ENG201

Lecture 18, 19, 20 & 21

Writing Direct Request, Routine, Good News, Good Will, Bad News and Persuasive Messages

Concept

MCQs

Mid Term Preparation

Short Q.

Long Q.

Sequencing the Message

You have two options for sequencing your message

Direct Approach

It means putting the main idea first followed by evidence.

- Direct Request
- Routine
- Good News
- Goodwill

Indirect Approach

To put the main idea later and evidences first.

- Persuasive Message
- Bad News
- Longer Message

BJ Biology

Direct Request Message

This approach works well when your request requires no special tact or persuasion.

- ✓ No long introduction.
- ✓ No persuasion
- ✓ Simple Request
- ✓ Main idea in first paragraph

For Organizing Direct Requests

- State the request or main idea
- Give necessary details
- Close with a cordial request.

Types / Examples of Direct Request Messge

Order Letter

List of items you would like to purchase. The objective of an order letter is to provide the seller with detailed instructions for fulfilling an order.

Customer Services (Letter)

Support you offer your customers.
It is the Department an organization that responds to inquiries or complaints from customers of that organization.
Customer service is an important ensuring that customers will buy again and continue to be good customers.

Claim

Formal Complaint

Legal demand for repayment for a loss under a contract, or an injury due to negligence.

Adjustment

Complaint Settlement

Adjustment letter is a letter in answer to a complaint letter. The answer may either be a refusal or a grant.

Credit Request

Request for credit (cash). Order letters are often combined with a request for credit.

Routine

Providing important information to the recipient about any changes, updates or news an organization has to share.

Good News

Good Will

Goodwill message show helpful or friendly attitude toward other.

Positive Messages

Organizing the Positive Messages

a. Clear Statement of the Main Idea
b. Necessary Details
c. Courteous Close

Acknowledging Orders (Letter)

Written by seller to the customer for the confirmation and status of the order or payment.

Also use for fast payment or offer of increase order.

Replies to Requests for Information and Action

a. When a Potential Sale is Involved

3 goals

- To respond to the inquiry and answer all questions
- To encourage the future sale
- To leave your reader with a good impression

b. When a Potential Sale is not Involved

2 goals

- Responding to the request
- Leaving a favorable impression of your company or fostering a good working relationship

Acknowledging Orders (Letter)

Written by seller to the customer for the confirmation and status of the order or payment.

Also use for fast payment or offer of increase order.

Responding Favorably to Claims and Adjustment Requests

Favorable responses to routine claims are known as adjustments.

- Reveal the good news in the first sentence of the letter
- Explain the various circumstances under which the action has been taken
- Don't blame an individual or a specific department
- Avoid lame excuses such as "Nobody's perfect" or "Mistakes will happen"
- End the letter on a pleasant note

Replies to Requests for Information and Action

a. When a Potential Sale is Involved

3 goals

- To respond to the inquiry and answer all questions
- To encourage the future sale
- To leave your reader with a good impression

b. When a Potential Sale is not Involved

2 goals

- Responding to the request
- Leaving a favorable impression of your company or fostering a good working relationship

Acknowledging Orders (Letter)

Written by seller to the customer for the confirmation and status of the order or payment.

Also use for fast payment or offer of increase order.

Responding Favorably to Claims and Adjustment Requests

Favorable responses to routine claims are known as adjustments.

- Reveal the good news in the first sentence of the letter
- Explain the various circumstances under which the action has been taken
- Don't blame an individual or a specific department
- Avoid lame excuses such as "Nobody's perfect" or "Mistakes will happen"
- End the letter on a pleasant note

Replies to Requests for Information and Action

a. When a Potential Sale is Involved

3 goals

- To respond to the inquiry and answer all questions
- To encourage the future sale
- To leave your reader with a good impression

b. When a Potential Sale is not Involved

2 goals

- Responding to the request
- Leaving a favorable impression of your company or fostering a good working relationship

Handling Routine Credit Requests

- Approving Credit (beginning of a business relationship with a customer)
- Credit References (ask information)

Bad News Messages

Organization

Indirect Plan

The indirect plan consists of four parts:

a. Buffer
b. Reason
c. Bad News
d. Positive close

• The first step in using the indirect plan is to put the audience in an accepting mood by making a neutral, non-controversial statement

• In bad news messages, your tone contributes to your message's effectiveness. With the right tone, you can make an unwelcome point.

• You describe the more positive points first then move on to less positive ones.

• When the bad news is a logical the audience is psychologically prepared to receive it. However, the audience may still react emotionally if the bad news is handled carelessly.

Stating the bad news with direct plan has two potential advantages:

• It makes a shorter message possible.
• The audience needs less time to reach the main idea.

Persuasive Messages

Convince an individual or customer to buy some products by inform customers about the benefits of a product.

When writing persuasive messages, four things to keep in mind about your audience are:

a. Needs and appeals

b. Emotion and logic

c. Credibility

Quality of being trusted and believed in.

d. Semantics

The words, you choose to state your message say much more than their dictionary definitions.

Organizing Persuasive Messages

Persuasion requires the indirect approach. While framing a persuasive message, effective business people use the AIDA plan which has four phases:

a. Attention

Your first objective is to encourage your audience to hear about your problem, idea, new product. Write a brief engaging opening sentence.

b. Interest

Make interest of the audience by paint a more detailed picture with words.

c. Desire

Explaining benefits of product. Answering in advance any questions the audience might have. Just remember to make sure that all evidence is directly relevant to your point.

d. Action

Suggest the action you want readers to take. The secret of successful action phase is to make the action easy, so if possible, give your readers a couple of options for responding, such as a toll-free number to call and a website to visit.

Question No 5

What is the correct sequence of AIDA

A. Attention, Interest, Desire, Action

B. Action, Interest, Desire, Attention

C. Both A and B

D. None of the Above

Question No 1

In which of the following approach message start with clear statement

A. Direct Approach

B. Indirect approach

C. Business Approach

D. Strategic approach

Question No 2

_____ is to encourage your audience to hear about your problem, idea and new product

A. Attention

B. Desire

C. Interest

D. Action

Question No 3

In audience analysis "D" stand for

A. Desire

B. Decision

C. Both A and B

D. None of the Above

Question No 4

In audience analysis "A" stand for

A. Action

B. Attitude

C. Both A and B

D. None of the Aboue

What is Report?

Reports are used to display the result of an experiment, investigation, or an inquiry.

It should be noted that reports are considered to be legal documents in the workplace and, thus, they need to be precise, accurate and difficult to misinterpret.

What makes a good report?

Good reports have three things in common:

a. The information is accurate.

b. The content shows writer's good judgment.

c. The format, style and organization respond to reader's needs.

Why is the report being prepared (Purposes of a Report)

a. Informational (present informations)

b. Analytical (Written to solve problems)

c. Persuasive (An extension of analytical reports main focus is to sell an idea, a service, or a product).

Short Report

- ✓ No Cover
- ✓ No Table of Contents
- ✓ No tables
- ✓ No charts
- ✓ No Index
- ✓ No Glossary

Informal

Long Report

- ✓ Cover
- ✓ Table of Contents
- ✓ Tables
- ✓ Charts
- ✓ Index
- ✓ Glossary

Formal

Short Report

The short report may range from short statement of facts, presented on a single page, to a longer presentation taking several pages.

Short report is personal, informal and relaxed.

It does not carry a cover, table of contents or any special display.

Short Report Format

Letter Format

This format is used for reports that are directed to outsiders and contain five or fewer pages.

