

ENG502

Quiz for Final-Term

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Maha Malik

Introduction to Linguistics

ENG502_Introduction to Linguistics
Quiz for Final-Term

1. We can also refer to things when are not sure (**call**)
2. An appropriate number of (**cohesive ties**)
3. The maxim of quantity asks one to be (**brief**)
4. According to research in developing morphology the acquisition of the plural marker (**overgeneralization**)
5. Emotional reaction or affect (**all of the given**)
6. Vocabulary lists and sets of grammar rules are used (**grammar Translation Method**)
7. For lexicographers indispensable resources (**dictionaries**)
8. Specific aspects of language ability can be accorded (**localization**)
9. In the quantitative research we use (**static**)
10. Oung and Jun (**Chinese**)
11. According to Grim law p of Latin has been change into f in (**English**)
12. Verb phrase cannot consist (**D+N**)
13. In the sentence Charlie broke the window and The window was broken by Charlie. Which thing distinguishes both sentences? (**SURFACE**)
14. Near London is example of **PREPOSITIONAL** phrase
15. He drew the picture with a crayon; here crayon IS **INSTRUMENT**
16. **Applied** linguistics is an interdisciplinary field of linguistics which identifies, investigates, and offers solutions to language-related real-life problems
17. Semantic role is the **UNDERLYING** relationship that a participant has with the main verb in a clause.
18. **Anaphora** can be defined as subsequent reference to an already introduced entity
19. Semantic development in a child's use of words is usually a process of **OVEREXTENSION**
20. Sihia is the language of **JAPAN**
21. Young, Lichun and Jun (2001) analyzed contents of four **Chinese** journals of Applied Linguistics
22. **Psycholinguistics** is the study of the psychological and neurobiological factors that enable humans to acquire, use, comprehend and produce language.
23. Social-Cultural context still includes factors such as illiteracy rate, population geographic distribution, educational level and the **populations'** ethnic composition
24. The sources of lexicographers are **SECONDARY** fieldwork
25. The first component is **grammatical competence**, which involves the accurate use of words and structures.
26. The deep structure is an **abstract level** of structural organization in which all the elements determining structural interpretation are represented.
27. If an **agent** uses another entity in order to perform an action, that other entity fills the role of instrument.
28. The idea of 'the characteristic instance' of a category is known as the **Prototype**.

ENG502_Introduction to Linguistics
Quiz for Final-Term

29. Semantic development in a child's use of words is usually a process of **OVEREXTENSION**
30. The sentence can be grammatically correct but **SEMANTICALLY** incorrect.
31. One of the tests used to check for the presuppositions underlying sentences involves negating a sentence with a particular **presupposition** and checking if the presupposition remains true.
32. The acquisition of the plural marker is often accompanied by a process of **OVERGENERALIZATION**
33. Two Word stage begins around eighteen to twenty months. The child's vocabulary moves beyond **FIFTY WORDS**.
34. Electronic dictionary databases, especially those included with software dictionaries are often **extensive** and can contain up to 500,000 headwords and definitions, verb conjugation tables, and a grammar reference section
35. Two word stage occurs between **18 to 24 month**.
36. A deictic expression (or deixis) is a word or phrase (such as this, that, these, those, now, then) that points to the time, place, or situation in which a speaker is speaking. **(correct)**
37. All the deictic expressions have to be interpreted in terms of which person, place or time the speaker has in _____. **(mind)**
38. The term "deixis" becomes more and more metaphoric, ambiguous and vague since it is used for many _____ different situations. **(semantically)**
39. The term 'deixis' is used from the Latin word, which means 'to show' or 'to indicate'. **(Incorrect)**
40. To perform an act of reference, we can use proper nouns, other nouns in phrases or pronouns. **(correct)**
41. Location deixis is an expression in relation to the certain point of time when the utterance is produced by the speaker. **(Incorrect)**
42. The listener has to operate with the inference: 'If X is the name of the writer of a book, then X can be used to identify a copy of a book by that writer' **(correct)**
43. Which of the following is an example of additional information used by the listener to create a connection between what is said and what must be meant? **(Inference)**
44. Tenses are generally separated into _____ (deictic) and relative tenses. **(absolute)**
45. This and that, here and there, etc. as place deixis are the expressions used to show the _____ relative to the location of a participant in the speech event. **(location)**
46. Place deixis is also known as space deixis, and concerns itself with the spatial locations relevant to an utterance. **(correct)**
47. Which of the following can be defined as subsequent reference to an already introduced entity? **(Anaphora)**
48. One of the tests used to check for the presuppositions underlying sentences involves _____ a sentence with a particular presupposition and checking if it remains true. **(negating)**
49. A speech act is an utterance that has no performative function in language and communication. **(incorrect)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

