Exchange of information takes place in seconds

ALL Above

Key features of EDI include:

No paper work

No human intervention

Exchange of information takes place in seconds.

SWOT stands for _____.

Show Weaknesses, Opertunities and Threats

Strength , Weaknesses , Opertunities and Threats

Strength, Weaknesses and Open Threats

Strength Weaknesses , Opertunities and Traits

SWOT (strengths, weaknesses, opportunities and threats).

Which of these payment systems does not involve the use of encryption?

Electronic check

Electronic cash

Virtual PIN

None

Virtual PIN system does not involve the use of encryption.

Suppose you want to buy diamonds. Which of the following payment system you should give LEAST preference for this purpose?

Virtual PIN payment system

Electronic checks

Electronic Cash

Credit card

VIRTUAL PIN PAYMENT SYSTEM: One of the disadvantages of this payment model is that pre-registration of the buyer and the merchant with FV is mandatory in this set up. Moreover, maintaining a bank account (in case of merchant) and having a credit card (in case of a buyer) is also essential part of this system. One can say that the merchant side

is less secured in the transaction because the goods are delivered by the merchant before the payment is actually received.

23) Question # 3 of 10 (Start time: 04:45:14 PM) Total M - 1

CRM stands for

Select correct option:

Customer Relationship Management

Customer Related Management

Customer Resembling Management

Customer Reallocation Management

24) Question # 4 of 10 (Start time: 04:45:41 PM) Total M - 1

SET and SSL both are same with respect to security.

Select correct option:

True

False

25) Question # 5 of 10 (Start time: 04:46:11 PM) Total M - 1

In Virtual Payment system , Four kinds of information is provided to e-bank. Identify which one is NOT included:

Select correct option:

Buyer Accounts identifier
Buyer password
Address of Merchant
Actual amount of money in favor of merchant

26) Question # 6 of 10 (Start time: 04:46:42 PM) Total M - 1
Which of following services build a strong customer loyalty towards company and its products?
Select correct option:

Customer services
Public relations(PR)
Bulletin board
Exhibitions.

27) Question # 7 of 10 (Start time: 04:47:35 PM) Total M - 1
Which of following marketing campaigns are cheap an effective way to target potential customers?
Select correct option:

Sale forces
E-mail
Media promotion
Marketing software

28) Question # 8 of 10 (Start time: 04:48:20 PM) Total M - 1
Free-Trial advertisement means _____.
Select correct option:

Free coupons are placed on certain websites for customers so that they can use it for shopping.
Customer is offered to use the product free of cost for a specific amount of time.
Items bought are delivered to the customers with no delivery cost.
The company didn't had to pay for this advertisement.

29) Question # 9 of 10 (Start time: 04:48:59 PM) Total M - 1
Which of the following option best represent "Data mining can improve response rate tremendously"?
Select correct option:

Direct mailing
Personalization technology
E-business
Opt-in e-mail

30) Question # 10 of 10 (Start time: 04:50:29 PM) Total M - 1
CPM is an advertising payment mode. CPM stands for _____.
Select correct option:

Cost Per Month
Cost Per Minute
Cost Per Megabyte
Cost Per Message

31) Which statement is most appropriate description of the term "Interactive-advertisement"?
Select correct option:

- By making an advertisement message using flash animation.
- Putting an audio or video message on the website to attract customer.
- By avoiding customer's involvement in the advertisement process.
- By involving the customer in the advertisement process itself.

32) What does Telemarketing means?
Select correct option:

- Marketing through charting
- Marketing through telephone
- Marketing through email
- Marketing through web casting

33) What is the right sequence of steps involved in development of customer's relationship with the business?
Select correct option:

- Familiarity, Awareness, Commitment, Exploration, Separation
- Awareness, Exploration, Familiarity, Commitment, Separation
- Familiarity, Awareness, Exploration, Commitment, Separation
- Awareness, Commitment, Familiarity, Exploration, Separation