Memo Format

When report is written within organization, use memo format.

Preprinted Format

It is in the form of 'fill-in-the-blanks' reports. It deals with routine information which is often mainly numerical.

Manuscript Format

For a formal approach, manuscripts range from a few pages to several hundred pages.

Structure of Short Report

Four tools are particularly essential.

a. The opening

1. Introduces the subject of your report.
2. Indicates why the subject is important.
3. Gives the readers a preview of main ideas.

b. Headings and lists

Report is always divided into clear sections with headings, for example, Facts, Discussion, Findings, Costs, Limitations, Advantages, and Conclusions. Usually, a numbering system is used too.

c. Smooth transitions

Such phrases as “to continue the analysis”, “on the other hand” and “additional concept” are another type of structural clue.

d. The ending

Justify what you written in report by articles, company records, surveys, your own observation.

Formal

Planning Writing

Long Report

Formal Report

Steps of Planning a Long Report:

a. Define the purpose
b. Outline the issue for investigation
c. Prepare a work plan
d. Conduct research
e. Draw conclusions and develop recommendation.

a. A purpose statement is a declarative sentence which summarizes the specific topic and goals of a document.

- **Sequentially**

If you are studying a process, present your information step by step - 1, 2, 3.

- **Chronology**

When investigating a chain of events, organize the study according to the event that happens first.

- **Spatially**

If you are studying a physical object, study it left to right, top to bottom, inside to outside.

- **Geography**

If the location is important, factor your study geographically.

- **Categorically**

If you are asked to review several distinct aspects of a subject, you need to look at one category at a time, for example sales, profit, or investment.

Planning Writing

Long Report

Formal Report

Steps of Planning a Long Report:

a. Define the purpose
b. Outline the issue for investigation
c. Prepare a work plan
d. Conduct research
e. Draw conclusions and develop recommendation.

a. A purpose statement is a declarative sentence which summarizes the specific topic and goals of a document.

b. Analytical reports offer both information and analysis, and they can also purpose recommendations.

c. The Preliminary Outline is the first step of planning reports. It is basically a plan for organizing the elements of a report.

d. Documentary evidence and historical records are sources of primary data.

e. Observation applies your five senses and your judgment to investigation.

Planning Writing

Long Report

Formal Report

Writing a Long Report

A professional report conveys the impression that the subject is important.

A formal report may be divided in three major division:

1. Prefatory parts:

a) Title fly
b) Title page
c) Letter of authorization
d) Letter of transmittal
e) Table of contents
f) Preface

The title fly is a plane sheet with only the title of the report on it.

2. Body of report

a) Introduction
b) Text
c) Terminal section

The text contains the actual details of the report. It is the main and crucial part of the body

3. Supplementary Parts

a. Appendix
(Tables, Chart)
b. Bibliography
(Source of Data)
c. Glossary
(List of words with definition)
d. Index
(Division of Topics)

b. Title page:

The title page includes four blocks of information:

- The title of the report
- The name, title and address of the person that authorized the report
- The name, title and address of the person that prepared the report
- The date on which the report was submitted

Lecture 22 : Writing Short Reports

Lecture 23 : Planning Long Reports

Lecture 24 : Writing Long Reports

Lecture 25 : General Reports

Lecture 26 : Empirical Research Report

Lecture 27 : Feasibility Reports

Lecture 28 : Progress Reports

General Reports

It contains information on outcome, results, efficiencies and other things that are directly related to companies .

Empirical Research Report

Report collected by observation and experiment.

It is used to answer a question or a hypothesis.

Feasibility Report

Feasibility reports written to help decision makers to choose between two or more course of action.

Progress Report

The progress report states the progress made towards the goal during the reporting period, discusses significant costs and scheduling issues, and lists future objectives to be carried out.

Superstructure

General

a. Introduction
b. Method of obtaining facts
c. Facts
d. Discussion
e. Conclusions
f. Recommendations

Feasibility

a. Introduction
b. Criteria
c. Method of obtaining facts
d. Overview of alternatives
e. Evaluation

Progress

a. Introduction
b. Facts
c. Discussion
d. Conclusions
e. Recommendations

Criteria

Criteria are the standards that you apply in a feasibility study to evaluate the alternative courses of action which you are considering.

✓ Criteria often used in feasibility reports.

✓ For each of the general criteria named in the quoted sentence.

Importance of Presenting Criteria Early:

There are three good reasons for presenting your criteria early in your report:

- Your readers could know that the validity of your conclusions depends on the criteria.
- Your discussion of the criteria tells your readers a great deal about the scope of your study.
- Your decision of the alternative courses of action will make much more sense to your readers.

Four Common Types of Criteria:

- Will the course of action really do what's wanted?
- Can we implement it?
- Can we afford it?
- Is it desirable?

One line important MCQs from lectures 25, 26, 27 and 28

- Length of report varies according to the situation and the project.
- The length of a report can be from only two paragraphs to two hundred pages.
- In the introduction of a report, you answer your readers' question.
- Your facts are the individual pieces of information that underlie and support your conclusions and recommendations
- Taken alone, facts mean nothing.
- You will be able to use the superstructure for empirical research reports most successfully, if you understand the purpose of research, discussed in them
- Generally, you can arrange a literature review in two parts.
- Writers almost always include literature reviews in the reports they write for professional journals. In contrast, they often omit reviews when writing to readers inside an organization.
- When reading the reports of your empirical research, people will look for precise details concerning your method.
- The results of empirical research are the data you obtain.

- Even when a feasibility report seems to focus primarily on one course of action, the readers are always considering a second course.
- Generally, the introduction to a long feasibility report (and most short ones) should also include a preview of the main conclusions
- The source of your facts will depend upon the nature of your study.
- The heart of a feasibility report is the detailed evaluation of the course or courses of action, you studied.
- In the first, you tell your readers about your progress on one particular project.
- In the second type of situation, you prepare progress reports that tell about your work on all your projects.
- Generally, progress reports are brief because readers want them that way.
- Your findings are important because they may involve information that can be used right away by others.
- As mentioned, your findings and problems are important to your readers.

ENG201

Lecture 29 and 30

Proposals and Instructions

Concept

MCQs

Final Term Preparation

Short Q.

Long Q.

Proposal

A proposal is a special type of analytical report designed to get products, plans, or projects accepted by outside business or government clients.

In your proposals, you ask decision-makers to invest some resources, such as time and money, so that the thing you propose can be done.

Instructions

Instructions are written for carrying out a procedure or performing a task.

The Variety of Proposal Situation

- Your readers may be employed in your organization, or they may be employed in other organizations.
- Your readers may have asked you to submit a proposal, or you may submit it to them on your own initiative.
- Your proposal may be in competition against others, or it may be considered on its own merits alone.
- Your proposal may need to be approved by various people in your organization before you submit it to your readers, or you may submit it directly yourself.
- You may have to follow regulations concerning the content, structure and format of your proposal, or you may be free to write your proposal entirely as you think.

Various Lengths of Proposals:

Proposals are several volumes long can run into hundreds or even thousands of pages. On the other hand some proposals are less than a page.

Proposal are wirtten in any of the three common formats:

1. Letters
2. Memos
3. Books

The Variety of Instructions (Length of Instructions)

- The simplest or shortest are only a few sentence long
- Other instructions are hundreds or thousands of pages long e.g servicing the airplane engines they manufacture.

