ENG501 Glossary

- **Arbitrariness :**In human language, there is no natural connection between the word and the object they make reference to. This characteristic of language is called arbitrariness. For example, the Arabic word 'kalab' meaning dog and the English word 'dog' have no relation to the word they refer to.
- **Bow Wow theory :**In English= splash, bang, boom, rattle, buzz, hiss, screech, bow-wow Also called the "bow-wow theory" of language origin
- **Conservative :**It means that tends to preserve the existing status.
- **Creole :**A creole language is a stable language that originated from a pidgin language, but has since been "nativized" (i.e. taught to, and acquired by, children). Its vocabulary is based on that of a parent language, although usually with significant pronunciation, meaning and grammar differences.
- **Derivation :**Derivation creates new words with different meanings, e.g. maltreat from treat. With different syntactic properties, e.g. the adverb quickly from the adjective quick.
- **Diachronic linguistics :**Diachronic linguistics (or historical linguistics), the study of a language over a period of time.
- **Dialect :**A dialect is a variety or version of a language spoken in a particular geographical area. Different dialects are distinguished from each other by their vocabulary, grammar and pronunciation (whereas a distinction made only in terms of pronunciation is usually called an accent). A dialect of a language is distinguishable, but still understandable, to speakers of another dialect of that language.
- **Displacement :**In linguistics, displacement is the capability of language to communicate about things that are not immediately present (spatially or temporally); i.e., things that are either not here or are not here now.
- **Duality :**Human language is organized at two levels or layers simultaneously. We have a physical level at which we can produce individual sounds, like n, b and i. As individual sounds, none of these discrete forms has any intrinsic meaning. In a particular combination such as bin, we have another level producing a meaning that is different from the meaning of the combination in nib.Among other creatures, each communicative signal appears to be a single fixed form that cannot be broken down into separate parts.Your dog may be able to produce woof ("I'm happy to see you").It does not seem to do so on the basis of a distinct level of production combining the separate elements of w+oo+f. If the dog was operating with the double level (i.e. duality), then we might expect to hear different combinations with different meanings, such as oowf ("I'm hungry") and foow ("I'm really bored").

- **Englishes :**World English is one language and Englishes are different variety of English like Austrian English, American English and South Asian English (Indian English, Pakistan English etc.)
- **Family tree model :**First attempt at depicting the relationships between languages. Has assumptions: The Regularity Hypothesis The Relatedness Hypothesis
- **Inflection :**Inflection deals with patterns of word structure that are determined by the role of words in sentences. For example, a pronoun like he has the forms he, him and his depending on whether it is subject, object or possessive in a given sentence.
- **Juncture :**The pauses or connections between words, phrases, and sentences.
- **Linguistics :**Linguistics is the scientific study of language.
- **Long vowels :**The "long" vowels are: • "a" as in "paper", • "e" as in "be", • "u" as in "human".
- **Morphology :**In linguistics, Morphology is the study of words, how they are formed, and their relationship to other words in the same language. It analyzes the structure of words and parts of words, such as stems, root words, prefixes, and suffixes.
- **Neolithic age :**"Neolithic" is likewise a convenient rather than scientific term. They possessed a superior kind of stone implement, and generally a higher culture. It was a dark race of slightly larger stature than the Paleolithic population.
- **Orthography :**An orthography is a set of conventions for writing a language. It includes norms of spelling, hyphenation, capitalization, word breaks, emphasis, and punctuation.
- **Phonology of a language :**Phonology is the study of how sounds are organized and used in natural languages. It is the study of different sounds and the way they come together to form speech and words - such as the comparison of the sounds of the two "p" sounds in "pop-up."
- **Pitch :**Pitch – how high or low a voice is when producing a sound
- **Renaissance :**Renaissance was a time of "revival of learning," records of Greek civilization became once more available. Latin and Greek were the key to the world's knowledge and were highly esteemed for poetry, oratory, and philosophy.
- **Reverse**
- **Loanwords :**Reverse Loanwords are words from other languages into English. It is a reverse adoption process in which words from languages are brought into English. Examples: Stop, sport, tennis, golf, weekend, jeans, bar, airport, hotel, etc., are among the most universally used in the world.
- **Short vowel :**Short vowel are: • "a" as in "cat", • "e" as in "red",
- **Standard English :**Standard English is whatever form of the English language is accepted (at any point in time, and in any particular country) as the national norm, encompassing grammar, vocabulary and spelling. It is a variety or dialect of English with no local or geographical base, which, by virtue of historical accident, has become the leading form of the language. Although there is nothing inherently superior about Standard English, it is the most widely understood and the most widely disseminated

variety of the language, and is generally accepted as having the highest prestige, and is the variety predominantly used by the powerful and influential. There is no such thing as a World Standard English, although British English and American English are the two most obvious contenders. The standard pronunciation or accent of British English became known during the 20th century as Received Pronunciation (also Queen's English, BBC English or Public School English), and standard American pronunciation is known as General or Mid-West American, but pronunciation is not an essential features of Standard English, and it may be spoken in variety of accents.

- **Stress :**Stress – how low or soft a word is spoken;
- **Synchronic approach :**The study of a language at a given point in time. A synchronic approach (from Greek s??- "together" and ?????? "time") considers a language at a moment in time without taking its history into account. The time studied may be either the present or a particular point in the past; synchronic analyses can also be made of dead languages, such as Latin.
- **Wave model :**The idea is that instead of having definite delineations between languages, there are "waves" of linguistic change which affect some languages but not others, and tend to spread out to other languages nearby. This is a necessary prerequisite for doing serious work on the diachronic development of a language.
- **World English :**World English is one language and Englishes are different variety of English like Austrian English, American English and South Asian English (Indian English, Pakistan English etc.)
- **Yo-he-ho" or social interaction source :**Another proposal "yo-he-ho" theory, the sounds of a person involved in physical effort, especially when that physical effort involved interaction= hums, grunts, groans. The appeal of this proposal= it places the development of human language in a social context. So, human sounds, however they were produced, must have had some principled use within social interaction. Apes and other primates also lived in social groups and used grunts and social calls, but they do not seem to have developed the capacity for speech.

ENG502 Glossary

- **Affective Meaning :**The emotive or affective component of the expression is referred to as its affective meaning. Social meaning and affective meaning together are sometimes called connotation.
- **Agent :**Agent is the semantic role of a person or thing who is the doer of an event.
- **Anaphora :**The use of a word referring back to a word used earlier in a text or conversation, to avoid repetition, for example the pronouns he, she, it, and they and the verb do.

- **Anaphoric Expression :**Anaphora can be defined as a subsequent reference to an already introduced entity.
- **Antonymy :**Two forms with opposite meanings are called antonyms.
- **Aphasia :**Aphasia is de?ned as an impairment of language function due to localized brain damage that leads to dif?culty in understanding and/or producing linguistic forms.
- **Applied Linguistics :**Applied linguistics is an interdisciplinary field of linguistics which identifies, investigates, and offers solutions to language-related real-life problems.
- **Arbitrariness :**In human language, there is no natural connection between the word and the object they make reference to. This characteristic of language is called arbitrariness. For example, the Arabic word 'kalab' meaning dog and the English word 'dog' have no relation to the word they refer to.
- **Benefactive :**The entity that benefits from the action or event denoted by the predicate.
- **Bilingualism :**Bilingualism: the ability of an individual or the members of a community to use two languages effectively.
- **Binaural :**It is binaural reception when somebody speaks. The listener knows where the speaker is. This is the characteristic which is in both human beings as well as animals.
- **Chronemics :**In communication, chronemics means the study of how time affects communication and includes how different time cycles affect our communication.
- **Coherence :**Coherence refers to the quality of being logical and consistent, e.g., 'This essay, on the whole, lacks coherence'.
- **Cohesion :**Cohesion is the grammatical and lexical linking within a text or sentence that holds a text together and gives it meaning.
- **Computational Linguistics :**Computational linguistics is the branch of linguistics in which the techniques of computer science are applied to the analysis and synthesis of language and speech.
- **Conceptual Meaning :**Conceptual meaning is the clear and logical definition of a word based on the structure and form of the word An example of conceptual meaning would be the word 'cat'.
- **Connotation :**Connotation represents the various social overtones, cultural implications, or emotional meanings associated with a sign.
- **Contrastive Linguistics :**Contrastive linguistics: a practice-oriented linguistic approach that seeks to describe the differences and similarities between a pair of languages.
- **Conversation :**Conversation is interactive communication between two or more people.
- **Conversation Analysis :**Conversation analysis (CA) is an approach to the study of social interaction, embracing both verbal and non-verbal conduct, in situations of everyday life.
- **Creole :**When a pidgin develops beyond its role as a trade or contact language and becomes the ?rst language of a social community, it is described as a creole.
- **Critical Discourse Analysis :**Critical Discourse Analysis (CDA) has roots in both Discourse Analysis (DA) and Critical Linguistics (CL). It is an interdisciplinary method

to investigating discourses and language within public institutions laid out by Norman Fairclough in his book "Language and Power".

