

Edu101 Final Term Imp Question Answer by Ac 03222254114

Q1. What difference b/w accommodation and modification?

Accommodations are used when the student is expected to learn the same curricular content. But the student may be taught in a different way or need changes in the environment.

- Modifications are used when the student is expected to learn less or different curricular content. This could require the modification of assignments, tests, worksheets and other materials in classroom.

Q2. What is inclusive education?

Inclusive education

- When every child is welcomed and valued regardless of ability or disability.

Inclusive education is an attitude

- It means the doors to school, classroom and school activities are open to every child.

- The focus is on giving every child the help he/she need to learn.

Inclusive education

- Physical therapy

- Curriculum adaptation

- Communication board

- Behaviour plan

- Environmental accommodation

Q3. What is the plan for Human rights education?

Topic: 235 – Plan for Action of the World Program for Human Rights Education (United Nations, New York) 2005

- Human rights education can be defined as education, training and information aiming at building a universal culture of human rights through the sharing of knowledge, imparting of skills and moulding of attitudes directed to:

- a) The strengthening of respect for human rights and fundamental freedoms
- b) The full development of human personality and the sense of its dignity.
- c) The promotion of understanding, tolerance, equality and friendship among all nations, indigenous peoples and racial, national, ethnic, religious and linguistic groups.
- d) The building and maintenance of peace.
- e) The enabling of all persons to participate effectively in a free and democratic society governed by the rule of law.
- f) The promotion of people-centered sustainable development and social justice.

Q4. What is the focus in education in Ghaznavi dynasty?

Topic: 166 – Ghaznavi Dynasty (0970 - 1122)

- About 400 scholars, poets, scientists, and geographers were a glory of the court of Mahmood Ghaznavi.
- During this time architecture, art and literature flourished.
- What the Muslims provided was various areas of education so that young people could choose the area they were interested in and excel at it. That is seen as a good sign/vision of rulers who did not limit/force young people to all become doctors, engineers etc.
- Firdousi, a poet, wrote the “Shahnama” during that time.
- Attabi, a historian, wrote “Kitab-Ul-Yameeni”.
- Alberuni, a philosopher, mathematician, geographer, and astronomer, made a deep study of the Hindu culture, customs, religion and wrote “Kitab-ul-Hind”.

Q5. Discuss education disability sudation Ottoman period?

Topic: 162 – Ottoman Education-1

The industrialized age is actually sandwich between the 16th century and the 18th century

Ottoman empire. When we see from the Industrialization and Ottoman period, there is a reform

in education. This period is seen as change in education, at least in the Turkish empire at that time.

- Between 1779-1839 was a reform period in education
- First in military education, military schools were opened.
- In 1824, Al Mahmut made primary education mandatory.
- Later middle and high schools and higher education was formed (Rustiyе mekteplerie, Idadi, Sultani and Darulfunun) These were the Turkish names for those high schools.
- 1856 Islahat Farmani was formed, that is changes in education.
- Primary education was mandatory
- Rustiyе must exist in places with 500 houses (primary schools)
- Idadiye must exist in places with 100 houses (middle schools)
- Darulfunun (University) must exist in Istanbul. (Capital of Turkish empire at that time)
- Male teacher and female teacher schools will open.
- Money will be collected from public for education
- Education will be centralized.

Topic: 163 – Ottoman Education-2

- Kanun-I-Esasi: mandated that education is for everyone.
- There will be no interference on religious education
- Education is free for public.
- Al Abdul Hamit Period: After losing Russian war, education gained importance. Why?

Because when the Turkish lose the Russian war, it was seen as an impediment and so what resulted was a need to educate.

- Vocational and art schools increased
- Increased freedom in press.
- Higher education for girls and girls started working in government offices.
- Pre-school education and professional education.

Q6. How poverty increase the risk the reform period. does of among the students?

Topic: 256 – Poverty Leads to Disability

Poverty creates following conditions which increases the risk of disability:

- Overburden and impoverished family (not able to meet basic needs)
- Poor nutrition and poor body defence against disease
- Illiteracy and lack of awareness about health and welfare
- Poor health due unaffordable healthcare cost
- Lack of access to basic services that prevent disability
- Over-working more often in risky physical labour environments
- Un-employment, under-employment and low wage rate

Q7. What are Plato and Aristotle?

Topic: 152 - Important Educational Theorists-2

Plato

- Philosophy: Philosophical idealist, social conservation, added intuition
- View of Human Nature: Humans can be classified on intellectual capabilities

Aristotle

- Philosophy: Realists, views society based on realism and observation
- View of Human Nature: Humans have the power of rationality to guide their conduct

Q8. Define conflict theory?

