

Topic: 243 : English in Broadcasting I

Beginning of Broadcasting:-

English was the first lang. to be transmitted by Radio. Public broadcasting began in 1920. The first commercial radio station was established in Pittsburgh, Pennsylvania. By 1922, over 500 broadcasting stations had been established in the USA.

British Broadcasting Company (later, Corporation) was established in 1922.

Broadcasting began in Canada, Australia and New Zealand in 1920s. Radio Service began in other parts of the world including India and Europe in 1927.

Creation of Broadcasting organizations

1. International Telecommunication Union
2. Commonwealth Broadcasting Association
3. European Broadcasting Union
4. International Broadcast Institute
5. The Asia-Pacific Broadcasting Union

Public Television:-

BBC began the world's first high-definition television service in 1936.

The National Broadcasting Company began its service in 1939 in the USA. The

number rose to over 20 within a year. Other countries started television services much later. Millions of viewers around the world. Influence on the development of English.

Topic: 244: English in Broadcasting II

International Broadcasting:- (Imp, Sh + obj)

It was introduced in 1920s. BBC international service in 1930s. The international standing of BBC news increased during the 2nd World War.

In 2001, BBC world service had a worldwide audience of 153 million. The number has increased to 279 m. An overall global audience of 376 m.

Voice of America was formed in 1949. Radio New York World Wide provides an English-lang. service to Europe, Africa and the Caribbean.

Increasing in external broadcasting during the post-war years. Many countries launched English lang. radio programmes such as the Soviet Union, Italy, Japan, Luxembourg, The Netherlands, Germany and Sweden.

The way people access their news has changed with the easy availability of the internet. Audiences switching to digital platforms for news and entertainment.

A total of 27m people listen directly to World Service English via the internet. And World Service English podcasts now reach one million people every week.

Topic: 245:- Role of the Cinema in Spread of English

The beginning of Cinema:-

Made its beginning in Europe and America during the 19th century. Key role played by Britain and France during the early development.

USA's Dominance over the film industry

Slow growth of the European cinema during WWI

America emerging as a dominant force in the film industry. Hollywood evolving as the centre of the modern cinema.

English as the Dominant lang. of Film:

The introduction of sound to films

English lang dominated the film world.

English as the Dominant Lang. of Film

1933 Film Data

Area	Total	English
Studios	44	32
Artists	2466	2381
Directors	340	318

English ---

Hollywood aiming at large number of international audience through such film as:

- Titanic
- Star Wars
- Lord of the Ring

Unusual to find a blockbuster in other languages. English dominates most film festivals and awards. The USA controls about 85 percent of the world film market. 80% of all feature films are in English.

Influence of films on people:

"People increasingly believe in what they see and they buy what they believe in. People use, drive, wear, eat and

buy what they see in the movies."
 (Wim Wenders cited in Crystal 2003)

Topic: 246:- Role of Music in Spread of English

Recording Industry and Music:-

Recording industry was another new addition to the entertainment world through technology. The availability of mass-produced first gramophone records and then CDs and DVDs allow music to travel around the world.

Spread of English Through Pop Music:-

Dominance of English in the popular music scene. Many people make their first contact with English through music.

English in Popular Music:-

The pop-groups of 2 chief English-speaking countries dominated the recording world.

★ Bill Haley and the Comets and Elvis Presley in the USA

★ The Beatles and the Rolling Stones in the UK.

Varieties of English in Popular music:-

Large number of varieties of English given exposure through music on:

- The Radio
- CDs
- DVDs
- Television
- Internet
- Music Videos

Non-native English pop-music:-

A Spanish punk rock group, Asfalto (Asphalt), released a disc about learning English, which became a hit. The Swedish group Abba recorded all its songs in English. Michael Juszynski, a Polish singer performs almost entirely in English. To enter into the international arena and to succeed the singers need to be singing in English.

Impact of English through Music:-

English lang. making a profound and +ve impact on modern popular culture through music. Social, Political and Spiritual messages conveyed through music. English for the younger generation become a symbol of freedom, rebellion and modernism.

