BT406

RESEARCH METHODOLOGY & SKILL ENHANCEMENT

CRASH QUESTIONS
TO GET MAXIMUM MARKS

Concept Focused | Exam Oriented | High Yield Preparation

Study Smart. Achieve More.

Learn Today, Lead Tomorrow.

Aim High, Achieve More.

Focus your efforts. Prepare with purpose.

Smart preparation. Better performance.

Your success is our mission.

EFFORT BY

BS BIOLOGICAL SCIENCES TEAM

RELIABLE • TRUSTED • RESULT ORIENTED

= PREPARE SMART • STAY CONSISTENT • SUCCEED BIG =

These MCQs are carefully selected from past papers to help you understand key concepts.
Use this resource along with your official handouts for the best preparation and maximum results.
If any question appears in your exam, consider it a positive step towards your success!

Best of Luck!

MOST FREQUENTLY REPEATED CONCEPTUAL AREAS IN BT406 RESEARCH METHODOLOGY AND SKILL ENHANCEMENT CONCEPT CRACKER MCQS FINAL EXAMS

Main Group (BS Biological Sciences) https://chat.whatsapp.com/DWXwJpXahbxFVQutey8JXN

BT406 Research Methodology and Skill Enhancement https://chat.whatsapp.com/KfPh8oIEpSd62pjYzqjUS4

Q1: Action research focuses on power with a goal of empowerment and it also focuses except__.

Answer: Formal reports, articles and books

Q2: Why the girls are getting most of the top positions in different examination? Conducting such research offers _____.

Answer: Identifying problems or opportunities

Q3: Social research is used except __.

Answer: Increase social problems

Q4: While defining 'theory', what is the key element included?

Answer: Relationship between two phenomena

Q5: Difference between formative evaluation and summative evaluation is____.

Answer: Built in monitoring and final outcome report

Q6: A business researcher may theorize that older investors tend to be more interested in investment income than younger investors. This theory, once verified, should allow researchers to predict _____.

Answer: The importance of expected profit on the basis of investors' age

Q7: A major function of a theoretical system is that it_____.

Answer: Produces theories

Q8: Knowledge about research processes, design, and interpretation of data helps managers/administrators to determine____.

Answer: Research findings presented are correct and recommended solution is appropriate for implementation

Q9: While performing research, avoiding misrepresentation of research findings is called …….

Answer: Objectivity

Q10: Aims of 'research proposal' include all except …….

Answer: Impose personal ideas to gain conceptual clarity

Q11: A concept must be made ___ in order to be measured.

Answer: Operational

Q12: The type of relationship in which the nature of relationship is NOT specified is called:

Answer: Non-directional

Q13: Data is an empirical representation of concepts in _____.

Answer: Both Qualitative and Quantitative research

Q14: Therefore, one can say that a hypothesis is a verifiable counterpart of a _____.

Answer: Proposition

Q15: Concepts in isolation are nothing. Only when it is explained how concepts relate to other concepts it begins to construct_____.

Answer: Propositions

Q16: Dictionary definitions are also ___.

Answer: Conceptual, Theoretical and Nominal

Q17: In research, Extraneous Variables (EV), also known as confounding factors, that may affect XY relationship, are to be identified by the:

Answer: Researcher

Q18: While devising theoretical framework of research, why is it important to make an inventory of propositions?

Answer: To build up the theory

Q19: It is also called as univariate hypothesis.

Answer: Descriptive hypothesis

Q20: Height is characteristic of a physical object ___.

Answer: From top to bottom

Q21: Which one is not a type of applied research?

Answer: Explanatory Research

Q22: Which of the following follow a deductive route?

Answer: Quantitative researchers

Q23: Strong relationship between the library facility (X) and performance of students (Y) depends on the "interest and inclination" of students which modifies the original relationship. In the given example, determine what is the type of variable that modifies the original relationship.

Answer: Moderating variable

Q24: What is the importance of concepts in research?

Answer: They are used in hypothesis formulation

Q25: Research produces knowledge which can be used ____.

