Mishii Brave

Token Economy

47. A teacher praises her student by giving a star on the note book as student performs well in the class; she is more likely to use_____.

Shaping

Reinforcement

Extinction

Association

48. Sensation + Meaning = _____.

Learning

Perception

Sensation

Memory

49. Fahad comes to know that his favorite restaurant will remain open till 6pm. Which of the following memory may help Fahad to remember the opening timings?

Semantic

Procedural

Declarative

Short-term

50. Ali has negative self-concept and considers that he is a bad person who never performs well in class. This is an example of

First-wave Constructivism---Individual Contribution

Second Wave Constructivism--Social Contribution

Third Wave Constructivism

51. My English teacher is skinny and my last term English teacher was also skinny so I have come to know that all English teachers are skinny. This is an example of

Mishii Brave

Mishii Brave

what?

Expository reasoning

Mishii Brave

Mishii Brave

Mishii Brave

Discovery reasoning

Deductive reasoning

Inductive reasoning

52. Nainna is competing in GRE test for full bright scholarship. This is an example of which type of motivation?

Internal

Superficial

Middle

External

53. These all are the ingredients that should be kept in mind while summarizing the material, EXCEPT:

It should be lengthy

It should be too the point

It should be clear

It should be short

54. _____ are commonly used in domain-specific problem solving strategy, in which a problem tends to be solved by using step by step procedure.

General

Domain-specific

Heuristics

Algorithms

55. Ali is a taxi driver and now he is transferring his learning for driving the truck; this is known as what?

Challenging the knowledge

Exerting transfer of knowledge

High transfer of knowledge

Mishii Brave

Mishii Brave

Low transfer of knowledge

Mishii Brave

Mishii Brave

Mishii Brave

56. When a less experienced student is taught by a more experienced teacher, this phenomenon refers to as _____

Instructional conversation

Problem-based learning

Cognitive apprenticeship

Inquiry learning

57. If a student learns different mathematical principles and then use that information in comprehending the physics laws is known as:

Remembering

Declarative memory

Memorization

Transfer of knowledge

58. Identify the method in which a realistic problem has been discussed in class and students have to give the possible solutions?

Cognitive Apprenticeship

Instructional Learning

Problem Based Learning

Inquiry Learning

59. If an individual learns new experience with the help of observational learning, he or she must

Reward after doing wrong action

Be rewarded immediately after performing an action

Rewarded for every third instance of a behavior

Imitate the behavior of a model

60. Which of the following refers to the main central area of the physical environment of the classroom in which students interact with each other?

Mishii Brave

Mishii Brave

Interest area

Personal territory

Mishii Brave

Mishii Brave

Mishii Brave

Personal ground

Aptitude area

61. All of the following factors may affect self-regulation EXCEPT:

Knowledge about oneself

Demotivation

Will power

Family influence

62. A teacher makes sure that at the end of the class; draw a square with a pencil on a plain paper. This is an example of which type of objective?

Class

Cognitive

Behavioral

Instructional

63. The middle score in a series of score is called what?

Percentile

Median

Mode

Mean

64. Pakistan is a _____ society.

Tricultural

Bicultural

Unicultural

Multicultural

65. _____ intelligence refers the ability to process emotional information in an effective manner.

Academic

Mishii Brave

Mishii Brave

Spiritual

Emotional

Linguistic

66. What is meant by perceiving emotions?

Highlighting emotions

Discussing emotions

Explaining emotions

Recognizing emotions

67. Which of the following tests are conducted under uniform conditions and providing scores according to uniform procedures?

Non-standardized

Semi-standardized

Standardized

Sub-standardized

68. Which of the following is NOT an aspect of divergent thinking?

Review

Flexibility

Fluency

Originality

69. A teacher asks the student to identify the most frequently occurring numbers among the series of numbers. Which of the following measurement has been discussed?

Median

Mean

Mode

Standard deviation

Quiz #1:

. Which of the following method is directed towards the study of individual behavior?

Select correct option:

- Experimental
- Differential
- Observational

Clinical

. Observation and recording of behavioral events under controlled conditions is known as:

Select correct option:

- Introspection
- Experimentation**
- Normative survey method
- Psychoanalytic method

. Edward Tolman is one of the founders of:

Select correct option:

- Behaviorism
- Cognitive Psychology**
- Gestalt psychology
- Psychoanalysis

. In the early days of evolution of psychology behavior was studied through the method of inner observation, called _____.

Select correct option:

- Observation
- Analysis
- Introspection**
- Scrutiny

. There are three classical psycho-physical methods devised by Fechner, which of the following is not included in it?

Select correct option:

- The method of minimal changes
- The method of constant stimuli
- The method of mean error

The method of mode error

. Which of the following is relatively a prevalent approach in contemporary psychology, which studies how we feel in altered states of awareness?