There comes a time when we need a certain call. When the world must come together as one. There are people dying. Oh, and it's time to lend a hand to life. The greatest gift of

all United Support of Artists (USA)
Spread of English through Pop-up
"No other single source has
Spread the English lang. around the
World so rapidly and so pervasively."
(The quotation describes
the whole topic 2476) **Crystal, 2003, p.102**

Topic: 247:- Demographic Trends I

Global Population:-

Increased population and social, political and economic changes. Effects of population increase on developing and developed countries. Increase in population in the 18th century. Expansion of cities in Europe.

Demographic challenges of the developing and developed countries. Possible stabilization of the world population. Then the overall population.
The existing situation of the world: a state of Transition.

Topic: 248:- Demographic Trends II

Future of Languages:-

The linguistic trends depend on

the following aspects of people's lives:

1. Where they live?
2. What their basic needs are?
3. What kind of work they do?

Change in the Age Structure:-

Difference in the median age. Challenges of a higher younger population and older population. Change in the ethnic and linguistic profile of the ~~the~~ country.

Demographic Changes and People's Movement:-

- Migrant Workers • Immigrants
- Tourists • Business Workers
- International Students
- Troop Movements
- Emergency aid worker
- Refugees and asylum seekers.

Total number of international migrants reported to be 258 million in 2017 (13.4% of global population)

Demographic Changes and immigrations:-

Migrants seek a better life in more developed countries. Immigration of

skilled workers to counterbalance the ageing work force of the destination countries

Consequences of Immigrations :-

Change in the social and linguistic profile of the destination countries. London the most multilingual city in the world with over 300 languages.

Linguistic Consequences of Immigration

Freedom of labour movement within EU. An influx of workers from Eastern Europe to the UK before Brexit. Emergence of new linguistic communities. Migrant workers and demand for English.

Tourism and global English :-

Travelling b/w non-English speaking countries. Growing role for global English.

Topic 249 :- Technology Trends Language & the Internet

English needed to use the internet and the computer. Decrease in the number of English L1 internet users. Decline in Web Content in English.

Nonberg & Schulze (1998) :- 85% web pages were in English

Excite Hom (1999): 72%

Catalan ISP Vila Web (2000): 68%

Declining use of English on the Internet

More non-English speaker use the internet. Computer Software supporting different lang. Used for local information. Some major uses are mainly national. Used for informal communication.

From Anglophone to Multilingual:-

Popularity of English or a time-lag. Internet sites in local lang. appear when users in the local lang. begin using the internet. Preference for L1 by the users.

From Anglophone To multilingual:-

Software supporting different kinds of script. Many corporate websites using multilingual strategies. Easy availability of machine translation. The internet serving more local interests.

News Media:-

Dominance of international news by English in the past.

Recent Trends:-

Opening of channels in local lang. Diversification of viewpoint available

In international new in English
Increase in the number of lang.
in which the news is available.
English for Global Reach:-

Al Jazeera went global by
establishing an English new channel.
Russia's government-funded, English
lang. 24-hour TV channel "Russia Today".
German international channel Deutsche
Welle.

Blog:-

An online informational website where
a writer or even a group of writers
share their views on an individual
subject. More than 440 million blogs
worldwide.

Topic: 250:- Economic Trends I

Relationship b/w developed & developing
countries:-

Growth of Indian and Chinese
economies. China becoming the 2nd
largest economy after the USA.

BRICS:

Emerging economic super powers.
The BRICS economies together may

overtake the G6.

Changing Economic Trends:-

The economic rise of Asian countries likely to end European economic domination. Chinese initiatives acquiring controlling interest in key global resources. China's huge investment in English a need of global economic context.

Belt and Road Initiative (BRI):-

A new economic development paradigm to maintain China's economic dynamism. Developing new markets and delivering to them by using land routes.

Based on 2 proposals of Chinese Government:-

Creation of an economic land belt that includes countries on the original Silk Road through Central Asia, West Asia, the Middle East and Europe.

A maritime road that links China's port facilities with the African coast, pushing up through the Suez Canal into the Mediterranean.

China Pakistan Economic Corridor *(CPEC)*

A collection of infrastructure projects

that are currently under construction. Modernize Pakistani infrastructure. Strengthen economy by the construction of modern transportation networks, numerous energy projects, and special economic zones.

CPEC and Language Policy:

The kind of lang. policy needed for CPEC. English or Mandarin or both? An exclusive 'elitist' policy that is exclusive. An inclusive policy enabling speakers of all lang. communities to participate in developmental projects.