- **Critical Social Theory :**Critical Social Theory (CST) provides a theoretical foundation for critical approaches to discourse analysis.
- **Cultural Transmission :**Language is acquired in a culture with other speakers and not from parental genes. This property of human language is cultural transmission wherein a language is passed on from one generation to the next within a cultural setting.
- **Deixis/Deictic expression :**A deictic expression (or deixis) is a word or phrase (such as this, that, these, those, now, then) that points to the time, place, or situation in which a speaker is speaking.
- **Denotation :**Denotation represents the explicit or referential meaning of a sign.
- **Derivational Morphemes :**In morphology, derivational morphemes show the "inner" layer of words and they are attached to the stem.
- **Dialect :**Dialect is a particular form of a language which is peculiar to a specific region or social group.
- **Diglossia :**A situation in which two distinct varieties of a language are spoken within the same speech community.
- **Discourse :**A unit of language which can be less or more than one sentence but has a meaning beyond the level of sentence.
- **Discourse Analysis :**Discourse Analysis (DA), or discourse studies, is a general term for a number of approaches to analyze written, vocal, or sign language use, or any significant semiotic event.
- **Discreteness :**The sounds used in language are meaningfully distinct, i.e., each sound in the language is treated as discrete, for example, / l/, /i:/, and /n/. We can join them to make a word 'lean' transcribed as / li:n / or if we change the order, we get another word 'kneel' transcribed as /ni:l/.
- **Displacement :**In linguistics, displacement is the capability of language to communicate about things that are not immediately present (spatially or temporally); i.e., things that are either not here or are not here now.
- **Duality :**Human language is organized at two levels or layers simultaneously. This property is called duality (or "double articulation").
- **Expension :**A sequence of element said to be expansion of another.
- **Experiencer :**When a noun phrase is used to designate an entity as the person who has a feeling, perception or state, it ?lls the semantic role of experiencer.
- **Flouting the Cooperative Principles :**Flouting of cooperative principles mean deliberation, violation or flouting of conversational principles.
- **Free Morpheme :**A free morpheme means a morpheme that can stand alone as a word. Free morphemes comprise of simple words such as doll and compound words such as keyboard.

- **Generative Grammar :**Generative grammar is a linguistic theory that regards grammar as a system of rules that generates exactly those combinations of words that form grammatical sentences in a given language.
- **Grammar :**A level of linguistics which is concerned with the manner in which words combine together structurally to form sentences. In this sense grammar is a descriptive phenomenon. It can also be used to refer to speakers' knowledge of how to produce well-formed sentences in which case it is an ability, it is speakers' competence in the generative sense.
- **Grimm's Law :**The observation that certain Indo-European consonants (mainly stops) undergo regular changes in the Germanic languages which are not seen in others such as Greek or Latin. Examples include p becoming f so that Latin pedem corresponds to English foot and German Fuss . The principle was set out by Jacob Grimm in his German grammar (2nd edition, 1822).
- **Haptics :**It is a form of nonverbal communication which refers to touch behaviors that convey meaning during interactions.
- **Homonyms :**One form (written or spoken) has two or more unrelated meanings.
- **Homophones :**Two or more different (written) forms have the same pronunciation, are described as homophones.
- **Hyponymy :**The meaning of one form is included in the meaning of another, the relationship is hyponymy.
- **Illocutionary Act :**An illocutionary act is a complete speech act, made in a typical utterance, that consists of. the delivery of the propositional content of the utterance (including references and a predicate), and. a particular illocutionary force, whereby the speaker. asserts.
- **Indirect Speech Act :**Indirect speech acts seems to be that actions such as requests, presented in an indirect way are generally considered to be more gentle or more polite in our society than direct speech acts.
- **Inference :**An inference is additional information used by the listener to create a connection between what is said and what must be meant.
- **Innate Predisposition :**It means there is an innate ability (capacity) in the human child to acquire language with which each newborn child is endowed.
- **Instrument :**The medium by which the action or event denoted by the predicate is carried out.
- **Invisible Meaning :**Pragmatics is the study of “invisible” meaning, or how we recognize what is meant even when it isn’t actually said or written.
- **Kinesics :**Kinesics is the study of the way in which certain body movements and gestures serve as a form of non-verbal communication.
- **Language Change :**Language change is variation over time in a language's phonological, morphological, semantic, syntactic, and other features.

- **Learnability :**In linguistics, learnability refers to the idea that language is teachable and learnable.
- **Lexeme :**A lexeme (pronunciation (help. ... It is a basic unit of meaning, and the headwords of a dictionary are all lexemes. Put more technically, a lexeme is an abstract unit of morphological analysis in linguistics, that roughly corresponds to a set of forms taken by a single word.
- **Lexical Meaning :**Lexical meaning refers to the meaning of words that belong to one of the four lexical word classes.
- **Lexicography :**The activity or occupation of compiling dictionaries is named as lexicography
- **Linguistic Context :**Linguistic context is how meaning is understood without relying on intent and assumptions.
- **Linguistics :**Linguistics is the scientific study of language.
- **Location :**A number of other semantic roles designate where an entity is in the description of an event. Where an entity is (on the table, in the room) ?lls the role of location.
- **Locative :**The specification of the place where the action or event denoted by the predicate is situated.
- **Locutionary Act :**In speech-act theory, a locutionary act is the act of making a meaningful utterance. Also known as a locution or an utterance act. The term locutionary act was introduced by British philosopher John L. Austin.
- **Metonymy :**Metonymy is a figure of speech in which a thing or concept is referred to by the name of something closely associated with that thing or concept.
- **Morphology :**In linguistics, Morphology is the study of words, how they are formed, and their relationship to other words in the same language. It analyzes the structure of words and parts of words, such as stems, root words, prefixes, and suffixes.
- **Multilingualism :**Multilingualism: ability to use multiple languages is known as multilingualism.
- **Neurolinguistics :**The study of the relationship between language and the brain is called neurolinguistics.
- **Onomatopoeia :**Onomatopoeia refers to a word that phonetically mimics or resembles the sound of the thing it describes. For example, the words we use to describe the noises that animals make are all onomatopoetic, such as a dog's "bark," a cat's "meow".
- **Overextension (acquisition process) :**The most common pattern is for the child to overextend the meaning of a word on the basis of similarities of shape, sound and size, and, to a lesser extent, movement and texture.
- **Overgeneralization (acquisition process) :**The acquisition of the plural marker is often accompanied by a process of overgeneralization in children. For example, -s to form plurals such as 'boys and girls', will talk about foots and mans.

- **Paralanguage :**In linguistics, paralanguage is a vocal element of nonverbal communication which is the vocalized but not verbal part of spoken message.
- **Perlocutionary Act :**A perlocutionary act is a speech act, as viewed at the level of its consequences, such as persuading, convincing, scaring, enlightening, inspiring, or otherwise affecting the listener.
- **Person Deixis :**Person deixis is deictic reference to the participant role of a referent, such as. the speaker; the addressee, and; referents which are neither speaker nor addressee.
- **Physical Context :**The physical context reflects the space around something and how that influences how you see it.
- **Pidgin :**A pidgin is a variety of a language that developed for some practical purpose, such as trading.
- **Politeness :**Linguistic politeness can be defined as the ways in which language is employed in conversation to show consideration for the feelings and desires of one's interlocutors, to create and uphold interpersonal relationships (so-called politic behavior), and to comply with the rules for what society or one's culture considers appropriate behavior.
- **Polydiglossia :**The coexistence of two or more languages, or distinct varieties of the same language, within a speech community.
- **Polysemy :**Two or more words with the same form and related are example of polysemy.
- **Pragmatics :**Pragmatics is the study of the practical aspects of human action and thought.It looks beyond the literal meaning of an utterance and considers how meaning is constructed focusing on implied meanings.
- **Presupposition :**What a speaker (or writer) assumes is true or known by a listener (or reader) can be described as a presupposition.
- **Productivity :**Productivity is one of the characteristics of human language. It refers to the quality of creativity or open endedness in human language which is missing in animal language.
- **Propositional Meaning :**Propositional meaning is the type of meaning that comes from the context within which the sentence is used.
- **Prototype :**The idea of "the characteristic instance" of a category is known as the prototype.
- **Proxemics :**In linguistics, proxemics means the study of human use of space and the effects that population density has on behavior, communication, and social interaction.
- **Psycholinguistics :**Psycholinguistics or psychology of language is the study of the psychological and neurobiological factors that enable humans to acquire, use, and understand language.
- **Recursion :**Recursive ("repeatable any number of times") rules have the capacity to be applied more than once in generating a structure.
- **Reference :**Words are used to refer to people, places and times.

