expectations** are the norms applied to a specific situation.

Subjective:

1. How do effective teachers manage classrooms?

- Effective teachers create
- positive climates,
- organize classroom areas,
- establish group norms,
- implement routines and procedures,
- monitor learning,
- maintain good behavior,
- and evaluate student achievement.

2. What are the dimensions of classroom organization?

Classroom organization includes seating arrangements,

- teacher positioning,
- bulletin boards,
- display of student work,
- blackboard visibility,
- and provision of a student corner.

3. What are group norms and expectations?

- Group norms are unwritten rules regulating student behavior, established and modeled by teachers, while expectations are norms applied to specific situations.

4. What role do routines and procedures play in classroom management?

Routines and procedures provide

- structure and predictability,
- facilitating smooth transitions and

- minimizing disruptions in the classroom.

5. How can teachers monitor student learning effectively?

- Teachers should give proactive feedback,
- continuously monitor learning,
- maintain assessment portfolios,
- and have well-defined mechanisms for recording student progress.

6. What strategies can teachers employ to maintain good behavior?

- Teachers can establish rules at the beginning of the school year,
- involve students in rule-making,
- issue contracts for non-compliance,
- reinforce rules, and enforce them uniformly.

Lesson 7 [topic 36-41]

Objective:

1. Teachers who provide interesting instruction.

Regularly assessing student progress

2. -----is the stream of norms, values, beliefs, traditions and rituals built up over time.

Culture

3.----- in a way that it provides continuous feedback as a way to improve learning.

Formative

4. **Evaluation is:** "The formal determination of the quality, effectiveness, or value of a program, product, project, process, objective or curriculum".

5. Classroom management approaches and styles need to be examined periodically for their effectiveness

6. A very important part of preventive management is teaching student **self- control and social skill** strategies

7. Students need to **be educated** to take control of their emotions and safeguard the security of others around them.

8. Most of the disruptive behaviors in **school can be prevented** by establishing connections with family.
9. **Misbehaviors** can be controlled and prevented through early intervention by the school as well as the family.
10. **School culture** is a set of unstated expectations and assumptions that direct the activities of school personnel and students.

Subjective:

1. How is evaluation defined in the context of classroom management?

- Evaluation is defined as the formal determination of the quality, effectiveness, or value of classroom management approaches and styles, necessitating periodic examination and potential changes for improvement.

2. What distinguishes formative evaluation in classroom management?

- Formative evaluation in classroom management involves continuous feedback to enhance learning, while also encompassing summative assessment at the term's end to gauge the effectiveness of strategies.

3. Why is teaching self-control crucial in preventive management?

- Teaching self-control and social skills empowers students to manage their emotions, fostering a secure environment conducive to learning.

4. How can self-control strategies be integrated into the school curriculum?

- Self-control strategies can be embedded through
 - group activities,
 - task-based exercises,
 - project work, sports,
 - and reinforcement during school assemblies.

5. What defines school culture in the context of effective management?

- School culture encompasses unstated expectations and assumptions guiding the behaviors of school personnel and students, upheld through norms, values, beliefs, traditions, and rituals.

6. How can interesting instruction contribute to classroom management?

- Interesting instruction motivates student participation,
- diagnoses learner needs,
- plans tailored lessons,
- regularly assesses student progress,
- and evaluates professional development,
- thereby promoting effective learning environments.

7. What role does motivation play in interesting instruction?

- Motivation encourages student engagement through diverse teaching strategies, catering to individual learning needs and ensuring continuous assessment of progress.

8. Ways to Teach Self-Control?

Embed self-control strategies in the school curriculum through:

- Group and pair work activities
- Task based activities
- Project work
- Sports
- Reinforcement in school assemblies

Lesson 8 [topic 42-46]**Objective:****1. In assertive discipline, who developed the model?**

- A) Lee Canter
- B) John Dewey

2. What is the primary focus of assertive discipline?

- A) Flexibility in rules
- B) Clear communication of expectations and consequences

3. According to assertive discipline, rules should be _____.

- A) Vague and ambiguous
- B) Secretly enforced

-C) Communicated clearly to students

4. in which type of reward Mechanism Nods, smiles, facial and body gestures are used .

Non-verbal

5. School and Classroom management should be formidable parts of every p^{rofessional} development programs

6. In order to have well disciplined and well controlled classroom it is important for teachers to have knowledge of all domains.

7. School and Classroom management should be formidable parts of every professional development programs.

8. Difficulty managing behavior in the classroom can be a source of frustration for teachers and can severely hamper the teaching learning process.

Subjective:

1. What are the knowledge domains essential for preventive management? OR

- Teachers need proficiency in which domains to ensure a well-disciplined classroom?

Teachers need proficiency in

- content,
- management,
- pedagogical,
- and socio-economic knowledge domains to effectively manage their classrooms.

2. Why is professional development crucial for teachers? OR

- What are the key reasons for emphasizing professional development among educators?

PD Professional development is essential for

- refining teaching skills,
- enhancing student learning,
- fostering professionalism in schools,
- and promoting critical self-reflection.

3. How can a personal philosophy of management benefit teachers?

A carefully crafted personal philosophy of classroom management serves as a guiding principle for teachers,

- helping them make decisions
- and respond to student misbehavior consistently and thoughtfully.

4. Who developed the assertive discipline model?

The assertive discipline model was formulated by Lee Canter in the 1970s.

5. What is the primary focus of the assertive discipline approach?

The assertive discipline model emphasizes the establishment of a systematic discipline plan before the school year begins, followed by clear communication of expectations and consequences to students.

6. What principles define the assertive discipline model?

Assertive discipline is characterized by consistent application of rewards and punishments, with a focus on setting clear rules and expectations for student behavior.

7. What is the significance of having mutually agreed-upon rules?

Having mutually agreed-upon rules fosters a sense of ownership and responsibility among students, leading to better adherence and understanding of expected behaviors.

