Subject ZOO504 **Lecture wise Mcqs**

1

Prepared by Arfa Amjad

Lecture No 1

1. refers to neither cultivated nor domesticated nor tamed organisms. **(Wild life)**
2. Wild life is a natural resource with a great importance throughout world.**(Renewable)**
3. Wild life can be found in all deserts, forest rain forest , plains and grasslands.**(Ecosystems)**
4. that determines any wildlife species found in any area.**(Habitat)**
5. Some wild life species require special habitat features for their **.(Existence)**
6. Dead or partially dead standing trees nesting sites for forest dwelling bats/Birds called by **.(Snags)**
7. Cavity tress excavated in snags by **.(Wood peckers)**
8. and nesting cover by many species**(shelter)**
9. In rocky outcrops and caves rattlesnakes use small cave like opening in outcrops as **.(hibernation)**
10. In wet land are present **(Migratory birds)**

Lecture N0 2

1. Wild life is an part ecosystem.**(Integral)**
2. Human himself as interrelated and inter on wildlife for its survival.**(Independent)**
3. About of the domestic food crops now cultivated are descendents of wild plants. **(90%)**
4. Plants recycle nutrients necessary for agricultural production and help maintain **.(Soil fertility)**
5. Wild plants or their extract are a source of medicine for an estimated of the world's population.**(80%)**
6. Insects and birds add to the economics gains through of plants.**(pollination)**
7. From clothes to medicines building materials to verity of chemicals all are extracted from around us.(**Exiting wildlife)**

Lecture No 3

1. are the bio repositories used for the preservation of genetic materials.**(Gene Bank)**
2. Wildlife can be served as a of gene bank.**(Source)**
3. Many wild relatives of crops plants and presence or useful seeds are screened put and selected called **(Agriculture)**
4. In animal husbandry wild species may have a gene.**(genotype)**
5. Of the wilds animals can be screened which would be helpful for identifying and resolving causes of disease epidemics.**(blood sample)**

Lecture N0 4

1. can be helpful to plant propagation in various ways.**(Wild animals)**
2. Pollen sticks to bees body and legs which than transferred to flower its visit called **.(pollination)**
3. Seed eaters also disperse the seeds by **(defecation)**
4. behavior of many rodents and some birds **(catching)**
5. In conifers trees (pine, spruce, fur etc) uses their pinecones there are seeds in there that can be eaten or distributed by **(mice and other animals)**
6. Squirrels , birds and rodents are the examples of animals for **(dispersal of seeds)**
7. Honeybees , hummingbirds and some bats are the examples of animals for **(pollination)**

Lecture No5

1. Soil erosion can be prevented by cover.(**Wild plant)**
2. Mixing of litter by **(movements of wild animals)**
3. Vultures eagles jackals hyenas and decomposers are the **.(Scavengers)**
4. Nutrients recycling humus formation and cleaning of environment these task performed by **.(Scavengers)**

Lecture No 6

1. Fascination with the beauty of wild animals drives world wide.**(tourism)**
2. In some forested area in Latin America wild life act as source.**(animal protein)**
3. Wild meat are also called **(Bush meat)**
4. Vitamin A and vitamin B are the good source of **(wild meat)**
5. Wild meat tends to have less fat than meat **(domestic)**
6. In sub there is a long tradition of trade between rural areas and the major towns where it is sold as a high priced delicacy.**(sub Saharan)**
7. Traditional medicines are **(Nerium oleanders)**
8. Nerium oleanders are also called **(Anvirzel)**
9. Wildlife resources like from trees (silk, paper, leather) are used for making **.(houses)**

Lecture No 7

1. Wild animals like monkey guinea pigs rats etc are also called **(Experimental animals.**
2. In leukemia Rosey periwinkle leaves extract as . **(anticancer)**
3. Ebola vaccine (VSV-EBOV) found safe initially tested in primates.**(100%)**
4. provides a mean of developing models fur disorders of behavior and cognition **(Wildlife)**
5. Wildlife is also applicable for the studies of **.(Anatomy, Physiology, ecology, and evolutionary aspects)**

