

CS610-(Computer Networks)
Updated Mid Term Important Solved
Mcq's
By Mickey Ch

80 to 100% Marks

We offers:

▪ **LMS Handling**

▪ **Assignments**

▪ **Quizes**

▪ **GDB**

▪ **Mid&Final Term important Notes**

We also offers:

▪ **CS 619 Projects**

Learning With Mickey ch

1. Program sends a message to a remote computer and reports whether the computer responds.

- a) Ping**
- b) Traceroute
- c) ICMP
- d) None of the given

2. For how much time would other computers be in wait while one computer was transferring 56MB file with transmission speed of 56Kbps

- a) 10 Sec**
- b) 11 Sec
- c) 12 Sec
- d) 13 Sec

3. ATM is also called _____

- a) Label rewriting
- b) Label switching system
- c) Label rewriting and label switching system**
- d) All of above

4. was especially concerned about the lack of high-powered computers.

- a) ARPA**
- b) IEEE
- c) EIA
- d) None of the given

5. The most important task a bridge performs is _____

- a) Packet switching
- b) Line controlling
- c) Noise controlling
- d) Frame filtering**

6. ABR stands for.....

- a) Asynchronous Bit Rate
- b) Asynchronous Byte Recovery
- c) Asynchronous Bit Redundancy
- d) Available Bit Rate**

7. The term _____ is used to denote the definition of a packet used with a specific type of network.

- a) Packet
- b) Frame**

Whatsapp#0333-6166150

Learning With Mickey ch

- c) Data
- d) None of the given

8. The maximum cable length of a LAN is _____

- a) Fixed**
- b) Unlimited
- c) Fixed and Unlimited in different conditions
- d) None of these

9. SMDS is.....

- a) Connectionless service**
- b) Connection oriented service
- c) Used for delivering blocks of data
- d) None of the above

10. is effectively a very short Ethernet with very long AUI cables. It can be connected into larger Ethernet .

- a) RJ-45
- b) HUBS**
- c) 10Base-T
- d) None of these

11. _____ have advantages arisen from the size and ease of computation.

- a) CRC
- b) Parity
- c) Checksums**
- d) None of given

12. The maximum size of an Ethernet segment is

- a) 250 meters
- b) 500 meters**
- c) 700 meters
- d) None of the given

13. places the boundary between the first and second octets

- a) Class A**
- b) Class B
- c) Class C
- d) Class D

14. Router detects datagram _____ than network MTU and then it splits into pieces and each piece is _____ than outbound network MTU.

Whatsapp#0333-6166150

Learning With Mickey ch

a) Larger, smaller

b) Larger, larger

c) Smaller, larger

d) Smaller, smaller

15. Which of the following is not a network adapter?

a) 3 com LP III

b) 3 com Etherlink III ISA

c) 3 com Etherlink II Adapter

d) 3 com 3C508 ISA 16 BIT

16. UDP offers application programs a Message-Oriented Interface, applications can depend on protocol to preserve data boundaries.

a) True

b) False

17. In case TCP, retransmission, acknowledgment from a computer on LAN are expected to arrive within

a) Seconds

b) Micro seconds

c) Milliseconds

d) Nanoseconds

18. Most LANs that employ ring topology use an access mechanism known as_____

a) CSMA/CD

b) CSMA/CA

c) TOKEN PASSING

d) None of the given

19. In Direct point to point communication adding the Nth computer requires_____ new connections.

a) None of the given

b) N^2

c) $N-1$

d) $(N^2 - N)/2$

20. The Gigabit Ethernet hardware operates at a rate of _____

a) 10 Mbps

b) 100 Mbps

c) 1000 Mbps

d) None of the given

Whatsapp#0333-6166150

Learning With Mickey ch

21. IEEE LLC/SNAP header is _____, which is used to specify the type of data.

- a) 8 octets**
- b) 8 bytes
- c) 8 bits
- d) None of the given

22. protocols of TCP/IP layering model specify how to ensure reliable transfer.

