Lesson-19: TYPES OF CRIME-II

IMPORTANT EXAM POINTS

Victimless crime is also known as public order crime.

Victimless crimes include prostitution, illegal gambling, and illegal drug use.

Victimless crimes do not have a clear individual victim but may harm society as a whole.

Many sociologists believe victimless crimes disrupt social order and weaken society's moral values.

Émile Durkheim stated that crime is a normal part of every society.

Every society develops institutions and laws to control crime.

The criminal justice system consists of law enforcement, courts, and corrections.

Drug abuse is one of the most common victimless crimes in Pakistan.

Crimes against persons involve violence or the threat of violence.

Murder is the intentional killing of one human being by another.

Manslaughter refers to unlawful killing under circumstances different from murder.

Aggravated assault is an attack intended to cause serious bodily injury.

Forcible rape is classified as a violent crime against a person.

Robbery involves taking property through force, violence, or intimidation.

Property crimes are generally non-violent but occur more frequently than violent crimes.

Burglary means unlawful entry into a building with the intention to steal.

Larceny-theft involves stealing property of significant value without using force.

Auto theft refers to stealing motor vehicles.

Arson is the deliberate and intentional setting of fire to property.

Cybercrime involves criminal activities committed using computers or information technology.

Technological advancement has increased opportunities for cybercrime and organized crime.

Organized crime often uses modern communication and information technology.

Law originated to regulate human behavior and settle disputes.

The earliest legal systems were based on customs and traditions.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Modern legal systems protect individual rights and maintain social order.

Pakistan's legal system combines Islamic law (Sharia) with British Common Law.

Pakistan's legal system includes both civil law and criminal law.

Law is essential for maintaining peace, justice, and stability in society.

The emergence of law became necessary as societies became larger and more complex.

The courts interpret laws while corrections focus on rehabilitation and punishment.

Crime control is one of the primary functions of every legal system.

20 Statement-Based MCQs

1. Victimless crimes are also known as public order crimes.

- A) White-collar crimes
- B) Public order crimes ✓
- C) Property crimes
- D) Violent crimes

Answer: B

2. Prostitution, illegal gambling, and illegal drug use are examples of victimless crimes.

- A) Property crimes
- B) Political crimes
- C) Victimless crimes ✓
- D) Organized crimes

Answer: C

3. According to many sociologists, victimless crimes negatively affect society's moral values.

- A) They strengthen morality.
- B) They have no social impact.
- C) They disrupt social order and moral values. ✓
- D) They reduce criminal activities.

Answer: C

4. Émile Durkheim believed that crime is a normal part of every society.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Karl Marx
- B) Max Weber
- C) Émile Durkheim ✓
- D) Auguste Comte

Answer: C

5. The criminal justice system mainly consists of law enforcement, courts, and corrections.

- A) Parliament, courts, and police
- B) Law enforcement, courts, and corrections ✓
- C) Police, media, and army
- D) Courts, prisons, and hospitals

Answer: B

6. Drug addiction is a major form of victimless crime in Pakistan.

- A) Robbery
- B) Drug addiction ✓
- C) Kidnapping
- D) Fraud

Answer: B

7. Crimes against persons involve violence or the threat of violence.

- A) Property damage only
- B) Violence or threat of violence ✓
- C) Financial loss only
- D) Tax violations

Answer: B

8. Murder is defined as the willful killing of one human being by another.

- A) Theft of property
- B) Intentional killing of another person ✓
- C) Damaging property
- D) Kidnapping

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

9. Aggravated assault is committed with the intention of causing serious bodily injury.

- A) Minor injury only
- B) Serious bodily injury ✓
- C) Property damage only
- D) Financial loss

Answer: B

10. Robbery involves taking property through force or threat of force.

- A) Secret stealing only
- B) Force or intimidation ✓
- C) Computer hacking
- D) Tax fraud

Answer: B

11. Property crimes occur more frequently than violent crimes.

- A) Never occur
- B) Occur less frequently
- C) Occur more frequently ✓
- D) Are disappearing

Answer: C

12. Burglary refers to unlawful entry with the intention to steal.

- A) Entering legally to buy goods
- B) Unlawful entry to commit theft ✓
- C) Damaging public property
- D) Forging documents

Answer: B

13. Larceny-theft involves stealing property without using force.

- A) Armed robbery
- B) Stealing property without force ✓
- C) Murder
- D) Kidnapping

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

14. Arson means intentionally setting fire to property.

- A) Illegal gambling
- B) Computer hacking
- C) Deliberately setting fire ✓
- D) Identity theft

Answer: C

15. Cybercrime is committed with the assistance of information technology.

- A) Farming equipment
- B) Information technology ✓
- C) Medical equipment
- D) Construction tools

Answer: B

16. Technological advancement has increased opportunities for cybercrime.

- A) Eliminated crime completely
- B) Reduced all crimes
- C) Increased cybercrime opportunities ✓
- D) Ended organized crime

Answer: C

17. Law first emerged to regulate behavior and resolve conflicts.

- A) Increase trade only
- B) Promote entertainment
- C) Regulate behavior and settle disputes ✓
- D) Encourage competition

Answer: C

18. Early legal systems were mainly based on customs and traditions.

- A) International treaties
- B) Customs and traditions ✓
- C) Computer laws
- D) Corporate policies

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

19. Pakistan's legal system combines Islamic law with British Common Law.

- A) French law only
- B) Islamic law and British Common Law ✓
- C) Roman law only
- D) American law only

Answer: B

20. One major purpose of law in modern society is to protect individual rights and maintain social order.

- A) Increase crime rates
- B) Protect rights and maintain social order ✓
- C) Promote illegal activities
- D) Eliminate education

Answer: B

Lesson-20: FORMAL SOCIAL CONTROL MECHANISMS

IMPORTANT EXAM POINTS

Formal social control mechanisms are essential for maintaining social order in society.

The criminal justice system is one of the most important formal social control mechanisms.

The criminal justice system consists of the police, courts, and prisons.

The primary purpose of the criminal justice system is to enforce laws and punish offenders.

The criminal justice system reflects the authority and power of the state.

Issues of fairness and bias remain major criticisms of the criminal justice system.

Police officers are the most visible representatives of the criminal justice system.

The two major functions of the police are law enforcement and maintaining public order.

Police spend more time maintaining order than catching criminals.

Technological advancements have improved police communication, surveillance, vehicles, and equipment.

Modern technology has also increased criminals' ability to commit crimes.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Community policing was introduced to improve trust and cooperation between police and the public.

Community policing remains an important strategy in modern law enforcement.

Almost 90% of criminal cases are resolved through plea bargaining instead of trial.

A plea bargain is an agreement in which the accused pleads guilty to a lesser charge.

Only about 10% of criminal cases proceed to a full trial.

Judges have discretion in accepting pleas, admitting evidence, instructing juries, and determining sentences.

Juries are composed of private citizens who participate in deciding criminal cases.

The final stage of the criminal justice process is corrections.

Prisons keep convicted offenders separated from society.

The major purposes of prisons are punishment, rehabilitation, and deterrence.

Poor prison conditions can increase the chances of reoffending.

Pakistan's prison system is administered by provincial governments.

Types of prisons in Pakistan include central jails, district jails, and women's jails.

Pakistan's prisons face challenges such as overcrowding, poor facilities, and mistreatment of prisoners.

Corrections aim to reform offenders and protect society.

Retribution refers to punishment given for committing crimes.

Probation is commonly used for non-serious crimes and allows offenders to remain in the community under restrictions.

Serious offenders are usually sentenced to imprisonment.

Parole allows prisoners to be released before completing their full sentence under supervision.

Capital punishment is the most severe form of formal social control.

Mass media significantly influence public perceptions about crime and the criminal justice system.

Modern technology and media are increasingly used to prevent and control crime.

The most common crimes in Pakistan include theft, burglary, and robbery.

Serious crimes in Pakistan include murder and terrorism.

Crime in Pakistan is influenced by poverty, unemployment, social inequality, and political instability.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Crime control in Pakistan involves the criminal justice system, community policing, and traditional dispute resolution methods.

Strengthening law enforcement institutions is essential for reducing crime in Pakistan.

Crime remains a complex social issue requiring cooperation between government and society.

20 Statement-Based MCQs

1. The criminal justice system is a formal mechanism of social control.

- A) Informal institution
- B) Religious organization
- C) Formal social control mechanism ✓
- D) Economic institution

Answer: C

2. The criminal justice system mainly consists of the police, courts, and prisons.

- A) Police, schools, and hospitals
- B) Police, courts, and prisons ✓
- C) Parliament, police, and media
- D) Courts, colleges, and banks

Answer: B

3. The primary purpose of the criminal justice system is to enforce laws and punish offenders.

- A) Promote trade
- B) Enforce laws and punish lawbreakers ✓
- C) Collect taxes
- D) Conduct elections

Answer: B

4. Police officers serve as the most visible link between the public and the criminal justice system.

- A) Judges
- B) Lawyers
- C) Police officers ✓
- D) Prison guards

Answer: C

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

5. The two major functions of the police are law enforcement and maintaining public order.

- A) Tax collection and elections
- B) Law enforcement and maintaining order ✓
- C) Teaching and healthcare
- D) Banking and trade

Answer: B

6. Police officers generally spend more time maintaining order than catching criminals.

- A) Catching criminals only
- B) Maintaining public order ✓
- C) Conducting court trials
- D) Supervising prisons

Answer: B

7. Community policing was introduced to improve public trust in the police.

- A) Increase prison populations
- B) Improve police-community relations ✓
- C) Reduce court cases
- D) Increase punishments

Answer: B

8. Around 90% of criminal cases are settled through plea bargaining.

- A) 25%
- B) 50%
- C) 90% ✓
- D) 100%

Answer: C

9. In a plea bargain, the accused usually pleads guilty to a less serious charge.

- A) More serious charge
- B) Lesser charge ✓
- C) Civil offense only
- D) No charge

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

10. Judges have the authority to determine appropriate sentences for convicted offenders.

- A) Police officers
- B) Journalists
- C) Judges ✓
- D) Witnesses

Answer: C

11. Juries in criminal trials are made up of private citizens.

- A) Government ministers
- B) Police officers
- C) Private citizens ✓
- D) Prison officials

Answer: C

12. The final stage of the criminal justice process is known as corrections.

- A) Investigation
- B) Appeals
- C) Corrections ✓
- D) Legislation

Answer: C

13. Prisons primarily serve the purposes of punishment, rehabilitation, and deterrence.

- A) Trade and commerce
- B) Punishment, rehabilitation, and deterrence ✓
- C) Elections and governance
- D) Tourism and recreation

Answer: B

14. Pakistan's prison system is managed by the provincial governments.

- A) Federal Parliament
- B) Provincial governments ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Municipal councils
- D) Private companies

Answer: B

15. Probation allows offenders to remain in society under certain restrictions.

- A) Immediate execution
- B) Community supervision with restrictions ✓
- C) Permanent imprisonment
- D) Deportation

Answer: B

16. Parole allows prisoners to be released before completing their full sentence under supervision.

- A) Immediate acquittal
- B) Early supervised release ✓
- C) Permanent imprisonment
- D) Court dismissal

Answer: B

17. Capital punishment is considered the most severe form of formal social control.

- A) Probation
- B) Fine
- C) Capital punishment ✓
- D) Community service

Answer: C

18. Theft, burglary, and robbery are among the most common crimes in Pakistan.

- A) Tax evasion only
- B) Theft, burglary, and robbery ✓
- C) Cyber espionage only
- D) Piracy only

Answer: B

19. Poverty, unemployment, social inequality, and political instability contribute to crime in Pakistan.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) High literacy only
- B) Poverty, unemployment, inequality, and instability ✓
- C) Tourism only
- D) Climate only

Answer: B

20. Reducing crime in Pakistan requires cooperation between the government, civil society, and other stakeholders.

- A) Only the police
- B) Only the courts
- C) Government and all stakeholders working together ✓
- D) Only prisons

Answer: C

Lesson-21: SOCIAL STRATIFICATION

IMPORTANT EXAM POINTS

Social stratification is the division of society into hierarchical layers based on property, power, and prestige.

