CS304 Quiz File

6/7/2023 10:02:26 PM

1) _____ is creating objects of one class inside another class.

Select the correct option

- A. Inheritance
- B. **Composition**
- C. Aggregation
- D. Association

2) Which of the following is the correct syntax of declaring static variable "count" of type int?

Select the correct option

- A. **static int count;**
- B. int static count;
- C. static count int;
- D. int count static;

3) _____ remain in memory even when all objects of a class have been destroyed.

Select the correct option

- A. **Static Data Members**

B. Constant Data Members

C. Instance Data Members

D. Primitive Variables

4) What will be the output of the following code?

```
#include<iostream>
using namespace std;
int main() {
int const x = 10;
cout << ++x;
}
```

Select the correct option

A. 11

B. 10

C. Compile time Error

D. Run Time Error

5) Which of the following function declaration is correct to overload the + operator as member function in Complex class?

Select the correct option

A. Complex operator +(const Complex & rhs);

B. operator + Complex (const Complex & rhs);

C. Complex +(const Complex & rhs);

D. Complex operator + ::(const Complex & rhs);

6) Suppose we have a class named “Student”; which of the following statement is correctly declaring the pointer to the object for “Student” class?

A. Select the correct option

B. Student &obj;

C. *Student obj;

D. Student *obj;

Student obj;

7) **Choose the correct option to declare an overloaded stream insertion operator for a user-defined class "String" as a non-member friend function.**

Select the correct option

A. friend void operator << (const String & rhs);

B. friend void & operator << (ostream & os);

C. friend ostream & operator << (ostream & os, const String & s);

D. friend ostream & operator << ();

8) **Which of the following statement is TRUE about a class's Static Member Function?**

Select the correct option

A. It is used to access static data members only.

B. It can access non-static data members.

C. It can access constant data members of the class.

D. It can only be called by a particular object of class.

9) **Which of the following is defined as stream extraction operator in C++?**

Select the correct option

A. >>

B. <<

C. *<

D. *>

10) Composition is _____ and aggregation is _____ relationship.

Select the correct option

A. Strong, Strong

B. Strong, Weak

C. Weak, Strong

D. Weak, Weak