Topic: 130 – Conflict Theories-1

- Social order is based on the ability of dominant groups imposing their will on subordinate groups through force, cooptation, and manipulation.
- The glue of society is economic, political, cultural, and military power.
- Ideologies legitimate inequality and unequal distribution of goods as inevitable outcome of biology or history.
- Whereas functionalists emphasize cohesion, conflict theorists, emphasize struggle in explaining social order.
- Karl Marks is the intellectual founder of conflict theories.

Topic: 131 - Conflict Theories-2

- The “Achievement Ideology” of schools disguises the real power struggle which correspond to the power struggles of the large society.
- Educational expansion best explained by status group struggle . . . educational credentials such as college diplomas primarily status symbols rather than indicators of actual achievement to secure more advantageous places in employment and social structure.
- “Cultural capital” passed on by families and schools . . . schools pass on social identities that either help or hinder life chances.

Q9. Define labeling theory

Topic: 137 – Labeling Theory-1

- The labeling approach allows for an explanation of what, in fact, is happening within schools.
- Over time, the consequences of having a certain evaluative tag influence the options available to a student within a school.
- Labeling theory is interested in why people are labeled and who it is that does the labeling.
- Deviance is a social judgment imposed by a social audience.
- How does a community decide what forms of conduct should be singled out for this kind of attention?
- Social control can have the paradoxical effect of generating more of the very behavior it is designed to eradicate.
- Deviance is functional to clarifying group boundaries, providing scapegoats, creating out-groups who can be the source of furthering in-group solidarity. In other words, if teachers expect students to misbehave, then that’s the way they should be treated as a normal expectation in a classroom. Every individual is not going to behave appropriately.
- “The first dramatization of the ‘evil’ which separates the child out of his group . . . plays a greater role in making the criminal than perhaps any other experience . . . he now lives in a different world. He has been tagged. The person becomes the thing he is described as

being.”

- “The secondary deviant . . . is a person whose life and identity are organized around the facts of deviance.” It is teachers who use labels such as “bright” or “slow”.

Topic: 138 – Labeling Theory-2

- School achievement is not simply a matter of a child’s native ability, but involves directly and inextricably the teacher as well.

- Race and ethnicity are powerful factors in generating teacher expectations.

- High expectations in elementary grades are stronger for girls than boys.

- Expectations teachers hold for students can be generated as early as the first few days of school and then remain stable from then on.

- “If men define situations as real, they are real in their consequences.” Self-Fulfilling Prophecy

- The higher one’s social status, the less the willingness to diagnose the same behavioral traits as indicative of serious illness in comparison to the diagnostic given to low status persons.

- The teacher expectations are not automatically self-fulfilling.

Q10. Ghaznavi dynasty?

Topic: 166 – Ghaznavi Dynasty (970 - 1122)

- About 400 scholars, poets, scientists, and geographers were a glory of the court of Mahmood Ghaznavi.

- During this time architecture, art and literature flourished.

- What the Muslims provided was various areas of education so that young people could choose the area they were interested in and excel at it. That is seen as a good sign/vision of rulers who did not limit/force young people to all become doctors, engineers etc.

- Firdousi, a poet, wrote the “Shahnama” during that time.

- Attabi, a historian, wrote “Kitab-Ul-Yameeni”.

- Alberuni, a philosopher, mathematician, geographer, and astronomer, made a deep study of the Hindu culture, customs, religion and wrote “Kitab-ul-Hind”

Q11. Ghauri dynasty?

Topic: 167 – Ghauri Dynasty (1192 - 1206)

- Muhammad Ghauri was not fond of art and literature; however, he took steps to spread Islamic education.
- To achieve this he got a service of many religious scholars and saints.
- He believed in training his slaves.

Q12. Slave dynasty?

Topic: 168 – Slave Dynasty (1206 - 1290)

- Qutab-ud-Din Aibak built many mosques and cities that became the centres for worldly as well as Islamic education. He was very generous and kind to scholars and religious saints.
- Altumush was very fond of Art and Literature. Scholars, historians and poets from all over Asia assembled in his court.
- Ghais-ud-din Balban was very appreciative of scholars. The proof for his love of learning is in his advice to his only son, “Be in search of the brave, the learned, the wise, and leave no stone unturned to find them.”

Q13. Two nations theory?

Two Nation Theory

Since Pakistan came into being on the basis of Two Nation Theory, the conference recommended that the educational system should be based on this and a society be created that should reflect Islamic education.

Q14. Technical education?

