

🎓 Virtual University of Pakistan Students 🎓

Are you a Job Holder, Housewife or Overseas
and struggling to manage your studies?

We've got you covered!

- ✓ Complete LMS Handling Services
- ✓ Projects & Internships Assistance
- ✓ Paid Quizzes, Assignments & GDBs
- ✓ Viva Preparation Support
- ✓ Turnitin Report & Plagiarism Removal Services
- ✓ Timely Managed Activities

What You Get:

- ✓ 80% to 100% Marks Guarantee
- ✓ 100% Original & Plagiarism-Free Work
- ✓ Reliable & Professional Service

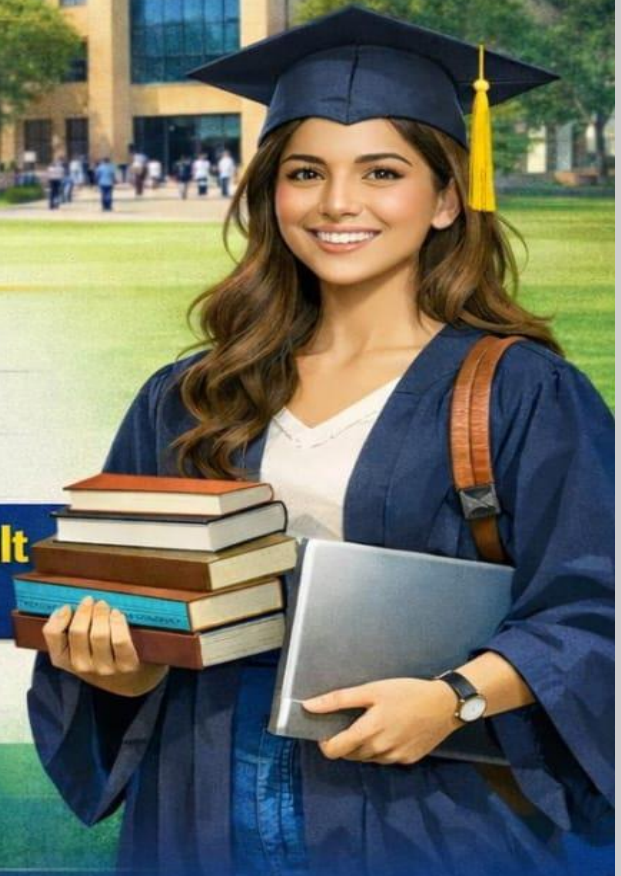

🔒 PAYMENT AFTER your result
(No risk - FULL TRUST!)

- ✓ Easy Payment on Installments Available

MIDTERM PREPARATION

PSY101 OBJECTIVE

Question 1: There are five types of nonverbal communication: kinesics, _____, vocalics, proxemics and chronemics.

A. haptics

B. ekistics

C. antalgics

D. proxemics

Correct Answer: A. haptics

Question 2: Out of 13 features of spoken language, displacement, _____, cultural transmission, and duality as per Gibbons are reserved only for human language only.

A. productivity

B. semanticity

C. arbitrariness

D. discreteness

Correct Answer: A. productivity

Question 3: Later addition in thirteen features of spoken language is _____.

A. prevarication, productivity and learnability

B. arbitrariness, displacement and discreteness

C. prevarication, reflexiveness and learnability

D. reflexiveness, displacement and prevarication

Correct Answer: C. prevarication, reflexiveness and learnability

Question 4: As a medium of communication, we can use _____ for nonverbal communication.

A. hearing, smell sight, goal, and threw

B. hearing, smell, sight, touch, and taste

C. hearing, smell, sight, source, and touch

D. taste, touch, source, location and sight

Correct Answer: B. hearing, smell, sight, touch, and taste

Question 5: Paralanguage is a _____ element of nonverbal communication which is the vocalized but not verbal part of spoken message.

A. reclusive

B. vocal

C. nonvocal

D. introverted

Correct Answer: B. vocal

Question 6: Symbolic and abstract nature of language can lead to misunderstandings, but nonverbal communication is even more _____.

A. conclusive

B. comprehensible

C. vague

D. clear

Correct Answer: C. vague

Question 7: A key principle of nonverbal communication is that it often takes on more meaning in _____ and/or emotional exchanges.

A. imitation

B. interpersonal

C. personal

D. separate

Correct Answer: B. interpersonal

Question 8: The involuntary or subconscious nature of _____ communication makes it less easy to fake, which makes it seem more honest and credible.

A. structural

B. verbal

C. nonverbal

D. verbatim

Correct Answer: C. nonverbal

Question 9: Non-verbal communication that includes body-movements and postures is called _____.

A. haptics

B. proxemics

C. kinesics

D. vocalics

Correct Answer: C. kinesics

Question 10: Mostly nonverbal communication leaks out in ways that expose our _____ thoughts or feelings.

A. underlying

B. principle

C. number one

D. primitive

Correct Answer: A. underlying

Question 11: Which of the following is an organized system of ideas that seeks to explain why two or more events are related?

A. Research

B. Hypothesis

C. Variables

D. Theory

Correct Answer: D. Theory

Question 12: Which of the following is NOT an emerging technological statistical technique used by contemporary social psychologist?

A. Virtual environment technology

B. Face to face surveys

C. Brain-imaging techniques

D. The internet

Correct Answer: B. Face to face surveys

Question 13: IQ is an abbreviation of _____.

A. Intelligent question

B. Intellectual query

C. Intelligence quotient

D. Intelligence questionnaire

Correct Answer: C. Intelligence quotient

Question 14: Which of the following is the variable controlled by the researcher in an experiment?

A. Operational definition

B. Third variable

C. Independent variable

D. Dependent variable

Correct Answer: C. Independent variable

Question 15: Which of the following statement refers to Self-concept?

A. Who I am

B. Why I am

C. how I am

D. Where I am

Correct Answer: A. Who I am

Question 16: Which of the following is defined as a kind of mental model that people hold?

A. Dream

B. Attitude

C. Schema

D. Believes

Correct Answer: C. Schema

Question 17: Which of the following independent variable Federman (1994-1998) used in his research?

A. Comedy movies

B. TV romanticism

C. Cartoons

D. TV violence

Correct Answer: D. TV violence

Question 18: Which of the following is NOT a type of survey?

A. Phone surveys

B. Written surveys

C. Oral surveys

D. Face-to-face surveys

Correct Answer: C. Oral surveys

Question 19: Which one is not a characteristic of empirical research?

A. not well planned

B. Controlled

C. Valid

D. reliable

Correct Answer: A. not well planned

Question 20: Which of the following is defined as transient states of arousal that direct our behavior?

A. Attitude

B. Emotions

C. Believes

D. Dream

Correct Answer: B. Emotions

Question 21: Who gave the concept “Tabula Rasa”?

A. Rene Descartes

B. Franz Joseph Gall

C. Daniel Kahneman

D. John Locke

Correct Answer: D. John Locke

Question 22: “Why people buy things” — which branch of psychology studies this phenomenon?

- A. Clinical Psychology
- B. Organizational Psychology
- C. Forensic Psychology

D. Consumer Psychology

Correct Answer: D. Consumer Psychology

Question 23: Which of the following theory was given by Pavlov?

- A. Learning by Insight
- B. Learning by trial and Error
- C. Learning by Observation

D. Learning by Conditioning

Correct Answer: D. Learning by Conditioning

Question 24: Structuralists identified psychology as the study of which of the following?

- A. Observation
- B. Behavior

C. Consciousness

D. Cognition

Correct Answer: C. Consciousness

Question 25: All of the followings are the goals of Psychology EXCEPT:

- A. Apply concepts to real life situations
- B. Understand the nature of behavior

C. Develop relationship between spirit and mind

D. Predict for the future

Correct Answer: C. Develop relationship between spirit and mind

Question 26: Which of the following neurotransmitter is helpful in the learning process?

A. Epinephrine

B. Glutamate

C. GABA

D. Serotonin

Correct Answer: B. Glutamate

Question 27: According to the Muslim philosophers, at which stage of “Nafs” man is satisfied physically, mentally and spiritually?

A. Nafs-e-Natiqua

B. Nafs-e-Mutmaina

C. Nafs-e-Liwama

D. Nafs-e-Ammaraa

Correct Answer: B. Nafs-e-Mutmaina

Question 28: Which of the following is the mental agency containing everything inherited, present at birth, and fixed in the individual's constitution, especially sexual and aggressive instincts?

- A. Ego
- B. Emotions
- C. Id**
- D. Super Ego

Correct Answer: C. Id

Question 29: Which of the following system is a chemical communication network that sends messages throughout the nervous system via the bloodstream?

- A. Electrical
- B. Neuron
- C. Endocrine**
- D. Central

Correct Answer: C. Endocrine

Question 30: Ivan Pavlov's name is associated with which of the following school of thought?

- A. Behaviorism**
- B. Psychoanalysis
- C. Structuralism
- D. Functionalism

Correct Answer: A. Behaviorism

Question 31: Which branch of psychology studies the influence of psychological factors on physical health?

- A. Health Psychology**
- B. Clinical Psychology
- C. Organizational Psychology
- D. Forensic Psychology

Correct Answer: A. Health Psychology

Question 32: All of the following are the goals of Psychology EXCEPT:

- A. Develop relationship between spirit and mind**
- B. Apply concepts to real life situations
- C. Predict for the future
- D. Understand the nature of behavior

Correct Answer: A. Develop relationship between spirit and mind

Question 33: In which therapeutic technique, patient is asked to talk freely and say whatever comes to his/her mind without considering whether or not it is relevant, rational or sensible?