8. What are the different settings where rules might vary according to assertive discipline?

Rules may differ across settings such as

- classrooms, laboratories,
- playgrounds, walkways,
- auditoriums, art rooms,
- and computer rooms, reflecting the specific requirements of each area.

9. How does assertive discipline contribute to classroom management?

Assertive discipline provides a

- structured framework for teachers to establish
- and enforce rules consistently,
- promoting a positive and orderly learning environment.

Lesson 9 [topic 47-53]

Objective:

1. When a student's need for recognition is unmet, that student will first : display **attention-seeking** behaviors.
2. Logical Consequences model is based on Alfred Adler's idea that students' misbehavior is based on **their unmet** needs.
3. **Positive reinforcements** is a bid deterrent to misbehavior in school students.
4. **Negative consequences** are the penalties that students face when they bypass or disobey rules.
5. Types of Negative Consequences • **Missing recess**
6. Students need to see the rules in black and white and know **both the positive and negative** consequences of their behaviors.

Subjective:

1. **How do positive consequences contribute to behavior management?**
 - Positive consequences such as praise and rewards increase students' self-esteem and deter misbehavior by reinforcing adherence to rules.
2. **What are examples of positive reinforcements?**
 - Verbal praise, non-verbal gestures like nods and smiles, and tangible tokens such as stars serve as positive reinforcements for students.
3. **Why is it important for students to understand negative consequences?**
 - Students must comprehend the negative consequences of rule-breaking to deter misbehavior and maintain a disciplined learning environment.
4. **What are examples of negative consequences for not adhering to rules?**
 - Negative consequences may include missing recess, detention after school, extra academic work, or suspension from school, among others.
5. **What is emphasized in planning for implementing classroom management models?**
 - Planning involves creating rules collaboratively with students, reinforcing rules consistently, and ensuring the commitment of all stakeholders.
6. **Who developed the logical consequences model, and what is its basis?**

- The model was articulated by Rudolf Dreikurs and is based on Alfred Adler's idea that misbehavior stems from unmet needs, with a focus on social recognition.

7. According to Adler's theory, what is the fundamental desire of individuals?

- Individuals desire to belong and feel significant,
- and misbehavior

often occurs when these basic needs are not met by caregivers, teachers, or peers.

Alfred Adler, a philosopher and psychiatrist, stressed the need to understand individuals within their social context. He stressed to address such crucial and contemporary issues as equality, parent education, the influence of birth order and life style of individuals.

Adler believed that we all have one basic desire and goal:

- to belong and to feel significant.
- When we feel encouraged we feel capable and appreciated and will generally act in a connected and cooperative way.
- When we are discouraged, we may act in unhealthy ways by competing, withdrawing or giving up.

Unmet needs Students generally misbehave when their basic needs are not looked after either by the caregivers, teachers or peers.

8. Explain positive reinforcement?

Positive reinforcement:

A teacher must praise the students when the rules are kept.

Positive reinforcement is a bid deterrent to misbehavior in school students. When students are praised, their self-esteem increases and the instances of problem behavior decrease automatically.

Reward Mechanism

Verbal

✓ Well done!

Non-verbal

✓ Nods, smiles, facial and body gestures

Tokens

Stars

9. Negative Consequences?

Negative consequences are the penalties that students face when they bypass or disobey rules. It should be very clear to the students that non-compliance to rules will make them liable to negative consequences.

Types of Negative Consequences

- Missing recess
- Detention after school
- Relinquishing a reward won earlier
- Extra academic work
- No game period
- Assisting in cleaning the classroom
- Suspension from school

Q. Q. Logical Consequences ?

The model This model was articulated by Rudolf Dreikurs in 1968. This model is based on Alfred Adler's idea that students' misbehavior is based on their unmet needs. All students desire and need social recognition. When these desires are not met, students exhibit a hierarchy of behaviors based on 'mistaken goal'. When a student's need for recognition is unmet, that student will first display attention-seeking behaviors. If those behaviors do not result in the desired recognition, the student will attempt to engage teachers in power struggles, followed by extracting revenge and then a display of inadequacy.

Lesson 10 [topic 54-59]

Objective:

1. Who developed the model emphasizing student self-regulation in classroom management?

- a) Thomas Gordon
- b) Lee Canter
- c) Rudolf Dreikurs

2. What is the focus of I-messages in classroom management?

- a) Student achievements
- b) Teacher's feelings and perspectives
- c) Classroom rules

3. Which model emphasizes the importance of empowering students to self-regulate their behavior?

- a) Assertive discipline
- b) Logical consequences
- c) Gordon's model

4. **I-messages** focus on the speaker's feelings and perspectives (a teacher's) as opposed to what the student has done wrong.

5. The teacher must **act pro actively to manage problems** that might erupt during transitions between activities, lesson or space.

6. Overlapping means **handling two or more situations** or activities simultaneously.

Subjective:

1. Who advocated the model of classroom management emphasizing the shift of responsibilities from teachers to students?

- Thomas Gordon in 1977 conceptualized the model.
- He stresses teaching students to regulate their own behavior.
- Gordon highlights the use of I-messages and intrinsic motivators in addressing problematic behavior.

2. What are I-messages in the context of classroom management?

- I-messages focus on the speaker's (teacher's) feelings and perspectives.
- They are used to address problematic behavior without blaming the student.
- I-messages promote a constructive dialogue between the teacher and the student.

3. How does the model promote self-regulation of behavior among students?

- It empowers students to self-regulate through modeling and problem-solving.

- This approach is more effective than merely delivering consequences.
- It encourages students to take responsibility for their behavior and make positive changes.

4. What is the significance of with-it-ness in classroom management?

- With-it-ness refers to teachers being aware of everything happening in the classroom.
- It helps teachers stay on top of students' actions and maintain control.
- Strategies for practicing with-it-ness include maintaining eye contact and circulating around the room.