- a) Physical Layer
- b) Network Interface Layer
- c) Internet Layer
- d) Transport Layer**

23. The address identifies the physical network to which the computer is attached, while the _____ identifies an individual computer on that network.

- a) prefix , suffix**
- b) suffix , prefix
- c) suffix , suffix
- d) None of the given

24. _____ places the boundary between the third and fourth octets.

- a) Class A
- b) Class B
- c) Class C**
- d) Class D

25. Formally named _____, informally known as the twisted pair Ethernet or TP Ethernet.

- a) 10 Base 2
- b) 10 Base 5
- c) 10 Base T**
- d) None of the given

26. The term self-identifying is used for Classful IP addresses because the class of the address can be computed from the address

- a) itself**
- b) prefix
- c) suffix
- d) mask

27. Find the class of the address.

10100111 11011011 10001011 01101111

- a) A

Whatsapp#0333-6166150

Learning With Mickey ch

b) B

c) E

d) C

28. An interface for twisted pair Ethernet must have an _____ connector, and must generate signals according to the _____ specification.

a) RJ-45, 10 Base T

b) RJ-45, 10 Base 5

c) BNC, 10 Base 2

d) BNC, 10 Base T

29. Find the class of the address:

11110011 10011011 11111011 00001111

a) A

b) C

c) E

d) B

30. TCP uses mechanism to control the flow of data.

a) door

b) window

c) acknowledgment

d) retransmission

31. Computer networks are often called _____ because they use packet technology.

a) Ethernet

b) Switch networks

c) Packet networks

d) None of the given

32. A bridges function in the _____ layers(s).

a) Physical (MAC)

b) Data link

c) Network

d) Physical (MAC) and Data link

33. An _____ method, the network hardware designers specify how type information is included in the frame and the value use to identify various frame types.

a) Explicit frame type

b) Ideal frame type

c) Implicit frame type

d) None of the given

Whatsapp#0333-6166150

Learning With Mickey ch

34. An interface for thin Ethernet must have an connector, and must generate signals according to the specification.

- a) RJ-45, 10 Base T
- b) RJ-45, 10 Base 5
- c) BNC, 10 Base 2**
- d) BNC, 10 Base T

35. A Bridge forwards or filters a frame by comparing the information in its address table to the frame's

- a) Layer 2 source address
- b) Source node's physical address
- c) Layer 2 destination address**
- d) Layer 3 destination address

36. of TCP/IP layering model, corresponds to basic network hardware.

- a) Physical Layer**
- b) Network Interface Layer
- c) Internet Layer
- d) Transport Layer

37. _____ is called an end-to-end protocol because it provide a connection directly from an application on one computer to an application on a remote computer.

- a) IP
- b) UDP
- c) TCP**
- d) None of the given

38. A Bridge can _____

- a) Filter a frame
- b) Forward a frame
- c) Extend a LAN
- d) Do all the above**

39. Protocol addresses are abstractions provided by _____

- a) hardware
- b) software**
- c) operating system
- d) internet

Whatsapp#0333-6166150

Learning With Mickey ch

40. In the 1970s large organizations began to acquire multiple networks. Each network in the organization formed island. Employees needed to choose a computer appropriate for each task. So they needed multiple screens, keyboards and computers.

- a) False
- b) True**

41. A Bridge forwards or filters a frame by comparing the information in its address table to the frame's _____

- a) Layer 2 source address
- b) Source node's physical address
- c) Layer 2 destination address**
- d) Layer 3 destination address

42. The general form of an IP datagram is with a header followed by data. The header contains information that controls where and how the datagram is to be sent.

- a) True**
- b) False

43. Which of the following is a correct representation of the IPv6?

- a) 105.220.136.100.255.255.255.0.0.18.128.140.10.255.255**
- b) 105.220.136.100.255.255.255.256.0.0.18.128.140.10.255.255
- c) 105.220.136.100.255.255.255.255.0.0.18.128.140.10.255.255.256
- d) 105.220.136.100.255.255.255.255.0.0.18.128.140.10.255

44. _____ computes shortest paths in a graph by using weights on edges as a measure of distance.

