Explain Game Reserve?

A game reserve is an area wherein controlled hunting and shooting is permitted on permit basis" A game reserve (wildlife preserve) is a large area of land where wild animals live safely or are hunted in a controlled way for sport. In the game reserves the major focus is specifically the animals. If hunting is prohibited, a game reserve may be considered a "Nature Reserve" Wherein all aspects of naturally-occurring life in the area are considered. Most of the areas in game reserves have created to provide habitat protection for animal species commonly referred to as game (huntable species for sport or meat)

Cause of Wildlife depletion? State cause of wildlife depletion?

Persecution of Human Conflict between wildlife and human occur over Living space Food. **Trapping of Wild Animals:** Pets(cats etc.) Sold for Medical experimental studies (Monkeys, Rabbits etc.) For street shows, circuses (Bears,Parrots,Lions). **Poaching** Illegal killing for tusks, oil, decoration (as stuffed preparation), Plumage. Illegal hunting for bush meat, trophies. **Absurd killing** • Tigers, jackals, wolves etc. are killed by the farmers.

Why Markhor is hunted?

Markhor hunting for trophy. **(PPTS)**

Who is Carl Hagenbeck?

German collector, Carl Hagenbeck, built the first wild animal park in 1848 • He allowed the animals outdoor access, believing their enclosure should more closely resemble nature • The Zoological Society of London justified London 's zoological collection as "The advancement of zoology and animal physiology and the introduction of new and curios subjects of the Animal Kingdom.

What is Climate Change?

any change in climate over time, whether due to natural variability or as a result of human activity." Climate change is also taking its toll in wetland degradation.

Area of LaL suhanra National Park?

Lal Suhanra is spread over 31,368 hectaresNotable for the diversity of its landscape, which includes areas of desert, forest and wetland.

Cavity Tree?

Holes excavated in snags by woodpeckers. Shelter and nesting cover by many species.

Primary purpose of Astore sanctuary? Primary feature or object of the Astore?

Primary objective The sanctuary is home to a small population of the near threatened species, Markhor. Markhor is National animal of Pakistan. It is a large species of wild goats unique to this region of the world.

Features: Altitude is from 1,212 m to 6,060 m Durable and precipitous geography Mostly consisting of metasedimentary stones Several kinds of igneous stones

Objective: Purpose of conserving the threatened species • Snow leopard • Brown bear • Lynx • Tibetan wolf • Tibetan sand fox • Markhor • Bharal

CITES monitoring trade? CITES management committee?

The backbone of CITES is the permit system that facilitates international cooperation in conservation and trade monitoring.Permits are issued only if a country's Management and Scientific Authorities determine that trade is legal and does not threaten the species' survival in the wild. These permit allows inspection at ports of export and import to quickly verify that CITES specimens are properly documented.This trade monitoring has created an information on the management and use of CITES species worldwide. CITES has helped global conservation of species.CITES provides tools to effectively conserve the world's diverse natural resources. It control global overexploitation of wildlife.

Eagle and Hawk Spiritual Value? Why eagle and Hawk feather are important?

Spiritually significant • Eagles, hawks and their feathers have great cultural and spiritualvalue to Native Americans as religious objects.

Negative impact of predation?

Negative impact of wildlife occurs when growing human populations overlap with established wildlife territory.People lose their crops, livestock, property, and sometimes their lives.

Ramser sites of Punjab?

Punjab • Uchhali Complex • Taunsa Barrage • Chashma Barrage

Ramser sites of Sindh?

Sindh • Keenjhar (Kalri) Lake • Haleji Lake • Drigh Lake • Indus Dolphin reserve • Jubho lagoon • Nurri Lagoon • DehAkro-II • Indus Delta • Runn of Kutch.

Name the three product of wild plants?

Today, variety of plant products like lumber, paper, rubber, oils, dyes, and fibers etc. are supplied by wild plants.

IUCN stand for?

International Union for Conservation of Nature and Natural Resources

Mention places declared bt IUCN categories wise?

1. Category I
    - O Category Ia
    - O (Strict Nature Reserve)
    - O Category Ib (Wilderness Area)
2. Category II (National Park)
3. Category III (Natural Monument or Feature)
4. Category IV (Habitat/Species Management Area)
5. Category V (Protected Landscape/\Seascape)
6. Category VI (Protected area with sustainable use of natural resources)

www.vuways.com

Rabies disease?

 Rabies(Hydrophobia) : Bite Wound Disease Host: Any mammal, usually carnivores; highest incidence is in skunks, foxes, bats, and raccoons. Transmission: Bite wounds, infected saliva in cuts or skin abrasions, aerosol in bat caves.