Topic: 251:- Economic Trends II

Globalization and Global English:-

A process of interaction and integration among the people, companies and governments of different nations. Allows companies to conduct their activities anywhere in the world to obtain maximum cost advantage.

Global business Plan:-

A plan in which products can be manufactured in countries where labour is cheap and sold into markets where

are rich

BPO and ITO

Business process outsourcing and information technology outsourcing.

Examples:-

1. Call centres
2. Fast Food Service
3. Home work tutors

Demand for English in the outsourcing business. Most of the offshore contracts come from English speaking corporations.

English as elitist Social Process:-

English remains a privilege of the rich. Access to English limited to the elite in the past. A wider distribution of English in a globalised world.

Dangers of English Language:-

Role of English in economic process and providing access to the global knowledge. Availability of jobs that require knowledge of English. English as an instrument of structuring inequality in English as an instrument of structuring inequality in some developing countries.

Lack of English in some countries now threatens to exclude a minority

rather than majority of a population
Exodus of talent from developing
to developed countries. English is a
necessary skill for many of these countries.

Topic: 252:- Societal Trends

An Urbanised World:-

A high %age of world population
is city dwellers. A developing economy
makes urbanisation inevitable. English
becoming popular in an increasingly
urbanised world. The middle class not
a consequence but also a contributory
factor in a developing economy.

Urbanization in Developing Countries:-

Pakistan : 39.7%.

China : 56.1%.

India : 33.5%.

Not all urban population is middle class.
Mass migration to the cities gives
rise to slums and slows growth.

Linguistic Diversity and Social Values:-

Different opinions about controver-
-sial social issues. Urbanisation and
immigration likely to create conflicts.

Differences in life styles and values accentuated by linguistic diversity

Development & Lang. Shift

Linguistic attrition, lang. shift within families. English as a lang. of socialization for the young English providing an escape from traditional values.

Topic: 253:-- English as a killer lang. I

A Pertinent Question:--

Will the emergence of English as a global lang. accelerate the disappearance of minority lang. and cause widespread lang. death?

Lang. loss

A long and historic process. It exists independently of the emergence of a global lang. often caused by an ethnic group coming to be assimilated within a more dominant society.

Some facts about langs (imp)

The total number of lang. in the world:
7097

The number of endangered / spoken by fewer

than 1000 people) lang.

One Third

Death rate of languages:-

Two lang per month (over the next 100 years).

Possible causes of Lang. Loss

English:-

Globalisation & Spread of English
Spread of English benefiting powerful English speaking nations.

European "ideology of Contempt" for Other Languages:-

- * European practice of standardizing and promoting one lang/dialect.

- * Mistaking technological development for cultural development.

- * looked down upon the indigenous lang. of their colonies.

Topic: 254:- English as a killer language II

Possible causes of Lang. Loss (imp) **

Correlation b/w Capacity and Survival of a lang

Linguistic survival of the fittest. A self-serving belief.

Discouraging Bilingualism:-

Europeans considered bilingualism burdensome. Discouraging refugees and immigrants to maintain their own languages. Subtractive spread of big languages. Linguistic Capital:-

Advantages of knowing a language. Lack of knowledge of English linked with loss of benefits of global economy. Continued use of English by former colonies.

Local lang likely to cause disunity. Unsuitable for educational and technological development. Use of Western curricula devalues traditional culture and knowledge.

Topic: 255: Creation of a Monolingual Elite

Creation of a gap b/w Rich and Poor

Competence in English advantaging its users. Manipulating the knowledge of English to their advantage.

Rendering other languages unnecessary:-

Reducing the motivation for learning lang. Limited opportunities for learning other lang.s

Creation of an Elite:-

Complacent about their Linguistic
Knowledge Disdain for other languages
Beliefs of Mother-tongue English Speakers
Belief in an evolutionary view of
Lang. Favouring the idea of a mono-
lingual world.

Topic: 256:- Linguistic Power

Advantages of owning a global language

Will those who speak a global lang.
as a mother tongue automatically be
in a position of power compared with
those who have to learn it as an
official or foreign language?

Mother Tongues users of English versus
Learners of English:-

1- Scientific and academic community.
Multinational companies.