5. What does overlapping entail in the context of classroom management?

- Overlapping involves handling multiple situations or activities simultaneously.
- Skilled teachers can instruct a group while addressing individual student concerns.
- This strategy helps maintain a smooth flow of classroom activities and minimizes disruptions.

6. How do skilled teachers manage movement in the classroom effectively?

- They use movement to regulate the pace and flow of activities.
- Organizing materials and establishing efficient routines help minimize dead time.
- Teachers maintain control and readiness to prevent disruptions during transitions.

7. What are some practical tips for teachers to practice with-it-ness?

- Stand where you can see all students during lessons.
- Make eye contact with as many students as possible.
- Keep your face towards students when using the chalkboard.
- Circulate around the room to monitor student behavior.

8. How can teachers implement overlapping in classroom management?

- Address off-task behavior while continuing to direct other activities.
- Redirect attention by asking questions to regain focus.
- Remove distractions without interrupting ongoing presentations.

9. What strategies can teachers use to manage movement effectively in the classroom?

- Organize materials and teaching aids for quick access.

- Establish routines for transitions between activities.
- Be prepared and avoid fumbling with materials to maintain control.
- Train students to follow prompt instructions for movement.

10. What is the role of the teacher in managing classroom movement efficiently?

- The teacher regulates the pace and flow of activities through strategic movement.
- Efficient organization and clear routines minimize disruptions and dead time.
- Teachers demonstrate readiness and control to facilitate smooth transitions and minimize distractions.

Lesson 11 [topic 60-65]**Objective:****1. What is the primary goal of fostering group focus in the classroom?**

- a) Encouraging individual isolation
- **b) Maintaining active involvement and accountability**
- c) Ignoring student participation

2. How can teachers demonstrate smoothness during lessons?

- a) By encouraging interruptions
- **b) By maintaining logical organization**
- c) By intentionally showing confusion

3. what does appreciating ourselves and our intrinsic worth means.**Self-esteem****4. Some signals that teachers may use to gain student attention during transitions or activities are: -****Verbal cues and ringing a bell****5. Teachers who keep students**

alerted are more successful in inducing work involvement and preventing deviations.

6. Group focus keeps the teacher aware of all the students and keeps each student actively involved, alert and accountable for his/her performance.

7. Students who want to remain in their shells and safe zone are known **as **Introvert**.**

8. Self-esteem means that we appreciate ourselves and our inherent worth.

Subjective:

1. What does fostering group focus in the classroom entail?

- Fostering group focus involves keeping students actively involved, alert, and accountable for their performance by maintaining their interest, framing questions widely, and accepting responses deliberately.

2. How can teachers demonstrate smoothness during lessons?

Teachers demonstrate smoothness by

- avoiding digressions, interruptions,
- or confusion, maintaining a logical organization of the lesson,
- and timing themselves well to keep the lesson flowing seamlessly.

3. What are examples of group alerting behaviors used by teachers?

- Examples of group alerting behaviors include

- calling on students at random,
- inducing suspense between questions,
- having the entire class respond in unison,
- and physically moving around to observe students' activities.

4. What is the importance of building self-esteem in students?

- Building self-esteem is crucial as

- it fosters a positive attitude, self-evaluation,
- and belief in one's abilities,
- reducing the likelihood of classroom management issues by avoiding actions that belittle students
- and promoting empathy and pro-social behavior.

5. How can student talk be managed during whole-class instructional activities?

- Student talk can be managed through strategies like raising hands or chorus responses, with teachers signaling when each response is appropriate, while students should also be guided on appropriate seat work behavior and how to access materials.

6. What are some signals teachers can use to gain student attention during transitions?

- Teachers can use verbal cues, move to specific areas of the room, ring a bell, or turn on an overhead projector to gain student attention, while establishing clear expectations for student behavior during seat work and laboratory/project work.

7. What actions can teachers take to help introvert students come out of their shells?

- Teachers can help introvert students by

- displaying positive behavior,
- avoiding demeaning actions,
- assisting with weak areas,
- and encouraging pro-social behavior,
- creating a supportive environment conducive to their participation.

8. Why is it important for teachers to maintain smoothness during lessons?

- Maintaining smoothness ensures that the lesson progresses without interruptions or confusion, allowing students to stay focused and engaged, which ultimately reduces the likelihood of classroom disruptions and management issues.

9. What role does group alerting play in keeping students engaged?

- Group alerting keeps students on their toes and induces work involvement, preventing deviations and maintaining student focus and participation in classroom activities, ultimately contributing to effective classroom management.

10. How can teachers establish routines for laboratory and project work?

- Teachers can establish routines for distributing materials, ensuring safety, demonstrating appropriate behavior, managing movement, and cleaning up, promoting efficiency and minimizing disruptions during these activities.

Q 11. Procedures during whole class instructional activities-2:

Signals for attention: Some signals that teachers may use to gain student attention during transitions or activities are:

- Verbal cues –

Moving to a specific area of the room

- Ringing a bell

- Turn on an overhead projector

Lesson 12 [topic 66-72]**Objective:**

1. What is the importance of communication skills in classroom management?

- a) Not important
- b) Moderately important
- c) **Crucial**

2. According to Korr and Nelson, how should reprimands be conducted?

- a) In a loud voice
- b) With aggressive gestures
- c) **In a normal tone of voice**

3. Why is parental involvement significant in classroom management?

- a) It's unnecessary
- b) It hinders the teacher's role
- c) **It supports the teacher's role**

**4. Good communication skills and being a good listener , as well as a good speaker ,
can help in preventing problems in the classroom**

5. Parent involvement will support your role as a teacher

6. If teacher reprimand students he she should

, use a normal tone of voice, look at the student, do not use gestures

7. school should

Inform parents that appropriate behaviour is a strong expectation from school.