Superstructure

Proposals

1. Introduction
2. Problems
3. Products
4. Method
5. Resources
6. Schedule
7. Qualification
8. Managemen
9. Cost

Instructions

- Introduction
- Description of the equipment
- Theory of operations
- Lists of material and equipment
- Guide to trouble shooting
    - Subject
    - Aim
    - Intended reader
    - Scope
    - Organization
    - Usage
    - Motivation
    - Background
    - Directions

- Instructions shape attitudes of the readers.
- Many writers of the instructions focus their attention so sharply on the task.
- You can increase the effectiveness of most instructions by including visual aids.
- Well designed visual aids are much more economical than words.
- It may seem that instructions are among the easiest of all communications.
- Actually instructions present a considerable challenge to the writer.
- The conventional superstructure for instructions contains five elements.

- Instructions shape attitudes of the readers.
- Many writers of the instructions focus their attention so sharply on the task.
- You can increase the effectiveness of most instructions by including visual aids.
- Well designed visual aids are much more economical than words.
- It may seem that instructions are among the easiest of all communications.
- Actually instructions present a considerable challenge to the writer.
- The conventional superstructure for instructions contains five elements.
- The simplest instructions contain only directions.
- Writers usually announce the subject of their instructions in the first sentence.

ENG201

Lecture 31 and 32

Using and Creating Twelve Types of Visual Aids

Concept

MCQs

Final Term Preparation

Short Q.

Long Q.

Visual Aids

Visual aids can be defined as instructional aids, such as posters, scale models, graphs, tables, diagrams, flow charts or videotapes, that present information visually.

- Visual aids can add a new dimension to presentations.
- In some situations, visual aids can carry the entire message.
- The first step in using visual aids effectively is to places where they can used.
- For many tasks, visual aids are much easier than prose for readers to use.
- Simplifying visual aids also means removing unnecessary details.
- Titles help your audience find the visual aids they are looking for and know what the visual aids contain when they find them
- Sometimes, two or three visual aids can communicate the same information more effectively than one.

Creating Twelve Types of Visual Aids

- Tables
- Bar graphs
- Pictographs
- Line graphs
- Pie charts
- Photographs
- Drawings
- Diagrams
- Flow charts
- Organizational charts
- Schedule charts
- Budget statements

1. Tables

The table is one of the most versatile and widely used visual aids. They are an excellent tool for groups of detailed facts in a concise and readable form.

To create a table, you systematically arrange information in rows and columns. (Row = Horizontal, Column= Vertical)

2. Bar Graph

Like a table, a bar graph can represent numerical quantities, which is done using rectangles called bars. The greater the quantity, the longer the bar will be.

Some uses of bar graphs are as follows:

1. To compare quantities at a glance
2. To show trends
3. To indicate the composition of a whole

2. Bar Graph

Like a table, a bar graph can represent numerical quantities, which is done using rectangles called bars. The greater the quantity, the longer the bar will be.

Some uses of bar graphs are as follows:

1. To compare quantities at a glance
2. To show trends
3. To indicate the composition of a whole

3. Pictographs

Pictographs are a special kind of bar graph in which the bars are replaced by drawings that represent the thing being described.

We draw pictures instead of rectangles to represent quantities in pictograph.

- Emphasize the practical consequences of the data represented.
- Make your data visually interesting and memorable.

4. Line Graph

A line graph shows how one quantity changes as a function changes in another quantity.

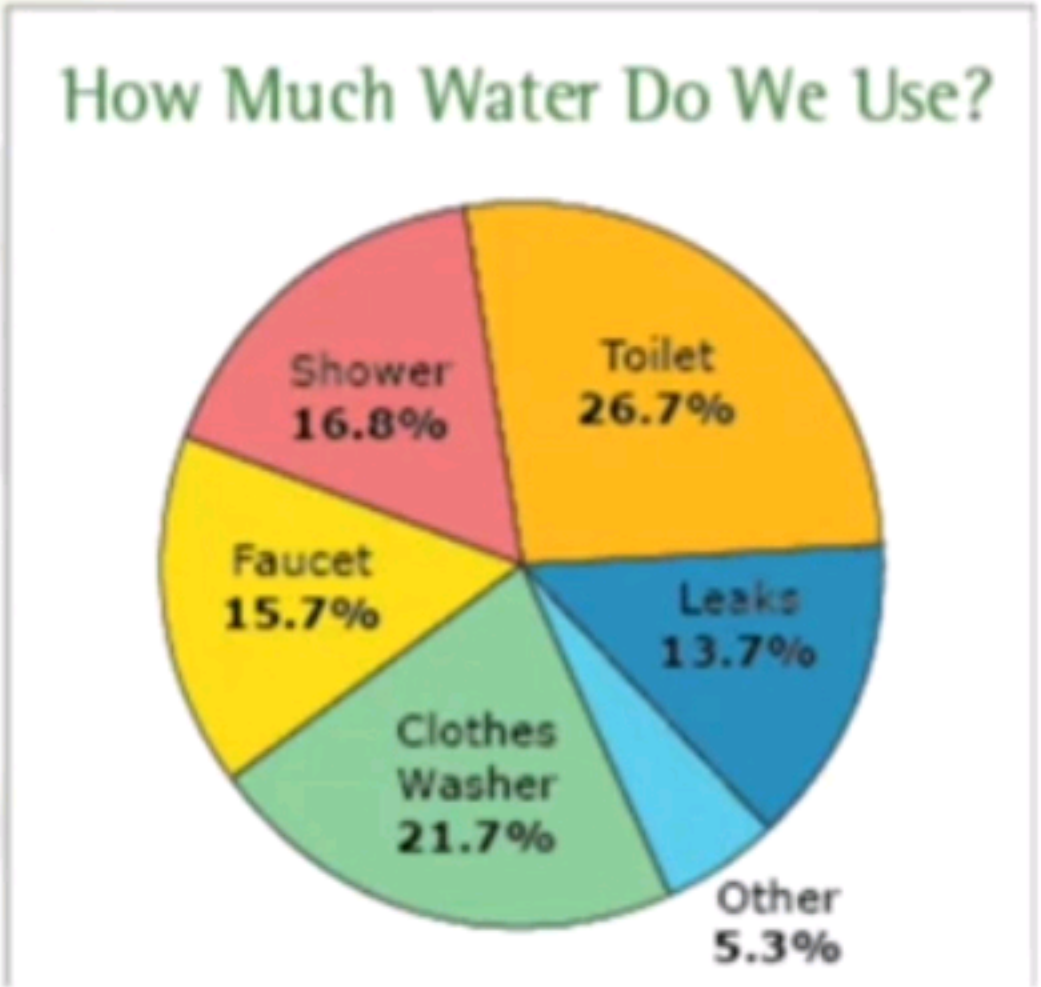
In line graphs, you generally show how variation in one thing (called the dependent variable) affected by variation in another thing (the independent variable).

Dependent variable - vertical axis
Independent variable - horizontal one.

Time is usually treated as an independent variable so it goes on the horizontal axis.

5. Pie Chart

A type of graph in which a circle is divided into sectors that each represent a proportion of the whole.



5. Pie Chart

A type of graph in which a circle is divided into sectors that each represent a proportion of the whole.

