Question # 1 of 10 (Start time: 08:57:10 AM, 30 December 2024) **Total Marks:** 1

Primal of a Primal is-------.

Select the correct option

- dual primal
- Prima primal
- Dual
- (•) Primal

Question # 2 of 10 (Start time: 08:57:40 AM, 30 December 2024) **Total Marks:** 1

"Minimizing:Z = 2x−3y+5t" is equivalent to-------.

Select the correct option

- Minimizing:Z* = −2x+3y−5t
- Maximizing:Z* = 2x−3y+5t
- (•) Maximizing:Z* = −2x+3y−5t
- Minimizing:Z* = −2x−3y−5t

MTH601 - Operations Research (Quiz 02) Quiz Start Time: 08:57 AM, 30 December 2024

Question # 3 of 10 (Start time: 08:58:08 AM, 30 December 2024) **Total Marks:** 1

For $Z = 4x_1 + x_2$ subject to $3x_1 + 4x_2 \geq 20, x_1 + 5x_2 \geq 15$, we have _____ variables.

Select the correct option

Reload Math Equations

- three objective
- one slack
- six
- two artificial

Question # 4 of 10 (Start time: 08:58:25 AM, 30 December 2024) **Total Marks:** 1

If an LP problem contains large number of constraints and a smaller number of variables then which of the following will reduce the computational burden in finding its solution?

Select the correct option

- Graphical method
- M-method
- Two phase method
- Duality principle

Question # 5 of 10 (Start time: 08:58:43 AM, 30 December 2024) **Total Marks:** 1

A Linear Programming problem may not have any feasible solution.

Select the correct option

- (●) True
- ( ) False

MTH601 - Operations Research (Quiz 02) **Quiz Start Time: 08:57 AM, 30 December 2024**

Question # 6 of 10 (Start time: 08:59:02 AM, 30 December 2024) **Total Marks:** 1

We detect an _____ solution to a linear programming problem from the simplex table if at any iteration, any of the candidates for the entering variable have all negative or zero coefficients in the constraints.

Select the correct option

Reload Math Equations

- (●) unbounded
- ( ) infeasible
- ( ) tempropraily Degenerate
- ( ) degenerate

MTH601 - Operations Research (Quiz 02) Quiz Start Time: 08:57 AM, 30 December 2024

Question # 7 of 10 (Start time: 08:59:19 AM, 30 December 2024) **Total Marks:** 1

If "$Max\ \ Z = x - y$, subject to $x > 3, x < 2, x, y > 0$" is solved by two phase method, then which of the following would be the objective function of 1st phase?

Select the correct option

Reload Math Equations

- (●) Min $Z = A$
- ( ) Max $Z = x - y + 0s_1 + 0s_2 + MA$
- ( ) Max $Z = A$
- ( ) Min $Z = x - y + 0s_1 + 0s_2 + MA$

Question # 8 of 10 (Start time: 08:59:36 AM, 30 December 2024) **Total Marks:** 1

In two phase method if the minimum value of objective function in the first phase is greater than zero, then the solution of original problem _____.

Select the correct option

- ( ) non of these
- (●) does not exists
- ( ) exists
- ( ) is uncertain

MTH601 - Operations Research (Quiz 02) Quiz Start Time: 08:57 AM, 30 December 2024

Question # 9 of 10 (Start time: 08:59:56 AM, 30 December 2024) **Total Marks:** 1

The inequality $3x - 2y \geq 14$ is equivalent to_____.

Select the correct option

Reload Math Equations

- $-3x + 2y > 14$
- $-3x + 2y \leq -14$
- $3x - 2y \leq 14$
- $3x - 2y < -14$

Question # 10 of 10 (Start time: 09:00:24 AM, 30 December 2024) **Total Marks:** 1

While solving an LP problem by Simplex method, if we have '3' constraint equations in '5' variables then to find basic variables we have to put any ------- variables equal to zero.

Select the correct option

- 3
- 4
- 1
- 2