- a) Greedy algorithm
- b) Distance vector algorithm
- c) Dijkstra's algorithm**
- d) None of the given

45. The number of connections needed for N computer in direct point to point communication is equal to:

- a) $(N^2 - N)/2$**
- b) $N(N - 1)$
- c) N^2
- d) None of the given

46. A system with redundant bridges might have a problem with in the system.

- a) Loop**
- b) Filters
- c) Spanning Trees

Whatsapp#0333-6166150

Learning With Mickey ch

d) All given choices

47. Connectionless service, Message-Oriented protocol, best effort delivery service, arbitrary interaction and operating system independent are the characteristics of

- a) TCP
- b) UDP**
- c) IP
- d) None of the given

48. _____ is used for audio and video, since these have predefined maximum data rates

- a) Constant Bit Rate (CBR) service**
- b) Variable Bit Rate (VBR) service
- c) Available Bit Rate (ABR) service
- d) None of the given

49. The process of using a routing table to select a next hop for a given datagram is called

- a) Encapsulation
- b) Reassembling
- c) Routing or forwarding**
- d) None of the given

50. uses distance vector approach to define routing

- a) BGP
- b) OSPF
- c) RIP**
- d) None of the given

51. Unlike Frame Relay and ATM, SMDS (Switched multi-megabit Data service) offers _____.

- a) Connectionless service paradigm**
- b) Connection oriented service paradigm
- c) Both Connectionless and Connection-oriented service paradigm
- d) None of the given

52. Which method of Address Resolution Protocol is useful with any hardware?

Were "T" stands for Table lookup, "C" for Closed-form Computation and "D" for Data Exchange?

- a) T**
- b) C
- c) D
- d) C, D

Whatsapp#0333-6166150

Learning With Mickey ch

53. We use the term _____ to refer to a measure of the path that routing software use when choosing a route.

- a) routing path
- b) routing metric
- c) routing**
- d) switching

54. A network with throughput T and delay D has a total of _____ bit in transit at any time.

- a) T / D
- b) $T \times D$**
- c) $T + D$
- d) None of the given

55. SMDS is.....

- a) Connectionless service**
- b) Connection oriented service
- c) Used for delivering blocks of data
- d) None of the above

56. All destinations on same switch have same

- a) Router
- b) Information
- c) Next hop**
- d) None of the above

57. If a link or a packet switch fails then which one of the following would possibly happen?

- a) Link would be reestablished
- b) Request to change failed hardware would appear**
- c) The packet switch will modify the tables
- d) None of the above

58. ATM is designed to work on_____.

- a) Twisted Pair
- b) Coaxial
- c) Radio Frequency
- d) Fiber**

59. A _____ Relies on the hardware manufacturer to assign a unique physical address to each network interface.

- a) Static addressing scheme**
- b) Configurable addressing scheme
- c) Dynamic addressing scheme

Whatsapp#0333-6166150

Learning With Mickey ch

d) None of the given

60. Computers attached to an Ethernet use ----- in which a computer waits for the ether to be idle before transmitting a frame.

a) CSMA/CD

b) CSMA/CA

c) TOKEN PASSING

d) None of the given

61. ATM assigns each VC a identifier that is divided two parts to produce a hierarchy.

a) 21-bit

b) 22-bit

c) 23-bit

d) 24-bit

62. identifies which application program on receiving computer should receive the data

a) Logical address

b) Source port

c) Destination Port

d) None of the given

63. Which of the following are interior routing protocols?

a) RIP

b) OSPF

c) BGP

d) RIP and OSPF

64. FDDI can transmits data at a rate of _____

a) 100 million bits per second

b) 10 million bits per second

c) 1000 million bits per second

d) None of the given

65. No error detection scheme is perfect because transmission errors can affect the additional information as well as the data.

a) True

b) False

66. A ----- provide a mechanism that a customer can use to set a physical address.

a) Static addressing scheme

b) Configurable addressing scheme

Whatsapp#0333-6166150

Learning With Mickey ch

- c) Dynamic addressing scheme
- d) None of the given

67. In Point-to-Point topology there are two topologies.

- a) Star and Tree
- b) Tree and Ring
- c) Star and Ring
- d) Star and Tree**

68. measures distance in network hops, where each network between the source and destination counts as single hop.

