BIF 401 Quiz no 1 Fall 2020

MC200405115: MUSLIM BAD SHAH

Time Left 85 sec(s)

BIF401:Quiz # 1

Quiz Start Time: 04:33 AM, 05 December 2020

Question # 1 of 15 (Start time: 04:33:55 AM, 05 December 2020) Total Marks: 1

74- Scoring Matrices contains,

Select the correct option

- Positive values
- Negative valuee
- Alphabets and characters
- [x] Both +VE and -VE values

Which of the following is untrue about the modification of PAM matrices?

Select the correct option

- At one time, the PAM250 scoring matrix was modified in an attempt to improve the alignment obtained
- All scores for matching a particular amino acid were normalized to the same mean and standard deviation, and all amino acid identities were given the same score to provide an equal contribution for each amino acid in a sequence alignment
- This took place in 1976 (selected)
- These modifications were included as the default matrices for the GCG sequence alignment programs in versions 8 and earlier and are optional in later versions

Which of the following doesn't describe PAM matrices?

Select the correct option

- ○ This family of matrices lists the likelihood of change from one amino acid to another in homologous protein sequences during evolution
- ○ There is presently no other type of scoring matrix that is based on such sound evolutionary principles as are these matrices
- ○ Even though they were originally based on a relatively small data set, the PAM matrices remain a useful tool for sequence alignment
- ◉ It stands for Percent Altered Mutation
