OBJECTIVE PART

LESSON 21

1. Who are responsible for the standardization of English?

- a) English teachers
- b) **Native speakers**
- c) Foreign language experts
- d) All English learners

2. According to SLA and World Englishes, what are deviations from standard English referred to as?

- a) Errors
- b) Mistakes
- c) Corrections
- d) **Variations**

3. What is determined by the role and status an additional language enjoys in a community?

- a) The uses and functions of the additional language
- b) The proficiency level of the language learner
- c) The geographic location of the language learner
- d) The age of the language learner

4. What does the world Englishes orientation offer to SLA research?

- a) Reliance on SLA theories from Inner Circle countries only
- b) Research potential in Applied Linguistics and Sociolinguistics
- c) Focus on language fossilization and interlanguage only
- d) Limited research studies on multilingual contexts

5. Is a native speaker a requirement for foreign language instruction in non-native-speaking countries?

- a) It depends on the language
- b) Yes
- c) No
- d) It depends on the country

6. What is the preference for English language teachers in non-native-speaking countries?

- a) Non-native speakers
- b) Native English speaking teachers
- c) Certified teachers
- d) Bilingual teachers

7. According to Sridhar, how many L2 users learn and use second languages in their own countries?

- a) Millions
- b) Thousands
- c) Billions
- d) Trillions

8. What is the ideal definition of a native speaker?

- a) Someone who learned a language in school
- b) Someone who is born in a country and learns the language there
- c) Someone who acquired a given language as her/his home language at mother's knee, without benefit of formal instruction.
- d) Someone who is a fluent speaker of multiple languages

9. What is genetic nativeness in language referring to?

- a) Historical relationships of contact and convergence between languages
- b) Proficiency comparable to native speakers'
- c) Sociolinguistic status in range and depth of use in a society
- d) Recognizing standard English

10. What is functional nativeness referring to in language proficiency?

- a) Historical relationships of contact and convergence between languages
- b) Sociolinguistic status in range and depth of use in a society and proficiency comparable to native speakers' proficiency
- c) Recognizing standard English
- d) Various language affiliations

11. What is communicative competence?

- a) The ability to use a community's language in appropriate ways to achieve goals and to operate in the society in an intended manner
- b) The ability to write well
- c) The ability to speak loudly
- d) The ability to learn different languages

12. What is the socially appropriate use of language?

- a) Language creativity
- b) Communicative competence
- c) Language errors
- d) Language proficiency

13. What are the two processes that effective communication in world Englishes context depends on?

- a) Apposition and synecdoche
- b) Slang adaptation and narrative creation
- c) Nativization and Englishization
- d) Neologism and semiotics

14. What is the adaptation of English to local socio-cultural environments known as?

- a) Assimilation
- b) Acculturation

- c) Anglicization
- d) **Nativization**

15. What is the term for changing from one language to another within sentences?

- a) Code mixing
- b) **Code switching**
- c) Translation
- d) Language switching

16. What is the term for changing from one language to another across sentences and larger language domains?

- a) Code weaving
- b) Translation
- c) **Code mixing and code switching**
- d) Multilingualism

17. According to Kachru, World Englishes (NI) states:

- a) **Several models in English**
- b) Standard command of English
- c) Only for native English speakers
- d) Traditional views of SLA

18. How do global Englishes challenge the traditional SLA paradigm?

- (a) **Reject the original qualification**
- b) Promotes expertise similar to the original
- c) Emphasizes the responsibility of the native speaker
- (d) focuses on global distribution

19. How are deviations from standard English viewed in SLA and WE?

- a) **SLA errors, WE variants**
- b) Errors in both SLA and WE

- c) SLA variants, WE errors
- d) Variations in both SLA and WE

20. What is the focus of World English studies?

- a) Effect of language competence
- b) Effects of language uses and functions**
- (c) influence of native speakers
- d) Importance of standardized standards

21. What is the priority of teachers in teaching English in non-English speaking countries?

- a) Teachers who speak English as their mother tongue**
- b) Teachers who are not native speakers of English
- c) Prefer neither
- d) Multilingual teachers

22. What is the ideal definition of a native speaker?

- a) Language without teaching
- b) Competent language user
- c) Monolingual home language
- d) Early learning of the home language**

23. What does functional mother tongue mean in world English?

- a) Standard English usage
- b) Historical language relations

c) Language skills

d) Social depth of language

24. What does communication skills mean?

a) Multilingualism

b) Effective use of language

c) Communicate only with indigenous peoples

d) write grammar

25. What does nativization mean in world English?

a) Adaptation to local culture

b) Influence of English on other languages

c) Transformation of non-English speaking cultures

d) English literary genres

CODE: ENG506

SUBJECTIVE PART

LESSON 21

1. What is the relationship between the standardization of English and native speakers?

Native speakers are not responsible for the standardization of English.

2. What are some potential benefits that World Englishes can bring to the study of Second Language Acquisition?

World Englishes can provide fertile ground for SLA research and offer research potential in applied linguistics and sociolinguistics.

3. What challenges do non-native teachers of English language instruction face in NNs countries and how does it affect language proficiency and communicative competence?

Non-native English-language teachers in NNs countries face limited exposure and access to advanced materials from native speakers. Limited exposure affects language proficiency that reflects on communicative competence, thus hampering language development.

4. Why might non-native speakers show better proficiency in a second language than native speakers in some cases?

Non-native speakers may show better proficiency in a second language than native speakers in some cases because they have useful intuitions about grammatical correctness and may not have to consciously think about how they express themselves, as well as due to social factors such as their entire way of life using many languages.

5. What is the difference between genetic and functional nativeness in language, and how does it affect communicative competence?

Genetic nativeness refers to the historical relationships of contact and convergence between languages, while functional nativeness refers to a speaker's ability to effectively use and understand a language. These differences can impact a speaker's communicative competence, which involves behaving appropriately within the norms and conventions of language use in a given culture. Native-like communicative proficiency depends on both tacit knowledge of a language and a social understanding of cultural conventions surrounding its use.

6. What factors contribute to effective communication in world Englishes contexts, and why is nativization not enough on its own?

Effective communication in world Englishes contexts depends on awareness of nativization and Englishization of local languages, as well as flexibility in using varieties of English. Nativization alone is not enough because exposure to a wide range of Englishes allows communicators to adapt to local socio-cultural environments.

7. What is code mixing and code switching and why is it not fully approved by monolingual researchers in linguistics?

Code mixing refers to changing from one language to another within sentences and code switching refers to changing from one language to another across sentences and larger language domains. It is a major characteristic of users of world Englishes and readily observable. However, it is not fully approved by monolingual researchers as its prompts need to be studied closely.

8. What are the differences in second language acquisition (SLA) regarding the different terms used to refer to the language you learn after the first?

Differences in second language acquisition include terms such as second language, foreign language, auxiliary language, and additional language. These terms refer to the different contexts and purposes of language learning after first language acquisition.

9. According to Kachru, what are the three basic claims of World Englishes (WE)?

According to Kachru, there are three basic claims of World Englishes:

There is a repertoire of models for English, not just for native English speakers. Localized innovation in English deserves credit. Ownership of English rests with all who use it.

10. How does World Englishes challenge the traditional SLA paradigm regarding the goal of teaching English to all students?

World Englishes challenge the traditional SLA paradigm by rejecting the achievement of native language competence as the goal of English learning for all students. It recognizes the plurality of English and the creation of many norms at local, national and regional levels.

11. How are deviations from Standard English viewed in Second Language Acquisition (SLA) and World Englishes (WE)?

In Second Language Acquisition (SLA), deviations from standard English are usually considered errors. In World Englishes (WE), deviations from standard English are considered variations that deserve recognition and are considered appropriate within specific speech communities.

12. How does the World English Orientation recognize the role of other languages in a multilingual context?

A world English orientation recognizes that other languages are learned/acquired in a multilingual context. It recognizes the influence of multilingualism on second language acquisition and the different functions that an additional language can have in different settings.

13. What are some of the advantages of studying World English in relation to SLA research?

The study of world English in relation to SLA research provides fertile ground for research in applied linguistics and sociolinguistics. It offers insight into the impact of language use and functions on language acquisition and helps to understand the diverse socio-cultural and pragmatic needs of new English speaking communities.

14. How does the World Englishes view of SLA differ from the orthodox view of native-like competence as a learning goal?

The World English view of SLA differs from the orthodox view in that it suggests that competence as a native competence is not necessarily the goal of learning. The World Englishes perspective recognizes the validity of non-native speaker norms (NNS) and emphasizes the socio-cultural context and appropriate use of English in the context of the outer circle.

15. What are some characteristics of English language teaching in non-native English-speaking countries in relation to exposure to native speakers and materials from the inner circle?

English language teaching in non-native English-speaking countries is often carried out by non-native English-speaking teachers. This means limited exposure to native speakers and limited access to materials from the inner circle where English is the native language.

16. What is the ideal definition of a native speaker and how does it relate to the knowledge of non-native speakers?

The ideal definition of a native speaker is someone who has acquired the language as their home language without formal instruction. They have an intuitive knowledge of grammatical correctness and can express themselves effortlessly. The knowledge of non-native speakers can vary and in some cases surpass that of native speakers.

17. What are the primary and secondary SLA criteria for native speakers?

Answer: In SLA (Second Language Acquisition), the primary criteria for native speakers are based on the monolingual concept. This means that native speakers are individuals who have adopted a particular language as their home language without the need for formal instruction. They have an intuitive knowledge of grammatical correctness and can express themselves fluently without conscious effort.

18. How does nativization affect effective communication in the context of World Englishes?

Nativization, which refers to the adaptation of English to the local socio-cultural environment, plays a vital role in effective communication in the context of World Englishes. Being aware of nativization enables individuals to understand and navigate the unique linguistic features and variations that arise in specific regions or speech communities.

19. What is code mixing and code switching and how does it relate to users of World Englishes?

Code-mixing refers to the act of changing from one language to another within sentences, while code-switching involves changing from one language to another across sentences or larger language domains. Both code mixing and code switching are common features observed among users of World Englishes. These language practices are easily observable, although they may not be fully endorsed by monolingual researchers. Understanding the reasons for code mixing and switching is essential to the study of language use in the context of World Englishes.

