Lesson 01: Introduction the Stage for Leadership

Leadership & Team Management:

Effective leaders today must build motivated teams aligned with organizational goals. This course explores techniques for leadership development and maintaining top team performance.

Understanding Organizations:

- Organizations are deliberate arrangements of people for specific purposes, such as hospitals or businesses.
- They have distinct purposes, people, and structures, but are evolving to be more flexible and responsive to change.
- Organizations operate in dynamic environments and must adapt to societal, economic, and technological changes.

Challenges:

- Organizations face various challenges, including business trends, changes in the working environment, and technology.
- People are central to organizations, working in different groups like admin, finance, and marketing.

Change in Organizations:

- Change is essential for organizational survival in competitive environments.
- Organizational change involves alterations in people, structure, or technology, and managers must learn to manage change effectively.

Forces for Change:

- **External forces** (marketplace, regulations, technology, etc.) and **internal forces** (strategy changes, workforce changes, etc.) drive the need for change.

Traditional vs. New Organizations:

- **Traditional organizations** are stable, job-focused, and command-oriented, while new organizations are dynamic, skills-focused, and involvement-oriented.
- **New organizations** encourage employee participation in decision-making, focus on customer orientation, and have a diverse workforce.

Organizational Performance:

- Organizational performance is judged by profit, effectiveness, and efficiency.
- Productivity measures the quantity and quality of work with resource utilization considered.
- Performance effectiveness is the output measure of goal accomplishment, while performance efficiency measures resource costs associated with goal accomplishment.

Value Creation:

Value creation is crucial for organizations, achieved by enhancing output compared to input, utilizing people effectively.

Critical Skills for Success:

1. Excellence: Achieved through excellent teamwork.

2. **Networking:** Success is heavily reliant on networking with stakeholders.

3. Entrepreneurship: Managers need entrepreneurial skills for creativity, innovation, and risk-taking.

4. Technology: Essential backbone of organizations, requiring constant updating and relevant decision-making.

5. Marketing: Vital for success, ensuring the right products reach the right people at the right time and place.

Changing Technology:

- Competitive factors drive the introduction of new equipment, automation, and computerization.

- Marketing plays a critical role in surviving in a competitive environment.

Workplace Changes:

- Emphasis on human capital, teamwork, technology, networking, and work-life balance.

- Smart organizations create their futures through innovation and adaptability.

Role of Management:

- Management focuses on building relationships, developing skills, fostering teamwork, and providing a conducive environment for performance and satisfaction.

Competence for Managerial Success:

- High-performing managers build relationships, develop skills, communicate effectively, foster teamwork, and create a performance-driven environment.

- Additional competencies include self-management, critical thinking, professionalism, crisis management, and global management skills.

Importance of Innovation & Change:

- Innovation and change are critical for success in today's dynamic workplace, requiring managers to encourage creativity and innovation among employees.

Lesson 02: FOCUSING ON PEOPLE: THE KEY TO SUCCESS

Importance of People:

- Success in organizations depends on the people, including team members and stakeholders.

- People are the key resources for achieving organizational goals and making a difference.

Understanding People in Organizations:

- Every organization has objectives, goals, and missions, which are achieved through the efforts of people.

- Attracting, finding, and retaining the right people is crucial for organizational success.

- Managers/leaders must understand people's behavior and situations to effectively manage them.

The Role of Leadership:

- Good teams are built through good leadership, which motivates employees and aligns them towards goals.

- Success is derived from prioritizing leadership, people, values, goals, relationships, culture, and community.

People in the Process:

- People are the most important asset of an organization, and poor people management contributes to failure.

- Organizations should transition from economically driven paradigms to more people-driven and values-driven approaches.

Importance of HR and Managers:

- Employees are valuable strategic assets, and organizations should treat them as such.

- Human capital, represented by people, is a critical resource for organizations.

Developing and Sustaining A World-class Workforce:

- Diversity in the workforce brings synergy to the organization and enhances competitiveness.

- The nature of work is shifting towards services, with increased job flexibility and growth of outsourcing.

- The employer-employee partnership is evolving, with less emphasis on long-term employment and loyalty.

About the Course:

- The course focuses on developing understanding and knowledge of leadership and team management concepts.

- It is divided into two main components: leadership and team dynamics, covering leader-follower situations and team dynamics respectively.

Lesson 03: Leadership

Introduction to Leadership:

- Leadership is crucial in organizations as leaders make things happen and influence attitudes, behaviors, beliefs, and feelings.

- Definitions of leadership vary, emphasizing influence, followership, and action alignment with purposes.

Leadership Definitions:

Peter Drucker: "The only definition of a leader is someone who has followers."

John C Maxwell: "Leadership is influence - nothing more, nothing less."

John W. Gardner: "The process of persuasion and example by which an individual induces a group to take action in accord with the leader's purpose."

Components of Leadership:

- Leadership is a process involving three key components: the leader, followers, and the situation.

- Trust is foundational in leadership, fostering follower-ship and goal achievement.

Characteristics of Successful Leaders:

>Effective leaders are good communicators, motivators, team builders, problem solvers, listeners, conflict resolvers, and change managers.

>They encourage risk-taking, promote creativity, challenge processes, inspire a shared vision, enable action, model the way, and act as change agents.

Examples of Successful Leaders:

1. Bill Gates (co-founder of Microsoft
2. Sam Walton (former CEO of Wal-Mart
3. Jack Welch (former CEO of General Electric
4. Steve Jobs (CEO of Apple
5. Walt Disney (Walt Disney
6. Henry Ford (Ford Motor
7. Jeff Bezos founder of Amazon.com
8. Phil Knight (CEO of Nike
9. Andy Grove

10. Michael Dell

11. Ted Turner

12. Lou Gerstner

13. Robert W. Johnson Jr.

14. William C. Procter

15. Asa G. Candler

Qualities of Leaders:

- Honest, trustworthy, caring, committed, good listener, respectful, positive, enthusiastic, risk-taker, planner, decision-maker, consistent, open, accountable, transparent, responsible, sensitive, connected to the community, knowledgeable, wise, and socially skilled.

Nature vs. Nurture:

- Leadership qualities may be innate to some extent, but they can also be learned and developed through practice and experience.

Importance of Leadership:

- Leadership is essential in families, education, businesses, service associations, teams, countries, and the world.

- Understanding leadership helps in selecting and training leaders to improve performance, benefiting leaders, followers, organizations, and society as a whole.

Lesson 04: Leadership (Continued)

Dictionary Definitions:

- Lead: To guide, steer, pilot, point, or show the way. To cause someone to do something.

- Leader: One who leads. Person in control.

- Leadership: The quality notable in leaders. Set of characteristics that make a good leader.

