VU EXPERT ZOOLOGISTS

IMPORTANT QUESTIONS

1. Name of sampling types?
2. Systematic and clusters probability.
3. Comparison between population and sampling.
4. Branches of statistics.
5. Quantitative and qualitative Variables.
6. Example of nominal scale.
7. How we select sample in cluster sampling? 8. Formulae of variance.
9. Random and based error.
10. Sampling types and why we need sample?
11. Types of clusters.
12. What is data and source of data?
13. Types of distribution.
14. Box and whisker plot.
15. Pie chart.
16. Chebychev's inequality.
17. Definitions of types of sampling.
18. Primary data and Secondary data.
19. Frequency distribution and frequency histogram.
20. Steps of whisker plot.

21. Outlier.
22. Braised or standard error definition.
23. Draw histogram.
24. Assumption of measurement scale.
25. Continuous and discrete variable.
26. Excel sheet.
27. Is it easy to drive sample from homogeneous and finite population than from heterogeneous and infinite population.

Some numerical questions in which we have to find:

28. probability
29. mean
30. median
31. mode
32. frequency
33. range
34. Standard Variation
35. Variance