8. Ensuring that all students learn in safe environment is the prime objective of a teacher.

9. Teacher should ensure that all students learn in a safe environment.

10. Communication can be verbal and non-verbal and just as in everyday life, poor communication can cause unnecessary problems

Subjective:

1. What role do communication skills play in classroom management?

- Communication skills, both verbal and non-verbal, are crucial for preventing unnecessary problems in the classroom.

- Good communication fosters a welcoming environment for learning.

2. How should reprimands be conducted according to Korr and Nelson?

- Reprimands should be delivered in a normal tone of voice, avoiding gestures like pointing fingers, and without insisting on having the last word.

3. Why is parental involvement important in classroom management?

- Parental involvement supports the teacher's role by enforcing appropriate behaviors at home, such as using behavior charts to monitor and address problematic behaviors.

4. What does the term "institutional warehouses" refer to in the context of classrooms?

- "Institutional warehouses" describe classrooms where students are expected to sit for long periods in overheated rooms, potentially hindering learning and appropriate behavior due to discomfort and restlessness.

5. What are some features of a whole-school approach to caring for the physical dimension of classrooms?

- A whole-school approach includes purpose-built buildings, spacious classrooms, well-equipped facilities like laboratories and libraries, and adequate resources for both students and staff.

6. What are some considerations regarding learning and behavior in institutional warehouse-like classrooms?

- Such environments may not be conducive to effective learning or appropriate behavior, raising questions about the suitability of the learning environment and the need for more student-centered approaches.

7. Students talk:

Student talk can be managed through:

- Raising of hands
- Chorus responses
- For both, teachers need to signal as to when which response is required

8. Role of effective teacher in managing classrooms?

Effective teachers:

- Instruct students in specific rules about appropriate behaviour
- Monitor student compliance by consistently enforcing acceptable behaviour
- Organize class time so that most class time is devoted to instruction

Lesson 13 [topic 73-78]

Objective:

1. What is a crucial consideration when arranging the physical space of a classroom?

- Visibility

2. Which factor is essential for the teacher's position in classroom setup?

- Visibility

3. What are examples of possible noisy surroundings outside the classroom?

- Traffic noise, adjoining classes noise

4. How can seating plans aid classroom management?

- Quick learning of student names

5. Why is independent space important for each student in the classroom?

- Prevents disturbances

6. What role does appropriate lighting play in the classroom?

- Conducive learning environment

7. How should room temperature be managed to support student comfort?

- Encourage appropriate dressing

8. What considerations should be made regarding classroom temperature in extreme weather conditions?

- Equip with fans or heaters

9. How can seating arrangements be modified to support different instructional activities?

- Adjust for whole-group instruction

10. Why is it important for teachers to establish listening stations with headsets?

- Mitigate distractions from loud external noises

11. in summary the classrooms should be well

ventilated

12. It will be easy for teacher to perform administrative task whe seating arrangements of student were.

Permanent.

13. The right of others to work in

quiet conditions needs to be protected.

14. Seating arrangements can be modified to support different types of instruction,
such as whole group instruction

15. The Noise level:

Outside the classroom should be under control

16. Some children learn best in bright light while others do significantly better in low light

Subjective:

1. What factors should be considered when arranging the physical space of a classroom?

- The physical space should ensure good visibility,
 - no obstructions,
 - adequate lighting,
 - and minimal noise to prevent distractions.

2. What are some examples of possible noisy surroundings outside the classroom?

- Traffic noise,
 - noise from adjoining classes,
 - playground noise,
 - and staff conversations in hallways can disrupt the learning environment.

3. Independent space?

Each student must have a place to work and a place to store his/her things. There must be sufficient space between the rows of seats so that one student cannot disturb the other. In group work there must be separate space for materials.

4. How Permanent seating arrangements will help teachers

Permanent seating arrangements will help teachers to: - Learn students names quickly - Take attendance - And perform any other administrative task while students are involved in some instructional activity

Lesson 14 [topic 79-84]**Objective:****1. How can furniture arrangements in a classroom be made more informal?**

- Soft chairs or pillows, or on the carpet

2. What does research suggest about the myth of sitting up straight in hard chairs?

- It causes stress on the buttock tissues and leads to fatigue and discomfort.

3. What should be considered when organizing students for small group collaboration?

- Arrange students around tables or clusters of desks.

4. What is the significance of placing classroom accessories at the sight level of students?

- Ensures easy access and ownership by students.

5. How is classroom facilities management defined?

- It involves ensuring that buildings and technical systems support educational operations.

6. What is the purpose of preventive maintenance in facilities management?

- To avoid breakdown and ensure optimal performance.

7. When does emergency repair of facilities typically occur?

- When urgent measures are needed due to breakdowns.

8. What are the advantages of predictive maintenance?

- It allows for the prediction of equipment failure based on various factors.

9. How should classroom accessories be arranged to facilitate student access?

- At the sight level of students for easy access.

10. What is the importance of arranging students around tables or clusters of desks?

- To facilitate collaboration in small groups.

11. All classroom accessories should be placed at **the sight level** of students.
12. in Predictive maintenance: **computer software is used to predict equipment failure**
13. Routine maintenance is carried out **periodically-monthly, quarterly** or even annually depending on the agreed schedule by the class/school manager.
14. Students **should take ownership of classroom facilities**
15. About **75%** of the total body weight is supported on only four square inches of bone when humans sit up straight in a hard chair
16. **Routine** maintenance is carried out periodically-monthly, quarterly or even annually depending on the agreed schedule by the class/school manager.
17. Students works should be displayed on **bulletin** boards
18. Emergency repairs take place when a facility **breaks down** and urgent measures or steps are to be taken to remedy the situation.
19. **Establish informal furniture** arrangements where students can sit on soft chairs or pillows, or on the carpet
20. **Facilities management is a process of ensuring** that buildings and other technical systems support the operations of an organization.
21. **Emergency repairs** take place when a facility breaks down and urgent measures or steps are to be taken to remedy the situation.