Lecture No 8 to 10

1. In variability among living organisms from all sources carnivore **(Biodiversity and Ecosystem)**
2. Asian elephant , Bengal tiger etc are the examples of **(Endangered species)**
3. In endemic species **are present (Galapogus Fauna)**
4. **Extinct species includes (woolly Mamoth)**
5. Organism that has changed from being domesticated to being wild , natural, or untamed like (goats, cats, etc) called **(Feral)**
6. an area where regulated hunting and shooting is allowed.**(Game reserve)**
7. Natural home of an organism is called **(Habitat)**
8. Home range where an organism or animal lives moves on a basis.**(periodic)**
9. **I.U.C.N** stands for **(international union for conservation of Natural reserves)**
10. public recreational area where flora and fauna are in their natural state like **(population, predator, and prey)**
11. In terminologies III some in the wildlife source.**(important terms)**
12. Protected area, Ramsar site, Red data book, Safari Park, Sanctuary , Tertiary ,Wetland W.W.F are present in **(Terminologies III)**

THE END

Zoo 504 Topics 7 to 12

1 Wild animals refer as experimental animal like **monkeys ,rabbits**

2 **Rosy periwinkle l**eaves extract as anticancer

3 Ebola vaccine found **100% s**afe

4Variablity among living organisms from all source **Biodiversity**

5 Asian elephant and Bengal tiger are **endangered** species

6 Organisms that has changed from domesticated to wild **feral**

7 An area where regulated hunting and shooting is allowed **game reverse**

8 Natural home of organisms is **habitat**

9 Animal lives and moves on periodic basis **home range**

10 Wild life tourism is **ecotourism**

11 **Bird watching** is now a growing part of wildlife tourism

12 Zoo parks are asfor **recreational a**ctivity .

Zoo504 Topics: 13 to 18

1. **Wildlife** Is natural renewable resource.
2. Fascination with beauty of wild animals drives **tourism** worldwide.
3. **Commercial farming** occurring in countries like China, Zimbabwe and Thailand for economic gains.
4. Wildlife has immense values to hunt for **sports.**
5. **Houbara bustard** as game bird.
6. **Markhor** hunting for a trophy.
7. In **Punjab-Pakistan** hunting is not allowed after **1974** wildlife act and Amendments in 1991.
8. **Fishing** be the only sports.
9. **Eagles, Hawks** and their feathers have great cultural and spiritual value to **Native Americans** as religious objects.
10. In **Hinduism** the **cow** is regarded sacred.
11. **Markhor** is a national animal of **Pakistan.**
12. Central wild animals and birds are natural **Scavengers.**
13. Wildlife is applicable for the fundamental studies like **anatomy, physiology, ecology** and **evolutionary** aspects.
14. **Musk deer (musk pod)** has multiple effects particularly enhances **myocardial** function.
15. **Monkeys, Rabbits, guinea-pigs** and **rats** are wild animals as **experimental animals.**
16. **Baboons** in **South Africa** attacking young **cattle.**
17. **One-horned rhinos** in **Nepal** destroying crops.
18. **Wolf** attacks sheep and reindeers in **Sweden.**
19. In **Russian Far East** farmers raise captive deer for **human** consumption.
20. **Deer** are the natural prey preference for **leopard.**

By Zonish Khan

Zoo 504 M.C.Q.s

Topics 19 to 24

1. Wild life / animals serve as reservoir of many diseases called **Zoonosis**.
2. Wild life may cause of many **bacterial** and viral diseases
3. Fleas often found on rats and **ground squirrel**.
4. **Rabies (Hydrophobia)** is a bite wound disease.
5. Myotic, Protozoal, Helminth parasitic are other causative agents of **zoonotic** diseases.
6. Elephants frequently raid and destroy **crops**.
7. Elephants eat upto **450kg** of food per day.

zonish
1 minute ago

estimated to be around US $ 165 million per year.

9. Conflict between wild life and human occur over living space and ___food___.

10. In persecuation of human during poaching illegal killing and ___hunting___ takes place.

11. In Absurd killing tigers, jackals, wolves are killed by the ___farmers___.

12. Habitat loss poses the greatest ___threat___ to species.

13 In habitat destruction 85% of all species described in the IUCN's Red List.

14 Expansion of agricultural land, harvest of timber for fuel is the cause of ___forest___ loss.

15- In Malysia and Indonesia large tracts of rainforest are cleared to grow palm oil crops.

16 Almost 70% of deforested areas are converted to agricultural land.

17 Population growth, urbanization and industrialization results in in marine and coastal degradation.

18 In coastal and marine areas wetlands are being drained for cultivation.

19. Oceanic birds are killed by oil spillage from oil tankers in the sea.

20. Domestic and industrial wastes dumped into water bodies causes decline in stock of fishes.

21 Animals like mussels have been unfit for human consumption.

22- Survival of wild life in any area depends on food, water cover and space.

