
Discuss levels of protein structures
Discuss primary structure of protein
Status of pO2 in lungs and tissues when there is hae.oglobin disassociation.
1:23 PM
That is my todays paper 1:23 PM
Paper zoo507 23 -12-18
Define and give 1 example of prokaryotes 2
Foundation species 5
Light energy to chenical energy5
Eutropication renewable resources 3 3
Non native species 3
Reproductive potencial5
Affect of human on environment 5
Ya mera r mam rafaqat ka combine paper ha
3:49 PM ✓

MCQ:-

→ butterfliese are _____ species
→ How many subdivision of ecology _____
→ Crokroaches are example of _____ species.
→ Human eye can reach ____nm of wavelength

→ Factor of assembly community.
→ what are the ~~sou~~ e types of resources right
→ Population dynamic.
→ How species diversty affect the ecosystem.
→ Environmental Sustainability.
→ Non native species and impact of that on environment.
→ Importance of water on environment.
→ Subfields of following biology; Chemistry
→ Earth science? → omnivores? exam
→ Population integrity?

MCQ:-

→ butterfliese are _____ species
→ How many subdivision of ecology _____
→ Crokroaches are example of _____ species.
→ Human eye can reach ____nm of wavelength

→ Factor of assembly community.
→ what are the ~~sou~~ e types of resources right
→ Population dynamic.
→ How species diversty affect the ecosystem.
→ Environmental Sustainability.
→ Non native species and impact of that on environment.
→ Importance of water on environment.
→ Subfields of following biology; Chemistry
→ Earth science? → omnivores? exam
→ Population integrity?

Zoo 507

Components of ecology.

~~Composition of~~

→ Natural capital use and degra
→ impact of human on environment.
→ food web and its role in ecosyst
→ Five example of tertiary consume
Define sustainability
Natural capital and degradation
Population dynamics
Factors of Population dynamics
Ecological niche of black beer → importance of water

Zoo 507

Components of ecology.

~~Composition of~~

→ Natural capital use and degra
→ impact of human on environment.
→ food web and its role in ecosyst
→ Five example of tertiary consume
Define sustainability
Natural capital and degradation
Population dynamics
Factors of Population dynamics
Ecological niche of black beer → importance of water

507 =

→ Concept of Species. and factors
→ Reproductive Potential 5
→ Marks ND Features of diatoms and factors of carring capacity
→ Diatoms, omnevouers, importance of foodweeb and generlistic species.
→ ~~Refre~~duc Features of Phyto Plankton. 3
→ Define indicator species and examble. 2
→ Defina omnivovers and examble 3
→ Define Neutrients cycle 2
→ Fundation species 5
→ Four concepts of species 5
→ characteristic of Population 5
→ Composition of Geosphere 3
→ how Solar energy is converted into chemical energy. by plant -
→ Diffenciate b/w generalist n specialist specie. 2
→ Importance of coral reefs. 5
→ Major factors That support life on earth 5
→ Population dispersion 5

507 =

→ Diffenciate b/w generalist n specialist specie. 2
→ Importance of coral reefs. 5
→ Major factors That support life on earth 5
→ Population dispersion 5

Zoo507

1.concept of species.
2.Reproductivepotential 5 marks
3.features of diatoms and factors of carrying capacity.
4.Diffrenciate b/w generalist n specialist specie .2mrx
5.Importance of coral reefs.5mrx
6.Major factors that support life on earth.3 mrx
7.Short note on population dispersion.5mrx
8.what is rocky and sandy shores?
9.difference b/w pedalfer soil and pedocal soil?
10.differnce b/w keystone species,
indicator species.and founder species?
11.what do you means by our ecological
footprints are growing?
12.enlist composition of atmosphere role in ecosytem?
13.what is the difference b/w density defendent
14.factor and density indepdent factors?
15.Define sustainability? Population dynamics
16.Natural capital and degradation
17.Factors of population dynamics
18.Ecological niche of black beer?Importance of water
19.components of ecology
20.composition of geosphere
21.natural capital use and degradation
22.impact of human on environment
23.food web and its role in ecosystem
24.five examples of tertiary consumers

Zoo 507

→ Components of ecology 22
→ ~~Composition of~~
19 → Natural capital use and degradation
65 → impact of human on environment
42 → food web and its role in ecosystem
46 → Five example of tertiary consumers
→ Define sustainability
→ Natural capital and degradation
→ Population dynamics 56
57 → Factors of Population dynamics
→ Ecological niche of duck 30
beer → importance of water

67 PPT

---

importance of CO_2 in

Zoo 507