- A. Flooding
- B. Aversive Therapy

C. Free Association

- D. Systematic Desensitization

Correct Answer: C. Free Association

Question 34: An unpleasant or painful stimulus whose exposure decreases the likelihood that the behavior will occur again is known as:

- A. Reinforcement
- B. Negative reinforcement
- C. Positive reinforcement

D. Punishment

Correct Answer: D. Punishment

Question 35: Who among the following is known as “father of Greek medicine”?

- A. Aristotle

B. Alcameon

- C. Socrates
- D. Plato

Correct Answer: B. Alcameon

Question 36: Who gave the concept of geographical versus behavioral environment?

- A. Carl Rogers
- B. Sigmund Freud
- C. Karen Horney

D. Kurt Koffka

Correct Answer: D. Kurt Koffka

Question 37: According to psychosexual developmental stages, which stage lasts from 3 to 5 years of age?

- A. The Anal stage
- B. The Phallic stage
- C. The Genital stage
- D. The Oral stage

Correct Answer: B. The Phallic stage

Question 38: Who founded the first psychological laboratory?

- A. Sigmund Freud
- B. Wilhelm Wundt
- C. Carl Jung
- D. William James

Correct Answer: B. Wilhelm Wundt

Question 39: Psychology is defined as the scientific study of what?

A. Human anatomy

B. Behavior and mental processes

C. The human mind only

D. Social interactions

Correct Answer: B. Behavior and mental processes

Question 40: Which perspective in psychology focuses on the role of environmental factors in influencing behavior?

A. Biological

B. Behavioral

C. Cognitive

D. Psychoanalytic

Correct Answer: B. Behavioral

Question 41: Critical thinking in psychology involves what?

A. Accepting all information as truth

B. Testing ideas and questioning assumptions

C. Memorizing facts

D. Avoiding skepticism

Correct Answer: B. Testing ideas and questioning assumptions

Question 42: Which of the following is a misconception about psychologists?

A. Psychologists can predict fate or destiny.

B. Psychologists study mental processes.

C. Psychologists understand human behavior.

D. Psychologists can diagnose mental illnesses.

Correct Answer: A. Psychologists can predict fate or destiny.

Question 43: Psychologists study animal behavior to:

A. Entertain themselves

B. Understand human behavior

C. Disprove other scientific theories

D. Develop new medical treatments

Correct Answer: B. Understand human behavior

Question 44: Which philosopher is known for his early contributions to psychology and the study of the human mind?

A. Aristotle

B. Descartes

C. Socrates

D. Plato

Correct Answer: A. Aristotle

Question 45: Who is considered the father of American psychology?

- A. Sigmund Freud
- B. John Watson
- C. William James**
- D. B.F. Skinner

Correct Answer: C. William James

Question 46: Which school of thought emphasized the purpose of behavior and mental processes?

- A. Structuralism
- B. Functionalism**
- C. Behaviorism
- D. Psychoanalysis

Correct Answer: B. Functionalism

Question 47: The first experimental psychology lab was established in which country?

- A. USA
- B. Germany**
- C. France
- D. England

Correct Answer: B. Germany

Question 48: Which approach focuses on the unconscious mind and early childhood experiences?

- A. Cognitive
- B. Humanistic
- C. Psychoanalytic**
- D. Behavioral

Correct Answer: C. Psychoanalytic

Question 49: The 'Little Albert' experiment is associated with which psychological approach?

- A. Cognitive
- B. Humanistic
- C. Behavioral**
- D. Psychoanalytic

Correct Answer: C. Behavioral

Question 50: Which school of thought was founded by Wilhelm Wundt?

- A. Structuralism**
- B. Functionalism
- C. Behaviorism

D. Humanism

Correct Answer: A. Structuralism

Question 51: Which psychologist is known for the concept of the 'unconscious mind'?

A. Carl Rogers

B. B.F. Skinner

C. Sigmund Freud

D. John Watson

Correct Answer: C. Sigmund Freud

Question 52: Behaviorism primarily focuses on:

A. Unconscious processes

B. Observable behaviors

C. Cognitive functions

D. Emotional experiences

Correct Answer: B. Observable behaviors

Question 53: The humanistic approach emphasizes:

A. Scientific research

B. Free will and personal growth

C. Conditioning and reinforcement

D. The structure of the mind

Correct Answer: B. Free will and personal growth

Question 54: Which psychologist is associated with the development of operant conditioning?

A. Sigmund Freud

B. Carl Jung

C. B.F. Skinner

D. Ivan Pavlov

Correct Answer: C. B.F. Skinner

Question 55: The cognitive approach focuses on:

A. Behavior and consequences

B. Mental processes and knowledge acquisition

C. Unconscious motives

D. Socio-cultural influences

Correct Answer: B. Mental processes and knowledge acquisition

Question 56: The biological perspective emphasizes the role of:

A. Environmental factors

B. Genetic inheritance

C. Socio-cultural context

D. Cognitive processes

Correct Answer: B. Genetic inheritance

Question 57: The social-cultural perspective focuses on:

- A. Biological bases of behavior
- B. Unconscious desires
- C. The influence of society and culture on behavior**
- D. Personal growth and self-actualization

Correct Answer: C. The influence of society and culture on behavior

Question 58: Which approach studies the internal mental processes such as thinking, perception, and memory?

- A. Behavioral
- B. Humanistic
- C. Cognitive**
- D. Psychoanalytic

Correct Answer: C. Cognitive

Question 59: The humanistic approach is primarily concerned with:

- A. Human potential and self-actualization**
- B. Observable behavior
- C. Unconscious conflicts
- D. Biological processes

Correct Answer: A. Human potential and self-actualization

Question 60: Which perspective would focus on how the body and brain enable emotions and sensory experiences?

- A. Behavioral
- B. Biological**
- C. Psychoanalytic
- D. Cognitive

Correct Answer: B. Biological

Question 61: The psychodynamic approach is most closely associated with which psychologist?

- A. B.F. Skinner
- B. Carl Rogers
- C. Jean Piaget
- D. Sigmund Freud**

Correct Answer: D. Sigmund Freud

Question 62: The psychodynamic approach primarily focuses on:

- A. Observable behaviors
- B. Free will and personal growth

C. Unconscious motives and conflicts

D. Socio-cultural influences

Correct Answer: C. Unconscious motives and conflicts

Question 63: Freud's theory of personality includes which components?

A. Id, Ego, Superego

B. Conscious, Preconscious, Unconscious

C. Stimulus, Response, Reinforcement

D. Sensation, Perception, Memory

Correct Answer: A. Id, Ego, Superego

Question 64: According to Freud, the part of the mind that operates on the pleasure principle is the:

A. Ego

B. Superego

C. Id

D. Conscious

Correct Answer: C. Id

Question 65: Defense mechanisms are used by the:

A. Id

B. Ego

C. Superego

D. Conscious mind

Correct Answer: B. Ego

Question 66: The Oedipus complex occurs during which stage of psychosexual development?

A. Oral

B. Anal

C. Phallic

D. Latency

Correct Answer: C. Phallic

Question 67: Who is known for the concept of the collective unconscious?

A. Sigmund Freud

B. Carl Jung

C. Alfred Adler

D. Erik Erikson

Correct Answer: B. Carl Jung

Question 68: The behavioral approach focuses on:

A. Thoughts and feelings

B. Observable behavior

- C. Free will
- D. Unconscious motives

Correct Answer: B. Observable behavior

Question 69: Classical conditioning was first described by:

- A. B.F. Skinner
- B. Ivan Pavlov**
- C. John Watson
- D. Edward Thorndike

Correct Answer: B. Ivan Pavlov

Question 70: In classical conditioning, a neutral stimulus becomes a conditioned stimulus by:

- A. Being paired with an unconditioned stimulus**
- B. Being reinforced
- C. Being punished
- D. None of the above

Correct Answer: A. Being paired with an unconditioned stimulus

Question 71: Operant conditioning involves learning through:

- A. Association
- B. Observation
- C. Rewards and punishments**
- D. Imitation

Correct Answer: C. Rewards and punishments

Question 72: Who is known for his research on operant conditioning?

- A. Sigmund Freud
- B. Carl Jung
- C. B.F. Skinner**
- D. Ivan Pavlov

Correct Answer: C. B.F. Skinner

Question 73: Which of the following is an example of positive reinforcement?

- A. Taking away a privilege to decrease a behavior
- B. Giving a treat to increase a behavior**
- C. Applying a mild shock to decrease a behavior
- D. Removing an unpleasant stimulus to increase a behavior

Correct Answer: B. Giving a treat to increase a behavior

Question 74: Which psychologist is associated with the concept of self-actualization?

- A. B.F. Skinner
- B. Sigmund Freud
- C. Abraham Maslow**

D. John Watson

Correct Answer: C. Abraham Maslow

Question 75: What is the main focus of the humanistic approach in psychology?

- A. The influence of the unconscious mind
- B. Observable behavior and external stimuli

C. Personal growth and self-fulfillment

- D. The role of genetics in behavior

Correct Answer: C. Personal growth and self-fulfillment

Question 76: According to the cognitive approach, what primarily influences human behavior?

- A. Unconscious desires
- B. Observable behaviors

C. Thought processes and perceptions

- D. Environmental stimuli

Correct Answer: C. Thought processes and perceptions

Question 77: Who is considered a key figure in the development of the humanistic approach?