Social stratification ranks groups rather than individuals.

Every society has some form of social stratification.

Social stratification is universal, but the level of inequality differs among societies.

Gender is a universal basis of social stratification.

The four major systems of social stratification are Slavery, Caste, Status, and Estate.

Slavery is the oldest and most rigid system of social stratification.

In slavery, one person legally owns another person.

Historically, slavery existed among the Romans, Greeks, Africans, and many agricultural societies.

The major causes of slavery were debt, crime, and war rather than race.

Women were among the earliest groups enslaved during wars.

Slavery was not always hereditary, and in some societies slaves could gain freedom.

Roman slaves could sometimes buy their freedom.

The Year of Jubilee in Israel allowed slaves to be freed every fifty years.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

In rare cases, slaves accumulated wealth and even owned other slaves.

The caste system is based entirely on ascribed status.

A person's caste is determined by birth and cannot be changed through personal achievement.

Achieved status has no effect in a caste system.

Endogamy means marriage within one's own caste or social group.

The caste system discourages inter-caste marriages.

Rules of ritual purity and pollution maintain separation between castes.

India is the classic example of the caste system.

Although India legally abolished the caste system in 1949, it still influences social life.

Apartheid in South Africa functioned as a caste-like system based on race.

Apartheid separated people into Whites, Blacks, Coloureds, and Asians.

Nelson Mandela became South Africa's first Black president in 1994 after apartheid ended.

Status system is based on social prestige rather than birth alone.

Status may depend on education, occupation, wealth, lifestyle, and cultural capital.

Modern industrial societies mainly follow the status system.

Higher status provides greater access to economic, political, and social resources.

Education and occupation play major roles in determining social status.

Status is linked with social mobility.

Status is especially important in urban areas of Pakistan.

The estate system developed during the Middle Ages in Europe.

The first estate consisted of the nobility who owned most of the land.

The second estate consisted of the clergy.

The third estate consisted of commoners or serfs.

Serfs were tied to the land and had very limited freedom.

Primogeniture allowed only the eldest son to inherit family land.

The Roman Catholic Church was a powerful political and economic institution during the estate system.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Women generally belonged to the estate of their husbands.

Nuns were exceptions because they did not marry.

Women of the third estate performed hard physical labor alongside their husbands.

The class system is more open than slavery, caste, or estate systems.

A class system is mainly based on wealth and material possessions.

Social mobility is a key feature of the class system.

People can move upward or downward in a class system through achievement or failure.

The class system does not legally restrict occupations or marriages.

Education and hard work are major factors influencing movement within the class system.

Family background strongly affects opportunities for social mobility.

20 Statement-Based MCQs

1. Social stratification refers to the hierarchical ranking of groups based on property, power, and prestige.

- A) Individual personality
- B) Hierarchical ranking of groups ✓
- C) Religious beliefs only
- D) Family traditions

Answer: B

2. Social stratification is found in every society of the world.

- A) Only developed countries
- B) Only poor countries
- C) Every society ✓
- D) Only democratic societies

Answer: C

3. Gender is a universal basis of social stratification.

- A) Education only
- B) Gender ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Religion only
- D) Language only

Answer: B

4. The four major systems of social stratification include slavery, caste, status, and estate.

- A) Slavery, tribe, family, religion
- B) Slavery, caste, status, and estate ✓
- C) Estate, democracy, monarchy, republic
- D) Family, occupation, race, ethnicity

Answer: B

5. Slavery is a system in which some individuals legally own other people.

- A) Democracy
- B) Slavery ✓
- C) Capitalism
- D) Socialism

Answer: B

6. Historically, slavery was mainly caused by debt, crime, and war rather than race.

- A) Religion only
- B) Debt, crime, and war ✓
- C) Education only
- D) Climate change

Answer: B

7. Roman slaves could sometimes purchase their own freedom.

- A) Never gained freedom
- B) Could buy their freedom ✓
- C) Became kings automatically
- D) Could not own money

Answer: B

8. In a caste system, social status is determined by birth.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Education
- B) Birth ✓
- C) Occupation only
- D) Wealth only

Answer: B

9. Endogamy means marriage within one's own social group or caste.

- A) Marriage outside the group
- B) Marriage within the same group ✓
- C) Forced marriage
- D) Religious conversion

Answer: B

10. India is the best-known example of a caste system.

- A) Japan
- B) Pakistan
- C) India ✓
- D) Brazil

Answer: C

11. India officially abolished the caste system in 1949.

- A) 1935
- B) 1947
- C) 1949 ✓
- D) 1956

Answer: C

12. Apartheid in South Africa legally separated people according to race.

- A) Religion
- B) Wealth
- C) Race ✓
- D) Language

Answer: C

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

13. Nelson Mandela became South Africa's first Black president in 1994.

- A) Nelson Mandela ✓
- B) Mahatma Gandhi
- C) Jawaharlal Nehru
- D) Desmond Tutu

Answer: A

14. The status system is mainly based on social prestige and individual achievement.

- A) Birth only
- B) Social prestige and achievement ✓
- C) Religion only
- D) Physical strength

Answer: B

15. Education and occupation are important factors in determining social status.

- A) Hair color
- B) Education and occupation ✓
- C) Height only
- D) Birthplace only

Answer: B

16. The estate system developed in medieval Europe.

- A) Ancient Egypt
- B) Medieval Europe ✓
- C) Modern America
- D) Ancient China

Answer: B

17. The first estate consisted mainly of the nobility who owned land.

- A) Clergy
- B) Merchants
- C) Nobility ✓
- D) Serfs

Answer: C

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

18. Primogeniture allowed only the eldest son to inherit family land.

- A) Youngest son
- B) Eldest son ✓
- C) Daughters only
- D) All children equally

Answer: B

19. Serfs belonged to the third estate in the estate system.

- A) First estate
- B) Second estate
- C) Third estate ✓
- D) Fourth estate

Answer: C

20. A class system allows social mobility because it is mainly based on wealth and achievement.

- A) It completely prevents mobility.
- B) It allows movement between classes. ✓
- C) It is based only on birth.
- D) Marriage is legally prohibited.

Answer: B

Lesson-22: THEORETICAL PERSPECTIVES ON SOCIAL STRATIFICATION-I

IMPORTANT EXAM POINTS

Functionalists believe social stratification exists because it benefits society.

According to functionalism, inequality is universal because it performs important social functions.

Kingsley Davis and Wilbert Moore developed the functionalist explanation of social stratification.

Davis and Moore argued that every important social position must be filled by qualified individuals.

More important positions require greater skill, training, and responsibility.

Society offers higher rewards to motivate qualified people to occupy important positions.

Higher salaries, prestige, and benefits encourage individuals to accept demanding jobs.

Functionalists believe social inequality is necessary for social stability and efficiency.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Conflict theory argues that social stratification results from inequality and power struggles.

Karl Marx believed that social inequality benefits the ruling class rather than society.

According to Marx, history is a history of class struggle.

Marx divided society into the bourgeoisie and the proletariat.

The bourgeoisie own the means of production.

The proletariat work for the owners of production.

The means of production include land, factories, machinery, tools, and investment capital.

Marx believed the ruling class uses ideology to justify inequality.

False class consciousness prevents workers from recognizing their exploitation.

Class consciousness develops when workers realize their common interests.

Marx predicted that workers would eventually overthrow capitalism through revolution.

Conflict theorists believe competition over power and resources exists in every society.

Modern conflict theorists study conflicts among nations, classes, racial groups, and genders.

Conflict theory explains social inequality as the result of power rather than merit.

Symbolic interactionists focus on symbols, lifestyles, and everyday interactions.

Lifestyle reflects how social groups consume goods and display social rank.

Thorstein Veblen introduced the concept of conspicuous consumption.

Conspicuous consumption means displaying wealth through expensive goods and services.

Conspicuous leisure refers to displaying status by avoiding productive work.

Language, clothing, posture, and behavior often indicate social class.

Working-class people generally maintain stronger family ties.

Middle- and upper-class people usually have broader professional and social networks.

Social networks increase opportunities for career advancement and mobility.

Feminist theory explains stratification through gender inequality and patriarchy.

Feminists argue that women experience both economic and gender-based oppression.

Gender, race, and class together influence social inequality.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

In Pakistan, women often face exclusion from economic, political, and social opportunities.

Max Weber argued that social class depends on property, power, and prestige.

The three determinants of social class according to Weber are called the Three Ps.

Property refers to wealth and ownership of valuable resources.

Power is the ability to control others even against their wishes.

Prestige refers to respect, honor, and social reputation.

Property can increase both power and prestige.

Prestige can also generate wealth and political influence.

Managers may control property even if they do not legally own it.

Celebrities often convert prestige into wealth and power.

Marx considered ownership of the means of production as the only basis of social class.

According to Marx, there are two major social classes: bourgeoisie and proletariat.

Marx also identified the lumpenproletariat as people living on the margins of society.

False class consciousness causes workers to misunderstand their true class interests.

Marx believed capitalism would eventually be replaced by a classless society.

The major difference between Marx and Weber is that Marx emphasized property alone, while Weber emphasized property, power, and prestige together.

20 Statement-Based MCQs

1. Functionalists believe social stratification exists because it benefits society.

- A) It weakens society
- B) It benefits society ✓
- C) It destroys social order
- D) It has no purpose

Answer: B

2. Kingsley Davis and Wilbert Moore developed the functionalist theory of social stratification.

- A) Karl Marx and Friedrich Engels
- B) Kingsley Davis and Wilbert Moore ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Max Weber and Durkheim
- D) Parsons and Merton

Answer: B

3. According to Davis and Moore, important positions must be filled by the most qualified people.

- A) Least educated people
- B) Most qualified individuals ✓
- C) Wealthiest citizens only
- D) Politicians only

Answer: B

4. Higher salaries and prestige motivate qualified individuals to occupy demanding positions.

- A) Punishment only
- B) Higher rewards and prestige ✓
- C) Religious beliefs only
- D) Family pressure only

Answer: B

5. Conflict theory explains social stratification as the result of unequal power and conflict.

- A) Cooperation only
- B) Power and conflict ✓
- C) Religion only
- D) Tradition only

Answer: B

6. Karl Marx argued that history is primarily a history of class struggle.

- A) Religious conflict
- B) Class struggle ✓
- C) Scientific progress
- D) Political elections

Answer: B

7. According to Marx, the bourgeoisie own the means of production.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Workers
- B) Bourgeoisie ✓
- C) Farmers only
- D) Clergy

Answer: B

8. The proletariat are people who work for the owners of production.

- A) Factory owners
- B) Government officials
- C) Workers ✓
- D) Military officers

Answer: C

9. False class consciousness prevents workers from recognizing their exploitation.

- A) Class consciousness
- B) False class consciousness ✓
- C) Social mobility
- D) Endogamy

Answer: B

10. Marx predicted that workers would eventually overthrow capitalism through revolution.

- A) Elections
- B) Peaceful negotiations
- C) Revolution ✓
- D) International trade

Answer: C

11. Symbolic interactionists study how symbols and lifestyles reflect social class.

- A) Biological differences
- B) Symbols and lifestyles ✓
- C) Economic inflation
- D) Natural disasters

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

12. Thorstein Veblen introduced the concept of conspicuous consumption.

- A) Karl Marx
- B) Max Weber
- C) Thorstein Veblen ✓
- D) Émile Durkheim

Answer: C

13. Conspicuous consumption means displaying wealth through expensive goods.

- A) Saving money secretly
- B) Displaying wealth publicly ✓
- C) Donating all income
- D) Living without possessions

Answer: B

14. Feminist theory emphasizes that gender inequality contributes to social stratification.

- A) Climate change
- B) Gender inequality ✓
- C) Population growth
- D) Technology

Answer: B

15. Feminists argue that many women experience both gender and economic oppression.

- A) Double oppression ✓
- B) Equal opportunity only
- C) Religious freedom only
- D) Political neutrality

Answer: A

16. According to Max Weber, social class depends on property, power, and prestige.

- A) Wealth only
- B) Property, power, and prestige ✓
- C) Birth only
- D) Religion only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

17. Power is defined by Weber as the ability to control others despite their resistance.

- A) Wealth only
- B) Ability to control others ✓
- C) Physical strength only
- D) Education only

Answer: B

18. Prestige refers to the respect and honor a person receives in society.

- A) Political office only
- B) Respect and social honor ✓
- C) Income only
- D) Property ownership only

Answer: B

19. Marx believed ownership of the means of production is the main determinant of social class.

- A) Education
- B) Ownership of the means of production ✓
- C) Religion
- D) Family size

Answer: B

20. The major difference between Marx and Weber is that Weber included power and prestige along with property in explaining social class.