Effectiveness of Leaders:

- Leaders are effective when they achieve group/team goals, maintain smooth internal processes, and adapt to external forces.

- Effective leadership contributes to organizational goal achievement, with leaders and teams influencing each other's effectiveness.

Characteristics of Failing Leaders:

- Rude and unapproachable

- Cold and arrogant

- Untrustworthy

- Self-centered and political

- Poor performers

- Unable to delegate

Definition of Bad Leadership:

- Ineffective leadership fails to produce desired change, while unethical leadership fails to distinguish between right and wrong.

- Bad leadership stems from traits and character, where leaders behave badly due to who they are and what they want.

Leadership Managerial Roles:

- Leadership roles encompass managerial responsibilities, including interpersonal, informational, and decisional roles.

- **Interpersonal roles:** Figurehead, leadership, and liaison activities.

- **Informational roles:** Monitor, disseminator, and spokesperson activities.

- **Decisional roles:** Entrepreneur, disturbance handler, resource allocator, and negotiator activities.

Comparison: Leaders vs. Managers:

- Leaders: Innovate, develop, inspire, take the long-term view, originate, challenge the status quo, and do the right things.

- Managers: Administer, maintain, control, have a short-term view, ask how and when, imitate, accept the status quo, and do things right.

Leaders vs. Managers:

Leaders innovate, inspire, and focus on long-term goals.

Managers administer, maintain, and control operations in the short term.

Leadership and management are closely related but distinct, with leaders focusing on innovation, inspiration, and long-term vision, while managers emphasize administration, maintenance, and short-term efficiency.

Lesson 05: Managers vs Leaders

Difference between Leaders and Managers:

- Leaders: Vision-oriented, protect staff, approach decisions actively, staff-oriented, listen actively, deal with conflict, trusted, focus on stakeholder interests, embodies mission/vision, creates teams, seeks to create needed change.

- Managers: Process-oriented, protect self, approach decisions cautiously, career-oriented, listen selectively, avoid conflict, unclear regarding trust, focus on personal interests, embodies goals/objectives, manage teamwork, seeks stability/manage change.

Leadership vs Management:

- Leadership:

- Sets overall & future direction.
- Focuses on results, mostly external.
- Concerned with effectiveness.
- Stakeholder focused.
- Embodies mission/vision.
- Gets more resources, seeks to create needed change.
- Creates teams, especially top teams.

- Management:

- Sets day-to-day direction.
- Focuses on processes, mostly internal.
- Concerned with efficiency.
- Personnel focused.

- Embodies goals/objectives.

- Manages resources, applies technologies.

- Manages teamwork, seeks stability/manage change.

Characteristics of Leaders and Managers:

1. Personal Characteristics:

- **Leaders:** Emotionally connected, open-minded, honest, and concerned with welfare.

- **Managers:** Rational, control-oriented, focused on organization and compliance.

2. Relationships:

- **Leaders:** Inspire, develop, motivate, and influence with charisma.

- **Managers:** Depend on position power, control, and suppression of creativity.

3. Providing Direction:

- **Leaders:** Focus on vision, reshaping organizational culture, and motivating for the long term.

- **Managers:** Depend on detailed plans, resource allocation, and short-term goals.

4. Grouping:

- **Leaders:** Promote communication, teamwork, and boundary reduction.

- **Managers:** Emphasize line and staff management, create boundaries, and provide solutions.

5. Outcomes:

- **Leaders:** Focus on change, effectiveness, and long-term goals.

- **Managers:** Concerned with stability, predictability, and short-term outcomes.

What Followers Expect:

Traits desired in a leader include integrity, consistency, active listening, open-mindedness, honesty, and inspiration.

Effective Leadership:

- Trust: Built on leader's integrity, competency, consistency, loyalty, and openness.

- Nurturing Climate: Free of fear, fosters creativity, and rewards achievements.

- Freedom of Expression: Allows sharing ideas, critique, critical views, and information exchange.

- Respect for Diversity: Values diversity and ensures all feel valued, respected, and appreciated.

- Free and Open for Creativity: Encourages idea sharing, independent decision-making, and risk-taking.

- Change Agent: Leads change process, responds to environmental changes.

In the leadership process, the leader, followers, and the situation are all crucial components for success.

Lesson 06: Followership

Importance of Followers:

- Leadership is dependent on followers.

- Followers' actions and attitudes influence their leaders and the leadership process.

- Performance of leaders and followers are interdependent.

Follower Traits That Influence the Leadership Process:

- Values

- Norms

- Cohesiveness

- Expectations

- Personality

- Maturity

- Competency levels

- Motivation

- Number of followers

- Trust and confidence

Follower-ship Style:

1. Pragmatic follower: Realistic, follows rules and regulations, plays political games, and carries out assignments with middling enthusiasm.

2. Alienated follower: Self-focused, critical, may act as whistleblowers, believes talents are underutilized.

3. Conventional follower: Accepts assignments, minimizes conflict, lacks creativity, avoids risks, believes in the established system.

4. Passive follower: Relies on the leader, avoids resistance, requires excessive supervision, believes the organization doesn't value their ideas.

5. Exemplary follower: Contributes above and beyond, creative, risk-taker, idealistic, focuses on goals, helps grow other team members, takes initiative to increase value to the organization.

How Exemplary Followers Add Value:

- Focus on goals

- Contribute to the growth of other team members

- Help keep the team on track

- Take initiative to increase their value to the organization

Reflection:

Think of someone you know who is a good leader and write down why you think they are a good leader.

Lesson 07: Leadership Process

Responsibilities of Exemplary Followers:

1. Support the leader's decisions: Backing up the leader's decisions fosters team cohesion and ownership of decisions.

2. Challenge the leader: Constructive challenges help improve decision-making and avoid groupthink.

3. Encourage the leader: Providing support and encouragement, especially during challenging times, boosts morale.

4. Defend the leader: Standing up for the leader and defending their actions, decisions, and policies contributes to achieving organizational goals.

Exemplary Followers Expect from Leaders:

- Honesty

- Forward-looking

- Inspiring

- Competent

- Fair-minded

Strategies for Cultivating Exemplary Followers:

1. Increase variety and complexity of assignments: Providing diverse and challenging tasks helps followers develop.

2. Enhance skill sets: Encouraging continuous learning and development through training.

3. Share the credit: Acknowledging and sharing achievements with followers boosts morale and trust.

4. Never undermine their authority: Respecting followers' roles and contributions is crucial for a healthy team dynamic.

5. Mentor future leaders: Guiding and mentoring followers who aspire to leadership roles fosters growth.

6. Encourage dialogue: Promoting open communication channels facilitates better decision-making and teamwork.

7. Maintain their confidences: Building trust by keeping followers informed and involved in decision-making processes.

8. Empower them: Granting autonomy and discretion enables followers to take ownership and make decisions.

9. Acknowledge their value: Recognizing followers' contributions publicly and privately reinforces positive behavior.

10. Reward them meaningfully: Implementing a reward system linked to performance motivates followers to excel.

11. Trust your followers: Trusting followers' integrity and abilities enhances collaboration and effectiveness.

Empowering Followers:

- Giving followers discretion and autonomy fosters morale and creativity.