- A. Ivan Pavlov

B. Carl Rogers

- C. William James
- D. Edward Thorndike

Correct Answer: B. Carl Rogers

Question 78: What term did Carl Rogers use to describe the innate drive towards personal growth?

- A. Operant conditioning

B. Actualizing tendency

- C. Cognitive dissonance
- D. Reciprocal determinism

Correct Answer: B. Actualizing tendency

Question 79: The humanistic approach emphasizes the importance of which of the following?

- A. Deterministic views of human behavior
- B. Observable and measurable behavior

C. Free will and individual experience

- D. The biological basis of behavior

Correct Answer: C. Free will and individual experience

Question 80: What is the primary goal of descriptive research methods?

- A. To establish cause-and-effect relationships

B. To manipulate variables in a controlled environment

C. To describe behaviors and events

D. To predict future behaviors

Correct Answer: C. To describe behaviors and events

Question 81: Which research method involves an in-depth study of a single individual or group?

A. Survey

B. Experiment

C. Case study

D. Naturalistic observation

Correct Answer: C. Case study

Question 82: What is a key characteristic of correlational research?

A. It determines causation

B. It involves manipulating variables

C. It examines relationships between variables

D. It uses random assignment

Correct Answer: C. It examines relationships between variables

Question 83: What is the primary disadvantage of naturalistic observation?

A. Lack of ecological validity

B. Difficulty in controlling variables

C. Inability to replicate findings

D. High cost and time consumption

Correct Answer: B. Difficulty in controlling variables

Question 84: Which research method is best suited for understanding the cause-and-effect relationship?

A. Case study

B. Correlational study

C. Survey

D. Experimental method

Correct Answer: D. Experimental method

Question 85: What does random assignment help to ensure in an experimental study?

A. The manipulation of the independent variable

B. The accuracy of the dependent variable

C. The elimination of biases between groups

D. The generalization of the results

Correct Answer: C. The elimination of biases between groups

Question 86: Which statistical measure indicates the average score in a data set?

A. Median

B. Mode

C. Mean

D. Range

Correct Answer: C. Mean

Question 87: What is the purpose of inferential statistics in psychological research?

A. To describe the data collected

B. To infer conclusions about a population based on sample data

C. To identify the mode and median

D. To calculate the range of scores

Correct Answer: B. To infer conclusions about a population based on sample data

Question 88: Which type of variable is manipulated in an experiment?

A. Dependent variable

B. Independent variable

C. Confounding variable

D. Control variable

Correct Answer: B. Independent variable

Question 89: What does a p-value indicate in hypothesis testing?

A. The strength of the relationship between variables

B. The probability that the results occurred by chance

C. The size of the sample

D. The effect size of the independent variable

Correct Answer: B. The probability that the results occurred by chance

Question 90: What is a double-blind study designed to prevent?

A. Ethical violations

B. Data recording errors

C. Participant and researcher biases

D. Environmental confounds

Correct Answer: C. Participant and researcher biases

Question 91: Which of the following is NOT a common method of data collection in psychology?

A. Surveys

B. Case studies

C. Laboratory experiments

D. Introspection

Correct Answer: D. Introspection

Question 92: What is the main focus of developmental psychology?

A. The diagnosis and treatment of psychological disorders

B. The influence of culture on behavior

C. The growth and change throughout the lifespan

D. The biological basis of behavior

Correct Answer: C. The growth and change throughout the lifespan

Question 93: Which term refers to the genetic transmission of characteristics from parents to offspring?

A. Environment

B. Heredity

C. Learning

D. Conditioning

Correct Answer: B. Heredity

Question 94: What does the term "critical period" refer to in developmental psychology?

A. A stage where children develop moral reasoning

B. A specific time during development when certain skills or abilities are most easily learned

C. The final stage of cognitive development

D. The time when social behaviors are formed

Correct Answer: B. A specific time during development when certain skills or abilities are most easily learned

Question 95: Which psychologist is known for his theory of cognitive development?

A. Sigmund Freud

B. Erik Erikson

C. Jean Piaget

D. Lawrence Kohlberg

Correct Answer: C. Jean Piaget

Question 96: The nature-nurture debate in psychology concerns the relative importance of which two factors?

A. Cognitive development and social learning

B. Heredity and environment

C. Personality and intelligence

D. Conscious and unconscious processes

Correct Answer: B. Heredity and environment

Question 97: Which concept suggests that development is a lifelong process?

A. Critical period

B. Stage theory

C. Lifespan perspective

D. Classical conditioning

Correct Answer: C. Lifespan perspective

Question 98: According to Piaget, which stage is characterized by the development of object permanence?

A. Sensorimotor

B. Preoperational

C. Concrete operational

D. Formal operational

Correct Answer: A. Sensorimotor

Question 99: What is the main characteristic of the preoperational stage in Piaget's theory?

A. Logical thinking

B. Abstract reasoning

C. Egocentrism

D. Conservation

Correct Answer: C. Egocentrism

Question 100: In which stage do children begin to understand the concept of conservation?

A. Sensorimotor

B. Preoperational

C. Concrete operational

D. Formal operational

Correct Answer: C. Concrete operational

Question 101: Which of the following best describes Vygotsky's concept of the zone of proximal development?

A. The difference between what a child can do alone and what they can do with help

B. The final stage of cognitive development

C. The ability to think logically about abstract concepts

D. The internalization of cultural norms and values

Correct Answer: A. The difference between what a child can do alone and what they can do with help

Question 102: What is scaffolding in the context of Vygotsky's theory?

A. The physical support provided to a child during learning

B. The process by which children learn through direct instruction

C. The temporary support given by more knowledgeable others

D. The developmental stages children go through

Correct Answer: C. The temporary support given by more knowledgeable others

Question 103: What is a key criticism of Piaget's theory of cognitive development?

A. It underestimates the abilities of young children

B. It overemphasizes the role of language

C. It neglects the influence of social interactions

D. It does not consider biological factors

Correct Answer: A. It underestimates the abilities of young children

Question 104: What is the primary function of the nervous system?

A. Regulate hormones

B. Maintain coordination between the nervous system and the rest of the bodily systems

C. Store memories

D. Produce red blood cells

Correct Answer: B. Maintain coordination between the nervous system and the rest of the bodily systems

Question 105: Which part of the neuron receives incoming signals?

A. Axon

B. Soma

C. Dendrites

D. Terminal buttons

Correct Answer: C. Dendrites

Question 106: What is the role of the terminal buttons in a neuron?

A. Send electrical impulses

B. Receive chemical signals

C. Stimulate nearby glands, muscles, or other neurons

D. Maintain neuron metabolism

Correct Answer: C. Stimulate nearby glands, muscles, or other neurons

Question 107: Which of the following methods is used to measure electrical activity in the brain?

A. MRI

B. PET

C. CAT

D. EEG

Correct Answer: D. EEG

Question 108: The sympathetic nervous system is responsible for which of the following?

A. Calming the body

B. Arousing the body for defensive action

C. Digesting food

D. Producing hormones

Correct Answer: B. Arousing the body for defensive action

Question 109: What happens when the parasympathetic nervous system is activated?

A. Increases heart rate

B. Lowers blood pressure

C. Increases blood sugar

D. Dilates arteries

Correct Answer: B. Lowers blood pressure

Question 110: Which part of the brain is primarily responsible for regulating basic survival functions such as breathing and heartbeat?

A. Cerebrum

B. Thalamus

C. Medulla oblongata

D. Cerebellum

Correct Answer: C. Medulla oblongata

Question 111: What is the function of the spinal cord?

A. Store memories

B. Produce red blood cells

C. Serve as an information highway connecting the PNS to the brain

D. Control hormone release

Correct Answer: C. Serve as an information highway connecting the PNS to the brain

Question 112: The midbrain is involved in which of the following functions?

A. Processing visual and auditory information

B. Regulating emotions

C. Memory storage

D. Producing hormones

Correct Answer: A. Processing visual and auditory information

Question 113: Which structure in the brain is associated with the regulation of emotions?

A. Hypothalamus

B. Limbic system

C. Cerebellum

D. Pons

Correct Answer: B. Limbic system

Question 114: Which part of the brain is involved in the coordination of voluntary movements?

A. Thalamus

B. Cerebellum

C. Hypothalamus

D. Medulla oblongata

Correct Answer: B. Cerebellum

Question 115: What is the primary role of the thalamus?

A. Control muscle movements

B. Regulate emotions

C. Act as a relay station for sensory information

D. Produce cerebrospinal fluid

Correct Answer: C. Act as a relay station for sensory information

Question 116: Which term refers to the process of receiving and converting external stimuli into neural activity?

A. Perception

B. Sensation

C. Cognition

D. Memory

Correct Answer: B. Sensation

Question 117: What is the primary function of sensory receptors?

A. Interpret sensory information

B. Transmit information to the muscles

C. Detect and respond to stimuli

D. Store sensory memories

Correct Answer: C. Detect and respond to stimuli

Question 118: Which type of sensory receptor is responsible for detecting light?

A. Mechanoreceptors

B. Thermoreceptors

C. Photoreceptors

D. Chemoreceptors

Correct Answer: C. Photoreceptors

Question 119: Which sensory system is responsible for the sense of smell?

A. Gustatory system

B. Auditory system

C. Olfactory system

D. Visual system

Correct Answer: C. Olfactory system

Question 120: The absolute threshold refers to which of the following?

A. The minimum intensity of a stimulus that can be detected 50% of the time

B. The difference between two stimuli that can be detected

C. The maximum intensity of a stimulus that can be tolerated

D. The average intensity of a stimulus detected by sensory receptors

Correct Answer: **A. The minimum intensity of a stimulus that can be detected 50% of the time**

Question 121: What is sensory adaptation?