Margalla Hill beauty?

Elevation range 550m to 1500m. • Rugged topography • Numerous valleys • Precipitous slopes • Margalla hills have beautiful torrents gushing down in the monsoon. • Natural springs are also present. • The Park includes the Margalla Hills which form's the foothills of the Himalayas, along with Shakarparian Park and Rawal Lake.

Pollution Effect?

Insecticides There has been a considerable damage to birds by insecticides spraying.

Oil Spillage Oceanic birds are killed by oil spillage from oil tankers in the sea.

Noise Pollution It causes disturbance of hormonal and reproductive behavior of many wild animals.

Water Pollution Domestic as well as industrial waste dumped into water bodies causes decline in stocks of fishes.

Sanctuary purpose?

Animal sanctuaries exist for many specific reasons: Help to protect animals and safeguard their lives. • Animal sanctuaries give new homes to abandoned animals. • Animals rescued from dangerous conditions. • Help to protect animals from illegal activities. • Serve as places where endangered animals breed and are therefore protected.

Census Mapping Factor?

Census can be helpful in mapping factors of • Animals roaming • Water sources • Human activities, such as livestock grazing and charcoal burning.

Define Poaching?

Poaching Snow leopards have long been killed for theirBeautiful fur, Bones, Body parts, Traditional Asian Medicine.

National Parks Name any three? Name of Four National Parks?

01. Margallah Hills National Park. 02. Hazarganji Chiltan National Park: 03. Hingol National Park 04. Kirthar National Park: 05. Ayubia National Park: 06. Chitral Gol National Park:. 07. Sheikh Badin National Park 08. Saiful Maluk National Park. 09. Lulosar Dodipat National Park: 10. broghil valley national park.

Name of Game Reserve AJK?

Salkhala (Neelum) • Moji (Leepa) • Qazinag (Leepa) • Mori Said Ali (Haweli) • Phala (Haweli) Hillan (Haweli) • Nar (Bagh) • Sudhan Gali (Bagh) • Doom Khalla (Bagh) • Banjonsa (Poonch) • Junjhal Hill (Sudhunti).

Habitat? What is Habitat?

Habitat is the type of natural environment in which a particular species of organism lives. It is characterized by both physical and biological features. A species' habitat is those places where it can find food, shelter, protection and mates for reproduction

Five name of Major Wetland?

i. Marine ii. Estuarine iii. Lacustrine iv. Riverine v. Palustrine

Wetland Definition?

A wetland is a place where the land is covered by water, either salt, fresh or somewhere in between. Marshes and ponds, the edge of a lake or ocean, the delta at the mouth of a river, low-lying areas that frequently flood—all of these are wetlands.

www.vuways.com

Note on Wildlife?

Wildlife traditionally refers to undomesticated animal species, but has come to include all organisms that grow or live wild in an area without being introduced by humans. Wildlife can be found in all ecosystems. ... This includes such animals as domesticated cats, dogs, mice, and gerbils.

Location of Tooshi Game Reserve?

Tooshi Game Reserve, is located along the paved road to GaramChashma in Chitral'sLutkho district.

Definition of Parks by IUCN?

Large natural or near natural areas (at least 1000 hectares) set aside to protect large-scale ecological processes, which also provide a foundation for environmentally scientific, educational, recreational and visitor opportunities.

What is territory?

Territory is the sociographical area that an animal of a particular species consistently defends against conspecifics (or, occasionally, animals of other species). Animals that defend territories in this way are referred to as territorial. Territoriality is only shown by a minority of species. **(Internet)**

Economics important of wildlife?

From the economic point of view wildlife is important and serves as source of • Tourism • Animal Protein • Bushmeat(Wild meat) • Trading of Bushmeat • Ranching and Farming • Traditional medicine/ Pharmaceutics • Wood.

What is Site?

Local Wildlife Sites are areas of land that are especially important for their wildlife. They are some of our most valuable wildlife areas. ... They are corridors for wildlife, forming key components of ecological networks.

How many sanctuary in Pakistan? How many Wild sanctuary in Pakistan?

In Pakistan presently there are 99 Wildlife Sanctuaries.

At least two criteria for wetland depletion?

(1) at least periodically, the land supports predominantly hydrophytes; (2) the substrate is predominantly undrained hydric soil; and (3) the substrate is nonsoil and is saturated with water or covered by shallow water **(Internet)**

Rule of National Park?

