

Bio101

Midterm important questions 2024

VU360

Lecture 1-5:

1. What is the definition of biology and its importance?
2. How do you explain the concept of cells and their structure?
3. What are the different types of biomolecules (carbohydrates, proteins, etc.)?
4. How do you explain the concept of cellular respiration and photosynthesis?
5. What is the concept of genetics and its importance?

Lecture 6-10:

6. How do you explain the concept of Mendelian inheritance and its laws?
7. What are the different types of genetic mutations and their effects?
8. How do you explain the concept of DNA replication and transcription?
9. What is the concept of gene expression and its regulation?
10. How do you explain the concept of evolutionary biology and its mechanisms?

Lecture 11-15:

11. How do you explain the concept of ecosystems and their components?
12. What are the different types of ecological interactions (predation, competition, etc.)?
13. How do you explain the concept of population dynamics and growth?
14. What is the concept of biodiversity and its importance?
15. How do you explain the concept of conservation biology and its importance?

Lecture 16-20:

16. How do you explain the concept of human body systems (nervous, circulatory, etc.)?
17. What are the different types of human diseases and their causes?
18. How do you explain the concept of immunity and its types?
19. What is the concept of human evolution and its history?

20. How do you explain the concept of biotechnology and its applications?

Lecture 21-22:

21. How do you explain the concept of advanced biological topics (genomics, proteomics, etc.)?

22. What is the concept of biological innovation and its importance?