- Providing visibility and recognition for their efforts boosts motivation.

- Building relationships and facilitating professional development opportunities connects followers with valuable resources.

What Followers Want:

- Honesty

- Forward-thinking

- Inspiration

- Competence

Important Traits of Leaders:

- Physical or Background Traits

- Personality or Ability Traits
- Task or Social Traits
- Activity or energy
- Education
- Social status
- Assertiveness
- Dominance
- Self-confidence
- Administrative ability
- Communication abilities
- Social perceptiveness
- Adaptability
- Motivation to achieve
- Responsibility
- Initiative
- Persistence
- Task orientation
- Cooperativeness
- Sociability

Lesson 08: Leadership Process (Continued)

Qualities of Leaders:

1. Vision: Leaders have a clear understanding of the organization's future direction and formulate strategies to achieve it.

2. Ability: Competence in understanding information, formulating strategies, and making decisions is essential for gaining respect and trust.

3. Enthusiasm: Leaders generate excitement and interest among followers, motivating them to accept challenges and take action.

4. Stability: Emotional stability enables leaders to handle challenges and pressures effectively, maintaining objectivity and focus.

5. Concern for Others: Leaders prioritize the welfare of their followers, fostering loyalty and commitment through caring and humble attitudes.

6. Self-Confidence: Confidence in oneself and actions instills trust and inspires others to follow, especially in difficult situations.

7. Persistence: Determination and commitment to business success drive leaders to continuously motivate employees towards organizational goals.

8. Vitality: Energy, stamina, and vigor empower leaders to inspire and energize followers, regardless of age or disability.

9. Charisma: A captivating personality trait that attracts followers and enables leaders to influence others effectively.

10. Integrity: Honesty, strength of character, and courage build trust and loyalty, establishing a foundation for effective leadership.

What Leaders Can Influence:

- Leaders influence the behavior, attitudes, and actions of their followers, primarily in work-related contexts.

- Great leaders contribute to the development and growth of followers, while great followers facilitate the growth of leaders.

The Situation:

- Refers to various contextual factors such as the task, environment, and stress levels, which can significantly impact leadership dynamics and outcomes.

A Brief History of Leadership:

- Leadership was historically associated with royals or military figures.

- Leadership focus shifted over different time frames:

  - **1901-1914:** Prosperity, government role, emphasis on public officials.

  - **1914-1945:** World wars, depression, coordination, strength, stability.

  - **1945-1970s:** Statutory authorities, international focus, indigenous policies, equal opportunity.

  - **1975-2000:** Economic transition, privatization, multiculturalism, globalization.

Purpose of Leadership in the 21st Century:

- Economic empowerment and empowerment of followers.

- More decision-making freedom and focus on creativity.

- Responding to globalization, mergers, and stakeholder needs.

Lesson 09: Leadership Theories/Approaches

Theoretical Basis:

- Theoretical concepts of leadership help in understanding behaviors and their relationship with the work environment.

- Two fundamental theories are Theory X and Theory Y, and the Hawthorne experiments significantly contributed to understanding human behavior in organizations.

Theory X and Theory Y:

- Theory X: Assumes employees dislike work, are lazy, and need coercion to perform.

- Theory Y: Assumes employees are creative, seek responsibility, and can self-direct.

-Theory X focuses on lower-order needs dominating individuals, while Theory Y focuses on higher-order needs.

Hawthorne Experiments:

- Conducted at Western Electric Company's Hawthorne Works.

- Concluded that social norms determine individual work behavior, sparking interest in human behavior in organizations.

Leadership Theories/Approaches:

1. Trait Theory/Approach:

- Focuses on inherent qualities of leaders, assuming "leaders are born, not made."

- Identified traits include intelligence, dominance, self-confidence, and task-relevant knowledge.

- Failed to identify a set of traits consistently associated with leadership but laid the foundation for selecting leaders based on traits.

2. Behavioral Theories of Leadership:

- Assert that leadership behaviors can be learned and trained.

- Studied leadership styles and behaviors:

  - Kurt Lewin's studies identified autocratic, democratic, and laissez-faire styles.

  - Ohio State and University of Michigan studies identified dimensions such as initiating structure and consideration.

- Results showed mixed relationships between leadership behaviors and performance.

- Tannenbaum and Schmidt proposed a continuum of leader behaviors, advocating for more employee-centered styles.

- Robert Blake and Jane Mouton developed the Managerial Grid, reflecting concern for people and production.

Key Takeaways:

- Trait theories focus on inherent qualities of leaders.

- Behavioral theories suggest leadership behaviors can be learned and trained.

- Understanding situational factors is crucial for effective leadership.

- The Managerial Grid offers a framework for conceptualizing leadership styles.

Lesson 10: Contingency Theories of Leadership

Introduction:

- Previous theories attempted to find a universal leadership style, but by the late 1960s, it was clear that no single approach fits all situations.

- Leadership effectiveness depends on a combination of the leader, followers, and situational factors.

Contingency Approach:

- Effective leadership depends on matching the leader's style with the requirements of the situation.

- Leadership can be learned, and success involves understanding situational contingencies.

- The match between the leader's style, personality, or behavior, and the situation leads to effectiveness.

Leadership Approaches:

1. Fielder LPC Model: Focuses on leadership behavior assessment, situation favorability, and behavior-situation match.

2. Path-Goal Model: Considers subordinate characteristics, task structure, leadership behavior, and performance satisfaction.

3. Situational Leadership Theory: Based on subordinate readiness, involving delegating, participating, selling, and telling.

The Fiedler Model:

- Developed by Fred Fiedler, the first comprehensive contingency model for leadership.

- Effective performance depends on matching the leader's style with the situation's control and influence.

- Fiedler created the LPC questionnaire to measure leader behavioral orientation.

- Situational criteria include leader-member relations, task structure, and position power.

Situational Leadership Theory (SLT):

- Developed by Paul Hersey and Kenneth Blanchard, focuses on adjusting leadership style based on follower readiness.

- Readiness refers to the follower's ability and willingness to accomplish a specific task.

- Four behaviors: Selling, Telling, Participating, and Delegating, depending on follower ability and willingness.

- Contingency theories emphasize the importance of adapting leadership style to fit the situation and followers' readiness.