The Ministry of Interior is the responsible authority for National Parks.The Ministry may establish a National Planning Commission to designate, alter or abolish areas for National Parks. The Commission may review National Park management plans. National Parks are meant for • Preserving the nation's unique natural scenery • Protection of wild fauna and flora • Preserving historic sites • Providing public recreation • Areas for scientific research. • Areas having unique landscapes, significant ecological systems, or habitats • Biodiversity that are representative of the natural heritage of the nation. Administrative headquarters shall be established at each National Park.

In accordance with the existing land use and the characteristics of the resources, a National Park may be divided into the following zones for management: • Existing use area • Recreation area • Cultural/historic area • Scenic area • Ecological protected area.

The following activities shall be prohibited within the National Parks: • Burning of vegetation or setting fires to clear land. • Hunting animals or catching fish. • Polluting water or air • Picking or removing flower or any other vegetation.

• Engraving, sketching or defacing trees, bark, stone or signs.

Within cultural/historic areas, the following activities shall be subject to prior permission from the Ministry of Interior: • Repairing artifacts or historic monument. • Repairing or reconstructing buildings. • Making artificial alterations to original landscapes or landforms.

www.vuways.com

What are protected area with sustainable use of natural resources?

Protected areas that conserve ecosystems and habitats, together with associated cultural values and traditional natural resource management systems. Generally large, with most of the area in a natural condition. Where a proportion is under sustainable natural resource management. Where low-level non-industrial use of natural resources compatible with nature conservation is seen as one of the main aims of the area.

Give Primary objective of Protected Area with Sustainable use of Natural Resources?

Primary objective • To protect natural ecosystems. Use natural resources sustainably, when conservation and sustainable use can be mutually beneficial.

Primary Pollutant names of bacterial disease by wild animals?

 Bubonic plague Tularemia (rabbit fever)

Describe Scientific Role of Wildlife?

Wetland alteration?

Changes made to, or near, a watercourse or wetland may result in damage to the environment, water quality, infrastructure and property. ... The guidelines contain explanatory information which is intended to provide guiding principles for planning a watercourse or wetland alteration or reviewing a proposed alteration.

Significant wildlife of Punjab?

This has caused only a few species to become endangered. ... Some of the threatened mammal species include the, axis deer, blackbuck (in captivity; extinct in wild), hog deer, dholes, Indian pangolin, Punjab urial and Sindh ibex, bird species of white-backed vulture and reptile species of black pond turtle and gharial.

How animals trapped?

Animal trapping, or simply trapping, is the use of a device to remotely catch an animal. Animals may be trapped for a variety of purposes, including food, the fur trade, hunting, pest control, and wildlife management.

Importance of sanctuary?

National Parks Help Protect Wildlife:

Without national parks certain animal species are at greater risk of becoming extinct – a landscape needs to be protected in order to provide habitat for wildlife. Animal sanctuaries give a specific place where animals are kept in captivity in order to preserve the species

CITES Appendix?

Appendix I includes species threatened with extinction. Trade in specimens of these species is permitted only in exceptional circumstances. Appendix II includes species not necessarily threatened with extinction, but in which trade must be controlled in order to avoid utilization incompatible with their survival.

Zone of national parks and general concept?

A national park is a park in use for conservation purposes. ... An international organization, the International Union for Conservation of Nature (IUCN), and its World Commission on Protected Areas (WCPA), has defined "National Park" as its Category II type of protected areas.

Hub Dam Sanctuary?

Hab Dam Wildlife Sanctuary was declared in July 1974. It is Pakistan's third largest dam. Area: 27,219ha Location: It is situated in the north of Karachi bordering the Kirthar National ParkBalochistan Features: • Hab Dam Wildlife Sanctuary is covering an area of 32 square miles • Much of the shoreline is steeply shelving and stony • Many shallow bays • Small

www.vuways.com

islands • The greater part of the reservoir (in Balochistan) is unprotected • The Eastern shore and of the Dam (in Sindh) is protected in the Kirthar National Fauna: An ideal place for bird watching.

Which type of organism are considered wildlife?

Organisms that grow or live wild in an area without being intervened by humans. **Pollinating agent?**

Pollinating agents are animals such as insects, birds, and bats; water; wind; and even plants themselves, when selfpollination occurs within a closed flower. Pollination often occurs within a species.

Wilde life benefits?

Wildlife can be served as a source of Gene Bank. Agriculture • Many wild relatives of crops, plants and presence of useful seeds are screened out and selected. Such selection can then be introduced to breeding programs Animal Husbandry • Wild species' genotype may have a gene particularly resistant to parasites or to a particular disease. • Such genes are of great value, especially if incorporated into local livestock to create hardier and even more productive animals. • Blood samples of the wild animals can be screened which would be helpful for identifying and resolving causes of disease epidemics.