- A) Weber focused only on religion
- B) Weber included property, power, and prestige ✓
- C) Marx emphasized prestige only
- D) Both had identical theories

Answer: B

Lesson-23: THEORETICAL PERSPECTIVES ON SOCIAL STRATIFICATION-II

IMPORTANT EXAM POINTS

Modernization theory explains global stratification from a functionalist perspective.

Modernization theory emphasizes the importance of technology in national development.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

According to modernization theory, advanced industrial nations help developing countries modernize.

Early modernization theorists believed poverty resulted mainly from internal national deficiencies.

Internal factors include poor climate, infertile soil, weak infrastructure, political corruption, and traditional customs.

Some modernization theorists believed religion and traditional values slowed economic development.

The culture of poverty was considered a barrier to development by some modernization theorists.

Contemporary modernization theory recognizes both internal and external factors in development.

Traditional values can sometimes promote modernization, as shown by Singapore's development.

The United States and Britain contributed to modernization in Asia through investment and military support.

In Pakistan, modernization theory supports foreign investment, infrastructure projects, and educational development.

Dependency theory explains global inequality from a conflict perspective.

Dependency theory argues that rich countries maintain the poverty of developing nations.

The International Monetary Fund (IMF), World Bank, and World Trade Organization (WTO) are often criticized by dependency theorists.

Dependency relationships are maintained through foreign aid, trade, military assistance, and investment.

Trade dependency occurs when poor nations export cheap raw materials and import expensive finished products.

Industrial dependency develops when multinational companies exploit cheap labor and local resources.

Investment dependency occurs when poor countries become trapped in foreign debt.

Heavy debt forces developing countries to spend income on loan repayments instead of development.

Dependency theory advocates political and economic reforms to reduce global inequality.

In Pakistan, dependency theory criticizes excessive reliance on foreign aid and investment.

World System Theory was developed by Immanuel Wallerstein.

World System Theory divides nations into core, semi-periphery, periphery, and external areas.

Core nations industrialized first and became economically powerful.

Semi-periphery nations depend partly on the core while developing their own industries.

Periphery nations mainly supply raw materials and agricultural products.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

External area nations were originally left outside capitalist development.

Global capitalism has increased economic interdependence among nations.

Events in one country can significantly affect the global economy.

World System Theory supports systemic changes to reduce global inequality.

Pakistan is often viewed as occupying a peripheral or semi-peripheral position in the global economy.

Neocolonialism replaced traditional colonialism after World War II.

Michael Harrington explained neocolonialism as economic rather than direct political control.

Rich countries maintain influence by providing loans, weapons, and goods on credit.

Debt makes developing countries economically dependent on industrialized nations.

Interest payments reduce the ability of poor countries to invest in development.

Neocolonialism limits the economic and political independence of developing countries.

Pakistan has often been criticized for dependence on foreign powers through neocolonial relationships.

Multinational corporations operate across many countries.

Multinational corporations strengthen the dominance of industrialized nations.

Many multinational corporations benefit from cheap labor, tax incentives, and natural resources in developing countries.

Profits earned by multinational corporations mainly benefit their home countries.

Multinational corporations often seek political stability to protect business interests.

Developing countries sometimes provide subsidies and incentives to attract multinational corporations.

Critics argue that multinational corporations exploit labor and natural resources.

Pakistan's textile and agricultural sectors have often been criticized for dependence on multinational corporations.

Global inequality is maintained through both economic dependency and multinational corporate influence.

20 Statement-Based MCQs

1. Modernization theory explains global stratification from a functionalist perspective.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Conflict perspective
- B) Functionalist perspective ✓
- C) Symbolic interactionist perspective
- D) Feminist perspective

Answer: B

2. Modernization theory emphasizes technology as the key to national development.

- A) Religion only
- B) Technology ✓
- C) Military power only
- D) Population growth

Answer: B

3. Early modernization theorists believed poverty mainly resulted from internal national deficiencies.

- A) External wars only
- B) Internal deficiencies ✓
- C) Climate change alone
- D) International tourism

Answer: B

4. Singapore is often cited as a successful example supporting modernization theory.

- A) Nepal
- B) Singapore ✓
- C) Afghanistan
- D) Somalia

Answer: B

5. In Pakistan, modernization theory has been used to justify foreign investment and infrastructure development.

- A) Privatization only
- B) Foreign investment and modernization projects ✓
- C) Military expansion only
- D) Agricultural decline

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

6. Dependency theory explains global inequality from a conflict perspective.

- A) Functionalist approach
- B) Conflict approach ✓
- C) Interactionist approach
- D) Postmodern approach

Answer: B

7. Dependency theory argues that wealthy nations keep poor countries economically dependent.

- A) Encourage equality only
- B) Maintain dependency relationships ✓
- C) Promote complete independence
- D) Avoid international trade

Answer: B

8. Trade dependency occurs when developing countries export cheap raw materials and import expensive finished goods.

- A) Equal trade
- B) Trade dependency ✓
- C) Free competition
- D) Domestic production

Answer: B

9. Investment dependency traps developing countries in cycles of debt.

- A) Tourism dependency
- B) Investment dependency ✓
- C) Educational dependency
- D) Cultural dependency

Answer: B

10. Dependency theory recommends major political and economic reforms to reduce global inequality.

- A) No reforms
- B) Radical reforms ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) More debt only
- D) Isolation

Answer: B

11. World System Theory was developed by Immanuel Wallerstein.

- A) Karl Marx
- B) Max Weber
- C) Immanuel Wallerstein ✓
- D) Emile Durkheim

Answer: C

12. According to World System Theory, core nations industrialized first and became wealthy.

- A) Periphery nations
- B) Core nations ✓
- C) External areas
- D) Semi-periphery only

Answer: B

13. Periphery nations mainly supply raw materials to core nations.

- A) High-technology products only
- B) Raw materials and agricultural products ✓
- C) Financial services only
- D) Military equipment

Answer: B

14. Global capitalism has increased economic interdependence among countries.

- A) Eliminated trade
- B) Increased global interdependence ✓
- C) Reduced communication
- D) Ended globalization

Answer: B

15. Neocolonialism refers to economic control of developing nations without direct political rule.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Direct military occupation
- B) Economic domination ✓
- C) Religious conversion
- D) Cultural isolation

Answer: B

16. Michael Harrington argued that neocolonialism replaced traditional colonialism after World War II.

- A) Karl Marx
- B) Michael Harrington ✓
- C) Max Weber
- D) Talcott Parsons

Answer: B

17. Heavy foreign debt reduces the ability of developing countries to invest in development.

- A) Increases national wealth
- B) Reduces development investment ✓
- C) Eliminates poverty immediately
- D) Improves political stability automatically

Answer: B

18. Multinational corporations operate across many national boundaries.

- A) Local businesses only
- B) Companies operating in many countries ✓
- C) Government agencies only
- D) Charitable organizations

Answer: B

19. Multinational corporations often seek low taxes and cheap labor in developing countries.

- A) High taxes only
- B) Low taxes and cheap labor ✓
- C) Political isolation
- D) Religious freedom only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

20. Critics argue that multinational corporations help maintain global inequality by exploiting labor and resources.

- A) They eliminate inequality completely.
- B) They exploit labor and resources. ✓
- C) They avoid international business.
- D) They only operate in developed countries.

Answer: B

Lesson-24: SOCIAL MOBILITY

IMPORTANT EXAM POINTS

Social mobility refers to the movement of individuals or groups from one social class or status to another.

Social mobility involves changes in income, education, occupation, and social status.

Social mobility may be upward, downward, or intergenerational.

A dynamic society generally experiences greater social mobility.

The three major types of social mobility are intergenerational mobility, structural mobility, and exchange mobility.

Intergenerational mobility refers to changes in social class between parents and their children.

Intragenerational mobility refers to changes in a person's social status during their own lifetime.

Upward social mobility occurs when individuals move to a higher social class.

Downward social mobility occurs when individuals move to a lower social class.

Education is one of the strongest factors promoting upward social mobility.

Hard work, ambition, and skills contribute to individual social mobility.

Structural mobility results from changes in society rather than individual efforts.

Technological advancement creates new employment opportunities and increases structural mobility.

Industrialization is a major cause of structural mobility.

Economic recessions often increase downward structural mobility.

Exchange mobility occurs when some people move up while others move down, leaving the class structure largely unchanged.

Exchange mobility does not significantly alter the overall distribution of social classes.

Structural changes in society affect large numbers of people simultaneously.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Early mobility studies mainly focused on sons and ignored daughters.

Feminist sociologists criticized early mobility studies for excluding women.

Modern sociological research includes women in studies of social mobility.

Family socialization strongly influences children's educational and occupational success.

Parents who encourage education increase their children's chances of upward mobility.

College education is an important pathway to entering the upper middle class.

Women's social mobility has increased with greater participation in education and employment.

In Pakistan, women's mobility is often limited by cultural and religious norms.

Marriage generally improves economic status and wealth accumulation.

Married couples often accumulate more wealth than single or divorced individuals.

Divorce usually lowers social and economic status, especially for women.

Structural mobility results from economic growth, political change, and technological development.

Status-attainment mobility depends on education, skills, achievement, family background, and social networks.

Individual mobility results mainly from personal effort, education, and achievements.

Merit-based societies provide greater opportunities for individual mobility.

Downward mobility may result from unemployment, illness, discrimination, or economic recession.

Downward mobility often reduces income, prestige, and quality of life.

Downward mobility may also increase psychological stress and mental health problems.

Pakistan experiences significant economic, political, and social inequalities.

Limited access to quality education restricts social mobility in Pakistan.

Income and wealth inequality reduce opportunities for upward mobility.

Gender, religion, and ethnic discrimination limit mobility for many Pakistanis.

Political instability and corruption are major barriers to social mobility in Pakistan.