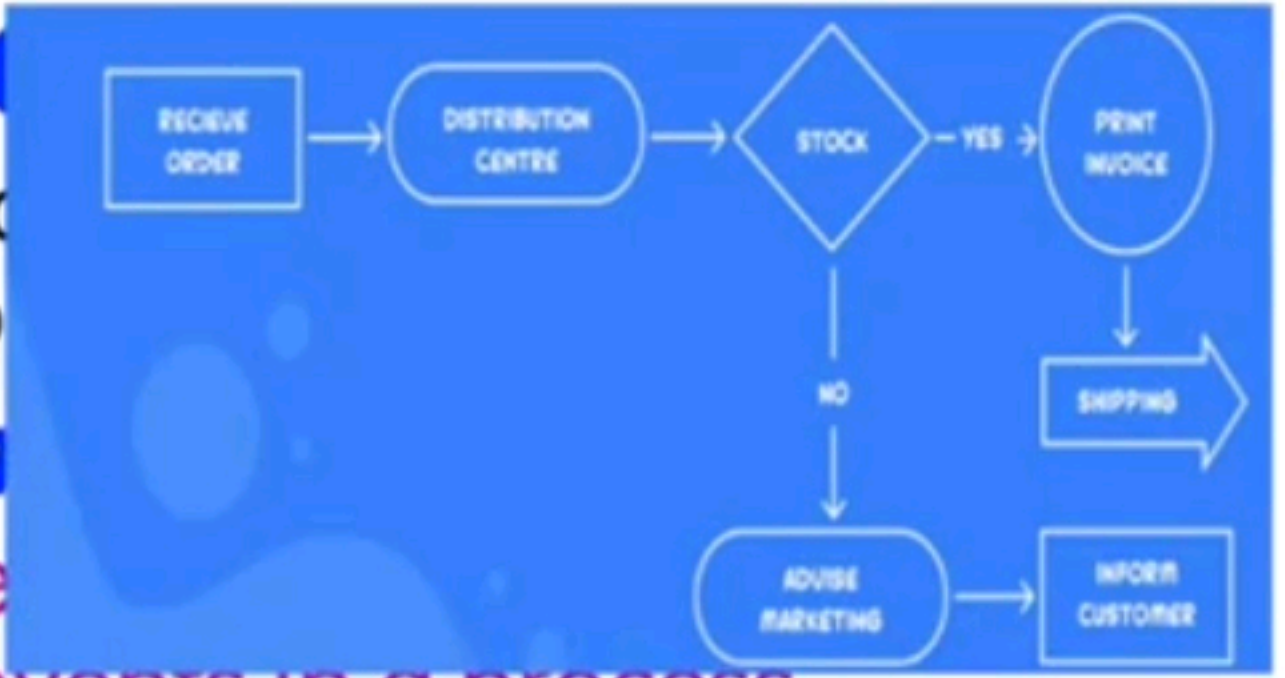
6. Flow Chart

Flow charts are an excellent means of representing the succession of events in a process.

5. Pie C

A type of graph in which a c
that each represent a p

6. Flow



Flow charts are an excelle
the succession of events in a process.

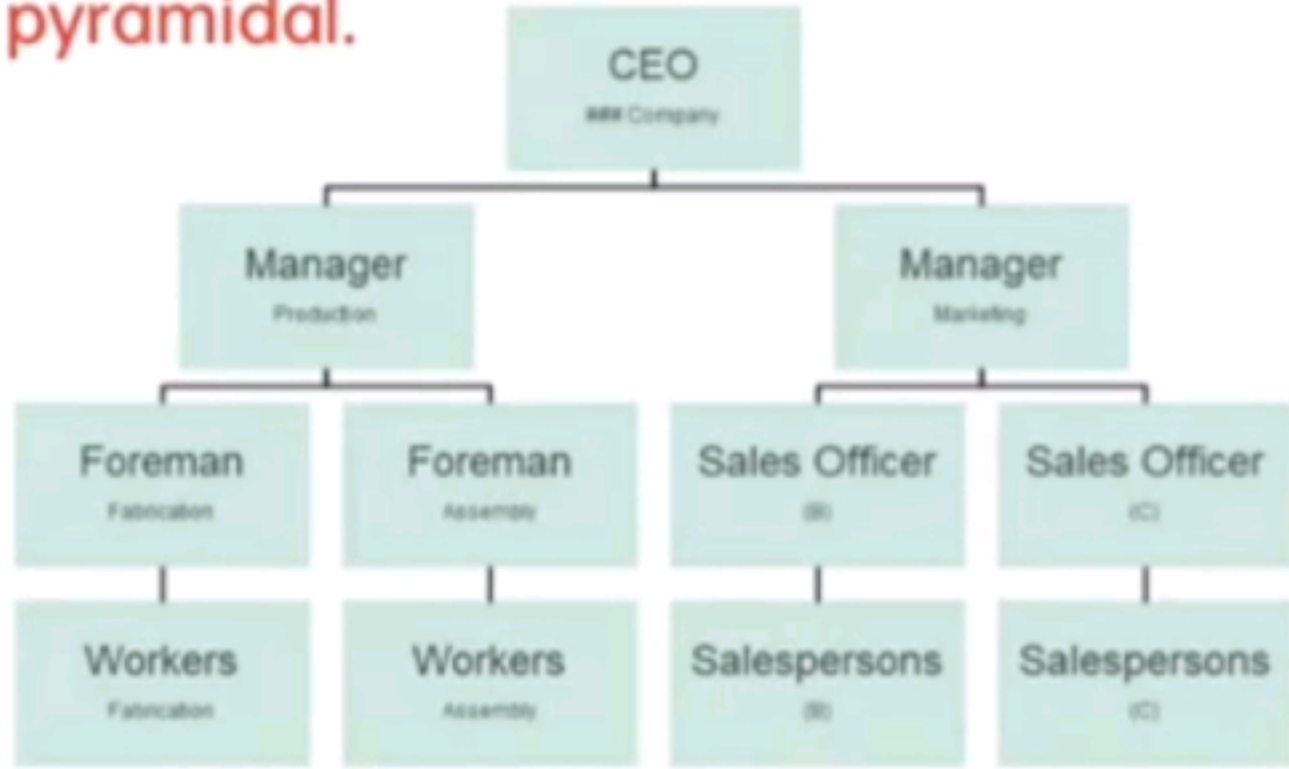
The simplest flow charts use rectangles, circles, diamonds, or other geometric shapes to represent events, and arrows to show the progress from one event to another.

Boxes are arranged so that activity flows from left to right, or from top to bottom, or both.

7. Organizational Chart

An organizational chart uses rectangles and lines to represent the arrangement of people and departments in an organization. It reveals the organization's hierarchy, indicating how the l smaller units are combined to create larger units. It also indicates who reports to whom and who gives direction to whom.

Organizational charts are usually pyramidal.



7. Organizational Chart

An organizational chart uses rectangles and lines to represent the arrangement of people and departments in an organization. It reveals the organization's hierarchy, indicating how the l smaller units are combined to create larger units. It also indicates who reports to whom and who gives direction to whom.

Organizational charts are usually pyramidal.

8. Schedule Chart

A schedule chart identifies the major steps in a project and tells when they will be performed.

You can also use schedule charts in progress reports to show what you have accomplished and what you have left to do

9. Photograph

1. To show the appearance of something the readers have never seen.
2. To show the condition of something e.g result of a skin treatment.
3. To help the readers recognize something e.g lab work.
4. To help your audience find something e.g show parts of machinery in an instructional manual.

10. Budget statements

A budget statement is a table that shows how money will be gained or spent.

11,12. Diagrams, Drawing

Diagrams can convey complex information, such as the system used for industrial processing of fruits, without actually showing the actual machinery.