Dealing with disadvantages of not owning English (imp) **

Proper Learning:-

- ★ Early exposure to English
- ★ Continued maintenance
- ★ Availability of good Resources
- ★ Difficult to achieve a high degree?
- ★ of Competence.

★ Availability of good resources } Difficult

★ Financial implications

★ Native-like competence achieved by only a minority of non-native learners of English. ★

★ Difficult but achievable (as evidenced repeatedly by English speakers from all around the world).

★ The disadvantaged scenario can be altered. → Limited Success

Topic: 251:- Linguistic Complacency II

Presence of English as a Global Lang.

Assumptions of native speakers about the use and knowledge of English lack of motivation and interest in learning other languages.

Some statistics about Lang. Learning:-

"90% of business in Belgium, The Netherlands, Luxembourg and Greece had an executive able to negotiate in another lang."

(European Business Survey by Grant Thornton reported in 1996)

"Only 38% British companies had someone who could negotiate in more

than one language."

(Centre for information on language Teaching and Research):--

"A 3rd of British ~~exposure~~ exporters miss opportunities bcz of poor lang. skills."

Addressing the Issue:-

Growing awareness of the need to give up the traditional monolingual bias. Role of a foreign lang. in business and attracting foreign investment. Signs of a growing respect for other cultures and more readiness for lang. learning. Influence of important personalities in promoting foreign lang. learning.

"It is all too easy to make your way in the world linguistically with English as your mother tongue... We become lazy about learning other languages... English may be the world lang; but it is not the world's only lang. and if we are to be good global neighbours we shall have to be less condescending

to the languages of the world."

Sir Sridath Ramphal

Topic: 2.58:- Bilingualism to Prevent Language Death.

Bilingualism: A norm or aberration:-

Bilingualism and Multilingualism:-

A norm rather than an exception. Bilingualism considered unusual by native English Speakers. Discouraging of code-switching by English L1 speakers.

Awareness about Bilingualism:-

Need for native English speakers to embrace and engage in bilingualism. Awareness about maintaining indigenous lang. alongside English. Monolingualism a barrier to communication within inner circle.

Benefits of Bilingualism:-

Bilingualism likely to prevent lang. death. A barrier to racism.

Bilingualism to counter racism:

Learning of a community lang. of the immigrant population. Learning of a heritage lang. of the indigenous population. (Maori lang. being taught in Pakeha schools in New Zealand)

Topic: 259:- Linguistic Shift I

Shift in the Centre of English Lang.

A higher number of non-native English Speakers than native English Speakers. Centre likely to shift in the direction of the higher number of speakers.

International ownership of English:-

to Claim for English lang. rights by the outer circle countries Outer and expanding circle refusal to defer to British or American English norms.

Paradigm Shift:-

Difference b/w lang. spread and distribution.

★ Distribution = Adoption conformity

★ Spread = Adaption & non-conformity.

The adaption of English matches the preferences of its users. Claims for rights by non-native English speaker. An international lang. is meant for all and not only a select few.

Topic: 260:- Linguistic Shift II

Loss of power by English:-

Loss of an international role sharing of power with a number of lang.

Reasons for English's Loss of Power:-

Abandoning of English by non-native English speakers:

Difficulties inherent to English lang.
Emergence of some other lang as the world lang

Inherent difficulties of English language

Research findings prove that English is the hardest lang. for the children to learn.

Types of Difficulties:-

1. Orthographic 2. Phonological 3. Grammatical

Can you pronounce this word? Ghoti.

Fish

Gh = f (tough)

O = I (women)

Ti = sh (initiate)

Orthography:-

* Different ways of pronouncing the sequence 'ea'

• bead • head • bear • fear • pearl

* Different ways of pronouncing the sequence 'ough'

• Cough, • bough, • dough, • through,
• thorough

* Silent letters at the beginning of words

• knife, • know, • psychology, • pneumonia

* Silent letters at the end of words...

• Thumb, • limb, • climb, • bomb

* Silent medial letters

• Muscle, • fasten, • castle, • whistle

Pronunciation:-

* A large number of vowel phonemes: (Twenty) * Extensive use of the central vowel schwa regardless of the spelling in prepositions, auxiliaries and pronouns.

• To, • of, • from, • her, • them, • was, • are, • has

Grammar:-

* Verb forms and functions. Link with time reference.