CODE: ENG506

OBJECTIVE PART

LESSON 22

1. Interlanguage refers to:

- a) The learner's first language (L1)
- b) The target language (L2)
- c) The intermediate states of a learner's language between L1 and L2
- d) The final stage of language learning

2. Interlanguage reflects the learner's evolving system of rules influenced by:

- a) L1 only
- b) L2 only
- c) L1 and input from the target language
- d) None of the above

3. The concept of Interlanguage is based on the hypothesis that:

- a) Varieties of English are fossilized forms of standard English
- b) Interlanguage is the result of imperfect learning

- c) Interlanguage is irrelevant in bilingual and multilingual contexts
- d) Both a) and b)

4. Fossilization is inapt to the context of world Englishes because:

- a) English has definite roles in many societies
- b) English is used in all domains of multilingual contexts
- c) The roles and contexts of English use are constantly evolving
- d) All of the above

5. SLA models in outer and expanding circles include:

- a) Teachers and materials
- b) Native speakers only
- c) Input from the target language only
- d) None of the above

6. Assumptions of SLA include:

- a) Learning goal is to attain native-like competence
- b) Learners ought to have integrative motivation
- c) Learners' primary languages are sources of transfer
- d) All of the above

7. In the outer and expanding circle context, input is available in:

- a) Standard British or American English
- b) Local indigenized variety of English
- c) Native English norms
- d) None of the above

8. Realities of outer and expanding circle context include:

- a) Multiple languages in the linguistic repertoire
- b) English serving specific functions unique to the context
- c) Irrelevance of ideal bilingualism
- d) All of the above

9. The gap between classical SLA paradigm and learning of English in outer and expanding circles leads to:

- a) Relevance of SLA concepts and methods in world Englishes
- b) Inapplicability of SLA concepts and methods in world Englishes
- c) Inclusion of local input in SLA theories
- d) None of the above

10. Multilingual users in outer and expanding circle contexts are:

- a) Deficient in English proficiency
- b) Proficient users of English and other languages
- c) Primarily focused on native-like competence
- d) None of the above

11. The acquisition of English in outer and expanding circles challenges the traditional SLA paradigm because:

- a) The target is to achieve native-like competence
- b) Fossilization and interlanguage are relevant concepts
- c) Indigenized varieties replace standard English
- d) There is a lack of bilingual teaching methods

12. In outer and expanding circle contexts, local input includes:

- a) Teachers proficient in standard British or American English
- b) Indigenized versions of American popular culture
- c) Emphasis on international English
- d) Ignoring the influence of primary languages

13. The role of the first or primary languages in the acquisition of English in outer and expanding circles is:

- a) Negatively influencing English learning
- b) Irrelevant to language acquisition
- c) Facilitating increased communicative competence
- d) Hindering the acculturation process

14. Integrating world Englishes into the SLA paradigm requires considering:

- a) Multilingualism, functions of language(s), and creative potential
- b) Native speakers' tolerance and acceptance
- c) Research on international varieties of English (IVEs)
- d) Rejection of stable variations as errors

15. Changing the SLA scenario suggests:

- a) Excluding indigenized language from the SLA typology
- b) Treating stable variations as errors
- c) Increasing familiarity with standard British and American English
- d) Accepting stable variations and new perspectives in SLA

16. The acquisition and use of indigenized varieties of English in outer and expanding circles:

- a) Are irrelevant to SLA theories
- b) Can be compared to creolization
- c) Should aim for native-like competence
- d) Require exclusive focus on native English norms

17. In the context of outer and expanding circles, the creative potential of human linguistic behavior:

- a) Is not applicable to language learning
- b) Should be discouraged to promote standard English
- c) Should be explored and recognized in SLA theories
- d) Leads to negative transfer from L1

18. The limitations of SLA in explaining English learning in outer and expanding circles are due to:

- a) Inadequate research on IVEs
- b) Lack of integrative motivation among learners
- c) Fossilization and interlanguage effects
- d) Irrelevance of local input in language acquisition

19. The acceptance of stable variations in SLA suggests:

- a) Native speakers should correct non-standard English usage
- b) Fossilization is a desired outcome of language learning
- c) Indigenized varieties should replace standard English

d) Tolerance towards language diversity and non-native norms

20. The acquisition of English in outer and expanding circles involves:

- a) Exclusively using English in all domains of multilingual contexts
- b) Employing code mixing as a deficient language practice
- c) Bilingual teaching methods and proficiency in local varieties
- d) Rejecting primary languages' positive role in language learning

CODE: ENG506

SUBJECTIVE PART

LESSON 22

1.What is interlanguage in the context of language learning?

Answer: Interlanguage refers to the intermediate state of a learner's language as they progress from their first language (L1) towards the target second language (L2). It represents the evolving system of rules that learners have at each stage of their language learning journey.

2.How is interlanguage influenced?

Answer: Interlanguage is influenced both by the learner's first language (L1) and by input from the target language (L2). The learner's evolving system of rules in interlanguage reflects the influence of both L1 and the target language.

3.What is the relationship between interlanguage and the concept of fossilization?

Answer: Fossilization, which refers to the freezing or stagnation of a learner's language development, is not relevant in the context of world Englishes. In multilingual contexts, different languages have specific roles, and English itself has various roles in many societies. The roles and

contexts of English language use are constantly evolving, making the concept of fossilization inapt in this context.

4. How does second language acquisition (SLA) theory construction overlook learners in the outer and expanding circles?

Answer: SLA theory construction often relies on data from immigrants or foreign students in universities, overlooking learners in the outer and expanding circles. There is little awareness of the factors relevant to English language learning in these contexts, leading to a lack of relevance between SLA theories and world Englishes.

5. What are some assumptions of SLA regarding language learning goals and input?

Answer: Some assumptions of SLA include the goal of attaining native-like competence to communicate with native speakers, the belief that input should comprise the entire range and depth of British and American English, and the assumption that learners should have integrative motivation for language learning.

6. How does the reality of language learning in outer and expanding circles differ from the assumptions of SLA?

Answer: In outer and expanding circle contexts, learners often interact with non-native interlocutors and may view native English norms unfavorably. The input available to them includes indigenized varieties of English from teachers, peers, and materials. Additionally, learners in these contexts often have multiple languages in their linguistic repertoire, with each language serving distinct functions, making the ideal of native-like competence less relevant.

7. How does the acquisition of English in outer and expanding circles challenge the applicability of SLA concepts?

Answer: The acquisition of English in outer and expanding circles challenges the applicability of SLA concepts because the target is not native-like competence. Instead, the focus is on achieving communicative competence in the local context, and there is an emphasis on indigenized varieties of English. The concepts of fossilization and interlanguage, which are central to SLA, may not be appropriate for researching world Englishes.

8.What is the role of first or primary languages in the acquisition of English in outer and expanding circles?

Answer: First or primary languages play a positive role in the acquisition of English in outer and expanding circles. Innovations from the first language help increase communicative competence in the target language, and they aid in the acculturation of the target language to the local context.

9.How can world Englishes be integrated into the SLA paradigm?

Answer: To integrate world Englishes into the SLA paradigm, theory construction should consider factors such as multilingualism, the functions of language(s) in different contexts, and the creative potential of human linguistic behavior. It is suggested to include "indigenized language" as a type of acquisition in the SLA typology and to adopt new perspectives that accept stable variations rather than treating them as errors.

10.What changes are needed in SLA theories to better understand learning English in outer and expanding circles?

Answer: Scholars and linguists suggest that native speakers should be more tolerant and accepting, increasing familiarity with international English is necessary, and SLA theories should consider research on the acquisition and use of indigenized varieties of English. The limitations of SLA in offering explanations for learning English in outer and expanding circles should also be acknowledged.

11.How do multilingual users in outer and expanding circles differ from deficient learners in the classical SLA paradigm?

Answer: Multilingual users in outer and expanding circles are not deficient but proficient users of English and other languages. They navigate different domains of language use, requiring different levels of proficiency, and employ code mixing to effectively communicate. This contrasts with the classical SLA paradigm, which often portrays non-native speakers as deficient in their language abilities.

12.What is the role of local input in the acquisition of English in outer and expanding circles?

Answer: Local input plays a crucial role in the acquisition of English in outer and expanding circles. It includes bilingual teaching methods, teachers proficient in the local variety of English, and indigenized versions of American popular culture. Learners in these contexts also exhibit creativity in their use of the internet and rely on indigenized varieties of English instead of an international or universal English.

13.How does the acquisition of English in outer and expanding circles differ from creolization?

Answer: The acquisition of English in outer and expanding circles cannot be compared to creolization. In the context of world Englishes, indigenized varieties of English emerge and evolve, adapting to local contexts and functions. This differs from the process of creolization, which involves the development of a new language with a simplified grammar system from multiple languages in contact.

14. Why is it important to consider the creative potential of human linguistic behavior in SLA theory construction?

Answer: Considering the creative potential of human linguistic behavior in SLA theory construction is important because language learners in outer and expanding circles exhibit creativity and adaptability in their language use. Their language acquisition processes are influenced by local contexts

and the functions English serves within those contexts, requiring a more flexible and inclusive approach to theory construction.

15. How does the concept of interlanguage challenge the monolingual SLA stance on non-native varieties of language?

Answer: The concept of interlanguage challenges the monolingual SLA stance, which considers all non-native varieties of language as failed attempts at learning. Interlanguage highlights the evolving system of rules that language learners develop as they progress from their first language towards the target second language. It recognizes the learner's ongoing development and acknowledges that non-native varieties are an inherent part of the language learning process.

CODE: ENG506

OBJECTIVE PART

LESSON 23

1.What is code switching?

- A) The use of multiple languages by a community
- B) The practice of using only one language
- C) The use of code names in communication
- D) The alteration of words within a single language

2.Code switching involves the alternation between:

- A) Languages or varieties
- B) Dialects within the same language
- C) Codes and symbols
- D) Words and phrases

3.Code mixing refers to:

- A) Alternations between languages within a clause or phrase
- B) The intentional blending of two languages
- C) The use of code names in secret communication
- D) The alteration of words within the same language

4.What prompts code mixing?