Bush meat?

Bushmeat, wildmeat, or game meat is meat from non-domesticated mammals, reptiles, amphibians and birds hunted for food in tropical forests. Commercial harvesting and the trade of wildlife is considered a threat to biodiversity

What is area of Chilton part?

Area:It covers 325,000 acre of land located close to the Koh-i-Chiltan mountain in Quetta's outskirt.

Taunsa and chashma sanctuary? Taunsa Barrage Sanctuary?

Chashma and Taunsa Barrage Dolphin Sanctuary was declared open to the public in 1972 Location: • Mianwali District, Punjab-Pakistan Features: For a wide variety of waterfowls including threatened species, an important site for Breeding Staging Wintering Mid-winter waterfowl counts in recent years have regularly exceeded 20,000 birds Anatidae (ducks, geese, swans) The endangered Indus Dolphin occurs in the river both upstream and downstream of the barrage.

How to educate about wild life?

Most people of any country are ignorant about the utility of wildlife.Hence, for the conservation of wildlife there is a great need of educating people. To achieve this goal following methods can be adapted. Celebration of wild life week every year. • Publicity through media and film shows. • Holding conducted tours, essay competitions, lectures, seminars, etc. • Setting up nature clubs in educational institutions. • Publication of wildlife books and journals. • Establishment of natural history museums etc.

Three specie that carry out pollination?

(Honeybees, hummingbirds, and some bats. etc.)

Define Climate Changes?

a change in global or regional climate patterns, in particular a change apparent from the mid to late 20th century onwards and attributed largely to the increased levels of atmospheric carbon dioxide produced by the use of fossil fuels.

CITES abbreviation?

Convention on International Trade in Endangered Species (C.I.T.E.S)

www.vuways.com

Chitral Gol Park?

ChitralGol National Park is established in 1984. "Gol" is local langauge meaning "Valley". Location: Hindukush range. Beside the Chitral River in Chitral District - Khyber Pakhtunkhwa-Pakistan. Area: 7,780 ha Features: Rainfall is estimated to be 462 ml. • Weather is cold and dry. • The temperature ranges from -12.2 to 43.3 °C. Major Flora: • The park is rich in a particular tree. Cedar Major Fauna: • Chitral National Park provide shelter to a vast biodiversity, especially Markhor. • Holds the largest population of the Astor Markhor in the world. • Siberian ibex • LadakhUrial • Asian black bear • Snow leopard (Non-permanent resident) • Tibetan wolf • Red fox • Yellow-throated marten • Himalayan otter. Birds Fauna: • Bearded vulture Himalayan vulture • Golden Eagle • Demoiselle crane • Peregrine falcon • Himalayan snow cock • Himalayan monal • Snow partridge • Rock partridge.

Function of Sanctuary?

A sanctuary, in its original meaning, is a sacred place, such as a shrine. By the use of such places as a haven, by extension the term has come to be used for any place of safety.

Name national parks in Pakistan?

1. Ayub Park Rawalpindi 2. Shandure-Phander National Park Ghizer 3. Broghil Valley

Importance of Bird and Plants?

Nectar-feeding birds are important pollinators, meaning they move the pollen from flower to flower to help fertilize the sex cells and create new plants. Hummingbirds, sunbirds, and the honey-eaters are common pollinators. Many fruit-eating birds help disperse seeds. ... Birds are often important to island ecology.

Three wild life act of Punjab?

Punjab • Uchhali Complex • Taunsa Barrage • Chashma Barrage 4. Central Karakoram Gilgit and Skardu 5. Chinji Chakwal 6. ChitralGol Chitral 7. Deosai Skardu 8. Deva Vatala Bhimber 9. Ghamot Neelum 10. Musk Deer NP Gurez Neelum 11. Hazarganji-Chiltan Quetta 12. Hingol Awaran, Gwadar and Lasbela 13. K2 Gilgit, Skardu 14. Kala Chitta

Varieties of organism in national park?

It comprises innumerous varieties of living organism in their natural habitats. Wild Plants Wild Animals Fungi Microorganisms

Role of agriculture in wetland depletion?

There are many different ecosystem services provided by wetlands that can benefit agriculture and contribute to human wellbeing. Wetlands can: support fertile soils, reduce erosion and retain sediments and nutrients as well as reduce the potential for salinity and acid sulphate soils. support aquaculture or grazing.