- a) BGP
- b) OSPF
- c) RIP**
- d) None of the given

69. In -----, network occupies the smaller area like a room a floor or a building

- a) LAN**
- b) WAN
- c) MAN
- d) None of the given

70. Program sends a message to a remote computer and reports whether the computer responds.

- a) Ping**
- b) Traceroute
- c) ICMP
- d) Non of the given

71. _____ provide Application to application communication it also called end to end communication

- a) IP
- b) TP**
- c) RIP
- d) None of the given

72. A routing table contains.

- a) The destination network ID
- b) The hop count to reach the network
- c) The router ID of the next hop**
- d) All of the given

Whatsapp#0333-6166150

Learning With Mickey ch

73. _____ has no way to determine the cause of the problem.

- a) ICMP
- b) Ping**
- c) Trace route
- d) Non of the given

74. One repeater _____, two repeaters _____ the maximum cable length limitation.

- a) Double, triple**
- b) Double, 4 time
- c) half, triple
- d) Double, half

75. Address mask defines how many bits of address are in suffix?

- a) True
- b) False**

76. Router detects datagram _____ than network MTU

- a) Larger**
- b) Smaller
- c) None of given
- d) Equal

77. Information can flow in either or both direction between

- a) Clients
- b) Clients and servers**
- c) Servers
- d) None of given

78. On of the design goals for unicast route propagation is.

- a) consistency
- b) inconsistency
- c) stability**
- d) dynamic addressing

79. IPV6 address consists of

- a) 32 Bits
- b) 64 Bits
- c) 128 Bits**
- d) none of the given

80. The term _____ refers to the general concept of a small block of data

Whatsapp#0333-6166150

Learning With Mickey ch

a) Packet

- b) Frame
- c) Data
- d) None of the given

81. Hardware that calculates a CRC uses two simple components.

- a) AND unit and XOR unit
- b) Shift register and XOR unit**
- c) Shift register and AND unit
- d) None of the given

82. The header indicates whether a datagram is a fragment or a complete datagram.

- a) FLAGS**
- b) FLAGMENT OFFSET
- c) IDENTIFICATION
- d) None of the given

83. Local Talk is a LAN technology that employs _____

- a) Bus topology**
- b) Ring topology
- c) Star topology
- d) None of the given

84. ICMP message transport is acted upon by getting ICMP encrypted in IP.

- a) True**
- b) False

85. These packets serve same purpose on as frames on

- a) Intranet, LAN
- b) Internet, WAN
- c) Intranet, WAN
- d) Internet, LAN**

86. The term self-identifying is used for Classful IP addresses because the class of the address can be computed from the address

- a) itself**
- b) prefix
- c) suffix
- d) mask

87. Ethernet uses a ----- bit static addressing scheme in which each device is assigned a unique address by the manufacturer.

Whatsapp#0333-6166150

Learning With Mickey ch

- a) 64
- b) 48**
- c) 32
- d) 8

88. 11110011 10011011 11111011 00001111

- a) A
- b) C
- c) E**
- d) B

89. Which method of Address Resolution Protocol resolution with minimum delay?

Were "T" stands for Table lookup, "C" for Closed-form Computation and "D" for Data Exchange?

- a) T, D
- b) c
- c) T
- d) T, C**

90. In which method of Address Resolution Protocol the implementation is more difficult?

Were "T" stands for Table lookup, "C" for Closed-form Computation and "D" for Data Exchange?