Select correct option:

- Transpersonal psychology
- Cognitive Psychology
- Humanistic Psychology

Psychoanalytic

. The control of conditions and variables is the key factor of _____ method.

Mishii Brave

Select correct option:

- Differential
- Introspection
- Observation

Experimental

. Who set up the first American laboratory for psychology?

Select correct option:

- William James
- Hermann Ebbinghaus
- Granville Stanley Hall**
- Leona Tyler

. Connectionist theories belong to which of following school of thought?

Select correct option:

- Cognitive psychology**
- Psychoanalysis
- Behaviorism
- Gestalt psychology

1:

According to Vygotskyself-talk leads to good health.

- Negative
- **Positive(Lesson 06)**
- Natural
- Moderate

2:

.....that is a judgment or prediction which comes out to be true

- **self-fulfilling prophecy(Lesson 10)**

- self-criteria
- self-judgment
- self-esteem

Mishii Brave

Mishii Brave

3:

Which of the following process is involved, when an individual observes and replaces another behavior?

- **Imitation (lesson 6)**

- Internalization
- Co-construction
- Re-construction

4:

Duringlevel of moral reasoning, a person's judgment based upon others approval and principles.

- Pre-conventional Moral Reasoning
- **Conventional Moral Reasoning (Lesson 8)**
- Post-Conventional Moral Reasoning
- Social orientation

5:

In which of the following stage, the child is able to distinguish between good and bad qualities.

-
- Sensory motor stage
 - **Preoperational stage**
 - Concrete operational stage
 - Formal operational stage

Psy-406 Educational Psychology mid Term paper 28 Dec 2013 (paper 10)

Consisted of 27 questions among which 22 were MCQs. MCQs were pretty different from those given in Quiz and assignments.

Subjective:

1. Enlist three limitations of experimental method.
2. Enlist three benefits of habit formation.
3. What happens at the 'Trust vs. Mistrust' Stage? Who proposed it? (3 marks)
4. Mention the contribution of Edward Thorndike. (5 marks)
5. Zara's parents got divorced. How can the teachers help her get through this (5 marks).

Psy-406 Educational Psychology mid Term paper 28 May 2016 (paper 11)

1. Home environment and resource impact on student academic achievement. (5)
2. Teacher strategy to handle talented students.
3. Tracking influence on student academic achievement.
4. What is development crisis and how can child handle it.

Final Term papers

Paper 1:

Total Questions 50

MCQS 40

Subjective Questions : 10

- modeling
- self regulation
- helplessness

paper 2:

February 28, 2016

1. Difference btw achieving grades and working to learn

Mishii Brave

2. Evaluation process
3. Over learning
4. Skinner behaviour theory
5. Locus of control
6. Effective feedback
7. Learning strategies
8. Non- materialistic culture
9. Emotional intelligence

Paper 3:

February 28, 2016

Psy 406 final paper

MCQ's = 40

Subjective questions = 10

Q-1 Difference between self-management and class-management? (5)

Q-2 How would you differentiate between psychological constructivism and social constructivism?(5)

Q-3 Any five important things that a teacher should keep in mind while communicating result grades to the students?(5)

Q-4 define will power? Write any event from your life when will power played a prominent role in your self-regulation?(5)

Q-5 Describe any five ways in which teacher can curtail cheating habits of their students?(5)

Q-6 How would you create a link between autonomy and motivation? (3)

Q-7 How does response set create hindrance in transference? (3)

Q-8 Which method is considered more beneficial for exams, weekly or monthly. Justify your answer with examples.(3)

Q-9 Define self-regulation? Exemplify that how do you rate your ability of self-regulation?(3)

Q-10 Amna, a two year s old baby girl wants to put her clothes on by herself. Her mother allows her to try until she succeeds or ask for assistance. In which stage of psychology

Mishii Brave

Mishii Brave

develop(given by Eric Ericson) Amna is passing through. Name that stage and justify it?(3)

Paper 4:

February 29, 2016

1. Objectives comes from the topics
2. gender bias
3. ,cognitive development and language,behavioral views of learning
4. portfolio,
5. high road transfer
6. ,ripple effect,
7. social cognitive and constructivist view of learning,
8. evaluation process
9. ,better time management
- 10.,Emotional intelligence,
- 11.reciprocal questioning,mean,reliability,
- 12.Action zone

Paper 5:

March 4, 2016

total 50

10 questions

1-fear of failure affects our motivation discuss in context to pakistani society.

2-Humanistic approach about motivation.

3-reviewing in learning of mathematics.

4-central tendency type and explain.

5-kohlburg conventional reasoning

6-emotional intelligence qualities.

7-modeling

8-first wave of constructivism

9-functional fixedness.

10-over learning.