- **Reflected Meaning :**The term reflected meaning refers to certain associations with another sense of the same expression, He took the drugs, Enjoy yourself.
- **Semantic Role :**Semantic role is the actual role a participant plays in some real or imagined situation, apart from the linguistic encoding of those situations.
- **Semantics :**Semantics is the branch of linguistics and logic concerned with meaning. The two main areas are logical semantics, concerned with matters such as sense and reference and presupposition and implication, and lexical semantics, concerned with the analysis of word meanings and relations between them.
- **Signified :**The signified is the concept, the meaning, the thing indicated by the signifier.
- **Signifier :**The form of a sign. The form might be a sound, a word, a photograph, a facial expression.
- **Slip of the Ear :**slip of the ear: a processing error in which one word or phrase is heard as another, as in hearing great ape when the utterance was "gray tape"
- **Slip of the Tongue :**Slip of the tongue: a speech error in which a sound or word is produced in the wrong place, as in black bloxes (instead of "black boxes")
- **Social Cultural Context :**Socio-cultural context refers to the idea that language, rather than existing in isolation, is closely linked to the culture and society in which it is used.
- **Sociolinguistics :**Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and society's effect on language.
- **Spatial Deixis :**Spatial deixis is expressed in place adverbials (e.g. left, behind, etc.) which indicate the speaker´s location during the speech event.
- **Speech Acts :**A speech act is an utterance that has performative function in language and communication.
- **Speech Community :**speech community: a group of people who share a set of norms and expectations regarding the use of language
- **Standard Language :**standard language: the variety of a language treated as the official language and used in public broadcasting, publishing and education
- **Stem :**A part of a word to which prefixes and/or suffixes can be added. It is normally unalterable, though some morphological processes, such as umlaut in German, may change it. It is usually used synonymously with root.
- **Stop :**stop: a consonant produced by stopping the airflow, then letting it go, also called "plosive" (e.g. the first and last sounds in cat)
- **Strategic Competence :**This is the ability to organize the message effectively and to compensate, via strategies, for any difficulties.
- **Stress :**The acoustic prominence of a syllable in a word. The physical correlates of stress can vary. Typically it involves the raising of the basic frequency and/or of volume matched by a prolongation of the syllable involved.

- **Suffix :**Any element attached to the right- hand side of a stem. Suffixation in one of the major operations in morphology and is undertaken to indicate grammatical categories as in stone : stone-s where the -s is a plural marker suffix.
- **Suprasegmental :**A reference to phenomena which do not belong to the sound segments of language but which typically are spread over several segments, e.g. intonation, stress, tempo, etc.
- **Syllable :**The most important structural unit in phonology. A syllable consists of a series of sounds which are grouped around a nucleus of acoustic prominence (usually a vowel).
- **Synonym :**A synonym is a word or phrase that means exactly or nearly the same as another word or phrase in the same language.
- **Syntax :**In linguistics, syntax is the set of rules, principles, and processes that govern the structure of sentences in a given language, usually including word order.
- **Temporal Deixis :**Temporal indexicals are expressed in time adverbials like "now, then, soon, lately, recently, ago, today, tomorrow, yesterday".
- **The Comparative Method :**The standard way of demonstrating the genetic relatedness of languages is called the comparative method.
- **The Maxim of Quality :**The maxim of quality, where one tries to be truthful, and does not give information that is false or that is not supported by evidence.
- **The Maxim of Relevance :**The Maxim of Relevance is one of the four conversational maxims of the Cooperative Principle. Grice proposes this maxim as an explanation for a certain kind of regularity in conversational behavior with respect to the relevance of information provided at each turn of a conversation.
- **The Prosodic Meaning :**Prosody is the study of the tune and rhythm of speech and how these features contribute to meaning.
- **The Wave Model :**In historical linguistics, the wave model or wave theory (German Wellentheorie) is a model of language change in which a new language feature (innovation) or a new combination of language features spreads from a central region of origin in continuously weakening concentric circles, similar to the waves created when a stone is thrown into a body of water.
- **Theme :**"The entity that is involved in or affected by the action," which is called the theme (or sometimes the "patient").
- **Time Deixis :**Time, or temporal, deixis concerns itself with the various times involved in and referred to in an utterance.
- **Traditional Grammar :**Traditional grammar is the description of the structure of phrases and sentences based on established categories used in the analysis of Latin and Greek.
- **Tree diagram :**Tree diagram is a diagram with branches showing the hierarchical organization of structures.
- **Turn :**In conversation, turn is the unit of talk by one speaker, ended by the beginning of the next speaker's unit of talk.

- **Turn-Taking :**The end of one speaker's turn and the beginning of the next's frequently latch on to each other with almost perfect precision and split-second timing.
- **Velar :**Velar is a consonant produced by raising the back of the tongue to the velum (e.g. the first and last sounds in geek).
- **Vernacular :**Vernacular is a social dialect with low prestige spoken by a lower-status group, with marked differences from the standard language.
- **Vowel :**Vowel: a sound produced through the vocal folds without constriction of the airflowin the mouth
- **Waveforms :**We utter the sounds in waveforms means. Therefore, the moment it is uttered from the mouth, the sound perpetuates as a waveform that expands from the point of origin (the mouth) in all directions.
- **Wernicke's Aphasia :**Wernicke's aphasia: a language disorder in which comprehension is typically slow while speech is fluent, but vague and missing content words
- **Wernicke's Area :**Wernicke's area: a part of the brain in the left hemisphere involved in language comprehension
- **Word Class :**A group of words which are similar in their grammatical characteristics: the kinds of inflections they take, their distribution in sentences and the relations they enter with other sets of words. Typically word classes are nouns, verbs, adjectives, adverbs, prepositions.

ENG503 Glossary

- **Accuracy :**The quality or state of being correct or precise
- **Acquisition :**The learning or developing of a skill, habit, or quality
- **Analogy :**A comparison of one thing with another thing that has similar features.
- **Anxiety :**The state of feeling nervous or worried that something bad is going to happen.
- **Approach :**A way of dealing with something: a way of doing or thinking about something.
- **Assessment :**The act of judging or deciding the amount, value, quality, or importance of something, or the judgment or decision that is made.
- **Assumption :**A belief or feeling that something is true or that something will happen, although there is no proof.
- **Bilingualism :**The use of at least two languages by an individual.
- **Borrowing :**A word, a phrase or an idea that somebody has taken from another language.
- **Coherence :**The situation in which all the parts of something fit together well.
- **Cohesion :**The grammatical and lexical linking within a text or sentence that holds a text together and gives it meaning.

- **Colonialism :**It is the practice by which a powerful country directly controls less powerful countries and uses their resources to increase its own power and wealth.
- **Competence :**The ability to do something well.
- **Concordances :**An alphabetical index of the principal words in a book or the works of an author with their immediate contexts.
- **Consonants :**A basic speech sound in which the breath is at least partly obstructed and which can be combined with a vowel to form a syllable.
- **Constituents :**A component part of something
- **Corpora :**A large or complete collection of writings
- **Criticism :**The act of expressing disapproval of somebody/something and opinions about their faults or bad qualities; a statement showing disapproval.
- **Culture :**The ideas, customs, and social behavior of a particular people or society.
- **Curriculum :**The subjects that are included in a course of study or taught in a school, college, etc.
- **Deductive :**Deductive reasoning is a logical process in which a conclusion drawn from a set of premises contains no more information than the premises taken collectively.
- **Descriptive :**It defines how language is actually used, without giving rules for how it should be used.
- **Dialect :**The form of a language that is spoken in one area with grammar, words and pronunciation that may be different from other forms of the same language.
- **Diglossia :**A situation in which two languages or two forms of a language are used under different conditions in a community.
- **Diphthong :**A sound in which one vowel sound glides towards another.
- **Discourse :**Formal and orderly and usually extended expression of thought on a subject. Mode of organizing knowledge, ideas, or experience that is rooted in language and its concrete contexts (such as history or institutions)
- **Diversity :**The condition of having or being composed of differing elements: variety; especially: the inclusion of different types of people (such as people of different races or cultures) in a group or organization.
- **Drilling :**It is a classroom technique used to practise new language. It involves the teacher modelling a word or a sentence and the learners repeating it.
- **Eliciting :**It describes a range of techniques which enable the teacher to get learners to provide information rather than giving it to them.
- **Evaluation :**The act of forming an opinion of the amount, value or quality of something after thinking about it carefully.
- **Extensive :**Having wide or considerable extent
- **Fluency :**The quality or condition of being fluent
- **Historical Linguistics :**Historical linguistics, also called diachronic linguistics, is the scientific study of language change over time. It is to reconstruct the pre-history of languages and to determine their relatedness, grouping them into language families.

