

CS614 LIVE (QUIZ) MCQs

MID TERM

Past papers for all subjects are also available

03184148783

1. Which of the following is not an "Orr's Law of Data Quality"?
 - O "Data quality is a function of its use, not its collection!"
 - O "Data that is not used cannot be correct!"
 - O "Data will be no better than its most stringent use!"
 - ✓ O "Data duplication can be harmful for the organization!"
2. Which of the following is NOT one of the advantages of changed data capture (CDC) technique?
 - ✓ No incremental on-line I/O required for log tape
 - Flat files are not required
 - Limited query interface is required for data extraction
 - Extraction of changed data occurs immediately
3. The degree to which values are present in the attributes that require them is known as:
 - ✓ Completeness
 - Accessibility
 - Uniqueness
 - Consistency
4. Records referring to the same entity are represented in different formats in the different data sets or are represented erroneously. Thus, duplicate records will appear in the merged database. This problem is known as:
 - Redundant duplication problem
 - ✓ Merge/purge problem
 - Redundant problem

- Duplication problem
5. **Robotic libraries are needed for:**
- ✓ Data warehouse
 - Cubes
 - Data marts
6. **One of the possible issues faced by web scraping is that:**
- Web pages do not contain multiple dimensions
 - Web pages do not contain multiple facts
 - Web pages does not support transformation
 - ✓ Web pages may contain junk data
7. **Enrichment is one of the basic tasks in data:**
- ✓ Transformation
 - Summarization
 - Loading
8. **If one or more records in a relational table do not satisfy one or more integrity constraints, then the data:**
- Is semantically dirty ✓
 - Is syntactically dirty
 - Has extraction issue
 - Has Coverage anomaly
9. **Serious _____ involves decomposing and reassembling the data:**
- Data Extraction
 - ✓ Data transformation
 - Data loading
 - Data cleansing
10. **If actual data structure does not conform to documented formats then it is called:**
- ✓ Syntactically dirty data
 - Extraction issue

- Coverage anomaly
- Semantically dirty data

1. In Extract, Load, Transform (ELT) process, data transformation _

- A) Depends on the nature of the source database
- B) Takes place on a separate transformation server
- C) Takes place on the data warehouse server ☒
- D) Does not take place

2. Which is not a/an step of data cleansing procedure?

- A) Elementizing
- B) Aggregation ☒
- C) Standardizing

3. If a table is expected to have six columns but some or all of the records do not have six columns then it is example of:

- A) Coverage anomaly
- B) Syntactically dirty data ☒
- C) Semantically dirty data
- D) Extraction issue

4. One of the possible issues faced by web scrapping is that:

- A) Web pages may contain junk data ☒
- B) Web pages do not contain multiple facts
- C) Web pages does not support transformation
- D) Web pages do not contain multiple dimensions

5. Time Complexity of Basic Sorted Neighborhood (BSN) Method is

- A) $O(\log n)$
- B) $O(2n)$
- C) $O(n \log n)$ ✓
- D) $O(n)$

6. The ____ task is typically performed after most other transformation and cleaning steps have taken place.

- A) Data transformation
- B) Data extraction
- C) Data Duplicate elimination
- D) Data loading ✓

7. The degree of similarity measured _____, different attributes may contribute differently.

- A) Quantitative ✓
- B) Qualitative
- C) Numerically
- D) None of the given

8. The extent to which data is in appropriate languages, symbols, and units, and the definitions are clear is known as _____.

- A) Accessibility
- B) Uniqueness
- C) Consistency
- D) Interpretability ✓

9. There are often multiple ways to represent the same piece of information. "FAST", "National University", "FAST NU" and "Nat. Univ. of Computers ". This problem is known as:

- A) Composite key problem ✓

- B) Non primary key problem
- C) Simple key problem
- D) Primary key problem

10. _____ incorporates the concept of product quality, process control, quality assurance, and quality improvement.