August 29, 2015 at 12:06pm

PSY406 Current Paper

40mcqs

- 1- Define self-regulation. How do u rate ur ability of self-regulation? (3)
- 2- Explain withiness. (3)
- 3- Three ways to measure central tendency. Name and define. (3)
- 4- Are you extrinsically motivated or intrinsically motivated? Give example. (3)
- 5- Three kind of students that are motivated from token economy. (3)
- 6- Why it is important to manage emotions? (5)
- 7- Cognitive apprenticeship ? (5)
- 8- Language is part of materialistic or non-materialistic culture? Select and explain? (5)
- 9- Which positive qualities did u learn from school and how did they inculcated in their personality? (5)
- 10- Action zone and its significance? (5)

Paper 8:

**My paper Psy406 midterm paper
solved 2016**

How would you differentiate between continuous reinforcement and intermittent reinforcement?

Continuous reinforcement schedule

is operative when a reinforcer is presented after every appropriate response.

That is one way in which learns.

The second is called

intermittent reinforcement schedule

, when reinforcement is presented intermittently, at some responses only

Enlist seven step plan used to tackle students

1.

Develop a signal that tells students to stop doing what they are doing and focus on you

Mishii Brave

Mishii Brave

as a teacher.

2.

Avoid behavior that may distract your students, self-touching and grooming etc.

3.

Make your presentation/talk/lecture clear for students.

4.

Include variety and surprise in your talk/lecture.

5.

Asking questions of the students frequently during your talk.

6

.In teaching, you will have to ensure students' attention to the critical features of the lesson by making clear presentations and highlighting important points.

7.

Don't give bad words to them

Architect Mughal era is an example of which type culture?

Material Culture

Material culture may be manifest in a nation's or group's architecture, the physical environment, the ways

the roads, bridges, overhead, under head passes, are made the way foot paths,

highways, open spaces,

Gardens are made are all examples of material culture of a city. Some years ago some friends from abroad

had come to Lahore visiting, when they were taken around the city, one of them made a remark about

Lahore; she said she found Lahore to be like a beautiful girl who is in deep slumber. The architectural

Material culture of Lahore to a foreigner appeared to resemble a sleep beauty. So the architectural martial

Culture has a dynamic identity.

One of the three principles is development orderly development? What do you know about?

That development is generally orderly, that development takes in an orderly path: for example, children first

sit, then develop an ability to stand and then to walk etc.

Few teacher exhibit gender biases how can it eliminate?

The first step in that direction is to accept that tendency towards gender bias. Research Shows that teachers pay more attention and demand more input from their male students

than from their female students.

Mishii Brave

Mishii Brave

2. Teachers, after becoming aware of this tendency, must consciously curb and correct this tendency in their classroom practices.

Psy406 final term paper solved

Ali will able draw all parts of machine with high accuracy identify which type instructional learning (behavior or cognitive learning) 5

Behavioral Objectives or learning

Behavioral objectives are lists of acts or behavior that students are supposed to show at the end of instructions. Behavioral objectives are instructional objectives stated in terms of observable behaviors or acts. For example students can draw a triangle or a square with a pencil on a plain paper

Differentiate between algorithms and heuristics (5)

Algorithm is a step by step procedure for solving a problem. Algorithm is usually used in domain-specific, which is in a particular subject area. In solving a problem, if you choose an appropriate algorithm and implement it properly, a right answer is guaranteed. Unfortunately, students often apply algorithms haphazardly. They try first this, then that. They may even happen on the right answer, but not understand how they found it. For some students, applying algorithms haphazardly could be an indication that formal operational thinking and the ability to work through a set of possibilities systematically, as described by Piaget, is not yet developed. Many problems cannot be solved by algorithms. What then? Heuristics are some general strategies used in attempting to solve a problem. Heuristics may be attempted in general problem solving strategies.

What is different between percentile score and standard score? (5)

Percentile rank scores:

Another meaningful number in a set of large measurements is the percentile rank. Percentile rank is the percentage of those in a given sample who score at, or below an individual's score. A percentile rank of 50, for example means that a student has scored as much or better than 50% of students in a group or a class. Similarly a percentile rank of 90% means a student has scored as much or better 90% students in a group.

Mishii Brave

Mishii Brave

Standard scores:

Another useful concept in this context is that of standard scores, these are the scores based upon standard deviation. A very common standard score is called the z score. A z score tells us how many standard deviations above or below the average, any given raw score is placed. Because it is often inconvenient to use negative numbers, other standard scores have been devised to eliminate this difficulty. A T score is the standard score with a mean of 50 and a standard deviation of 10. Thus a T score of 50 indicates average performance. And last useful concept in this regard is the concept of stanine scores. This name comes from "standard nine". Stanine scores are the whole number scores, from one to nine, each number representing a wide range of raw scores. So these can help to categorize a given set of scores into different categories. Each stanine score represents a wide range of raw score thus making categorization of score easy, making teachers and students view another student's score, in more general terms. We talked about mean, mode, median and standard deviation in relation to student's scores. These calculations not only help categorizing a student on the basis of his scores but also help in giving a single, clear description of a group of students. Percentile ranks, Z score, T score, and stanine score make comparisons among students score more easy and meaningful.