A. The adjustment of sensory receptors to constant stimuli

- B. The increase in sensitivity to a stimulus over time
- C. The process of distinguishing between different stimuli
- D. The immediate reaction to a new stimulus

Correct Answer: **A. The adjustment of sensory receptors to constant stimuli**

Question 122: Perception is defined as which of the following?

A. The process of detecting stimuli

B. The process of organizing and interpreting sensory information

- C. The storage of sensory information
- D. The conversion of stimuli into neural signals

Correct Answer: **B. The process of organizing and interpreting sensory information**

Question 123: Which concept explains why we can recognize the same object under different conditions?

A. Sensory adaptation

B. Perceptual constancy

- C. Absolute threshold
- D. Signal detection theory

Correct Answer: **B. Perceptual constancy**

Question 124: Depth perception is primarily facilitated by which of the following?

A. Monocular cues

B. Binocular cues

- C. Sensory adaptation
- D. Perceptual constancy

Correct Answer: **B. Binocular cues**

Question 125: The phenomenon where we see patterns in random data is known as what?

A. Perceptual set

B. Pareidolia

- C. Sensory adaptation
- D. Signal detection theory

Correct Answer: **B. Pareidolia**

Question 126: Which theory explains how we detect signals amid noise?

A. Signal detection theory

- B. Perceptual constancy
- C. Depth perception

D. Sensory adaptation

Correct Answer: A. Signal detection theory

Question 127: The process by which we interpret sensory information in light of our experiences is known as what?

A. Bottom-up processing

B. Top-down processing

C. Signal detection theory

D. Perceptual constancy

Correct Answer: B. Top-down processing

Question 128: Classical conditioning was first described by which psychologist?

A. Sigmund Freud

B. B.F. Skinner

C. Ivan Pavlov

D. John Watson

Correct Answer: C. Ivan Pavlov

Question 129: In classical conditioning, what is the unconditioned stimulus (UCS)?

A. A stimulus that naturally triggers a response

B. A stimulus that triggers a learned response

C. A previously neutral stimulus that becomes associated with the UCS

D. A stimulus that produces no response before conditioning

Correct Answer: A. A stimulus that naturally triggers a response

Question 130: What is the process by which a behavior is strengthened by its consequences?

A. Classical conditioning

B. Operant conditioning

C. Observational learning

D. Insight learning

Correct Answer: B. Operant conditioning

Question 131: Who is associated with the law of effect in learning?

A. B.F. Skinner

B. Ivan Pavlov

C. Edward Thorndike

D. Albert Bandura

Correct Answer: C. Edward Thorndike

Question 132: Which term describes the process of reinforcing successive approximations to a desired behavior?

A. Generalization

B. Discrimination

C. Shaping

D. Extinction

Correct Answer: C. Shaping

Question 133: Observational learning was extensively studied by which psychologist?

A. Sigmund Freud

B. Ivan Pavlov

C. Edward Thorndike

D. Albert Bandura

Correct Answer: D. Albert Bandura

Question 134: The process of encoding, storing, and retrieving information is known as what?

A. Perception -B) Cognition

C. Memory

D. Learning

Correct Answer: C. Memory

Question 135: Which type of memory has the shortest duration?

A. Sensory memory

B. Short-term memory

C. Long-term memory

D. Working memory

Correct Answer: A. Sensory memory

Question 136: What is the primary function of working memory?

A. Store information indefinitely

B. Hold and manipulate information temporarily

C. Encode sensory input

D. Retrieve long-term memories

Correct Answer: B. Hold and manipulate information temporarily

Question 137: The process of transferring information from short-term memory to long-term memory is called what?

A. Retrieval

B. Encoding

C. Consolidation

D. Priming

Correct Answer: C. Consolidation

Question 138: Which type of long-term memory is responsible for knowledge of facts and concepts?

A. Procedural memory

B. Semantic memory

C. Episodic memory

D. Working memory

Correct Answer: B. Semantic memory

Question 139: The phenomenon of recalling the first and last items in a list more easily than the middle items is known as what?

A. Serial position effect

B. Recency effect

C. Primacy effect

D. Context-dependent memory Past-paper Question No. MCQs checked with handouts

Correct Answer: A. Serial position effect

Question 140: Humanistic approach emphasizes all of the followings EXCEPT:

A. Observable behavior Page 41

B. Capacity for personal growth

C. Intrinsic worth

D. Potential for self-fulfillment

Correct Answer: A. Observable behavior Page 41

Question 141: hich of the following is the ability to use logic, past experience, and learn information for mental processing?

A. Reasoning

B. Research

C. Thinking

D. Perception

Correct Answer: A. Reasoning

Question 142: Who suggested that most human behavior is learned by Observation?

A. Albert Bandura

B. Gordon Allport

C. George Alexander Kelly

D. William H. Sheldon

Correct Answer: A. Albert Bandura

Question 143: Which of the following is NOT a type of learning?

A. Verbal learning

B. Problem solving

C. Motor learning

D. Synchronicity

Correct Answer: D. Synchronicity

Question 144: In which of the following type of learning; person's own association, experiences and relations with the phenomenon has been involved?

- A. Verbal learning
- B. problem solving**
- C. Motor learning
- D. Audio learning

Correct Answer: B. problem solving

Question 145: Cognitive approach emphasizes on all of the followings EXCEPT:

- A. Thoughts
- B. Feelings
- C. Thinking

D. Genetic makeup

Correct Answer: D. Genetic makeup

Question 146: Which of the following is a rule; if it is applied, ensures the solution to the problem?

- A. Heuristics
- B. Algorithms**
- C. Both heuristics and algorithms
- D. Logarithm

Correct Answer: B. Algorithms

Question 147: Which component has been called the outward expression of our emotions?

- A. Behavioral**
- B. Physiological
- C. Cognitive
- D. None of the given options

Correct Answer: A. Behavioral

Question 148: Which one of the following processes is not the part of cognition?

- A. Imagery
- B. Thinking
- C. Problem solving

D. Motivation

Correct Answer: D. Motivation

Question 149: Critical thinking means making judgments about world based on which of the following?

- A. Emotion
- B. Authority and expertise
- C. Keeping a close mind

D. Reason and logical evaluation

Correct Answer: D. Reason and logical evaluation

Question 150: Which one of the following is not the primary motive?

- A. Hunger
- B. Air
- C. Warmth and cold

D. Achievement

Correct Answer: D. Achievement

Question 151: In the theory of classical conditioning the acronym CR stands for which of the following?

- A. Conditional reinforcement
- B. Conditioned response**
- C. Contingent reflex
- D. Contingent reflection

Correct Answer: B. Conditioned response

Question 152: Which of the following is not one of the types of concepts?

- A. Artificial concepts
- B. Natural concepts
- C. Prolonged concepts**
- D. Prototype concepts

Correct Answer: C. Prolonged concepts

Question 153: If reinforcement is withheld the response rate of the child declines and finally no response is shown by the child, this will be an example of which of the following?

- A. Reward
- B. Shaping
- C. Extinction**
- D. Acquisition

Correct Answer: C. Extinction

Question 154: Who among the following gave the Cognitive Appraisal Theory of emotions?

- A. Richard Solomon
- B. Richard Lazarus**
- C. Albert Ellis
- D. Cannon-Bard

Correct Answer: B. Richard Lazarus

Question 155: All of the following statements concern with the concept of learning EXCEPT:

- A. Learning is relatively permanent
- B. Learning involves experiences
- C. Learning is another word for physical growth**
- D. Learning involves changes in behavior

Correct Answer: C. Learning is another word for physical growth

Question 156: Which of the following is a desire, instinct or need that speeds up our behavior towards some goal?

A. Motivation

- B. Learning
- C. Vulnerability
- D. Tendency

Correct Answer: A. Motivation

Question 157: Human behavior is determined by the environment. This was proposed by which of the followings?

A. Behaviorists

- B. Humanists
- C. Psychoanalysts
- D. Cognitivists

Correct Answer: A. Behaviorists

Question 158: A Skinner box is most likely to be used in research on .

- A. Classical conditioning
- B. Cognitive learning
- C. Operant conditioning**
- D. Vicarious learning

Correct Answer: C. Operant conditioning

Question 159: Who amongst the following used apes in his experiments for knowing the use of insight by animals in problem solving?

- A. J. B. Watson
- B. F. Skinners

C. Wolfgang Kohler

- D. Jean Piaget

Correct Answer: C. Wolfgang Kohler

Question 160: Skinners used which of the following technique that means start reinforcing a behavior that is the first toward final behavior and then gradually reinforce successively closer approximations to the final behavior.

A. Shaping

- B. Assertion
- C. Modeling

D. Aversive question No:22 Learning to play a Piano is an example of which of the following?

A. Shaping

B. Classical conditioning

C. Learning by insight

D. Generalization

Correct Answer: A. Shaping

Question 161: A child overcomes her fear of snakes by observing another child repeatedly handle snakes. This is an example of which of the followings?

A. Cognition therapy

B. Systematic desensitization

C. Modeling

D. Contingency contracting

Correct Answer: C. Modeling

Question 162: In which of the following type of learning, an association is formed between a behavior and a consequence?

A. Classical conditioning

B. Operant conditioning

C. Modeling

D. Observational learning

Correct Answer: B. Operant conditioning

Question 163: Which of the following psychologist would argue that a criminal engages in unlawful behavior because he grew up around older boys who engaged in criminal activities?