23 Snags are dead or partially dead standing trees.

24. Holes excavated in snags by wood peckers.

Lesson 25:-

1- **Wild Life** Habitats are not stable

2- Conservation Strategies like **ex-situ** and **in-situ** can be applied for wild life.

3- Changes occur due to **Biotic succession** and **pollution.**

4- These changes alter **Food, Cover**

Lesson 26:-

① For Implementation of various protective laws accurate idea about **population density of species**

②
Census is mandotory to count numbers

③ Census can be helpful in **Mapping Factors**

Lesson 27:-

i-

To protect wildlife and nature From **depletion** and **destruction** Strict laws.

ii-

various Countries of world have laws To forbid **Killing of wild life.**

iii-

Stringent punishments have been provided against **Infringment of provision** of Rules.

iv-

Some Common Rules are Cutting of Trees act **1992**

Birds protection act **1912**

In 1976 is

India Elephant Preservation **1879**

Bengal Rhinoceros preservation in **1932**

esson 28:-

Generally people are Ignorant about Utility of WildLife

Certain measures for Mass eduction

Activity Involvement of Mass media Such as Newspaper Mafazines

Awareness among public about nationa parks and Zoologica

Cinematography of wild life Should be screened for creating Love and affection

Lesson 29:-

Veterinarians are concerned with health of wild life.

deal with health of diverse range of **species**

Major challenges to veterinarians
- **Environment Contaminants**
- **infectious diseases**

wilddlife verterinarians are necessary for **care of wild animals**

Movement of diseases between **wild life** and **domestic** species

Lesson 30:-

For the **Conservation** willife there is a great need of **educating** people.

Celebration of wild life every **week** / **every** **year**

Publicity through **media**, **films**

Holding Conducted **Tours**, **lectures**

Setting up **clubs**

Establishment of natural **History** **museums**

❖ **Noor-ul-Huda**

➢ ***Chapter#31+31+33***

- **Protected area** are one of the most effective tools.
- In **Pakistan** Lal Suhanra at **Bahawalpur** conserves Black buck.
- In **India** Gir Forest at **Gujarat,** conserves linos.
- **W. Bengal** conserve one-horned rhinoceros.
- **W. W. F:** World Wildlife Fund
- **U. C. N:**International union for conservation of natural resources.
- **C. I. T. E. S:**Convention on International trade in endangered species.
- **S. G. P:** Small Grants programmes.
- **W. S. C:** wildlife conservation society **(1895)**
- **PAWS:** Pakistan animals welfare society.
- **Gorilla doctors (1980)**. It is Dian fossey founder
- **Wildlife alliance (1994)** are Procter forests and wildlife in the southeast Asian tropical belt.
- **IFAW**: international fund for animal welfare **(1969)**
- **African wildlife foundation(1961).**

- **Headquarters** are example **Gland, Switzerland.**
- Giant panda **symbol** are **WWF**
- **1990** it was renamed as world wide fund for nature.
- Conserving the world **biological diversity.**
- WWF work in collaboration with. **IUCN, UNO, FAO**.
- IUCN was founded in **1948**.
- IUCN has more than :**475 member, 116 government agencies, 133 countries.**
- **SSC**: Species survival commission

Lectures 37-42

17

1) CITES came into force in (1975)

2) SOS means (save our species)

3) SSC is governed by a(steering committee)

Fresh water fish is(specialist group)

There are currently (122) specialistic groups.

The number of SSC member is constantly (changing)

Currently(180) countries including the united states implement CITES

Conference of parties meets (every three year)

Options...

Currently(180) countries including the united states implement CITES

Conference of parties meets (every three year)

Cacti iguanas and parrots represent some of approximately (35000) species

Species threatened with extinaction and provide greatest level of protection inclu
(commercial trade)

CITES has helped global (conservation) of species.

Indus river dolphin an I(endanger) species endemic to Indus river Pakistan

Covering an area of (200km) between guddo and barrage in provinces of sindh.