ENG201

Lecture 33

Writing Specifications and Analysis Reports

Concept

MCQs

Final Term Preparation

Short Q.

Long Q.

Specifications

A document contain key information related to the product.

- Requirement specifications
- Functional specifications
- Design specifications
- Test specifications

1. Requirements Specification

The result of market research is requirement specifications. In it, the marketing people attempt to specify what the market is looking for.

Product definition:

This is a description written about the desired product. It should answer the question: “What is it?”

Functions list:

This is a description of what the desired product should be capable of doing.

Cost:

This is estimated price as to what the desired product should cost to be competitive in the marketplace.

2. Functional Specifications:

A functional specification is a formal document used to describe a product's intended capabilities and function.

3 Design Specification

Give idea about the design of desired products

4. Test Specification

They are written at the item level, and allow test developers or item writers to produce new versions of a test for different test-taking populations.

Analysis Reports

- Written to solve problems
- Information is analyzed.
- Conclusions are drawn and recommendations are made

The important thing to remember is that no report format is perfect. Company documentation standards attempt to resolve the issue by prescribing a format into which all analysis reports are poured.

- Title Page
- Abstracts
- Table of Contents
- List of Symbols
- Introduction
- Discussion
- Conclusion
- Recommendations
- Appendix

- Title Page
- Abstracts
- Table of Contents
- List of Symbols
- Introduction
- Discussion
- Conclusion
- Recommendations
- Appendix

1. Title Page

A title page should be designed with visual order in mind. It should be balanced from top to bottom and from left to right. It should provide enough information for readers to be able to tell what the context of the report is and what the report is about.

2 Abstract

Abstracts are condensation of entire reports, focusing on the main issues: what was done, what was found out, and its significance. Abstracts are self-sufficient.

3. Table of Contents

The table of contents provides an idea for readers who do not wish to read the entire report or flip through it looking for the section which contains what they are looking for.

4. List of Symbols:

This is an optional addition to the front matter of an analysis report which includes different symbols.

5. Introduction:

Main issue of the report.

6. Discussion:

Evidence and Explanation

7. Conclusion:

Results of the analysis.

8. Recommendations:

Are optional, not all analysis reports have them. It tell the readers what to do with the information provided in the report.

9. Appendix

Include derivations of equations, tables of raw data, sample equations etc.

ENG201

Lecture 34

How to Avoid Common Writing Problems

Concept

MCQs

Final Term Preparation

Short Q.

Long Q.

How to Avoid Common Writing Problems:

Common Writing Problems

1. Writer's Block
2. Organizational Problems
3. Punctuation Problems
4. Readability Problems
5. Writing Style Problems

How to Avoid?

1. Organizational logic
2. Mechanical development of the topic
3. Writer's style
4. Quality of the manuscript

1. Writer's Block

Getting stuck while writing.

Factors / Causes

a. Lack of information
b. Lack of a well defined purpose
c. Poor knowledge of the audience
d. Lack of confidence

2. Organizational Problems

These problems are discovered during the editing phase. If they are not fixed, readers experience these organizational problems as complete breakdowns in communication.

3. Punctuation Problems

Accurate punctuation does not ensure accurate communication, but accurate communication is tremendously enhanced by accurate punctuation.

4. Readability Problems:

Writing complex and difficult sentence and using unfamiliar words.

Gunning's Fog Index

This is a simple formula aimed at locating the audience on a grade scale which is supposedly based on their reading abilities.

- Select a part of the text.
- Count the number of sentences in the selected text.
- Determine the average length of sentences by dividing the number of words in the text by the number of sentences.
- Count the number of difficult words.
- Add the number for the average sentence length to the number of difficult words.
- Multiply this sum by 0.04.
- The result is the Fog Index. (For normal audience it is 7, 8)

1. Writer's Block

Getting stuck while writing.

Factors / Causes

a. Lack of information
b. Lack of a well defined purpose
c. Poor knowledge of the audience
d. Lack of confidence

2. Organizational Problems

These problems are discovered during the editing phase. If they are not fixed, readers experience these organizational problems as complete breakdowns in communication.

3. Punctuation Problems

Accurate punctuation does not ensure accurate communication, but accurate communication is tremendously enhanced by accurate punctuation.

4. Readability Problems:

Writing complex and difficult sentence and using unfamiliar words.

5. Writing Style Problems:

Style is a result of sentence structure.

There are four basic types of sentences:

1. SV
2. SVO
3. SLVC
4. SVIO

How to Avoid these Mistakes (How to edit your work)

1. Organizational Logic :

Organizational logic can be achieved by arranging the events chronologically (in order) or spatially (position and size).

2. Mechanical Development of the Topic

Transition is what links the ideas together.
Transition can be accomplished in three ways:

a) The writer might repeat an important word in two adjoining paragraphs or sentences.
b) Structure can accomplish transition.
c) Transitional words and phrases can be used to establish links between ideas in an obvious way, such as “Finally”.

3. Writer’s Style:

If you wish to sell an idea or a product, then the style must be persuasive. If you wish to convey information only, such as in a report to superiors, then the style should appear to be passively objective.

4. Quality of the Manuscript

The last thing a writer needs to examine when editing a document is the quality of the manuscript

A manuscript should be visually attractive.

Proofreading is a quick checking for errors, while editing requires being judgmental.

Language Review:

The language review addresses these types of problems by focusing on language issues that make the document easier for the user to read and understand.

1. Paragraph Unity	(Lecture - 35)
2. Sentence	(Lecture - 36, 37)
3. Words and Punctuation	(Lecture - 38, 39)
4. Mechanics (Rules for writing)	(Lecture - 40)

1. Paragraph Unity:

Paragraph Development:

- Exemplification
- Narration
- Process
- Description
- Analogy
- Cause and Effect
- Comparison and Contrast
- Classification and Division
- Definition
- Analysis
- Enumeration

1. Paragraph Unity:

i. Exemplification

✓ Use of specific examples to explain an idea in a paragraph.

ii. Narration:

✓ Establish a series of events that tells the reader what happened (Story).

iii. Process:

✓ Explain how something works (step by step) - follow a sequence first, second, third..

iv. Description:

✓ Provide a physical picture of the subject, what something looks, smells, tastes, sounds, or feels.

v. Analogy:

✓ Explain one object or process in terms of another. Immune system compared with army.

vi. Cause and Effect:

✓ It is analytical mode of paragraph development. Show how events are caused by others.

vii. Comparison and Contrast:

✓ Examining similarities or dissimilarities.

viii. Classification and Division:

✓ Grouping into classes. Classification is the tutorial

ix. Definition:

✓ Meaning and Scope of important terms.

x. Analysis:

✓ Evaluating one of its aspects weighing evidence and possible causal linkages e.g link between cancer, poverty, and stress.

xi. Enumeration:

✓ Make list of topics or a series of some kind. Enumeration is a powerful way to establish a series of observations and to emphasize each element.

Language Review:

The language review addresses these types of problems by focusing on language issues that make the document easier for the user to read and understand.

1. Paragraph Unity (Lecture - 35)

2. Sentence (Lecture - 36, 37)

3. Words and Punctuation (Lecture - 38, 39)

4. Mechanics (Rules for writing) (Lecture - 40)

2. Sentences

Modifier:

Modify or enhance the meaning of other word in a sentence.

Ali is tall boy.

