Past Papers for Mids./Finals are also Available

1. If we apply the force on an object but the object does not move, we can say that:
 - Applied Force is less than force of friction
 - Applied force is equal to force of gravity
 - **Applied Force is equal to force of friction** ✓
 - Applied Force is greater than force of friction
2. Solar cell technology is an example of:
 - **Renewable energy** ✓
 - Nuclear energy
 - Thermal energy
 - Non-renewable energy
3. Greater the value of refractive index of a medium, the bending of light will be:
 - Smaller
 - Zero
 - **Greater** ✓
4. If the temperature of the substance does not rise after the addition of heat in it, which one of the following statements presents the best justification for this observation?
 - The substance must be cooler than its environment.
 - The substance has unusual thermal properties.
 - The substance must be a gas.
 - **The substance undergoes a change of phase.** ✓
5. When a horse pulls a wagon, the horse moves forward due to the force:
 - of the horse on the wagon
 - **of the ground on the horse** ✓
 - of the wagon on the horse

- of the horse on the ground
6. An engineer designs different machines. Which is the least efficient?
- 450J 248J 202 J ☒
 - 731J 468J 263 J
 - 255J 153J 102J
 - 5510J 357J 153 J
7. The amount of work done by a Force of 5 N pulling a mass of 5 kg, 5m along a rough floor in the direction of the applied force is:
- 25/5
 - 50J ☒
 - 5J
 - 125 J
8. The Colour of flame of Na salts:
- Carmines
 - Yellow ☒
 - Violet
 - Brown
9. An object is placed at a distance which is equal to the radius of curvature of the mirror. The size of the object is 2 cm, then the size of the image will be:
- 10cm
 - 15cm
 - 20cm ☒
10. If focal length of a lens is -50 cm, the power of the lens will be:
- -2D ☒
 - +50D

1. Mass of astronaut on the moon:

- 50 kg ✓
- 8 kg

- 31.25 kg
- 16 kg

2. Force and object at rest:

- Newton's second law of motion is not valid here
- The object has too much mass
- Newton's first law of motion is not valid here
- There is a force of 200N in the opposite direction ✓

3. Quantities in equations of motion:

- Uniform
- Positive ✓
- Negative

4. Temperature at which gas volume is zero:

- 0°C
- 0 K ✓
- 100°C
- 273 K

5. Bi-metal strip on heating:

- Bend with steel on the concave side ✓
- Bend with steel on the convex side
- Remain straight
- Contract

6. Displacement after two rounds:

- 200 meters
- Zero ✓
- 100 meters

7. Coefficient of thermal expansion:

- The unit of temperature and not of length
- Neither the unit of length nor of temperature

- The unit of length as well as of temperature ✓
- The unit of length and not of temperature

8. Momentum of a gun:

- 5.7 Ns ✓
- 2850 Ns
- 2850000 Ns

9. Scalar quantity:

- Distance ✓
- Mass ✓
- Velocity

10. Image on a screen:

- Virtual
- Converging ✓
- Diverging

1. Which line correctly identifies average speed?

Options:

- A) Distance covered in constant time intervals
- B) Displacement in unit time
- C) Total distance covered divided by time taken
- D) Distance covered in unit time

Correct Option: C) Total distance covered divided by time taken

2. A motion where a body has the exact same motion around a fixed point is an example of:

Options:

- A) Random motion
- B) Translatory motion
- C) Circular motion

D) Vibratory motion

Correct Option: C) Circular motion

3. A stone of mass 2 kg dropped from a tower fall to the ground in 3 seconds. A second mass of 3 kg dropped from the same height reaches the ground in:

Options:

A) 3 seconds

B) 4.5 seconds

C) 6 seconds

D) 2 seconds

Correct Option: B) 4.5 seconds

4. All sciences for search of truth rely upon:

Options:

A) Experiential validity

B) Clarity of hypothesis

C) Quality of observation

D) Depth of knowledge

Correct Option: A) Experiential validity

5. A mass is projected vertically upwards. Which line could represent the correct energy conversions while the mass is gaining height?

Options:

A) K.E. decreases, Gravitational P.E. decreases, Total Energy decreases

B) K.E. increases, Gravitational P.E. increases, Total Energy increases

C) K.E. decreases, Gravitational P.E. increases, Total Energy does not change

D) K.E. increases, Gravitational P.E. decreases, Total Energy does not change

Correct Option: C) K.E. decreases, Gravitational P.E. increases, Total Energy does not change

6. A vector can have (i) magnitude (ii) unit and (iii) direction. If such a vector is multiplied by a positive number greater than one which quantity or quantities do not change:

Options:

A) (i) only

B) (i) and (iii)

C) (i) and (ii)

D) (ii) and (iii)

Correct Option: B) (i) and (iii)

7. The fundamental unit of mass is:

Options:

A) Ounce

B) Gram

C) Pound

D) Kilogram

Correct Option: D) Kilogram

8. Two objects X and Y are moving. If the speed of X is double that of Y and mass of X is half of Y. The ratio of their kinetic energies would be:

Options:

A) 1:1

B) 1:2

C) 2:1

D) 4:1

Correct Option: A) 1:1

9. Work done depends upon (i) force (ii) distance moved in direction of force applied and (iii) angle between direction of force and displacement. Which line is always correct if work done is not zero:

Options:

A) (i) and (iii) are not zero

B) (i) is not zero

C) (ii) and (iii) are not zero

D) (i) and (ii) are not zero

Correct Option: D) (i) and (ii) are not zero

10. If two quantities are directly proportional to each other then the graph between them is a:

Options:

A) Arc circle

B) None of the above

C) Straight line

D) Parabola

Correct Option: C) Straight line

MAM MEHWISH 03184148783

👤👤 Paid Vu Lms Handling 👤👤

♦ 1 GDB= Rs 100

♦ 1 Quiz= Rs 200

♦ 1 Assignment=Rs 250

♦ Agr complete handling krwatey hain 1 subject ki with all activities= Rs 500 (Half Semester) ♦

LECTURES Play Service Available In Very Low Price. 📄

👤👤 80-100% Marks Guaranteed 👤👤
