Welcome To vuways Study Help

1.Klik mintaka game reserve is along the border.(china)

2.which is not primary pollutant..(soil)

3.In category Ib some wilderness area includes..(livestock grazing)..

by nomadic peoples and distinction may have to be made..

4...National monuments are generally quite (small)protected area often have high visitors value.

5..SSC is governed by sterring committe which is governed by .(comission)chair..

6.about (90%)of domesticated food crop cultivated today is the descendant of wild plants.

7..elephants eat(450) kg of food per day..

8..I.W.C stands for...(international whalling commision)

9..location of khunjrab national park(gilgit -baltistan)

10..Baltistan sancutary fpund in(1975)

11..(cinematography) of wildlife conservation should be screened out to the remote villages and all students.. 12..I.U.C.N. found in(1948)..

13..Gol means....(valley)

14...I.U.C.N found (66)game reserves in pakistan.

15...National parks of pakistan(29).. /

www.vuways.com

16..Rosy periwinkle(anticancer)

17..which is not primary pollutan(soil)

18..which is a game bird...a)markhor.b)indus river dolphin..c)finchesd..d)houboura bustard

19...(Habitot loss) cause of species destruction

20..every zoo has (1)full time officer. 21..introduction of(non-native)specie is posing major threat to wetland..

1.Chashma and Taunsa Barrage Dolphin Sanctuary was declared open to the public in (1972) .

2.(500) projects in more than 60 nations around the world that are intended to help protect both wildlife and the wild places in which they live.

3.Rosy periwinkle leaves extract as (anticancer)

4.Elephants eat up to (450kg)of food per day.

5.Madras Wild Elephant Preservation Act, (1873.)

6.The SSC is governed by a Steering Committee, which is headed by the (Commission) Chair.

7.Schedule III,Wild birds and animals protected throughout the(year.)

8.(Habitat) determines any wildlife species found in any area.

9.The Indus Dolphin Reserve is a natural wetland and situated in the (Sukkar.)

10. A protected area where the interaction of people and nature over time has produced an area of distinct character with significant ecological, biological, cultural and scenic value...

.....(Seascape.)

11.Most of the areas in game reserves have created to provide habitat protection for animal species commonly referred to as (game.)

12.In Pakistan hunting is not allowed after 1974 wild life act and Amendments in 1991 • Hence (fishing) be the only sports.

13.Ayubia National Park is situated in (KPK.)

Questions:

1-Name any two dams of Pakistan (2)

Tarbela dams, warsak dam, khan pur dam

2-Primary objective of Astore Sanctuary (2)

The sanctuary is home to a small population of the near threatened species, Markhor. Markhor is National animal of Pakistan. It is a large species of wild goats unique to this region of the world

3-Name the factors for which Census can be helpful in mapping ? (3)

www.vuways.com

- Animals roaming
- Water sources
- Human activities, such as livestock grazing and charcoal burning **4-Why trading of wildlife is carried? (3)**

5- Challenge to veteranians? (5)

- Environmental contaminants
- Infectious diseases
- Outbreaks that potentially threaten wild and domesticated animals as well as humans

6-Give Primary objectve of Protected Area with Sustainable use of Natural Resources(5)

To conserve

- Regionally
- Nationally
- Globally outstanding ecosystems
- Species (occurrences or aggregations)
- Geo diversity features

Other Objectives

- To preserve ecosystems.
- To secure examples of the natural environment for scientific studies.
- To minimize disturbance through careful planning.
- To conserve cultural and spiritual values associated with nature.

What is Rann of Kutch 2

The Great Rann of Kutch is a salt marsh. Located in the Thar Desert. Kutch District of Gujarat, India and the Sindh, Province of Pakistan. Reputed to be one of the largest salt deserts in the world.

How we can educate people about wildlife 2

Appendix 1 of C.I.T.E.S 3

Species threatened with extinction and provides the greatest level of protection, including restrictions on commercial trade. Examples include gorillas, sea turtles, most lady slipper orchids, and giant pandas.

www.vuways.com

National Parks concept 3

- National Park is an area of outstanding scenic merit and natural beauty where the landscape, flora and fauna are protected and preserved in a natural state.
- Public access for recreation, education and research is provided.
- Access roads and other facilities should be planned so they do not conflict with main objectives of National Parks.