- A) Intrinsic Data Quality Management
- B) Strong Data Quality Management
- C) Total Quality Management ✓
- D) Realistic Data Quality Management

1. A technique requires a separate column to specify the time and date when the last modification was occurred.

- RealTime extraction
- CheckMarks
- TimeStamps ✓
- Just-In-Time

2. Which is not a/an step of data cleansing procedure?

- Standardizing
- Elementizing
- Aggregation
- Verifying ✓

3. If actual data structure does not conform to documented formats then it is called:

- Syntactically dirty data
- Extraction issue
- Coverage anomaly
- Semantically dirty data ✓

4. Which of the following is not a technique of "Changed Data Capture" in currently used Modern Source Systems?

- **Dimensional Modeling ✓**
 - Timestamps
 - Triggers
 - Partitioning
5. Which is not a class of anomalies in the following?
- Syntactically Dirty Data
 - Coverage Anomalies
 - **Dirty Anomalies ✓**
 - Semantically Dirty Data
6. Web scrapping is a process of applying techniques to the web.
- **Screen Scrapping ✓**
 - Data Scrapping
 - Meta Scrapping
 - Text Scrapping
7. is making all efforts to increase effectiveness and efficiency in meeting accepted customer expectations.
- Quality Establishment
 - Quality assurance
 - Quality Maintenance
 - **Quality improvement ✓**
8. Which of the following is NOT one of the advantages of changed data capture (CDC) technique?
- **No incremental on-line I/O required for log tape ✓**
 - Extraction of changed data occurs immediately
 - Limited query interface is required for data extraction
 - Flat files are not required
9. In Extract, Load, Transformation (ELT) process, you don't need to purchase extra devices to achieve parallelism because:
- You have already performed transformation

- You have already performed Loading
- **You already have parallel data warehouse servers ✓**
- ELT does not support parallelism

10. Which is not a/an characteristic of data quality?

- Consistency
- Reliability
- Uniqueness
- **Accessibility ✓**

1. Serious __ involves decomposing and reassembling the data.

- O Data loading
- O Data cleansing
- O Data Extraction
- **✓ Data transformation**

2. Online Extraction is a kind of data extraction.

- **✓ Logical**
- O Physical
- O Multivalued
- O Dimensional

3. Task is typically performed after most other transformation and cleaning steps have taken place.

- O Data extraction
- O Data Duplicate elimination
- **✓ Data loading**
- O Data transformation

4. Time Complexity of Basic Sorted Neighborhood (BSN) Method is:

- O $2n$
- **✓ O($n \log n$)**

5. Which of the following is not an "Orr's Law of Data Quality"?
- O "Data will be no better than its most stringent use!"
 - O "Data that is not used cannot be correct!"
 - O "Data duplication can be harmful for the organization!"
 - ✓ "Data quality is a function of its use, not its collection!"
6. In Extract, Load, Transformation (ELT) process, you don't need to purchase extra devices to achieve parallelism because:
- O You have already performed transformation
 - O You have already performed Loading
 - ✓ You already have parallel data warehouse servers
 - O ELT does not support parallelism
7. ___ incorporates the concept of product quality, process control, quality assurance, and quality improvement.
- ✓ Total Quality Management
 - O Strong Data Quality Management
 - O Realistic Data Quality Management
 - O Intrinsic Data Quality Management
8. Suppose in system A, the values of "PhoneNo" attribute were stored in "countrycode-phone-extension" format, however after transformation in data warehouse the separate columns were used for "countrycode", "phone" and "extension". The above scenario is an example of:
- O Many-to-one element transformation
 - ✓ One-to-many element transformation
 - O Many-to-Many element transformation
 - O One-to-One scalar transformation
9. Which of the following is not a task of Data Transformation?
- O Summarization
 - ✓ Full Data Refresh
 - O Enrichment
 - O Conversion

10. ____ is a system of activities that assures conformance of product to pre-established requirements.

- ✓ Quality assurance
- O Quality improvement
- O Quality Maintenance
- O Quality Establishment

1. For large record spaces and large number of records, the run time of the clustering algorithms is:

- Numerical O
- Static
- **Prohibitive ✓**
- Exponential
- O O O

2. Dirty data means that:

- Data does not conform to proper domain definitions ✓
- Data does not fulfill dimensional modeling rules
- Data contains non-additive facts
- Data cannot be aggregated
- O O O

3. Change Data Capture (CDC) can be a challenging task because:

- **Identifying the recently modified data may be difficult ✓**
- Aggregates don't change in real time
- Transformation of extracted data is difficult
- Source systems may not support extraction of changed aggregates
- O O O

4. If a table is expected to have six columns but some or all of the records do not have six columns, then it is an example of:

- Semantically dirty data
- **Syntactically dirty data ✓**
- Extraction issue
- Coverage anomaly
- O O O

5. EE involves decomposing and reassembling the data.

- Data transformation ✓
- Data Extraction
- Data cleansing
- Data loading
- O O O