Topic: 191 – Technical Education 1959 - 1

1. Technical education be made part of education system
2. Polytechnics in the country be upgraded to technical colleges.
3. Vocational schools should be spread widely in the country.
4. Directors of Technical education be appointed for technical colleges.
5. Technical Education Board be set up for the examination of technical subjects.

Topic: 192 – Technical Education 1959 - 2

6. The students getting diplomas from technical institutions be allowed to have BTech degree after completing one year course.
7. The students be trained as apprentices in industries.
8. The students should be given general education up to eighth class. After that, he should be allowed to choose between general and technical education.
9. By extending general education courses, agriculture, business and home economics subjects be added.
10. Professional courses for students be part of the curriculum and should be included so that students may be able to choose subjects according to their interest and taste. For example:

- ❖ Radio repairing
- ❖ Tool marking
- ❖ Pipe fitting
- ❖ Watch repairing
- ❖ Motor mechanics
- ❖ Furniture works
- ❖ Pottery
- ❖ Paper manufacturing
- ❖ Printing technology
- ❖ Motor body making

Q15. Define problems and issues in education?

Topic: 229 – Problems and Issues in Education

From the very start let us be clear these problems and issues are not unique to education in Pakistan only. They exist even in the real world. People may claim that everybody has equal opportunities but that is not true, the difference however is, on the impact this makes to the country you belong to. The first issue is:

Education for All.

- Equality of rights between men and women, especially as it applies to access to education, has contributed to the development of concept of the right to education for all.
- As a result, the education sector's greater openness to girls has made it possible to re-examine the issue of social justice and promote egalitarian gender relation.
- Thus girls and women must be given priority in the field of education. As analysis and reports reveal persistent gender inequality in this sphere.

Q16. Explain teacher Accommodation?

Topic 251 - Teacher Accommodations

- Vary teaching methods
- Projects for extra credit or in place of timed tests
- Giving instructions one step at a time instead of all at once
- Ask questions to get repeat of information to get repeat of information
- Divide the class
- Set up lessons
- Change the learning goals
- Create alternative activities

Q17. Challenges in education system

Topic 259 - Challenges in Education System - 1

Challenge No 1 Low level of literacy

Challenge no 2 Access to basic education

Challenge no 3 Schools curriculum is static, inert and non-responsive to the socio-economic needs both

nationally and internally

Challenge no 4 To evolve an integrated system of national education by bringing Deeni madras and modern

schools closer to mainstream especially in curriculum and the scheme of studies.

Challenge no 5 Financial constrains

Challenges no 6 Public private partnership

Challenge no 7 Rampant un-employment among the educated youth

Challenge no 8 Need for strong management information system (MIS)

Challenge no 9 Promote gender equality and women empowerment

Challenge # 10 Quality Assurance

Challenge # 11 to develop monitoring and evaluation mechanism

Q18. Theorists of this Industrialization

Topic: 159 – Industrialization

The French revolution brought about a major change in education. At the time of French revolution throughout Europe and England, there was a change. That change was clearly seen in technology. Technology focused on the development of new machines and items coming out of the mechanical world. Those changes also influence what is needed to be done in education. As technology produces new machinery, people need to know how to operate these.

- In England and all over Europe after the French Revolution, there is an expansion of technology such as machinery that works with petrol and steam.
- Education was influenced by these changes.
- Factory workers came about.
- In this period, systems such as, Socialism, Communism, Liberalism, and Capitalism started gaining popularity.
- The free thinking brought by the French Revolution combined with industrial Revolution caused education to take shape in this direction.
- Education was needed by large masses.
- New Philosophies came about: Materialism, Socialism, Positivism etc.

Q19. Educational Conference 1947.

Educational Conference 1947

Under the dynamic leadership foreside and vision of Quaid-e-Azam Muhammad Ali Jinnah, soon after the creation of Pakistan the first educational conference was held in Karachi in December 1947.

Topic: 181 - Educational conference 1947 – 5

The Conference of 1947, in the light of its recommendations, agreed upon the following

objectives of education:

1. The preservation of Nazaria Pakistan
2. Training for good citizenship
3. Training for Democracy
4. Urdu as Medium of Instruction
5. Abolition of Literacy in the Country
6. Primary Education compulsory for all
7. Compulsory religious education
8. Gradual abolition of English as Medium of Instruction
9. Reorganization of Technical Education
10. Promotion of National Unity

Q20. Bernstein's theory

Topic: 135 – Bernstein's Theory

- Bernstein talks about code which is a regulatory mechanism that determines what happens where? In education, he talks of two things; curriculum and pedagogy.
- Code refers to a “regulative principle which underlies various message systems, specially curriculum and pedagogy.”
- The group of experts gets together and put the curriculum. Then another group of experts get together and transfers that curriculum into the textbooks. And then the teacher teaches. So, with the same textbook teachers will teach differently.
- Curriculum defines what counts as valid knowledge . . . pedagogy defines what counts as valid transmission of knowledge and evaluation defines what counts as valid realization of knowledge on the part of the taught.
- Bernstein's work on pedagogic discourse is concerned with the production, distribution, and reproduction of official knowledge and how this knowledge is related to structurally determined power relations.
- The schools reproduce what they are ideologically committed to eradicating.
- Changes in the division of labor create different meaning systems and a code . . .

incorporates a conflict model of unequal power relations.