Monitoring trade in C.I.T.E.S 5

The backbone of CITES is the permit system that facilitates international cooperation in conservation and trade monitoring. Permits are issued only if a country's Management and Scientific Authorities determine that trade is legal and does not threaten the species' survival in the wild. These permit allows inspection at ports of export and import to quickly verify that CITES specimens are properly documented. This trade monitoring has created an information on the management and use of CITES species worldwide. CITES has helped global conservation of species. CITES provides tools to effectively conserve the world's diverse natural resources. It control global over-exploitation of wildlife.

General rule of National Park 5

The Ministry of Interior is the responsible authority for National Parks. The Ministry may establish a National Planning Commission to designate, alter or abolish areas for National Parks. The Commission may review National Park management plans.

National Parks are meant for

- Preserving the nation's unique natural scenery
- Protection of wild fauna and flora
- Preserving historic sites
- Providing public recreation • Areas for scientific research.
- Areas having unique landscapes, significant ecological systems, or habitats
- Biodiversity that are representative of the natural heritage of the nation.
- Administrative headquarters shall be established at each National Park.

In accordance with the existing land use and the characteristics of the resources, a National Park may be divided into the following zones for management:

- Existing use area
- Recreation area
- Cultural/historic area
- Scenic area
- Ecological protected area

The following activities shall be prohibited within the National Parks:

www.vuways.com

- Burning of vegetation or setting fires to clear land.
- Hunting animals or catching fish.
- Polluting water or air
- Picking or removing flower or any other vegetation.

Engraving, sketching or defacing trees, bark, stone or signs

Q1. IUCN Stands for. 2

International Union for Conservation of Nature and Natural Resources

Q3. What are restrictions on import and export of animals. 3

No person shall

- Receive by gift, purchase or otherwise any animal of a kind specified in the Second Schedule
- Unless a valid certificate of lawful possession in respect thereof.
- Restrictions on Dealing in Animals, Trophies and Meat
- Wildlife Sanctuary
- National Park
- Game Reserve

Q4. Name 2 wildlife sanctuaries of KPK. 3

- Manglot
- Argam Basti

Q5: What is importance of Dams. 5

- Dams can play an important role in supporting the economic development of a country and its people.
- Once an urgent need for more electricity, irrigation water, or other service has been demonstrated, an options assessment can show whether a large dam is the best alternative. (ppts)
- **Dams** are **important** because they provide water for domestic, industry and irrigation purposes.
- **Dams** often also provide hydroelectric power production and river navigation. ...
- **Dams** and their reservoirs provide recreation areas for fishing and boating. • They help people by reducing or preventing floods. (google)

Q6: Write a note on significance of wildlife.5

www.vuways.com

Wildlife is an integral part of an ecosystem.

- Human himself as animal inter-related and inter-dependent on wildlife for its survival.
- From clothes to medicines, building materials to variety of chemicals all are extracted from exiting wildlife around us.
- About 90% of the domestic food crops now cultivated are descendants of wild plants.
- Today, variety of plant products like lumber, paper, rubber, oils, dyes, and fibers etc. are supplied by wild plants.
- Plants recycle nutrients necessary for agricultural production and help maintain soil fertility.
- Wild plants or their extracts are a source of medicine for an estimated 80% of the world's population.
- Source of oxygen.
- Insects and birds add to the economic gains through pollination of plants.
- Maintaining the 'balance of Nature'. e.g. Carnivore-herbivore balance.

4 name of any national park?2

01. Margallah Hills National Park.
02. Hazarganji Chiltan National Park:
03. Hingol National Park
04. Kirthar National Park:
05. Ayubia National Park:
06. Chitral Gol National Park:.
07. Sheikh Badin National Park:
08. Saiful Maluk National Park.
09. Lulosar Dodipat National Park:
10. broghil valley national park

3 name of punjab remsar?3

pollution effect wildlife?3

Pollution of various kinds have adversely affected wild animals.

www.vuways.com

- Insecticides

There has been a considerable damage to birds by insecticides spraying.

- Oil Spillage

Oceanic birds are killed by oil spillage from oil tankers in the sea.

- Noise Pollution

It causes disturbance of hormonal and reproductive behavior of many wild animals.

- Water Pollution

Domestic as well as industrial waste dumped into water bodies causes decline in stocks of fishes.

chitral gol national park?5

Chitral Gol National Park is established in 1984. "Gol" is local langauge meaning "Valley".

Location:

Hindukush range. Beside the Chitral River in Chitral District - Khyber Pakhtunkhwa-Pakistan.