Answer: To solve problems and generate theories, principles and laws

Q26: One of the goals of literature reviews is to learn from other and make idea.

Answer: Agree

Q27: Occasionally, research may be asked by the sponsors to participate in unethical behavior. It would be a breach of ethical standards. These may include except__.

Answer: Including sections of data analysis and conclusions

Q28: The organization of concepts in sequence from the most concrete and individual to the most general indicates ___.

Answer: The degree of abstraction

Q29: Which one is not an unethical activity_____.

Answer: Avoiding legal liability

Q30: _____ traces the development of an issue over time.

Answer: Context review

Q31: Many corporations, professional associations, and universities have___.

Answer: Code of ethics

Q32: If the relationship among variables refers to an observable reality, the proposition may be testable, we can then call it a/an:

Answer: Hypothesis

Q33: If under-aged children are engaged in research, who can provide informed consent on behalf of them?

Answer: Parents or any person with legal standings

Q34: Research helps in developing methodologies, which help in___.

Answer: Collection of data, processing of data and analysis of data

Q35: In both Qualitative and Qualitative research, data are empirical representation of _____.

Answer: Concepts

Q36: Following is a type of confounding factors that affect the relationship between X and Y variables:

Answer: Extraneous variables

Q37: _____ links the language of theory with the language of empirical measures.

Answer: Operationalization

Q38: Descriptive research shows ____.

Answer: Specific details of a situation, social setting, or relationship

Q39: Techniques for narrowing a topic into a Research Question are except _____.

Answer: Apply to a specific fact

Q40: Since theory summarizes the known facts and predicts facts which have not been observed, it must also point to ____.

Answer: Areas which have not yet been explored

Q41: ____ should be the part of an educational programme.

Answer: Classical review

Q42: _____ Hypotheses typically state the existence, size, form, or distribution of some variable.

Answer: Descriptive hypothesis

Q43: Sponsors of a research have a right to several types of confidentiality including.

Answer: Sponsor nondisclosure, purpose nondisclosure and findings nondisclosure

Q44: ____ is an important Characteristic of Scientific Method in which researcher tries to narrow down the number of reasons in such a way that some action could be taken.

Answer: Deterministic

Q45: Abstract is actually the ___ of an article.

Answer: Summary

Q46: Quota sampling and Proportionate stratified sampling can be considered as same.

Answer: Not agreed

Q47: Research provides ___ that guides us to make decisions to solve the problem.

Answer: Needed information

Q48: In research, Extraneous variables (EV), also known as confounding factors, that may affect XY relationship, are to be identified by …….

Answer: Researcher

Q49: A concept (or construct) is a generalized idea about a class of objects, attributes, occurrences, or processes that has been given a ___.

Answer: Name

Q50: In ethical issues in research, deception occurs when the respondents are ____.

Answer: Misused for the sake of research

Q51: Interviews, telephone interviews, computer-assisted interviews, and interviews through electronic media; questionnaires that are personally administered, sent through mail, or electronically administered; observation of individuals, these are all types of ___.

Answer: Data Collection

Q52: Physicians, lawyers, engineers, accountants, plumbers, and auto mechanics all have specialized languages called Jargon. They use their jargon to refer to ____.

Answer: The objects and concepts with which they work

Q53: On each dimension of Operationalization, the researcher has to develop ____ argument.

Answer: Logical

Q54: Proposition is a statement concerned with the ____ relationships among concepts.

Answer: Logical

Q55: In research, the approach in which by repeating the observation researchers want to be 'definite/positive' is called …….