- Effective leadership requires a dynamic approach that considers the interplay between leader behavior, follower characteristics, and situational factors.

Path-Goal Theory:

1. Development: Robert House created the path-goal theory, which integrates elements from Ohio State leadership research and expectancy theory of motivation.

2. Essence: The leader's role is to help followers achieve their goals, ensuring compatibility with the group or organization's overall objectives.

3. Acceptability and Motivation: Leader behavior is acceptable when it's viewed as a source of immediate or future satisfaction. It's motivational when it:

- Makes employee need-satisfaction contingent on effective performance.

- Provides coaching, guidance, support, and rewards for effective performance.

4. Leadership Behaviors:

- Directive: Clearly outlines expectations, schedules work, and provides specific guidance on tasks. Similar to initiating structure.

- Supportive: Friendly, showing concern for employees' needs. Essentially synonymous with consideration.

- Participative: Consults with employees, involving their suggestions in decision-making.

- Achievement-oriented: Sets challenging goals, expecting employees to perform at their best.

5. Flexibility:

Unlike Fiedler, House assumes leaders are flexible. The same leader can adopt any or all leadership styles depending on the situation.

6. Contingency Variables:

- **Environmental Contingencies:** Task structure, formal authority system, and workgroup.

- Employee Contingencies: Locus of control, experience, and perceived ability.

- Leader behavior is ineffective when redundant to environmental structure or incongruent with subordinate characteristics.

7. Validation: Research supports the theory's logic, with most evidence favoring its predictions.

Path-Goal Leadership Model:

- Describes leader behaviors, environmental contingencies, and employee characteristics influencing leader effectiveness.

A Brief History of Leadership Theory:

1. Trait Approach: Leaders are born, not made. Focuses on identifying personal traits distinguishing leaders from followers. Found no consistent set of traits guaranteeing leader effectiveness.

2. Situational Approach: Leaders are made, not born. Attempted to demonstrate that situations determine leadership, but was unsuccessful due to narrow focus.

3. Contingency Approach: Matches traits and leadership behavior to situations to maximize effectiveness. Recognizes the interaction between traits, behaviors, and situations in determining leadership effectiveness.

Lesson 11: Transactional, Charismatic, and Transformational Leadership

Effective leaders adapt their styles based on the situation and often overlook the impact of national culture.

New Approaches to Leadership:

1. Transactional Leadership:

- Focuses on motivating, enhancing productivity, and accomplishing tasks through rewards.

2. Transformational Leadership:

- Influences staff attitudes and assumptions, fostering commitment to the organization's mission and objectives.

- Transformational leaders inspire followers to go beyond self-interests for the organization's good.

- They address individual followers' concerns, change their awareness of issues, and excite them to achieve group goals.

- Built on transactional leadership, transformational leadership leads to higher employee effort, performance, and satisfaction.

Transactional vs. Transformational Leadership:

- Leader's Source of Power: Rank and position in transactional, character and competence in transformational.

- Follower Reaction: Compliance in transactional, commitment in transformational.

- Time Frame: Short-term focus in transactional, long-term in transformational.

- Rewards: Pay, promotion, etc., in transactional; pride, self-esteem, etc., in transformational.

- Supervision: Important in transactional, less important in transformational.

- Counseling Focus: Evaluation in transactional, development in transformational.

Charismatic Leadership:

- Charismatic leaders possess charm and personal magnetism, gaining endorsement for their vision and promoting it passionately.

Charisma Defined:

- A divine gift, charisma in leadership distinguishes leaders through their extraordinary determination, purposes, and powers.

Charisma: A Relationship:

- Charismatic leadership theory extends from attribution theory, wherein followers attribute heroic leadership abilities based on observed behaviors.

- Personal characteristics of charismatic leaders include high confidence, dominance, strong convictions, and assertiveness.

Trait of a Charismatic Leader:

- Self-confidence, vision, strong conviction in the vision, extraordinary behavior, and an image of a change agent.

Followers' Feelings towards Charismatic Leaders:

- High trust, obedience, emotional involvement, satisfaction, self-esteem, motivation, and belief in the likelihood of success.

Two Types of Charismatic Leaders:

1. Visionary Leadership:

- Involves creating and articulating a realistic, compelling vision of the future, inspiring emotions and energy.

2. Crisis-Based Charismatic Leaders:

- Communicate clear actions and consequences during crises.

Transformational vs. Charismatic Leaders:

- Charisma is distinct from transformational leadership, as it may create dependence rather than empowerment.

Lesson 12: The Leader as an Individual

Understanding leadership involves examining the personality and individual characteristics of a leader. Personality, influenced by both nature and nurture, plays a significant role in leadership effectiveness and organizational outcomes.

Personality:

- Personality refers to the enduring patterns of thoughts, feelings, and behaviors of an individual.

- It is influenced by both biological heritage (nature) and situational factors (nurture).

- Personality predicts organizational outcomes like job satisfaction, work stress, and leadership effectiveness.

- Strong situational constraints can diminish the predictive power of personality.

- Personality tends to remain stable over time, and managers should focus on effective ways to deal with employees' personalities.

The Nature of Personality:

- Personality encompasses enduring patterns of thoughts, feelings, and behaviors.

- It significantly influences how employees act in organizations and their attitudes toward their jobs and organizations.

Forces Influencing Personality:

1. Heredity:

- Refers to factors determined at conception.

- Personality is influenced by genetic characteristics, but it's not solely determined by heredity.

2. Environment:

- Includes factors like culture, family norms, social groups, and early conditioning.

- The environment substantially shapes personality by establishing norms, attitudes, and values.

Variables Influencing Individual Behavior:

- Personality is shaped by the interaction between the individual and the environment.

- Different types of work-related behavior include values, attitudes, and cognitive dissonance.

Types of Work-related Behavior:

1. Values:

- Represent individuals' basic convictions about what is personally or socially preferable.

- Influence attitudes and behaviors and tend to be stable over time.

2. Attitudes:

- Evaluative statements about objects, people, or events.

- Comprise cognitive, affective, and behavioral components.

- Individuals seek consistency between their attitudes and behavior, and cognitive dissonance theory explains how they reduce inconsistencies.

Cognitive Dissonance Theory:

- Proposed by Leon Festinger, it states that individuals experience discomfort when their attitudes and behaviors are inconsistent.

- They attempt to reduce this discomfort by aligning their attitudes and behavior or rationalizing the discrepancy.

Lesson 13: Attitude-Personality

Importance of Understanding Values:

- Values strongly influence an individual's perception, attitudes, and behavior.

- Knowledge of an individual's value system offers insights into their attitudes and behavior.

- Leaders should be concerned with employees' attitudes as they signal potential issues and impact behavior, affecting turnover and absenteeism rates.