A. Behaviorist

B. Psychoanalytic

C. Functionalist

D. Structuralist

Correct Answer: A. Behaviorist

Question 164: The rate at which food converts into energy and then is expended by the body is known as what?

A. Metabolism

B. Deuteranopia

C. Calcitonin

D. Oxytocin

Correct Answer: A. Metabolism

Question 165: Secondary motives are also known as which of the following?

A. Psycho-social motives

B. Biological motives

C. Psychological motives

D. Emotional motives

Correct Answer: C. Psychological motives

Question 166: Who among the following talked about the “cognitive maps”?

A. Tolman

B. Skinner

C. Thorndike

D. Maslow

Correct Answer: A. Tolman

Question 167: Which of the following is the main contribution of Kohler in the Gestalt School?

A. Learning by Insight

B. Learning by Imitation

C. Learning by Trial and Error

D. Learning by Conditioning

Correct Answer: A. Learning by Insight

Question 168: Organized bodies of information stored in memory are called what?

A. Norms

B. Cognitions

C. Schema

D. Traits

Correct Answer: C. Schema

Question 169: A German psychologist Wolfgang Kohler was one of the first psychologists who observed which of the following phenomenon?

A. Insight

B. Deductive reasoning

C. Inductive Thinking

D. Trial and error

Correct Answer: A. Insight

Question 170: All of the followings are the features of Unconscious EXCEPT:

A. Instinctual drives

B. Perception

C. Desires

D. Infantile wishes

Correct Answer: B. Perception

Question 171: Which part of brain controls positive emotions?

A. The left hemisphere

- B. Limbic system
- C. The right hemisphere
- D. Cerebrum

Correct Answer: A. The left hemisphere

Question 172: With regard to the types of concepts; which of the following concept is known, familiar and relatively simple concept?

A. Artificial

B. Natural

C. Prototypes

D. Prolonged

A. Achievement

B. Power

C. Hunger

D. Curiosity

Correct Answer: B. Natural

Question 173: Which branch of psychology studies cognition, related areas and issues?

A. Thinking psychology

B. Experimental psychology

C. Developmental psychology

D. Cognitive psychology

Correct Answer: D. Cognitive psychology

Question 174: According to Jung, which of the following is the energy for personal growth and development?

A. Archetypes

B. Superiority complex

C. Libido

D. Neurotic needs

Correct Answer: C. Libido

Question 175: A rectangle has two opposite sides equal, if it is not the case, then it is not a rectangle. This is an example of which of the following type of concept?

A. Artificial

B. Prototypes

C. Natural

D. Prolonged

Correct Answer: A. Artificial

Question 176: Hunger, thirst and sleep are what?

A. Learnt motives

B. Primary motives

- C. Social motives
- D. None of the given options

Correct Answer: B. Primary motives

Question 177: The ABC model suggests that an attitude has three components. Which of the following is not one of them?

- A. Affect
- B. Perception**
- C. Behavior
- D. Cognition

Correct Answer: B. Perception

Question 178: According to "Theory of Emotions" given by Albert Ellis, emotions do not result from a single cause but originate from different ways. In this regard, all of the followings were identified by Albert Ellis EXCEPT:

- A. Sensory- motor
- B. Bio-chemical stimulation
- C. Reflex action**
- D. Cognitive and thinking processes

Correct Answer: C. Reflex action

Question 179: All of the followings are the methods of assessing personality EXCEPT:

- A. Interview
- B. Observation and behavioral assessment
- C. Psychological tests

D. Positron Emission Tomography (PET)

Correct Answer: D. Positron Emission Tomography (PET)

Question 180: In which of the following need a person has a tendency to seek impact, control, or influence over others?

- A. Arousal
- B. Achievement
- C. Affiliation

D. Power

Correct Answer: D. Power

Question 181: Learning approaches are primarily based upon the principles of all of the followings EXCEPT:

- A. Classical Conditioning
- B. Operant Conditioning
- C. Gestalt Principle**
- D. Cognitive Learning

Correct Answer: C. Gestalt Principle

Question 182: Which part of brain helps in expression through tone of voice and by controlling facial expression?

- A. The left hemisphere
- B. Limbic system
- C. The right hemisphere**
- D. Cerebrum

Correct Answer: C. The right hemisphere

Question 183: Which of the following approach's main assumption is that "Human beings are capable of shaping their own destiny"?

- A. Psychoanalytic
- B. Behavioral
- C. Humanistic**
- D. Existential

Correct Answer: C. Humanistic

Question 184: Who gave the theory of "humors"?

- A. Hippocrates**
- B. Plato
- C. Socrates
- D. Kraepelin

Correct Answer: A. Hippocrates

Question 185: Concepts that have unique sets of traits and features, easy to define and elaborate are known as what?

- A. Artificial concepts**
- B. Natural concepts
- C. Prolonged concepts
- D. Prototype concepts

Correct Answer: A. Artificial concepts

Question 186: Relaxation exercises and meditation are the examples of what?

- A. Mental images**
- B. Schema
- C. Concepts
- D. Ideas

Correct Answer: A. Mental images

Question 187: Laws of perceptual organization were proposed by which of the following school of thought?

- A. Functionalism
- B. Structuralism
- C. Gestalt school**

D. Behaviorism

Correct Answer: C. Gestalt school

Question 188: Today psychology is considered as the scientific study of which of the followings?

A. Mind

B. Conscious experiences

C. Behavior and mental processes

D. Soul

Correct Answer: C. Behavior and mental processes

Question 189: Who among the followings is known as “father of Greek medicines”?

A. ocrates

B. Plato

C. Aristotle

D. Alcameon

Correct Answer: D. Alcameon

Question 190: Who among the followings gave the concept of Insight?

A. Max Wertheimer

B. Wolfgang Kohler

C. James Rowland Angell

D. James Mckeen Cattell

Correct Answer: B. Wolfgang Kohler

Question 191: Who among the followings regarded as the “Father of Medicine”?

A. Hippocrates

B. Kraepelin

C. Plato

D. Socrates

Correct Answer: A. Hippocrates

Question 192: Who among the followings is the author of the book “The Origin of Species”?

A. Emil Kraepelin

B. Paul Broca

C. Wilhelm Griesinger

D. Charles Darwin

Correct Answer: D. Charles Darwin

Question 193: Which of the following is incorrect about insulin-shock therapy?

A. In this therapy the comma is caused because of a reduction in blood sugar level.

B. It has found to be effective with schizophrenics, addicts etc., if used with psychotherapy.

- C. It was developed by Paul Broca who was a French surgeon and anthropologist**
D. It is used to cure psychological disorders by administering insulin.

Correct Answer: C. It was developed by Paul Broca who was a French surgeon and anthropologist

Question 194: Which of the following can increase the likelihood of occurrence of a behavior?

- A. Extinction
B. Reinforcement
C. Punishment
D. Insight

Correct Answer: B. Reinforcement

Question 195: Identify where we stop reinforcement and behavior extinguishes.

- A. Generalization
B. Extinction
C. Spontaneous recovery
D. Shaping

Correct Answer: B. Extinction

Question 196: Which of the following law is given by Thorndike that all responses followed by satisfaction are stamped into an individual and he learns those responses?

- A. Law of exercise
B. Law of effect
C. Law of insight
D. Law of belongingness

Correct Answer: B. Law of effect

Question 197: Which perspective of psychology emerged out of a desire to understand the conscious mind, free will, human dignity, and the capacity for self- reflection and growth?

- A. Humanistic**
B. Behavioral
C. Gestalt
D. Psychodynamic

Correct Answer: A. Humanistic

Question 198: Which of the following process is suggested by Bandura that help human behavior to learn?

- A. Intention
B. Observation
C. Insight
D. Reinforcement

Correct Answer: B. Observation

Question 199: Fatima is using newspaper records to study the rate of crime during the past 20 years. Which type of method is she utilizing?

- A. Participant Observation
- B. Structured Observation
- C. Field experiments

D. Archival data

Correct Answer: D. Archival data

Question 200: Gene that only influences the expression of a trait when paired with an identical gene is known as what?

- A. Dominant
- B. Mutated
- C. Recombinant

D. Recessive

Correct Answer: D. Recessive

Question 201: Which of the following is the correct order for Piaget's four stages of development?

- A. Preoperational, sensory-motor, concrete operations, formal operation
- B. Concrete operations, preoperational, sensory-motor, formal operation
- C. Sensory-motor, preoperational, concrete operations, formal operation**
- D. Preoperational, concrete operations, sensory-motor, formal operation

Correct Answer: C. Sensory-motor, preoperational, concrete operations, formal operation

Question 202: Which of the following is a scan showing biochemical activity within the brain at any given moment?

- A. CAT
- B. MRI
- C. EEG

D. PET

Correct Answer: D. PET

Question 203: Which of the following statement best describes “Hormones”?

- A. The male gonads
- B. Chemicals found in the synaptic vesicles, which when released have an effect on the next cell

C. Chemicals released into the bloodstream by the endocrine glands

- D. The female gonads

Correct Answer: C. Chemicals released into the bloodstream by the endocrine glands

Question 204: What do we call thyroid enlargement?

- A. Vitamin deficiency goiter
- B. Calcium deficiency goiter
- C. Protein deficiency goiter

D. Iodine deficiency goiter

Correct Answer: D. Iodine deficiency goiter

Question 205: Which part of the eye is a muscle that regulates the size of the pupil?

