Which of the following statements is true in context of Three stage Least Square (3SLS)?

Select the correct option

- All of the given options.
- 3SLS is better when correlation of error terms is not small.
- 3SLS is more efficient as compared to 2SLS.
- 3SLS uses the results of 2SLS to estimate 'ALL' coefficients of the system simultaneously.

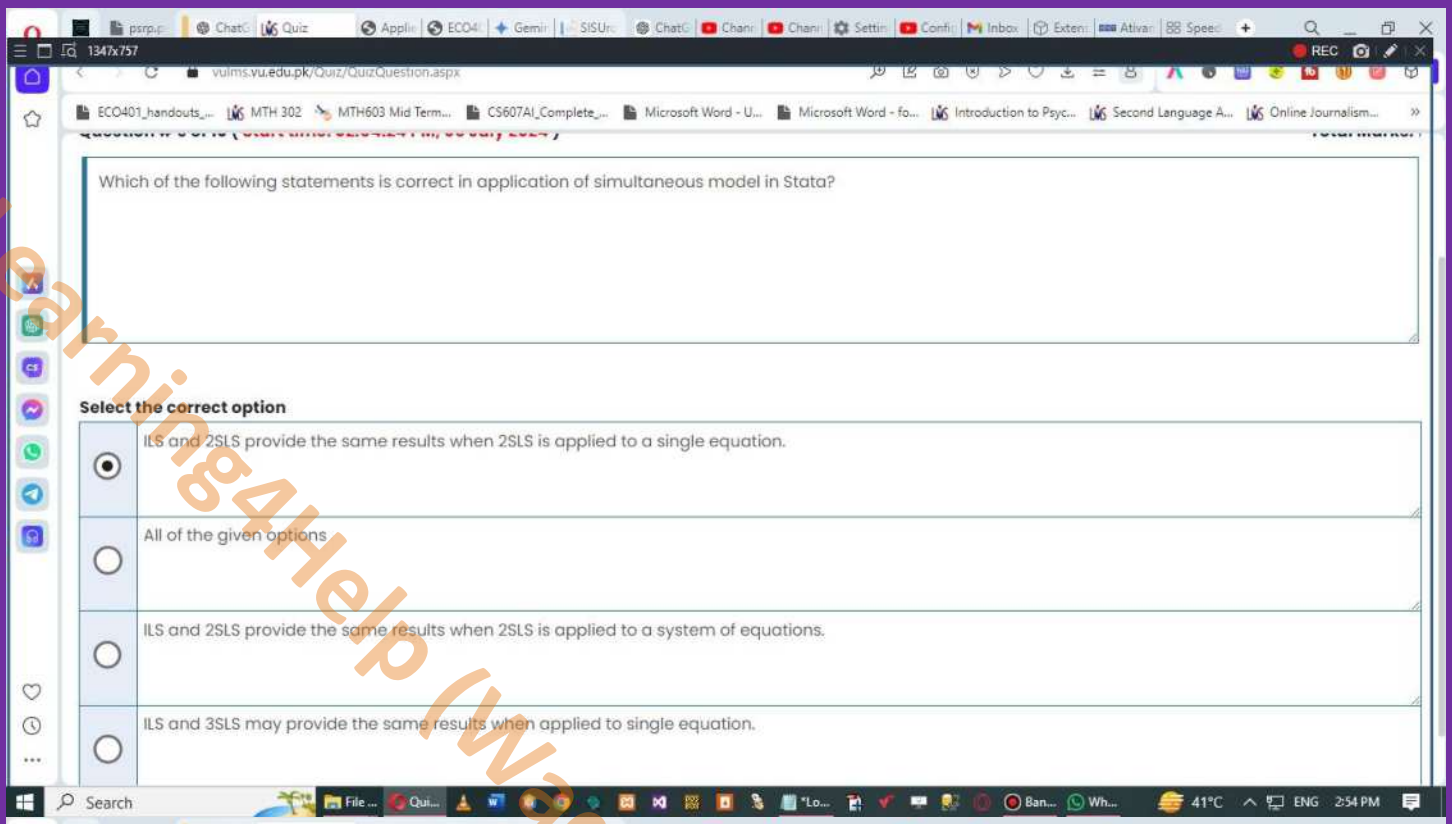

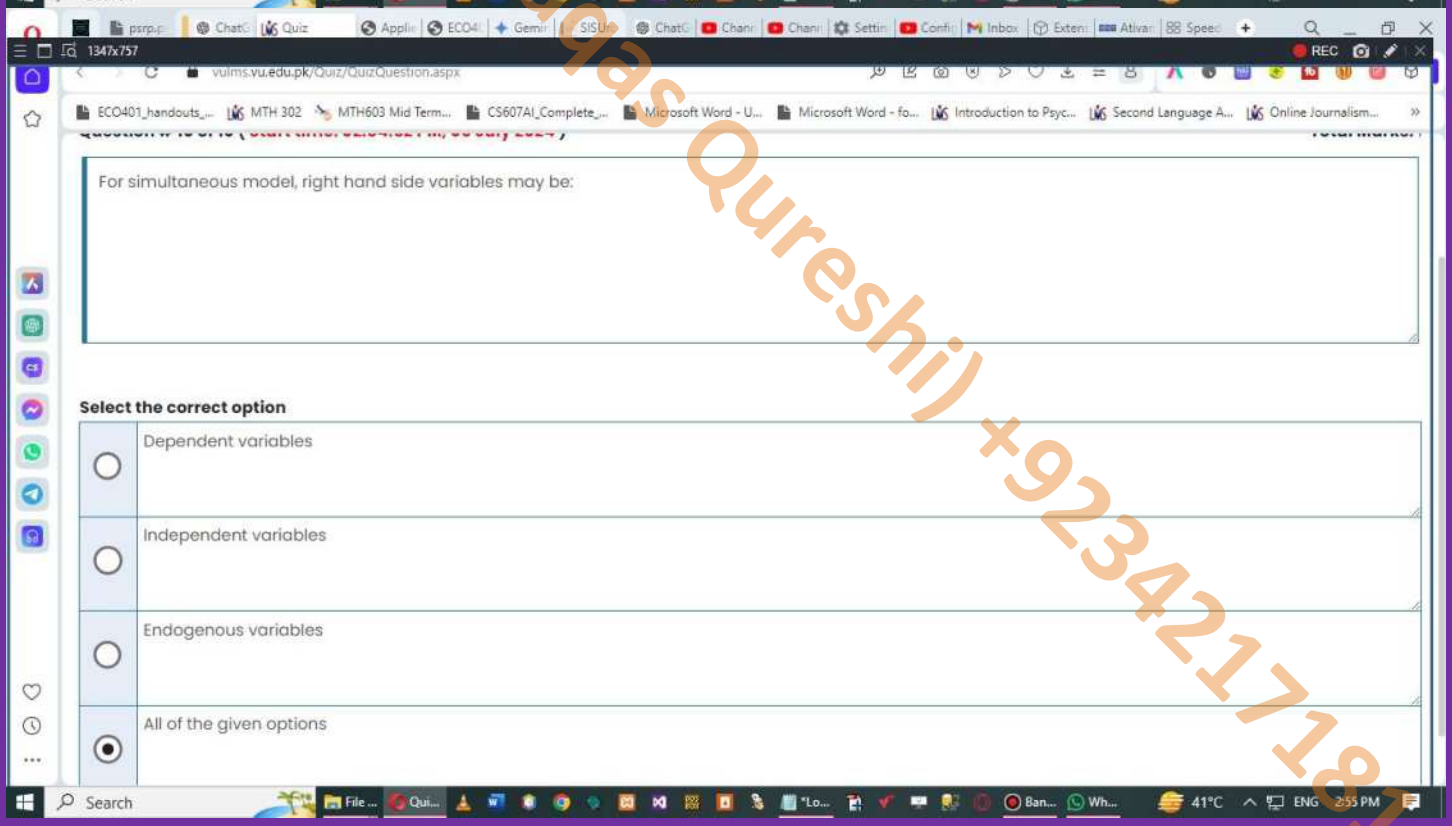

Which of following statements is not correct in context of Indirect Least Square(ILS)?

Select the correct option

- ILS may be applied when an equation is exactly identified.
- ILS may be applied when an equation is over identified.
- ILS will provide consistent estimates of the structural parameters
- Applying OLS to individual equation of a simultaneous equation model does not provide consistent results (simultaneity bias)