Work Attitudes:

- These encompass feelings, beliefs, and thoughts about one's job and organization, with job satisfaction and organizational commitment being prominent.

- Job satisfaction reflects an individual's feelings toward their job and is influenced by personality, values, the work situation, and social influence.

- Organizational commitment involves emotional attachment, continuance commitment, and normative commitment.

Factors Influencing Job Satisfaction:

- Personality plays a significant role in determining job satisfaction, with genetic factors accounting for a portion of differences in satisfaction levels.

- Values shape perceptions of work outcomes and behaviors.

- The work situation, including tasks, interactions, surroundings, and organizational treatment, is a critical determinant of job satisfaction.

Organizational Citizenship Behavior (OCB):

- OCB refers to behavior that goes beyond formal job requirements, driven by perceptions of fairness rather than job satisfaction.

- Trust in the employer fosters OCB as employees feel compelled to contribute beyond their role.

Job Satisfaction and Organizational Outcomes:

- Job satisfaction is inversely related to absenteeism and turnover rates.

- Higher job satisfaction is associated with lower turnover and absenteeism, leading to increased productivity and performance at the organizational level.

Perception and Behavior:

- Perception is the process of interpreting sensory input to make sense of the environment.

- Impression management involves actively managing perceptions to create a favorable impression.

- Factors influencing perception include the perceiver, the target, and the situation.

Perception Components:

- Perception comprises three elements: the perceiver, the target, and the situation.

- The perceiver interprets sensory input, the target is the subject of perception (often person perception in organizational settings), and the situation provides context.

Impression Management:

- Impression management involves controlling others' perceptions, achieved through tactics like behavior matching, self-promotion, conforming to situational norms, appreciation, and consistency.

- Conforming to situational norms is crucial but can be challenging, especially in diverse or international contexts.

Self-Presentation:

- Self-presentation is the process of managing others' perceptions of oneself.

- Employees employ strategies like demotion-preventative tactics (accounts, apologies, disassociation) and promotion-enhancing tactics (entitlement, enhancement, obstacles disclosures, association).

Culture and Self:

- Understanding the relationship between culture and self is vital, with collectivism and individualism representing contrasting values.

- Collectivism prioritizes group goals and harmony, while individualism emphasizes personal goals and uniqueness.

Personality Traits:

- Locus of control determines whether individuals attribute outcomes to internal or external factors.

- Internals believe in personal control, are self-motivated, and require less supervision.

- Authoritarianism influences leadership style and expectations of subordinates' behavior.

- Dogmatism reflects receptiveness to others' ideas, with highly dogmatic individuals being close-minded.

- Self-esteem affects pride, capabilities, and choices, influencing performance and motivation.

Type A and Type B Personalities:

- **Type A** individuals are competitive, impatient, and driven, while **Type B** individuals are relaxed and easygoing.

- **Type A** individuals excel in achievement-oriented tasks but may struggle with interpersonal interactions.

Positive and Negative Affect:

- Positive affect emphasizes the positive aspects of oneself and the world, while negative affect focuses on the negative.

Myers-Briggs Type Indicator (MBTI):

- The MBTI assesses personality preferences across four dimensions: extraversion/introversion, sensing/intuition, thinking/feeling, and judging/perceiving.

- It helps individuals understand their preferred ways of acting, thinking, and feeling in various situations.

Understanding perception and personality traits provides valuable insights into individual behavior and interpersonal dynamics within organizations, enabling effective leadership and management strategies.

Personality Types and Self-Monitoring

Individuals can be classified into 16 personality types based on the Myers-Briggs Type Indicator (MBTI), which assesses preferences across four dimensions: Introversion/Extraversion (E or I), Sensing/Intuition (S or N), Feeling/Thinking (F or T), and Perceiving/Judging (P or J). Here are examples of some personality types:

- **INTJs:** Visionaries with original minds, great drive, and skepticism.

- **ESTJs:** Organizers who are realistic, logical, and decisive with a knack for business.

- **ENTPs:** Conceptualizers who are innovative, versatile, and attracted to entrepreneurial ideas.

Next, let's discuss self-monitoring (SM), which measures the extent to which individuals control their self-presentation to others.

- **High SM:** Individuals closely monitor social cues to present socially acceptable behavior. They excel in sales or consulting roles.

- **Low SM:** Individuals are less attuned to social cues and act based on internal states. They may resist change but are useful when honest feedback is needed.

High Self-Monitors:

- Flexible and adjust behavior according to the situation.

- Can appear unpredictable but are good team players.

- Accept feedback well and are adaptable to changing circumstances.

Low Self-Monitors:

- Act based on internal states rather than situational cues.

- Consistent but may resist change and feedback.

- Less likely to conform to work group norms but can provide honest perspectives.

Organizational Citizenship Behavior (OCB):

- OCB refers to actions that go beyond job requirements.

- Factors influencing OCB include job satisfaction and procedural justice.

Understanding OCB helps explain the relationship between individual job satisfaction and organizational performance.

Lesson 14 Big Five Model and Myers Briggs Type Indicator (MBTI)

Continuing our exploration of personality, we'll delve into the stability of personality traits and discuss two prominent models: the Big Five Model and the Myers Briggs Type Indicator (MBTI).

Stability of Personality:

- Personality is relatively enduring and influences how individuals feel, think, and behave.

- Behavioral and social-cognitive theories propose reciprocal determinism, where the person, behavior, and environment interact.

- Organizational culture, values, beliefs, attitudes, and assumptions are manifested through behavior.

Big Five Model:

- This model identifies five fundamental dimensions of personality:

1. Extraversion: Comfort level with relationships, ranging from outgoing (extraverts) to reserved (introverts).

2. Agreeableness: Propensity to defer to others, with high agreeableness individuals being cooperative and trusting.

3. Conscientiousness: Measure of reliability, with high conscientious individuals being responsible and organized.

4. Emotional Stability: Ability to withstand stress, with positive emotional stability individuals being calm and confident.

5. Openness to Experience: Range of interests and willingness to try new things, with highly open individuals being creative and curious.

Myers Briggs Type Indicator (MBTI):

- Developed by Katharine Briggs and Isabel Myers, the MBTI assesses preferences for behavior across four dimensions:

1. Extraversion (E) or Introversion (I)

2. Sensing (S) or Intuition (N)

3. Thinking (T) or Feeling (F)

4. Judging (J) or Perceiving (P)

MBTI Sub-Categories:

- Extraversion/Introversion: Energy directed from outer or inner worlds.

- Sensing/Intuition: Data gathered from the five senses or perception of meaning.

- Thinking/Feeling: Decision-making approach - logical or value-centered.

