“B.S English Applied Linguistics Project Guidelines”

❖What is a Research Project or Thesis?

Thesis or project is a research work in which you'll be provided with a topic by your instructor and you've to do research on that topic.
Your work should be plagiarism free in order to pass that specific project course because it's mandatory for degree completion.

❖ Components of the Project/Thesis

Thesis/Project comprised of mainly five chapters:

1. Introduction
2. Literature Review
3. Research Methodology
4. Results and Discussion
5. Findings/conclusion/Recommendations

1. Introduction

In the introduction chapter, you'll write a brief introduction of the topic assigned to you by the instructor. You can get idea from the previous research articles but you can't take material from those articles because that will make your work plagiarized and you'll get 0 marks in that assignment.

Your first assignment will be about the introduction chapter and will include the following headings:

1.1 Introduction

write an introduction of the topic (2 pages almost)

1.2: Objectives of the study

you'll write the objectives of your study by using the words like " to investigate…, to explore…, to highlight..etc.

you can add 1-2 objectives about your research study.

Example: To investigate the role of First language on the English speaking skills of students.

1.3: Research Questions

Add 1-2 research questions by using the question words e.g. what, how, why, etc.

Example: What is the Role of L1 on the English speaking skills of the students.

(Note: It's just an example. Your topic will be different.)

1.4: Statement of the problem

Under this sub-heading, you'll write a short paragraph of about 200 words about the problem that you're going to discuss in your research study.

1.5: Significance of the study

In this sub-heading, you've to write a paragraph of 200-300 words about the significance/importance of the topic for the audience (teachers, students, local people, etc)

Chapter 2: Literature Review

This is the second chapter of your thesis and you've to write this in your 2nd assignment after the approval of your 1st assignment which was about the introduction.

Literature Review generally means " the review of the previous studies that has been done on that specific topic you're assigned with.

You've to read about 4-5 articles after downloading from the Google, Google scholar. I'll prefer Google Scholar because you can easily get references as well from the Google scholar.

Read and open the notepad with your PDF.
Read the Abstract, methodology and conclusion section of the articles you're reading and write these three sections in a short paragraph about 100 words for one article.
(Note: Write the literature review in your own words without using the same words as used in the article otherwise your work will be plagiarized.)
Also write the name of the researcher before starting the review of the articles e.g. Moyer (2014) investigated ....
Read 4-5 articles in the same way and write their reviews in your own words.
This is the work you've to done in the literature review chapter and this chapter should be less than 800 words.

Chapter 3: Research Methodology

This chapter is mostly included in the 2nd assignment with literature review for Eng528 project but mostly for eng 525,526, this chapter is written as a separate one. Whatever it's place is, the method and formatting is same.

It includes the following sub-headings:

3.1: **Research Design** 3.2: **Research Method**

3.3: **Population of the study** 3.4: **Sample size**

3.5: **Sampling Technique** 3.6: **Research instruments**

3.7: **Reliability and validity of the tools**

First of all just design survey questionnaires which should include a maximum of 20 questions and decide what type of research design you'll choose in order to collect data e.g. your research method will be qualitative or quantitative? You will collect data from online survey design or by physically visiting the schools or colleges?

After deciding the above factors,
select the population and sample size.

E.g. Students of Punjab Group of Colleges will be your population and the number of students (100,200) will be the
sample size of the study.

In the Methodology chapter, you just have to design questionnaires about your topic, select the research design, population, size and instruments.

Chapter 4: Results and Discussion

In this assignment, you've to distribute the questionnaires to the students whether through online survey forms or by taking prints of the questionnaire and hand over to the students by physically visiting them in school or college.

After you got your data, analyze it and write it in the form of tables and charts.

You can use excel sheet for data analysis and reporting of the results.

Chapter 5: Conclusion/Findings/Recommendations

You've to write this chapter with chapter 4. Under this heading, you've to write:

1. **Findings** you got from the data
2. **Conclusion** of the gathered data
3. **Recommendations** for the future research.

Sometimes you also have to write the **Limitations** of the study in this chapter.

It includes the limitation of the study due to which you can't cover a vast range of data in you study.

Example: time limitation, short range of data etc.

References

Under this heading, add 10-15 references of the articles you read in order to get idea for writing your thesis.
You can add the reference of the articles you read for literature review as well.

Appendix

End your thesis with the heading of “Appendix” in which you will add your questionnaires which include 10-20 questions about your research.
Appendix is basically added to the thesis to write the data which you can’t write in the main five chapters of the Thesis.

Software Guidelines

❖ Download and log-in Skype in your Mobile phones. Your instructors will share their Skype I’ds in your LMS announcement sections. Note that I’d and add them on your Skype because they will give you all the guidelines on Skype.

❖Your assignment will be updated on LMS but Skype conversation is used as an extra source for getting guidance from the instructors.

❖Your assignment should be in APA formatting. Moreover, you can get exact guidelines from the instructors as well.