Subjective:

1. Question: How can the physical layout of a classroom reflect the teaching style of the educator?

- Answer: The physical layout of a classroom can mirror the teaching approach of the educator by organizing students around tables or clusters of desks for collaborative group work. Alternatively, for whole group discussions, a circle or U-shaped desk configuration can be used. This arrangement encourages interaction and engagement among students, aligning with teaching methods focused on discussion and participation.

2. Question: What factors should be considered when arranging classroom accessories such as whiteboards, bulletin boards, and multimedia equipment?

- Answer: Classroom accessories should be placed at the sight level of students to ensure easy access and engagement. Students should be able to interact with these resources without difficulty, fostering a sense of ownership and participation in the learning environment.

Additionally, students' work displayed on bulletin boards can further enhance their connection to the classroom space.

3. Question: Define classroom facilities management and its role in the educational setting.

- Answer: Classroom facilities management encompasses the application of scientific methods to ensure that the physical environment supports educational goals and objectives. This involves planning, organizing, decision making, coordination, and control of the physical learning environment. Effective facilities management optimizes the use of human and material resources to create conducive spaces for teaching and learning.

4. Question: What are the key dimensions involved in the maintenance of school facilities?

- Answer: School facility maintenance involves several dimensions, including preventive maintenance, routine maintenance, emergency repairs, and predictive maintenance. Preventive maintenance aims to prevent breakdowns and ensure optimal performance, while routine maintenance is carried out periodically to address ongoing upkeep needs. Emergency repairs occur in response to sudden breakdowns, often due to a lack of maintenance culture, while predictive maintenance utilizes computer software to anticipate equipment failures based on various factors.

5. Question: How does seating arrangement impact student engagement and collaboration in the classroom?

- Answer: The seating arrangement in a classroom significantly influences student engagement and collaboration. Informal furniture arrangements, such as seating on soft chairs or pillows, can create a comfortable and inviting atmosphere conducive to learning. Organizing students around tables or clusters of desks promotes collaboration and interaction, fostering a sense of community and shared learning experiences among students.

6. Question: Discuss the role of teacher's position in the physical dimension of a classroom.

- Answer: The teacher's position in the classroom plays a crucial role in managing the physical environment and ensuring effective instruction. By positioning the desk where the teacher can monitor all students' activities without obstructing movement, the teacher maintains control and supervision. This strategic placement enables the teacher to observe and engage with students while facilitating a conducive learning environment.

8. Question: Discuss the significance of establishing independent space for each student in the classroom.

- Answer: Providing independent space for each student is essential for creating a conducive learning environment. This ensures that students have a designated area to work and store

their belongings, promoting organization and focus. Adequate space between rows of seats prevents disturbances and conflicts among students, minimizing classroom management issues and facilitating a productive learning atmosphere.

9. Question: How can educators utilize the physical layout of a classroom to enhance student learning experiences?

- Answer: Educators can leverage the physical layout of a classroom to optimize student learning experiences by arranging furniture and accessories to support instructional goals. For example, creating learning stations for individual work or collaborative group activities allows educators to cater to diverse learning needs. By considering factors such as lighting, noise levels, and seating arrangements, educators can create a comfortable and engaging environment conducive to effective teaching and learning.

10. Question: Explain the impact of noise levels on student learning and strategies to mitigate noise-related distractions in the classroom.

- Answer: Excessive noise levels can disrupt student concentration and hinder learning outcomes. To mitigate noise-related distractions, educators can establish listening stations with headsets for activities that require focused attention. Additionally, monitoring and controlling noise levels outside the classroom, such as traffic noise or noise from adjoining classes, contribute to creating a conducive learning environment. By implementing strategies to manage noise effectively, educators ensure that students can engage in learning activities without unnecessary distractions.

Q11. Research on posture

: - Students learn best when sitting up straight in hard chairs is a myth.

- About 75% of the total body weight is supported on only four square inches of bone when humans sit up straight in a hard chair.

The results in stress on the buttock tissues, causes fatigue, discomfort, and the need for frequent changes in posture.

- Research supports the common sense notion that many students pay better attention and achieve higher grades in more comfortable settings.

Lesson 15 [topic 85-90]

Objective:

1. What is the significance of task variety in classroom management?

- a) It enhances student engagement and interest.

- b) It reduces teacher workload.

- c) It increases disciplinary issues.

2. Why is it important for teachers to consider the physical layout of the classroom?

- a) To increase noise levels.

- b) To limit student movement.

- c) To facilitate effective teaching and learning.

3. How does pupil choice contribute to task variation?

- a) It enhances student engagement and ownership.

- b) It restricts student creativity.

4. Over-frequent use of similar format for presenting tasks may bore the students.

5. Effective planning involves both selecting those activities which enable students to achieve objectives

6. Students should be engaged in: - Individual - Cooperative or competitive working pattern

7. The lesson should give every student a chance to be actively involved

8. The less attractive or appealing a task, the more likely that work is delayed or students become distracted from it

9. where students choose tasks they still should be told what the task entails.

10. Effective planning involves completing class activities in the available time

Subjective:

1. Question: Why is task variety considered a crucial tool for effective classroom management?

- Answer: Task variety is essential because it helps maintain student motivation and interest in classroom activities. By incorporating diverse tasks, teachers can cater to different learning preferences and keep students engaged, ultimately fostering a conducive learning environment.

2. Question: How do teachers ensure that activities maintain or increase student motivation and interest?

- Answer: Teachers achieve this by understanding the context of the lesson, identifying students' interest areas, considering age-level abilities, and acknowledging the attention span of students. By aligning activities with these factors, teachers can design tasks that effectively capture students' attention and promote active participation.

3. Question: What factors influence the length of time allocated to a specific task?

- Answer: The length of time on a task depends on various factors, including the curriculum area, the age of students, and their need for frequent changes in activity. Teachers must also consider the complexity of the task and ensure that students are developmentally ready to undertake it.