Swedish international development agency (SIDA)

INTERNational whaling commission(IWC)

SET up in 1946 an agreement to regulate(whaling)

Headquarters of IWC IS in impington near Cambridge has three main committee

Original member consisted only 15 whale –hunting (nations)

ZOO504

LESSON 43-48

By Ayesha Aish

1. Wildlife Act may be called the Punjab Wildlife (Protection, Preservation, Conservation and Management) Act, 1974
2. Board" means the Punjab Wildlife Management Board constituted under section
3. "Exotic" means wildlife species not native to Pakistan
4. Government may determine the number and class of officers including honorary officers to be appointed under this Act
5. Honorary officer appointed under section 3
6. Powers of an Honorary Officer is that the officer shall hold office for a period of three years unless the appointment is revoked earlier
7. Restrictions on hunting are that no person shall Hunt any protected animal or any game animal except under a permit.
8. Prohibition of Employ Hawks and Dogs for Game Animals without Special License
9. Any meat or trophy thereof shall be the property of Government.
10. Wild animal, trophy or meat shall be presumed to be the property of until the contrary is proved.
11. Provided that no premises shall be searched under this section except under the authority of a warrant issued by the magistrate having jurisdiction in the area.
12. Any officer authorized by Government in this behalf, may seize any wild animal, dead or

any anything whatsoever used or suspected to have been used in the commission of an offence under this Act.

13. When the offender is not known or cannot be found any officer authorized in this behalf may, if he finds that an offence has been committed, confiscate the property used in the commission of the offence.

26

14. Any officer authorised, without orders from a magistrate and without a warrant, arrest any person against whom a reasonable suspicion exists of his having been concerned in any offence under this Act

15. Any officer not below the rank of the Game Inspector or of an equivalent rank may release such person on his executing a bond to appear.

16. Cognizance of any offence under this Act shall not be taken by any court except on the complaint of the officer.

17. No court inferior to that of a Magistrate of the First Class shall take cognizance.

18. Government may, by notification in the official Gazette, empower an officer to accept from any person against whom reasonable suspicion exists that he has committed any offence under this Act, a sum of money by way of compensation for such offence.

19. Nothing contained in this Act shall be deemed to prevent any person from being prosecuted under any other law.

20. Government may, for scientific management, public purpose exercise the powers. i.e., Power to make Rules and Power to add to or exclude from Schedules

21. Government may, in the interest of any scientific or public purpose, allow, by notification

in the official Gazette, hunting and capturing of such wild animals in any specified place by any specific means.

22. Government may, by notification in the official Gazette, declare that the Board shall be dissolved on such date and with such consequences as may be specified in the notification.

23. Along with the ordinance, four schedules have been issued

24. Wild animals that can be hunted on an ordinary permit, with the details of everything is mentioned. Schedule I

25. Animals, trophies or meat for the possession, transfer or export of which certificate of lawful possession is required. Schedule II

26. Wild birds and animals protected throughout the year. Schedule III

27. Wild birds and animals which are not protected. Schedule IV

28. Protected area is defined as " A clearly defined geographical space, recognized, dedicated and managed, through legal or other effective means, to achieve the long-term conservation of nature with associated ecosystem services and cultural values".

29. Protected areas are one of the most effective tools for conserving species and natural habitats.

30. IUCN classify protected areas according to their management objectives

31. There are 6 IUCN Protected Areas Categories System

32. Category I has two categories.

Priyesha Aisi

33. Category Ia includes Strict Nature Reserve

34. Category Ib includes Wilderness Area

35. Category II includes National Park

36. Category III includes Natural Monument or Feature

37. Category IV includes Habitat/Species Management Area

38. Category V includes Protected Landscape/Seascape

39. Category VI includes Protected area with sustainable use of natural resources

Ayesha Aish

ZOO 504 WILDLIFE

23-24

Tahreem Fatima

OBJECTIVE

Lecture #49

1. Protected areas that are strictly set aside to protect biodiversity where human visitation use and impacts are strictly controlled to ensure protection values.
2. The area should generally have a largely complete set of expected native species
3. Be_____ of being managed to ensure minimal disturbance
4. Be free of significant direct intervention by modern humans.
5. Protecting some of the earth's richness that will not survive outside.
6. Protecting natural sites that are also of religious and cultural significance.
7. Must apparent problem is with climate and air pollution.
8. In an increasingly modified ecology .It may become increasingly difficult to maintain pristine areas through non-intervention.

Lecture 50,51,52

1. Protected areas that are usually large, unmodified or slightly modified retaining their natural habitat are called **Wilderness areas.**
2. The primary objective of **Wilderness is to** protect the longterm **ecological integrity** and relevant cultural and spiritual values.
3. Large natural or near natural areas set aside to protect large-scale ecological processes which also provide scientific, educational , reacreational and visitor oppurtunities are called National Park.
4. The main objective of National Park is to protect natural biodiversity.
5. The composition, structure and function of biodiversity should be to a great degree in a Natural state.
6. National park should be of Sufficient size to maintain ecological processes.
7. National park protect particular species that require large areas of undistributed habitat.
8. National Parks contribute to local and national economies.
9. Protected areas set aside to to protect a specific natural monument is known as National Monument Feature.
10. Provide an opportunity for environmental, cultural education National Monument Feature.

