Past Papers for Mids./Finals are also Available

ECO601 (Live Quiz)

1. **Suppose we introduce a third variable which consists of the product of variables, X1 and X2. It will be called:**
   - Interaction term ✅
   - Lag independent model
   - Dynamic model
   - All of the given options

---

2. **a/2, n-k is the degree of freedom for:**
   - All the given options
   - Chi-square test
   - t-test
   - F-test ✅

---

3. **Standardized Coefficients are often called:**
   - Beta Coefficients ✅
   - Alpha Coefficients
   - Gamma Coefficients
   - Sigma Coefficients

---

4. **In log level demand function InQg = a + bP, the coefficient 'b' will be interpreted as:**
   - One percent change in price is expected to change quantity demanded by 100/b units
   - One unit change in price is expected to change quantity demanded by (b*100)% ✅
   - One percent change in quantity demanded is expected to change price by 100/b units

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

- One unit change in quantity demanded is expected to change price by (b*100)%

---

5. **Upper portion of the diagonal in correlation matrix will be:**
   - Opposite as lower portion.
   - Mirror image of lower portion. ✅
   - Varying in values.
   - All of the given options.

---

6. **Linear equations are those equations which are linear in:**
   - Variables
   - Both Parameters and variables ✅
   - Parameters
   - Intercept

---

7. **Formula of standard error changes in all cases EXCEPT:**
   - None of the given options
   - Number of explanatory variable decreases
   - Value Of t-statistic is greater than 1 ✅
   - Number of explanatory variable increases

---

8. **Total variations are equal to:**
   - Explained variations * Unexplained variations
   - Explained variations + Unexplained variations ✅
   - Explained variations - Unexplained variations
   - All the given options

---

9. **Number of parameters in the following money demand function are:**

Money Demand = 4) + 8; Income + {Price level + 8; Interest rate + e

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

- 4 ✅

---

10. **If we want to show the dependent and independent variables in the same units then which one of the following is true?**

- Unstandardized the variables ✅
- Normalized the variables
- All the given options
- Standardized the variables

Total revenue is represented by:

- Price x Quantity ✅
- Price + Quantity
- Price / Quantity
- Price — Quantity

Autonomous consumption is an example of:

- Constant functions ✅
- Quadratic functions
- Linear functions
- Cubic functions

Finding uncommon elements of the universal set in comparison to set A is called:

- Complement of set A ✅
- Union of set A and U
- Intersection of set A and U
- Distribution of set A and U

The equation y=(17)xy = \left(\frac{1}{7}\right)^xy=(71)x is an example of:

- Exponential function ✅
- Cubic function
- Linear function
- Quadratic function

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

Autonomous investment is an example of:

- Constant functions ✅
- Linear functions
- Cubic functions
- Quadratic functions

Law of demand is depicted by:

- Cost = f (Output)
- Revenue = f (Tax rate)
- Qs = f (Price)
- Qd = f (Price) ✅

Average total cost curve when plotted on a graph gives:

- Horizontal line
- Straight line
- Quadratic parabolic curve ✅
- Vertical line

Elasticity at all points should be equal to one in:

- Linear curve
- Parabola
- Constant function ✅

Which of the following shows positive values of both x and y coordinates in a four quadrant diagram?

- Quadrant IV
- Quadrant II
- Quadrant III
- Quadrant I ✅

The equation Q=β1·Lβ2·Kβ3Q = \beta_1 \cdot L^{\beta_2} \cdot K^{\beta_3}Q=β1·Lβ2·Kβ3 suggests that:

- β2+β3=0\beta_2 + \beta_3 = 0β2+β3=0
- β2+β3<1\beta_2 + \beta_3 < 1β2+β3<1 ✅

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

- β2+β3=1\beta_2 + \beta_3 = 1β2+β3=1
- β2+β3>1\beta_2 + \beta_3 > 1β2+β3>1

Which one of the following functional forms is Linear-Log functional form of production function?

- Y = 2InL + Ink
- InY = 2InL + Ink ✅
- In¥ = 2InL + K

Relationship between wages and hours of work is first of direct nature and then becomes inverse after some time. This relationship can be specified through:

- Exponential function
- Quadratic function ✅
- Linear function
- Log linear function

Regression is a statistical measure which is used to determine the relationship between:

- Explanatory variable and a list of explained variables
- Independent variable and a list of dependent variables
- All the given options ✅
- Dependent variable and a list of independent variables

Which one of the following defines derivative of function?

- Average change in independent variable due to very small change in dependent variable.
- Average change in dependent variable due to very large change in independent variable.
- Instantaneous change in dependent variable due to very small change in independent variable. ✅
- Instantaneous change in independent variable due to very small change in dependent variable.

Which one of the following is Second order condition for minimization of multivariate function?

- Second order direct derivatives of function with respect to all explanatory variables are positive. ✅
- Second order direct derivative of function with respect to one explanatory variable is positive.
- Second order direct derivatives of function with respect to all explanatory variables are negative.

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

- Second order direct derivative of function with respect to one explanatory variable is negative.

Which one of the following is an example of inverted u-shaped quadratic relationship?