- **Identity :**It is the qualities, beliefs, personality, looks and/or expressions that make a person (self-identity) or group (particular social category or social group).
- **Ideology :**A system of ideas and ideals, especially one which forms the basis of economic or political theory and policy. An ideology is a set of opinions or beliefs of a group or an individual.
- **Idiolect :**The way that a particular person uses language.
- **Implications :**A possible effect or result of an action or a decision.
- **Inductive :**It is a way to describe something that leads to something else, so when applied to
- **Intelligibility :**The fact of being able to be easily understood.
- **Intensive :**Concentrated on a single subject or into a short time; very thorough or vigorous
- **Interlanguage :**An interlanguage is an idiolect that has been developed by a learner of a second language which preserves some features of their first language, and can also overgeneralize some L2 writing and speaking rules.
- **Intonation :**The rise and fall of the voice in speaking, especially as this affects the meaning of what is being said.
- **Intrinsic :**Belonging to or part of the real nature of something/somebody.
- **Language :**The system of words or signs that people use to express thoughts and feelings to each other.
- **Language proficiency :**It is the ability of an individual to speak or perform in a language.
- **Lexicon :**The set of vocabulary that makes up a language.
- **Limitations :**The act or process of limiting or controlling somebody/something.
- **Lingua Franca :**A shared language of communication used between people whose main languages are different.
- **Linguistic Imperialism :**It is the imposition of one language on speakers of other languages.
- **Linguistics :**The scientific study of language and its structure, including the study of grammar, syntax, and phonetics. Specific branches of linguistics include sociolinguistics, dialectology, psycholinguistics, computational linguistics, comparative linguistics, and structural linguistics.
- **Metaphor :**A word or phrase used to describe somebody/something else, in a way that is different from its normal use, in order to show that the two things have the same qualities and to make the description more powerful.
- **Method :**A particular procedure for accomplishing or approaching something, especially a systematic or established one.
- **Motivation :**The act or process of giving someone a reason for doing something: the act or process of motivating someone.
- **Paradigm :**A typical example or pattern of something.

- **Pedagogy :**The method and practice of teaching, especially as an academic subject or theoretical concept.
- **Pragmatics :**It is a sub field of linguistics and semiotics that studies the ways in which context contributes to meaning. Pragmatics encompasses speech act theory, conversational implicature, talk in interaction and other approaches to language behavior in philosophy, sociology, linguistics and anthropology.
- **Prescriptive: :**It is about telling people how a language should be used, rather than describing how it is used.
- **Pronunciation :**The way in which a word is pronounced.
- **Psycholinguistics :**The study of the mental faculties involved in the perception, production, and acquisition of language.
- **Reference :**The use of a source of information in order to ascertain something
- **Reliability :**The quality of being able to be trusted to do what somebody wants or needs.
- **Rhythm :**A strong regular repeated pattern of sounds or movements.
- **Sociolect :**A variety of a language that the members of a particular social class or social group speak.
- **Sociolinguistics :**The study of language as it functions in society; the study of the interaction between linguistic and social variables.
- **Strategy :**A plan that is intended to achieve a particular purpose.
- **Syllabus :**An outline or other brief statement of the main points of a discourse, the subjects of a course of lectures, the contents of a curriculum.
- **Syntax :**The sequence in which words are put together to form sentences
- **Target language :**A language that a nonnative speaker is in the process of learning.
- **Technique :**A way of carrying out a particular task, especially the execution or performance of an artistic work or a scientific procedure.
- **Validity :**The state of being logical and true.
- **Vocabulary :**The body of words used in a particular language.
- **Vowels :**A speech sound which is produced by comparatively open configuration of the vocal tract, with vibration of the vocal cords but without audible friction, and which is a unit of the sound system of a language that forms the nucleus of a syllable

ENG504 Glossary

- **Acceptability :**The quality of being tolerated or allowed. In linguistics it refers to a characteristic of good test.

- **Access to Native Speakers :**The opportunity to interact with native speakers both within and outside of the classroom is a significant advantage. Native speakers are linguistic models and can provide appropriate feedback.
- **Acculturation :**Acculturation is the process of social, psychological, and cultural change that stems from blending between cultures.
- **Acquisition :**Acquisition is the 'subconscious' process identical to the process of first language learning.
- **Activity Theory :**It considers an entire work/activity system (including teams, organizations, etc.) beyond just one actor or user.
- **Affective Domain :**The affective domain (Krathwohl, Bloom, Masia, 1973) includes the manner in which we deal with things emotionally, such as feelings, values, appreciation, enthusiasms, motivations, and attitudes.
- **Age :**Second language acquisition is influenced by the age of the learner.
- **Approach :**An approach consists of a task hierarchy regarding when and how presentational and instructional activities are employed.
- **Assimilation :**A child modifies input from the environment so that s/he can easily retain it.**Audio-Lingual Method :**An approach to second language instruction based on Behaviorist learning theory that stresses memorization and pattern drills to attain mastery of the language.
- **Authentic Materials :**The materials created in the target language for a target language audience.
- **Autonomous :**Having the freedom to act independently.
- **Autonomous Induction Theory :**Autonomous Induction theory by Suzanne Carroll (2000) acknowledges the existence of UG as the initial state for language acquisition and also notices the language processing mechanisms such as parsers (instead of LAD) in the gradual development of inter-languages.
- **Behaviourism :**A psychological theory that all learning, whether verbal or non-verbal takes place through the establishment of habits.
- **Bilingual Education :**Schooling in which students receive instruction in two or more languages, usually their home language and a second language.
- **Categories :**Pre-defined taxonomies used to sort and group content into different sections.
- **Cognition :**In general, it seems that students with greater cognitive abilities (intelligence) will make the faster progress. Some linguists believe that regardless of cognitive abilities, there is a specific, innate language learning ability that is stronger in some students than in others.
- **Cognitive Domain :**The cognitive domain involves knowledge and the development of intellectual skills. This includes the recall or recognition of specific facts, procedural patterns, and concepts that serve in the development of intellectual abilities and skills.

- **Cognitivist :**A research approach that emphasizes how the human mind receives, processes, stores and retrieves information in learning and retrieving information.
- **Communication :**The act of exchanging thoughts, messages or information by speech, signs or writing.
- **Communicative Activities :**The activities include practice in which learners use the language to exchange previously unknown information with one another.
- **Communicative Competence :**The ability to use language in a variety of settings, taking into account relationships between speakers and differences in situations.
- **Communicative Language Teaching (CLT) :**Approach to second language teaching that focus on providing opportunities for student to use the language to interpret and express real-life messages.
- **Competence :**Competence is the abstract and hidden representation of language knowledge in our minds.
- **Comprehensible Input :**Second language input beyond learners' current second language competence is known as 'Comprehensible Input'.
- **Construct :**Meaningful interpretation of observed behaviour.
- **Content :**The depth and breadth of the discussion of a topic or theme.
- **Content-Based Instruction :**Teaching models that closely relate specific contents to second language teaching.
- **Context :**The circumstance or setting in which a person uses the language
- **Contrastive Analysis Hypothesis :**The expectation that learners will have less difficulty acquiring target language patterns that are similar to those of their first language than those that are different.
- **Cultural Differences :**Cultural differences are the various beliefs, behaviors, languages, practices and expressions considered unique to members of a specific ethnicity, race or national origin.
- **Culture and Status :**There is some evidence that students in situations where their own culture has a lower status than that of the culture in which they are learning the language make slower progress.
- **Cummunicative Language Teaching :**An approach to language teaching that emphasizes interaction as both the means and the ultimate goal of study.
- **Curriculum :**Language learning is less likely to take place if students are fully submersed into the mainstream program without any extra assistance or, conversely, not allowed to be part of the mainstream until they have reached a certain level of language proficiency.
- **Developmental Features :**Those aspects of the language which, according to Pienemann and his colleagues, developed in a particular sequence, regardless of input variation, learner motivation, or instructional intervention.
- **Dialect :**A particular form of a language which is peculiar to a specific region or social group.