Strong educational institutions and equal opportunities are essential for improving social mobility.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

20 Statement-Based MCQs

1. Social mobility refers to movement between different social classes or social positions.

- A) Population growth
- B) Movement between social classes ✓
- C) Cultural diffusion
- D) Urbanization

Answer: B

2. Social mobility may be upward, downward, or intergenerational.

- A) Horizontal only
- B) Upward, downward, or intergenerational ✓
- C) Political only
- D) Cultural only

Answer: B

3. The three major types of social mobility are intergenerational, structural, and exchange mobility.

- A) Cultural, political, and religious mobility
- B) Intergenerational, structural, and exchange mobility ✓
- C) Economic, cultural, and educational mobility
- D) Rural, urban, and industrial mobility

Answer: B

4. Intergenerational mobility compares the social class of children with that of their parents.

- A) Friends and neighbors
- B) Parents and children ✓
- C) Teachers and students
- D) Employers and workers

Answer: B

5. Upward social mobility occurs when a person moves to a higher social class.

- A) Lower social class
- B) Higher social class ✓
- C) Same occupation only
- D) Different city only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

6. Downward social mobility refers to movement from a higher to a lower social position.

- A) Lower to higher class
- B) Higher to lower class ✓
- C) Rural to urban migration
- D) Educational promotion

Answer: B

7. Structural mobility results mainly from changes in society rather than individual effort.

- A) Individual laziness only
- B) Changes in society ✓
- C) Personal hobbies
- D) Family traditions

Answer: B

8. Technological advancement is an important cause of structural mobility.

- A) Religious beliefs only
- B) Technological advancement ✓
- C) Climate change only
- D) Population decline

Answer: B

9. Exchange mobility occurs when upward and downward movements balance each other.

- A) Only upward movement
- B) Balanced upward and downward movement ✓
- C) Only downward movement
- D) No mobility

Answer: B

10. Feminist sociologists criticized early mobility studies for excluding women.

- A) Excluding children
- B) Excluding women ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Excluding workers
- D) Excluding employers

Answer: B

11. Modern research includes women when studying social mobility.

- A) Only men
- B) Women and men ✓
- C) Only children
- D) Only elderly people

Answer: B

12. Parents who encourage education improve their children's chances of upward mobility.

- A) Discouraging education
- B) Encouraging education ✓
- C) Preventing employment
- D) Limiting schooling

Answer: B

13. College education is one of the main paths to entering the upper middle class.

- A) Lottery tickets
- B) College education ✓
- C) Traveling abroad only
- D) Marriage only

Answer: B

14. Marriage generally improves wealth accumulation and social standing.

- A) Always reduces wealth
- B) Generally improves wealth accumulation ✓
- C) Has no effect
- D) Prevents employment

Answer: B

15. Divorce often reduces the social and economic status of women more than men.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Men only
- B) Women more than men ✓
- C) Children only
- D) Employers only

Answer: B

16. Status-attainment mobility depends on education, skills, achievement, and family background.

- A) Luck only
- B) Education, skills, and achievement ✓
- C) Religion only
- D) Physical appearance only

Answer: B

17. Individual mobility is mainly influenced by personal effort and achievement.

- A) Government policies only
- B) Personal effort and achievement ✓
- C) Weather conditions
- D) Geography only

Answer: B

18. Downward mobility may result from unemployment, illness, or economic recession.

- A) Increased income only
- B) Unemployment and recession ✓
- C) Higher education only
- D) Promotions only

Answer: B

19. Limited access to education is a major barrier to social mobility in Pakistan.

- A) Tourism only
- B) Limited educational opportunities ✓
- C) Sports participation
- D) Internet usage

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

Lesson-25: THE FAMILY: GLOBAL VARIETY – I

IMPORTANT EXAM POINTS

Family is one of the oldest and most important social institutions.

Earlier sociologists believed that the extended family was the dominant historical family form in Europe.

Research later showed that the nuclear family has long been the most common family type in Western Europe.

A nuclear family consists of parents and their dependent children.

Premodern families were only slightly larger than modern families because they often included servants.

Children in premodern societies commonly worked from the age of seven or eight.

Industrialization and urbanization encouraged the growth of smaller nuclear families.

Patriarchy was the dominant authority pattern in most historical societies.

Marriage and child-rearing were strongly influenced by religion and culture.

High infant mortality and deaths during childbirth often disrupted family life in the past.

Modern family life is characterized by later marriages and declining marriage rates.

Divorce and cohabitation have become increasingly common in many societies.

Single-parent, blended, and same-sex families are becoming more common worldwide.

Women's education and employment have transformed traditional family roles.

Advances in reproductive technology have changed family planning and childbearing.

The COVID-19 pandemic significantly affected family relationships, employment, and childcare.

Family patterns vary widely across different societies and cultures.

Western culture has influenced family systems in many developing countries.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Urbanization weakens traditional kinship systems and extended family structures.

Migration from rural to urban areas changes traditional family relationships.

Government policies such as family planning influence family size.

Family diversity reflects social, cultural, economic, and historical differences.

Industrial societies generally have smaller and less connected families.

Developing societies often have larger kinship networks.

Family diversity can be understood through descent, family, marriage, and residence patterns.

Consanguineal kin are relatives connected by blood.

Affinal kin are relatives connected through marriage.

Adopted kin become family through legal adoption.

Fictive kin become family through friendship or special social or religious relationships.

Bilineal descent traces ancestry through both the father and the mother.

Patrilineal descent traces family lineage through the father's side only.

Matrilineal descent traces family lineage through the mother's side only.

Pakistan mainly follows the patrilineal descent system.

The nuclear family emphasizes the relationship between husband, wife, and children.

The extended family includes two or more related families living together.

A vertical extended family consists of three or more generations living together.

A joint family consists of siblings, their spouses, and their children living together.

Kinship groups provide economic, emotional, and social support.

The incest taboo prohibits marriage between close relatives.

Exogamy requires individuals to marry outside their own social group.

Endogamy requires individuals to marry within their own social, ethnic, religious, or class group.

Monogamy is the marriage of one man and one woman.

Serial monogamy means having several spouses during a lifetime, but only one at a time.

Polygamy is marriage involving multiple spouses.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Polyandry is the marriage of one woman to multiple men.

Polygyny is the marriage of one man to multiple women.

Polygyny is the most common form of polygamy worldwide.

Arranged marriages remain common in many parts of Pakistan.

Love marriages are increasing in urban and educated populations.

Divorce rates in Pakistan remain relatively low but are gradually increasing.

Neolocal residence means a married couple establishes an independent home.

Patrilocal residence means the couple lives with or near the husband's family.

Matrilocal residence means the couple lives with or near the wife's family.

Patriarchal authority gives decision-making power primarily to men.

Egalitarian authority allows husbands and wives to share family decisions equally.

Pakistan generally follows patrilocal residence and patriarchal authority.

Urbanization and education are encouraging more egalitarian family structures in Pakistan.

20 Statement-Based MCQs

1. A nuclear family consists of parents and their dependent children.

- A) Grandparents only
- B) Parents and dependent children ✓
- C) Cousins only
- D) Uncles and aunts

Answer: B

2. Industrialization encouraged the growth of smaller nuclear families.

- A) Extended families only
- B) Smaller nuclear families ✓
- C) Tribal families only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

D) Joint families only

Answer: B

3. Patriarchy refers to a family system in which men hold most authority.

A) Children rule the family

B) Women hold all authority

C) Men hold most authority ✓

D) Authority is absent

Answer: C

4. Consanguineal kin are relatives connected through blood relationships.

A) Marriage only

B) Friendship only

C) Blood relationships ✓

D) Business relations

Answer: C

5. Affinal kin are relatives connected through marriage.

A) Blood

B) Marriage ✓

C) Adoption only

D) Employment

Answer: B

6. Bilineal descent traces ancestry through both parents.

A) Father only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- B) Mother only
- C) Both father and mother ✓
- D) Grandparents only

Answer: C

7. Pakistan mainly follows the patrilineal descent system.

- A) Bilineal
- B) Patrilineal ✓
- C) Matrilineal
- D) Ambilineal

Answer: B

8. An extended family consists of two or more related families living together.

- A) One individual only
- B) Parents only
- C) Two or more related families ✓
- D) Friends only

Answer: C

9. The incest taboo prohibits marriage between close relatives.

- A) Friends
- B) Close relatives ✓
- C) Neighbors
- D) Colleagues

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

10. Exogamy requires individuals to marry outside their social group.

- A) Within the same group
- B) Outside their social group ✓
- C) Only cousins
- D) Only neighbors

Answer: B

- A) Outside the group
- B) Within the group ✓
- C) Outside the country
- D) Among strangers

Answer: B

12. Monogamy refers to the marriage of one man and one woman.

- A) One man and one woman ✓
- B) One woman and many men
- C) One man and many women only
- D) Many spouses

Answer: A

13. Polyandry means one woman is married to multiple men.

- A) One man with many wives
- B) One woman with many husbands ✓
- C) One husband only
- D) Two couples together

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

14. Polygyny means one man is married to multiple women.

- A) One woman and many husbands
- B) One man and many wives ✓
- C) One husband only
- D) One wife only

Answer: B

15. Neolocal residence means a married couple establishes an independent household.

- A) Lives with parents
- B) Independent household ✓
- C) Lives with grandparents
- D) Lives with relatives

Answer: B

16. Patrilocal residence requires a couple to live with or near the husband's family.

- A) Wife's family
- B) Husband's family ✓
- C) Friends
- D) Employer

Answer: B

17. Patriarchal authority gives decision-making power mainly to men.

- A) Women only
- B) Children only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

C) Men ✓

D) Grandchildren

Answer: C

18. Egalitarian authority means husbands and wives share decision-making equally.

A) Husband alone

B) Wife alone

C) Equal decision-making ✓

D) Grandparents only

Answer: C

19. Urbanization has encouraged more egalitarian family structures in Pakistan.

A) Tribal authority

B) Egalitarian family structures ✓

C) Feudal authority

D) Monarchy

Answer: B

20. Arranged marriages are still common in many parts of Pakistan.

A) Completely disappeared

B) Still common ✓

C) Illegal everywhere

D) Found only in Europe

Answer: B

Lesson-26: THE FAMILY: GLOBAL VARIETY – II

IMPORTANT EXAM POINTS

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Divorce is the legal dissolution of marriage and is increasing in many societies, including Pakistan.

Divorce rates are higher in urban and educated families compared to rural areas.

Changing cultural values have contributed to the rise in divorce.

Women's economic independence has increased divorce rates.

Greater legal awareness and access to courts have made divorce more common.

Divorce in Pakistan is regulated under Islamic law.

Divorced women in Pakistan often face social stigma and difficulties in remarriage.

Single-parent families consist of one parent raising one or more children.

Historically, most single-parent families resulted from the death of a spouse.

Today, divorce and separation are the leading causes of single-parent families.

Some single-parent families are formed by unmarried mothers or fathers choosing to raise children independently.

Single-parent families are more common among economically disadvantaged groups.

Children from single-parent families are more likely to experience behavioral, educational, emotional, and health problems.

Poverty is one of the greatest challenges faced by single-parent families.

Extended family support plays an important role in assisting single-parent families in Pakistan.

A blended family is formed when at least one spouse has children from a previous relationship.

Blended families require patience, flexibility, and cooperation among all family members.

Stepparents often face uncertainty regarding their new family roles.

Children in blended families usually maintain emotional ties with their biological parents.

Strong family support helps blended families adjust successfully.

Blended families are becoming more common in urban Pakistan due to increasing divorce and remarriage.

Some communities still attach social stigma to blended families.

Same-sex families consist of same-sex couples raising children.

Same-sex marriages and families are legally recognized in many Western countries.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Same-sex relationships and marriages are not legally recognized in Pakistan according to Islamic ideology.

The acceptance of same-sex families differs greatly across cultures and societies.

Balancing work and family responsibilities has become a major challenge for modern families.

The increasing participation of women in the labor force has changed traditional family roles.

Working women often perform both professional work and most household responsibilities.

Women generally spend more time on childcare and housework than men.

The unequal distribution of domestic work creates stress and health problems for many women.

Men's participation in childcare has increased but remains lower than women's.

Limited childcare facilities make work-family balance more difficult in Pakistan.

Caring for elderly family members also increases family responsibilities.

Domestic violence includes spousal abuse, child abuse, and elder abuse.

Domestic violence is one of the most serious human rights issues worldwide.

Violence against women often includes physical, emotional, sexual, and psychological abuse.