Lecture 53 and 54

26

Protection of species, and habitats is called as **Distinguishing features.**

An area where interaction of people and nature is produced known **protected landscape or seascape.**

To protect and sustain important landscapes and associated nature is known as **Primary objective.**

Opportunities for recreation and tourism consistent with life style and **economic activities.**

Topic No ;-55

- Protected areas conserve Ecosystem and Habitat.
- Protected areas are particularly adapted to the application of Land scape approaches.
- In the category VI primary objective protect natural ecosystems.
- Category VI protected areas aim to conserve Ecosystem and habitats.
-

27

Lecture #56

1. IUNC classified protection areas accordingly to their management objective.
2. In IUNC natural or near natural areas to least 1000 hectares.
3. Ecological process which also provide a foundation for an environmental scientific educational recreational and visitor opportunities.
4. National Park is an area of outstanding scenic merit and natural beauty where the landscape, flora and fauna are protected and preserved in a natural state.
5. Public access for recreation, education and research is provided.
6. Acts prohibited under Law in National Parks

   Firing of guns • Hunting, killing, trapping or capturing wild animals inside or within a radius of three miles of its boundaries. • Interfering with animals and plants • Clearing land for cultivation. • Flow of polluted water is also prohibited.

Z00504

Lecture 57 -----62

- Responsible authority for national park is----------ministry of intrior
- National parks provide the area for ----------scientific research.
- Administrator head quarter may be establish --------each national park.
- National divided into ------ zone for management---5 zone
- Activities that prohibited in national park --------burning,hunting, engraving, polluting air or water, piking flower.
- How many area are protected in Pakistan as national park-------29 areas
- ------ parks of under provincial government----22 parks remaining 7 are under private care.
- The kirthar national park is situated in -------kirthar mountain Karachi & jamshoro district in Pak.
- Establishment of kirthar park is ----1970.
- Kirthar park stretch over --------3,087 squar k m .
- Second national park in Pakistan ------kirthar.
- How many species are believed to occur in national park ----26
- Birds fauna equally rich at least ------ verities------58, kingfisher, eagles, vulture, lark.
- Primarily national park establish to protect ----------wild goat and sheep of Sindh
- Laal suhanra national park is situated in -----bhawalpur dis of Punjab
- One of the largest national park is in-----south asia.
- Laal suhanra park spread over------31,368 hectars.
- Laal suhanra bpark established to protect the------black buvk &chinkara
- How many verities of birds are --------more than 160
- Chingi national park was establish in ------1987
- What is the total area of chinji national park-------6095 hectars(15061 acres)

- Laal suhanra park established to protect the-----black buyk &chinkara
- How many verities of birds are -------more than 160
- Chingi national park was establish in -----1987
- What is the total area of chinji national park------6095 hectars(15061 acres)
- What is the location of chinji national park----- talagang the chakwal district Punjab (Pakistan)
- Chinji park mainly meant for the protection of ----threatened species of Urial.
- Hazara ganji national park was establish in------1978
- Are covered by hazara ganji chiltan is-----325,000 acre
- Hazara ganji chiltan park is in -----sulaiman mountain
- Major flora of hazaraganji Chiltan Park is ------almond, ash tree, wild fig, pistachio, Pashtun juniper.
- Hazara ganji park mainly meant for restoration of endangered species of----- chiltan markhor.

31

32

Zoo504 lecture 63

1. Ayubia National Park was declared a National Park in **1984.**
2. Ayubia National Park was named after the name of the Muhammad Ayub Khan which was the **president** of Pakistan.
3. Ayubia National Park is situated in **KPK.**
4. Initial area of Ayubia National Park was 1684 ha, expanded through northern extension in **1998.**
5. Total area of Ayubia National Park is **3312** hectares.
6. **Ayubia National Park** is surrounded by three small towns. (Nathia gali, Ayubia and Khanaspur).
7. Tempera5ture of Ayubia National Park is **3C -11C.**
8. Ayubia National Park holds **104** species of Plant.
9. Ayubia Park flora belongs to 19 families which are known for their **Medicinal properties.**
10. The Ayubia National Park **30** species of Khalij Pheasant exist.
11. The average rainfall of Ayubia National Park is **1244cm**.
12. Ayubia National Park harbors up to **203** species of birds.
13. Ayubia National Park supports **31** species of mammals.