- A) Cultural representation
- B) Situational factors
- C) Language attitudes
- D) All of the above

5.Code mixing and borrowing are used to:

- A) Introduce new words to a language
- B) Replace existing words with borrowed ones
- C) Simplify the communication process
- D) Express concepts lacking in the primary language

6.The phenomenon of code switching is driven by:

- A) Natural and unconscious language acts
- B) Deliberate language choices
- C) Linguistic confusion
- D) Cultural preferences

7.Constraints on code switching include:

A) Free morpheme constraint

B) Equivalence constraint

C) Pragmatic constraint

D) Phonological constraint

8.What is the free morpheme constraint?

A) Code switching is only possible with free morphemes

B) Code switching is only possible with bound morphemes

C) Code switching is not influenced by morphemes

D) Code switching requires the presence of all morphemes

9.The equivalence constraint in code switching refers to:

A) Switching between two languages with similar word order

B) Maintaining grammatical consistency within a sentence

C) Quoting someone in their original language

D) Using interjections for emphasis

10.Quotations in code switching tend to occur in:

A) The dominant language

B) The speaker's native language

C) The language of the original speaker

D) The listener's preferred language

11.Interjections in code switching:

A) Occur regardless of the dominant language

- B) Are used to clarify or emphasize a message
- C) Indicate the speaker's involvement or distance from a message
- D) Direct the message to a specific addressee

12.What is the communicative function of reiteration in code switching?

- A) Clarifying or emphasizing a part of a message
- B) Directing the message to a specific addressee
- C) Indicating the speaker's involvement or distance from a message
- D) Giving hints about the upcoming discourse

13.Code switching can serve the needs of:

- A) Politeness and face-saving
- B) Formality and professionalism
- C) Speed and efficiency
- D) Linguistic accuracy and precision

14.Which factor is NOT considered in code selection?

- A) Politeness
- B) Face-saving
- C) Expressiveness
- D) Linguistic accuracy

15.Expressiveness in code selection refers to:

- A) Using two languages in popular media

B) Choosing colorful and expressive phrases

C) Replacing longer phrases with equivalent ones

D) Indicating the speaker's involvement or distance from a message

16.Code mixing and borrowing may involve:

A) Assimilation of borrowed items

B) Introducing completely new words

C) Replacing local words with English equivalents

D) Simplifying the communication process

17.Code switching occurs within constituents as long as:

A) Word order requirements are met in sentence structure

B) The languages have similar grammar structures

C) The speaker intends to confuse the listener

D) Cultural elements are represented effectively

18.Constraints on code switching help to:

A) Maintain grammatical consistency

B) Create linguistic confusion

C) Enhance cultural diversity

D) Simplify the communication process

19.Code mixing is characterized by:

A) Alternating between languages within a clause or phrase

B) Mixing codes and symbols in a message

- C) Using interjections for emphasis
- D) Quoting someone in their original language

20.The main purpose of code switching as a communicative strategy is to:

- A) Increase or decrease distance from interlocutors
- B) Confuse the listeners for entertainment
- C) Maintain linguistic accuracy and precision
- D) Ensure grammatical consistency in all utterances

21.Code switching is driven by:

- A) Cultural preferences
- B) Social norms
- C) Language attitudes
- D) Communicative needs

22.Code mixing and borrowing involve the:

- A) Assimilation of borrowed items
- B) Replacement of local words with borrowed ones
- C) Simplification of the communication process
- D) Introduction of new words to a language

23.Which constraint allows code switches only between sentence elements that are normally ordered the same way in each language?

- A) Free morpheme constraint
- B) Equivalence constraint

- C) Pragmatic constraint
- D) Phonological constraint

24. The communicative function of addressee specification in code switching is to:

- A) Quote someone in their original language
- B) Clarify or emphasize a part of a message
- C) Direct the message to a specific addressee
- D) Give hints about the upcoming discourse

25. Code switching can be motivated by:

- A) Situational factors
- B) Linguistic confusion
- C) Language preservation efforts
- D) Speed and efficiency in communication

CODE: ENG506

SUBJECTIVE PART

LESSON:23

1. What is code switching?

Code switching is the alternation between languages or varieties in the utterances of individuals.

2. How would you define multilingualism?

Multilingualism refers to the use of two or more languages by a single individual or a community of speakers.

3. What percentage of the world's population is multilingual?

More than half of the world's population is multilingual.

4.What is code mixing?

Code mixing refers to alternations between languages or varieties within a clause or phrase.

5.Can you provide examples of code switching?

Examples of code switching include sentences like "Why don't we all go together to New Delhi?" and "Very soon, I will be a big star in Bollywood; main naumeednahinhouni."

6.Why do speakers engage in code mixing?

Speakers may engage in code mixing as a natural and unconscious language act.

7.What are some factors that prompt code mixing?

Factors that prompt code mixing include participant relationships, situational factors, language attitudes, message intrinsic factors, interjections, and quotations.

8.What is the relationship between code mixing and borrowing?

Code mixing and borrowing are related in that borrowing functions to provide necessary elements that do not exist in the primary language being used.

9.How do phonological and morphological assimilation occur in code mixing?

Phonological and morphological assimilation of borrowed items can occur in code mixing. For example, "frappé" may be shortened to "frapp" and "time" to "tam."

10.What are some constraints on code switching?

Constraints on code switching include the free morpheme constraint and the equivalence constraint.

11.How does the equivalence constraint influence code switching?

The equivalence constraint states that code switching occurs when the surface structures or grammars of two languages coincide because they have the same word order or constituents.

12.What are some communicative functions of code switching?

Some communicative functions of code switching include quotations, addressee specification, interjections, reiteration, personalization versus objectivization, and textualization cues.

13.What are the considerations in code selection?

Considerations in code selection include politeness, face-saving, increasing or decreasing distance from interlocutors, colorfulness, expressiveness, and economy.

14.How can code switching contribute to expressiveness?

Code switching can contribute to expressiveness by exploiting two languages in popular media such as newspapers, songs, and films.

15,How does economy play a role in code selection?

Economy in code selection involves replacing a longer phrase in one language with its equivalent in the local language to convey the same meaning more efficiently.

CODE: ENG506

REVIEW EXERCISE

LESSON:21,22,23

CHOOSE THE CORRECT OPTION:

1.What is code switching?

- A) The use of multiple languages by a community
- B) The practice of using only one language
- C) The use of code names in communication
- D) The alteration of words within a single language

2.Code switching involves the alternation between:

- A) Languages or varieties
- B) Dialects within the same language
- C) Codes and symbols
- D) Words and phrases

3.What prompts code mixing?

- A) Cultural representation
- B) Situational factors
- C) Language attitudes
- D) All of the above

4.Code mixing and borrowing are used to:

- A) Introduce new words to a language
- B) Replace existing words with borrowed ones
- C) Simplify the communication process
- D) Express concepts lacking in the primary language

5.The phenomenon of code switching is driven by:

- A) Natural and unconscious language acts
- B) Deliberate language choices
- C) Linguistic confusion
- D) Cultural preferences

6.Constraints on code switching include:

- A) Free morpheme constraint
- B) Equivalence constraint
- C) Pragmatic constraint
- D) Phonological constraint

7.The equivalence constraint in code switching refers to:

- A) Switching between two languages with similar word order
- B) Maintaining grammatical consistency within a sentence
- C) Quoting someone in their original language
- D) Using interjections for emphasis

8.Interjections in code switching:

- A) Occur regardless of the dominant language

- B) Are used to clarify or emphasize a message
- C) Indicate the speaker's involvement or distance from a message
- D) Direct the message to a specific addressee

9.What is the communicative function of reiteration in code switching?

- A) Clarifying or emphasizing a part of a message
- B) Directing the message to a specific addressee
- C) Indicating the speaker's involvement or distance from a message
- D) Giving hints about the upcoming discourse

10.Code switching can serve the needs of:

- A) Politeness and face-saving
- B) Formality and professionalism
- C) Speed and efficiency
- D) Linguistic accuracy and precision

11.Which factor is NOT considered in code selection?

- A) Politeness
- B) Face-saving
- C) Expressiveness
- D) Linguistic accuracy

12.Expressiveness in code selection refers to:

- A) Using two languages in popular media

- B) Choosing colorful and expressive phrases
- C) Replacing longer phrases with equivalent ones
- D) Indicating the speaker's involvement or distance from a message

13.Code mixing and borrowing may involve:

- A) Assimilation of borrowed items
- B) Introducing completely new words
- C) Replacing local words with English equivalents
- D) Simplifying the communication process

14.Constraints on code switching help to:

- A) Maintain grammatical consistency
- B) Create linguistic confusion
- C) Enhance cultural diversity
- D) Simplify the communication process

15.Code mixing is characterized by:

- A) Alternating between languages within a clause or phrase
- B) Mixing codes and symbols in a message
- C) Using interjections for emphasis
- D) Quoting someone in their original language

16.The main purpose of code switching as a communicative strategy is to:

- A) Increase or decrease distance from interlocutors

- B) Confuse the listeners for entertainment
- C) Maintain linguistic accuracy and precision
- D) Ensure grammatical consistency in all utterances

• **ANSWERS THE FOLLOWING QUESTIONS:**

- What is code switching?
- How would you define multilingualism?
- What percentage of the world's population is multilingual?
- What is code mixing?
- Can you provide examples of code switching?
- Why do speakers engage in code mixing?
- What are some factors that prompt code mixing?
- What is the relationship between code mixing and borrowing?
- How do phonological and morphological assimilation occur in code mixing?
- What are some constraints on code switching?
- How does the equivalence constraint influence code switching?
- What are some communicative functions of code switching?
- What are the considerations in code selection?
- How can code switching contribute to expressiveness?
- How does economy play a role in code selection?

CODE: ENG506

OBJECTIVE PART

LESSON:24

1.What is language planning?