Area:

7,780 ha

Features:

- Rainfall is estimated to be 462 ml.
- Weather is cold and dry.
- The temperature ranges from -12.2 to 43.3 °C.

Major Flora:

- The park is rich in a particular tree. Cedar

Major Fauna:

- Chitral National Park provide shelter to a vast biodiversity, especially Markhor.
- Holds the largest population of the Astor Markhor in the world.
- Siberian ibex
- Ladakh Urial
- Asian black bear
- Snow leopard (Non-permanent resident)

www.vuways.com

- Tibetan wolf
- Red fox
- Yellow-throated marten
- Himalayan otter

Birds Fauna:

- Bearded vulture
- Himalayan vulture
- Golden Eagle
- Demoiselle crane
- Peregrine falcon
- Himalayan snow cock
- Himalayan monal
- Snow partridge
- Rock partridge

plant propagation?5

❖ Wild animals can be helpful to plant propagation in various ways

- Pollination------ (Honeybees, hummingbirds, and some bats. etc.) Pollen stick to bee's body and legs which then transferred to flower it visits.
- Dispersal of seeds------ (squirrels, birds, rodents etc.) Seeds can stick to fur . Squirrels or birds pick them up and drop or bury them. Seed eaters also disperse the seeds by defecation . Caching behavior of many rodents and some birds.
- Conifer trees (pine, spruce, fur, etc.) use their pinecones - there are seeds in there that can be eaten or distributed by mice and other animals.

Purpose of IWC (2

The purpose of the I.W.C as specified in its constitution is

"Safeguarding for future generations the great natural resources represented by the whale stocks;"

Original members consisted only of the 15 whale-hunting nations

Factors for which exploration of forest...(2

- Exploration of forest is not permissible except for reducing ○ Fire hazards ○ Epidemics ○ Insect attacks

www.vuways.com

o Natural calamities **administration**

of large zoo(3

At least one full time curator having the sole responsibility of looking after the upkeep of animals and maintenance of the animal enclosures. At least two full-time veterinarians.

Aesthetic and recreational value of wildlife (5

It is the pleasure to enjoy the beauty of wildlife

- People enjoy seeing plants and animals in their natural habitats for recreation.
- They are a source of joy, wonder, and pleasure for many people.
- Wildlife tourism (ecotourism).
- Bird watching, is now a growing part of wildlife tourism.
- Animals photographed for recreational purposes also have aesthetic value.
- Exotic game ranches
- Viewing non-native species in a "near-native" habitat.
- Visiting Safari parks/zoo as recreational activity

Visiting hilly areas for recreational purpose

Flora and fauna of hazaraganji chiltan national Park (5

Major Flora:

- Pashtun Juniper
- Pistachio
- Almond
- Ash trees
- Wild figs

Major Fauna:

The area is mainly meant for the restoration of endangered species of Chiltan Markhor

- To date about 300- 400 Sulaiman Markhor and around 800 Chiltan ibex survive within the park boundaries.
- The Suleiman Markhor is also present in the northern part of the Chiltan Range and a few urial still survive on the western slopes between 1,500m and 2,100m

Mammals other than Markhor in the park includes

- Indian wolf
- Stripped hyena

www.vuways.com

- Leopard
- Caracal
- Jackal
- Red fox
- Porcupine
- Desert hare

Birds in the Park are

- Houbara bustard
- Griffon vulture
- Egyptian vulture
- Honey buzzard
- Laggar falcon
- Peregrine falcon
- Kestrel
- Indian sparrow hawk
- Scops owl
- Common cuckoo
- European nightjar
- Long-billed pipit
- Orphean warbler
- Variety of wheatears
- Rock partridge
- Chukor

1.name 5 types of wetlands(5)

i. Marine
ii. Estuarine
iii. Lacustrine iv. Riverine
v. Palustrine

4.climate change define(2)

"*any change in climate over time, whether due to natural variability or as a result of human activity.*" **ater pollution to wildlife(2).**

area of chinji national park 2

www.vuways.com

Chinji National Park covers a total area of 6,095 hectares (15,061 acres).

name varieties of living organisms in wildlife 3

It comprises innumerous varieties of living organism in their natural habitats.

- Wild Plants
- Wild Animals
- Fungi
- Microorganisms

concept of national park 3

- National Park is an area of outstanding scenic merit and natural beauty where the landscape, flora and fauna are protected and preserved in a natural state.
- Public access for recreation, education and research is provided.
- Access roads and other facilities should be planned so they do not conflict with main objectives of National Parks.

causes of depletion of wildlife 5

Conflict between wildlife and human occur over

- Living space
- Food

These factors are the main threats to the continued survival of many species in different parts of the world.