Zoo504 **lecture 64**

33

- Khunjerab National Park was established 29 **April 1997.**
- Khunjerab National Park situated in **Gilget Baltistan**.
- Total area of khunjerab National Park **is 226,913 ha**
- **Khunjerab National Park** is the highest National Park in the world.
- Khunjerab National Park is Pakistan's **third** largest national park.
- Area of Khunjerab National Park lies at an elevation of **4000m.**
- The border of Khunjerab National Park mapped in 1974 after a field survey to protect "**Marco polo Sheep**".
- The population of Marco polo Sheep was around 400 but had dropped to below **180** by the time of completion of karakaram Highway.
- According to WWF officials plan which park turn into international Peace Park? **Khunjerab National Park.**
- **7000 to 10000** Snow leopard species exist worldwide,
- In Khunjerab National Park more than **300** Snow leopard species exist.

Zoo 504 lecture 65

34

- Margalla Hills National Park located in **North of Islamabad**.
- Total area of Margalla Hills National Park is **12000ha.**
- Elevation Range of Maragalla Hills National Park is **550m to 1500m**.
- Margalla Hills National Park contains how many reptile species. **13**
- Margalla Hills National Park holds **600** Plant species.
- Margalla Hills National Park harbors up to **250** birds varieties.
- Margalla Hills National Park supports **38** species of Mammals.
- The major flora in southern and northern slopes of Margalla hills park contain .**All of these (Deciduous and evergreen trees, diverse shrub pine and oak)**
- The major fauna of Maragalla Hills National Park is mainly Indo Himalayan with some overlapping of **Palearctic** species.
- The Margalla Hills National Park includes the **Margalla Hills** which forms foot Hills of Himalayas.

Himalayas.

35

Zoo504 lecture 66

1. Chitral Gol National Park is established in **1984.**
2. "Gol" is local language meaning **"valley".**
3. Total area of Chitral Gol National Park IS **7780 ha.**
4. Temperature of Chitral Gol National Park ranges from **-12.2 to 43.3C.**
5. The major flora of Chitral Gol National Park is **Cedar.**
6. Chitral Gol National Park is located in **KPK**. (Hindu Kush Range beside the Chitral River in Chitral District).
7. In Chitral Gol Park total Rainfall is estimated to be **462ml**.
8. Weather of Chitral National Park is **dry and cold**.
9. Chitral National Park provide shelter to vast Biodiversity especially **Markhor.**
10. Chital National Park holds the largest population of **Astor Markhor** in the world.

36

Zoo 504 lecture 67

- Hingol National Park was established in 1988.
- Hingol National Park is now named as Dharune Hingol National Park formed by emergence of two parks.
- Total Area of Hingol National Park is 165,700ha.
- Hingol National Park is located Makran coast in southwestern Baluchistan Pakistan.
- Hingol National Park contains how many species of Amphibian and Reptiles. 65 species
- Hingol National Park supports 35 Species of Mammals.
- Hingol National Park supports 185 species of birds.

Zoo 504 lecture 68

- Wildlife Sanctuary is protected area provide an undisturbed breeding ground for protection of wildlife.
- Wild life Sanctuary provide, protection for species from all of these (hunting ,predation, competition)
- A wildlife Sanctuary is promoting conservation and thus play an important role in society.

Page: 3 of 3 Words: 661 160%

⇒ Leacture # 69 :-

1. Protected area, provides an undisturbed breeding ground for the Protection of wildlife, is [Wild Sanctuary]
2. In wildlite Sanctuary public acess is [Prohibited]
3. Exploration of forest is not permissible expect for reducing [Fire hazard, Epidemic, Insect attack, Natural calamities.]

⇒ Leacture # 70 :-

1. In Pakistan there are [99] wildlife Sanctuary
2. IUCN is [International Union Consevation of nature]

⇒ Leacture # 71 :-

1. Astore Sanctuary was announced on [22 Nov 1975]
2. Astore is located in distric between [Nagar Parbat Gilgit Baltistan Pakistan]
3. Astore area is [41,440 ha]
4. Astore altitude is from [1212 m to 6060 m]
5. Astore is consist of [meta sedimentary & igneous stones]
6. Astore has [Markhor] Specie.

Leacture # 72 :-

Baltistan wildlife Sanctuary was established in 1975

Baltistan wildlife Sanctuary is located in Distric Sakardu between the villages of Rondu & Shengus

Baltistan wildlife area is 41,500 ha.