50. Failing to recognize another person's indirect speech act can create confusion. **(correct)**
51. A direct relationship between the structure and the communicative function of the utterance is called direct speech act. **(correct)**
52. A presupposition is an implicit assumption about the world or background belief relating to an utterance whose truth is taken for granted in discourse. **(correct)**
53. The presupposition (I married her) remains constant even though the verb regret changes from affirmative to negative. **(correct)**
54. We can define a _____ act as an action performed by a speaker with an utterance. **(speech)**
55. Which speech acts are based on some complex social assumptions? **(Indirect)**
56. Which field is concerned with studying and analyzing written and spoken texts to reveal the discursive sources of power, dominance, inequality and bias? **(Critical discourse analysis)**
57. The key elements investigated in the study of discourse are: the effort to interpret (or to be interpreted) and how we accomplish it. **(correct)**
58. The structure of which of the following depends on factors different from those required in a single sentence? **(Cohesion)**
59. In conversational interactions a great deal of what is meant is not actually present in what is said. **(correct)**
60. Which of the following is a process of filling the gaps that exist in the conversation or in the texts? **(Coherence)**
61. Which field is concerned with studying and analyzing written and spoken texts to reveal the discursive sources of power, dominance, inequality and bias? **(cohesion)**
62. Who employed the term 'discourse analysis' for the first time? **(Zelling Harris)**
63. Who study language use 'beyond the sentence boundary' and also prefer to analyze naturally occurring language use? **(Discourse analyst)**
64. Critical Discourse Analysis aims to help reveal some of the hidden and 'out of sight' values, positions, and perspective positions. **(correct)**
65. In discourse analysis, some of the most interesting observations are made, not in terms of the components of language, but in terms of the way language is used. **(correct)**
66. Discourse Analysis—what speakers do in a conversation-- is the analysis of _____ 'beyond the sentence'. **(Language)**
67. Cohesive structure does not differ from one language to the next. **(incorrect)**
68. Discourse is composed of well-formed sentences and it cannot have grammatical mistakes in it. **(incorrect)**
69. Conversation is a discourse constructed and negotiated between the participants, following pre-established patterns, and marking the direction in particular ways. **(correct)**
70. There is no hard evidence of the origins of language in prehistoric communities to assume that speech preceded writing and dialogue preceded monologue. **(correct)**
71. Any unit of information may change its status as the _____ proceeds. **(discourse)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

72. There is a degree of _____ in identifying a stretch of language as discourse. **(subjectivity)**
73. Spoken discourse is less planned and orderly in a conversation. **(correct)**
74. Language teaching divides discourse into _____ major categories. **(two)**
75. A sensation stimulated by key words or phrases in the text, or by the context, activates a knowledge schema and uses it to make sense of the discourse. **(incorrect)**
76. Turn-taking and interaction are among the _____ communicative skills. **(first)**
77. It is a kind of representation of typical situation used in discourse processing to predict the content of the particular situation. **(Mental)**
78. Language class _____ prepares students for the real life situations. **(hardly)**
79. Conversation analysis (CA) is a branch of study which sets out to discover what order there might be in apparent chaos. **(correct)**
80. What is always based on turn taking? **(conversation)**
81. Turn-taking mechanisms vary between _____ and between languages. **(cultures)**
82. According to Paul Grice (1975), we interpret language on the assumption that its sender is obeying six maxims. **(Incorrect)**
83. Legal and _____ discourses often sacrifice the maxim of quantity to the maxim of quality. **(scientific)**
84. Which principles are in conflict with each other whereas politeness and truth are mutually incompatible with each other? **(Co-operation and politeness)**
85. Once a topic is chosen and a conversation initiated, then matters of conversational 'turn-taking' arise. **(True)**
86. The boundary between conversation and other discourse types is _____ one. **(fuzzy)**
87. Politeness principle, like co-operative principle, may be formulated as a series of maxim, which people assume are being followed in the utterances of others. **(correct)**
88. Who can perceive or take figures of speech literally? **(Both children and foreign language learners)**
89. Discourse does not reflect and construct the social world through many different sign systems. **(Incorrect)**
90. Discourses are not associated with social practices, processes, and products. **(Incorrect)**
91. CDA is characterized by the common interests in de-mystifying ideologies and power through the systematic investigation of semiotic data (written, spoken or visual). **(correct)**
92. When did CDA, as a network of scholars, emerged? **(Early 1990s)**
93. Which of the following is a central concept in critical discourse studies? **(power)**
94. Some methods are less focused linguistically and more focused on the context in which the discourse arises. **(Correct)**
95. The most important feature of 'discourse analysis' is the analyses, connected to a theory of the social world and a theory of _____ that is coherent. **(language)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