6. Which of the following is NOT one of the advantages of changed data capture (CDC) technique?

- Extraction of changed data occurs immediately
- Limited query interface is required for data extraction
- **No incremental on-line I/O required for log tape ✓**
- Flat files are not required
- O O O

7. A system of activities that assures conformance of product to pre-established requirements is:

- **Quality assurance ✓**
- Quality Maintenance
- Quality Establishment

- Quality improvement
- O O O

8. Which is not a class of anomalies in the following?

- Syntactically Dirty Data
- Semantically Dirty Data
- Coverage Anomalies
- **Dirty Anomalies ✓**
- O O O

9. If a product meets formally defined "requirement specifications," yet fails to be a quality product from the customers' perspective, this means the requirements were:

- Undefined
- **Unrefined ✓**
- Unclear
- O O O

10. An object is defined by a group of records that have similar characteristics ("behavior") for p% of the fields in the data set, where p is a user-defined value (usually above 90).

- Attribute
- Entity
- **Pattern ✓**

De-normalization usually speeds up _____.

- **Data insertion ✓**
- Data sharing
- Data deletion
- **Data retrieval ✓**

? The trade-offs of denormalization is/are:

- Performance
- Ease-of-use
- **All of the given options ✓**
- Storage

? Which of the following is an example of Non-Additive Facts?

- Count of orders in a store
- Total Sale in Rs
- **Discount in percentage ✓**
- Quantity sold

? Taken jointly, the extract programs or naturally evolving systems formed a spider web, also known as:

- Online Systems Architecture
- **Distributed Systems Architecture ✓**
- Legacy Systems Architecture
- Intranet Systems Architecture

? In the data warehouse environment the data is:

- Subject-oriented
- Time-oriented
- **Both subject and time oriented ✓**
- Neither time-oriented nor subject-oriented

? In decision support system ease of use is achieved by:

- Drill up
- Drill down
- Normalization
- **Denormalization ✓**

? Which of the following is not a CUBE operation?

- **ANSI SQL ✓**

- Drill Down
- Pivoting

? _____ gives total view of an organization.

- Data Warehouse ✓
- Database
- OLTP

? The typical availability of OLTP system is 24/7, while that of data warehouse is:

- 7/2
- Twice a week
- 7/24 ✓

? Information can answer questions like "what", "who" and "when" while knowledge can answer questions like:

- Why ✓
- Which

? In which class of aggregates MEDIAN function can be placed?

- Distributive
- Associative
- Holistic
- Algebraic ✓

? Which of the following is not an example of dimension?

- Sales amount
- ATM card no ✓
- ATM_Location
- Time/Date

? In the data warehouse environment the data is

- Both subject and time oriented ✓
- Subject-oriented

- Neither time-oriented nor subject-oriented
- Time-oriented

? Grain of a fact table means:

- The meaning of one dimensional table row
- The meaning of one fact table row ✓
- Summary of aggregates in all fact tables
- Summary of aggregates in all dimension tables

? The issue(s) of "Adding redundant column" include(s):

- Loss of information
- Maintenance
- Increase in table size
- All of the given options ✓

? The biggest problem with ____ is the requirement of large main memory as the cube size increases.

- OLTP
- Data Warehouse ✓

? ____ is a collection of random transactional codes, flags and/or text attributes that are unrelated to any particular dimension.

- Multi-valued Dimension
- Slowly Changing Dimension
- Simple Dimensions
- Junk dimension ✓

? An OLTP system is always good at

- Tracking past data
- Evolving data ✓
- Keeping Static data
- Maintaining historic data

? In which class of aggregates Max function can be placed?

- Holistic

- Associative
- Algebraic ☒
- Distributive

? The hardware (CPU) utilization in data warehouse environment is full or

- Not at all
- Fixed
- Partial
- Not at all
- Fixed ☒

? Suppose the amount of data recorded in an organization is doubled every year. This increase is_____.

- Exponential ☒
- Logarithmic
- Linear
- Quadratic

? Grain of a fact table means:

- Summary of aggregates in all dimension tables
- The meaning of one fact table row ☒
- The meaning of one dimensional table row
- Summary of aggregates in all fact tables

? Which kind of relationships is captured by Fact less fact table?

- One-to-many
- None of the given options
- Many-to-many ☒
- One-to-one

? EE is applicable in Profitability analysis.

- Information System (IS)

- OLTP
- Management Information System (MIS) ✓
- Data warehouse

❓ The growth of master files and magnetic tapes exploded in:

- Mid-1970 ✓
- Mid-1960
- Mid-1980
- Mid-1990

❓ Which is not an issue of ROLAP in the following?