- Judging/Perceiving: Orientation towards structured or flexible lives.

Applications in Organizations:

- Management and career development.

- Interpersonal communication skills.

- Decision making and problem-solving styles.

- Leadership and management styles.

- Organizational change facilitation.

- Teambuilding and conflict management.

Understanding personality through these models enhances organizational effectiveness by informing recruitment, team dynamics, leadership development, and organizational culture.

Energy: Extraversion vs. Introversion

- Extraversion: Directs and receives energy from the outside world, preferring action over reflection, oral communication, sharing thoughts freely, and working in groups.

- Introversion: Directs and receives energy from the inner world, preferring reflection over action, written communication, guarding thoughts until they're perfected, and enjoying working alone or with a few others.

Information Gathering: Sensing vs. Intuition

- Sensing: Prefers gathering information precisely, focusing on specific examples, following an agenda, emphasizing practicality, seeking predictability, and focusing on immediate applications.

- Intuition: Prefers gathering information inspiringly, focusing on general concepts, departing from the agenda if necessary, emphasizing theoretical aspects, desiring change, seeing difficulties as opportunities, and focusing on future possibilities.

Decision Making: Thinking vs. Feeling

- Thinking: Seeks general truths and objectivity in decision-making, questioning first, wanting things to be logical, remaining detached, and focusing on tasks over people.

- Feeling: Seeks individual and interpersonal harmony in decision-making, accepting first, wanting things to be pleasant, remaining personally involved, and focusing on people over tasks.

Lifestyle: Judging vs. Perceiving

- Judging: Likes closure and acting on decisions, liking settled and ordered things, finishing tasks before deadlines, focusing on goals and achievements, establishing deadlines, and quickly committing to plans.

- Perceiving: Prefers remaining open and adapting to new information, liking flexible and open things, finishing tasks at deadlines, focusing on processes and options, disliking deadlines, and reserving the right to change plans.

MBTI Sub-Categories:

- E (Extraversion) vs. I (Introversion)

- S (Sensing) vs. N (Intuition)

- T (Thinking) vs. F (Feeling)

- J (Judging) vs. P (Perceiving)

Remember, there are no "good" or "bad" types, only different types. Each preference contributes to effective teamwork, and individuals should have the opportunity to contribute based on their strengths.

Lesson 15 Situational Factors in Leadership

Leadership isn't just about the leader or the followers; it's also heavily influenced by the situation. Key situational factors that affect leadership:

1. Task Type: The nature of the work or assignment can significantly affect employees and their performance.

2. Structure of Organization: The organizational structure, which depends on the organization's size, can impact complexity and rigidity.

3. Stress: The level of stress in the environment, whether from external factors or internal pressures, can influence leadership dynamics.

4. Environment: Both internal (micro) and external (macro) factors of the environment can shape the situation within an organization.

These situational factors influence various aspects of the leadership process:

- Size of the Organization: Different leadership skills are required based on the organization's size. Small organizations may have more flexible structures, while larger ones tend to be more complex and procedural.

- Organizational Life Cycle Stage: Every organization goes through stages from birth to decline. Each stage presents unique challenges and opportunities for leadership.

- Social and Psychological Climate: The working environment within an organization, including factors like confusion, anxiety, conflicts, trust, stress, and politics, can greatly affect leadership dynamics.

Differences Between Large and Small Organizations:

Large	Small
Economies of scale Global reach Complex Flat structure	Flexible Regional reach Simple Entrepreneurial

Changes with Size:

- Formalization tends to increase with size.

- Centralization decreases.

- Complexity increases both vertically and horizontally.

- Personnel ratios change, with top administration decreasing, clerical ratio increasing, and professional staff ratio increasing.

Organizational Life Cycle Stages:

- Birth
- Growth
- Shakeout
- Maturity
- Decline

Social and Psychological Climate:

Factors such as confusion, anxiety, conflicts, mistrust, stress, and politics can significantly influence the social and psychological climate within an organization.

Factors indeed shape the situation within an organization, which in turn influences the leadership process:

1. Patterns of Employment: The employment patterns, such as permanent vs. temporary, short-term vs. long-term, affect the stability and satisfaction of employees, posing challenges for leadership to create a conducive work environment.

2. Type, Place, and Purpose of Work: Clarity in work duties is crucial, as vague or monotonous tasks can lead to demotivation and stress among employees.

3. Culture of the Organization: Organizational culture, whether by default or design, significantly impacts behaviors and practices within the organization, affecting communication, cooperation, commitment, decision-making, and leadership style.

4. Organizational Climate: The climate within an organization, shaped by its reward systems, performance standards, and working environment, profoundly influences employee motivation and productivity.

5. Overall Environment: Both internal and external factors of the organizational environment, including macro and micro forces, play a role in shaping the leadership process.

6. Leader-Follower Interaction: Effective leader-follower interaction, characterized by compatibility, communication, and mutual trust, is essential for organizational success and performance.

7. Compatibilities Within the Followers: Compatibility among followers, along with their compatibility with the leader, is vital for navigating various situations within the organization.

Each of these factors directly or indirectly contributes to the situation within the organization, which ultimately affects the leadership process and its outcomes. Therefore, understanding and effectively managing these situational factors are crucial for effective leadership.

Lesson 16

BECOMING A LEADER! WHAT DOES IT MEAN & HOW DO YOU GET IT?

Becoming a leader involves understanding the dynamics of influence within a group or organization and developing the necessary skills and traits to effectively guide others towards achieving goals. Key aspects of becoming a leader:

1. Understanding Leadership: Leaders influence others' behavior to help the group or organization achieve its objectives. They can be formal, with designated authority, or informal, using special skills or talents to lead.

2. Qualities of a Leader: Individuals can become leaders by demonstrating qualities such as thinking like a leader, developing judgment, building leadership traits, and sharing a vision. Communication style also plays a crucial role in emerging as a leader within a group.

3. Foundations of Leadership: Effective leaders articulate and communicate a vision for the organization's future, encapsulated in its mission statement. They set objectives and provide direction for achieving them, thus becoming the guiding force for the organization.

4. Steps to Leadership: Key steps to leadership include identifying areas requiring leadership, applying behavior science theories and concepts to understand behaviors, and formulating actions to motivate employees and manage conflicts.

5. Leadership Styles: Leaders adopt various styles, such as employee-oriented, participative, job-centered, or autocratic, based on the organizational context and goals.

6. Influencing Organizational Culture: Leaders influence organizational culture by shaping values, norms, and beliefs to create a conducive work environment.

7. Motivation: Understanding motivation is crucial for leaders to inspire and drive employees towards achieving organizational goals.

8. Effective Communication: Leaders must ensure effective communication within the organization to facilitate information sharing and clarity among members.