Answer: Positivism

Q56: A hypothesis that states the existence, size, form, or distribution of a variable is called a _____ hypothesis.
Answer: Descriptive

Q57: A proposition that can be empirically tested is called a _____.
Answer: Hypothesis

Q58: A hypothesis containing only one variable is also called a _____ hypothesis.
Answer: Univariate

Q59: The hypothesis in which the direction of relationship is specified is called a _____ hypothesis.
Answer: Directional

Q60: A hypothesis stating that two variables are associated without specifying direction is called a _____ hypothesis.
Answer: Non-directional

Q61: A hypothesis that implies one variable causes a change in another variable is called a _____ hypothesis.
Answer: Causal

Q62: The hypothesis that states there is no relationship between variables is called the _____ hypothesis.
Answer: Null

Q63: The symbol commonly used for the null hypothesis is _____.
Answer: H_0

Q64: The symbol commonly used for the alternative hypothesis is _____.
Answer: H_1

Q65: Rejection of the null hypothesis leads to acceptance of the _____ hypothesis.
Answer: Alternative

Q66: A hypothesis helps the researcher by limiting what shall and shall not be _____.
Answer: Studied

Q67: One role of a hypothesis is to suggest the most appropriate research _____.
Answer: Design

Q68: A testable hypothesis must be conceptually _____.
Answer: Clear

Q69: Variables in a hypothesis should have empirical _____.
Answer: Referents

Q70: Words like "ought" and "should" generally make a hypothesis difficult to _____.
Answer: Test

Q71: A hypothesis should be specific to a place, situation, and _____.
Answer: Context

Q72: Sampling is the process of selecting a subset from a larger _____.
Answer: Population

Q73: The complete set of individuals relevant to a study is called the _____.
Answer: Population

Q74: Every member of the population having a known chance of selection indicates _____ sampling.
Answer: Probability

Q75: In non-probability sampling, the probability of selection is generally _____.
Answer: Unknown

Q76: Simple random sampling gives each population element an _____ chance of selection.
Answer: Equal

Q77: Systematic sampling selects every kth _____.
Answer: Element

Q78: Stratified sampling divides the population into homogeneous _____.
Answer: Strata

Q79: Cluster sampling divides the population into naturally occurring _____.
Answer: Groups

Q80: In multistage sampling, selection occurs in more than one _____.
Answer: Stage

Q81: Convenience sampling is a type of _____ sampling.
Answer: Non-probability

Q82: In convenience sampling, respondents are selected because of their _____.
Answer: Availability

Q83: Quota sampling requires the researcher to fill predetermined _____.
Answer: Quotas

Q84: Quota sampling is considered the non-probability counterpart of _____ sampling.
Answer: Stratified

Q85: Judgment sampling depends primarily on the researcher's _____.
Answer: Judgment

Q86: Snowball sampling is particularly useful for studying _____ populations.
Answer: Hidden

Q87: The basic element considered for selection in sampling is called the sampling _____.
Answer: Unit

Q88: The list from which a sample is drawn is called the sampling _____.
Answer: Frame

Q89: Sampling error occurs because information is collected from a sample rather than the entire _____.
Answer: Population

Q90: Increasing sample size generally reduces sampling _____.
Answer: Error

Q91: Data collected first-hand by the researcher are called _____ data.
Answer: Primary

Q92: Data originally collected by someone else are called _____ data.
Answer: Secondary

Q93: Observation, interview, and questionnaire are common methods of _____ collection.
Answer: Data

Q94: A questionnaire consists of a set of written _____.
Answer: Questions

Q95: Personally administered questionnaires usually have a higher _____ rate.
Answer: Response

Q96: Mail questionnaires are generally less expensive but may suffer from low _____.
Answer: Response

Q97: Electronic questionnaires can collect data from geographically dispersed _____.
Answer: Respondents

Q98: Interviews allow the researcher to obtain more detailed _____.
Answer: Information

Q99: A major disadvantage of personal interviews is their high _____.
Answer: Cost

Q100: Telephone interviews are generally faster than _____ interviews.
Answer: Personal

Q101: In structured interviews, questions are asked in a predetermined _____.
Answer: Order

Q102: Observation involves systematically watching and recording _____.
Answer: Behavior

Q103: Participant observation requires the researcher to become part of the group being _____.
Answer: Studied

Q104: A major advantage of observation is that behavior can be recorded as it actually _____.
Answer: Occurs

Q105: The process of converting collected information into meaningful findings is called data _____.
Answer: Analysis

Q106: Data analysis begins after data have been collected and properly _____.
Answer: Organized