- Standard hierarchy of dimensions ✓
- Aggregation pit-falls
- Non-standard conventions
- Maintenance

❓ In the decision support environment, the decision maker is interested in:

- Big picture of organizational data ✓
- Only limited organizational data
- Only customer related data
- Only sale related data

❓ The data perspective in OLTP system is operational, while that in data warehouse is:

- Fully Normalized
- Fully de-normalized
- Fully summarized
- Historical and detailed ✓

❓ De-normalization may be in the form of, combining tables, adding data or:

- Duplicating tables ✓
- Deleting tables
- Splitting tables
- Sharing tables

❓ **Pre-joining de-normalization technique is generally used when there is relationship between two or more tables.**

- Many-to-many ✓
- One-to-one
- Many-to-one
- One-to-many

1. The growth of master files and magnetic tapes exploded in _

- Mid-1980
- Mid-1960 ✓
- Mid-1970
- Mid-1990

2. Which is not an issue of ROLAP in the following?

- Maintenance
- Aggregation pit-falls
- Non-standard conventions
- Standard hierarchy of dimensions ✓

3. Relational modeling techniques are used to develop

- OLTP ✓
- OLAP

4. Development of data warehouse is hard because data sources are usually

- Unstructured and homogeneous
- Structured and homogeneous
- Unstructured and heterogeneous ✓
- Structured and heterogeneous

5. Pre-joining de-normalization technique is generally used when there is _____ relationship between two or more tables.

- Many-to-many ✓
- One-to-many
- One-to-one
- Many-to-one

6. OLAP implementations are highly/completely

- Denormalized ✓
- Predictive
- Additive
- Normalized

7. Consider the following Employee table and identify the column which causes that the table is not in first normal form (1NF).

- Employee(Emp_ID , Emp_Name , Emp_skills , Emp_Designation)
- Emp_Name
- Emp_ID
- Emp_skills ✓
- Emp_Designation

8. Time variant is a characteristic of data warehouse which means:

- Data cannot be loaded in data warehouse with respect to time
 - Data can be loaded in data warehouse anytime
 - Data loaded in data warehouse will be time stamped ✓
 - Data can be loaded in data warehouse only at a particular time
-

9. In a fully normalized database, too many _____ are required.

- Conditions
- Joins ✓
- Queries
- Values

10. ___ is the lowest level of detail or the atomic level of data stored in the warehouse.

- Cube
- Fact ✓
- Dimensions

❑ As dimensions get less detailed (e.g., year vs. day) cubes get _____

- Smaller ✓
- Merged
- Larger
- Partitioned

❑ De-normalization can help:

- Minimize joins
- Resolve aggregates
- All of the given options ✓
- Minimize foreign keys

❑ Which one among the following is a de-normalization technique?

- ER modeling
- Adding redundant columns ✓
- Star schema

❑ De-normalization is more like a "controlled crash" with the aim to _____ performance without loss of information.

- Balance ✓

- Check
- Enhance

❑ ____ are created out from the data warehouse to service different needs of departments in the organization.

- Data marts ✓
- Databases
- MIS

❑ The issue(s) of "Adding redundant column" include(s):

- All of the given options ✓
- Loss of information
- Increase in table size
- Maintenance

❑ In a fully normalized database, too many ____

- Joins ✓
- Conditions
- Queries

❑ Which of the following statement is/are TRUE regarding Entity relationship modeling?

- ER modeling does not have "business rules," it has "data rules"
- ER modeling helps retrieval of individual records having certain critical identifiers
- It does not really model business; but models the micro relationships among data elements.
- All of the given options ✓

❑ This technique can be used when a column from one table is frequently accessed in a large scale join in conjunction with a column from another table.

- Pre-joining ✓
- Derived attributes
- Adding redundant column
- Horizontal splitting

❑ Which one is NOT the characteristic of data warehouse queries?

Past Papers for Mids./Finals are also Available

Miss Mehwish: 03171491481

- Use primary keys
- Low selectivity
- Use multiple tables
- Return huge amount of rows ✓

MAM MEHWISH 03184148783

Past Papers for Mids./Finals are also Available

Miss Mehwish: 03171491481

🔒 Paid Vu Lms Handling 🔒

♦ 1 GDB= Rs 100

♦ 1 Quiz= Rs 200

♦ 1 Assignment=Rs 250

💎 Agr complete handling krwatey hain 1 subject ki with all activities= Rs 500 (Half Semester) 💎