- a) The deliberate influence on language behavior
- b) The enforcement of language laws
- c) The natural development of languages

d) The study of linguistic imperialism

2.Which type of language policy is formulated by authorities and imposed on speech communities?

a) Top down language policy

b) Bottom up language policy

c) Colonial language policy

d) Global language policy

3.According to the theory of linguistic imperialism, who possesses the power to impose their language on others?

a) Speech communities

b) Indigenous populations

c) Colonial administrators

d) Colonizing nations

4.What characterizes bottom-up language policy?

a) Unilateral process

b) Outcome of interplay between conflicting aims

c) Tools for achieving ideological objectives

d) Imposed by authorities

5.Conventional notions of language policy lack a critical perspective regarding what phenomenon?

a) Global spread of English

b) Top-down language planning

c) Linguistic imperialism

d) Bottom-up language policy

6.What lasting effects did colonization have on the subjugated people's language?

a) Liberation from linguistic imperialism

b) Loss of language codes

c) Ideological control by the colonizers

d) Preservation of indigenous language

7.Which language played a role in the anticolonial struggle?

a) Indigenous languages

b) English

c) Spanish

d) French

8.What was the aim of colonial language policy in Africa?

a) Economic independence

b) Indigenous language preservation

c) Resistance against imperialism

d) Maintenance of British rule

9. How did educational language policy contribute to stopping anticolonial movements?

- a) By promoting indigenous languages
- b) By empowering the masses
- c) By limiting educational opportunities**
- d) By encouraging multilingualism

10. What was the principal goal of the education policy in Asian colonies?

- a) Agricultural development**
- b) Industrialization
- c) Linguistic diversity
- d) Assimilation of indigenous cultures

11. Which languages were taught to Indians and British civil servants in India during colonization?

- a) English, French, German
- b) Sanskrit, Persian, Arabic**
- c) Hindi, Urdu, Bengali
- d) Mandarin, Tamil, Telugu

12. What socioeconomic purposes dictated educational language policy during colonization?

- a) Cultural preservation
- b) Language diversity
- c) Economic needs of the empire**

d) Linguistic empowerment

13. Why did Asians and Africans make efforts to learn English despite the restrictions?

- a) Economic value of the language
- b) Desire for cultural assimilation
- c) Resistance against colonial powers
- d) Educational opportunities abroad

14. How did the learning of English contribute to the anticolonial struggle?

- a) By promoting Western ideology
- b) By maintaining socioeconomic roles
- c) By empowering the colonizers
- d) By resisting colonial rule

15. What role did the English-educated segment of the population play in the anticolonial movement?

- a) They supported the colonial administration
- b) They sought cultural assimilation
- c) They resisted the imperial economic interests
- d) They promoted indigenous languages

16. What was the connection between the demand for English and the emergent liberation movements in Africa and Asia?

- a) English education led to economic dependency

b) English education threatened the foundations of colonial rule

c) English education reinforced socioeconomic roles

d) English education promoted cultural assimilation

17. How did language policy contribute to the creation of an exploitative socioeconomic structure?

a) By promoting cultural diversity

b) By resisting colonial rule

c) By providing equal opportunities

d) By limiting access to education

18. What was the main goal of learning English in the context of the anticolonial struggle?

a) Western ideological hegemony

b) Resistance against the local culture

c) Exploitation of the natives

d) Resistance against colonial rule

19. What did the emergence of English as the language of the anticolonial struggle result in?

a) Increased socioeconomic stratification

b) Indigenous empowerment

c) Linguistic diversity

d) Continued imperialism

20. How did the English-educated unemployed natives contribute to opposition movements?

- a) By seeking employment in colonial administration
- b) By promoting cultural assimilation
- c) By demanding equal language rights
- d) By becoming discontented and joining opposition movements

21. What did language policy serve during the height of modern colonialism?

- a) Economic independence
- b) Preservation of indigenous languages
- c) Ideological control of the colonizers
- d) Cultural assimilation

22. Which factor determined colonial policy throughout Africa?

- a) Educational philosophy
- b) Indigenous language preservation
- c) Socioeconomic concerns
- d) Cultural assimilation

23. Why did colonial administrators restrict education in African colonies?

- a) To ensure secure labor for the mines
- b) To promote indigenous languages
- c) To encourage cultural diversity
- d) To achieve economic independence

24.What was the two-fold purpose of education in Asian colonies?

- a) Economic independence and cultural assimilation
- b) Preservation of indigenous cultures and language diversity
- c) Expansion of the British empire and economic stability
- d) Making natives more useful and limiting their chances of leaving their environment

25.What characterized primary education in Asian colonies?

- a) Instruction in vernacular languages
- b) Promotion of multilingualism
- c) Emphasis on indigenous cultures
- d) Exclusion of the masses

CODE: ENG506

SUBJECTIVE PART

LESSON:24

1.What is language planning?

Answer: Language planning refers to deliberate efforts to influence the behavior of others in terms of language acquisition, structure, or functional allocation.

2.What is top-down language policy?

Answer: Top-down language policy is formulated by authorities such as governments or commissions and imposed on speech communities. It is

conceived as a unidirectional process and serves as an instrument of social control and the achievement of ideological objectives.

3.What is the theory of linguistic imperialism?

Answer: The theory of linguistic imperialism assumes that the colonizing nation possesses the power to impose its language and will on the subjugated population.

4.What is bottom-up language policy?

Answer: Bottom-up language policy involves speech communities actively contributing to the shaping of language policy. They codetermine the context and seize the initiative from institutional planners.

5.What is the global spread of English attributed to?

Answer: The global spread of English is attributed to the West and its imperialistic policies.

6.What are the lasting effects of colonization in language policy?

Answer: The subjugated people remain under ideological control even after gaining freedom, with power resting with those exercising imperial power.

7.What role did speech communities play in language planning during colonialism?

Answer: Speech communities had a role in language planning during the height of modern colonialism, but this aspect was excluded by top-down models of language policy.

8.How did English become part of the anticolonial struggle?

Answer: English became part of the anticolonial struggle as indigenous populations used it as a means of resistance and empowerment against the empire.

9.What was the aim of colonial language policy?

Answer: The aim of colonial language policy was to maintain British rule, fulfill the economic purpose of the colonies, and avoid disruption to the empire.

10.How did anticolonial movements influence educational language policy?

Answer: Anticolonial movements led to the adoption of educational language policy as a means to suppress the movements and maintain the empire.

11.How did English transform from a means of exploitation to a means of resistance?

Answer: English transformed from a means of exploitation to a means of resistance as indigenous populations learned the language to oppose the empire and empower themselves.

12.How did economic concerns control language policy in Africa?

Answer: Economic concerns, particularly related to South African mines, influenced the educational philosophy and language policy of colonial administrators in Southern Africa.

13.What were the two-fold purposes of education in colonial language policy?

Answer: The two-fold purposes of education in colonial language policy were to make the colonized people more useful to their white masters and to limit their chances of leaving their environment.

14. How did language policy in Asia serve the economic ends of empire?

Answer: Language policy in Asian colonies, driven by the dominant factor of agriculture, aimed to maintain the agricultural basis of production and socioeconomic stratification.

15. What was the status of English in India under colonial language policy?

Answer: In 1835, English was given the status of the language of higher administration, judiciary, and education in India to Anglicize the Indian elite and ensure their loyalty to the British.

16. How did English education serve different ends in Asian colonies?

Answer: English education served the needs of the colonial service and commercial enterprise, requiring officials and clerks well-versed in English, while the plantation industry had no need for English-speaking workers.

17. How did language policy contribute to the creation of exploitative socioeconomic structures?

Answer: Language policy played a role in creating exploitative socioeconomic structures, and attempts to resist colonial rule were made through obtaining access to education and the language of the colonizers.

18. What was the connection between the spread of English and emergent liberation movements?

Answer: There was a connection between the demand for and spread of English and the emergent liberation movements in Africa and Asia, as English education resulted in a refusal to perform manual labor and threatened the foundations of colonial rule.

19.What role did the English-educated segment of the population play in the anticolonial movement?

Answer: The English-educated segment of the population played an active role in the anticolonial movement, and their availability of English education was considered a significant threat to colonial powers.

20.What led to the discontent and opposition movements among the English-educated natives?

Answer: The English-educated natives, facing unemployment, became discontented and turned to opposition movements as they realized the disparity between their education and the opportunities available to them.

CODE: ENG506

OBJECTIVE PART

LESSON:25

1.What determines the place of a language in language policy?

- a) Population
- b) Prestige
- c) Status
- d) Functionality

Answer: All of the above

2.In inner circle countries, what is the role of English in language policy?

- a) Language of the majority

- b) Role of minority languages
- c) Status planning for different dialects of English
- d) All of the above

3. In outer circle countries, what is the proficiency level of the population in English?

- a) Majority of the population is proficient in English
- b) Only a minority of the population is proficient in English
- c) English is not widely spoken
- d) English is the first language for most people

4. What is the functionality of English in outer circle countries?

- a) Used by the elite
- b) Recognized and accepted
- c) Revolves around the role of English
- d) All of the above

5. In expanding-circle countries, what is the status of English?

- a) Strong population base
- b) Official language
- c) No official status
- d) Enjoying great prestige

6. What accelerates the use of English in expanding-circle countries?

- a) Globalization
- b) Decreasing popularity
- c) Lack of interest

d) Language barriers

7.What are the reasons for the dominance of English in language policy?

a) Usefulness and functionality

b) Access to knowledge and technology

c) Language of globalization

d) All of the above

8.Why do individuals choose to learn English?

a) Requirement for several jobs

b) Better job prospects

c) Social mobility

d) All of the above

9.What are the constraints on the choice of English?

a) Struggle between change and continuity

b) Promotion of other languages

c) Official language preferences

d) All of the above

10.What are the beneficial effects of the hegemony of English?

a) Communicative and instrumental function

b) Role as lingua franca

c) Global reach

d) All of the above

11.What are the detrimental effects of the hegemony of English?

a) Social stratification

b) Exclusion

- c) Problems in education and literacy
- d) Status of non-English languages

Answer: All of the above

12.What causes exclusion due to English?

- a) Inability to use the official language
- b) Lack of proficiency in English
- c) Lack of opportunity for formal education

d) All of the above

13.What does extending the scope of English require in language policy?

- a) Inclusivity and equity
- b) Cultural and economic development
- c) Policy design with social factors

d) All of the above

14.How can negative effects of language policy be eliminated?

- a) Considering social, economic, and political factors
- b) Designing a multilingual policy
- c) Minimizing exclusion

d) All of the above

15.What were the pre-partition language policies in colonial times?