Q107: Editing of data is done to identify errors and _____.
Answer: Omissions

Q108: Coding is the process of assigning symbols or numbers to _____.
Answer: Responses

Q109: Classification involves arranging data into meaningful _____.
Answer: Categories

Q110: Tabulation refers to presenting data in the form of _____.
Answer: Tables

Q111: A frequency distribution shows how often a value or category _____.
Answer: Occurs

Q112: The arithmetic average of a set of observations is called the _____.
Answer: Mean

Q113: The middle value in an ordered distribution is called the _____.
Answer: Median

Q114: The value occurring most frequently in a distribution is called the _____.
Answer: Mode

Q115: Mean, median, and mode are measures of central _____.
Answer: Tendency

Q116: The spread of observations around a central value is called _____.
Answer: Dispersion

Q117: Range is calculated as the difference between the highest and _____ value.
Answer: Lowest

Q118: Variance is based on squared deviations from the _____.
Answer: Mean

Q119: Standard deviation is the square root of the _____.
Answer: Variance

Q120: A larger standard deviation indicates greater _____ in the data.
Answer: Variability

Q121: Inferential statistics help researchers make conclusions about the _____.
Answer: Population

Q122: Statistical inference is based on information obtained from a _____.
Answer: Sample

Q123: Hypothesis testing helps determine whether observed findings are statistically _____.
Answer: Significant

Q124: The probability value used in hypothesis testing is represented by _____.
Answer: p-value

Q125: A significance level of 0.05 means accepting a 5 percent chance of _____.
Answer: Error

Q126: Correlation measures the degree of association between two _____.
Answer: Variables

Q127: A positive correlation indicates that both variables move in the same _____.
Answer: Direction

Q128: A negative correlation indicates that one variable increase while the other _____.
Answer: Decreases

Q129: Correlation does not necessarily imply _____.
Answer: Causation

Q130: The strength of a relationship is indicated by the correlation _____.
Answer: Coefficient

Q131: A correlation coefficient always lies between _____ and +1.
Answer: -1

Q132: A correlation coefficient of zero indicates no linear _____.
Answer: Relationship

Q133: The closer the correlation coefficient is to ±1, the _____ relationship.
Answer: Stronger

Q134: Regression analysis is used to predict one variable from another _____.
Answer: Variable

Q135: In regression, the variable being predicted is called the _____ variable.
Answer: Dependent

Q136: The variable used to make predictions is called the _____ variable.
Answer: Independent

Q137: A scatter diagram is commonly used to visualize _____ between variables.
Answer: Relationships

Q138: Research findings should be interpreted in light of the study's _____.
Answer: Objectives

Q139: Conclusions must be based on evidence obtained from the _____.
Answer: Data

Q140: Generalization refers to applying research findings to a larger _____.
Answer: Population

Q141: External validity is closely related to the ability to _____ findings.
Answer: Generalize

Q142: Internal validity focuses on whether observed effects are truly caused by the _____ variable.
Answer: Independent

Q143: Experimental research provides greater control over _____ variables.
Answer: Extraneous

Q144: Random assignment helps minimize the effects of _____ differences.
Answer: Individual

Q145: A control group is used as a basis for _____.
Answer: Comparison

Q146: Subjects exposed to the treatment constitute the _____ group.
Answer: Experimental

Q147: Manipulation of the independent variable is a key feature of _____ research.
Answer: Experimental

Q148: A true experiment requires manipulation, control, and _____ assignment.
Answer: Random

Q149: Quasi-experimental designs lack complete _____ assignment.
Answer: Random

Q150: Longitudinal studies collect data over an extended _____.
Answer: Period

Q151: Cross-sectional studies collect data at a single point in _____.
Answer: Time

Q152: Panel studies repeatedly collect information from the same _____.
Answer: Respondents

Q153: Trend studies focus on changes within a _____ over time.
Answer: Population

Q154: Cohort studies examine individuals sharing a common _____.
Answer: Characteristic

Q155: A research design serves as the overall blueprint for conducting a _____.
Answer: Study

Q156: A research report is a formal document that communicates the results of a _____.
Answer: Study