Which area is ~~rich~~ for avifauna Baltistan wildlife Sanctuary

Baltistan wildlife Sanctuary has 109 birds species.

=> Leacture # 73 :-

1. Cholistan wildlife Sanctuary is located in South Eastern Portion of Punjab
2. Cholistan wildlife Sanctuary has area 660,925 ha
3. Cholistan wildlife Sanctuary has species of Mammals, Reptiles and Birds

=> Leacture # 74 :-

1. Hub Dam wildlife Sanctuary was declared in July 1974
2. Hub Dam wildlife Sanctuary has area 27,219 ha
3. Hub Dam wildlife Sanctuary is

Located at North of Karachi bordering the Kirthar national Park Pakistan

4. Hub Dam wildlife Sanctuary is covering area of 132 Sqause miles.

39

ZOO 504 WILDLIFE

LECTURE 75-80

40

SHAZINE NOOR

OBJECTIVE

Lecture #75

1. Chashma and Taunsa Barrage Dolphin Sanctuary was declared open to the public in 1972. Located in Mianwali District, Punjab-Pakistan.
2. A wide variety of waterfowls including threatened species, an important site for Breeding • Staging • Wintering
3. Mid-winter waterfowl counts in recent years have regularly exceeded 20,000 birds.
4. Anatidae (ducks, geese, swans).
5. WWF-Pakistan has developed a sustainable management plan. Indus river dolphin conservation project

Lecture #76

1. The Great Rann of Kutch is a salt marsh. Located in the Thar Desert, Kutch District of Gujarat, India and the Sindh, Province of Pakistan
2. Area: Spread over 566,375 ha
3. Flamingos breeding site(More than 1% of the biogeographical population)
4. Famous for the Indian Wild Ass sanctuary
5. Home of the world's last population of Indian Wild Ass (khur or khar)

Lecture #77

1-"A game reserve is an area wherein controlled hunting and shooting is permitted on permit basis

2-If hunting is prohibited, a game reserve may be considered a "Nature Reserve,

3-protection for animal species commonly referred to as game (huntable species for sport or meat)

4-It is to ascertain the number of female animals, as this indicates the production potential.

5-It is an estimate that walking 6KM to water isn't unnatural for an animal.

Lecture #78-79

1- By feeding any wildlife we are potentially SIGNING THEIR DEATH WARRANT.

2- There are 99 Game reserves in Pakistan

3- Federal territory1 Balochistan7 Northern Area 9 Sindh14 Punjab19 KPK38

AJK 11

4- IUCN recognized 66 Game/Hunting reserves in Pakistan.

Lecture #80

1-Tooshi, a conservation area for Markhor. It is famous for the polo grounds of

2-Shandur Broghil National Park Mastuj Booni Bamboret area where the Kalash cultural festival is held every August of the year.

3-Tooshi Game Reserve, is located along the paved road to Garam Chashma in Chitral's Lutkho district.

4-Area: It covers 1000 hectares.

Topic: 81: MCQS

1) Between Chashma and Taunsa Barrage **84** dolphin were recorded.

2) The Indus dolphin Reserve is a natural wetland and situated into the **sukkur.**

3) In **1974** Government of sindh decaled the Indus River between Sukkur and Guddu barrage.

4) Chashma and Taunsa Barrage Dolphin Sanctuary were declared open to the public **1972.**

5) A minimum abundance estimate of **965** of dolphin.

Topic: 82

6) kilik/Mintaka Game Reserve lies along the border of **china.**

7) Hunza lies in District Gilgit on the Pakistan China boarder **225km** from the town of gilgit.

8) Temperature at higher elevations remains **below freezing point** in most of the year.

9) The terrain is **rugged** and mountain.

10) Most of the areas in game reserve have created to provide habitat protection for animal species commonly referred as **Game.**

Topic: 83

11) Ramsar is one of the **global** intergovernmental environmental agreements.

12) Wetland are among the most diverse and protective ecosystem.

13) It was negotiated in **1960** by countries and N.

14) In 18 nation meeting is adopted in the Iranian city on **2nd February 1971.**

Topic: 84

15) There are **5** types of wetland.

16) Wetland that lack flowing water marshy marshes swamps and bogs called **Palustrine**

17) Including deltas, tidal, marshes and mangrove called **Estuarine**

18) wetland is the area where water is **primary factor** controlling the environment and the associated plants and animal life.

Topic: 85

19) A wetland can store about **three acre feet** or one million gallons.