- **Direct Method :**A system of teaching a foreign language using only that language and without emphasis on the study of grammar.
- **Ectenic learner :**Ectenic individuals want and need more conscious controlover the learning situation.
- **Enhanced Input :**Input that is altered in an effort to make some language features more salient to learners.
- **Error Analysis :**Error Analysis is the systematic investigation of second language learners' errors.
- **Experiences :**Learners who have acquired general knowledge and experience are in a stronger position to develop a new language than those who haven't. The student, for example, who has already lived in 3 different countries and been exposed to various languages and cultures has a stronger base for learning another language than the student who hasn't had such experiences.
- **Experimental Study :**Research designed to test a hypothesis about the impact of one or more very specific variables on another variable.
- **Extrinsic Motivation :**Extrinsic motivation occurs when we are motivated to perform a behavior or engage in an activity to earn a reward or avoid punishment. Examples of behaviors that are the result of extrinsic motivation include: •Studying because you want to get a good grade •Cleaning your room to avoid being reprimanded by your parents
- **Facilitation :**The action of facilitating something.
- **First Language or Native Language :**The language first learned. Many children learn more than one language from birth and may be said to have more than one 'first' language.
- **Foreign Language Learning :**This refers to the learning of a language, usually in a classroom setting, in a context where the target language is not widely used in the community (for example, learning French in China). This is sometimes contrasted with 'second language learning', where the language being learned is used in the community (for example, learning Italian in Florence).
- **Form-focused Instruction :**Instruction that draws attention to the forms and structures of the language within the context of communicative interaction. This may be done by giving metalinguistic information, simply highlighting the form in question, or by providing corrective feedback.
- **Fossilization :**Fossilization, or the cessation of learning, is recognized as a widespread phenomenon in second language acquisition
- **Function Words :**Words that are mainly used as linking or supporting words for nouns, verbs, adjectives and adverbs. For example, prepositions ('to', 'for', 'by') and articles ('a', 'the') are two types of function words.
- **Grammar Translation Method :**An approach to second language teaching characterized by the explicit teaching of grammar rules and the use of translation exercises.

- **Hypothesis :**A statement of a possible fact that can be tested through research.
- **Influencing Factors :**The agents that have power to create effect on something or someone externally or internally.
- **Inner Speech :**Inner speech is Vygotsky's term for the unvocalized self-talk that many adults use to control their own thought and behavior.
- **Input :**The language that the learners exposed to (either written or spoken) in the environment.
- **Input Enhancement :**The concept of input to the language learner is examined with reference to some current theorizing about language processing and the idea of modular systems of knowledge.
- **Instruction :**Clearly, some language teachers are better than others at providing appropriate and effective learning experiences for the students in their classrooms. Such students with better instructions will make faster progress.
- **Instrumental Motivation :**Motivation that is essentially practical, such as the need to learn the language in order to get a better job.
- **Integrative Motivation :**Motivation for second language learning that is based on a desire to know more about the culture and community of the target language group and even a desire to be more like members of that group.
- **Interlanguage :**The learners developing second language knowledge. It may have characteristics of the learners first language, characteristics of the second language, and some characteristics that seem to be very general and tend to occur in all or most interlanguage systems. Interlanguages are systematic, but they are also dynamic. They change as learners receive more input and revise their hypotheses about the second language.
- **Interlocutor :**A participant in a conversation
- **Internal Factors :**Internal factors are those that the individual language learner brings with him or her to the particular learning situation.
- **Intrinsic Motivation :**Intrinsic motivation involves engaging in a behavior because it is personally rewarding; essentially, performing an activity for its own sake rather than the desire for some external reward. Examples of actions that are the result of intrinsic motivation include: •Participating in a sport because you find the activity enjoyable •Playing a game because you find it exciting
- **Language :**Language is a complex communication system that is most evolved in the human beings.
- **Language Acquisition :**According to Krashen, acquisition represents 'unconscious' learning, which takes place when attention is focused on meaning rather than language form.
- **Language Awareness :**The explicit knowledge about language, conscious perception and sensitivity in language learning and language teaching and language use is termed as language awareness.

- **Language Learning :**In Stephen Krashen's terms, learning is described as a 'conscious' process that occurs from the learners objective is to learn about the language itself, rather than to understand messages conveyed through the language.
- **Language Transfer :**It is the transfer of linguistic features between languages in the speech repertoire of a bilingual or multilingual individual, whether from first to second, second to first or many other relationships.
- **Learning :**Learning is a conscious process. It is a "knowing about" language.
- **Linguistic :**Linguistics is the scientific study of language, and involves an analysis of language form, language meaning, and language in context
- **Modularity :**Modularity is the degree to which a system's components may be separated and recombined. The meaning of the word, however, can vary somewhat by context
- **Native Language Family :**Students who are learning a second language which is from the same language family as their first language have, in general, a much easier task than those who aren't. So, for example, a Dutch child will learn English more quickly than a Japanese child.
- **Native-like :**The ability to comprehend and produce a second language at a level of performance that is indistinguishable from that of a native speaker.
- **Nature :**The genes and hereditary factors that influence who we are—from our physical appearance to our personality characteristics.
- **Negative Evidence :**Negative evidence is an input that lets the learner know that a particular form is not acceptable to target language norms.
- **Nurture :**The environmental variables that impact who we are, including our early childhood experiences, how we were raised, our social relationships, and our surrounding culture.
- **Perceptual Mechanism :**Anticipation of what will happen, or what an object will be, based on a person's sensory information and the related schemata h/she possesses.
- **Performance :**Performance is the actual use of language.
- **Personality :**Introverted or anxious learners usually make slower progress, particularly in the development of oral skills. They are less likely to take advantage of opportunities to speak, or to seek out such opportunities. More outgoing students will not worry about the inevitability of making mistakes. They will take risks, and thus will give themselves much more practice.
- **Perspective :**A particular attitude towards or way of regarding something; a point of view.
- **Private Speech :**The language we use when we are talking to ourselves, not expecting anyone to hear or respond.
- **Processing Instruction :**An approach to instruction in which learners are given explicit information about the language feature to be learned and their practice activities involve the comprehension (not production) of sentences or texts that cannot be understood without a focus on the language itself.

- **Property Theory :**Property theory is concerned with modelling the nature of language system that is to be acquired.
- **Recasts :**A recast is a technique used in language teaching to correct learners' errors in such a way that communication is not obstructed. To recast an error, an interlocutor will repeat the error back to the learner in a corrected form.
- **Register :**A style or wave using language that is typical of or appropriate for the particular setting.
- **Scaffolding :**In education, scaffolding refers to a variety of instructional techniques used to move students progressively toward stronger understanding and, ultimately, greater independence in the learning process.
- **Second Language :**Any language other than the native language is known as Second language.
- **Second Language Acquisition :**Second-language acquisition (SLA), second-language learning, or L2 acquisition, is the process by which people learn a second language.
- **Self-efficacy :**The belief in one's capabilities to achieve a goal or an outcome.
- **Social Psychological :**Social psychology is the study of how people's thoughts, feelings, and behaviors are influenced by the actual, imagined, or implied presence of others. In this definition, scientific refers to the empirical investigation using the scientific method
- **Socio-cultural :**combining social and cultural factors.
- **Sociolinguistic :**Sociolinguistics is the study of the relationship between language and society.
- **Standard Variety :**The variety of a given language that is typically used in formal writing and formal public speaking (including broadcasting).
- **Stephen Krashen's Theory :**•Language acquisition does not require extensive use of conscious grammatical rules, and does not require tedious drill. •Acquisition requires meaningful interactions in the target language - natural communication - in which speakers are concerned not with the form of their utterances but with the messages they are conveying and understanding.
- **Synoptic Learner :**These learners might not necessarily have conscious control over their own learning processes.
- **Target Language :**The language being learned, whether it is a first language or a second (or third or fourth) language.
- **Task-based Instruction :**Instruction in which classroom activities are 'tasks' similar to those learners might engage in outside the second or foreign language classroom.
- **Transition Theory :**Transition theory is concerned with the developmental processes of language acquisition.
- **Universal Grammar (UG) :**Innate linguistic knowledge which, it is hypothesized, consists of a set of principles common to all languages.
- **Variability :**Lack of consistency or fixed pattern; liability to vary or change. "a great deal of variability in quality"

- **Zone of Proximal Development :**The metaphorical 'place' in which a learner is capable of a higher level of performance because there is support from interaction with an interlocutor.