Lengthy Modifiers - Stacked Modifiers

2. Sentences

i. Avoid stacked modifiers and nouns because they create ambiguity. Add a prepositions and conjunctions for this purpose.

ii. Place your modifiers carefully.

iii. Longer and more complicated modifier weakens the sentence, so avoid it.

iv. Modifiers of nouns should be placed either immediately before or immediately after the noun.

v. Adverbs should be placed as close as possible to the words or phrases that they modify.

vi. Avoid using Dangling modifier. A modifier whose connection to the sentence is implied or intended but not actually made explicit is said to dangle. (A word that modifies the wrong thing).

2. Sentences

vii. There should be parallelism in sentence (Parts of sentence should be same in structure and function).

viii. Avoid choppy sentences (Too many short sentences).

ix. Avoid double Negatives . Use only one negative word to express a negative idea. In English, using two negative words to express one negative idea creates a positive rather than a negative interpretation.

x. Avoid Faulty Comparisons. Comparing one item with another can be a very powerful way to describe an object or a process.

xi. Avoid Incomplete Comparisons (A comparison must include both the item being compared and the item it is being compared with).

Example:
Shoaib Akhtar is a better player.(Incorrect)
Shoaib Akhtar is a better player than Bret Lee.(correct)

xii. Avoid Inappropriate Shifts (choice of tense mood, person, and voice.)

2. Sentences

xiii. Avoid wordiness sentences.

Causes

- Excessive use of passive voice
- Excessive Nominalization (turning verb into noun)
- Unnecessary repetition
- Unnecessary words and phrases

xiv. Avoid overloaded sentences.

Causes

- Sentence Fragments
- Comma Splice Error
- Fused sentence
- Stringy Sentence

2. Sentences

√ Sentence Fragments

A sentence fragment is missing a subject, a verb, or both.

√ Comma Splice error

Using a comma to link two independent clause.

You can correct a comma splice in four ways:

- Separate the independent clauses into two separate sentences.
- Replace the comma with a semicolon.
- Replace the comma with a comma and a coordinating conjunction.
- Make one of the clauses into a subordinate clause.

√ Fused Sentences

Do not allow two independent clauses to run together without a conjunction or punctuation between them. This error produces a fused sentence.

√ Stringy Sentences

Stringy sentence is a sentence that is usually difficult to read and understand because it has too many clauses.

2. Sentences

xv. When editing your work, check for agreement.

Link Between:

✓ Subject ------ Verb

He plays cricket.

✓ Noun ------ Antecedent

Ahmad and Ali play cricket. They are intelligent.

Language Review:

The language review addresses these types of problems by focusing on language issues that make the document easier for the user to read and understand.

1. Paragraph Unity (Lecture - 35)

2. Sentence (Lecture - 36, 37)

3. Words and Punctuation (Lecture - 38, 39)

4. Mechanics (Rules for writing) (Lecture - 40)

3. Words

i. For clear writing use specific, carefully chosen words, not abstract and general language.

ii. Avoid vague words (unclear in meaning). Amount of detail in your writing will depend on your audience, use specific facts whenever possible.

iii. Avoid ornate words (use of complex words for decoration), because ornate words simply distract the reader from your main point. Use the simplest, most direct words possible.

iv. It is important that you should be aware of your audience's level of understanding. Match terminology and words to the ability of the audience.

v. Avoid biased language and words. (Hurtful words and some people or groups feel excluded such as gender, age etc).

4. Punctuation

Punctuate your prose in order to clarify how words, clauses and sentences fit together.

i. Periods.
ii. Commas,
iii. Colons :
iv. Semicolons ;
v. Question marks ?
vi. Exclamation points !
vii. Apostrophes '
viii. Quotation marks " "
ix. Hyphens –
x. Dashes –
xi. Parentheses ( )
xii. Brackets [ ]

4. Punctuation

ii. Comma,

- Place a comma after a transitional word or phrase that begins a sentence such as however, hence, also, consequently, meanwhile, nevertheless, moreover etc.
- Place a comma after dependent clause.
- Place a comma before a coordinating conjunction (and, but, or) that joins two independent clauses.
- Use a comma to separate items in a series e.g desk, table, pen, students.
- Use a comma between coordinate modifiers. (Modify the same word).
- Use commas in nonrestrictive modifiers.

> A nonrestrictive modifier is usually introduced by *which* and contains information that is not essential to establishing the meaning of what it modifies.

Example:

Infectious diseases, **which antibiotics and vaccines once promised to banish from our shores,** have returned with a vengeance.

4. Punctuation

ii. Comma,

- Place a comma after a transitional word or phrase that begins a sentence such as however, hence, also, consequently, meanwhile, nevertheless, moreover etc.
- Place a comma after dependent clause.
- Place a comma before a coordinating conjunction (and, but, or) that joins two independent clauses.
- Use a comma to separate items in a series e.g desk, table, pen, students.
- Use a comma between coordinate modifiers. (Modify the same word).
- Use commas in nonrestrictive modifiers.
- Use comma for Parenthetic Elements (non essential information).

John Smith, a boy from our village, beat Garry Kasparov at speed chess. ✓

If you remove the yellow text, the sentence still works.

4. Punctuation

ii. Comma,

- Place a comma after a transitional word or phrase that begins a sentence such as however, hence, also, consequently, meanwhile, nevertheless, moreover etc.
- Place a comma after dependent clause.
- Place a comma before a coordinating conjunction (and, but, or) that joins two independent clauses.
- Use a comma to separate items in a series e.g desk, table, pen, students.
- Use a comma between coordinate modifiers. (Modify the same word).
- Use commas in nonrestrictive modifiers.
- Use comma for Parenthetic Elements (non essential information).
- Use comma in Elliptical Constructions

Example:

In the United States there are ninety-two scanners; in Europe, eighty-five; in all of Africa, six.

[The commas indicate the omission of the words *there are*.]

4. Punctuation

ii. Comma,

- Place a comma after a transitional word or phrase that begins a sentence such as however, hence, also, consequently, meanwhile, nevertheless, moreover etc.
- Place a comma after dependent clause.
- Place a comma before a coordinating conjunction (and, but, or) that joins two independent clauses.
- Use a comma to separate items in a series e.g desk, table, pen, students.
- Use a comma between coordinate modifiers. (Modify the same word).
- Use commas in nonrestrictive modifiers.
- Use comma for Parenthetic Elements (non essential information).
- Use comma in Elliptical Constructions
- Place commas inside quotation marks but outside parenthese.
- In numbers with five or more digits, Anglo-American usage dictates that there should be commas before groups of three digits, counting from the right, except for a group of three digits at the beginning of the number.

Example:
Customers reported a total of 212,413 hardware malfunctions.

4. Punctuation

iii. Collon:

Use colons for the following purposes:

- To introduce lists.
- Use to emphasis Quotations (Ali noted: "Potatoes are rich with proteins").
- To express ratios (3 : 4)
- Use in time (7 : 15 am)
- To separate titles from subtitles.

iv. Semicolons;

- Separate parts of a sentence that have commas in them.

  Italicize titles of journals, books, newsletters, and manuals; letters, words, terms, and equation symbols; foreign words; and names of specific vessels.

- Join Two Independent Clauses.

  The system has three beam launchers; two are in the two-tube combiner, and one is in the OP receiver.

4. Punctuation

v. Question Mark?

- Use a question mark to end an interrogative sentence.
- Use a question mark to change a declarative or imperative sentence into a question.
- When a directive or a command is phrased as a question, a question mark is optional.

vi. Exclamation Points !

- Warning or caution statements.
- Convey emotion.
- Indicates shouting.