96. Critical Social Theory (CST) provides a theoretical foundation for critical approaches to discourse analysis. **(correct)**
97. Meanings are always embedded within social, historical, _____, and ideological contexts. **(political)**
98. Which of the following is a central concept in critical discourse studies? **(power)**
99. A social semiotic approach is concerned with how meanings are made—in both the outward and inner interpretation of signs. **(correct)**
100. The reflexive tendencies of critical discourse studies are rooted in the constitutive relationship between discourse and the _____ world. **(social)**
101. Who has developed a three-dimensional framework for studying discourse, where the aim is to map three separate forms of analysis onto one another? **(Norman Fairclough)**
102. In 21st century, linguistics broadened and included critical studies and multilingualism. **(Incorrect)**
103. The ability of an individual or the members of a community to use two languages effectively is called Bilingualism. **(Correct)**
104. Sign linguistics is associated with the use of multiple languages. **(Incorrect)**
105. Historically, there have been _____ main views on applied linguistics. **(two)**
106. Guy Cook (2005) writes, 'like Odysseus, applied linguistics has steered a difficult course between a rock and a whirlpool and has been in constant danger of hitting one or disappearing down the other'. **(correct)**
107. When did linguistics become a problem-driven field rather than theoretical linguistics, including the solution of language-related problems in the real world? **(1970s)**
108. Some of the academic fields related to applied linguistics are education, _____, communication research, anthropology, and sociology. **(psychology)**
109. The accident of Mr. Gage made it clear to the scientists that language may be located in the specific parts of the brain; it is not clearly situated right at the front. **(correct)**
110. The study of the relationship between language and the brain is called '_____'. **(Neurolinguistics)**
111. Close to Broca's area is the part of the motor cortex that controls the articulatory muscles of the face, jaw, _____ and larynx. **(tongue)**
112. Paul Broca, a French surgeon, reported in the 1860s that damage to any specific part of the brain was never related to the difficulty in producing speech. **(Incorrect)**
113. Which area of the brain is associated with language processing? **(Broca's area)**
114. Which area of the brain is associated with word comprehension? **(Wernicke's area)**
115. In how many hemispheres can the brain be divided? **(Two)**
116. Sociolinguistics is mainly concerned with the mechanisms in which languages are processed and represented in the brain. **(Incorrect)**
117. In a sense, we are forced to use metaphors mainly because we cannot obtain direct physical evidence of linguistic processes in the brain. **(correct)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

118. Motor Cortex is the part of the cerebral cortex in the brain which originates the nerve impulses that initiate voluntary muscular activity. **(correct)**
119. A number of discoveries have been made about the specific parts in the brain that are related to language functions. **(correct)**
120. Many scientists have provided clues that how the brain tries to make sense of the auditory signal it receives. **(correct)**
121. The most common cause of aphasia is a stroke; traumatic head injuries from violence or an accident. **(correct)**
122. In how many types 'Aphasia' can be divided? **(three)**
123. Right hemisphere dominance for syllable and word processing is called the dichotic listening test. **(Incorrect)**
124. The person with Broca's Aphasia has difficulties in auditory comprehension. **(Incorrect)**
125. The 'sensitive period' for language acquisition is more generally known as the '_____ period'? **(critical)**
126. Which of the following is a certain type of language disorder? **(Aphasia)**
127. Tongue tips and slips mainly occur with common words and names. **(Incorrect)**
128. We make mistakes in the _____ process because often there are strong phonological similarities between the target word and what we actually produce. **(retrieval)**
129. Sociolinguists study the social context and its influence on _____. **(language)**
130. Differences in vocabulary are often easily recognized. However, dialect variations in the meaning of grammatical constructions are less frequently documented. **(correct)**
131. A creole initially develops as the first language of children growing up in a pidgin-using community and becomes more complex as it serves more communicative purposes. **(correct)**
132. Diglossia is the coexistence of two or more languages or distinct varieties of the same language within a speech community. **(Incorrect)**
133. 'Language is used not just as a tool for the exchange of information, but as a symbolic system with the power to create and shape symbolic realities, such as values, perceptions, identities through discourse' (Kramsch, 2002). **(Correct)**
134. Which term refers to a person's ability to communicate in more than two languages? **(Polydiglossia)**
135. A standard variety of language is the native language or native dialect (usually colloquial or informal) of a specific population. **(Incorrect)**
136. Sociolinguistics overlaps considerably with pragmatics. **(correct)**
137. Which one of the following is the 'babbling' stage in children? **(6 – 8 months)**
138. When does a child start sitting up and producing a number of different vowels and consonants, as well as combinations such as ba-ba-ba and ga-ga-ga? **(Between six and eight months)**
139. During 'the two-word stage', the child's vocabulary moves beyond _____ words. **(fifty)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