Domestic violence has more severe psychological effects on women than men.

Domestic violence is illegal in Pakistan.

Many victims of domestic violence hesitate to seek help because of social stigma.

Legal reforms and awareness campaigns are essential to reduce domestic violence.

Child abuse includes physical violence, neglect, and emotional abuse.

Public awareness, shelters, counseling services, and stricter laws help reduce family violence.

Family stability improves when members share responsibilities, communicate effectively, and respect one another.

20 Statement-Based MCQs

1. Divorce is the legal dissolution of marriage.

- A) Adoption process
- B) Legal dissolution of marriage ✓
- C) Child custody only
- D) Family reunion

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

2. Divorce rates in Pakistan are increasing mainly in urban and educated families.

- A) Rural tribal families only
- B) Urban and educated families ✓
- C) Only agricultural families

Answer: B

3. Women's economic independence has contributed to rising divorce rates.

- A) Reduced education
- B) Women's economic independence ✓
- C) Population decline
- D) Climate change

Answer: B

4. Single-parent families consist of one parent raising children.

- A) Four generations together
- B) One parent raising children ✓
- C) Two unrelated adults
- D) Joint family only

Answer: B

5. Today, most single-parent families result from divorce and separation.

- A) Migration only
- B) Divorce and separation ✓
- C) Adoption only
- D) Employment abroad

Answer: B

6. Poverty is a major challenge faced by many single-parent families.

- A) Tourism
- B) Poverty ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Technology
- D) Sports

Answer: B

7. A blended family includes at least one stepparent.

- A) Only grandparents
- B) At least one stepparent ✓
- C) Only cousins
- D) Foster children only

Answer: B

8. Successful blended families require patience and flexibility.

- A) Strict punishment only
- B) Patience and flexibility ✓
- C) Isolation
- D) Competition

Answer: B

9. Same-sex families consist of couples of the same sex raising children.

- A) Cousins living together
- B) Same-sex couples raising children ✓
- C) Single-parent households only
- D) Joint families only

Answer: B

10. Same-sex marriages are not legally recognized in Pakistan.

- A) Fully recognized
- B) Not legally recognized ✓
- C) Mandatory by law
- D) Encouraged by government

Answer: B

11. Balancing work and family has become a major issue for modern families.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Farming only
- B) Work-family balance ✓
- C) Population census
- D) International trade

Answer: B

12. Working women usually perform a larger share of household responsibilities than men.

- A) Men only
- B) Women generally perform more household work ✓
- C) Children only
- D) Grandparents only

Answer: B

13. Limited childcare services make work-family balance difficult in Pakistan.

- A) Better transport
- B) Limited childcare services ✓
- C) More universities
- D) Better roads

Answer: B

14. Domestic violence includes spousal, child, and elder abuse.

- A) Financial planning only
- B) Spousal, child, and elder abuse ✓
- C) Education only
- D) Recreation only

Answer: B

15. Domestic violence is illegal in Pakistan.

- A) Legal everywhere
- B) Illegal in Pakistan ✓
- C) Encouraged by law
- D) Optional under law

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

16. Many victims of domestic violence do not seek help because of social stigma.

- A) Social stigma ✓
- B) Higher salaries
- C) Better education
- D) Urbanization

Answer: A

- A) Education only
- B) Physical, emotional abuse, and neglect ✓
- C) Sports activities
- D) Cultural festivals

Answer: B

18. Public awareness and stronger laws help reduce domestic violence.

- A) Ignoring violence
- B) Awareness and stronger laws ✓
- C) Higher taxes
- D) Migration

Answer: B

19. Extended family members often support single-parent families in Pakistan.

- A) Neighbors only
- B) Extended family members ✓
- C) Employers only
- D) Schools only

Answer: B

20. Sharing family responsibilities improves family stability and reduces stress.

- A) Ignoring responsibilities
- B) Sharing responsibilities ✓
- C) Avoiding communication
- D) Living separately only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Lesson-27: FUNCTIONS OF FAMILY

IMPORTANT EXAM POINTS

The family is a universal social institution found in every society.

Reproduction refers to the process of producing new members of society.

Union formation refers to the establishment of socially accepted relationships such as marriage.

Societies establish norms and rules to regulate reproduction and marriage.

Religion, culture, ethnicity, and social class influence union formation.

In Pakistan, arranged marriages remain common in many communities.

Parents usually play a major role in selecting marriage partners in Pakistan.

Economic factors such as education and employment influence marriage decisions.

Many individuals delay marriage to complete education or establish careers.

Mate selection is the process of choosing a life or marriage partner.

Mate selection is influenced by physical attractiveness, personality, education, and socioeconomic status.

Religion, caste, family background, and social status are important factors in mate selection in Pakistan.

Family and community expectations strongly influence partner selection in traditional societies.

Online matchmaking and dating services have expanded opportunities for mate selection.

Arranged marriages involve parents or relatives selecting marriage partners.

Arranged marriages are common in Pakistan and many Asian societies.

Arranged marriages aim to ensure compatibility and strengthen family relationships.

Dowry or gift exchange may be part of arranged marriages in Pakistan.

Many arranged marriages result in stable and satisfying relationships.

Childcare refers to meeting the physical, emotional, and social needs of children.

Child rearing involves educating, socializing, and developing children's personalities.

Mothers usually perform the primary childcare role in Pakistan.

Fathers and extended family members also contribute to child rearing.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Grandparents, aunts, and uncles often provide childcare support in extended families.

Religious and cultural values shape child-rearing practices in Pakistan.

Increasing employment of women has increased the use of childcare centers and early childhood education.

According to functionalists, the family is the foundation of social order.

The family performs essential functions necessary for the survival of society.

The family regulates sexual behavior through socially accepted marriage norms.

The family reproduces new members and ensures population continuity.

The family socializes children and teaches cultural values, beliefs, and social norms.

The family provides emotional support, love, security, and a sense of belonging.

The family cares for children, the elderly, and sick family members.

The family provides individuals with ascribed status such as social class, race, and ethnicity.

Economic production is one of the traditional functions of the family.

Recreation and emotional companionship are important family functions.

The incest taboo prohibits marriage and sexual relations between close relatives.

The incest taboo prevents role confusion within families.

Exogamy encourages individuals to marry outside their own family or kin group.

Exogamy strengthens relationships between different families and communities.

In Pakistan, the family is regarded as the basic unit of society.

Extended families play an important role in maintaining cultural traditions and providing financial support.

Changing economic conditions are reducing some traditional family functions.

Functionalists believe family structures that promote stability benefit society.

Functionalists describe unstable family patterns as dysfunctional.

The nuclear family may experience emotional stress because of limited social support.

Isolation of nuclear families increases vulnerability to family conflict and abuse.

The functionalist perspective emphasizes family stability but often ignores inequalities within families.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Gender inequality and power imbalances may not be fully explained by the functionalist perspective.

20 Statement-Based MCQs

1. The family is considered a universal social institution.

- A) Temporary organization
- B) Universal social institution ✓
- C) Political party
- D) Religious movement

Answer: B

2. Reproduction ensures the continuation of society by producing new members.

- A) Migration only
- B) Producing new members ✓
- C) Urbanization only
- D) Industrialization only

Answer: B

3. Union formation refers to socially accepted relationships such as marriage.

- A) Business partnerships
- B) Marriage and family formation ✓
- C) Political alliances
- D) Trade unions

Answer: B

4. In Pakistan, parents usually play a major role in mate selection.

- A) Government officials
- B) Parents and families ✓
- C) Teachers only
- D) Employers only

Answer: B

5. Mate selection is influenced by education, personality, and socioeconomic status.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Weather conditions
- B) Education and personality ✓
- C) Climate only
- D) Population growth

Answer: B

6. Arranged marriages involve parents or relatives selecting marriage partners.

- A) Court marriages only
- B) Parents or relatives selecting partners ✓
- C) Online registration only
- D) Friendship groups only

Answer: B

7. Arranged marriages often aim to strengthen family relationships.

- A) Increase conflicts
- B) Strengthen family relationships ✓
- C) End family ties
- D) Promote migration

Answer: B

8. Child rearing includes the socialization and development of children.

- A) Political campaigning
- B) Socialization and development ✓
- C) Business management
- D) Tourism

Answer: B

9. In Pakistan, mothers usually perform the primary childcare role.

- A) Teachers only
- B) Mothers ✓
- C) Employers only
- D) Government officials

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

10. Extended family members often assist in childcare in Pakistan.

- A) Strangers only
- B) Grandparents and relatives ✓
- C) Police officers
- D) Employers

Answer: B

11. Functionalists consider the family the foundation of social order.

- A) Source of conflict only
- B) Foundation of social order ✓
- C) Economic institution only
- D) Political organization

Answer: B

12. One major function of the family is the socialization of children.

- A) Importing goods
- B) Socialization of children ✓
- C) Conducting elections
- D) Manufacturing products

Answer: B

13. The family regulates sexual behavior through marriage norms.

- A) Education policies
- B) Marriage norms ✓
- C) Trade laws
- D) Voting systems

Answer: B

14. The family provides emotional support and a sense of belonging.

- A) Financial penalties
- B) Emotional support ✓
- C) Political power only
- D) Military protection

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

15. The incest taboo prohibits marriage and sexual relations between close relatives.

- A) Encourages marriage between relatives
- B) Prohibits marriage between close relatives ✓
- C) Promotes divorce
- D) Supports polygamy only

Answer: B

16. Exogamy requires individuals to marry outside their own family or social group.

- A) Marry close relatives only
- B) Marry outside their own group ✓
- C) Never marry
- D) Live alone permanently

Answer: B

17. Functionalists describe unstable family patterns as dysfunctional.

- A) Functional only
- B) Dysfunctional ✓
- C) Religious
- D) Traditional only

Answer: B

18. The nuclear family may experience greater emotional stress due to limited social support.

- A) Unlimited support
- B) Limited social support ✓
- C) Higher income only
- D) Better transportation

Answer: B

19. Extended families provide financial and emotional support in Pakistan.

- A) No family support
- B) Financial and emotional support ✓
- C) Political campaigns only
- D) Industrial production only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

20. The functionalist perspective often overlooks gender inequality within families.

- A) Explains all inequalities completely
- B) Often overlooks gender inequality ✓
- C) Rejects the family completely
- D) Supports family conflict only

Answer: B

Lesson-28: FAMILY AND MARRIAGE IN TRANSITION

IMPORTANT EXAM POINTS

Marriage is a social institution that establishes a legal and/or religious union between two individuals.

Marriage is usually marked by a wedding ceremony that gives the couple a new public status.

Marriage rules differ across cultures and include monogamy, polygamy, arranged marriages, and same-sex marriages.

Arranged marriage is the most common form of marriage in Pakistan.

Marriage may also strengthen family alliances and preserve social status.

A family is a social institution based on blood, marriage, or adoption.

The major forms of family are nuclear family, extended family, and single-parent family.

Extended family is the dominant family pattern in Pakistan.

Marriage is generally viewed as the beginning of a new family and continuation of the family line.

The conflict perspective explains that conflict is a normal part of marriage because couples have different interests and expectations.

Power imbalance between husbands and wives is a major source of marital conflict.

Traditionally, husbands have held greater authority than wives in family decision-making.

In Pakistan, men generally have greater decision-making power within the family.

Some modern Pakistani couples are promoting greater equality between husbands and wives.

Divorce may legally end a marriage but conflicts over finances and children may continue.

The symbolic interactionist perspective explains society through everyday interactions and shared meanings.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Gender roles are created and reinforced through daily social interactions.

In Pakistan, women are generally expected to perform most housework and childcare.

Men are traditionally expected to act as the family's breadwinner.

Housework and childcare were historically considered women's responsibilities.

Women's participation in paid employment has increased significantly over time.