- A. Retina
- B. Sclera
- C. Iris**
- D. Lens

Correct Answer: C. Iris

Question 206: Which type of hearing problem can be reduced with ordinary hearing aids?

- A. Central deafness
- B. Auditory pathway deafness
- C. Conduction deafness**
- D. Sensory-neural deafness

Correct Answer: C. Conduction deafness

Question 207: In Watson's experiment, when little Albet was being conditioned to the fear of a rat, afterwards he used to be afraid of cotton balls as well. This concept is known as what?

- A. Stimulus generalization**
- B. Extinction
- C. Spontaneous recovery
- D. Higher order conditioning

Correct Answer: A. Stimulus generalization

Question 208: When Pavlov presented the bell (CS) continuously without the presentation of the meat powder (US), the dog's salivation decreased. This process is known as what?

- A. Stimulus generalization
- B. Spontaneous recovery
- C. Extinction**
- D. Reinforcement

Correct Answer: C. Extinction

Question 209: A child learns that whenever he eats all of his dinner; he will get a cookie for dessert. This type of learning is best example of which of the following?

- A. Operant conditioning**
- B. Classical conditioning

- C. Biofeedback theory
- D. Social learning theory

Correct Answer: A. Operant conditioning

Question 210: After every third wicket taken by an individual of the Pakistan cricket team, the coach rewards the player. What schedule of reinforcement is being used?

A. Fixed ratio schedule

- B. Variable ratio schedule
- C. Variable interval schedule
- D. Fixed interval schedule

Correct Answer: A. Fixed ratio schedule

Question 211: An employee receives a reward every 45 minutes. In which type of reinforcement schedule organism is reinforced after pre fixed time of intervals?

- A. Fixed Ratio Schedule
- B. Variable Ratio Schedule
- C. Variable Interval Schedule

D. Fixed Interval Schedule

Correct Answer: D. Fixed Interval Schedule

Question 212: The brain and the spinal cord comprise which of the following nervous systems?

A. Central nervous system

- B. Peripheral nervous system
- C. Autonomic nervous system
- D. Sympathetic nervous system

Correct Answer: A. Central nervous system

Question 213: The lobe of the cerebral cortex responsible for motor control and higher mental processes is known as the .

- A. Occipital lobe
- B. Temporal lobe
- C. Parietal lobe

D. Frontal lobe

Correct Answer: D. Frontal lobe

Question 214: The band of muscles behind the cornea that gives the eye its color and controls the size of the pupil is known as the .

- A. Sclera
- B. Iris**
- C. Pupil
- D. Cornea

Correct Answer: B. Iris

Question 215: The theory suggests color vision depends on red-green, blue- yellow, and black-white processes in the brain. It suggests that the receptor cells are linked in pairs and they work in opposition to each other.

- A. Figure-ground
- B. Trichromatic
- C. Photopigment

D. Opponent-process

Correct Answer: D. Opponent-process

Question 216: Which of the following glands abnormal secretion result in a condition called “cretinism”?

- A. Parathyroid gland

B. Thyroid gland

- C. Pancreas
- D. Gonads

Correct Answer: B. Thyroid gland

Question 217: What is conduction deafness?

- A. Hearing loss due to failure of the auditory nerve

B. Hearing loss due to problems with the bones of the middle ear

- C. Hearing loss due to failure of the visual nerve
- D. Hearing loss due to problems with the bones of the outer ear

Correct Answer: B. Hearing loss due to problems with the bones of the middle ear

Question 218: Who will be interested to study how cognitions are acquired and used in various groups and institutional settings?

- A. Anthropologists
- B. Computer scientist

C. Sociologists

- D. Geeks

Correct Answer: C. Sociologists

Question 219: refers to the degree of stability or change across the life span.

A. Temporal aspects

- B. Situational aspects
- C. Environmental aspects
- D. Spatial aspects

Correct Answer: A. Temporal aspects

Question 220: Who developed REBT (Rational Emotive Behavior Therapy)?

- A. George Kelly
- B. John Dollard

C. Albert Ellis

D. Neal Miller

Correct Answer: C. Albert Ellis

Question 221: In which of the following stage, OEDIPUS COMPLEX is observed?

A. Oral stage

B. Anal stage

C. Phallic stage

D. Genital stage

Correct Answer: C. Phallic stage

Question 222: A child who gives many answers in response to a question resorts to the process of .

A. Convergent thinking

B. Latent thinking

C. Divergent thinking

D. Critical thinking

Correct Answer: C. Divergent thinking

Question 223: A type of thinking which is aimed at solving problems or creating something new is called:

A. Creative thinking

B. Autistic thinking

C. Directed thinking

D. Symbolic thinking

Correct Answer: A. Creative thinking

Question 224: Which one of the following best supports the heuristic approach of problem solving?

A. Trying different responses until one works

B. Following a rule that guarantees a solution to a specific type of problem

C. Applying solutions that were previously successful with other problems similar in underlying structure

D. Employing rules of thumb suggested by our experience that are often used to solve problems

Correct Answer: D. Employing rules of thumb suggested by our experience that are often used to solve problems

Question 225: are enduring dimensions of personality characteristics that differentiate a person from others

A. Behaviour

B. Personality

C. Traits

D. All of the given options

Correct Answer: C. Traits

Question 226: In defense mechanism, a person reverts back to a stage that was satisfying.

- A. Sublimation
- B. Repression
- C. Denial

D. Regression

Correct Answer: D. Regression

Question 227: A correlation is a numerical measure of the .

- A. Unintended changes in participant's behavior due to cues from the experimenter.
- B. Behaviors of participants of different ages compared at a given time.
- C. Behaviors of participants followed and periodically assessed over time.

D. Strength of relationship between two variables.

Correct Answer: D. Strength of relationship between two variables.

Question 228: An adjustment in the lens shape in order to keep images in sharp focus is called:

- A. lens-image inversion
- B. top-down processing
- C. Accommodation**
- D. Optical adaptation

Correct Answer: C. Accommodation

Question 229: A researcher stops people at the mall and asks them questions about their attitude toward gun control. Which research technique is being used?

A. Survey

- B. Experiment
- C. Naturalistic observation
- D. Case study

Correct Answer: A. Survey

Question 230: As Saadia is walking across the campus, a car swerves toward her. Her heart beat races and sweat breaks out as she jumps out of harm's way. This mobilization of energy is due to the action of Saadia's system:

A. Sympathetic

- B. Para sympathetic
- C. Somatic nervous
- D. Skeleton nervous

Correct Answer: A. Sympathetic

Question 231: What two categories of dream content did Sigmund Freud described?

A. Latent and manifest

- B. Poetic and realistic
- C. Delusional and hallucinatory
- D. Literal and symbolic

Correct Answer: A. Latent and manifest

Question 232: In survey research method:

- A. Existing data are examined
- B. A control group is necessary
- C. New data is generated

D. A sample of people are asked questions

Correct Answer: D. A sample of people are asked questions

Question 233: A psychologist with a perspective focuses on how people know, understand, and think about the world:

- A. Psychodynamic
- B. Behavioral
- C. Humanistic

D. Cognitive

Correct Answer: D. Cognitive

Question 234: The change that an experimenter deliberately produces in a situation is called:

A. The experimental manipulation

- B. Randomization
- C. Replication
- D. The control group

Correct Answer: A. The experimental manipulation

Question 235: The proper sequence of structures that sound passes when it enters the ear is the following:

- A. Oval window, eardrum, stirrup, cochlea
- B. Cochlea, stirrup, eardrum, oval window
- C. Stirrup, eardrum, oval window, cochlea

D. Eardrum, stirrup, oval window, cochlea

Correct Answer: D. Eardrum, stirrup, oval window, cochlea

Question 236: The endocrine system is a communication network that sends messages throughout the nervous system via the bloodstream.

- A. Photo
- B. Neural
- C. Electrical

D. Chemical

Correct Answer: D. Chemical

Question 237: Which memory system provides us with a very brief representation of all the stimuli present at a particular moment?

A. Sensory memory

- B. Short-term memory
- C. Long-term memory
- D. Primary memory

Correct Answer: A. Sensory memory

Question 238: of the following perspectives would be associated with free will.

- A. Behavioral
- B. Psychodynamic
- C. Biological

D. Humanistic

Correct Answer: D. Humanistic

Question 239: In the statement “Critical thinking requires reasoned judgments,” the word reasoned means

- A. Giving it a lot of thought
- B. Seeing one side of an argument very clearly
- C. Focusing on opinion

D. Logical and well thought out

Correct Answer: D. Logical and well thought out

Question 240: Critical thinking means making judgments based on .

- A. Emotion
- B. Authority and expertise
- C. Keeping a closed mind

D. Reason and logical evaluation

Correct Answer: D. Reason and logical evaluation

Question 241: The behavioral treatment approaches assume that abnormal behavior is

A. Learned

- B. A function of dysfunctional cognitions
- C. A consequence of restricted growth potential
- D. The result of a biological dysfunction

Correct Answer: A. Learned

Question 242: What is one similarity shared by clinical psychologists and psychiatrists?

A. They diagnose and treat people experiencing behavioral and emotional problems.

- B. They have the same training experiences after college
- C. They view abnormal behaviors as arising from the same causes.
- D. They obtain the same graduate degree

Correct Answer: A. They diagnose and treat people experiencing behavioral and emotional problems.

Question 243: Galton considered intelligence to be .

- A. Not heritable
- B. Similar between most people
- C. A property of our nervous system or hereditary**
- D. The product of social differences

Correct Answer: C. A property of our nervous system or hereditary

Question 244: If a man experiences chest pains while at a department store, and later experiences anxiety attacks when visiting department stores, this can be explained by what type of learning?