20) Wetland is also **storehouse** of plant genetic material.

21) Rice is a common wetland plant and is staple diet of more than half of humanity

23) fisheries over two third of the harvest is linked to health of wetland areas.

24) A wide range of **herbal medicine** is obtained from wetland.

Topic: 86

25) Wetland should be selected for the Ramsar list on account of their international significances is known as **biodiversity.**

26) It regularly supports **1%**of the individuals in population of one species or subspecies.

27) It regularly supports **20,000** or more water birds.

28) Population of plant and animal species important for maintaining **biological diversity**.

29) Migration depends upon fish stock wetland.

Lec#87

1: In 2013, _____Ramsar sites has been declared in Pakistan .(**19**)

2: Covering an area of ____hectares (3,320,170 acres). **(1,343,627)**

Lec#88

3: _____world's wetland have disappeared since long. **(Half of the)**

4: Unfortunately, the increasing population pressure at the beginning of the last century, tightly inter connected with_____.. **(Growing need for food resources)**

5: The rapid industrial development at the beginning of_____led to present-day situation of wetland being affected by human activities. **(19th century)**

Lec#89

6: Industrialization and urbanization cause____ **(wetland degradation and loss)**

7:_____of hectares of wetlands have been drained for agriculture. **(Hundreds of thousands)**

8: Agriculture accounts for _____of the total water withdrawal on Earth. **(65%)**

9: Agriculture and other industries such as paper making are often very_____ **(wasteful and inefficient with water).**

10: _____causing encroachment, reclamation, pollution, eutrophication, and biodiversity loss. **(agrochemicals)**

Lec#90

11: _____Can upset the natural balance of an ecosystem. **(invasive species)**

12: An analysis of the_____ shows that _____ is one of the most common threat associated with species that have gone completely extinct. **(IUCN Red List, alien species)**

13: An introduced plant_____ and fish _____ displaced native fish in rivers and wetlands. **(lippie, European carp)**

Lec#91

14: _____ is a big and growing problem occurring due to pollution inputs. **(Wetland degradation)**

15: Drainage and run-off from fertilized crops and pesticides used in industry introduce_____ nutrients and other toxins like mercury to water sources. **(nitrogen and phosphorous)**

16: _____ is the process or act that human did during routine activities and contaminated the environment. **(Pollution)**

Lec#92

17: Any change in climate over time, whether due to natural variability or as a result of human activity called ____ . **(Climate change)**

18 The change in climate turn leads to_____ **(Wetlands being swamped)**

❖ **Andila/smart Doll**

➢ ***Chapter #93, 94,95***

- Wetland plants are susceptible to **degradation**.
- **Grazing** by domestic animals.
- Nonnative plants that complete with **native**.
- Worldwide there are now over **40,000 dams.**
- Public accessibility in western Europe began at zoological collection in **Paris, Vienna, Dublindublin.**
- *London zoo* are first time discover **1826.**
- *Philadelphia zoo* are first time discover **1874.**
- *Calcutta zoo* are discover **1854.**
- *Paris zoo* are discover **1793.**
- **German collector, Carl hagenbeck,** built the first wild animal park in **1848**.

➢ ***Chapter#96, 97,98***

- **19th and 20th** century are discover by only small numbers of animal collections.
- Either captured by the **Victorian explores.**
- **1950s**: Zoo Boom.
- Zoo requires a significant amount of resources in the form of **land, water, energy and money.**
- How many categorized into **four**.
- *Large zoo* more than **75.**
- *Medium zoo* **50-75.**
- *Small zoo* **20-50.**
- *Mini zoo* **less than 20.**

Lecture #99

1. No zoo shall acquire any animal in violation of Wildlife Act.
2. No zoo shall exhibit any animal that is seriously sick or injured.
3. No zoo shall use any animal, other than the elephant in plains and yak in hilly areas for riding purposes.
4. Each zoo shall have a wall at least two meters high from the ground level.
5. The built up area in any zoo shall not exceed twenty five percent of the total area of the zoo.

Lecture #100

1. The mini zoo may at least have arrangement with any outside veterinarian for visiting the zoo every day to look after the animal.
2. In large zoo at least two full-time veterinarians.
3. In medium zoo At least one full-time veterinarians

❖ I am highly thankful to my precious team for their Hard work.

❖ I will suggest all of my readers that prepare your handout thoroughly and deeply read them carefully

❖ Wish you best luck for Grand quiz. Remmber us in your precious prayers

❖ By Admin Tehreem& Arfa