- a) Imposition of colonial languages
- b) Tolerance towards indigenous languages
- c) Indigenization for governance

d) All of the above

16.What were the motives behind the British learning Indian vernaculars?

a) Control over the natives

b) Governance strategies

c) Encouragement of cultural diversity

d) All of the above

17.When was the suggestion to teach English made by the East India Company?

a) 1774

b) 1792

c) 1832

d) 1973

18.What did the Indian middle class associate with the English language?

a) Social and economic prestige

b) Colonial resistance

c) Preservation of traditional values

d) Limited job opportunities

19.Which language was initially confined to Bengali Hindus?

a) English

b) Urdu

c) Hindi

d) Sanskrit

20.According to the 1973 constitution, what may be used for official purposes until replaced by Urdu?

a) English

b) Punjabi

c) Sindhi

d) Pashto

21.What is the rationale for privileging Urdu in language policy?

a) Widespread usage among Pakistanis

b) Job availability

c) Symbol of unity

d) All of the above

22.What are the consequences of privileging English in language policy?

a) Weakening of local languages

b) Loss of linguistic and cultural diversity

c) Increased poverty among the elite

d) All of the above

23.Which policy implemented Urdu as the medium of instruction in all government schools?

a) General Zia's Urduization policy

b) General Musharraf's policy

c) Pre-partition language policy

d) Post-partition language policy

24.What were the consequences of the continuation of two parallel systems in education?

a) Discrimination in job opportunities

b) Creation of two classes: common and elite

c) Increase in linguistic diversity

d) All of the above

25.What is the current ambivalence towards English in language policy?

a) Result of educational effectiveness

b) Reflection of political expediency

c) Focus on cultural preservation

d) All of the above

CODE: ENG506

SUBJECTIVE PART

LESSON:25

Topic 145: English in Language Policy Discourse

Q1: What factors determine the place of a language in language policy?

A1: The place of a language in language policy is determined by population, prestige, status, functionality, and nationalism.

Q2: How does language policy differ in inner circle countries regarding English?

A2: In inner circle countries, English is the language of the majority, and the issues revolve around the role to be given to minority languages, as well as status planning involving different dialects of English.

Q3: What is the situation of English in outer circle countries?

A3: In outer circle countries, only a minority of the population is proficient in English, but it still holds significant power and functionality.

Q4: How is English treated in expanding-circle countries?

A4: In expanding-circle countries, English lacks a strong population base, has no official status, but enjoys a great deal of prestige and has instrumental value. It is

used and learned as a foreign language, and its use is accelerated due to globalization.

Topic 146: Choice and Hegemony of English

Q5: What are the reasons for the dominance of English in language policy?

A5: The dominance of English in language policy is attributed to its usefulness, functionality, access to knowledge and technological advancement, and its role as the language of globalization.

Q6: Is the choice of English a want or a need?

A6: For many jobs, English is a requirement rather than an advantage, leading to better job prospects and upward social mobility.

Q7: What are the constraints on the choice of English?

A7: The struggle between change and continuity in language policy perpetuates the colonial language policy in several post-colonial countries, where English remains an official or co-official language. Attempts to promote other languages have often failed.

Q8: How does bureaucracy play a role in language policy?

A8: Policy decisions are taken by government bodies, and the implementation regulations are framed by bureaucrats. Decision-makers from the elite often have a vested interest in maintaining the role and status of English.

Topic 147: Effects of Hegemony of English

Q9: What are the beneficial effects of the hegemony of English?

A9: The hegemony of English has beneficial effects, such as its communicative and instrumental function, its role as a lingua franca, and its global reach.

Q10: What are the detrimental effects of the hegemony of English?

A10: The hegemony of English can lead to social stratification, exclusion, problems associated with education and literacy, and a lower status for languages other than English.

Q11: How does English cause exclusion?

A11: English can cause exclusion by affecting the viability and stability of other languages, limiting the ability to use the official language, and creating a lack of proficiency in English, leading to a lack of opportunities for education and attending English medium schools.

Topic 148: Hegemony of English: Implications for Language Policy and Planning

Q12: What should be considered in a language policy to make English inclusive and equitable?

A12: A language policy should take into consideration social, economic, and political factors, cater to the whole population with a multilingual policy, minimize exclusion, and contribute to the overall cultural, human, and socio-economic development of a country.

Topic 149: Language Policy and Planning in Pakistan (Pre-Partition)

Q13: What were the language policies during the colonial era in India?

A13: The colonial language policies were imperialistic, imposing the colonizers' languages on the ruled nations. There was some tolerance for indigenous languages, driven by political motives and the desire to appease indigenous elites.

Q14: Why did Indians start learning English?

A14: Indians realized that traditional ways of exercising power and obtaining wealth would change, and learning English became advantageous for obtaining power and becoming junior partners of the British. The Indian middle class saw English as directly related to social and economic prestige.

Topic 150: Language Policy and Planning in Pakistan (Post-Partition)

Q15: What were the language policies in post-partition Pakistan?

A15: The 1973 constitution included provisions to use English for official purposes until arrangements were made for its replacement by Urdu. Additionally, provincial assemblies could prescribe measures for the teaching, promotion, and use of provincial languages alongside the national language.

Q16: Why was Urdu privileged in language policy?

A16: Urdu, being widely spread and almost like the first language of all Pakistanis, became the language of instruction for the primary level and was seen as a symbol of unity. Most jobs were available through Urdu, and it served the political purpose of resisting ethnicity.

Q17: How did the privileging of English in Pakistan affect language diversity and social classes?

A17: The privileging of English weakened local languages, increased discrimination, eliminated linguistic and cultural diversity, and created a divide between the common class and the English-using elite, resulting in limited job opportunities.

Q18: What were General Zia's and General Musharraf's language policies?

A18: General Zia implemented Urdu as the medium of instruction in all government schools, while General Musharraf made English compulsory from class one onwards and introduced English as the medium of instruction for selected subjects.

OBJECTIVE PART

LESSON:26

1.Which variety of English is considered the first colonial variety of British English?

- a) American English
- b) Canadian English
- c) British English
- d) Australian English

2.What is the process that American English has undergone due to the colonial expansion of the British Empire?

- a) Linguistic and cultural appropriation
- b) Linguistic assimilation
- c) Language standardization
- d) Language preservation

3.Which factor contributes to the stability and influence of American English?

- a) Longer association with sociopolitical developments
- b) Linguistic isolation from other English varieties
- c) Limited migration patterns
- d) Minimal language contact

4.Which region of England did the first English-speaking permanent settlers in America come from?

- a) The South of England

- b) Northern England
- c) Western England
- d) Eastern England

5.What linguistic features do the accents of New England and the South share with southern British English?

- a) Dropping of postvocalic /r/
- b) Pronunciation of /j/ in certain words
- c) Retention of /r/ in all words
- d) Use of multiple negation

6.Which cultural group in America had an aristocratic plantation culture in the coastal South and Georgia?

- a) African Americans
- b) Native Americans
- c) European immigrants
- d) Colonial settlers

Answer: c) European immigrants

7.What process resulted from dialect contact in American English?

- a) Koinéization
- b) Pidginization
- c) Creolization
- d) Standardization

8.Regional dialect differences in American English are primarily based on:

- a) Grammar patterns
- b) Vocabulary choices

c) Pronunciation patterns and lexical choices

d) Intonation patterns

9. Which region of the United States is considered to have the most "unmarked" or "typically American" accent?

a) Inland northern region

b) Southern region

c) Western region

d) Northeastern region

10. What is the term used to describe the emergence of a new variety or dialect of a language from the mixing of different dialects?

a) Standardization

b) Assimilation

c) Koinéization

d) Pidginization

11. Social dialects in American English are influenced by:

a) Location and social status

b) Age and gender

c) Educational background

d) Ethnicity and nationality

12. Which variety of American English is the result of language shift by a minority group from an ethnic language to English?

a) African American English

b) Canadian English

c) British English

d) Appalachian English

13.Canadian English is traditionally described as a mix of features from which two English varieties?

a) British and Australian English

b) British and American English

c) British and Canadian French

d) British and Irish English

14.What factor influences the pronunciation of Canadian English?

a) Region

b) Generation

c) Language level

d) All of the above

15.What is the most noticeable feature of Canadian English?

a) Canadian Raising

b) Dropping of postvocalic /r/

c) Retention of /j/ in certain words

d) Use of regional words

16.Which process led to large-scale colonization in Canada?

a) Immigration from Europe

b) Immigration from the USA

c) Immigration from Asia

d) Immigration from Africa

17.Which influence is more prominent in Canadian English pronunciation?

a) British English

b) American English

c) French

d) Indigenous languages

18. sed in Canadian English to refer to a couch?

a) Sofa

b) Loveseat

c) Chesterfield

d) Settee

19. Which feature of Canadian English involves the pronunciation of /eɪ/ and /aʊ/ with a raised, central onset?

a) Canadian Raising

b) Vowel breaking

c) Postvocalic /r/ dropping

d) Multiple negation

20. What factor influenced the growth of a distinct Canadian identity reflected in uniquely Canadian features of Canadian English?

a) Colonization by the British Empire

b) Immigration from various countries

c) Political independence from Britain

d) Cultural assimilation of indigenous languages

21. What is the perception of American English in terms of homogeneity?

a) Fairly homogeneous

b) Highly diverse

c) Linguistically isolated

d) Lacking a standard accent

22. What term is used to describe the process of mixing, mutual accommodation, and the emergence of a new variety or dialect in African American English?

a) Koineization

b) Creolization

c) Pidginization

d) Assimilation

23. What is the most common influence on Canadian English vocabulary?

a) British English

b) American English

c) French

d) Indigenous languages

24. What is the impact of immigration on the varieties of American English?

a) Language preservation

b) Language shift

c) Language extinction

d) Language standardization

25. Which region of the United States is known for its unique mixtures of settlers and linguistic features?

a) New England

b) Southern region

c) Midwestern region

d) Appalachian region

CODE: ENG506

SUBJECTIVE PART

LESSON:26

1.What is the term used to describe the process of American English undergoing linguistic and cultural appropriation?

Answer: Linguistic and cultural appropriation.

2.What historical factor contributed to the development of American English as a result of colonial expansion?