140. Holophrastic utterances seem to be used to name objects. **(Correct)**
141. In Telegraphic speech stage, a child can speak only single unit words. **(Incorrect)**
142. What is the other name of 'telegraphic' speech stage? **(Multiple-word stage)**
143. The child not only produces speech, but also receives feedback confirming that the utterance worked as a contribution to the interaction. **(correct)**
144. The learning generally occurs without any overt instruction regardless of great differences in their circumstances. **(correct)**
145. By eight months the child brings the back of the tongue into regular contact with the back of the palate allowing velar consonants [k] and [g] to produce. **(Incorrect)**
146. The children turn out to be like their parents in stature, activity level, vocabulary resources, and language and interaction styles. **(correct)**
147. In the formation of questions and the use of negatives by children, there appears to be _____ identifiable stages. **(three)**
148. By two-and-a-half years, the child is beyond _____ forms. **(telegraphic speech)**
149. At which stage of question formation, the child forms questions close to the adult model? **(Third stage)**
150. The third stage of forming negatives sees the incorporation of other auxiliary forms such as 'didn't' and 'won't' while the typical Stage 1 forms disappear. **(correct)**
151. At which stage of forming negatives, the child involves a simple strategy of putting no or not in the sentence? **(Third stage)**
152. At which stage of forming negatives, the child involves a simple strategy of putting no or not in the sentence? **(Third)**
153. During which stage children use their limited vocabulary to refer to a large number of unrelated objects? **(Holophrastic)**
154. The linguistic repertoire of the child does not increase with the passage of time. **(Incorrect)**
155. The acquisition of the plural marker in language is often accompanied by a process of overgeneralization. **(correct)**
156. The child's first stage has four procedures in forming questions. **(Incorrect)**
157. The child understands what the adult is saying but just has their own way of expressing it. **(correct)**
158. It is normally assumed that, by the age of one year, the child has completed the greater part of the basic language acquisition process. **(Incorrect)**
159. Younger children are typically much more self-conscious than teenagers. **(Incorrect)**
160. Which of the following is the most traditional approach to treat L2 learning? **(Grammar-Translation Method)**
161. Communicative competence can be defined as the general ability to use language accurately, appropriately, and flexibly. **(correct)**
162. The first component is _____ competence which involves the accurate use of words and structures. **(grammatical)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

163. The experience with an L2 is fundamentally different from that of L1 experience, and it is hardly conducive to acquisition. **(correct)**
164. Even after years of study, our ability rarely matches our ability in our first language. **(correct)**
165. Grammar-translation approach is based on a belief that the functions of language should be emphasized rather than the forms of the language. **(Incorrect)**
166. What are those individuals called who grow up in a social environment where more than one language is used? **(Bilingual)**
167. Which of the following writers is the greatest example who achieved great expertise in the written language, but not the spoken language? **(Joseph Conrad)**
168. Descriptions of L2 acquisition in _____ are full of instances where young children quickly overcome their inhibitions as they try to use new words and phrases. **(childhood)**
169. Transferring an L1 feature that is really different from the L2 (e.g., putting the adjective after the noun) results in negative transfer. **(correct)**
170. One radical feature of most communicative approaches is the _____ of “errors” produced by students. **(toleration)**
171. In the sixteenth century, philology dominated the study of language and one result was the creation of “family trees” to show how languages were related. **(Incorrect)**
172. Which of the following languages are expanding in terms of number of speakers? **(Chinese and English)**
173. Who gave the concept of a systematic correspondence holding between the consonants of Germanic languages? **(Grimm)**
174. Words across languages can be put into systematic correspondences in terms of phonological and morphological structure. **(correct)**
175. Influences from the outside, such as the borrowed words from Norman French or Old Norse, are examples of external change in the language. **(Correct)**
176. Which one of the following is the field of investigation of the features of older languages, and the ways in which they developed into modern languages? **(Historical linguistics)**
177. During the _____ century the wave model had little acceptance as a model for language change. **(20th)**
178. The wave model was originally presented by Grimm. **(Incorrect)**
179. Which of the following field of linguistics study language change over time? **(Historical linguistics)**
180. Computers have no intelligence; their linguistic capabilities derive from programs that are written for them. **(correct)**
181. Computers have no _____. **(intelligence)**
182. By the mid-_____ with the increasing power and availability of general-purpose computers, the dream of human-level artificial intelligence began to be fulfilled. **(1960s)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

