Question No: 49 (Marks: 3)

Which rules help you to be a positive nurturing person?

One can be a positive nurturing person by following these rules.

1. Understand that most people have needs of growth. There is hardly anyone who doesn't want promotion in life. Suppose if a person is employed as a clerk, it doesn't mean that he always have to live with that status. If you help him in improving his status he will have nice feelings for you.

2. Make a team with a coworker to form a network. If you are able to form a team, you can be more helpful to others. Networks play an important role in the personal and organizational development and growth.

3. Be a role model for others. When you demonstrate how to be a good worker, others would like to follow you.

Question No: 50 (Marks: 3)

Enlist and describe the two key elements which are included in a personal financial plan. Two key elements of the plan arefinancial goals and a budget.

Establishing financial goals

A common approach to financial goal setting is to specify amounts of money you would like to earn at certain points in time. Another common goal is to obtain enough money to cover specific expenses.

LMS HANDLING AVAILABLE WHATSAPP +923162965677

Financial goals are sometimes expressed in terms of allocation of money, such as putting pay raises into
savings or reducing debt.
A more motivational approach is use financial goals to point to a lifestyle one hopes to achieve with specific amounts of money. In this way money becomes the means to ends that bring satisfaction and happiness.

Developing a Budget (Spending Plan)

A **budget** is a plan for spending money to improve your chances of using your money wisely and not spending more than net income.

Steps in budget making

Developing a budget can be divided into a series of logical steps.

Establishing goals

You should keep in mind your goals while establishing a budget so that you could make the best use of your money.

1. Estimating income

First of all estimate your income and then plan the spending of money. You should be aware of the total amount that you have in order to develop realistic budget.

2. Estimating expenses

Do this by keeping careful track of current spending.

3. Comparing expenses and income.

Remember that the true profit from your labor is the difference between your net income and total expenses. If you spend all your money and you are left with nothing, it is not sensible. You must save something for unseen expenses that may arise in future.

4. Carrying out the budget

Try to spend money according to your budget. If you spend more than the expected amount on various things, then it is no use of making budget.

6. Evaluating the Plan

A budget usually needs reworking until it fits your needs. You can evaluate your budget time to time.

Why continuous learning and self-development is necessaryfor career progression?

Continuous Learning and Self-Development

Keep on working hard to bring efficiency and quality to your work. Given that continuous learning is part of the new model of career advancement, engaging in regular learning will help a person advance. Selfdevelopment can include any type of learning but often emphasizes personal improvement and skill development. Continuous learning and self development follow the Japanese philosophy of **kaizen,** the relentless quest for a better way and higher quality work.