4. Question: Why is variety in the presentation and format of tasks essential?

- Answer: Over-frequent use of similar formats for presenting tasks may lead to student boredom. Variety in presentation methods is crucial to sustain student engagement and prevent monotony. Incorporating changes in task behavior helps alleviate boredom and keeps students motivated.

5. Question: How does pupil choice contribute to task variation?

- Answer: Allowing students an element of choice, such as topic selection, enhances task engagement and ownership. While students may have options, they should still be informed about the task's requirements. Patterns of interaction, whether individual, cooperative, or competitive, also contribute to task variation.

6. Question: Why is effective planning of activities important for classroom management?

- Answer: Effective planning ensures that activities align with educational objectives and can be completed within the allotted time. Poorly timed lessons can lead to disruptions and hinder learning outcomes. Planning activities that fit both educational aims and time constraints is essential for successful classroom management.

7. Question: How does the sequence of activities promote student learning?

(i) Sequence Promotes Learning: The sequence of activities should promote the students' achievement of a particular teaching objective. For example, preliminary activities may be an orientation exercise of what is to follow.

(ii) Sequence Ensures Involvement: The lesson should give every student a chance to be actively involved. For example, discussion activities must be arranged so everyone can participate

- Answer: The sequence of activities should facilitate students' achievement of teaching objectives by providing an orientation to what follows. Each activity should allow every student to actively participate, ensuring engagement and involvement throughout the lesson.

8. Question: What challenges can arise if the sequence of activities is not appropriately planned?

- Answer: Inadequate planning of activity sequence can lead to students' disengagement and a failure to achieve learning objectives. Students may struggle to follow the lesson's flow, resulting in confusion or lack of participation. Effective planning ensures smooth transitions between activities and maximizes learning opportunities.

9. Question: How do teachers ensure that classroom activities fit both educational aims and time constraints?

- Answer: Teachers achieve this balance by selecting activities that align with educational objectives and estimating the time required for each task. They must anticipate potential challenges and adjust activity sequences accordingly to ensure that learning goals are met within the available time frame.

Q 10. What are students to do! ?

Boredom sets in because of:

- Doing a task for a prolonged period
- Repetition of tasks
- Continuous sitting at one place
- Continuous listening to teacher talk

Lesson 16 [topic 91-97]

Objective:

1. The most important part for managing learning and discipline is to keep students busy.
2. Outdoor activities should be manageable
3. Teachers must be trained to handle outdoor activities
4. Students need prior training before undertaking outdoor activities.

5. Nature experiments are related with the science subjects.
6. Starter activities can be planned at the start of the lesson to motivate the students towards the lesson
7. Preferred or more exciting activities should follow those which are less exciting or require more effort from students
8. What should be the ratio of teacher and students in an effective classroom?

1:30

9. Major stakeholders

(principal, teacher, students, parent) come in the whole school approach

10. teacher should arrange outdoor activities that are meaningful.

11. Teachers must be trained to handle outdoor activities.

12. Every outdoor activity should follow set rules.

13. -----activities should be evenly spread throughout the curriculum and its-----should be clearly communicated to the students.

Outdoor and its objectives

14. which activity includes both recreation and learning?

Camping

15. What is the preferable lesson duration in class?

30 to 40 mnts

16. when a teacher feels that students have become bored doing some task. Which type of activities can enhance the motivational level of students.

Less exciting activities

17. Management of classroom and outdoor activities and discipline need a commitment from all stakeholders.

Subjective:

Q. Management of Outdoor activities should:

- ✓ be manageable
- ✓ be age appropriate
- ✓ align well with curriculum aims
- ✓ practical and interesting
- ✓ be within a particular time frame

Q. Activities to keep students busy

• Starter activities

These activities can be planned at the start of the lesson to motivate the students towards the lesson.

• Filler activities

Filler activities must be related with the content.

• Optional activities

For example if teacher gives the activity of paragraph writing to the students. She can give optional activity connected to paragraph writing to the students. It can be in the form of creative writing. The optional activities extend those activities which students are already doing.

• Less exciting activities

These can be used when a teacher feels that students have become bored doing some task. This type of activities can enhance the motivational level of students.

Question: What are some examples of outdoor activities, and how do they enhance students' learning experiences?

Answer: Outdoor activities encompass a variety of experiences,

• Field trips

These can be content related. They can deal with different subject areas. It can also be a recreation

• Nature experiments

These are related with the science subjects.

• Research based studies of various phenomena

These can be determined by the teachers.

- Fun activities, camping

With academics other activities are also important for the students like camping. It includes both recreation and learning.

Lesson 17 [topic 98-102]

Objective:

1. **Curriculum represents all the activities** a school provides to support the development of: • Academic • Social • Personal abilities
2. Learning outcomes can be increased through: • **Positive on-task behavior**
3. Time taken to support children in learning such social skills in early years can provide a positive **foundation for later social and emotional development**
4. The curriculum should provide **increased opportunities** to work with others to learn from appropriately modeled behavior.
5. The class curriculum needs to be structured to ensure that all students are: **Actively engaged in worthwhile academic activities**

Subjective:

Question: What does the term "curriculum" encompass, and what are its desired outcomes for students?

Answer: The term "curriculum" encompasses all the activities provided by a school to support students' academic, social, and personal development. Its desired outcomes include the acquisition of skills, knowledge, and attitudes necessary for preparing students for adult life.

Question: What role does the school curriculum play in developing positive behavior and social skills among students?

Answer: The school curriculum plays a central role in developing motivated learners with problem-solving skills and the ability to make decisions individually and cooperatively. It also focuses on social skill development, such as sharing, taking turns, and working together, laying a positive foundation for later social and emotional development.

Question: How can parental support and increased opportunities at school contribute to students' social and emotional development?

Answer: Social-emotional training provided at home offers a secure base for children as they face social, emotional, and intellectual challenges at school. Increased opportunities within the curriculum to work with others and learn from modeled behavior aid in developing problem-

solving and cooperative decision-making skills, crucial for positive classroom behavior management.