Q157: The title page of a report provides basic identification _____.
Answer: Information

Q158: The abstract presents a brief _____ of the entire report.
Answer: Summary

Q159: An abstract should contain the purpose, method, findings, and _____.
Answer: Conclusions

Q160: The introduction section explains the background of the research _____.
Answer: Problem

Q161: A statement that clearly identifies the issue under investigation is called the research _____.
Answer: Problem

Q162: Research objectives specify what the researcher intends to _____.
Answer: Accomplish

Q163: Research questions are derived from the research _____.
Answer: Problem

Q164: The literature review demonstrates the researcher's knowledge of previous _____.
Answer: Studies

Q165: One purpose of the literature review is to identify gaps in existing _____.
Answer: Knowledge

Q166: The methodology section explains how the research was _____.
Answer: Conducted

Q167: Sampling procedures are usually described in the _____ section.
Answer: Methodology

Q168: The findings section presents analyzed _____.
Answer: Data

Q169: Tables and figures are commonly used to present research _____.
Answer: Results

Q170: Conclusions should be based directly on the study _____.
Answer: Findings

Q171: Recommendations are suggestions derived from research _____.
Answer: Results

Q172: References provide complete details of the sources _____.
Answer: Used

Q173: Proper citation helps avoid _____.
Answer: Plagiarism

Q174: A research proposal is prepared before conducting the actual _____.
Answer: Study

Q175: The purpose of a research proposal is to explain what the researcher plans to _____.
Answer: Do

Q176: Ethical research requires voluntary _____ from participants.
Answer: Participation

Q177: Informed consent means participants are adequately informed before making a _____.
Answer: Decision

Q178: Confidentiality requires that participants' information be kept _____.
Answer: Private

Q179: Anonymity means the identity of respondents remains _____.
Answer: Unknown

Q180: Participants should have the right to _____ from a study at any time.
Answer: Withdraw

Q181: Deception in research occurs when participants are not given complete and accurate _____.
Answer: Information

Q182: Debriefing is usually conducted at the _____ of the study.
Answer: End

Q183: The purpose of debriefing is to explain the true nature of the _____.
Answer: Research

Q184: Researchers must protect participants from physical and psychological _____.
Answer: Harm

Q185: Respect for participants is a fundamental principle of research _____.
Answer: Ethics

Q186: Qualitative research emphasizes understanding meanings and human _____.
Answer: Behavior

Q187: Qualitative researchers often collect data in a _____ setting.
Answer: Natural

Q188: In qualitative research, the researcher is often considered the primary research _____.
Answer: Instrument

Q189: In-depth interviews are commonly used in _____ research.
Answer: Qualitative

Q190: Focus groups involve guided discussion among selected _____.
Answer: Participants

Q191: A moderator is responsible for guiding a focus group _____.
Answer: Discussion

Q192: Qualitative studies generally emphasize depth rather than _____.
Answer: Breadth

Q193: Content analysis is used to examine written, verbal, or visual _____.
Answer: Material

Q194: Coding in qualitative research involves identifying meaningful _____.
Answer: Categories

Q195: Themes emerge from patterns identified in qualitative _____.
Answer: Data

Q196: Case studies provide intensive analysis of a single _____.
Answer: Unit

Q197: A case study may focus on an individual, group, organization, or _____.
Answer: Community

Q198: Triangulation improves research quality by using multiple sources of _____.
Answer: Evidence

Q199: The use of several methods to study the same phenomenon is called _____ triangulation.
Answer: Methodological

Q200: Credibility in qualitative research is comparable to _____ in quantitative research.
Answer: Validity

Q201: Dependability in qualitative research is similar to _____ in quantitative research.
Answer: Reliability

Q202: Transferability refers to the extent findings can be applied to other _____.
Answer: Contexts

Q203: Confirmability ensures findings are shaped by data rather than researcher _____.
Answer: Bias

Q204: Mixed-method research combines qualitative and _____ approaches.
Answer: Quantitative

Q205: The major advantage of mixed-method research is a more _____ understanding of the problem.
Answer: Comprehensive