* Modal verbs: • may, • might, • can, • could, • will, • would

Topic: 261: Linguistic Shift III

Spanish as an emerging global lang.

Total number of Spanish speakers:

470-500 million

Increasing importance in America and Europe. Increase in demand in Europe with increasing number of travellers. Spanish speaking countries becoming popular tourist destination: Mexico, Cuba, Dominican Republic. Increase in teaching/learning of Spanish as a foreign lang. Spanish government trying to promote a panhispanic community across the world.

41 million native and 11 million 2nd lang. users. Second largest L1 group in the US. Second international lang. of business with an increasing importance in the US. Resurgence of cultural pride and confidence. Popularity of Latino Stars. Chinese as an emerging global lang.

China's economic rise attracting attention to Mandarin Chinese. One of the fastest-growing economies in the world in the last two decades. The largest exporter and second largest importer of goods in the world. One of the world's top manufacturer. An increasing number of upper-class British parents are investing in their children's Chinese lang ability. Likely to become the majority lang. of

Internet users. The first bilingual English-Chinese primary school in Europe was opened in the UK in 2017.

Mark Zuckerberg, Malia Obama and Arabella Kushner are also learning Chinese. Showing potential for becoming the new lingua franca.

Topic: 2.62: ... Future of English I

Impediments to the growth of English

Change in the balance of power:--

- Economical • Political • Cultural • Technological

Imposition of English in the British colonies. Contemptuous treatment of local languages. Continuation of colonial lang. policy by freed states. Continued disregard of the local lang. Resultant antagonism and ambivalence toward English. Reaction to former colonial masters.

Rejection of English by the people of a country. Antagonistic attitude toward English might change the status of English as a global lang.

Rejection of English by freed states:

★ Tanzania: English lost its status as a joint official lang. in 1967.

★ Malaysia: The National Lang. act of 1967 disestablished English as a joint official lang. with Malay.

★ Pakistan: Several movements to introduce urdu in education and offices.

Topic: 263: Future of English II
Continues.....

Economic factors:-

Case of countries developing regional economy rather than global economy. Investing more in promoting a regional lingua franca. More immediate benefits of using a language established in the region.

For Example:-

1. Spanish in "Latin America"
2. Arabic in Northern Africa
3. Russian in Central Asian states
4. Hindi/Urdu in South Asia.

Conflict created by need for intelligibility and identity. Few rejections of English by major countries. Global status of English has remained unaffected.

USA and the status of English:-

Link b/w lang. and power. USA at

the helm of developments in the 20th century.

Role of USA in empowering English. USA and future of English. Link b/w change of status of USA & status of English. Threats to the USA's unity. Increasing immigration and the increase in population. Mutual intelligibility as a uniting force.

Topic: 264:- Future of English III Continues

Movements for maintaining immigrants' cultural identity through lang. Conflict b/w the demands of intelligibility and identity. "Official English" movement

Language Movements for preserving threatened lang. have emerged in:

- Wales • Ireland • Hawaii
- Quebec • New Zealand

Reactions from the speakers of threatened and dominating lang. Speakers of English demand guarantees about the status of English.

Do English speakers feel threatened in the USA? Arguments for and against official English. Many bills have been presented. Bill Emerson English Lang. ~~emp~~ empowerment Act.

Advantages of a common lang

Preserve of unity in diversity. Prevent division along linguistic lines. Empower the immigrants. Allow immigrants to assimilate and take advantage of economic and occupational opportunities. Lang. other than English are allowed in: Public health and safety services. Teaching of foreign lang. policies necessary for international relations and trade also includes judicial proceedings.

Possibilities of other lang. replacing or sharing the status of English in the USA. May have consequences for the global status of English.

Topic: 265: Research in World Englishes Corpus Analysis

Sources of Data:

The research is based on:

Personal observation and large scale corpora

Corpus:- (imp)

A corpus is a collection of authentic written or spoken texts. It is now available electronically and can be accessed ~~with~~ ~~an~~ with computer software (such as, concordancing software). These corpora may include various text types - from instruction manuals in engineering to spoken data such as the **MICASE** (**M**ichigan **C**orpus of **A**cademic **S**poke**n** **E**nglish) Collection.