Question: What factors contribute to ensuring tasks are meaningful, achievable, and well-structured within the curriculum?

Answer: Meaningful tasks establish a connection between classroom activities and real-life situations, making them interesting for students. Achievable tasks prevent frustration by matching students' abilities, while well-structured tasks ensure active engagement, appropriate challenge, and consistent success for all students.

Lesson 18 [topic 103-108]

Objective:

1. What role does feedback play in classroom management?

Establishing positive relationships with students.

2. What do content enhancement techniques aim to achieve?

Making learning easier.

3. What are advance organizers used for in teaching?

Structuring lesson content.

4. How do mnemonic devices contribute to learning?

By aiding information retention.

5. What types of visual displays can assist learning?

Maps, flow charts, pictures, and collages.

6. What is the purpose of using story maps in teaching?

To guide comprehension and story development.

7. Why is thorough lesson planning important?

To anticipate potential challenges.

8. What factors should teachers consider during lesson planning?

Content, sequence of activities, materials, and room management.

9. How can a lesson preview benefit teacher?

By anticipating potential challenges.

10. What is the primary goal of incorporating study guides into lessons?

Emphasizing important content and concepts.

Subjective:**1. What role does feedback play in classroom management?**

- Feedback establishes a positive relationship with students by conveying their value and aids in maintaining positive behavior and engagement in curriculum activities.

2. How can content enhancement techniques assist in classroom management?

- Content enhancement techniques make learning easier,
 - reducing chances of disruption,
 - and need to be embedded in the curriculum with adequate teacher training.

3. What are advance organizers in teaching?

- Advance organizers provide a structured approach to lessons,
 - including steps,
 - background information,
 - vocabulary, and outcomes,
 - aiding in effective lesson planning and delivery.

4. How do mnemonic devices contribute to learning?

- Mnemonic devices aid information retention by converting data into a more memorable format, facilitating easier acquisition and retention of knowledge.

5. What types of visual displays can assist learning?

- Visual displays such as maps,
- flow charts, pictures,

and collages help reinforce learning concepts by providing visual representations of information.

6. Why is it important to think through lesson plans thoroughly before implementation?

- Thorough preparation helps anticipate potential challenges, ensuring that the planned activities, content, and classroom management strategies align effectively with students' needs and classroom dynamics.

7. How can a lesson preview benefit novice teachers?

- A lesson preview allows novice teachers to anticipate potential challenges and management issues, enabling them to address them proactively and ensure smoother lesson delivery.

Lesson 19 [topic 109-114]

Objective:

1. What are the specific instructional procedures that lead to increased student engagement?

- a) Interactive teaching styles.

- b) Traditional lecture formats.

2. How does preparation contribute to effective teaching?

- a) By ignoring individual student needs.

- b) By planning for student success.

3. Thinking about and planning for what each student in the classroom will do involves: • **Identifying content and student needs**

4. Leave some time of the lesson for **recapping and summarizing** it

Subjective:

1. How does effective preparation contribute to successful teaching?

- Effective preparation involves identifying student needs,
- planning engaging lessons,
- and ensuring student success, which ultimately enhances learning outcomes and classroom management.

2. What role does feedback play in maintaining a positive classroom environment?

- Feedback fosters positive teacher-student relationships,
- communicates the value of each student,
- and supports academic and behavioral growth,
- thereby contributing to a positive classroom atmosphere.

3. How can teachers use questioning techniques to enhance student engagement?

- By asking open-ended and probing questions,
- encouraging student participation,
- and inviting student questions,
- teachers can stimulate critical thinking,
- deepen understanding,
- and promote active engagement in the learning process.

4. Why is it important for teachers to monitor student work during instruction?

- Monitoring student work allows teachers to maintain classroom control,
- provide timely assistance,
- and ensure that students stay on task,
- which facilitates a productive learning environment and minimizes disruptions.

5. How does summarizing contribute to effective lesson closure?

- Summarizing reinforces key concepts,
 - checks for understanding,
 - and prepares students for subsequent learning,
 - ensuring that lessons are comprehensively internalized and helping students connect new knowledge to prior learning.

6. What are the benefits of engaging in reflection on past instruction?

- Reflecting on past instruction enables teachers to assess the effectiveness of their teaching strategies, identify areas for improvement, and make informed instructional decisions, ultimately enhancing student learning outcomes.

7. Why is it important for teachers to think through their lesson plans before implementation?

- Thinking through lesson plans allows teachers to anticipate potential challenges,
 - ensure alignment with instructional goals,
 - and make necessary adjustments to optimize student engagement and learning outcomes.

Lesson 20 [topic 115-120]**Objective:****1. What instructional strategies can promote a positive classroom atmosphere?**

- a) Chunking information

- b) Memorizing everything at once

2. How does cooperative learning contribute to classroom management?

- a) Increases competition among students

- b) Fosters teamwork and mutual respect

3. At one time let the students store only about **4-5** bits of information in minds.

4. While teaching multiplication, tell students that **multiplication is similar to addition**. 3×5 is same as $5+5+5$.

5. Most cooperative learning classroom are well behaved because students are motivated to learn and **are actively engaged in learning activities**

6. Students have unique strengths as claimed **by Howard Gardner** (1984). Capitalize on them by getting to know their likes/dislikes

Subjective:

1. Question: How can instructional strategies promote a positive classroom atmosphere?

- Answer: Instructional strategies such as chunking information, building associations, and providing adequate processing time engage students, enhance focus, and facilitate better retention of learning.

2. Question: What role does cooperative learning play in classroom management?

- Answer: Cooperative learning fosters a positive classroom environment by promoting student motivation, active engagement, and positive social interactions, leading to improved behavior and learning outcomes.