The main factors of Persecution are:

Wildlife Trade

Trading of wildlife and its products. e.g. Bush meat, Ivory, hide, trophy, fur etc.

Trapping of Wild Animals

- Pets(cats etc.)
- Sold for Medical experimental studies (Monkeys, Rabbits etc.)
- For street shows, circuses (Bears,Parrots,Lions)

Poaching

- Illegal killing for tusks, oil, decoration (as stuffed preparation), Plumage.
- Illegal hunting for bush meat, trophies.

www.vuways.com

Absurd killing

- Tigers, jackals, wolves etc. are killed by the farmers.

name game reserve AJK 5

- Salkhala (Neelum)
- Moji (Leepa)
- Qazinag (Leepa)
- Mori Said Ali (Haweli)
- Phala (Haweli)
- Hillan (Haweli)
- Nar (Bagh)
- Sudhan Gali (Bagh)
- Doom Khalla (Bagh)
- Banjonsa (Poonch)
- Junjhal Hill (Sudhunti)

Khunjerab national park (5)

Khunjerab National Park was established on 29 April 1979.

Location:

- Gilgit Baltistan-Pakistan.
- Adjacent to the Taxkorgan Natural Reserve in China.

Area:

Spreads over 2,26,913 ha

Features:

www.vuways.com

- One of the highest National Parks in the world.
- It is Pakistan's third largest National Park.

Area of Park lies at an elevation of 4000m

Important Fact:

- The borders of the Park mapped in 1974, after a field survey to protect "Marcopolo Sheep".
- The population of that sheep was around 400 but had dropped to below 180 by the time of the completion of the Karakoram Highway.

Major Fauna

The primary purpose of this park was to provide protection to the endangered Marco Polo sheep, which is only found in this area in Pakistan.

Snow leopards

- Worldwide---7,000-10,000
- Khunjerab Park---More than 300

Other Mammalian Fauna

- Himalayan ibex
- Himalayan brown bear
- Red fox
- Tibetan wolf
- Blue sheep (many more, see ppts)

Birds Fauna

- Golden Eagle
- Black vulture
- Marsh Harrier
- Eurasian Sparrow Hawk (many more, see ppts)