- a) T, C
- b) T
- c) C
- d) D**

91. In IPv6 the type of address used for collection of computers with same prefix. Are known as.

- a) Anycast
- b) Unicast
- c) Multicast
- d) None of the given**

92. The time for acknowledgement to arrival of packet depends on.

- a) Distance to destination and Current traffic conditions**
- b) Current traffic conditions
- c) Distance to destination.
- d) none of these

93_____ has a jitter zero

- a) None of the given

Whatsapp#0333-6166150

Learning With Mickey ch

- b) Virtual Private Network
- c) Isochronous Network**
- d) Asynchronous Network

94. An _____ method, the network hardware designers specify how type information is included in the frame and the value use to identify various frame types.

- a) Explicit frame type**
- b) Ideal frame type
- c) Implicit frame type
- d) None of the given

95. A Bridge forwards or filters a frame by comparing the information in its address table to the frame's

- a) Layer 2 source address
- b) Source node's physical address
- c) Layer 2 destination address**
- d) Layer 3 destination address

96. Most WAN systems include a mechanism that can be used to eliminate the common case of duplication routing is called

- a) Hierarchal address
- b) Default route**
- c) Shortest path
- d) None of the given

97. Formally named _____ informally known as the thick wire Ethernet or Thick net.

- a) 10 Base 2
- b) 10 Base 5**
- c) 10 Base T
- d) None of the given

98. of TCP/IP layering model, corresponds to basic network hardware.

- a) Physical Layer**
- b) Network Interface Layer
- c) Internet Layer
- d) Transport Layer

99. protocols of TCP/IP layering model specify how to ensure reliable transfer.

- a) Physical Layer
- b) Network Interface Layer
- c) Internet Layer
- d) Transport Layer**

Whatsapp#0333-6166150

Learning With Mickey ch

100. Protocol addresses are abstractions provided by

- a) hardware
- b) software**
- c) operating system
- d) internet

101. ARP is almost always used to bind a bit IP address to a bit Ethernet address.

- a) 32, 48**
- b) 24, 32
- c) 32, 64
- d) 32, 128

102. The number of connections needed for N computer in direct point to point communication is equal to:

- a) $(N^2 - N)/2$**
- b) $N(N - 1)$
- c) N^2
- d) None of the given

103. The maximum size of an Ethernet segment is _____

- a) 250 meters
- b) 500 meters**
- c) 700 meters
- d) None of the given

104. The process of using a routing table to select a next hop for a given datagram is called

- a) Encapsulation
- b) Reassembling
- c) Routing or forwarding**
- d) None of the given

105. _____ is used for compressed audio and video where the data rate depends on the level of compression that can be achieved.

- a) Constant Bit Rate (CBR) service
- b) Variable Bit Rate (VBR) service**
- c) Available Bit Rate (ABR) service
- d) None of the given

106. Which method of Address Resolution Protocol is useful with any hardware?

Were "T" for Computation and "D" for Data Exchange?

Whatsapp#0333-6166150

Learning With Mickey ch

a) T

b) C

c) D

d) C, D

107. We use the term to refer to a measure of the path that routing software use when choosing a route.

a) routing path

b) routing metric

c) routing

d) switching

108. performs local multicast and uses IP-in-IP encapsulation to send multicast datagrams from one site on the Internet to another.

a) Distance Vector Multicast Routing Protocol (DVMRP)

b) Core Based Trees (CBT)

c) Protocol Independent Multicast_ Sparse Mode (PIM-SM)

d) Protocol Independent Multicast _ Dense Mode (PIM-DM)

109. In broadcast topology there are two categories_____.

a) SATELLITE\ RADIO

b) RING TOPOLOGY

c) Both a & b

d) None of the above

110. OSPF is based on_____

a) Distance vector routing

b) Link state routing

c) Path vector routing

d) Distance vector routing and Link state routing

111. The product of delay and throughput measures the _____ of data that can be present on the network.

a) Area

b) Volume

c) Length

d) None of the given

112. CRC can detect more errors than a simple checksum.....

a) True

b) False

Whatsapp#0333-6166150

Learning With Mickey ch

113. An interface for thin Ethernet must have an connector, and must enerate signals according to the specification.

- a) RJ-45, 10 Base T
- b) RJ-45, 10 Base 5
- c) BNC, 10 Base 2**
- d) BNC, 10 Base T