183. The task of an automatic morphological analyzer is to take a _____ in a language and break it down into its stem form. **(word)**
184. Computers have for many years been using more computational linguistics tools in applications. **(correct)**
185. A word's syntactic and semantic properties are not represented in the computer's digital lexicon. **(Incorrect)**
186. A top-down parser, as you might expect, builds the parse trees from the top to down. **(correct)**
187. A parser takes an _____ sentence and produces one syntactic representation of it. **(input)**
188. Language is a mirror of heart, a computational understanding of language also provides insight into heart and liking. **(Incorrect)**
189. Computational semantics is largely concerned with representing _____ functions. **(semantic)**
190. Computational morphology deals with the processing of words and word forms. **(correct)**
191. The impact of computational linguistics on _____ depends on the applications it makes possible. **(society)**
192. A dictionary is not a resource containing all sort of interesting facts of data about a language. **(correct)**
193. Who has divided dictionary users into three broad categories? **(Varantola)**
194. A dictionary does not describe the vocabulary of a language or a coherent subset of a language. **(Incorrect)**
195. A corpus is close to the centre of _____ project. **(dictionary)**
196. Transferring an L1 feature that is really different from the L2 (e.g., putting the adjective after the noun) results in negative transfer. **(correct)**
197. The computer has provided corpus designers a massive storage facility and impressive test processing power, which they can access quite easily for their work. **(correct)**
198. The vocabulary of _____ contains words from more sources than any other language. **(English)**
199. The drastic improvement in the field of _____ technology has made a lasting impact on the diversified growth and expansion of a corpus. **(computer)**
200. The first purely English alphabetical dictionary was A Table Alphabetically, written by an English schoolteacher Robert Cawdrey in 1604. **(correct)**
201. When was the oldest dictionary formed? **(2600 BC)**
202. Which of the following dictionary's data exists in digital form and can be accessed through a number of different media? **(Electronic dictionary)**
203. There are six basic methods by which a language may increase its vocabulary. **(Incorrect)**
204. Linguistics is an important field of study which was introduced as a regular discipline in the universities of Europe as later as 1950s. **(Incorrect)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

205. In the field of psychology two contrasting approaches to the study of human functioning have been recognized – the experimental and the differential approaches. **(correct)**
206. Which of the following is the study of the neural mechanisms in the human brain that control the comprehension, production, and acquisition of language? **(Neurolinguistics)**
207. Izui (1962) studied research trends in Japanese linguistics. **(correct)**
208. Which of the following theories plays an important promotional role for development of applied linguistics? **(Cognitive)**
209. Ethnography as a method of research was the latest phenomenon of the _____ decade. **(80s)**
210. Who studied current trends in linguistics in India? **(Jha)**
211. Applied linguistics is an interdisciplinary subject and has wide development prospect. **(correct)**
212. In the field of research methodology, significant achievement in Japanese linguistics is done through the various activities performed by the _____ Society of Linguistics in Japan. **(Mathematical)**
213. A wider gap between qualitative and quantitative research which existed in China had been bridged up by the East. **(Incorrect)**
214. Which is the most important job of universities in the modern world? **(research)**
215. Jha (2003) claimed that the funding provided by the government of India was not enough for development of various research projects for integration of IT and linguistics. **(Incorrect)**
216. According to the author (Lazarton, 2000), almost _____ of the authors applied ANOVA for data analysis in the research studies of quantitative nature. **(50%)**
217. In syntax, connotative meaning is also called _____ meaning. **(associative)**
218. The set of possible expressions in a given language may or may not be infinite; the actual set of all expressions ever uttered is going to be _____. **(finite)**
219. Deep and surface structures are often used as terms in a simple _____ opposition. **(binary)**
220. The deep structure is a/an _____ level of structural organization in which all the elements determining structural interpretation are represented. **(abstract)**
221. In semantics, the associative or _____ meaning of an expression has to do with individual mental understandings of the speaker. **(connotative)**
222. A sentence has a noun phrase and a _____ phrase. **(verb)**
223. Curly brackets in syntactic analysis indicate that only _____ of the elements enclosed within the curly brackets must be selected. **(one)**
224. In semantics, the study of the tune and rhythm of speech is called _____. **(prosody)**
225. In the sentence 'Mary put out the fire.' particle movement is _____. **(optional)**
226. Phrases can also be structurally _____. **(ambiguous)**
227. One of the properties of generative grammar is that grammar has _____ number of rules but is capable of producing _____ number of sentences **(finite, infinite)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