Answer: The colonial expansion of the British Empire.

3.Why is American English considered stable and influential?

Answer: It has a longer association with sociopolitical developments.

4.What are some effects of language contact on American English?

Answer: American English shows the effects of language contact.

5.Where did the first English-speaking permanent settlers in America come from?

Answer: The South of England.

6.Which linguistic features do the accents of New England and the South share with southern British English?

Answer: They share prominent linguistic features.

7.What is an example of a phonological change in American English due to settlement history?

Answer: The dropping of a postvocalic /r/ in words like "car," "card," "four," and "fourth."

8.Which social class contributed to the development of a unique type of American English?

Answer: The working class.

9.What cultural and linguistic features were rooted in the Appalachian mountains by eighteenth-century immigrants?

Answer: Appalachian culture and linguistic features.

10.How did the transcontinental movement in the nineteenth century affect American English?

Answer: It led to a process of mixing and blending of accents.

11.What is koinéization in the context of American English?

Answer: Koinéization refers to the emergence of a new variety or dialect resulting from the mixing, leveling, and simplifying of different dialects.

12.How is American English perceived in terms of homogeneity?

Answer: American English is perceived to be fairly homogeneous.

13.What is the basis for regional dialect differences in American English?

Answer: Regional dialect differences are based on different pronunciation patterns and lexical choices.

14. Which region in the United States is often perceived as having a "typically American" accent?

Answer: The inland northern region.

15. What are some examples of lexicon differences in regional dialects of American English?

Answer: Examples include "mosquito hawk" for dragonfly and "granny woman" for midwife.

16. What are social dialects in American English based on?

Answer: Social dialects are based on location and social status.

17. How are ethnic varieties of American English produced?

Answer: Ethnic varieties are produced by language contact and involve language shift from an ethnic language to English.

18. Is there a nationally uniform standard accent of American English?

Answer: No, there is no nationally uniform standard accent of American English.

19. What factors influence Canadian English in terms of its British or American features?

Answer: Region, generation, and language level influence the influence of British or American English on Canadian English.

20. What is the most noticeable feature of Canadian English?

Answer: Canadian Raising, which affects the pronunciation of certain vowel sounds.

CODE: ENG506

OBJECTIVE PART

LESSON:27

1.What are the factors contributing to the similarities between English in Australia and New Zealand?

- A) Geographical proximity
- B) Historical conflicts
- C) Cultural differences
- D) Linguistic diversity

2.Which of the following is NOT a period of development mentioned for Australian English?

- A) Australian settlement and development (1788-1820)
- B) Expansion and establishment of new colonies (1820-1850)
- C) Gold rushes and new migration (1850-1900)
- D) De facto independence (1900-1960)

3.What was the initial purpose of colonizing Australia in 1788?

- A) Establish trade routes
- B) Form a penal colony
- C) Gain territorial control
- D) Promote cultural exchange

4. Which variety of English had the most influence on the development of Australian English during the early settlement period?

A) Southeast England variety

B) Scottish variety

C) Irish variety

D) Northern England variety

5. When was the New Zealand colony established?

A) 1788

B) 1820

C) 1831

D) 1840

6. What were the factors that contributed to increased migration to Australia and New Zealand between 1850 and 1900?

A) Industrialization

B) Religious conflicts

C) Gold rushes

D) Political stability

7. Which period marked the establishment of de facto nations in Australia and New Zealand?

A) 1788-1820

B) 1820-1850

C) 1850-1900

D) 1900-1960

8.What was the purpose of the development of national standards for English in Australia and New Zealand?

- A) Facilitate international communication
- B) Preserve local linguistic diversity**
- C) Establish dominance over other English varieties
- D) Promote cultural assimilation

9.Which linguistic feature distinguishes the pronunciation of the vowel /ɪ/ in Australian English?

- A) Raised and fronted**
- B) Centralized to /ʌ/
- C) Merged with /eə/
- D) Replaced by /i/

10.What is a distinguishing feature of Australian English in terms of lexicon?

- A) Use of hypocoristics**
- B) Pronunciation of vowels
- C) Syntax simplification
- D) Variations in discourse conventions

11.Which sociolinguistic factor influences the usage of distinguishing features in Australian and New Zealand English?

- A) Social class**
- B) Age
- C) Gender
- D) Geographical location

12.Which variety of Australian English is associated with more working-class speech?

A) Broad

B) General

C) Cultivated

D) Maori English

13. What is the term used to describe the variety of English spoken by non-Anglo-Celtic migrants in Australia?

A) Aboriginal Australian English

B) Southland Dialect

C) Wogspeak

D) Maori English

14. What are the reasons for variations in Maori English?

A) Contact with Maori language and social factors

B) Geographical differences and historical conflicts

C) Economic factors and political instability

D) Linguistic diversity and cultural exchange

15. Which variety of New Zealand English is based on the settlement patterns of Scottish settlers?

A) Maori English

B) Southland Dialect

C) Aboriginal Australian English

D) Wogspeak

16. Which sound is strongly retained in the Southland dialect?

A) /r/

B) /ɪə/

C) /ʌ/

D) /i/

17.Which factor contributed to the development of several pidgins and creoles in Aboriginal Australian English?

- A) Contact with Maori language
- B) Influence of British policies
- C) Early contact between colonists and aborigines
- D) Increased migration during the gold rushes

18.What distinguishes the pronunciation of the vowel sounds in Maori English?

- A) Reduction and centralization
- B) Stress shift and fricative replacement
- C) Simplified syntax and deletion of inflections
- D) Eye gaze and inter-turn pauses

19.Which variety of English shows an intensification of variations in different varieties due to the learning of English by migrant groups?

- A) Aboriginal Australian English
- B) Southland Dialect
- C) Wogspeak
- D) Maori English

20.How many dialectal differences in lexis and pronunciation have been shown in the research of geographical variations in New Zealand English?

- A) Many
- B) None
- C) Moderate
- D) Significant

21.What are the social factors that influence the use of new or vernacular features in Maori English?

- A) Social class and gender
- B) Age and geographical location
- C) Contact with Aboriginal Australian English
- D) Political stability and economic factors

22.Which variety of Australian English is associated with the British Received Pronunciation?

- A) Broad
- B) General
- C) Cultivated
- D) Maori English

23.What was the initial derogatory meaning of the term "wog" in Australia?

- A) Non-Anglo-Celtic migrants
- B) Aboriginal inhabitants
- C) Southland Dialect speakers
- D) Maori English speakers

24.Which sociolinguistic factor has a greater influence on the usage of distinguishing features in women compared to men?

- A) Social class
- B) Age
- C) Gender
- D) Geographical location

25.How do younger speakers generally compare to older speakers in terms of demonstrating distinguishing features in Australian and New Zealand English?

- A) They demonstrate fewer distinguishing features.
- B) They demonstrate more distinguishing features.**
- C) They demonstrate the same number of distinguishing features.
- D) They demonstrate different distinguishing features.

CODE: ENG506

SUBJECTIVE PART

LESSON:27

1.What are some factors that contribute to the similarities between English in Australia and New Zealand?

Geographical proximity, frequent migration and travel, and similar stages of development.

2.What were the colonial varieties of English in Australia and New Zealand related to?

They were related to different varieties of English used by settlers from all over England.

3.How did Australian English influence New Zealand English?

Australian English had an influence on the development of New Zealand English.

4.When was Australia colonized as a penal colony?

Australia was colonized as a penal colony in 1788.

5.Which variety of English had a relative prestige during Australian settlement and development?

The variety of English spoken in the southeast of England had relative prestige.

6. When was the Sydney colony stabilized, and when was the Port Philip (Melbourne) colony founded?

The Sydney colony was stabilized in 1820, and the Port Philip colony was founded in 1831.

7. What caused an increase in migration to Australia and New Zealand between 1850 and 1900?

The gold rushes and British policies resulted in increased migration during that period.

8. What happened during the period of de facto independence (1900-1960)?

De facto nations were established, further changes occurred, and national and linguistic identity rose.

9. What happened regarding awareness of national standards for English in Australia and New Zealand from 1960 to the present?

There was an awareness of the two Englishes being national varieties, the need for their own standards, and serious scholarly work conducted.

10. What are some distinguishing features of the pronunciation in Australian English and New Zealand English?

The pronunciation of vowels, such as the raising and fronting of /ɪ/ in Australian English and the centralizing of /ɪ/ to /ʌ/ in New Zealand English.

11. What are hypocoristics in Australian English?

Hypocoristics are diminutive forms of names or terms commonly used in Australian English.

12.What are some examples of lexicon differences in New Zealand English?

Examples include "no worries" meaning "thank you," "bach" meaning a holiday home, "egg" as a mild insult, and "waka" referring to any means of transport.

13.How does discourse in Australia differ from most other English-speaking countries regarding service transactions?

In Australia, the service provider will name the total due followed by thanks, whereas in most other English-speaking countries, thanks is postponed until the customer offers the money or change is given.

14.Which social classes tend to use the distinguishing features of Australian and New Zealand English?

Lower classes tend to use the distinguishing features more, while upper classes tend to use the Received Pronunciation (RP) standard.

15.Do younger or older speakers demonstrate more distinguishing features in Australian and New Zealand English?

Younger speakers demonstrate more distinguishing features than older speakers.

16.Do women or men use more distinguishing properties in Australian and New Zealand English?

Women use more distinguishing properties, especially those from below, compared to men of similar ages and classes.

17.What are the three variations of Australian English based on sociolinguistics?

Broad, General, and Cultivated.

18.What is the most common type of English spoken in Australia?

General Australian English.

19.What is Wogspeak in Australian English?

Wogspeak refers to the English spoken by non-Anglo-Celtic migrants to Australia and shows intensification of the features of variations in different varieties.

20.What are some varieties of New Zealand English?

Maori English and the Southland Dialect are examples of varieties of New Zealand English.

OBJECTIVE PART

LESSON:28

1.What are the two categories of Southeast Asian Englishes mentioned in the paragraph?

- a) Inner Circle and Outer Circle
- b) Core Circle and Expanding Circle
- c) Inner Circle and Expanding Circle
- d) Outer Circle and Expanding Circle

2.Which countries fall under the Outer Circle of Southeast Asian Englishes?