ENG505 Glossary

- **Acculturation :**The process of adapting to a new culture. This involves understanding different systems of thought, beliefs, emotions, and communication systems. Acculturation is an important concept for understanding SLA, since successful learning is more likely when learners succeed in acculturating.
- **Accuracy :**The use of correct forms of grammar, vocabulary, spelling and pronunciation. In an accuracy activity, teachers and learners typically focus on using and producing language correctly.
- **Acquisition :**Language acquisition is the process by which humans acquire the capacity to perceive and comprehend language, as well as to produce and use words and sentences to communicate.
- **Action research :**Corey (1953) defined action research as the process through which practitioners study their own practice to solve their personal practical problems.
- **Activity-based learning :**A way of learning by doing activities. The rules of language used in the activity are looked at either after the activity or not at all.
- **Affective Filter :**Affective Filter is the term Stephen Krashen has used to refer to the complex of negative emotional and motivational factors that may interfere with the reception and processing of comprehensible input. Such factors include: anxiety, self-consciousness, boredom, annoyance, alienation, and so forth.
- **Affective needs :**They are the needs of a learner that relate to expression of his or her feelings and/or emotions. They impact on aspects such as motivation to learn a language, learners' willingness to engage in learning activities etc. These include the need to feel at ease, the need to express one's own ideas and emotions, the need for self-fulfillment, etc.
- **Aids :**Aids are the things that a teacher uses in a class, e.g. handouts, pictures, flashcards. When teachers plan lessons they think about what aids they will need. See also visual aid. Aids to teaching include (a) Visual: Blackboard, whiteboard, overhead projector, posters, wall charts, flip-charts, maps, plans, flashcards, word cards, and puppets. (b) Electronic: Tape recorder, TV or video player, computer, CD Rom, language laboratory.
- **Aim :**What the teacher wants to achieve in the lesson or in the course. The main aim is the most important aim, e.g. the teacher's main aim in a lesson could be to teach the present perfect or develop listening skills. A stage aim is the aim or purpose of a stage, step or short section of a lesson, e.g. 'to provide controlled practice of the present perfect

or to develop listening for gist'. A subsidiary aim is the secondary focus of the lesson, less important than the main aim. It could be the language or skills learners must be able to use in order to achieve the main aim of the lesson or a skill or language area which is practiced while focusing on the main aim. A personal aim is what the teacher would like to improve in his/her teaching, e.g. 'to reduce the time I spend writing on the whiteboard'.

- **Approach :**It is a theory about the nature of language and how languages are learned. It is usually manifested through sets of principles which guide the choice of teaching procedures. Examples are 'the communicative approach' and 'task-based learning'.
- **Arbitrary symbols :**One of the central 'design features' of human language is that the relationship between the sound of a word and its meaning is arbitrary [1,2]; given the sound of an unknown word, it is not possible to infer its meaning.
- **Assessment :**It is normally used as a general term to refer to various types of testing or evaluation. It is discovering, judging, testing or forming an opinion on learners' ability, proficiency or progress either formally or informally. Continuous assessment A type of testing which is different from a final examination. Some or all of the work that learners do during a course is considered by the teacher on a regular basis and contributes to the final grade given to learners. It may also include regular monitoring of classroom performance and contribution.
- **Behaviorism :**Behaviorism (or behaviourism) is a systematic approach to understanding the behavior of humans and other animals. It assumes that all behaviors are either reflexes produced by a response to certain stimuli in the environment, or a consequence of that individual's history, including especially reinforcement and punishment, together with the individual's current motivational state and controlling stimuli.
- **Behaviorist Approach :**Key Features of Learning (Behaviorist Approach) Learning is entirely a product of experiences Learning is controlled by the conditions under which it takes place. Variations in learning do exist. Language learning is practice based. Imitation, repetition, reinforcement and retention have significant role in language learning.
- **Body language :**Body language is a type of non-verbal communication in which physical behavior, as opposed to words, are used to express or convey information.
- **Brainstorming :**Generating lots of ideas from many individuals
- **Brian Based Learning :**Brain-based learning refers to teaching methods, lesson designs, and school programs that are based on the latest scientific research about how the brain learns, including such factors as cognitive development—how students learn differently as they age, grow, and mature socially, emotionally, and cognitively.
- **Cognitivism :**In psychology, cognitivism is a theoretical framework for understanding the mind that gained credence in the 1950s. The movement was a response to behaviorism, which cognitivists said neglected to explain cognition.

- **Competence :**Linguistic competence is the system of linguistic knowledge possessed by native speakers of a language. It is distinguished from linguistic performance, which is the way a language system is used in communication.
- **Constructivism :**Constructivism is a philosophical viewpoint about the nature of knowledge. Specifically, it represents an ontological stance.
- **Controlled Techniques :**Controlled Techniques: warm up, setting, organizational, content explanation, role-play demonstration, reading aloud, question-answer, display, drill, translation, dictation, copying, identification, review testing
- **Core Grammar :**Core-grammar is that part of the relatively stable (steady) state of the language faculty (i.e. of the adult I-language) that results from the setting of parameters in UG (the initial state of the language faculty [Chomsky, Noam A. 1986. Knowledge of language: its nature, origin and use. Praeger, New York.]
- **Corrective Feedback :**Visual, auditory, or tactile indications that the student stated the incorrect response. This type of feedback supplies the correct response, re-teaches skills, and re-tests student learning. It also includes some types of encouragement, such as "Try again!"
- **Critical thinking :**The ability to analyze information.
- **Culture :**Culture is the social behavior and norms found in human societies. Culture is considered a central concept in anthropology, encompassing the range of phenomena that are transmitted through social learning in human societies.
- **Deductive Learning :**Starts by giving learners rules, then examples and then practice. It is teacher-centered
- **Descriptive Adequacy :**Descriptive adequacy is a quality measure for the evaluation of linguistic theories. A theory attains a higher level of descriptive adequacy if it can handle more natural language data from more languages. Descriptive Adequacy (to characterize what human languages are like; according to Chomsky, it is characterizing the possible human grammars)
- **Edward Anthony's Framework of Language :**Edward Anthony proposed three-level framework (1965) based on approach, methods and techniques. According to him, "the arrangement is hierarchical. The organizational key is that techniques carry out a method which is consistent with an approach." He defines approach, method and technique respectively as follows: Approach: A set of principles or ideas about the nature of language learning. An approach is axiomatic. Method: an overall plan for the orderly presentation of language material. Technique: A particular trick, stratagem, or contrivance.
- **EFL :**A traditional term for the use or study of the English language by non-native speakers in countries where English is generally not a local medium of communication.
- **ESL :**English as a Second Language (ESL or TESL) is a traditional term for the use or study of the English language by non-native speakers in an English-speaking environment. That environment may be a country in which English is the mother tongue

(e.g., Australia, the U.S.) or one in which English has an established role (e.g., India, Nigeria). Also known as English for speakers of other languages.

- **ESP :**English for Specific Purposes (ESP) is a learner-centered approach to teaching English as an additional language, which focuses on developing communicative competence in a specific discipline such as academics, accounting, agrology, business, IT, teaching, and engineering.
- **Evaluation :**It involves making qualitative judgments, often subjective, about various aspects of language performance. Other uses of the term are: • materials' evaluation • evaluation of teaching • evaluation of learning etc. It is a method of determining if students learned what they were taught. It is usually conducted at the end of a lesson.
- **Explanatory Adequacy :**Explain why they (the human languages) are that way.
- **Explicit Learning :**Explicit Learning: Conscious awareness of a learner's modifying of his/her knowledge base.
- **Extrinsic motivation :**Extrinsic motivation is fueled by the anticipation of reward from outside.
- **Foreign Language :**English as a Foreign Language – English language programs in countries where English is not the common or official language. It is used in American university programs where international students study English although the use of the word "foreign" is now avoided in some schools because of its xenophobic connotations.
- **Free Techniques :**Free Techniques: Role play, Games, Drama, Simulation, Report, Problem solving, Interview, Discussion
- **Imitation :**It means a child learns a language while listening to the adults and other people in society and thus imitates (copy) what they say. In this way, the child eventually learns the whole language.
- **Implicit Learning :**Implicit Learning: Change in the learner's knowledge base but outside his/her conscious introspection.
- **Individual Learning Differences :**Individual Differences: There are a variety of individual differences that must be of concern to classroom teachers. Some of the most prominent are academic ability (or intelligence), achievement level, gender, learning style, and ethnicity and culture.
- **Inductive learning :**Learning to apply the rules of a language by experiencing the language in use, rather than by having the rules explained or by consciously deducing the rules
- **Inductive Thinking :**Going from the specific to the general. See also deductive thinking.
- **Inferencing :**This is the means by which the learner forms hypotheses, through attending to input, or using the situational context to interpret the input.
- **Innate :**Chomsky to explain an innate psychological capacity for language acquisition; mentalist theories of language acquisition emphasize the importance of the innate capacity of the language learner at the expense of environmental factors. Each learner is

credited with a LAD which directs the process of acquisition. This device contains information about the possible form that the grammar of any language can take.