- A. Operant
- B. Classical conditioning**
- C. Observational
- D. Vicarious

Correct Answer: B. Classical conditioning

Question 245: Social phobia is characterized by .

- A. A fear of people
- B. A fear of rejection
- C. A fear of social situations**
- D. A fear of social isolation

Correct Answer: C. A fear of social situations

Question 246: Who was the founder of REBT?

- A. Allbert Ellis**
- B. Aron beck
- C. Albert Einstein
- D. Aron Feldr

Correct Answer: A. Allbert Ellis

Question 247: Which one is NOT a type of schizophrenia?

- A. Disorganized type
- B. Catatonic type
- C. Paranoid type
- D. Differentiated type**

Correct Answer: D. Differentiated type

Question 248: Name the concept when there is a feeling of integration between the self and ideal self.

- A. Empathy
- B. Respect

C. Congruence

D. Genuineness

Correct Answer: C. Congruence

Question 249: Is a defense mechanism which refuses to acknowledge or accept anxiety provoking thoughts or impulses.

A. Displacement

B. Denial

C. Projection

D. None of the above

Correct Answer: B. Denial

Question 250: Structures of consciousness, according to psychodynamic approach, are conscious, subconscious, and unconscious.

A. Super conscious

B. Hyperconscious

C. Non conscious

D. None of the above

Correct Answer: D. None of the above

Question 251: The therapy based upon theory is too time consuming and therefore expensive.

A. Psychodynamic

B. Psycho social

C. Trait

D. None of the above

Correct Answer: A. Psychodynamic

Question 252: described personality in terms of two major dimensions.

A. Cattell

B. Eysenik

C. Adler

D. None of the above

Correct Answer: B. Eysenik

Question 253: TAT is a .

A. Self Report Inventory

B. Projection Test

C. Perception Test

D. None of the above

Correct Answer: B. Projection Test

Question 254: was the first to use the term “Mental Test” for devices used to measure intelligence.

A. Galton

B. Cattell

C. Thorndike

D. None of the above

Correct Answer: B. Cattell

Question 255: Binet and Simon were scientists. They were the first to measure intelligence formally.

A. German

B. American

C. French

D. None of the above

Correct Answer: C. French

Question 256: Cole and Hass gave the idea of .

A. Social Intelligence

B. Moral Intelligence

C. Emotional Intelligence

D. None of the above

Correct Answer: C. Emotional Intelligence

Question 257: has a dual function. Its functions are both arousing and alarming.

A. S.N.S

B. P.N.S

C. A.N.S (Automatic Nervous System)

D. None of the above

Correct Answer: C. A.N.S (Automatic Nervous System)

Question 258: J.B. Watson talked about three main emotions anger, love and .

A. Disgust

B. Fear

C. Sadness

D. None of the above

Correct Answer: B. Fear

Question 259: According to Piaget, children's thinking develops through two simultaneous processes:

A. Assimilation and accommodation

B. Assimilation and mental representation

C. Mental representation and equilibrium

D. Equilibrium and accommodation

Correct Answer: A. Assimilation and accommodation

Question 260: Which of the following statement best describe Erik Erikson?

A. He was an id psychologist

B. He developed a theory based on social rather than sexual relationships

C. He described archetypes

D. He gave the concept of basic anxiety

Correct Answer: B. He developed a theory based on social rather than sexual relationships

Question 261: Which of the followings are the branch-like structures that receive messages from other neurons?

A. Nerve bundles

B. Axons

C. Dendrites

D. Synapses

Correct Answer: C. Dendrites

Question 262: The peripheral nervous system consists of .

A. The spinal cord and autonomic system

B. All nerves in the brain and the spinal cord

C. The brain and the autonomic system

D. All the nerve cells that are not in the brain and spinal cord

Correct Answer: D. All the nerve cells that are not in the brain and spinal cord

Question 263: The fovea is made up of what?

A. All cones and no rods Fovea: The very sensitive and important part of the retina that aids in focusing; it is the area of best vision

B. Mostly cones with some rods

C. All rods and no cones

D. Mostly rods with some cones

Correct Answer: A. All cones and no rods Fovea: The very sensitive and important part of the retina that aids in focusing; it is the area of best vision

Question 264: What are the hammer, anvil, and stirrup?

A. Types of sound that most people can detect

B. Tiny bones located in the middle ear

C. Types of cones on the retina

D. Words often used by audiologists in testing for hearing difficulties

Correct Answer: B. Tiny bones located in the middle ear

Question 265: Which of the following is not one of the Gestalt principles?

A. Figure and ground

B. Proximity

C. Synchronicity

D. Closure

Correct Answer: C. Synchronicity

Question 266: Which of the following statement best describes the concept of an illusion?

- A. It is due to the action of the rods versus the cones in the retina
- B. Corresponds directly to something that you dreamed
- C. It is the same thing as a vision

D. It is a perception that does not correspond to reality

Correct Answer: D. It is a perception that does not correspond to reality

Question 267: Drugs that speed up the functioning of the nervous system are called .

A. Stimulants

- B. Psychogenics
- C. Narcotics
- D. Depressants

Correct Answer: A. Stimulants

Question 268: According to Sigmund Freud, the important underlying meaning of our dreams is found in the .

- A. Manifest content
- B. Deep content

C. Latent content

- D. Subliminal content

Correct Answer: C. Latent content

Question 269: Freud's psychoanalytic theory of dreaming states that .

A. The purpose of dreaming is to express unconscious wishes, thoughts, and conflicts.

- B. Dreaming is a by-product of a process of eliminating or strengthening neural connections.
- C. The purpose of dreaming is to resolve current concerns and problems.
- D. There is no purpose to dreaming; dreams occur because of random brain stem signals.

Correct Answer: A. The purpose of dreaming is to express unconscious wishes, thoughts, and conflicts.

Question 270: Daydreaming, meditation, intoxication, sleep, and hypnosis are all types of .

A. Altered states of consciousness

- B. Waking consciousness
- C. Self-awareness
- D. Self-absorption

Correct Answer: A. Altered states of consciousness

Question 271: The branchlike structures that receive messages from other neurons are called .

A. Nerve bundles

B. Dendrites

C. Axons

D. Synapses

Correct Answer: B. Dendrites

Question 272: The idea that learning occurs and is stored up, even when behaviors are not reinforced, is called .

A. Innate learning

B. Insight

C. Placebo learning

D. Latent learning

Correct Answer: D. Latent learning

Question 273: In operant conditioning, is necessary to create the association between the stimulus and the voluntary response.

A. The law of negative effect

B. A long time delay

C. Conditional emotional linkages

D. Reinforcement

Correct Answer: D. Reinforcement

Question 274: Receptor cells in the retina responsible for color vision are .

A. Cones

B. Rods

C. Bipolar cells

D. Ganglion cells

Correct Answer: A. Cones

Question 275: The branch of psychology that studies cognition, and related areas issues are called .

A. Forensic psychology

B. Cognitive psychology

C. Counseling psychology

D. Clinical psychology

Correct Answer: B. Cognitive psychology

Question 276: Dr. Usman studies the diagnosis, causes, treatments, and prevention of mental illnesses. Which type of psychologist is Dr. Usman?

A. Clinical psychologist

B. Developmental psychologist

C. Forensic psychologist

D. Health psychologist

Correct Answer: A. Clinical psychologist

Question 277: Which one of the following models believes that behavior is motivated by inner forces over which individuals have little control?

A. Cognitive model

B. Psychodynamic model

C. Humanistic model

D. Behavioral model

Correct Answer: B. Psychodynamic model

Question 278: Which one of the following schools of thought focused on what the mind does and how it does?

A. Structuralism

B. Functionalism

C. Gestalt

D. Behaviorist

Correct Answer: B. Functionalism

Question 279: Which one of the following drugs is a stimulant?

A. Nicotine

B. Lorazepam

C. Barbiturates

D. LSD

Correct Answer: A. Nicotine

Question 280: Tahir often experiences intense feelings of anger and frustration. In order to cope with these feeling, he enrolls in a kickboxing class as an outlet for his emotions. Tahir's actions are an example of which type of defense mechanism?

A. Projection

B. Displacement

C. Repression

D. Sublimation

Correct Answer: D. Sublimation

Question 281: Which type of learning process did Burrhus Frederic Skinner describe?

A. Classical Conditioning

B. Modeling

C. Observational Learning

D. Operant Conditioning

Correct Answer: D. Operant Conditioning

Question 282: refers to genetic composition of a person.

A. Genotype

B. Phenotype

- C. Monotype
- D. None of the given options

Correct Answer: A. Genotype

Question 283: In a correlational study, when one variable goes up as another goes down is known as a .

- A. Positive Correlation
- B. No Correlation
- C. Negative Correlation**
- D. Illusory Correlation

Correct Answer: C. Negative Correlation

Question 284: A researcher accessed information on the Internet from a series of surveys of women that was conducted during the 1970s and 1980s. The data were analyzed to examine changes in attitudes and behaviors over time. Which of the following method was used?

- A. Participant observation
- B. Case study
- C. Archival data**
- D. Field experiments

Correct Answer: C. Archival data

Question 285: A researcher wants to study the effects of violence displayed in movies on children behavior. In this research violence displayed in movies is the variable as it is manipulated by the experimenter.

- A. Independent**
- B. Dependent
- C. Confounding
- D. All of the given options

Correct Answer: A. Independent

Question 286: John B. Watson believed that psychology should involve the study of .