34) www.amazon.com as you all familiar with it. Which of the following loyalty stages its customers are: (Who don't know about it): Detail about amazon.com Amazon was one of the first major companies to sell goods by Internet, and was an iconic "stock in which to invest" of the late 1990s dot-com bubble. Jeff Bezos founded Amazon.com, Inc. in 1994, and launched it online in 1995. Amazon.com started as an on-line bookstore, but soon diversified to product lines of VHS, DVD, music CDs, MP3 format, computer software, , etc. Amazon has established separate websites in Canada, the United Kingdom, Germany, France, China, and Japan. It also provides global shipping to certain countries for some of its products.
Select correct option:

- Awareness
- Exploration
- Familiarity
- Commitment

35) Web catalogue revenue model includes
Select correct option:

- a. Online sellers of computer
- b. Gifts, flowers, clothes
- c. Journals
- d. A and B

36) Track the customers online and do personalization is only possible through which of the following file(s) analysis.

Select correct option:

- log files
- cookie
- data mining
- log files and cookies.

Reference:

Cookies can be used to track customers online. Typically, a unique ID of the customer is stored in the cookie file on the hard disk. Same ID is also stored in the database along with the record of previously purchased items by the customer. When the customer again visits the online store, cookie (having customer ID prepared against that URL) is transmitted by the browser to the server side. There, it is matched with the ID in the database. This enables the merchant side to know that a particular customer (with a known buying pattern) has come to visit again. By tracking the customer in this manner, personalized recommendations for certain items can be made to the customer in real time.

37) In the template prefix, Template<class T> What kind of variable is the parameter T?

Select correct option:

- T must be a class.
- T must not be a class.
- T can be only types built into the C++ language. (Not sure ☹)
- T can be any type, whether built into C++ or defined by the programmer.

38) Fee for Transaction Models include

Select correct option:

- Travel Agents and Insurance brokers
- Automobile Sales and event tickets
- Stock brokers and online banking
- All of the above

39) While designing a website, which of the following factors an internet marketer should pay attention to?

Select correct option:

- Easy site navigation (i.e. Site map)
- Frequently asked questions (FAQs) section
- Privacy policy
- All of above

40) Question # 1 of 10 (Start time: 05:17:27 PM) Total M - 1

Four P's in Marketing Mix are

Select correct option:

- Product, price, place, promotion
- Price, person, place, problem

Place, product, property, promotion
Promotion, place, product, planning

41) Question # 2 of 10 (Start time: 05:17:43 PM) Total M - 1
In....., there is no direct contact with the end users
Select correct option:

B2B
B2C
C2C
All

42) Question # 3 of 10 (Start time: 05:18:01 PM) Total M - 1
What is the right sequence of steps involved in development of customer's relationship with the business?
Select correct option:

Familiarity, Awareness, Commitment, Exploration, Separation
Awareness, Exploration, Familiarity, Commitment, Separation
Familiarity, Awareness, Exploration, Commitment, Separation
Awareness, Commitment, Familiarity, Exploration, Separation

43) Question # 4 of 10 (Start time: 05:18:13 PM) Total M - 1
Payment gateway is an organization which connects those entities to the internet which are offline.
Select correct option:

True
False

44) Question # 5 of 10 (Start time: 05:18:55 PM) Total M - 1
Customer Loyalty model is also called
Select correct option:

Customer Life Cycle
Customer Segmentation
Customer Awareness
All

45) Question # 8 of 10 (Start time: 05:20:28 PM) Total M - 1
Creation of separate experiences for customers based on their behavior is called
Select correct option:

Demographic segmentation
Behavioral segmentation
Geo-Graphic Segmentation
None of the above

46) Question # 9 of 10 (Start time: 05:20:53 PM) Total M - 1
Which of the following option best represent "Data mining can improve response rate tremendously"?
Select correct option:

Direct mailing
Personalization technology
E-business
Opt-in e-mail

47) Question # 10 of 10 (Start time: 05:21:04 PM) Total M - 1

Dividing the potential customers into groups is called

Select correct option:

Market Segmentation

Market Promotion

Market Research

Market Survey

Question No: 6 (M - 1) .

Which Protocol is used for downloading messages to client machine from servers?