Suppose you are teacher of fifth class and give lecture on planets within 1 hour which time management technique you would use? 5

Time on task:

You may also become familiar with what educational psychologists call "time on task", this is the time period that is spent on actively engaged in learning a specific task at hand. Time spent on various ways in learning may or may not lead to real learning. Thus academic learning time refers to the time students spend on really learning and understanding. One research undertaken by Weinstein and Mignano shows that of the one thousand and one hundred hours of class time, about one thousand are spent on attended time; about five hundred are spent on actual academic time, about four hundred hours are spent on engaged time and about only three hundred hours are spent on academic learning time, when students actually succeed in learning a task. Class management is possible and improves when school and class rules and procedures are clearly stated by administration. And when these procedures and rules are conveyed to students and are understood by them. This is western countries; research, in Pakistan it has observed that less than the mentioned time is spent in our schools for learning. In this regard, Weinstein and Mignano, important researchers in the field of education, have suggested the following strategies to improve learning and motivation: a) Administrative routine, such as when and how attendance will be

Mishii Brave

taken who shall be the monitor of the class etc. b) Student movement, how and when students, may enter or leave the classroom. c) Housekeeping, how and where personal items of students will be stored. d) Routine for accomplishing lessons how the homework assignments be collected and returned. e) Routine for interaction between students and teacher will be clearly spelled out and explained to students. f) Procedures for talk between students should be clearly explained.

What is dialectic and bilingualism? 5

Dialects

A dialect is a language variation spoken by a particular ethnic, social or regional group and is an element of the group's collective identity. The rules for a language define how words should be pronounced, how meaning should be expressed and the ways the basic parts of speech should be put together to form sentences. Dialects appear to differ in their rules in these areas, but it is important to remember that these differences are not errors. Each dialect within a language is just as logical, complex and rule governed as the standard form of the language (often called standard speech). These facts have a profound effect on the educational process as whole. Our students across Pakistan speak different languages and within each language they have different dialects.

Bilingualism

A large majority of our school going children are bilingual, learning, speaking and reading in at least two languages, namely Urdu and English. Being bilingual puts extra burden on the learning capacity of a student.

It takes greater attention and input to achieve and maintain bilingualism. Pakistan can be proud of having and fostering different cultural units in its borders. But having differences in cultural units can also create ethnic prejudice. One ethnic group may consider it superior and impose its superiority on others

Do you think self-regulation change attitude of students towards learning? 3

Another important consideration in this regard is the contribution of another psychologist, by the name of

Barry Zimmerman. He put forward the concept of self-regulation and its relationships with learning. Self-regulation according to Zimmerman is how we activate and sustain our thoughts behaviors and emotions and these factors influence our learning. Self-regulation is the outcome of, or related to number of factors.

These factors include One's

knowledge One's level of
motivation

One's volition or will power

One's family influences, the influence of parents and elders etc.

Mishii Brave

Mishii Brave

An important dimension of self-regulation is that it must be carried out by individuals voluntarily and may not be imposed by fear of punishment. Voluntary self-regulation comes about, research shows from at least three sources.

Which strategy do you best for weekly and monthly test? 3

Multiple Choice Tests

Multiple choice tests can assess not only recall or recognition, but they also require a student to apply what

He/she has learned. When writing a multiple choice test the aim of the teacher is to measure a student's achievement, and not his test taking or guessing skills.

What is the difference between allocating and engage time? 3

Allocated time: One way to better time management is estimating the amount actually spent on learning. This is called allocated time. Allocated time is the time period that a teacher sets aside for learning. Engaged time: Then there is engaged time; this refers to the time period specifically spent in actively learning.

How can teacher stop gender bias in class room? 3

The first step in that direction is to accept that tendency towards gender bias. Research shows that teachers pay more attention and demand more input from their male students than from their female students.

2. Teachers, after becoming aware of this tendency, must consciously curb and correct this tendency in their classroom practices

Suppose you read an article about dresses and now after reading this article you mostly wear very fashionable dressed after some years? Identify which type of memory is used in article

Implicit memory as part of long term memory is the memory that we are not conscious of recalling but affects our behavior or thoughts without our awareness. For example a person being a male or a female is not consciously recalled but it influences the way he or she dresses etc. From the point of view of an educational psychologist and a teacher if a teacher knows these parts and compartments of memory, he/she would be in a better position to gain, store and then retrieve knowledge and information.