As women entered the workforce, men gradually increased their participation in housework and childcare.

Technology such as washing machines, microwaves, dishwashers, and dryers has reduced household work.

Fast-food culture and modern appliances have saved families considerable time.

Parents now spend more time with children by reducing time spent on housework and social activities.

The gendered division of labor means husbands mainly earn income while wives mainly manage the home and children.

Modern families are gradually moving toward greater gender equality.

The transformation of the family reflects changing gender roles, education, employment, and technology.

The rise of the middle class in Pakistan has changed family expectations and relationships.

Family transformation increases individual freedom but may also increase social isolation.

Sociologists study family transformation to understand changes in society.

Remarriage is the act of marrying again after divorce or the death of a spouse.

Stepfamilies are formed when one or both spouses bring children from previous marriages.

Stepfamilies often face adjustment problems, loyalty conflicts, jealousy, and unclear family roles.

Remarriages involving children have a higher chance of divorce than first marriages.

Women with children and lower education are generally more likely to remarry.

Men are generally more likely to remarry than women.

Marriage continues to exist because it fulfills important social and personal functions.

Future family trends include increasing cohabitation, later marriages, births to single mothers, and greater involvement of grandparents in childcare.

Working wives are expected to continue gaining greater influence in family decision-making.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Child custody laws determine the legal care and responsibility of children after divorce or separation.

In Pakistan, child custody laws are mainly based on Islamic law.

Islamic law generally gives preference to the mother for custody of young children.

Child custody disputes often create emotional, financial, and psychological stress.

Modern custody laws increasingly emphasize the best interests of the child.

Child custody laws highlight broader issues such as gender equality and children's rights.

There is a growing need for child-centered and flexible custody laws in Pakistan.

Marriage and family remain among the most important institutions studied in sociology.

20 Statement-Based MCQs

1. Marriage is a social institution that establishes a legal or religious union between two individuals.

- A) Business contract
- B) Legal or religious union ✓
- C) Friendship agreement
- D) Political alliance

Answer: B

2. Arranged marriage remains the most common form of marriage in Pakistan.

- A) Love marriage only
- B) Arranged marriage ✓
- C) Group marriage
- D) Civil partnership

Answer: B

3. Extended families are the most common family structure in Pakistan.

- A) Nuclear families
- B) Extended families ✓
- C) Foster families
- D) Same-sex families

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

4. The conflict perspective views power differences as a major source of marital conflict.

- A) Climate change
- B) Power differences ✓
- C) Population growth
- D) Urbanization

Answer: B

5. Divorce may legally end marriage but disputes over finances and children often continue.

- A) Education only
- B) Finances and children ✓
- C) Employment only
- D) Travel plans

Answer: B

6. The symbolic interactionist perspective focuses on everyday interactions and shared meanings.

- A) Government policies
- B) Everyday interactions ✓
- C) Economic production
- D) Population studies

Answer: B

7. In Pakistan, women are traditionally expected to perform most housework and childcare.

- A) Men only
- B) Women ✓
- C) Children only
- D) Grandparents only

Answer: B

8. Men are traditionally expected to be the primary breadwinners of the family.

- A) Homemakers
- B) Breadwinners ✓
- C) Caregivers only
- D) Teachers only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

9. Modern technology has reduced the time required for household work.

- A) Increased housework
- B) Reduced housework time ✓
- C) Eliminated childcare
- D) Increased poverty

Answer: B

10. The gendered division of labor assigns earning mainly to husbands and domestic work mainly to wives.

- A) Equal work always
- B) Gendered division of labor ✓
- C) Child labor
- D) Seasonal labor

Answer: B

11. Family transformation reflects changing gender roles, education, and employment patterns.

- A) Weather changes
- B) Social and economic changes ✓
- C) Military policies
- D) Tourism growth

Answer: B

12. Remarriage means marrying again after the end of a previous marriage.

- A) First marriage only
- B) Marrying again ✓
- C) Engagement only
- D) Dating only

Answer: B

13. Stepfamilies are formed when spouses bring children from previous marriages.

- A) Adoption only
- B) Previous marriages ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Migration only
- D) Friendship only

Answer: B

14. Remarriages involving children have a higher risk of divorce than first marriages.

- A) Lower risk
- B) Higher risk ✓
- C) No risk
- D) Equal risk in all cases

Answer: B

15. Men are generally more likely to remarry than women.

- A) Women only
- B) Men ✓
- C) Both equally everywhere
- D) Neither

Answer: B

16. Marriage continues to exist because it performs important social functions.

- A) Entertainment only
- B) Important social functions ✓
- C) Political competition
- D) Sports activities

Answer: B

17. Future family trends include later marriages and increasing cohabitation.

- A) Earlier marriages only
- B) Later marriages and cohabitation ✓
- C) Declining education
- D) Larger joint families only

Answer: B

18. Child custody laws determine who receives legal care of children after separation or divorce.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) School admission
- B) Legal care of children ✓
- C) Property ownership only
- D) Employment rights

Answer: B

19. In Pakistan, child custody laws are mainly based on Islamic law.

- A) Roman law
- B) Islamic law ✓
- C) International law only
- D) Tribal law only

Answer: B

20. Modern custody laws increasingly emphasize the best interests of the child.

- A) Parents' income only
- B) Best interests of the child ✓
- C) Political influence
- D) Community opinion only

Answer: B

Lesson-29: HEALTH AND MEDICINE-I

IMPORTANT EXAM POINTS

Health consists of four major components: physical, mental, social, and spiritual health.

The World Health Organization initially emphasized physical, mental, and social health as the main components of health.

Health and illness are socially and culturally defined concepts rather than purely biological conditions.

Different cultures define health and illness differently based on their beliefs and values.

Sociology studies how social factors influence health, illness, healthcare systems, and medical practices.

Medicine is a social institution that provides organized ways of dealing with illness and injury.

Medical sociology studies the relationship between society, health, illness, and healthcare.

Medical sociologists examine how culture, social class, lifestyle, and inequality affect health.

Sociologists contribute to healthcare policy by identifying social inequalities in health outcomes.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

In Pakistan, access to healthcare is influenced by income, education, gender, and social class.

Healthcare research in Pakistan focuses on maternal health, child health, infectious diseases, and mental health.

The symbolic interactionist perspective explains that health and illness gain meaning through social interaction.

People interpret sickness according to cultural beliefs and social expectations.

Behaviors considered mentally ill in one society may be respected in another culture.

Shamans are traditional healers who diagnose and treat illnesses through spiritual practices.

Traditional medicines and cultural remedies continue to influence healthcare practices in Pakistan.

Communication between doctors and patients is shaped by cultural beliefs and symbolic interaction.

The functionalist perspective views health as essential for the smooth functioning of society.

Healthy individuals are expected to perform their normal social roles and responsibilities.

Healthcare systems help maintain social order by controlling illness and restoring health.

Talcott Parsons introduced the concept of the sick role.

The sick role has four main elements.

A sick person is not held responsible for becoming ill.

A sick person is temporarily exempt from normal social responsibilities.

A sick person is expected to want recovery rather than remain ill.

A sick person should seek competent medical treatment and cooperate with healthcare providers.

People who refuse proper treatment may lose the social privileges associated with the sick role.

Women generally seek medical care more frequently than men.

Men often avoid claiming the sick role because of cultural expectations of toughness.

The sick role helps society maintain stability by regulating illness and recovery.

The conflict perspective emphasizes inequality in the distribution of healthcare resources.

Healthcare is considered a scarce resource that is unequally distributed across societies.

Economic and political power strongly influence healthcare policies and access to medical services.

Global stratification creates major differences in healthcare quality between rich and poor nations.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Industrialized countries have access to advanced medical technologies and specialized treatment.

Least industrialized countries often lack basic healthcare services and modern medical facilities.

Life expectancy is generally higher in developed countries than in developing countries.

Infant mortality rates are usually lower in industrialized nations.

Poor countries experience higher rates of malaria, diarrhea, malnutrition, and parasitic diseases.

Heart disease and cancer are more common in industrialized societies because people live longer.

Industrialization improves healthcare, nutrition, sanitation, and overall life expectancy.

Within poor countries, wealthy elites often receive advanced healthcare while poor populations lack basic services.

Public health improvements such as clean water, better nutrition, and disease prevention greatly reduce mortality.

Social inequality remains one of the strongest determinants of health worldwide.

Healthcare inequality in Pakistan continues to affect health outcomes across different social groups.

Strong public health policies and equal access to healthcare are essential for improving national health outcomes.

20 Statement-Based MCQs

1. Health consists of physical, mental, social, and spiritual components.

- A) Physical only
- B) Physical, mental, social, and spiritual ✓
- C) Mental only
- D) Emotional only

Answer: B

2. Health and illness are defined differently across cultures.

- A) They are identical worldwide
- B) They vary according to culture ✓
- C) They depend only on biology
- D) They never change

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

3. Medical sociology studies the relationship between society and health.

- A) Astronomy and health
- B) Society and health ✓
- C) Geography and climate
- D) Politics only

Answer: B

4. In Pakistan, access to healthcare is influenced by income, education, and gender.

- A) Weather only
- B) Income, education, and gender ✓
- C) Language only
- D) Climate only

Answer: B

5. The symbolic interactionist perspective explains health through social meanings and interactions.

- A) Economic production
- B) Social meanings and interactions ✓
- C) Military power
- D) Industrial output

Answer: B

6. Shamans are traditional healers in many tribal societies.

- A) Farmers
- B) Traditional healers ✓
- C) Engineers
- D) Politicians

Answer: B

7. Talcott Parsons introduced the concept of the sick role.

- A) Karl Marx
- B) Talcott Parsons ✓
- C) Max Weber
- D) Emile Durkheim

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

8. One element of the sick role is that the sick person is not blamed for becoming ill.

- A) Responsible for illness
- B) Not blamed for illness ✓
- C) Punished immediately
- D) Denied treatment

Answer: B

9. A sick person is expected to seek competent medical treatment.

- A) Ignore treatment
- B) Seek competent medical help ✓
- C) Refuse healthcare
- D) Avoid doctors forever

Answer: B

10. Women generally visit doctors more frequently than men.

- A) Men only
- B) Women ✓
- C) Children only
- D) Elderly men only

Answer: B

11. Men often avoid the sick role because of cultural expectations of toughness.

- A) Fashion trends
- B) Cultural expectations of toughness ✓
- C) Climate change
- D) Government policies

Answer: B

12. The sick role helps maintain social order in society.

- A) Creates unemployment
- B) Maintains social order ✓
- C) Reduces education
- D) Increases crime

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

13. The conflict perspective views healthcare as a scarce resource.

- A) Unlimited resource
- B) Scarce resource ✓
- C) Religious institution only
- D) Cultural festival

Answer: B

14. Global stratification creates unequal access to healthcare.

- A) Equal healthcare everywhere
- B) Unequal healthcare access ✓
- C) Equal income only
- D) Equal education only

Answer: B

15. Industrialized countries generally have more advanced medical technology.

- A) Less technology
- B) Advanced medical technology ✓
- C) No hospitals
- D) No doctors

Answer: B

16. Malaria and malnutrition are more common in least industrialized nations.

- A) Industrialized countries only
- B) Least industrialized nations ✓
- C) Wealthy communities only
- D) Urban centers only

Answer: B

17. Life expectancy is generally higher in developed countries.

- A) Developed countries ✓
- B) Least developed countries only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Rural villages only
- D) None of these

Answer: A

18. Public health measures like clean water reduce disease and mortality.

- A) Increase disease
- B) Reduce disease and mortality ✓
- C) Cause epidemics
- D) Reduce education only

Answer: B

19. Healthcare inequality is strongly linked to social inequality.

- A) Climate change only
- B) Social inequality ✓
- C) Tourism only
- D) Sports activities

Answer: B

20. Equal access to healthcare is essential for improving national health outcomes.

- A) Equal healthcare access ✓
- B) Political conflict
- C) Religious disputes
- D) Population growth only

Answer: A

Lesson-30: HEALTH AND MEDICINE-II

IMPORTANT EXAM POINTS

Medicalization is the process of defining social or behavioral problems as medical problems requiring treatment.