Q206: Mixed-method research helps overcome weaknesses of individual research _____.
Answer: Methods

Q207: The sequential mixed-method design collects one type of data _____ another.
Answer: Before

Q208: Concurrent mixed-method designs collect qualitative and quantitative data at the same _____.
Answer: Time

Q209: Research utilization refers to applying research findings in practical _____.
Answer: Situations

Q210: Evidence-based decision making relies on systematic research _____.
Answer: Findings

Q211: Research finding gains value when it contributes to solving a _____.
Answer: Problem

Q212: Evaluation research is conducted to assess the effectiveness of a _____.
Answer: Program

Q213: Formative evaluation is usually conducted during program _____.
Answer: Implementation

Q214: Summative evaluation is conducted after program _____.
Answer: Completion

Q215: Cost-benefit analysis compares program costs with expected _____.
Answer: Benefits

Q216: Action research is designed to solve immediate practical _____.
Answer: Problems

Q217: Action research often involves collaboration between researchers and _____.
Answer: Practitioners

Q218: Participatory research encourages active involvement of the target _____.
Answer: Community

Q219: Policy research provides information for governmental and organizational _____.
Answer: Decisions

Q220: Applied research focuses on solving specific real-world _____.
Answer: Problems

Q221: Basic research primarily aims to expand existing _____.
Answer: Knowledge

Q222: Scientific knowledge should be based on observable _____.
Answer: Evidence

Q223: Replication strengthens confidence in research _____.
Answer: Findings

Q224: Replication means repeating a study to verify its _____.
Answer: Results

Q224: Peer review helps ensure the quality of research _____.
Answer: Publications

Q225: Scholarly journals typically publish research articles reviewed by _____.
Answer: Experts

Q226: Research findings should be reported honestly without data _____.
Answer: Manipulation

Q227: Fabrication refers to making up research _____.
Answer: Data

Q228: Falsification involves altering research data or _____.
Answer: Results

Q229: Plagiarism occurs when another person's work is presented as one's _____.
Answer: Own

Q230: Ethical research requires accurate reporting of research _____.
Answer: Findings

Q231: Selective reporting of only favorable results threatens research _____.
Answer: Integrity

Q232: Researchers should acknowledge all sources through proper _____.
Answer: Citation

Q233: The credibility of research depends heavily on researcher _____.
Answer: Honesty

Q234: Scientific research is characterized by systematic _____.
Answer: Investigation

Q235: Objectivity requires researchers to minimize personal _____.
Answer: Bias

Q236: A good research problem should be both significant and _____.
Answer: Researchable

Q237: Feasibility of a study depends on available time, resources, and _____.
Answer: Expertise

Q238: A conceptual definition explains the theoretical meaning of a _____.
Answer: Concept

Q239: An operational definition specifies how a concept will be _____.
Answer: Measured

Q240: Measurement involves assigning numbers or symbols according to specific _____.
Answer: Rules

Q241: The accuracy of measurement is closely related to _____.
Answer: Validity

Q242: Consistency of measurement results reflects _____.
Answer: Reliability

Q243: A measurement instrument should be both reliable and _____.
Answer: Valid

Q244: Poor reliability generally reduces measurement _____.
Answer: Accuracy

Q245: Data quality is influenced by the design of research _____.
Answer: Instruments

Q246: Pretesting helps identify weaknesses in a research _____.
Answer: Instrument

Q247: A pilot study is conducted before the main _____.
Answer: Study

Q248: Pilot testing helps improve research procedures and _____.
Answer: Instruments

Q249: Research design provides direction for data collection and _____.
Answer: Analysis

Q250: A well-designed study increases confidence in research _____.
Answer: Results

Q251: Every research study begins with identification of a _____.
Answer: Problem

Q252: Research conclusions should remain consistent with collected _____.
Answer: Evidence

Q253: The ultimate purpose of research is the generation of useful _____.
Answer: Knowledge

Q254: Scientific research contributes to understanding, explanation, prediction, and _____.
Answer: Control