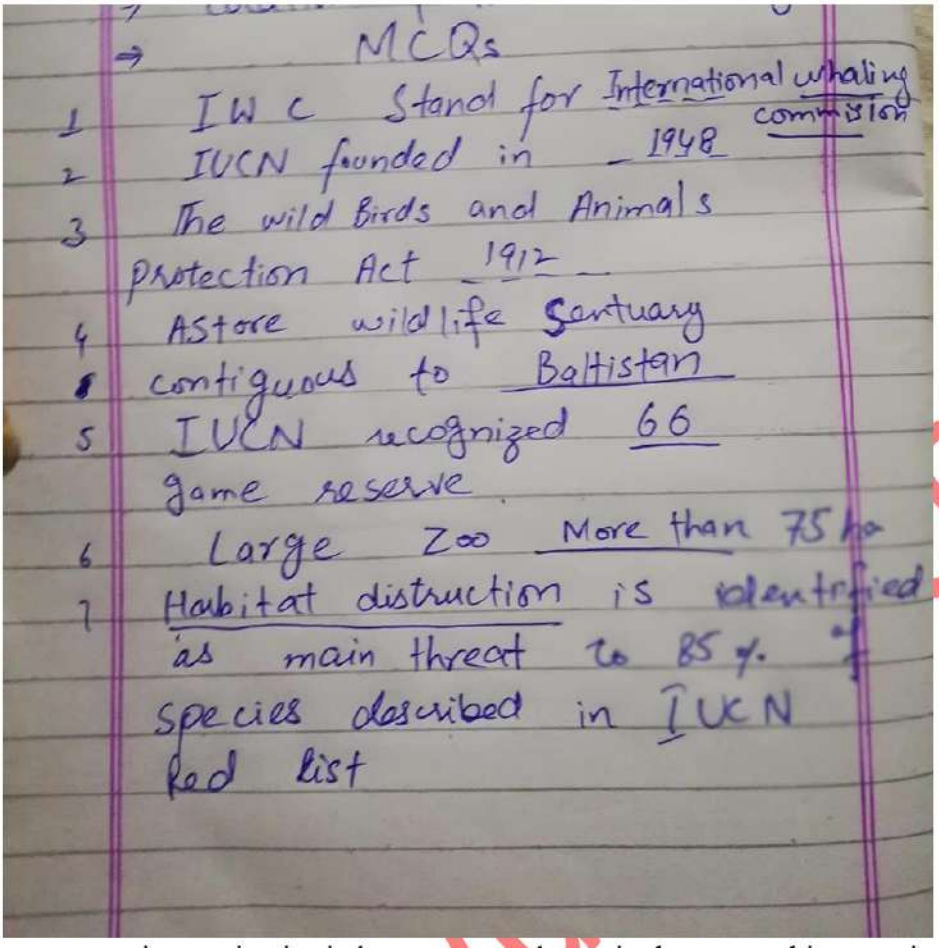

Important Fact:

According to WWF officials there is plan to turn "Khunjreb National Park" into "International Peace Park". To conserve area on both sides of the boarder.

What is game reserve? (3)

"A game reserve is an area wherein controlled hunting and shooting is permitted on permit basis"

www.vuways.com

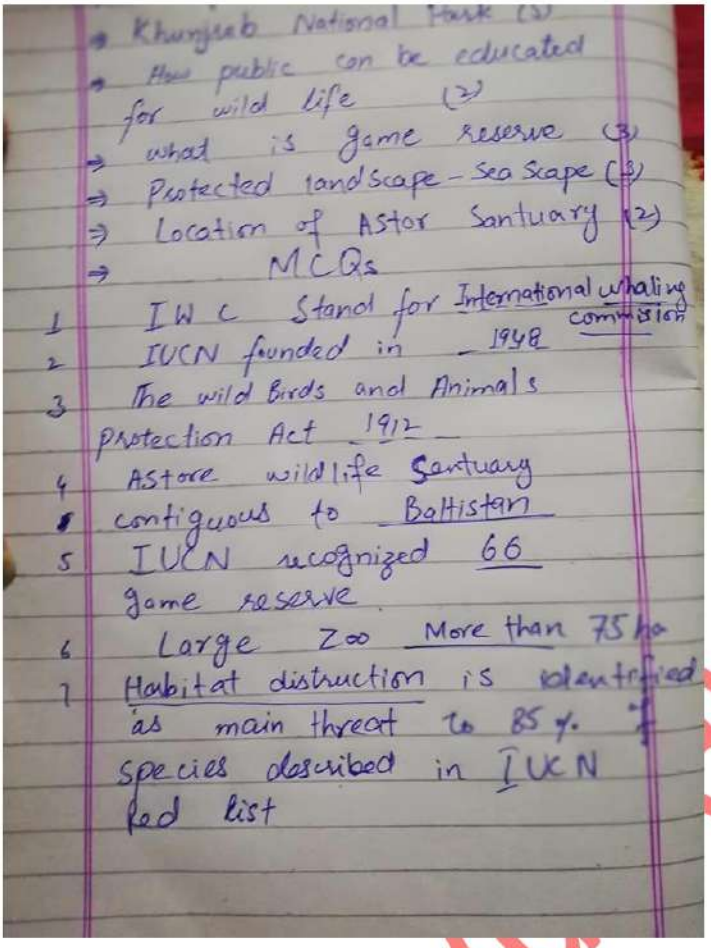

A game reserve (wildlife preserve) is a large area of land where wild animals live safely or are hunted in a controlled way for sport.

Protected landscape-sea scape (3)

- A protected area where the interaction of people and nature over time has produced an area of distinct character with significant ecological, biological, cultural and scenic value.
- Where safeguarding the integrity of this interaction is vital to protect and sustain the area and its associated nature conservation and other values.

Location of astor wildlife sanctuary

- Astore District
- Between Nanga Parbat
- Gilgit–Baltistan, Pakistan

- Khunjerab National Park (5)
- How public can be educated for wild life (2)
- ⇒ what is game reserve (3)
- ⇒ Protected landscape - Sea Scape (3)
- ⇒ Location of Astor Santuary (2)
- ⇒ MCQs

1. IWC Stand for International whaling commision
2. IUCN founded in 1948
3. The wild Birds and Animals protection Act 1912
4. Astore wildlife Santuary
5. contiguous to Baltistan
6. IUCN recognized 66 game reserve
7. Large Zoo More than 75 ha
8. Habitat distruction is identified as main threat to 85% of species described in IUCN Red list

www.vuways.com