114. One repeater _____, two repeaters _____ the maximum cable length limitation.

- a) doubles, triple**
- b) square roots, cude roots
- c) and, triple
- d) doubles, cancel

115. What will be the bandwidth rate for short distance 10Base-T?

- a) 16 MHz
- b) 20 MHz**
- c) 100 MHz
- d) 150 MHz

116. LAN interface may use _____ to copy frame data directly from main memory.

- a) DMA**
- b) FDDI
- c) CSMA/CD
- d) None of the given

117. A network uses a _____ if all computers attach to a central point

- a) Star Topology**
- b) Ring Topology
- c) Bus Topology
- d) None of the given

118. The Ethernet standard specifies that frames are sent using the_____

- a) Differential Manchester
- b) Not Return to Zero (NRZ)
- c) Manchester Encoding**
- d) Return to Zero (RZ)

119. For how much time would other computers be in wait while one computer was transferring 56MB file with packet size of 1000 bytes and transmission speed of 56Kbps

- a) 0.143 sec**
- b) 0.243 0.343
- c) 0.343 0.343

Whatsapp#0333-6166150

Learning With Mickey ch

d) 0.443 0.343

120. Some applications have large data transfer. In this way they hold the network for long time. This problem can be eliminated by

- a) Divide the application into small block or chunks called 'Packets'.
- b) Divide the application into small block or chunks called 'Segments'.
- c) Divide the data into small block or chunks called 'Segments'.
- d) Divide the data into small block or chunks called 'Packets'.**

121. _____ is also called self-healing network

- a) ATM
- b) FDDI**
- c) Token Ring
- d) None of the given

122. A typical port on an ATM switch operates at _____ or higher.

- a) OC-2 speed (155Mbps)
- b) OC-3 speed (100Mbps)
- c) OC-3 speed (155Mbps)**
- d) OC-3 speed (155Gbps)

123. No error detection scheme is perfect because transmission errors can affect _____.

Select correct option:

- a) Data
- b) Additional Information
- c) Additional information & data**
- d) Transmission medium

124. A network uses _____ to arrange computers to be connected in a single closed loop.

- a) Star Topology
- b) Dual Ring Topology
- c) Ring Topology**
- d) Bus Topology

125. Which of the following is a connecting device?

- a) Bridge
- b) Repeater
- c) Hub
- d) All the given**

126. Which of the following protocols allows the sender and receiver to enforce policies.

Whatsapp#0333-6166150

Learning With Mickey ch

- a) RIP
- b) OSPF
- c) BGP**
- d) RIP and OSPF

127. include a 32-bits address mask with each address, which allows the address to be classful, classless, or sub netted.

- a) RIP
- b) OSPF**
- c) BGP
- d) None of the given

128. The third field of the header consists of _____ bit Ethernet frame type.

- a) 48
- b) 32
- c) 16**
- d) 8

129. A multicast routing scheme in which the protocol software builds a delivery tree from a central point is called _____

- a) Distance Vector Multicast Routing Protocol (DVMRP)
- b) Core Based Trees (CBT)**
- c) Protocol Independent Multicast _ Sparse Mode (PIM-SM)
- d) Protocol Independent Multicast _ Dense Mode (PIM-DM)

130. ISO stands for _____

- a. International Standard Organization**
- b. International Student Organization
- c. Integrated Services Organization
- d. Internet Services Organization

131. Fixed network is a type of networks which is classified with respect to the _____ factor

- a) Size
- b) Connectivity
- c) Medium
- d) Mobility**

132. A standalone program that has been modified to work on a LAN by including concurrency controls such as file and record locking is an example of _____

