Which type of hypervisor is more susceptible to security risks due to its dependency on the host operating system?
A. Type 4
B. Type 2
C. Type 1
D. Type 3

Which hypervisor is known to prioritize performance-critical workloads over security?
A. Citrix XenServer
B. Oracle VirtualBox
C. VMware vSphere
D. Microsoft Hyper-V

Among the hypervisor options, which one is more prone to attacks targeting vulnerabilities in the underlying host operating system?
A. Oracle VirtualBox
B. Microsoft Hyper-V
C. VMware vSphere
D. Citrix XenServer

Which type of virtualization creates virtualized versions of physical hardware devices, allowing multiple virtual devices to run on a single physical device?
A. Server virtualization
B. Storage virtualization
C. Hardware virtualization
D. Network virtualization

Which type of virtualization creates virtualized versions of physical network devices, allowing multiple virtual networks to run on a single physical network?
A. Network virtualization
B. Storage virtualization
C. Server virtualization
D. Application virtualization

Which hypervisor type is commonly used for personal desktop virtualization and software testing?
A. Type 4
B. Type 2
C. Type 1
D. Type 3

Which type of virtualization allows applications to run on a virtualized operating system, separate from the host operating system?
A. Server virtualization
B. Application virtualization
C. Storage virtualization
D. Network virtualization

Which type of virtualization allows multiple virtual servers to run on a single physical server, sharing the underlying hardware resources?
A. Network virtualization
B. Server virtualization
C. Storage virtualization
D. Application virtualization

Which type of virtualization pools storage resources from multiple physical devices into a single virtual storage device?

A. Storage virtualization
B. Server virtualization
C. Network virtualization
D. Application virtualization

Which technology provides the solution of Application level virtualization?
A. Microsoft Azure
B. Docker
C. Microsoft App-v
D. Google Cloud Platform

The practice of hosting a desktop Operating system and applications together on remote host is called _____.
A. Storage Virtualization
B. Desktop Virtualization
C. Data Virtualization
D. Application Virtualization

Which statement is incorrect in case of Applications Virtualization?
A. Run cross-platform applications
B. Application are independent of underlying OS
C. Applications cost reduced
D. Applications installed locally on client machine

Which technology companies are known for operating massive data centers to support their services?
A. Twitter and LinkedIn

Vu Topper RM

بری صحبت سے تنہائی بہتر ہے اور تنہائی سے نیک صحبت بہتر ہے

B. Facebook and Google
C. Microsoft and Apple
D. Amazon and Netflix

Which type of organization offers data center services such as colocation, hosting, or cloud services?
A. Advertising Agencies
B. Law Firms
C. Hospitals
D. Data Center Service Providers

What is the primary advantage of a Hardware-Defined Data Center (HDDC)?
A. Lower hardware costs
B. Enhanced scalability and flexibility
C. Higher performance and lower latency
D. Simplified management and reduced complexity

Which company designs its own custom servers and data centers as part of its infrastructure strategy?
A. TikTok
B. Airbnb
C. Facebook
D. Spotify

What is the primary advantage of a Software-Defined Data Center (SDDC)?
A. Improved security

Vu Topper RM

B. Faster data processing speed.
C. Enhanced scalability and flexibility
D. Reduced hardware costs.

What does vCPU stand for in the context of a virtual data center?
A. Virtual Core Processing Unit
B. Virtual Compute Processing Unit
C. Virtual Central Processing Unit
D. Virtual Control Processing Unit

Which feature allows multiple virtual machines to access a shared storage system concurrently while maintaining data integrity?
A. Network-attached storage (NAS)
B. Storage area network (SAN)
C. Storage virtualization
D. Distributed file system

What is the benefit of using virtual hard disks in a virtual data center?
A. Reduced hardware costs and better resource utilization
B. Enhanced data security and encryption capabilities
C. Improved network connectivity and lower latency
D. Increased physical storage capacity and faster data access

How are vCPUs allocated to virtual machines in a virtual data center?
A. vCPUs are dynamically allocated based on the workload of each virtual machine.
B. vCPUs are only allocated to high-priority virtual machines.
C. vCPUs are shared among all virtual machines in the data center.

Vu Topper RM

D. Each virtual machine is assigned a fixed number of vCPUs.

Which architectural component of a Virtual Data Center enables the migration of virtual machines between physical hosts without service interruption?
A. Load Balancer
B. Live Migration Manager
C. Hypervisor
D. Virtual Switch

3. Which type of virtualization creates virtualized versions of physical network devices, allowing multiple virtual networks to run on a single physical network? Correct answer: c) Network virtualization
A. Server virtualization
B. Application virtualization
C. Network virtualization
D. Storage virtualization

Which component of an SDDC is responsible for managing and orchestrating virtual machines?
A. Software-Defined Storage (SDS)
B. Hypervisor
C. Virtual Machine Manager (VMM)
D. Software-Defined Networking (SDN)

Which virtualization tool provides a Type-2 hypervisor that runs on top of an existing operating system?
A. KVM
B. VirtualBox
C. Hyper-V
D. VMware vSphere

What is a virtual machine (VM)?
A. A network device that connects virtual machines to the internet
B. A software program that emulates a physical computer system
C. A virtual storage device used for data backup.
D. A physical server in a virtualized environment

Which of the following is a popular open-source virtualization tool?
A. Xen
B. VMware vSphere
C. VirtualBox
D. Hyper-V

What is the purpose of a snapshot feature in virtual machines?
A. To capture the state of a virtual machine at a specific point in time for backup or recovery purposes.
B. To transfer a virtual machine from one physical server to another without interruption.
C. To allocate additional resources to a virtual machine for improved performance
D. To allow multiple virtual machines to communicate with each other

Which component of VMware vSphere allows multiple virtual machines to run on a single physical server?

A. ESXi

B. Virtual Machine Monitor (VMM)

C. vMotion

D. vCenter