– Such functioning does not lead to consensus but forms the basis of privilege and domination.

Q21. Historical foundation of education

Topic: 175 – Historical Foundations of Education

Historical Foundations starts with pre-literate society and what happened with teaching and learning. Number of Ancient civilizations was discussed. How civilizations were changed from one to the next. How Europe established through the Renaissance Period and the Industrialization. So, we have to learn from the past, take what we need, modify and change what needs to be modified. Because obviously we cannot teach something that is 400 years old, it just wouldn't work. Then The Muslim Influence in the Subcontinent is discussed over the Muslim rule of eight dynasties that spread over 650 years. Islamic education focuses on both secular and religious education.

Q22. Influences of Arab Society.

Topic: 147 – Influence of Arabic Society (700 AD – 1350 AD)

Educational Goals:

- Cultivate religious commitment to Islamic beliefs,
- Expertise in mathematics, medicine and science

Students:

- Male children of upper class ages 7 – 20

Instructional Methods

- Memorization and recitation in primary schools, imitation and discussion in higher schools

Curriculum:

- Reading, writing, arithmetic, religious literature, scientific studies

Agents:

- Mosques. Court schools

Influence on Education:

- Arabic numerals and computation, medicine and science materials

Q23. Society as a Source of change

Society as a Source of Change:

- Society changes rapidly.
- Sometimes education cannot cope up with the fast changing society
- Making the “Preparing for students for the world of Tomorrow” difficult.
- Think about what we (society) have today that we didn’t have last year, or five years ago, or even ten years ago.
- Schools as Agents of Change
- Knowledge as an Agent of Change

Q24. Sociological foundation of education.

Topic: 123 – Sociological Foundations of Education: Introduction

Schools exist within society, not apart from society, and not without social context. Because schools and other educational institutions survive in the society so it is important to look at how society impacts what happens or should happen within schools and educational institutions. In addition to that it is important to know other salient features that affect schools within society.

Q25. Determinism /Voluntarism

Individuals can take one of the two types of actions. In society, the reasons you behave in a particular way is because an external force makes you do it. For example, you could not pass the red signal; you have to stop because following the rules of presence of police makes you do it.

This is known as “determinism” (Determined by external forces)

The other way is shaped by the individuals “Voluntarism”. You behave in a particular way because that’s the way you know the right way to behave and this is known as voluntarism. You voluntarily behave in a particular manner not because an external force is demanding to behave in a particular way. Mostly if observed in a society, determinism takes the upper hand, most individuals behave in society because they know if they don’t the consequences will not be good.

Q26. Effect of Schooling on individuals

Topic: 133 – Effects of Schooling on Individuals

Schooling should have three effects on individuals

- Knowledge
- Attitudes
- Employment

Education and mobility, the “civil religion” . . . education amount vs. route . . . for the middle class, education may be linked to mobility but for the rich and the poor, it may have very little to do with it.

Inside the Schools:

- Schools from an organization point of view . . . effects of school size.
- Curriculum expresses culture.
- Tracking in public schools, rarely in private schools.

Q27. Primary education 1959 (for teacher)

Topic: 184 – Primary Education 1959 (Facilities for Teachers)

1. Teachers of Primary Education should be provided some professional training.
2. Refresher courses be arranged now and then for the teachers.
3. The service condition of teachers be made better.
4. Rewards in cash or certificates be given to teachers showing better working.
5. For the first three classes of primary education, female teachers be preferred to male teachers.
6. Residence arrangement for female teachers be made.

Q28. Noor khan reports.

Topic: 194 – National Education Policy 1970 - 1

Also known as “The Noor Khan Report”, because of the extensive work of one individual in the process of formulating this policy.

Guiding principles and objectives for Growth of Education

1. Education should play a central role to sustain Islamic values and national unity.
2. Scientific and technical education be given attention to fulfil the economic needs of the country.

3. The role of the teacher is decisive in improving the standards of education.
4. Decentralization of powers for educational administrative control in order to get financial independence and educational freedom.