- a) LAN intrinsic software**
- b) LAN aware software
- c) Groupware

Whatsapp#0333-6166150

d) LAN ignorant software

133. What is the max cable length of STP?

- a) 100 ft
- b) 200 ft
- c) 100 m
- d) 200 m**

134. The Fast Ethernet hardware operates at a rate of _____

- a) 10 Mbps
- b) 100 Mbps**
- c) 1000 Mbps
- d) None of the given

135. What is the max data capacity of STP?

- a) 10 mbps
- b) 100 mbps**
- c) 1000 mbps
- d) 10000 mbps

136. Which of the following statements is wrong regarding PVC?

- a) PVC last if the customer pay the periodic fee for its use.
- b) Forwarding tables are automatically restored after power of equipment failure.
- c) Forwarding table entries for PVC's are dynamically configured.**
- d) All of the above are wrong

137. In _____, network occupies larger areas like cities & countries.

- a) LAN
- b) WAN**
- c) MAN
- d) None of the given

138. Dijkstra's algorithm is used to compute the _____

- a) shortest path between two nodes**
- b) number of nodes used in the network
- c) distance between different nodes
- d) None of the above

139. NAT stands for _____

- a) Network address and protocol translation
- b) Network address and port translation**

Whatsapp#0333-6166150

Learning With Mickey ch

- c) Network address and packet translation
- d) None of the given

140. Star topology is the kind of _____ -

- a) Tree topology
- b) Point-to-point topology**
- c) Broadcast topology
- d) Ring topology

141. Header contains all information needed to deliver datagram to the destination computer. But which one of the following is not included:

- a) Destination address
- b) Source address
- c) Rectifier**
- d) Other delivery information

142. Every hardware technology specification includes the definition of the maximum size of the frame data area, which is called the _____ Transmission Unit.

- a) Least
- b) Maximum**
- c) Fragment
- d) Frame

143. IPV6 address with _____ leading zeros is interpreted to hold an IPV4 address.

- a) 96**
- b) 100
- c) 120
- d) none of the given

144. For _____, information about forwarding is stored in a routing table, which is initialized at system initialization and must be updated as network topology changes.

- a) Efficiency**
- b) Security
- c) Accuracy
- d) Anomalies

145. _____ is a technique used to Limit datagram size to small MTU of any network

- a) Segmentation
- b) Fragmentation**
- c) Encapsulation
- d) none of the given

146. Unlike Frame Relay and ATM, SMDS (Switched multi-megabit Data service) offers_____ .

- a) Connectionless service paradigm**
- b) Connection oriented service paradigm
- c) Both Connectionless and Connection-oriented service paradigm
- d) None of the given

147. Class A mask is 255.0.0.0 which is used for _____

- a) Unicasting
- b) Multicasting
- c) Subnetting**
- d) All of the given

148. Which protocol is used to test different tools

- a) ICMP**
- b) IGMP
- c) TCP/IP
- d) none of the given

149. ATM assigns each VC a _____ identifier that is divided two parts to produce a hierarchy.

- a) 21-bit
- b) 22-bit
- c) 23-bit
- d) 24-bit**

150. _____ message is sent in response to incoming datagrams with problems.

- a) TCP/IP
- b) IGMP
- c) ICMP**
- d) none of the given

151. A datagram cannot be larger than _____ of a network over which it is sent.

- a) MTU**
- b) Size
- c) IP header
- d) None of the given

152. Most WAN systems include a mechanism that can be used to eliminate the common case of duplication routing is called_____

- a) Hierarchal address
- b) Default route**

Whatsapp#0333-6166150

Learning With Mickey ch

- c) Shortest path
- d) None of the give

153. A popular LAN Technology that uses a shared Bus Topology is called_____

- a) WAN
- b) CSMA
- c) Ethernet**
- d) Multicast

154. An electronic device that connects LAN segments

- a) Ethernet
- b) 10Baset
- c) Bridge**
- d) 10Base5

155. The next hop to which a packet is sent depends only on

- a) Packet's destination**
- b) Packet's original source
- c) Path the packet has taken.
- d) None of the give

156. A network technology that uses Collision Avoidance

- a) Bridge
- b) Broadcast
- c) WAN
- d) Wireless LAN**

157. When an application----- data, it makes a copy of the data available to all other computers on the network.

- a) Broadcasting
- b) Multicasting**
- c) Unicasting
- d) None of the given