- A. Consciousness
- B. The brain
- C. The mind
- D. Behavior**

Correct Answer: D. Behavior

Question 287: A(n) is a measure of how strongly two variables are related to one another.

- A. Independent variable
- B. Correlation**
- C. Experimental effect

D. Dependent variable

Correct Answer: B. Correlation

Question 288: A variable that the experimenter manipulates is called a(n) .

A. Control condition

B. Independent variable

C. Coefficient of correlation

D. Dependent variable

Correct Answer: B. Independent variable

Question 289: Observing behavior as it happens in real-life natural settings without imposing laboratory controls is known as:

A. Naturalistic observation method

B. Experimental method

C. Psychometric approach

D. Survey method

Correct Answer: A. Naturalistic observation method

Question 290: Who claimed that behavior is affected by positive reinforcement?

A. B. F. Skinner

B. Sigmund Freud

C. William James

D. Wilhelm Wundt

Correct Answer: A. B. F. Skinner

Question 291: The psychodynamic perspective was based on the work of .

A. Freud

B. Watson

C. Gestalt

D. Wundt

Correct Answer: A. Freud

Question 292: Who was an early proponent of functionalism?

A. Wilhelm Wundt

B. Ivan Pavlov

C. William James

D. Max Wertheimer

Correct Answer: C. William James

Question 293: Which of the following terms do NOT belong together?

A. Natural selection; functionalism

B. Psychoanalysis; unconscious conflict

C. Structuralism; observable behavior

D. Gestalt; whole

Correct Answer: C. Structuralism; observable behavior

Question 294: “The whole is greater than the sum of the parts” is a statement associated with the perspective of

A. Introspection

B. Gestalt psychologists

C. Psychoanalysis

D. Functionalism

Correct Answer: B. Gestalt psychologists

Question 295: A branch of psychology that studies the psychology in action at the workplace is known as which of the following?

A. Clinical psychology

B. Forensic psychology

C. Health psychology

D. Industrial / Organizational Psychology

Correct Answer: D. Industrial / Organizational Psychology

Question 296: Which of the followings model focuses on how people know, understand and think about the world?

A. Cognitive model

B. Behavioral model

C. Humanistic model

D. Psychodynamic model

Correct Answer: A. Cognitive model

Question 297: Which of the following school of thought gave emphasis on the structure of consciousness?

A. Behaviorism

B. Functionalism

C. Structuralism

D. Gestalt school of thought

Correct Answer: C. Structuralism

Question 298: Which of the following system is a chemical communication network that sends messages through out the nervous system via the bloodstream?

A. Endocrine

B. Neuron

C. Electrical

D. Central

Correct Answer: A. Endocrine

Question 299: During which stage of development, the Oedipal and Electra complex takes place?

- A. The Latency Period
- B. The Anal Stage
- C. The Oral Stage

D. The Phallic Stage

Correct Answer: D. The Phallic Stage

Question 300: Which of the following will happen where we stop the reinforcement and the behavior will be extinguished?

- A. Generalization
- B. Extinction**
- C. Spontaneous recovery
- D. Shaping

Correct Answer: B. Extinction

Question 301: Identify who among the following developed the system of psychotherapy called Client-Centered Therapy?

- A. Alfred Adler
- B. William. H. Sheldon
- C. Albert Ellis

D. Carl Rogers

Correct Answer: D. Carl Rogers

Question 302: The recording of the behavior of people or animals in their natural environments, with little or no intervention by the researcher is known as what?

- A. Experimental research
- B. Naturalistic observation**
- C. Manipulative research
- D. Laboratory observation

Correct Answer: B. Naturalistic observation

Question 303: When a detailed description of a particular individual is gathered, this sort of data collection is known as

- A. A single-blind study
- B. A representative sample
- C. A naturalistic observation

D. A case study

Correct Answer: D. A case study

Question 304: The branch of psychology that studies how physiological and social changes take place over the lifespan is known as what?

- A. Forensic Psychology
- B. Developmental Psychology**
- C. Clinical Psychology

D. Social Psychology

Correct Answer: B. Developmental Psychology

Question 305: focuses on the unconscious forces that drive or motivate human behavior.

A. Psychodynamic model

B. Functionalism

C. Structuralism

D. Gestalt psychology

Correct Answer: A. Psychodynamic model

Question 306: The process of constructing comparable, exposure and comparison groups is called

A. Time series design

B. Prospective design

C. Retrospective design

D. Matching

Correct Answer: D. Matching

Question 307: gave the concept that human capacity for learning the language is innate.

A. Jean Piaget

B. Noam chomsky

C. tanley schacter

D. Tolman

Correct Answer: B. Noam chomsky

Question 308: , a French surgeon and anthropologist, discovered speech centre in brain.

A. Paul Broca

B. Philippe Pinel

C. Galen

D. Cabanis

Correct Answer: A. Paul Broca

Question 309: Psychology is defined as the science of:

A. Sensation and perception.

B. Experience and mental illness.

C. Culture and group dynamics.

D. Behavior and mental processes.

Correct Answer: D. Behavior and mental processes.

Question 310: Who is considered the "father of psychology" by his establishment of the first psychology lab?

A. Wilhelm Wundt

- B. William James
- C. Sigmund Freud
- D. E.B. Tichener

Correct Answer: A. Wilhelm Wundt

Question 311: Which of the following is considered the founder of the psychodynamic perspective in psychology?

- A. Wilhelm Wundt
- B. William James
- C. Sigmund Freud**
- D. B. Tichener

Correct Answer: C. Sigmund Freud

Question 312: The behaviorists believed:

- A. Psychology should emphasize the study of healthy people.
- B. Psychology should only study observable and objectively described acts**
- C. Psychology should study the self examination of inner ideas and experiences.
- D. All of the above.

Correct Answer: B. Psychology should only study observable and objectively described acts

Question 313: The psychological school of thought that stressed the whole or complete view of a situation was:

- A. Structuralism.
- B. Functionalism
- C. Behaviorism

Correct Answer: D. Gestalt

Question 314: According to this Psychological school of thought, to understand human behavior and thought, one must understand the unconscious mind and the key events that happened early in life that influence the unconscious mind. What is this school of thought?

- A. Psychoanalysis.**
- B. Functionalism
- C. Behaviorism
- D. Gestalt

Correct Answer: A. Psychoanalysis.

Question 315: Manifest content of a dream is:

- A. The obvious and apparent part**
- B. Hidden content.
- C. Conscious part of dream.

D. Overt part of dream.

Correct Answer: A. The obvious and apparent part

Question 316: Who established the first psychology lab in the United States?

A. G. Stanley Hall

B. William James

C. Francis Cecil Sumner

D. Mary Whiton Calkins

Correct Answer: A. G. Stanley Hall

Question 317: Edward Titchener used a method for studying the mind that became very popular during the Structuralist period. The method, called required trained participants to report their conscious mental experiences to the investigator. For example, if a person was angry, they would report all of their experiences during the time they were angry.

A. Empiricism

B. Functionalism

C. Contemplation

D. Introspection.

Correct Answer: D. Introspection.

Question 318: is the school of thought in where psychology is defined as the study of the structure of the mind.

A. Functionalism.

B. Behaviorism.

C. Structuralism.

D. All of the above.

Correct Answer: C. Structuralism.

Question 319: Who among the following gave the first classification system of mental disorder?

Correct Answer: Emil Kraepelin

Question 320: Which of the following measures “how strongly two variables are related to each other”?

Correct Answer: Correlation

Question 321: Ex post facto means:? “?

Correct Answer: after the fact

Question 322: Who gave the concept of birth order?

A. Alfred Adler

B. Erik Erikson

C. Sigmund Freud

D. Carl Gustav Jung

Correct Answer: **A. Alfred Adler**

Question 323: Which of the following school of thought used the method of introspection?

Correct Answer: **Structuralism**

Question 324: Who proposed the Social- Learning Theory?

Correct Answer: **Albert Bandura**

Question 325: Who presented a comprehensive theory of motivation?

Correct Answer: **Abraham Maslow**

Question 326: Which of the following focuses on the idea that all behavior is learned?

Correct Answer: **Behaviorism**

Question 327: Which of the following is a clear and colorless fluid covering the entire surface of central nervous system?

A. Arachnoid

B. Hydrocephalus

C. Choroid plexuses

D. Cerebrospinal fluid

Correct Answer: **D. Cerebrospinal fluid**

Question 328: Which of the following glands are known as “Managers of human body”? Endocrine Page 79

Correct Answer: **Endocrine glands**

Question 329: During which developmental stage of personality as proposed by Freud; the genital area becomes the erogenous zone for the child?

Correct Answer: **Phallic Stage**

Question 330: Which of the following gives the cerebral cortex a grayish brown appearance?

Correct Answer: **Grey matter**

Question 331: Which of the following layer of eye lies between the cornea and iris?

Correct Answer: **Anterior chamber**

Question 332: Which of the following field of psychology is also known as life-span psychology? developmental psychology

Correct Answer: **Developmental psychology**

Question 333: The components of a reflex arc include all of the followings EXCEPT?

Correct Answer: **Neural pathway**

Question 334: The first stage of Erik Erikson's psychosocial development theory is:

A. Initiative versus guilt

B. Trust versus mistrust

C. Industry versus inferiority

D. Autonomy versus shame and doubt

Correct Answer: B. Trust versus mistrust

Question 335: Which of the following is not one of the parts of “Hind Brain”?

Correct Answer: Cerebrum

NOTES BY TAQWA KHOKHAR