SMTP

POP3

IMAP

POP3 and IMAP

Reference: : page #18 handouts lecture #05

Simple Mail Transfer Protocol (SMTP) is used for sending email messages between servers. In other words it is used for message uploads. Post Office Protocol 3 (POP3) or Internet Message Access Protocol (IMAP) can be used to retrieve messages. They should also be configured with SMTP. POP is used to download email to the client machine from the server side and the message is deleted from

the email server after download. On the other hand, in case of IMAP the message is not

deleted in the email server and thus can be reopened from another location/machine.

Payer Payer's bank Payee Payee's bank Payer's bank.

Payer's bank Payee Payee's bank Payer.

Payer's bank Payee's bank Payer Payee.

Question No: 23 (M - 1) .

The basic difference between Virtual PIN System and Electronic Check is _____.

Use of encryption

Registration with bank

No. of participants

No difference between them

Virtual PIN Payment System vs Electronic Check Payment System

It is one of the earliest credit card-based systems launched for the internet in 1994 by a company; First Virtual Holdings, Inc. Virtual PIN system does not involve the use of encryption.

An electronic check contains an instruction to the payer's bank to make a specified payment to a payee. Both, symmetric and asymmetric type of cryptography is used in this system

Question No: 24 (M - 1) .

In E-Cash Payment system, merchant deposits the coins in the bank to check the

_____ of coins

Number

Validity

Private key

Sender

Reference : : page #120 handouts lecture #27

Payment request is made by the merchant software and the client wallet pays through e-cash coins (steps 3 & 4). Merchant deposits the coins to e-cash bank for checking validity (step5). If the coins are valid an acceptance message is made to the merchant following which the receipt of payment is sent to the client by the merchant (steps 6 & 7). Merchant software intimates the web server to send goods which acknowledges the fact to the web browser (steps 8 & 9).

Question No: 25 (M - 1) .

SET is better than SSL.

True

False

Ref: PAGE # 122

Secure Electronic Transaction (SET):

The drawback in SSL that the credit card/debit card information remains with the merchant led to the development of a more sophisticated protocol called SET.

Question No: 26 (M - 1) .

SSL doesn't require special software on the client or merchant side.

True

False

Reference:

The greatest advantage of SSL is its simplicity. Since SSL is built into many browsers, no special encryption software is required either on the client or the server side. (page # 121) (us,vuzs,12-07-2011)

Question No: 27 (M - 1) .

Which e-business helps to improve policies, procedures, customer services, and general operations of other businesses?

Online shopping malls.

Selling intellectual property online.

Online service providers.

Online automotive sites and energy online.

Reference: : page #129 handouts lecture #29

Online Service Providers

These e-businesses help improve policies, procedures, customer service and general operations of other businesses. They can provide consultancy/professional services, for example, web site developments services, online legal consultancy services etc.

Question No: 28 (M - 1) .

Which of the following is an advantage of electronic catalogue?

Large fix cost if used for small no. of products.

Ability of updating product information.

Need for customer skill of computers and browsers.

Difficult to develop catalogue.

Ref for Concept : From Book : 126

Electronic catalogues

Electronic catalogues are used in case of an online shop. They have many advantages over paper catalogues. Therefore, online shopping can be done more quickly and in a more convenient environment.

Bulk transactions

One can do bulk transactions during one visit to an e-shop, since there is no limitation of collecting, packaging or carrying goods in contrast to shopping from a traditional offline shop.

Improved supply chain management

Typical members of a supply chain management are suppliers, manufacturers and end customers. If suppliers of raw material have online presence, the manufacturers can place emergency orders to them, which can be

electronically/quickly processed on the supplier side. Thus, just in time delivery of raw material is possible without requiring the manufacturer to arrange for the accommodation to hold the inventory. Ultimately, the goods can be quickly delivered to the end customers due to the improved supply chain management.

Question No: 29 (M - 1) .

Which of the following is an advantage of paper catalogue?

Easy to create catalogue without high technology

Reader is able to look at catalogue without computer system

More portable than electronic catalogue

All of above

Reference:

(Page # 127)

Question No: 30 (M - 1) .

In online business, market research becomes slower than offline business.

True.

False.

Question No: 31 (M - 1)

What is FVIPSS?

First Virtual Internet Payment System Server.