- **Integrated Skills :**An integrated skills lesson combines work on more than one language skill. For example, reading and then writing or listening and speaking.
- **Intelligence :**The ability to use knowledge
- **Interference :**Interference happens when the learner's mother tongue affects performance in the target language, especially in pronunciation, lexis or grammar. For example, a learner may make a grammatical mistake because they apply the same grammatical pattern as they use in their mother tongue to what they want to say in the target language, but the L1 grammatical pattern is not appropriate in L2.
- **John Schumann's Stage 1 of culture acquisition :**Stage 1-is a period of excitement and euphoria over the newness of the surroundings.
- **L1 :**L1 stands for first language - i.e the language that a speaker acquired naturally as a child. This is also often referred to as the speaker's mother tongue.
- **L2 :**L1 stands for first language - i.e the language that a speaker acquired naturally as a child. ... L2 or second language = a language which the person acquires/learns for use within the community in which they are living.
- **LAD :**Language acquisition device. Holds the fundamental rules for language. Advocates that language is fundamentally similar across all humanity. Enables a child not to commit error one expects.
- **LAD (Language acquisition device) :**A term coined by Noam Chomsky to explain an innate psychological capacity for language acquisition; mentalist theories of language acquisition emphasize the importance of the innate capacity of the language learner at the expense of environmental factors. Each learner is credited with a LAD which directs the process of acquisition. This device contains information about the possible form that the grammar of any language can take.
- **Language Chunks :**In studies of language acquisition, the term chunk refers to several words that are customarily used together in a fixed expression, such as "in my opinion," or "to cut a long story short." Also, known as language chunks, lexical chunks, lexical bundles, lexical phrases, and collocations.
- **Language proficiency :**It is what a learner can do and/or how well he/she can perform using language, given an identified and defined purpose. Language proficiency is often measured with reference to a scale of levels. It is the level of competence at which an individual is able to use language for both basic communicative tasks and academic purposes.
- **Language Universals :**It means the human languages are essentially identical and acquired in a similar manner. All languages share certain properties e.g. all languages have consonants and vowels.
- **Language Use :**Activities which involve the production of language in order to communicate. The purpose of the activity might be predetermined but the language

which is used is determined by the learners. Thus, getting a new class of learners to walk round and introduce themselves to each other would be a language use activity, and so would be getting them to complete a story.

- **Language Variety :**Variations of a language used by particular groups of people, includes regional dialects characterized by distinct vocabularies, speech patterns, grammatical features, and so forth; may also vary by social group (sociolect) or idiosyncratically for a particular individual (idiolect).
- **Langue :**The internal system of language within in a person is called langue.
- **Law of Effect :**A behavior that is followed by a pleasant consequence is likely to be repeated, and any behavior followed by unpleasant consequences is likely to be stopped learning. "The connection of a certain act with a certain situation and resultant pleasure and the main purpose of the study of the animal mind are to learn the development of mental life down through the phylum, to trace in particular the origin of human faculty."
- **Learner autonomy :**It is the capacity learners have to take charge of their own learning. This implies choice of aims, content, approaches and/or forms of evaluation based on reflection related to individual needs and interests.
- **Learner characteristics :**The typical things about a learner or learners that influence their learning, e.g. age, L1, past learning experience, learning style.
- **Learner feedback :**It is an account of progress / performance given to learners by teachers or peers to enable them to reflect on, analyze and evaluate what they have or have not achieved. It may also refer to what learners tell those who are teaching them and/or monitoring their progress, how well they, the learners, believe they are performing.
- **Learner strategy :**They are the behaviours or actions that learners engage in, in order to learn or use the L2. They are generally considered to be conscious. See also cognitive and meta-cognitive strategies.
- **Learner training :**The use of activities to help learners understand how they learn and help them to become autonomous, independent learners.
- **Learner-centered :**When the learners are at the center of the activities and have the chance to work together, make choices and think for themselves in a lesson.
- **Learners' Preferences :**Learners learn a second language in many ways. Each learner prefers different learning styles and techniques. S/he has a mix of learning styles but may find that s/he has a dominant style of learning. It means that learners receive information through their senses and prefer some senses to others in specific situations. Usually, they learn more effectively when they learn through their own initiatives. When their learning styles are matched with appropriate teaching styles, their motivation and achievement increase and are enhanced. Thus, researchers and educators try to discover their learners' style preferences so that they can help them learn in accordance with their own preferred learning styles.

- **Learners' attitudes :**Attitude is usually defined as a disposition or tendency to respond positively or negatively towards a certain thing such as an idea, object, person, or situation. Students have positive or negative attitudes towards the language they want to learn or the people who speak it.
- **Learning :**It is the acquisition of knowledge or skills through study, experience, or being taught.
- **Learning by doing :**A way of learning by doing activities. The rules of language used in the activity are looked at either after the activity or not at all.
- **Learning by using :**Learning acquired by repeated use of tools or facilities, but without instruction.
- **Linguistic Input :**A major debate in understanding language acquisition is how these capacities are picked up by infants from the linguistic input. Input in the linguistic context is defined as "All words, contexts, and other forms of language to which a learner is exposed, relative to acquired proficiency in first or second languages".
- **Linguistic knowledge :**Linguistic competence is the system of linguistic knowledge possessed by native speakers of a language. It is distinguished from linguistic performance, which is the way a language system is used in communication.
- **Mediation Theory :**Charles Osgood (1953,1957)claims that the linguistic stimulus (a word or sentence) elicits a "mediating" response that is self-stimulating Self-stimulating refers to "Representational mediation process"
- **Mentalist Approach :**Presence of Language Acquisition Device (LAD) as an inherited ability. Children appear to be 'hard-wired' to acquire the grammar. Lacks evidence of grammatical errors in children. A child would notice if an ungrammatical sentence is uttered. Generates awareness of what is grammatical or ungrammatical
- **Meta-cognition :**Meta-cognition is "cognition about cognition", "thinking about thinking", "knowing about knowing", becoming "aware of one's awareness" and higher-order thinking skills. The term comes from the root word Meta, meaning "beyond".
- **Method :**It is a particular procedure for accomplishing or approaching something, especially a systematic or established one.
- **Mother tongue :**often referred to as the mother tongue, is normally the language acquired by the learner as his/her first language and usually (though not always) spoken in the learner's home. It can also be referred to as a learner's L1 (first language). It is sometimes used as a synonym for first language, primary language, or native language. Thus, it also refers to language(s) spoken in the home by significant others (e.g., family members, caregivers) who reside in the child's home.
- **Motivation :**Motivation is the thoughts and feelings which make us want to do something and help us continue doing it.
- **Multiple Intelligence- MI :**A theory of intelligence that characterizes human intelligence as having multiple dimensions that must be acknowledged and developed in education.

The theory of MI is based on the work of the psychologist Gardner who posits 8 intelligences.

- **Native Language :**Primary or first language spoken by an individual. See L1.
- **Native Speaker :**Someone who has spoken a particular language since they were a baby, rather than having learnt it as a child or adult. See L1/L2 and mother tongue.
- **Nativism :**Nativist theories argue that humans are pre-programmed with the innate ability to develop language and Noam Chomsky, the main theorist associated with the nativist perspective, developed the idea of the Language Acquisition Device (LAD).
- **Nature versus Nurture :**Plato's Theory: In the nature versus nurture debate, Plato tended to side with nature, believing that knowledge was innate. Noam Chomsky's 1986 "Knowledge of Language' begins with informal characterization of 'Plato's Problem: The problem of explaining how we can know so much given so little evidence." Descartes's Philosophy: Like Plato, French philosopher Descartes believed that language acquisition was a simple and easy process and reinforced the innateness of language as it reflected the general rationality of human beings. It reinforces the theory of Nativisim - some aspects of linguistic knowledge are innate, meaning they are present at birth. John Locke's Tabula Rasa or blank state: It refers to the idea that all knowledge comes from outside ourselves through sensory experience rather than through innate knowledge recommends practical learning to prepare people to manage their social, economic, and political affairs efficiently. Ancient philosophy of learning was more concerned with knowledge and experience.
- **Nature vs Nurture :**One of the oldest arguments in the history of psychology is the Nature vs Nurture debate. Each of these sides have good points that it's really hard to decide whether a person's development is predisposed in his DNA (Nature), or a majority of it is influenced by this life experiences and his environment (Nurture).
- **Need analysis :**Needs is actually an umbrella term that embraces many aspects, incorporating learners' goals and backgrounds, their language proficiencies, their reasons for taking the course, their teaching and learning preferences, and the situations they will need to communicate in.
- **Oral skills :**Oral skills include the ability to understand and engage in a discipline's discourses and rhetorical situations by delivering formal oral presentations or performances and to express and interpret ideas—both their own and those of others—in clear oral presentations or performances.
- **Parole :**The actual linguistic behaviour or performance of individuals, in contrast to the linguistic system of a community.
- **Pavlovian Conditioning :**Key Features of Pavlovian Conditioning: Stimulus Response Unconditioned Stimulus Conditioned Stimulus Conditioned Response Extinction Spontaneous Recovery Generalization Discrimination
- **Performance :**The ability to effectively use new information in a productive manner.