The text can be representative of:
A lang variety (for example, written and spoken New Zealand English)
A specific field (**A**cademic English or **B**usiness English)

Concordance:-

A concordance is an alphabetical list of the principal words used in a book ~~of~~ or body of work, with their immediate contexts.

They loved the motivation . They loved a big box doing it . FC : What was Target 's reaction place to get this material is n't in the big box retailers or even local music stores . leveraging customer intelligence to compete with big box stores such as Home Depot and Lowe 's and store may cost more than if we drive to a big box store . The same is true even in any product of the night (or if you do , you bring a big box of cubans) . You do n't send them e-mail deals . We 've been approached by several " big box " auto-supply stores , which are interested to compete against Home Depot and other big box retailers . So far as the customers of and Brower say . Sitting on the shelf at a big box . Freestyle 's gadget could get lost among Depot and Barnes and Noble are typical " big box " retailers , enormous stores with enormous little " mom-and-pop " boutiques for the big box , thus " destroying " the look of " Main mercy of chance . Here 's a lady with a big box marked with red letters that say " Python side of the shed so it stops looking like a big box at the bottom of the garden and blends 're selling branded consumer goods , not a big box " . But just as the battle for industry growth , Sargent is thinking far outside the big box . His audacious aim to nearly double Sears Stores Does the world need another big box retailer , one that sells appliances , level of desperation by toymakers as the " big box " retail chains stomp all over traditional niche in U.S. markets that can't support a " big box " store such as Costco Wholesale Corp .

Topic: 266 Research in World Englishes: Corpus Analysis II

Corpus...

A body of written or spoken material usually stored as an electronic database. A collection of linguistic data, either compiled as written texts or as a transcription of recorded speech.

Purpose of a corpus...

Corpus analysis provides:-

1. Lexical information.
2. Morphosyntactic information.
3. Semantic information.
4. Pragmatic information.

Collins (1991) Study of Modals

Collins (1991) study uses a subset of modals to study their behaviour in AUSE, AmE and BrE.

Modals of obligation and necessity were selected:-

• Must, • should, • ought, • need and • have (got) to. The database comprised 250,000 words.

The words were drawn from the following genres:

Press reportage from the AUSE Corpus. Formal writing from a textbook on linguistics. Transcripts of luncheon and dinner party conversations by Horvath (1985). Relatively formal speech from Senate.

The study of modals in AmE by Hermerén (1978) and BrE by Coates (1983) were used for a comparison with AUSE.

Frequency Distribution of the Selected modals

The study made the following findings:

Have to and the variant have got to are the most frequent items. The frequency of should in parliamentary speech is quite high. Frequency of ought and need is extremely small. Press reports make the least use of modals.

Comparison of Varieties:-

Higher figure for must, should and ought in BrE and AmE. No occurrence of need, have to and have got to in the AmE corpus.

Low frequency of ought in all the three corpora. Need is not found in the AmE corpus.

Research findings:-

All the varieties of English are subject to variation. The effect of the finding on the description and codification of world Englishes. ELT profession's difficulty when considering norms, standards and models.

Advantages of using corpora in Research

Real data forces researchers to deal with the entire range of use of the modals. It makes comparison across varieties and within varieties among genres possible.

Topic: 267:- Research in World Englishes: Changes in Grammar

Research in Grammar:-

Possible areas of research in grammar

- ★ Subject-verb agreement
- ★ Variation in grammar

Subject-Verb Agreement:-

It is the simplest statement "English speakers are often rather uncertain about the rules of Concord." "It is imp bcz they use statement in question to answer"

Quirk et al. cited in Kachru & Nelson, 2006

Rules:-

i. Subjects & verbs must agree with one another in number & person

Examples:-

1. I are on the bus.

I am on the bus.

2. Ali & Nida am with me.

Ali and Nida are with me.

3. The student is in the Cafeteria.

The students are in the Cafeteria.

ii. A singular subject demands a singular verb; a plural subject demands a plural verb.

other general rules:

iii. National

Proximity

iv. Notional Agreement:-

The verb agrees with the subject even when there are no markers of number present.