- a) Malaysia, Singapore, and Philippines
- b) Vietnam, Indonesia, and Thailand
- c) Malaysia, Singapore, and Vietnam

d) Indonesia, Thailand, and Philippines

3. Which English variety in Southeast Asia is referred to as a "post-imperial" English?

a) Malaysian English

b) Singaporean English

c) Filipino English

d) Indonesian English

4. Which settlements provided trading centers to the British Empire's East India Company?

a) Penang, Malacca, and Singapore

b) Jakarta, Bangkok, and Manila

c) Kuala Lumpur, Ho Chi Minh City, and Bangkok

d) Hanoi, Manila, and Surabaya

5. When did Singapore secede from the Federation of Malaya?

a) 1946

b) 1957

c) 1974

d) 1996

6. Which language became the national language of Malaysia?

a) English

b) Mandarin

c) Tamil

d) Malay

7. Which country reintroduced English as a medium of instruction for science and technology subjects?

- a) Singapore
- b) Malaysia
- c) Philippines
- d) Thailand

8. Which Southeast Asian country has the longest record of English language teaching?

- a) Thailand
- b) Indonesia
- c) Vietnam
- d) Philippines

9. Which language was taught as a foreign language in Vietnam before switching to English?

- a) French
- b) Russian
- c) Dutch
- d) Mandarin

10. What is the future of English in Southeast Asia likely to be, according to the paragraph?

- a) Declining influence and limited use
- b) Limited to the privileged and rich
- c) Increasing popularity and competence
- d) Replacement by local languages

11. Which country has a pro-English official language policy?

a) Singapore

b) Philippines

c) Malaysia

d) Thailand

12. What are the factors facilitating the teaching and learning of English in the future?

a) Mass media, internet, mobile phones, and educational system

b) Government policies, economic growth, cultural exchange, and tourism

c) Language policies, language schools, international organizations, and trade agreements

d) Language proficiency tests, international conferences, academic collaborations, and job opportunities

13. Which Southeast Asian country is mentioned as being in a state of revival for English?

a) Singapore

b) Malaysia

c) Philippines

d) Thailand

14. What is the diglossic situation likely to result in?

a) Language standardization and intelligibility

b) Loss of local languages and dialects

c) Increase in regional language dominance

d) Decline in English proficiency

15. Which variety of English is likely to show more distinctive features of local Englishes?

a) Acrolect

b) Basilect

c) Mesolect

d) Mesolex

16. Which Southeast Asian English variety is referred to as a language of globalization?

a) Malaysian English

b) Singaporean English

c) Filipino English

d) Indonesian English

17. What is the status of English in the Philippines according to the paragraph?

a) Declining demand and reduced emphasis

b) Efforts at improving training and testing

c) Replacement by the national language

d) Limited access for the masses

18. Which foreign language was emphasized during the Dutch colonization in Indonesia?

a) English

b) Mandarin

c) Dutch

d) Malay

19. What is the main foreign language taught in Indonesian schools?

a) English

b) Mandarin

c) Dutch

d) Malay

20. What is the main foreign language taught in Vietnamese schools?

a) English

b) French

c) Mandarin

d) Russian

21. Which Southeast Asian country has the highest percentage of students studying English?

a) Malaysia

b) Singapore

c) Thailand

d) Philippines

22. Which language was introduced in higher grades due to the unavailability of teachers?

a) English

b) Mandarin

c) Malay

d) Tamil

Answer: a) English

23. Which Southeast Asian countries have a diglossic situation regarding English?

- a) Singapore and Malaysia
- b) Philippines and Thailand
- c) Malaysia and Thailand
- d) Singapore and Philippines

24. Which factor contributes to the increase in status and prestige of English in Southeast Asia?

- a) Decreasing globalization
- b) Nationalistic sentiments
- c) Reduced international trade
- d) Language of education and commerce

25. Which language is declared as the national language of Malaysia?

- a) English
- b) Mandarin
- c) Malay
- d) Tamil

CODE: ENG506

SUBJECTIVE PART

LESSON:28

Q1: Which countries fall under the Outer Circle of Southeast Asian Englishes?

A: Malaysia, Singapore, Philippines.

Q2: Which countries fall under the Expanding Circle of Southeast Asian Englishes?

A: Vietnam, Indonesia, Thailand.

Q3: What was the main reason behind the development of English in Southeast Asia?

A: Result of colonization.

Q4: How are the English varieties in Southeast Asia collectively referred to?

A: They are collectively called 'post-imperial' Englishes.

Q5: Which settlements provided trading centers for the British Empire's East India Company?

A: Penang, Malacca, and Singapore.

Q6: Which Southeast Asian country fell completely under the British Empire?

A: Singapore.

Q7: Which Southeast Asian country maintained royal families despite colonization?

A: Malay kingdoms.

Q8: When did the Straits Settlements become independent and form the Federation of Malaya?

A: In 1957.

Q9: Which Southeast Asian country seceded from the Federation of Malaya?

A: Singapore.

Q10: What was the language policy for primary education in Southeast Asian countries after independence?

A: Primary education was in the ethnic language, and English was taught as a second language.

Q11: Which Southeast Asian country had state-supported ethnic schools for Chinese, Tamils, and Malays?

A: Malaysia.

Q12: In which Southeast Asian country is English the dominant language in education and business?

A: Singapore.

Q13: Which country's efforts focused on becoming a center of academic excellence and a knowledge society?

A: Singapore.

Q14: Which language was declared the national language in Malaysia for national unity and instruction?

A: Malay.

Q15: When was Malay declared the official and only language of government in Malaysia?

A: In 1976.

Q16: What language was reintroduced in Malaysia to modernize the country?

A: English.

Q17: Which Southeast Asian country became a colony of the United States in 1898?

A: The Philippines.

Q18: When did the Philippines become independent?

A: In 1946.

Q19: What was the medium of instruction in the Philippines under the colonial government?

A: English from grade 1 onwards.

Q20: What factors have facilitated the teaching and learning of English in Southeast Asia?

A: Factors such as mass media, the internet, mobile phones, and the educational system.

OBJECTIVE PART

LESSON:29

1.African English refers to English used by Black Africans in ex-British colonies and in Liberia. Which of the following regions in Africa prominently use English?

- a) North Africa
- b) East Africa
- c) Central Africa
- d) West Africa

2. Which country is NOT mentioned as a place where English enjoys a prominent place in Africa?

- a) Kenya
- b) Ghana
- c) Morocco
- d) Nigeria

3. In which domains are African English commonly used in several African countries?

- a) Sports and entertainment
- b) Government, education, and commerce
- c) Religious institutions
- d) Traditional ceremonies and rituals

4. What is a syntactic characteristic observed in African English?

- a) Omission of articles
- b) Excessive use of adjectives
- c) Complex sentence structures
- d) Strict adherence to grammatical rules

5. What is an example of generic use of nouns and pronouns in African English?

- a) "He is a real/whole person."
- b) "You are a sociable somebody."

c) "They deserve the respects."

d) All of the above

6. In African English, what does the term "knife bread" represent?

a) A type of bread

b) A knife made of bread

c) A bread knife

d) A type of sandwich

7. What percentage of the South African population has a speaking knowledge of English according to the 1991 census?

a) 30%

b) 45%

c) 60%

d) 75%

8. What is English seen as in the context of African American Vernacular English (AAVE)?

a) The language of liberation and resistance

b) The language of an oppressor

c) The language of unity

d) The language of education

9. Which hypothesis suggests that AAVE evolved from an unusual forced and multilingual contact situation?

- a) Substratist hypothesis
- b) Creolist hypothesis
- c) Anglicist hypothesis
- d) Colonialist hypothesis

10. Which phonological feature is unique to AAVE?

- a) Consonant cluster simplification
- b) Reversal of word-final s + a stop consonant
- c) Glide reduction
- d) Reduction of final nasal to vowel nasality

11. What is the semantic extension seen in African English?

- a) Addition of meanings to English lexical items
- b) Shifts in the meanings and functions of words
- c) Coining of new words
- d) Compounding of existing words

12. What is the status of English in Namibia?

- a) Widely spoken by the population
- b) Limited usage despite being the official language
- c) Used primarily in government institutions
- d) English is not recognized as a language in Namibia

13. Which African country is NOT mentioned as a place where English enjoys a prominent place?

- a) Ghana
- b) Tanzania
- c) Botswana
- d) Ethiopia

14. What is the linguistic profile of Africa an outcome of?

- a) Its geographical diversity
- b) Its economic development
- c) Its colonial history
- d) Its cultural heritage

15. What is the term used for English as used by Black Africans in ex-British colonies and in Liberia?

- a) African American Vernacular English
- b) African English
- c) Black South African English
- d) West African English

16. Which region in Africa is mentioned as having countries where English enjoys a prominent place?

- a) North Africa

- b) East Africa
- c) Southern Africa
- d) All of the above

17.What is the characteristic syntactic feature of African English mentioned in the paragraph?

- a) Omission of articles
- b) Complex sentence structures
- c) Frequent use of adjectives
- d) Strict adherence to grammatical rules

18.Which language is NOT mentioned as having a comparable syntactic category to the omission of articles in African English?

- a) English
- b) French
- c) African languages
- d) Spanish

19.Which countries are mentioned as using African English in the domains of government, education, and commerce?

- a) Ghana, Kenya, and Nigeria
- b) Tanzania, South Africa, and Zimbabwe
- c) Botswana, Namibia, and Zambia
- d) All of the above

20. What is the term used for the non-recent perfective form in AAVE?

- a) Non finite 'be'
- b) Sequential 'be done'
- c) Perfect 'done'
- d) Non-recent perfective 'been'

21. What does the non-finite 'be' in AAVE indicate?

- a) Habitual state or activity
- b) Completion (perfectivity)
- c) Future resultative
- d) Sequential actions

22. Which hypothesis suggests that AAVE is based on similarities with creole languages?

- a) Substratist hypothesis
- b) Creolist hypothesis
- c) Anglicist hypothesis
- d) Colonialist hypothesis

23. Which region in Africa is NOT mentioned as a place where African English is used prominently?

- a) West Africa
- b) East Africa
- c) Central Africa

d) North Africa

24. What is the attitude towards African American Vernacular English (AAVE)?

a) Unconscious barrier against recognition

b) Imperfect learning of English

c) Positive and creative form of English

d) Resistance towards adopting Standard English

25. What is the social context that impedes cross-varietal influences in AAVE?

a) Unconscious barrier against recognition

b) Language of liberation and resistance

c) Resistance towards adopting Standard English

d) Attitudes towards accepting nativized varieties of English

CODE: ENG506

SUBJECTIVE PART

LESSON:29

1. What does African English refer to?

African English refers to English as used only by Black Africans in ex-British colonies and in Liberia.