228. The grammar must be capable of showing how a single underlying abstract representation can become different _____ structures. **(surface)**
229. Recursive rules have the capacity to repeat or generate the _____ of a sentence more than once. **(structure)**
230. In grammar, a phrase or a clause that violates some grammar rule of a particular language is called a/an _____ phrase or clause. **(ill-formed)**
231. In semantics, _____ meaning is the type of meaning that comes from the context within which the sentence is used. **(propositional)**
232. In linguistics, _____ feature may indicate the attitude or mental state of the speaker. **(paralinguistic)**
233. In syntax, a _____ diagram is a static representation of the structure of the sentence shown at the bottom of the diagram. **(tree)**
234. In linguistics, prosody is concerned with the properties of _____ and larger units of speech. **(syllables)**
235. Phrases can also be structurally _____. **(ambiguous)**
236. In syntax, the most common way to create a visual representation of syntactic structure is diagram. **(tree)**
237. The rules that relate the spoken form of sentence to their underlying meaning are called rules. **(transformational)**
238. The sentence 'John believed that Cathy knew that Mary helped George.' Is tediously . **(recursive)**
239. De Saussure explained that the relationship between the signifier and is an arbitrary one. **(signified)**
240. The set of possible expressions in a given language may or may not be infinite; the actual set of all expressions ever uttered is going to be _____. **(finite)**
241. In English, a _____ phrase consists of a preposition and a noun phrase. **(prepositional)**
242. In prosody, non-linguistic may indicate something about a _____ vocal physiology, state of health or emotional state. **(speaker's)**
243. In syntax, _____ grammar discusses rules which transform sentences from deep level to surface level. **(transformational)**
244. The symbol “()” used in syntactic description of a sentence indicate elements in a sentence. **(optional)**
245. In syntax, IC analysis stands for _____ analysis. **(Immediate Constituent)**
246. The word 'syntax' literally means 'putting together' or _____. **(arrangement)**
247. In Semantics, the concept is a minimal unit of meaning which could be called a/an in the same way as the unit of sound is called a 'phoneme' in Phonology. **(sememe)**
248. According to researchers by age three children from privileged families have heard million more words than children from underprivileged families. **(30)**
249. Uttering the words 'make a long shory stort' instead of "make a long story short" is an example of _____ of the tongue. **(slip)**

ENG502_Introduction to Linguistics
Quiz for Final-Term

250. A variety of a language that developed for some practical purpose, such as trading is called . **(pidgin)**
251. One-word stage (better one morpheme or one unit) or _____ stage starts between 9-18 months. **(holophrastic)**
252. Analytic processing, such as recognizing the smaller details of sound, words and phrase structures in rapid sequence, is done with the _____. **(left brain)**
253. The native language or native dialect (usually colloquial or informal) of a specific population is called _____ language. **(vernacular)**
254. An impairment of language function due to localized brain damage that leads to difficult in understanding and producing linguistic forms is termed as _____. **(Aphasia)**
255. The symptoms such as a substantially reduced amount of speech, distorted articulation and slow, often effortful speech characterize the disease _____. **(motor aphasia)**
256. By the age of _____ the child's vocabulary expands rapidly. **(two-and-a-half)**
257. The shared principles, values and behaviors of a social group can be termed as _____. **(culture)**