9. Influence Over the Group: Maintaining influence over the group or team is essential for leaders to steer them towards achieving shared objectives.

10. Leadership Traits and Power: Leaders exhibit various traits and wield power to ensure the organization's success and goal attainment.

11. Three Competencies of a Leader: Leading the organization involves setting vision and strategy, managing others entails building effective teams and motivating them, and leading oneself requires adaptability, self-awareness, and ethical conduct.

12. Personal Development: Leaders continuously develop themselves by increasing self-awareness, managing themselves effectively, and exhibiting ethical behavior. They understand their strengths, weaknesses, and the importance of hard work in leadership success.

Becoming a leader is a journey that involves continuous learning, self-reflection, and dedication to honing the skills and traits necessary to guide others towards shared goals.

Lesson 17

BECOMING A LEADER

Leadership is a multifaceted concept, and various experts have highlighted different aspects of what it means to be a leader. Some key perspectives on leadership from different thought leaders:

Howard Hyden's Leadership Core Competencies:

- Creating More Leaders: Leaders empower and train others to become leaders themselves, fostering a culture of leadership within the organization.

- Empowerment (Letting Go): Leaders delegate authority and encourage independent decision-making among their followers.

- Communication: Effective leaders are skilled communicators who convey vision, direction, and decisions clearly.

- Vision: Leaders are visionary and proactive in understanding organizational dynamics and developing strategies accordingly.

- Patience: Leaders exercise patience in understanding situations and making logical decisions.

- Strategic Thinking: Leaders are strategic thinkers who develop plans to navigate changing environments.

Tom Peters' 10 Traits of Leaders:

- Creating Opportunities: Leaders create opportunities for growth and advancement within the organization.

- Doing and Redoing: Leaders consistently strive to do things right and learn from their mistakes by redoing tasks when necessary.

- Conveying a Grand Design: Leaders communicate a compelling vision of the organization's future to inspire others.

- Nurturing Other Leaders: Leaders mentor and develop future leaders within the organization.

- **Accepting Responsibility:** Leaders take responsibility for their actions and decisions.

- Taking Breaks: Leaders recognize the importance of self-care and taking breaks to recharge.

- Doing Stuff That Matters: Leaders focus on tasks that contribute to the organization's success and mission.

Ken Shelton's Seven Traits of Great Leaders:

- Inspiring Followers: Leaders inspire enthusiastic followership to achieve organizational goals.

- Facing Challenges: Leaders overcome significant obstacles and challenges.

- Self-Expectation: Leaders hold themselves to high standards and expect the same from others.

- Making Tough Decisions: Leaders are unafraid to make difficult decisions when necessary.

- Visionary: Leaders have a clear vision and belief in their ability to achieve it.

- Ambitious: Leaders are ambitious for themselves, their teams, and their organizations.

Warren Bennis' Four Competencies of Great Leaders:

- Management of Attention: Leaders focus their attention on completing tasks and supporting team members.

- Management of Meaning: Leaders innovate and provide guidance on how to achieve goals.

- Management of Trust: Leaders build trust within the organization.

- Management of Self: Leaders focus on self-improvement and skill development.

Warren Bennis' Five Common Ingredients of Great Leaders:

- Vision: Leaders have a clear vision of the future.

- Passion: Leaders are deeply passionate about their work.

- Integrity: Leaders operate with honesty and integrity.

- Trust: Leaders are trustworthy.

- Curiosity and Daring: Leaders are curious and willing to take risks.

Sheila Murray Bethel's Qualities of Leadership:

- Mission: Leaders have a meaningful mission that guides their actions.

- Big Thinkers: Leaders think big and seek innovative solutions.

- Ethical: Leaders operate with integrity.

- Change Masters: Leaders embrace and navigate change effectively.

- Sensitive: Leaders are empathetic and considerate.

- Risk-Takers: Leaders are willing to take calculated risks.

- Decision-Makers: Leaders make informed and timely decisions.

- Good Communicators: Leaders communicate effectively.

- Team Builders: Leaders foster collaboration and teamwork.

- Courageous: Leaders demonstrate courage in the face of adversity.

- Committed: Leaders are dedicated to their goals and objectives.

These perspectives collectively emphasize the importance of vision, communication, integrity, trust, self-awareness, and the ability to inspire and empower others as essential traits of effective leadership.

The motives for leadership and the elements of power:

Motives for Leadership:

1. Power: The desire to influence, give orders, and carry them out.

2. Achievement: The need to create, achieve, and build something of value.

3. Affiliation: An interest in knowing and helping others.

Types of Power-Oriented Leaders:

- Power-Oriented Leader: Strives for leadership because of the formal authority it brings and typically has a dominance role.

- Achievement-Oriented Leader: Wants to discover, create, and innovate, often being competent, skillful, and productive.

- Affiliation Leader: High concern for human welfare, caring about others, and having a desire to serve.

Sources of Leadership Power:

1. Authority: Stemming from the position to which one is appointed, along with the power to reward or punish individuals.

2. Expertise: Authority derived from being an expert in one's field, commanding respect and compliance.

3. Referent Power: Based on personal magnetism and charisma, influencing others through personal appeal.

4. Formal vs. Informal Leaders: Formal leaders gain authority through their position, while informal leaders acquire authority through charisma.

Understanding Power:

- Power: The ability to influence, control, or direct others' thoughts, behaviors, and feelings.

- Influence: Affecting the thoughts, behavior, and feelings of others.

- Authority: The right to influence another person formally given by the organization.

Principles of Power:

- Power is perceived, relative, and must be coordinated.

- It is a double-edged sword, capable of being used or abused.

- Dependency on others is key to power, as the greater the dependency, the greater the power.

- Dependency is created through importance, scarcity, and non-substitutability of resources.

Forms of Power:

- Personal Power: Used for personal gain, which can be dangerous if misused.

- Social Power: Used to create motivation and accomplish group goals.

- Professional Power: Based on expertise and competence within an organization.

- Positional Power: Granted by the organization, typically associated with formal authority.

Understanding the motives for leadership and the elements of power provides insights into how individuals acquire and wield influence within organizations.

Lesson 18

UNDERSTANDING POWER

Understanding power in leadership involves recognizing various sources of power that leaders can leverage to influence others.

Sources of Power:

1**. Reward Power:** The ability to give something of value or withhold rewards to influence behavior positively.

2. Coercive Power (Punishment): The power to give or withhold punishment, ranging from demotions to termination, to influence behavior negatively.

3. Expert Power: Influence wielded due to expertise, special skills, or knowledge, becoming increasingly relevant in specialized fields.

4. Referent Power: Influence based on admiration or identification with someone possessing desirable traits or resources, akin to charisma.