2. Which countries in Africa have English as a prominent language?

Ghana, Nigeria, Liberia, Kenya, Tanzania, Botswana, Namibia, Zambia, and South Africa.

3. Does the use of English vary in different contexts?

Yes, the range and depth of English usage differ from context to context.

4. Is English widely used in government, education, and commerce in African countries?

Yes, English is used in the domains of government, education, and commerce in several African countries such as Ghana, Kenya, Nigeria, South Africa, and Tanzania.

5. What are some syntactic characteristics of African English?

Some syntactic characteristics of African English include the omission of articles, pluralization of uncountable nouns, and redundant insertion of pronouns.

Give an example of the omission of articles in African English.

"Let strong...team be organized."

6. How is the generic use of nouns and pronouns observed in African English?

In African English, nouns and pronouns can be used in a generic sense, such as "He is a real/whole person" and "You are a sociable somebody."

7. What is the semantic extension in African English?

Semantic extension refers to adding new meanings to English lexical items. For example, "some 'amount' means 'money' or 'cash'."

8. What are some semantic shifts in African English?

Semantic shifts involve changes in the meanings and functions of existing words. Examples include "machine" referring specifically to a sewing machine and "minerals" referring to soft drinks.

9.What is coinage in African English?

Coinage refers to the creation of new words using the rich derivational morphology of African languages. For example, "facing a lot of hardcap" means "facing a lot of hardship."

10.How is African American Vernacular English (AAVE) associated with African Americans?

AAVE is associated with Americans of African descent, although it is not used by all African Americans.

11.What is the historical background of African Americans?

Between 1500 and 1860, at least 12 million Africans were forcibly taken to the Americas as slaves, working primarily on plantations.

12.What are the theories of origin for AAVE?

The substratist hypothesis suggests AAVE evolved from multilingual contact situations and West African languages. The creolist hypothesis links AAVE to creole languages, and the anglicist hypothesis suggests it developed through adaptive processes similar to other varieties of English.

13.What are some phonological features of AAVE?

Phonological features of AAVE include consonant cluster simplification, deletion of unstressed syllables, and reduction of final nasal consonants.

14. How is the non-finite 'be' used in AAVE?

Non-finite 'be' in AAVE is a social marker indicating habitual state or activity. For example, "When June comes, I be outta school..."

15. What is the function of the perfect 'done' in AAVE?

The perfect 'done' is used with content verbs to indicate completion. For example, "You don't have it 'cause you done used it."

16. What is the sequential 'be done' used for in AAVE?

The sequential 'be done' is used to express future resultative actions or conditions. For example, "My ice cream's gonna be done melted by the time we get there."

17. How are social factors related to AAVE's recognition as a variety of American English?

Social factors can impede the recognition of AAVE's developments in syntax, semantics, and pragmatics as positive and creative, often viewing it as imperfect learning of Standard English.

18. What is the attitude of African English towards accepting nativized varieties of English?

African English encourages more open-minded attitudes towards accepting nativized varieties of English as a solution to the ambivalence towards English.

19. Is African American Vernacular English widely researched?

Yes, AAVE is a noticeable variety of English in the United States, and a significant amount of research work has been devoted to it.

CODE: ENG506

OBJECTIVE PART

LESSON:30

1.Question: What does "English in the expanding circle" refer to?

- A) English used as an official language of government
- B) English used in restricted social domains
- C) English used as a medium of education
- D) English used in English-speaking countries

2.Question: What determines the degree and kind of English to be used in expanding circle countries?

- A) Economic factors
- B) Social factors
- C) Political factors
- D) All of the above

3.Question: In which regions is English likely to emerge as a national variety in East Asian countries?

- A) Regions where English is not taught in schools
- B) Regions with limited exposure to English
- C) Regions where English serves as an intranational language
- D) Regions with a small population

4.Question: Which country had access to an educated variety of English through missionary schools?

A) China

B) Japan

C) Korea

D) Taiwan

5.Question: In Chinese English, what is the replacement for the fricatives θ and ð?

A) s and z

B) t and ts

C) r and l

D) b and v

6.Question: What is the characteristic feature of English vocabulary in Japanese?

A) No distinction between tense and lax vowels

B) Use of uncle and aunt for people of an older generation

C) Deletion of articles

D) Semantic shifts in single and compound lexical items

7.Question: What did Commodore Perry's entrance into Tokyo Bay lead to?

A) The banishment of English from Japan

B) The arrival of American missionaries in Japan

C) The initiation of trade relations between Japan and the USA

D) The development of Japanese Pidgin English

8.Question: What is the current status of English in the European Union?

A) French is the biggest de facto European lingua franca

B) German is the biggest de facto European lingua franca

C) English is the biggest de facto European lingua franca

D) All EU members use their own languages for communication

9.Question: According to Phillipson and Cheshire, what should all EU members learn?

A) Each other's languages

B) English only

C) English and French

D) The language of the largest EU member

10.Question: What is a possible effect of Brexit on the status of English in Europe?

A) English will become the official language of the EU

B) English will lose its lingua franca status

C) English will be used as the common link language between member states

D) English will remain unaffected

11.Question: What is the main reason for the development of English in East Asian countries?

A) Trade relations with the USA

B) Arrival of American missionaries

C) Access to educated English through missionary schools

D) Opium wars

12.Question: Which variety of English is used intra-nationally in East Asian countries?

A) Native English

B) Foreign English

C) International English

D) European English

13.Question: What is the characteristic sound feature of Chinese English?

- A) Deletion of articles
- B) No distinction between adjectives and adverbs
- C) Replacement of fricatives θ and δ with s and z
- D) Insertion of vowels to simplify consonant clusters

14.Question: What are the dominant languages of the European Union?

- A) English, German, and French
- B) Spanish, Italian, and Polish
- C) Russian, Dutch, and Portuguese
- D) Greek, Romanian, and Hungarian

15.Question: What does Brexit refer to?

- A) The exit of English from Europe
- B) The promotion of English as the EU's official language
- C) The withdrawal of the UK from the European Union
- D) The emergence of European English after Brexit

16.Question: Which language is used as the medium of instruction in all public institutions in Japan?

- A) English
- B) Chinese
- C) Japanese
- D) German

17.Question: What are the three roles of English in Europe?

- A) Native, foreign, and international language
- B) Official, regional, and local language

- C) Lingua franca, native language, and national language
- D) Intranational, extranational, and international language

18.Question: What does "nativization" of English in Japan refer to?

- A) The adoption of English as the national language
- B) The integration of English elements into the Japanese language
- C) The replacement of English with Japanese in all domains
- D) The prohibition of English language use in Japan

19.Question: Which variety of English is considered distinctly European?

- A) European English
- B) British English
- C) American English
- D) Australian English

20.Question: What is the main characteristic of English vocabulary in Chinese English?

- A) Semantic shifts in lexical items
- B) Compounding with elements from both languages
- C) Replacement of tense and lax vowels
- D) Insertion of vowels in consonant clusters

21.Question: What was the historical significance of Canton in relation to English in China?

- A) It was the centre of world trade
- B) It was the birthplace of Chinese Pidgin English
- C) It was the location of the first English school in China
- D) It was the site of a major English-Chinese dictionary project

22.Question: What is the main characteristic of Chinese idiomatic expressions in English?

- A) Use of uncle and aunt for people of an older generation
- B) Semantic shifts in compound lexical items
- C) Insertion of vowels to simplify consonant clusters

D) Distinctive Chinese ways of greeting and saying goodbye

23.Question: What is the role of English in East Asian countries' development projects?

- A) Christian proselytization
- B) Modernization and internationalization**
- C) Politicization and medical advancements
- D) Engineering projects and media development

24.Question: What language is used as an internal link language in China?

- A) English
- B) Chinese**
- C) Japanese
- D) Russian

25.Question: What is the likely impact of English in East Asia on local languages and writing systems?

- A) No impact at all
- B) Minimal impact on local languages
- C) Significant impact on local languages and writing systems**
- D) English has replaced local languages completely

CODE: ENG506

SUBJECTIVE PART

LESSON:30

1.What is the expanding circle in terms of English?

Answer: The expanding circle refers to countries where English is not an official language of government or a medium of education.

2.What determines the degree and kind of English used in the expanding circle?

Answer: Social, cultural, economic, and political factors determine the degree and kind of English to be used.

3.What is the current English language situation in East Asia?

Answer: There is an increase in the number of students learning English, with 300 million people learning English in China. There is also a development project for English-speaking Japanese and strengthening of primary school English language teaching programs in Korea and Taiwan.

4.In which regions are national varieties likely to emerge where English serves as an intranational language?

Answer: National varieties are likely to emerge in regions where English serves as an intranational language.

5.What are some indicators of a national variety emerging in each country?

Answer: Increased exposure to English-using environments is an indicator of a national variety emerging in each country.

6.What is the history of English in China?

Answer: English reached China in 1637 with British traders, and the term "Chinese Pidgin English" appeared in 1859. The Opium Wars and the spread of English, as

well as the opening up of the country to missionaries, merchants, and colonial officials, contributed to the development of English in China.

7.How did political and ideological factors influence English in China?

Answer: Access to English was limited to a university-educated elite, and English had an impact on written Chinese, lexical borrowing, and syntax.

8.What are some characteristics of Chinese English in terms of sound system?

Answer: Chinese English does not make a distinction between tense and lax vowels, and the fricatives θ and δ are replaced by s and z.

9.How does Chinese English vocabulary differ from standard English?

Answer: Chinese English shows semantic shifts in single and compound lexical items, and there are collocations with political significance.

10.What are some grammatical features of Chinese English?