3. Question: How can teachers encourage student responsibility in their learning?

- Answer: Teachers can foster student responsibility by establishing learning contracts, catering to individual strengths, and varying instructional methods to maintain student interest and engagement.

4. Question: What types of assessments contribute to a positive classroom atmosphere?

- Answer: Formative assessments like portfolios and informal assessments such as writing samples allow students to track their progress while providing valuable feedback to teachers, ensuring a supportive learning environment.

5. Question: Why is it important for teachers to accommodate learner differences?

- Answer: Understanding learner differences enables teachers to tailor lessons to diverse learning styles and paces, ensuring that all students have equitable opportunities to comprehend and internalize concepts effectively.

6. Question: How can differentiated learning tasks benefit students?

- Answer: Differentiated tasks cater to various learner levels, ensuring that all students are appropriately challenged and engaged. This approach promotes smoother lesson flow and reduces disruptions in the classroom.

Lesson 21 [topic 121-126]

Objective:

1. Why is it important for teachers to listen to all students in the classroom?

- a) To address individual needs and foster cooperation
- b) To ignore student concerns

2. What characterizes the strong control management style?

- a) Lack of teacher preparedness
- b) Strict monitoring of student behavior and adherence to rules

3. What is the primary focus of the laissez-faire management philosophy?

- a) Rigid control and strict adherence to rules
- b) Creating a relaxed and flexible learning environment

4. How do laissez-faire teachers approach classroom planning?

- a) They engage in minimal planning
- b) They prefer flexibility over rigid control

5. What characterizes the moderate control management style?

- a) Complete control over all aspects of the classroom
- b) A balance between strict control and laissez-faire approach

6. What is the teacher's role in a moderate control classroom?

- a) Setting expectations for respectful behavior and addressing disruptions after class
- b) Publicly embarrassing disruptive students

7. What philosophy emphasizes the importance of treating the classroom as a "sacred temple of learning"?

- a) Laissez-faire
- b) Strong control

8. Most of the classroom management problems arise when students get a message from teachers that **only 'chosen fews'** are heard or given importance to

Subjective:

1. What is the significance of listening to all students in the classroom?

- Listening to all students ensures their needs are addressed,
 - fosters cooperation,
 - and prevents frustration among students.

2. What characterizes the strong control management style?

- The strong control style involves
 - strict monitoring of student behavior,
 - high teacher preparedness,
 - and zero tolerance for disruptive behavior.

3. What is the primary focus of the laissez-faire management philosophy?

- The laissez-faire approach emphasizes creating a relaxed and flexible learning environment with minimal teacher intervention.

According to this philosophy, teachers teach the classroom as a relaxed, "laissez-fair" place of learning. This management style or philosophy is very relaxed and "hands-off." Teachers who use this style of management are very flexible and respond to changes easily. Teachers may not be aware of student problems and do not bother about adhering to certain rules for classroom discipline.

Laissez-Fair Teacher's role:

- Teachers do minimal planning, and while they can be quite prepared to deliver course content and material, they dislike rigid control and value the ability of response to changes.
- The focus in this type of classroom is a comfortable, relaxed atmosphere where the teacher tolerates reading, talking and late arrivals/early departures.

Usually, the more attentive students sit in the front, and the teacher speaks to them.

4 What characterizes the moderate control management style?

- Moderate control strikes a balance between strict control and a laissez-faire approach, where teachers set expectations for respectful behavior and address disruptions after class.

5. What philosophy emphasizes treating the classroom as a "sacred temple of learning"?

- The strong control philosophy emphasizes treating the classroom with reverence and strict adherence to rules.

Lesson 22 [topic 127-131]

Objective:

1. What is the average perception of a large class size?

- a) 30 students
- b) 50 students

2. What does the teacher usually become in a large class?

- a) Facilitator
- b) Preacher

3. What is an advantage of large classes?

- a) Limited interaction among students
- b) More interaction among students

4. What is a challenge in a large class related to pupil attention?

- a) High level of individual attention from the teacher
- b) Difficulty concentrating for some students

5. How does class size affect teacher morale and stress levels?

- a) Decreased stress and increased enthusiasm
- b) Associated with increased stress and potential burnout

6. How can teachers correct large amounts of written work more efficiently?

- a) Assign individual essays for every student

- b) Encourage group work and peer editing

7. What method can be used to take attendance in a large class?

- a) Oral roll call

- b) Sign-in sheet

8. What is a benefit of using self-editing for written assignments?

- a) Promotes student responsibility and autonomy

9. How can seating arrangements be managed in a large class?

- a) Random seating assignments

- b) Creating a seating chart

10. What encourages cooperative learning and reduces grading workload?

- a) Individual assessments

- b) Group work and shared grades

11. Have students work in groups to produce one piece of writing for each group or to complete grammar exercises together.

Subjective:

1. What are the advantages of having a large class size?

- Large classes promote more interaction among students,
 - provide a diverse range of resources,
 - foster natural professional development for teachers,
 - and encourage peer teaching and collaboration.

2. What challenges do students face in adjusting to large classes?

1. Pupil adjustment to school: - In large classes it is difficult to help students become independent and resourceful in the classroom. - The students are affected in their social

development by the amount of space available in class. If they fight for space in the classroom, they get emotionally upset and insecure. 2. Teacher's Morale, Stress and Enthusiasm: - Class size is associated with increased teacher stress and can lead to teacher burn.

Q3. Advantages of Large Classes?

(i) More interaction among students: There are always enough students for interaction, and there is a rich variety of human resources.

(ii) Heterogeneous Elements: - The teacher is not the only pedagogue, and since the large class is usually heterogeneous, more proficient students can be used to help lower level ones.

(iii) Natural Professional Development: The teacher is never bored and that professional development occurs naturally as the teacher tries to find new ways of coping with the large number of students.

(iv) Peer Teaching: Students develop strategies for helping themselves and their classmates through peer-teaching and collaboration, thus fostering an atmosphere of cooperation.