- Competition and Innovation
- Economic Development and Fertility
- Marginal Cost and Average Cost Curves
- All the given options ✅

Inflation rate data of Pakistan, India and Bangladesh from year 2000 to 2013 is:

- Pooled data
- Panel data ✅
- Time series data
- Cross sectional data

Exchange rates data of all South Asian countries from year 2000 to year 2013 is:

- Time series data
- Pool data
- Panel data ✅
- Cross-sectional data

Consider a production function Y=21°7+K where Y is level of output, L is labor and K is capital. Partial derivative of Y with respect to L is:

- 2L ✅
- 43
- 4L

Dependent variable is also known as:

- Response variable
- All the given options ✅
- Explained variable
- Regressand

1. Which one of the following measures is a rate of change in dependent variable due to change in one independent variable by holding all other independent variables constant?

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

- Option 1: Partial Derivative
- Option 2: 2
- Option 3: 3
- Option 4: 4
- Correct Option: Option 1

2. Consider the quadratic function: Y = aX^2 + bX + c. In this given function the graph will concave upward if:

- Option 1: "a" is positive.
- Option 2: All of given options.
- Option 3: "a" is zero.
- Option 4: "a" is negative.
- Correct Option: Option 1

3. Symmetry property of multivariate function with two explanatory variables states that:

- Option 1: Cross partial derivatives are equal.
- Option 2: Cross partial derivatives are not equal.
- Option 3: Cross partial derivatives are undefined.
- Option 4: Cross partial derivatives are always zero.
- Correct Option: Option 1

4. Which one of the following is an example of quadratic function?

- Option 1: Y = 2X^2 + 3X
- Option 2: Y = 2X + 3X^3 + 10
- Option 3: Y = 3 + 2X^4
- Option 4: Y = 2X^2 + 3X + 10
- Correct Option: Option 1

5. Unemployment data of Pakistan for each month of the year 2013 is:

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

- Option 1: Cross-sectional data
- Option 2: Panel data
- Option 3: Time series data
- Option 4: Pool data
- Correct Option: Option 3

6. An intercept is a point on the graph where regression line intersects:

- Option 1: X-axis
- Option 2: Y-axis
- Option 3: None of the given options
- Option 4: Z-axis
- Correct Option: Option 2

7. Consider the quadratic function: Y = aX^2 + bX + c. In this given function the graph will concave downward if:

- Option 1: "a" is negative.
- Option 2: "a" is zero.
- Option 3: "a" is positive.
- Option 4: All of the given options.
- Correct Option: Option 2

8. Consider supply function Qs = a + bP; where Qs is quantity supplied of commodity and P is price. The coefficient 'b' in this supply function is:

- Option 1: Slope of supply curve.
- Option 2: All of the given options.
- Option 3: Derivative of Qs with respect to P.
- Option 4: Rate of change in Qs due to change in P.
- Correct Option: Option 1

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

9. Econometrics is the combination of:

- Option 1: Economics, Statistics and Biology
- Option 2: Mathematics, Economics and Statistics
- Option 3: Statistics, Economics and Physics
- Option 4: Mathematics, Psychology and Economics
- Correct Option: Option 3

10. Monthly income of different respondents from year 2011 to year 2013 is an example of:

- Option 1: Pooled data
- Option 2: Cross sectional data
- Option 3: Time series data
- Option 4: Panel data
- Correct Option: Option 4

1. Consider supply function Qs = a + bP; where Qs is quantity supplied of commodity and P is price. The coefficient 'b' in this supply function is:

Options:

a) Rate of change in Qs due to change in P.

b) Slope of supply curve.

c) All of the given options.

d) Derivative of Qs with respect to P.

Correct option: b) Slope of supply curve.

2. A linear function has which of the following graph?

Options:

a) An ellipse

b) A straight line

c) An inverted U-shaped

d) A U-shaped

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

Correct option: b) A straight line

3. Consider the quadratic function: Y = aX^2 + bX + c. In this given function the graph will move down when:

Options:

a) "c" is zero.

b) "c" is positive.

c) "c" is negative.

d) All of the given options.

Correct option: c) "c" is negative.

4. Exchange rates data of all South Asian countries from year 2000 to year 2013 is:

Options:

a) Cross-sectional data

b) Time series data

c) Panel data

d) Time series data

Correct option: b) Time series data

5. In which of the following events, Probability of occurrence of all events is same?

Options:

a) Equal Likely Events.

b) Collectively Exhaustive Events.

c) All of the given options are correct.

d) Mutually exclusive events.

Correct option: a) Equal Likely Events.

6. Which one of the following is an example of inverted u-shaped quadratic relationship?

Options:

MAM MEHWISH 03184148783

Note: Live quiz MCQs also repeated in Exam (6, 7).

a) All the given options

b) Marginal Cost and Average Cost Curves

c) Economic Development and Fertility

d) Competition and Innovation

Correct option: c) Economic Development and Fertility

7. Which one of the following functional forms is Linear-Log functional form?

Options:

a) Y= 2lnL+ lnX

b) lnY= 2lnL+ lnX

c) Y= L+ XlnY

d) Y= 2lnL+ X

Correct option: b) lnY = 2lnL + X

8. Which one of the following functional forms is Double-Log functional form of production function?

Options:

a) lnY= 2lnL+ lnK

b) lnY= 2lnL+ K

c) Y= 2lnL+ lnK

d) Y= L+ K

Correct option: a) lnY = 2lnL + lnK