Q255: Knowledge obtained through systematic investigation is called scientific _____.
Answer: Knowledge

Q256: A research study should address a clearly defined _____.
Answer: Problem

Q257: The process of narrowing a broad issue into a researchable topic is called problem _____.
Answer: Formulation

Q258: Research objectives provide direction for the entire research _____.
Answer: Process

Q259: Objectives should be clear, specific, and _____.
Answer: Measurable

Q260: Research questions help translate the problem into specific areas of _____.
Answer: Inquiry

Q261: A good hypothesis should be capable of empirical _____.
Answer: Testing

Q262: Variables that influence the relationship between independent and dependent variables are called _____ variables.
Answer: Moderating

Q263: Variables that explain how or why a relationship exists are called _____ variables.
Answer: Intervening

Q264: Extraneous variables may distort the true relationship between study _____.
Answer: Variables

Q265: Control of extraneous variables improves internal _____.
Answer: Validity

Q266: Theoretical frameworks provide a logical basis for research _____.
Answer: Hypotheses

Q267: A theoretical framework is developed from existing _____.
Answer: Theory

Q268: Concepts become useful in research when they are clearly _____.
Answer: Defined

Q269: Operationalization involves converting concepts into measurable _____.
Answer: Variables

Q270: Each dimension of operationalization requires a logical _____.
Answer: Argument

Q271: Indicators are specific measures used to represent a _____.
Answer: Concept

Q272: Multiple indicators often improve measurement _____.
Answer: Accuracy

Q273: Composite measures combine several indicators into a single _____.
Answer: Measure

Q274: Indexes and scales are examples of composite _____.
Answer: Measures

Q275: Scaling techniques help quantify abstract _____.
Answer: Concepts

Q276: Attitudes are commonly measured using rating _____.
Answer: Scales

Q277: Questionnaire design should avoid ambiguous _____.
Answer: Questions

Q278: Clear wording improves respondent _____.
Answer: Understanding

Q279: The quality of research findings depends greatly on the quality of collected _____.
Answer: Data

Q280: Data cleaning is performed to identify and correct data _____.
Answer: Errors

Q281: Missing values in a dataset can affect research _____.
Answer: Results

Q282: Accurate coding facilitates efficient data _____.
Answer: Analysis

Q283: Statistical techniques should match the nature of the research _____.
Answer: Questions

Q284: Descriptive statistics summarize and organize research _____.
Answer: Data

Q285: Inferential statistics allow conclusions about a larger _____.
Answer: Population

Q286: A sample should adequately represent the target _____.
Answer: Population

Q287: Sampling bias reduces the representativeness of a _____.
Answer: Sample

Q288: Nonresponse error occurs when selected respondents fail to _____.
Answer: Participate

Q289: High response rates generally improve data _____.
Answer: Quality

Q290: The interpretation of results should remain consistent with the research _____.
Answer: Objectives

Q291: Conclusions should not go beyond the available _____.
Answer: Evidence

Q292: Recommendations should logically follow from the research _____.
Answer: Findings

Q293: Limitations identify factors that may affect interpretation of the _____.
Answer: Results

Q294: Future research suggestions are commonly included in the _____ section.
Answer: Recommendations

Q295: A good research report should be clear, concise, and _____.
Answer: Objective

Q296: Effective communication increases the usefulness of research _____.
Answer: Findings

Q297: The final step of the research process is dissemination of research _____.
Answer: Results

Q298: Empirical evidence is based on observation and _____.
Answer: Measurement

Q299: The value of research increases when findings can be practically _____.
Answer: Applied

Q300: Sound research requires both logical reasoning and empirical _____.
Answer: Evidence

🚨 Concept Cracker MCQS Most Important Repeated Conceptual 🚨

⚠ Important Note:

These MCQs have been compiled from repeated exam patterns, important concepts, and previous assessments to support your preparation.

📚 However, do NOT rely solely on this compilation.

For the best results, thoroughly study your Handouts, PPTs, Video Lectures, and Course Material as well.

Prepare Smart, Work Hard, and Aim for Excellence.

Best of Luck! 🍀📚