Examples:-

1. The orchestra are tuning their instrument.

2. The staff disagree on the proposal.

3. The crew were preparing for the launch.

Plural subject singular verb:-

4. Politics is best not discussed at the dinner table.

Topic: 268:- Research in World English
Changes in Grammar II

iv. Proximity Agreement:-

When a verb agrees with the nearest noun rather than with the sentence's more distant subject.

The practice of relying on the noun that is closest to the verb to determine whether the verb should be singular or plural.

Examples:-

1. A majority of the voters support the amendments.
2. A flock of goats were seen grazing in the planes.

V. Compounding of noun:-

It takes place as the result of the use of the conjunction 'and'.

Examples:-

1. Haider and Taha are coming to the party tonight.
2. Left-over macaroni and cheese is in the refrigerator.

Subject-Verb Agreement Research

Taylor (1993) examined a small data set of 52 examples from published sources to study subject-verb agreement use. Data came from well-known scholars published by reputable publishers in Britain and the USA.

Examples of --- from Taylor's Data:-

1. My own recollection of school visits amply bear out these differences.

2. Prices of equipment have risen dramatically since 1974.

Government subsidies and parental power has not, on the whole, kept ~~pace~~ pace with it.

3. Kleiman's research suggests that personality factors, such as anxiety, confidence, and willingness to take risks, provides information on which students are likely to avoid various structures.

Lack of concern by Speakers and writers of AmE and BrE for traditional grammatical rules of concord.

Question raised by the research findings:

1. If mature native Speakers are so uncertain about concord, what should our attitude towards learner's difficulties with concord be?

2. What we do teach?

3. What is standard usage?

4. Where do we turn for help?
(Taylor cited in Kachru & Nelson, 2006)

Topic 269 -- Variation Study

Range of use of linguistic items in different varieties. The extension in the range of use of linguistic items to comparable items in substratum language(s). Result of nativization under the influence of substratum languages.

Bao and Wee's study (1998) focuses on the differences in the use of until b/w Singaporean and British varieties of English.

British English --

Until in English grammar has two functions: --

* A conjunction

* A preposition

As a conjunction until has two meanings:

1. A point in Time --

We will guard the building until the statue is safely shipped back.

2. Signal a result:-

Dad will be busy until the book is out.

Until also functions as a preposition:-

We will stay in New York until next week.

The action signalled by the main clause ceases when the action signalled by the until-clause or phrase occurs

1. We will guard the building until the statue is safely shipped back.

2. Dad will be busy until the book is out.

Singaporean English:

The action of the main verb does not end at the point where the action in the until-phrase occurs:-

1. I waited until I was angry; luckily my turn came ten minutes later.

2. I ate until I was sick, but I didn't want to stop because I already paid for the food.

Semantic extension in Singapore English

Until has a 'result' or 'to the extent' meaning in Singaporean English

1. Don't talk until (your) saliva flies all over.

2. Look at you, laugh until (your) face (is) red.

Nativization of the linguistic item

Singapore English combine 2 features of dao - a comparable linguistic item from Chinese:

1. Its semantics (degree / result meaning)

2. The subtle difference in indicating non-terminal temporality.

Topic: 270: Research in World Englishes: Variation Study

Morphology and Syntax:-

There is substantial research on the morphology and syntax of different varieties:

- 1- Indian English
- 2- Pakistani English
- 3- Malaysian English

The use of progressive with completed actions:

BSE: I do it often

IE: I am doing it often (with habitual action)

BSE: Where have you come from?

IE: Where are you coming from? (with completed action)

Use of the progressive aspect with stative verbs:

Imp!

Stative Verbs: - indicate relatively permanent physical or psychological states or mental perceptions.

Verbs relating to actions, such as run, eat, walk, are non-stative.

Use of the progressive aspect with stative verb.

Verbs considered stative in standard English but used in the progressive in outer circle varieties:

See, hear, think, feel, believe, know, understand, remember, forget, doubt, want, wish, cost, weight, belong and have.

Uses of the progressive aspect with stative verbs:-

Example:-

1. I am seeing the sky from here
2. They were having a horse
3. I am hearing you. You are loud and clear.
4. It's costing a lot these days.

According to Kachru the Hindi-Urdu verbs *sunna* (to hear) *dekhna* (to see) are used in the progressive.

Addition of Preposition:-

1. I need to fill up the form for my admission.
2. I can't cope up with this situation
3. We need to combat against poverty