5. Legitimate Power: Power derived from one's formal position or authority within an organization, including acceptance of authority by members.

6. Numbers Power: Power derived from having a significant number of supporters, particularly useful in group dynamics.

7. Other Powers:

- Connection Power: Based on strong connections inside and outside the organization, facilitating goal achievement.

- Information Power: Stemming from access to and control over information, which enhances problem-solving capabilities.

- Group Decision-Making Power: Influence exerted by leaders in group decision-making processes.

- Organization Power: Arising from centrality to organizational operations and access to information, increasing control over resources.

- Coalition Power: Formed by individuals seeking to increase their power collectively, often by pursuing shared interests.

Implications:

- Resource Allocation: Leaders must ensure fair competition for resources, emphasizing skills and abilities that benefit the organization.

- Balance of Power: Coercive and reward powers are counterparts; maintaining a balance ensures effective leadership without abuse.

- Expertise and Influence: Expertise increasingly influences leadership positions, leading to promotion up the hierarchy.

- Identification and Charisma: Referent power relies on admiration and identification, akin to charisma, which can be powerful in leadership.

- Formal Authority: Legitimate power extends beyond coercion and reward to include acceptance of authority within the organization.

- Strength in Numbers: Having a significant number of supporters enhances one's power and influence, particularly in group dynamics.

- Strategic Use of Power: Leaders can strategically utilize various sources of power, such as connections, information, and coalitions, to achieve organizational goals effectively.

Understanding and leveraging these sources of power can empower leaders to influence others positively and achieve organizational objectives efficiently.

Understanding power dynamics in leadership involves recognizing various responses to the use of power and understanding how to use power ethically and effectively. Here's an overview of responses to the use of power and strategies for ethical power use:

Responses to the Use of Power:

1. Compliance: When positional power is used appropriately, followers respond with compliance, adhering to directives or requests from those in authority.

2. Resistance: Excessive or coercive use of power can lead to resistance behavior from followers, who may push back against directives or seek to undermine authority.

3. Commitment: Personal power, when used effectively, elicits commitment from followers, who align themselves willingly with a leader's goals and values.

Strategies for Using Power Appropriately:

- Understanding Influence: Identify key individuals who hold power and build consensus through appropriate use of power dynamics.

- Avoiding Power Plays: Refrain from manipulative or coercive tactics and focus on building positive relationships and trust.

Ethical Considerations in Power Use:

Leaders should ask themselves the following questions to ensure ethical use of power:

1. Outcome-Oriented: Does the behavior produce positive outcomes for all parties involved, both within and outside the organization?

2. Respect for Rights: Does the behavior respect the rights of all parties and avoid infringing upon them?

3. Equity and Fairness: Is the behavior fair and equitable, treating all parties impartially and justly?

Negative Consequences and Power:

- Abraham Lincoln's quote underscores the potential negative effects of power, suggesting that it can reveal one's true character.

- Historian Lord Acton's warning about power highlights the potential for corruption when individuals wield unchecked authority.

Influencing Tactics:

Leaders can utilize various tactics to influence others, including rational persuasion, consultation, personal appeals, coalition-building, legitimizing tactics, pressure tactics, and inspirational appeals.

Outcomes of Influence:

Similar to power dynamics, the use of excessive or coercive influence tactics can lead to resistance from others.

Understanding Organizational Politics:

- Politics involves activities aimed at acquiring, developing, and using power and resources to achieve desired outcomes.

- Political behavior often occurs outside of formal job requirements and encompasses efforts to influence decision-making processes and resource allocation.

- Politics is an interpersonal and collective activity that requires analysis, planning, and image management.

The Reality of Politics:

- Politics is pervasive in organizations due to differing values, goals, and limited resources.

- Competition for resources often leads to conflict and politicking, where individuals use influence to advance their interests.

- Ambiguity in decision-making creates opportunities for individuals to shape perceptions and influence outcomes through politicking.

By understanding power and politics in leadership involves recognizing responses to power use, employing ethical strategies for power use, and navigating the complexities of organizational dynamics to achieve positive outcomes.

Political Tactics:

1. Attacking or blaming others: Shifting blame or targeting individuals to deflect attention from oneself or achieve personal objectives.

2. Using information as a political tool: Manipulating information or withholding crucial details to gain advantage or influence decision-making.

3. Creating a favorable image (impression management): Presenting oneself in a positive light to enhance credibility and influence.

4. Developing a base of support: Cultivating alliances and building relationships with influential individuals or groups to bolster one's position.

5. Praising others (ingratiation): Offering compliments or showing appreciation to gain favor or build rapport with others.

6. Forming political coalitions with strong allies: Joining forces with like-minded individuals or groups to exert collective influence and advance shared interests.

7. Associating with influential people: Aligning oneself with individuals in positions of power or authority to gain access to resources or opportunities.

8. Creating obligations (reciprocity): Doing favors or providing assistance to others in anticipation of receiving similar treatment in return.

Organizational Factors Contributing to Political Behavior:

- Low trust: Lack of trust among employees or between employees and management can breed politicking.

- Role ambiguity: Unclear job roles and responsibilities provide leeway for individuals to engage in political actions.

- Democratic decision-making: Participatory decision-making processes may lead to power struggles and politicking.

- High performance pressures: Pressure to meet performance targets or achieve goals may drive individuals to engage in political behavior.

- Scarcity of resources: Competition for limited resources can fuel political maneuvering.

- Self-serving senior managers: Leaders who prioritize personal agendas over organizational goals may encourage political behavior.

- Unclear evaluation systems: Subjective performance evaluation criteria create ambiguity and may incentivize politicking.

- Zero-sum allocations: Reward systems that pit individuals or groups against each other in a zero-sum game may foster politicking.

Managing Organizational Politics:

1. Reduce System Uncertainty: Clarify roles, expectations, and decision-making processes to minimize ambiguity and uncertainty.

2. Reduce Competition: Foster a collaborative environment where employees work together toward common goals rather than competing for resources.

3. Break Existing Political Fiefdoms: Address entrenched power structures and dismantle cliques or factions that impede organizational progress.

Managing Political Behavior:

- Maintain open communication: Foster transparency and encourage dialogue to address concerns and build trust.

- Clarify performance expectations: Clearly define performance criteria and provide feedback to mitigate ambiguity and reduce politicking.

- Use participative management: Involve employees in decision-making processes to promote ownership and reduce resistance.

- Encourage cooperation among work groups: Foster a culture of collaboration and teamwork to minimize intergroup conflict.

- Manage scarce resources well: Allocate resources fairly and transparently to minimize competition and politicking.

- **Provide a supportive organizational climate:** Cultivate a positive work environment where employees feel valued and empowered to contribute to organizational goals.

GOOD Luck