Medicalization expands the role of medicine beyond traditional diseases into everyday social and personal issues.

Pharmaceutical companies, medical professionals, and societal expectations contribute to medicalization.

Medicalization can lead to the development of new medical treatments and therapies.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Medicalization may also result in overdiagnosis, overtreatment, and unnecessary dependence on medical care.

Conditions such as wrinkles, acne, baldness, obesity, and cosmetic concerns have become medicalized.

Childbirth and female reproductive health have increasingly become medical matters.

Some behaviors previously viewed as moral or social issues are now treated as medical conditions.

The symbolic interactionist perspective argues that medicalization depends on how society defines health problems.

Functionalists believe medicalization strengthens the medical system by expanding its role in society.

Conflict theorists argue that medicalization increases the power, influence, and profits of the medical profession.

Medicalization of society has increased the demand for healthcare services worldwide.

Medically assisted suicide remains one of the most controversial issues in modern medicine.

Supporters of medically assisted suicide believe it reduces suffering and preserves dignity.

Opponents argue that medically assisted suicide raises serious ethical and legal concerns.

Epidemiology is the study of the distribution and causes of health and disease in populations.

Social epidemiology examines how social conditions affect health outcomes.

Age is one of the most important social factors influencing health and disease.

Life expectancy is the average number of years a person is expected to live.

Medical technology, improved nutrition, and better living standards have increased life expectancy.

Older adults are more likely to experience chronic diseases such as heart disease, arthritis, hypertension, Alzheimer's disease, and cancer.

Certain diseases occur mainly during specific stages of life, such as childhood or old age.

Sex and gender influence patterns of illness, disease, and life expectancy.

Women generally live longer than men.

Women are more likely than men to seek medical care and preventive treatment.

Men experience higher mortality, while women experience higher morbidity.

Race and ethnicity influence health outcomes and life expectancy.

Minority populations often experience higher rates of illness, infant mortality, and preventable diseases.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Socioeconomic status is one of the strongest predictors of health.

People with higher income and education generally enjoy better health and longer life expectancy.

Poverty limits access to healthcare, nutrition, sanitation, and healthy living conditions.

Social class significantly affects health outcomes in Pakistan.

Poor and marginalized communities in Pakistan experience higher rates of infectious diseases.

Holistic medicine emphasizes prevention, healthy lifestyles, and personal responsibility for health.

Holistic healthcare includes proper nutrition, exercise, meditation, relaxation, and preventive care.

Alternative medicine includes acupuncture, herbal medicine, meditation, and spiritual healing.

Alternative medicine was once widely considered quackery due to limited scientific evidence.

Scientific research has increased the acceptance of many alternative therapies.

Integrative healthcare combines conventional medicine with evidence-based alternative therapies.

Integrative medicine focuses on patient-centered and comprehensive healthcare.

Scientific evidence should always be used to evaluate the safety and effectiveness of alternative treatments.

The future of healthcare is expected to involve greater integration of conventional and alternative medicine.

20 Statement-Based MCQs

1. Medicalization refers to defining social problems as medical problems.

- A) Political reform
- B) Defining social problems as medical problems ✓
- C) Industrialization
- D) Urbanization

Answer: B

2. Medicalization expands the role of medicine into social and behavioral issues.

- A) Agricultural issues only
- B) Social and behavioral issues ✓
- C) Military affairs
- D) Sports activities

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

3. One negative consequence of medicalization is overdiagnosis.

- A) Better education
- B) Overdiagnosis ✓
- C) Increased tourism
- D) Reduced technology

Answer: B

4. Symbolic interactionists believe medicalization depends on social definitions.

- A) Climate change
- B) Social definitions ✓
- C) Geography only
- D) Genetics only

Answer: B

5. Conflict theorists argue that medicalization increases the power of the medical profession.

- A) Weakens doctors
- B) Increases medical power and profits ✓
- C) Reduces hospitals
- D) Eliminates healthcare

Answer: B

6. Epidemiology studies the distribution of health and disease in populations.

- A) Animal behavior
- B) Distribution of health and disease ✓
- C) Economic growth
- D) Political systems

Answer: B

7. Life expectancy means the average number of years a person is expected to live.

- A) School years only
- B) Average expected lifespan ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Working years only
- D) Retirement age only

Answer: B

8. Older adults are more likely to develop chronic diseases.

- A) Teenagers only
- B) Older adults ✓
- C) Infants only
- D) Athletes only

Answer: B

9. Women generally have a longer life expectancy than men.

- A) Men only
- B) Women ✓
- C) Both are exactly equal
- D) Children only

Answer: B

10. Women are more likely than men to seek medical treatment.

- A) Men only
- B) Women ✓
- C) Children only
- D) Elderly men only

Answer: B

11. Socioeconomic status strongly affects health outcomes.

- A) Weather only
- B) Socioeconomic status ✓
- C) Language only
- D) Festivals only

Answer: B

12. Poverty reduces access to quality healthcare.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Improves healthcare
- B) Reduces access to healthcare ✓
- C) Eliminates diseases
- D) Increases life expectancy automatically

Answer: B

13. Poor communities often experience higher rates of infectious diseases.

- A) Wealthy communities only
- B) Poor communities ✓
- C) Tourists only
- D) University students only

Answer: B

14. Holistic medicine emphasizes prevention and healthy lifestyles.

- A) Surgery only
- B) Prevention and healthy lifestyles ✓
- C) Medicines only
- D) Laboratory testing only

Answer: B

15. Acupuncture is an example of alternative medicine.

- A) Open-heart surgery
- B) Acupuncture ✓
- C) Chemotherapy only
- D) Organ transplantation

Answer: B

16. Alternative medicine was once widely dismissed as quackery.

- A) Advanced science only
- B) Quackery ✓
- C) Government policy
- D) Public education

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

17. Integrative healthcare combines conventional and evidence-based alternative medicine.

- A) Conventional medicine only
- B) Conventional and evidence-based alternative medicine ✓
- C) Traditional medicine only
- D) Religious healing only

Answer: B

18. Scientific research has improved acceptance of some alternative therapies.

- A) Reduced all research
- B) Improved acceptance of alternative therapies ✓
- C) Eliminated hospitals
- D) Banned herbal medicine

Answer: B

19. Medical technology and improved nutrition have increased life expectancy.

- A) Increased unemployment
- B) Increased life expectancy ✓
- C) Reduced education
- D) Increased crime

Answer: B

20. Healthcare decisions should be based on scientific evidence.

- A) Rumors only
- B) Scientific evidence ✓
- C) Personal opinions only
- D) Advertisements only

Answer: B

Lesson-31: RELIGION-I

IMPORTANT EXAM POINTS

Religion is a social institution based on beliefs, symbols, and rituals related to the sacred.

Émile Durkheim distinguished between the sacred and the profane as the foundation of religion.

The sacred refers to things considered holy, extraordinary, and worthy of reverence.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

The profane refers to ordinary, everyday, and routine aspects of life.

An object or place is not naturally sacred; society gives it sacred meaning.

What is sacred for one society may be profane for another society.

Religion creates social solidarity by uniting people through common beliefs and rituals.

Religion provides collective identity, moral values, and social order.

In Pakistan, religion plays an important role in shaping culture, traditions, and daily life.

Holy places, shrines, mosques, and pilgrimages are considered sacred in Pakistan.

Religious symbols represent sacred beliefs and help connect people with the supernatural.

Examples of religious symbols include holy books, sacred clothing, religious signs, statues, and sacred places.

Religious beliefs explain the relationship between humans, nature, God, and the supernatural world.

Beliefs guide people's behavior, morality, and understanding of life.

Most religions provide explanations about creation, life after death, and the universe.

Religious rituals are formal acts of worship that express religious beliefs.

Common religious rituals include prayer, fasting, sacrifice, chanting, pilgrimage, and festivals.

Religious rituals strengthen faith, social unity, and cultural identity.

Religion and magic are related but different forms of supernatural belief.

Religion seeks divine guidance and worships God or supernatural beings.

Magic attempts to control supernatural forces to achieve personal goals.

Religious rituals are generally collective and long-term in purpose.

Magical rituals are usually individual and intended to solve immediate problems.

Religion focuses on the meaning and purpose of life.

Magic focuses on practical benefits such as success, protection, wealth, or health.

Many people use lucky charms, amulets, or talismans as forms of magical belief.

Religion is usually organized through religious institutions.

Magic is generally informal and practiced individually.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Animatism is the belief in impersonal supernatural forces rather than gods or spirits.

Mana is a famous example of animatism found in Pacific Island societies.

Animism is the belief that spirits exist in humans, animals, plants, and natural objects.

Animistic religions believe spirits can influence human life.

Theism is the belief in one or more supreme gods.

Polytheism is the belief in many gods.

Hinduism is one of the world's largest polytheistic religions.

Monotheism is the belief in one supreme God.

Judaism, Christianity, and Islam are the three major monotheistic religions.

Islam is the dominant religion in Pakistan.

Many people in Pakistan also believe in jinn, angels, and other supernatural beings.

Religious diversity reflects the richness of human cultures and beliefs.

Sociologists study religion to understand its influence on society, culture, identity, and social change.

Religion helps create meaning, purpose, belonging, and moral guidance in human life.

20 Statement-Based MCQs

1. Durkheim defined religion by distinguishing between the sacred and the profane.

- A) Sacred and profane ✓
- B) Rich and poor
- C) Rural and urban
- D) Culture and society

Answer: A

2. The sacred refers to things regarded as holy and worthy of respect.

- A) Ordinary activities
- B) Holy and respected things ✓
- C) Economic resources
- D) Political systems

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

3. The profane includes ordinary and everyday activities.

- A) Holy rituals
- B) Ordinary daily life ✓
- C) Sacred objects
- D) Divine powers

Answer: B

4. According to Durkheim, sacredness is created by society.

- A) Nature only
- B) Society ✓
- C) Government
- D) Economy

Answer: B

5. Religious symbols help represent sacred beliefs.

- A) Entertainment only
- B) Sacred beliefs ✓
- C) Political authority
- D) Business activities

Answer: B

6. Religious beliefs explain the relationship between humans and the supernatural.

- A) Sports activities
- B) Human-supernatural relationship ✓
- C) Industrial growth
- D) Transportation

Answer: B

7. Prayer, fasting, and pilgrimage are examples of religious rituals.

- A) Economic activities
- B) Religious rituals ✓
- C) Political campaigns
- D) Scientific experiments

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

8. Religious rituals strengthen social unity and faith.

- A) Increase crime
- B) Strengthen unity and faith ✓
- C) Reduce education
- D) Eliminate traditions

Answer: B

9. Religion focuses on the meaning and purpose of life.

- A) Sports performance
- B) Meaning and purpose of life ✓
- C) Business profits
- D) Industrial production

Answer: B

10. Magic attempts to control supernatural forces for practical purposes.

- A) Worship only
- B) Control supernatural forces ✓
- C) Political leadership
- D) Scientific discovery

Answer: B

11. Magical rituals are usually individual and short-term.

- A) Collective only
- B) Individual and short-term ✓
- C) National only
- D) Permanent

Answer: B

12. Animatism is the belief in impersonal supernatural forces.

- A) Many gods
- B) One God

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Impersonal supernatural forces ✓
- D) Human spirits only

Answer: C

13. Mana is associated with animatism.

- A) Christianity
- B) Mana ✓
- C) Hajj
- D) Torah

Answer: B

14. Animism is the belief in spirits living in nature.

- A) Industrialization
- B) Spirits in nature ✓
- C) Democracy
- D) Capitalism

Answer: B

15. Theism is the belief in one or more supreme gods.

- A) No gods
- B) One or more supreme gods ✓
- C) Only ancestors
- D) Only nature

Answer: B

16. Polytheism refers to belief in many gods.

- A) One God
- B) Many gods ✓
- C) No gods
- D) Only spirits

Answer: B

17. Monotheism refers to belief in one supreme God.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Two gods
- B) One supreme God ✓
- C) Nature worship
- D) Spirit worship

Answer: B

18. Islam, Christianity, and Judaism are monotheistic religions.

- A) Polytheistic religions
- B) Monotheistic religions ✓
- C) Tribal religions
- D) Magical religions

Answer: B

19. Religion helps maintain social solidarity and moral order.

- A) Weakens society
- B) Maintains solidarity and moral order ✓
- C) Eliminates traditions
- D) Promotes isolation

Answer: B

20. Islam is the dominant religion in Pakistan.

- A) Hinduism
- B) Christianity
- C) Islam ✓
- D) Buddhism

Answer: C

Lesson-32: RELIGION-II

IMPORTANT EXAM POINTS

Religion is studied in sociology through the functionalist, conflict, and interactionist perspectives.