Hurrah! We won the match.

vii. Apostrophes'

- Show possession.

Singular = 's (Ali's car)
Plural = s' (Three friends' letter)

- Use in contractions.

don't, wouldn't.

4. Punctuation

viii. Quotation Marks " "

- To enclose the title (The channel "J Biology" is very helpful).
- Use in direct speech. (J Biology said, "Work hard")

4. Punctuation

ix. Hyphens -

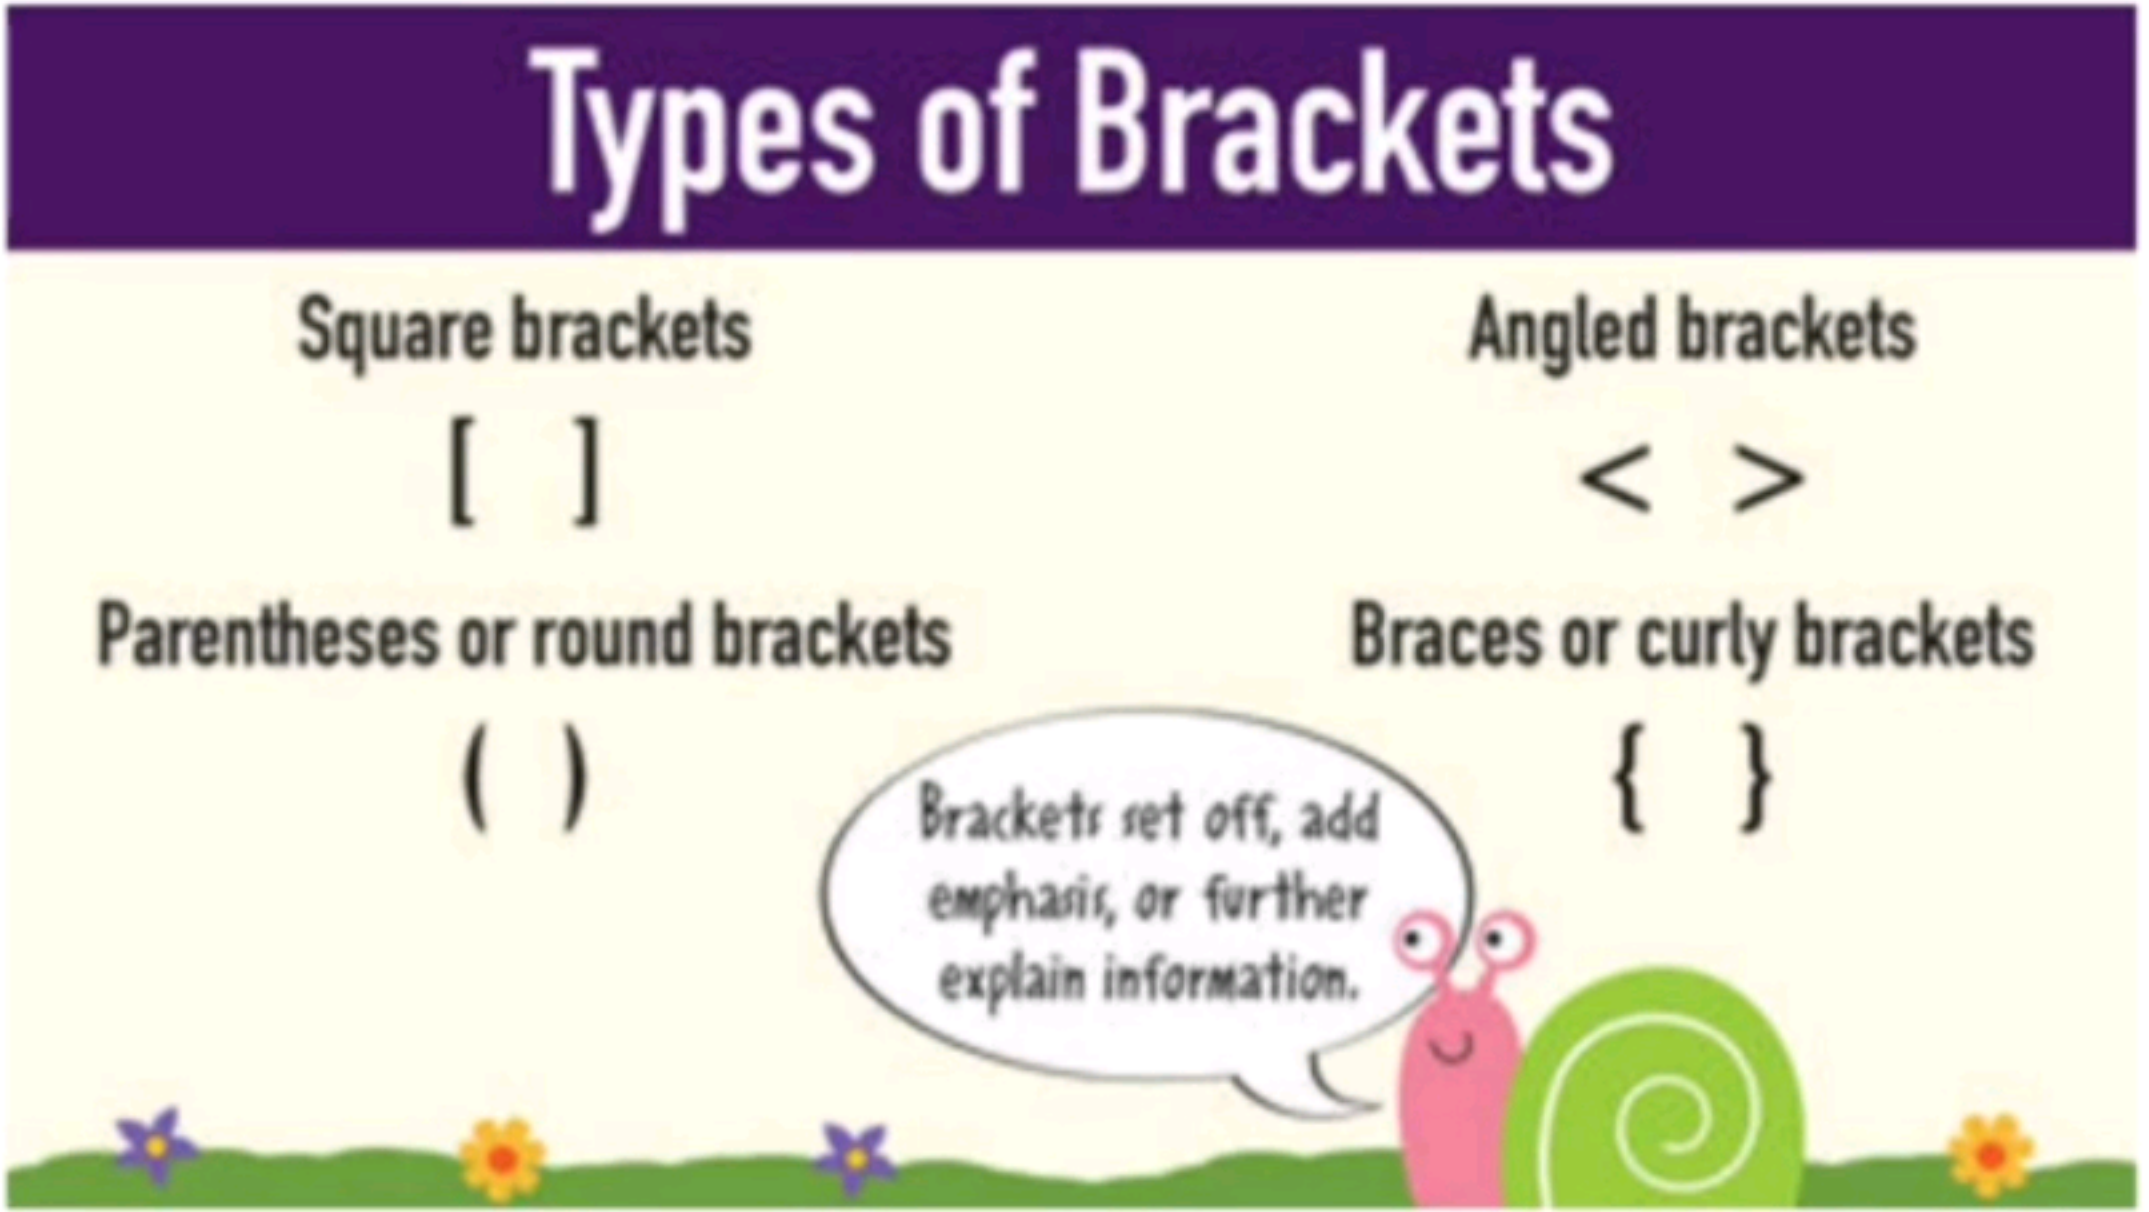
- Prefix - noun (Self - respect)
- Letter - noun (T - cell)
- Numbers - noun (35 - cylinders)
- Prefix - Capitalized noun (post-Newtonian universe)
- To Link Compound Nouns (Light-year, Mother-in-law)
- To Link Spelled-Out Numbers from 21 to 99 (The thirty-third experiment
- Used to divide words (com-pu-ter, Light-year, maintain -ability)
- Used to stand "to" (1911 - 2011)
- To represent single bonds in chemical formulas (CH2 - CH2)
- Between chemical element and the mass number (Carbon-14)
- Between sequences of amino acids (Asp-His-Lys)