Q29. National educational policy

Topic: 195 – National Education Policy 1970 – 2

Primary Education

- This has been thought as a basic principle in the government policy.
- It was recommended to make common the primary education up to class five by 1980 and then be raised to the level of class eight.
- Education of girls was to be encouraged.

Secondary Education

- Scientific, technical and professional education has been stressed.
- A target of education of four hundred thirty thousand (430,000) students has been fixed in the plan of 1970.

Higher Education

- The curriculum has been stressed to be reorganized to improve higher education.
- New colleges be opened for science education.
- Centers for excellence be opened in the Universities where research work be done.
- A University Grant Commission be established to coordinate the work and standard of universities.

Adult Education

- In the Education Policy of 1970, adult education has been stressed much and the setting up of an Education Corps has been recommended.

Topic: 196 - National Education Policy 1970 – 3

Reorganization of curriculum

- Curriculum Research Committee centers at the provincial level be set up and scientific and technical education be included at every stage.
- In addition to this, education as a subject be included in the curriculum as an optional

subject.

Examination System

- The existing system of examination has been thought in the report as unsatisfactory because it does not measure the ability of students.
- It therefore needs to be reformed and restructured.

Topic: 197 - National Education Policy 1970 – 4

Training of Teachers

- It has been recommended in the report that one hundred and thirty eight thousand (138,000) teachers be provided training and one hundred and fifty thousand (150,000) teachers be trained during services.

National Language as Medium of Instruction

- It has been recommended in the report that a commission be set up to make the national language the medium of instruction.
- Textbooks be published in Urdu language.

Topic: 198 - National Education Policy 1970 – 5

Scientific and Professional Education

The following measures have been proposed for this:

- Scientific Research Centers be set up in the country
- Training centers in industries be opened for professional education.

New Universities

- It has been recommended in the report that the number of students in secondary schools has increased to the level that students find difficulty in getting admission in the present universities.
- Therefore, according to the phased program, new universities be established.

University Grant Commission

A University Grants Commission be established with the following duties:

- To hold communications with all universities
- To determine the financial needs of the universities and to distribute the amount of grant.

- To review the development plans of the universities
- To plan to promote university education

Q30. Article 37-b

1973 Article 37 – b says:

“The State shall remove illiteracy and provide free and compulsory secondary education within minimum possible period.”

Q31. Promoting Gender equality

Topic: 236 – Promoting Gender Equality – 1

- The elimination of stereotype and the most blatant sexism is insufficient. All representations of men, women, boys and girls must be monitored.
- Characters embody representations of male and female, and it is on characters that action must be taken.
- All characters form part of the gender system presented in a textbook, but the system is not present in the same way throughout the textbook.
- All gendered representations of male and female must therefore be monitored accordingly, taking into account.
- Both text and illustrations, while it may seem easier to monitor illustrations (especially in terms of the number of characters), which are scarcer and take up more space than text, this does not imply more balanced representations.

Topic: 237 – Promoting Gender Equality – 2

- In addition, the connection between the text and illustrations must be analyzed carefully. A gender-neutral text may be accompanied by an inconsistent illustration.
- Text and illustrations must be redundant or conflicting, they may reinforce or, conversely, weaken each other's messages.

Q32. linguistic inequalities

Topic: 243 – Linguistic Inequalities- 1

The Urdu-English Medium (Divide in Pakistan)

Role and status of different languages in Pakistan

1. The National Language of Pakistan is Urdu and arrangements shall be made for its being used for official and other purposes within fifteen years from the commencing day.
2. Subject to clause (1) the English language may be used for official purpose until arrangements are made for its replacement by Urdu.
3. Without prejudice to the status of the National Language, a Provincial Assembly may by law prescribe measures for the teaching, promotion and the use of a provincial language in addition to the national language. (Constitution of Pakistan, 1973, Article 251).
4. Urdu- National Language and lingua Franca (MT for only 7%)
5. Regional languages – used mainly in informal social interactions.

Topic: 244 – Linguistic Inequalities- 2

Role and status of Urdu and English:

- English – Official language and gatekeeper for entry into prestigious higher education institutions, high salaried jobs; also the language of military and bureaucracy.

Topic: 245 – Linguistic Inequalities- 3

‘Truism in Pakistan’

- English is necessary for individual and national development.
- English is a passport to success and upward social mobility
- English is the key to national progress

Educational context in Pakistan School Level

- Three parallel systems of education:
 - Urdu-medium schools (mainly state operated)
 - English-medium schools (mainly private)
 - Elitist
 - Non-elitist (so-called English-medium)
 - Madararas (Mainly Arabic)
 - Two track within English-medium
 - O/A level
 - Matric/Intermediate
