Past Papers for Mids./Finals are also Available

ECO607 (Mega File)

Mid Term (Live Quiz)

1. Which of the following is the correct option for the integrated value of C(t)=30 in the farmer's crop rate dC/dt= 0.4t? + 0.5t + 12 if time period is 7 months?

- Crop after 7 months will be 17 units
- Crop after 7 months will be 7 units
- Crop after 7 months will be 30 units ✅
- Crop after 30 months will be 7 units

---

2. Which of the following is the correct option for the values of group 1 and group 2 as 'L1(x)= 0.41 and L2(x)= 0.34' calculated with the GINI index formula, GI= 2 ∫[x - L(x)] dx?

- Group 1 is facing equal inequality as compared to group 2
- Group 1 is facing more inequality as compared to group 2 ✅
- Group 1 is not comparable to group 2 for income inequality
- Group 1 is facing less inequality as compared to group 2

---

3. Given the average sorting-efficiency function Q_avg(t) = 1/3[300 ∫1 dt - 400 ∫ e^(-0.05t) dt] = 634, using definite integrals. Which statement is true?

- 634 letter per hour will be marginal efficiency in third month
- 634 letter per hour will be average efficiency in first month
- 634 letter per hour will be average efficiency in third month

Note: Live quiz MCQs also repeated in Exam (6, 7)

Miss Mehwish: 03171491481

- 634 letter per hour will be average efficiency in first three months ✅

---

4. Which of the following is the correct option for the term 'L(x)' in the GINI index formula, GI = 2 ∫[x - L(x)] dx?

- Lorenz curve ✅
- Per head income
- Complete inequality
- Complete equality

---

5. Which of the following is the present value of perpetual income stream flowing from a cash of Rs. 3200 and discounted at 10 % per year?

- 16000
- 3200
- 64000
- 32000 ✅

---

6. Oil is being pumped from an oil field years after its opening, the pumping rate function P(t) = ∫ 2.7e^(0.04t) dt = 0.4. Using definite integrals, which statement is true?

- 0.4 barrels will be marginal efficiency in third year
- 0.4 barrels will be extracted in third year
- 0.4 barrels will be extracted in first three years ✅
- 0.4 barrels per hour will be average efficiency in first year

---

7. Which of the following is the correct option for the integration of function given if inputs have been increased from 20 to 40 units each, Q(L,K)= K^0.4 L^0.5?

- Function will be integrated with respect to Q, L and K

Note: Live quiz MCQs also repeated in Exam (6, 7)

Miss Mehwish: 03171491481

- Function will be integrated with respect to L and K only ✅
- Function has a lower limit of 20 units of inputs
- Function has an upper limit of 40 units of inputs

---

8. Which of the following is the correct option for the term R(t) in the present value formula, PV = ∫ R(t) e^(-rt) dt?

- Time period
- Discount Factor
- Cash Flow ✅
- Interest rate

---

9. Suppose money is discounted at 10 percent a year within a period of 10 years, with ∫ (300e^(-0.5t)) dt = 3000 dollars. What is the interpretation of this value?

- The profit value of gold mining is 3000 dollars
- The future value of gold mining is 3000 dollars
- Average profit of gold mining between 0 and 10 years is 3000 dollars
- The present value of gold mining is 3000 dollars ✅

---

10. Which of the following is the correct option for the term '12' in the production function Q = 12L^2 / 2?

- Time of production
- Variable cost
- Production frequency
- Constant value ✅

1. *Which of the following is the true statement for the function: H(t)= 5t!/ + t(0)?**

Note: Live quiz MCQs also repeated in Exam (6, 7)

Miss Mehwish: 03171491481

- Time path is inconsistent
- Time path is definite
- There is no time path
- Time path is general

Correct option: Time path is inconsistent ☑

---

2. **Which of the following is the incorrect option for the characteristics of a definite integral?**
   - Defined ending points
   - Undefined starting point
   - All of the given options
   - Defined starting points

Correct option: Undefined starting point ☑

---

3. **Which of the following is the correct option for the integration of a marginal imports function M(Y)=0.9?**
   - 0.7M + c
   - 0.9Y + 10
   - 0.9Ytc
   - 0.9Y + c

Correct option: 0.9Y + c ☑

---

4. **Which of the following is the correct for the original function from Y= 6x and after integration as $Y = 3x^2 + c$?**
   - Linear function of degree two
   - Nonlinear function
   - Nonlinear function

Note: Live quiz MCQs also repeated in Exam (6, 7)

Miss Mehwish: 03171491481

- Linear function of degree one
- Linear Function of degree zero

Correct option: Linear function of degree one ✅

---

5. **Which of the following is the correct option for the integration of natural exponential supply function Y = 200e^(3x)?**
   - 200e^(3x) / 2 + c
   - 200e^(3x) / 3 + c
   - 200e^(3x) + c
   - 200e^(3x) / 1 + c

Correct option: 200e^(3x) / 3 + c ✅

---

6. **Which of the following is the correct integration for the number of shops in a chain of local grocery store after t months, dn/dt = 40t^(-1/2)?**
   - $8t^2 + c$
   - 40t^(1/2) + c
   - 80t^(1/2) + c
   - 60t^(1/2) + c

Correct option: 80t^(1/2) + c ✅

---

7. **Which of the following is the incorrect method for calculating a definite integral?**
   - Riemann Sum method
   - Statistical method
   - Calculus based method
   - Both calculus based and Riemann sum methods

Correct option: Statistical method ✅

Miss Mehwish: 03171491481

---

8. **Which of the following is the integrated value of a function y = ∫(1/x) dx from 0 to 9?**
    - -∞
    - 9
    - 0
    - Ln 9

Correct option: Ln 9 ✅

---

9. **Which of the following is the geometrically social surplus (area of right triangle) if consumer surplus and producer surplus are 130 and 250 respectively?**
    - 380
    - 120
    - -120
    - -380

Correct option: 380 ✅

---

10. **Which of the following is the name of the function to be integrated?**

- Integrand
- Independent function
- Derived function
- Dependent function

Correct option: Integrand ✅