x. Dashes _

- Used to shifts in thought. (Although we have made these comments with specific reference to water--only because of our familiarity with water--all pure substances exhibit the same behavior).

4. Punctuation

xi. Parentheses ( )



4. Punctuation

xi. Parentheses (Round Brackets)

- To add in extra and relevant information to the main text

xii. Brackets [Square Brackets]

- To add in extra and relevant information in the quotation.

e.g According to Smith, "Proton energy levels [in the accelerator] are consistently higher than expected."

Language Review:

The language review addresses these types of problems by focusing on language issues that make the document easier for the user to read and understand.

1. Paragraph Unity (Lecture - 35)

2. Sentence (Lecture - 36, 37)

3. Words and Punctuation (Lecture - 38, 39)

4. Mechanics (Rules for writing) (Lecture - 40)

5. Mechanics

Rules for writing

i. Capitalization
ii. Italics
iii. Abbreviations
iv. Acronyms
v. Numbers
vi. Enumeration
vii. Symbols
viii Equations
ix. Spelling

5. Mechanics

i. Capitalization

- Capitalize the first words of sentences, including quotations.
- Capitalize proper nouns.
- Capitalize titles of books.

ii. Italics:

- Titles of Journals, Books, Newsletters, and Manuals.
- Foreign Words will be italicized. "The word for war in Spanish is *guerra*."
- Use to emphasis on words in a sentence.

iii. Abbreviations: (Shortened forms of words)

- Avoid unnecessary abbreviations, which can confuse a reader.
- Always abbreviate certain words that includes:

Mr., Ms., B.A., Ph.D., B.C., B.C.E.
cf. (from the Latin for "compare")
et al. (from the Latin "and others")

5. Mechanics

iii. Abbreviations: (Shortened forms of words)

- Avoid unnecessary abbreviations, which can confuse a reader.
- Always abbreviate certain words that includes:

Mr., Ms., B.A., Ph.D., B.C., B.C.E.
cf. (from the Latin for "compare")
et al. (from the Latin "and others")

iv. Acronyms: (Formed from the first letters of each of the words)

- Avoid repetition of phrases.

AIDS -- Acquired Immunodeficiency Syndrome
RAM -- random-access memory
ROM -- read-only memory
DOS -- Disk Operating System
FTP -- file transfer protocol
HTML -- Hypertext Markup Language
HIV -- Human Immunodeficiency Virus

5. Mechanics

u. Numbers:

- Use Arabic number instead of words (6 braces, 61 amino acids, 3rd line)
- Up to four digits - no punctuation (8024)
- Five digits or more use comma (,) to makes groups of three digits (12,432,421)
- Use the period (.) to indicate the decimal point (1.0)
- Use an initial zero (0) for numbers less than one (0.314)

5. Mechanics

vi. Enumeration:

- Sequences of chapters, sections, page numbers, figures and tables, equations, footnotes, and appendixes.
- Two general enumeration systems widely used, the numerical system is clearer than the alphanumerical system.

✓ Pagination: Number the pages with Arabic numerals, starting with page 1.

✓ Tables and Figures: Number tables and figures sequentially as Table 1, Table 2, Table 3, and so on, often prefixed with a chapter number e.g Table 5.1 (First table of Chapter 5).

vii. Spelling:

- Always proofread your document for misspellings.
- If you are writing on a word processor, always use the spell checker but do not rely on it alone.
- It cannot catch one word substituted for another (discreet for discrete).

Question # 10 of 10 (Start time: 02:41:40 PM, 04 July 2024)

Choose the correct option:

'Appendix' of an analysis report usually includes...

Select the correct option Page # 154

- ○ All of the above ✓
- ○ sample equations
- ○ tables of raw data
- ○ derivation of equations

- Count the number of words which have three or more syllables. But *do not* count words which are capitalized, words which have three syllables because prefixes or suffixes have been added, or words which are combinations of one- or two-syllable words.
- Add the number for the average sentence length to the number of three-syllable words in the text.
- Multiply this sum by 0.04.
- The result is the Fog Index. If you place it on a scale of 1-20, you will be able to have the approximate reading level required to understand the text.

Writing Style Problems:

Style is a result of sentence structure. Although you might not think so, sentence structure is simple and easy to understand. There are four basic types of sentences:

Subject-verb sentences (SV)

Example:

The programmer (S) quits (V).

Subject-verb-object sentences (SVO)

© Copyright Virtual University of Pakistan

Example:

The programmer (S) kicked the terminal (O).

Subject-linking verb – complement sentence (SLVC)

Example:

The programmer (S) felt (LV) sick (C).

Subject-verb-indirect object – object (SVIO)

Example:

The programmer (S) gave (V) the engineer (IO) a headache (O).

How to Edit Your Work:

This lecture will present some ways that can be helpful for writers for assessing the quality of their work and the work of others. Good editing divides the task of improving a document into a limited number of areas which are:

1. Organizational logic
2. Mechanical development of the topic
3. Writer's style
4. Quality of the manuscript

Reports

Reports are documents which present focused, salient content to a specific audience. Reports a often used to display the result of an experiment, investigation, or an inquiry. You may be surprised that a variety of documents qualify as reports. The word report covers everything fro preprinted forms to brief, informal letters and memos to three-volume manuscripts. It should b noted that reports are considered to be legal documents in the workplace and, thus, they need t be precise, accurate and difficult to misinterpret.

What makes a good report?

Good reports have three things in common:

a. The information is accurate
b. The content shows writer's good judgment