- **Productive Activities :**Productive Activities are designed for the development of the productive skills.
- **Receptive Activities :**Receptive Activities are designed to develop the receptive skills.
- **Repetition :**To say something again, often for practice. This is often done in drills. In language learning, repetition makes the child learn a language.
- **Response (n.), respond (v.) :**A reply or reaction to communication such as a laugh, a smile, saying something. Teachers and learners may respond to each other in writing, speech or in the form of a facial expression.
- **Scaffolding :**A term originally used to refer to teacher talk that supports pupils in carrying out activities and helps them to solve problems. Examples include simplifying tasks by breaking them down into smaller steps; keeping pupils focused on completing the task by reminding them of what the goal is; showing other ways of doing tasks. Scaffolding also includes support strategies for writing and speaking, examples of which are the use of substitution tables and language frames. Scaffolding is temporary support which is gradually taken away so that learners can eventually work without it.
- **Second Language/L2 :**The term is used to refer to a language which is not a mother tongue but which is used for certain communicative functions in a society. Thus Ukrainian is a second language in Transcarpathia for Hungarians.
- **Simulation :**An activity in which students are given real-life problem-solving situations. The emphasis is on students' decision-making abilities.
- **Speech Acts :**Speech Acts are the utterances which fulfill certain actions of what is said by people in the course of interpersonal communication.
- **Speech community :**A speech community is a group of people who share a set of linguistic norms and expectations with regard to how their language should be used. Exactly how to define speech community is debated in the literature.
- **Stimulus :**An event that causes something else to happen or take place
- **Strategies :**They are seen as a hinge between a learner’s resources (competences) and what he/she can do with them (communicative activities)’.
- **Tabula Rasa :**Tabula rasa refers to the epistemological idea that individuals are born without built-in mental content and that therefore all knowledge comes from experience or perception.
- **Target language :**The language which is the focus of the lesson or a part of the lesson. It could be grammar, lexis, functions or pronunciation. 2. The language being studied (often called the L2). This is the language that the learner is attempting to learn.
- **Target language culture :**The traditions and culture of the country whose language is being studied.
- **Teacher-centered :**When the teacher is seen as the source of all knowledge in the learning process and acts as the provider of knowledge rather than making use of the knowledge and experience of the students to guide the learning process.

- **Teaching approaches :**A teaching method comprises the principles and methods used by teachers to enable student learning. These strategies are determined partly on subject matter to be taught and partly by the nature of the learner.
- **Technique :**A technique is a specific classroom device or activity, [such as a role-play] that is consistent with a method and therefore in harmony with an approach. Some techniques are used in more than one method, e.g. modeling & repetition.
- **Universal Grammar :**Universal Grammar is usually defined as the "system of categories, mechanisms and constraints shared by all human languages and considered to be innate".

ENG506 Glossary

- ✓ **Acculturation :**The process by which a human being acquires the culture of a particular society from infancy
- ✓ **Code Mixing :**Code-mixing is the mixing of two or more languages or language varieties in speech. Some scholars use the terms "code-mixing" and "code-switching" interchangeably, especially in studies of syntax, morphology, and other formal aspects of language.
- ✓ **Code Switching :**The practice of alternating between two or more languages or varieties of language in conversation
- ✓ **Colonialism :**The policy or practice of acquiring full or partial political control over another country, occupying it with settlers, and exploiting it economically
- ✓ **Communicative Competence :**Communicative competence is a term in linguistics which refers to a language user's grammatical knowledge of syntax, morphology, phonology and the like, as well as social knowledge about how and when to use utterances appropriately.
- ✓ **Complacence :**A feeling of smug or uncritical satisfaction with oneself or one's achievements
- ✓ **Contact Literature :**The literature written in distinctive varieties of English is called contact literature.
- ✓ **Corpus Analysis :**Qualitative corpus analysis is a methodology for pursuing in-depth investigations of linguistic phenomena, as grounded in the context of authentic, communicative situations that are digitally stored as language corpora and made available for access, retrieval, and analysis via computer.
- ✓ **Creoles :**A creole is a language that has developed from a mixture of different languages and has become the main language in a particular place.

- ✓ **Creolisation :**Creolisation is the process in which Creole cultures emerge in the New World. As a result of colonization there was a mixture among people of Indigenous American, West African and European descent, which came to be understood as Creolisation.
- ✓ **Descriptivism :**The doctrine that the meanings of ethical or aesthetic terms and statements are purely descriptive rather than prescriptive, evaluative, or emotive
- ✓ **Discourse :**Discourse refers to a unit of language longer than a single sentence.
- ✓ **Foreign Language :**A foreign language is a language originally from another country. It is also a language not spoken in the native country of the person referred to, i.e., an English speaker living in Spain can say that Spanish is a foreign language to him or her.
- ✓ **Globalisation :**This is a process of interaction and integration among the people, companies, and governments of different nations.
- ✓ **Institutionalization :**The official recognition and acceptance of a language is termed as institutionalization
- ✓ **Interlanguage :**A language or form of language having features of two others, typically a pidgin or a version produced by a foreign learner
- ✓ **International Language :**Sometimes called universal language, a language intended to be used by people of different linguistic background to facilitate communication among them and to reduce the misunderstandings and antagonisms caused by language differences. An international language is usually intended not to supplant existing mother tongue but to play a secondary or auxiliary role as it furthers international communication.
- ✓ **Lexical :**Relating to the words or vocabulary of a language
- ✓ **Lexicon :**A lexicon is the knowledge that a native speaker has about a language.
- ✓ **Lingua Franca :**A language that is adopted as a common language between speakers whose native languages are different
- ✓ **Linguicism :**Kangas defined linguicism as the "ideologies and structures which are used to legitimate, effectuate, and reproduce unequal division of power and resources (both material and non-material) between groups which are defined on the basis of language".
- ✓ **Linguistic Diversity :**It is a way to talk about varied types of traits including language family, grammar, and vocabulary.
- ✓ **Linguistic Imperialism :**Linguistic imperialism is the imposition of one language on speakers of other languages. It also knows as linguistic nationalism, linguistic dominance, and language imperialism.
- ✓ **Monogenesis :**The hypothetical origination of language or of a surname from a single source at a particular place and time
- ✓ **Morphology :**Morphology is the study of words, how they are formed, and their relationship to other words in the same language.
- ✓ **Multilingual :**A person with an ability to speak more than two languages

- ✓ **Native Language :**A first language, native language or mother/father tongue (also known as arterial language or L1) is a language that a person has been exposed to from birth or within the critical period.
- ✓ **Nativization :**Nativization is the process whereby a language gains native speakers. This happens necessarily where a second language used by adult parents becomes the native language of their children.
- ✓ **Phonology :**The system of contrastive relationships among the speech sounds that constitute the fundamental components of a language or the study of phonological relationships within a language or between different languages
- ✓ **Pidginisation :**Pidginisation is a linguistic process that occurs when people who do not speak the same language come into contact. It involves the simplification of the contacting language and the exploitation of linguistic common denominators.
- ✓ **Pidgins :**A grammatically simplified form of a language, typically English, Dutch, or Portuguese, some elements of which are taken from local languages, used for communication between people not sharing a common language
- ✓ **Polygenesis :**The hypothetical origination of language or of a surname from a number of independent sources in different places at different times
- ✓ **Prescriptivism :**Prescriptivism is the attitude or belief that one variety of a language is superior to others and should be promoted as such. It also knows as linguistic prescriptivism and purism. A key aspect of traditional grammar, prescriptivism is generally characterized by a concern for "good," "proper," or "correct" usage.
- ✓ **Relexification :**In linguistics, relexification is a mechanism of language change by which one language changes much or all of its lexicon, including basic vocabulary, with the lexicon of another language, without drastically changing the relexified language's grammar.
- ✓ **Second Language :**A person's second language or L2 is a language that is not the native language of the speaker, but that is used in the locale of that person. In contrast, a foreign language is a language that is learned in an area where that language is not generally spoken by the community as a whole.
- ✓ **World Englishes :**World Englishes is a term for emerging localized or indigenized varieties of English, especially varieties that have developed in territories influenced by the United Kingdom or the United States.