Auguste Comte believed society would move from the theological stage to the positive (scientific) stage.

Émile Durkheim, Karl Marx, and Max Weber laid the foundation for the sociological study of religion.

The functionalist perspective views religion as a social institution that promotes social order and cohesion.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

The conflict perspective views religion as a tool used by powerful groups to maintain dominance and inequality.

The interactionist perspective focuses on how individuals interpret religion and how religion shapes daily behavior.

Religion influences beliefs, values, identities, and social relationships.

In Pakistan, Hajj strengthens unity among Muslims from different regions.

Sectarian conflicts between Sunni and Shia Muslims illustrate the conflict perspective of religion.

Different interpretations of Islam in Pakistan reflect the interactionist perspective.

Religion provides individuals with meaning, purpose, and emotional support.

Religion strengthens social solidarity through shared beliefs, rituals, and moral values.

Religious institutions reinforce moral and ethical behavior in society.

Durkheim believed religion is essential for maintaining social integration.

Durkheim argued that when people worship sacred symbols, they are symbolically worshipping society itself.

Totemism was considered by Durkheim as the earliest and simplest form of religion.

Collective religious rituals create feelings of unity, respect, and collective identity.

Civil religion refers to national symbols, holidays, and rituals that create unity in modern secular societies.

Examples of functional religion in Pakistan include Zakat, Eid-ul-Fitr, and Eid-ul-Adha.

Karl Marx described religion as "the opiate of the people."

Marx believed religion diverts attention away from poverty, exploitation, and social inequality.

According to Marx, religion helps the ruling class maintain control over subordinate groups.

Conflict theorists argue religion can both support and challenge the existing social order.

Religion has two faces: it can promote social stability or inspire social change.

Religious beliefs have historically been used to support both slavery and abolition movements.

Religion can become a source of conflict when groups compete over beliefs or power.

Sectarian violence in Pakistan reflects religious conflict between different groups.

Misuse of blasphemy laws has contributed to religious conflict and social inequality in Pakistan.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

The interactionist perspective emphasizes the role of individual beliefs and interpretations.

Max Weber argued that religion can influence economic and social development.

Weber's famous work is *The Protestant Ethic and the Spirit of Capitalism*.

The Protestant ethic emphasized hard work, discipline, frugality, and delayed gratification.

Weber believed Protestant values contributed to the growth of capitalism.

Calvinism introduced the doctrine of predestination.

Many Calvinists viewed economic success as evidence of God's favor.

Unlike Marx, Weber argued that religion can shape society rather than simply being shaped by it.

Eastern religions generally emphasize harmony, conformity, and spiritual balance.

Western Protestantism encouraged economic achievement and social change.

Religion can inspire reform movements, activism, and social transformation.

Islamic feminism in Pakistan demonstrates religion's potential to support social change.

Sufism has promoted tolerance and peaceful coexistence in Pakistani society.

Religious leaders can encourage interfaith dialogue and cooperation.

Religion and culture sometimes come into conflict.

Some religious groups completely reject the dominant culture and live separately.

The Amish reject many aspects of modern technology to preserve traditional religious values.

Some sects reject only specific cultural practices while accepting most of society.

Sometimes society rejects religious groups, resulting in discrimination or persecution.

Conflicts between religion and culture often involve marriage customs, dress, entertainment, and social traditions.

In Pakistan, arranged marriages sometimes conflict with the Islamic principle of free consent.

Dowry is a cultural practice that conflicts with Islamic teachings.

The celebration of Valentine's Day remains controversial due to differences between cultural influences and religious beliefs.

20 Statement-Based MCQs

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

1. Sociology explains religion through three major theoretical perspectives.

- A) Biological only
- B) Functionalist, Conflict, and Interactionist ✓
- C) Psychological only
- D) Economic only

Answer: B

2. Auguste Comte believed society would eventually enter the positive stage.

- A) Military stage
- B) Positive (scientific) stage ✓
- C) Agricultural stage
- D) Religious revival stage

Answer: B

3. Functionalists believe religion promotes social order and unity.

- A) Political instability
- B) Social order and cohesion ✓
- C) Economic competition only
- D) Cultural isolation

Answer: B

4. Conflict theorists view religion as a means of maintaining power.

- A) Equal wealth distribution
- B) Maintaining dominant group control ✓
- C) Eliminating governments
- D) Increasing technology

Answer: B

5. Interactionists focus on how individuals interpret religion.

- A) Climate patterns
- B) Individual meanings and interactions ✓
- C) Military systems
- D) Population growth

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

6. Durkheim believed religion strengthens social solidarity.

- A) Weakens families
- B) Strengthens social solidarity ✓
- C) Eliminates traditions
- D) Creates unemployment

Answer: B

7. According to Durkheim, people symbolically worship society through sacred symbols.

- A) Nature only
- B) Society itself ✓
- C) Government only
- D) Wealth only

Answer: B

8. Totemism was considered by Durkheim to be the simplest form of religion.

- A) Monotheism
- B) Totemism ✓
- C) Polytheism
- D) Animism

Answer: B

9. Civil religion promotes unity through national symbols and rituals.

- A) Private businesses
- B) National symbols and rituals ✓
- C) Sports competitions only
- D) Social media

Answer: B

10. Karl Marx described religion as "the opiate of the people."

- A) Scientific law
- B) Opiate of the people ✓
- C) Economic revolution
- D) Social contract

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

11. Marx believed religion distracts people from social inequality.

- A) Promotes equality immediately
- B) Diverts attention from inequality ✓
- C) Eliminates poverty
- D) Ends social classes

Answer: B

12. Religion can both support and challenge the status quo.

- A) Never changes society
- B) Both support and challenge society ✓
- C) Exists outside society
- D) Has no social influence

Answer: B

13. Max Weber argued religion can influence economic development.

- A) Religion has no economic effect
- B) Religion can shape economic change ✓
- C) Economy controls everything alone
- D) Religion prevents trade

Answer: B

14. Weber linked capitalism with the Protestant ethic.

- A) Hindu philosophy
- B) Protestant ethic ✓
- C) Animism
- D) Totemism

Answer: B

15. Calvinists believed worldly success could indicate God's favor.

- A) Bad luck
- B) God's favor ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Political power only
- D) Social class only

Answer: B

16. Eastern religions generally emphasize harmony and conformity.

- A) Competition only
- B) Harmony and conformity ✓
- C) Industrial growth only
- D) Military strength

Answer: B

17. Islamic feminism in Pakistan demonstrates religion's role in social change.

- A) Social isolation
- B) Social change ✓
- C) Economic decline
- D) Population control

Answer: B

18. The Amish preserve traditional religious values by rejecting much modern technology.

- A) Encouraging industrialization
- B) Rejecting much modern technology ✓
- C) Promoting urban lifestyles
- D) Supporting globalization

Answer: B

19. Dowry is a cultural practice that may conflict with Islamic teachings.

- A) Islamic obligation
- B) Cultural practice conflicting with Islam ✓
- C) Religious pillar
- D) Legal requirement

Answer: B

20. Religion and culture may conflict over customs, traditions, and social values.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) They are always identical
- B) They may conflict over customs and values ✓
- C) Religion never changes culture
- D) Culture completely replaces religion

Answer: B

Lesson-33: GOVERNMENT AND ECONOMY

IMPORTANT EXAM POINTS

Politics is the social process through which individuals and groups acquire, exercise, maintain, and lose power.

Power is the ability to achieve one's will even against the resistance of others.

According to Max Weber, power is the ability to realize one's will despite opposition.

Authority is the legitimate right to exercise power, where people obey willingly rather than through force.

People obey authority because they believe it is legitimate or their duty to obey.

Politics is closely related to the distribution and exercise of power in society.

Political institutions organize and regulate the exercise of power.

Power can originate from wealth, income, education, leadership, fame, organizations, and public support.

Coercion is the actual use of force or threats to make people obey.

Power represents the potential to use force, while coercion is the actual application of force.

Max Weber argued that authority is more effective than coercion for maintaining long-term control.

The state claims a monopoly over the legitimate use of force.

Only the state has the legal authority to punish lawbreakers and enforce laws.

Governments formulate and implement public policies.

Pakistan follows a parliamentary democratic system with a multi-party structure.

Pakistan has experienced periods of military rule, political instability, and authoritarian governments.

The state performs essential functions to maintain order and promote public welfare.

Maintaining law and order is one of the primary functions of the state.

The state provides national security through armed forces and law enforcement agencies.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

The legal system protects justice, individual rights, and resolves disputes.

The state provides essential public services such as education, healthcare, transportation, and infrastructure.

Economic regulation includes taxation, trade policies, labor laws, and consumer protection.

Social welfare programs support unemployed, poor, elderly, and vulnerable citizens.

The state manages diplomacy and maintains foreign relations.

Infrastructure development promotes economic growth and improves quality of life.

Environmental protection is an important responsibility of modern states.

The state preserves cultural heritage and promotes national identity.

During emergencies and disasters, the state coordinates relief and recovery efforts.

Taxation provides revenue for government services and development projects.

Political systems range from democratic to authoritarian systems.

Democracy is based on popular participation and public decision-making.

Autocracy is a system where power is concentrated in one individual or a small group.

Authoritarian governments rule without meaningful public participation.

Dictatorship is rule by a single individual with unrestricted authority.

Oligarchy is government controlled by a small elite group.

Military juntas are common examples of oligarchies formed through military coups.

Authoritarian governments often hold controlled elections to create an appearance of legitimacy.

Totalitarianism is the most extreme form of authoritarian government.

Totalitarian governments control politics, education, media, economy, and nearly all aspects of society.

Propaganda and terror are commonly used by totalitarian regimes to maintain control.

Historical examples of totalitarianism include Stalin's Soviet Union, Hitler's Nazi Germany, and Cambodia's Khmer Rouge.

Democratic governments allow citizens to choose leaders through free and fair elections.

Advanced economic development supports stable democratic institutions.

Large income inequality weakens democratic systems.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Democracy requires a diffusion of power among many institutions and organizations.

Democratic societies encourage individual rights, tolerance, and political participation.

Free and independent media strengthen democracy by providing citizens with diverse information.

Capitalism is an economic system based on private ownership, market competition, and profit.

Private ownership means individuals own land, factories, businesses, and natural resources.

Market competition allows producers to compete freely in producing goods and services.

Profit is the main driving force behind capitalist economies.

Supply and demand determine prices in a capitalist market.

Laissez-faire refers to minimal government interference in the economy.

Most modern capitalist economies combine free markets with government regulation.

Competition encourages innovation, efficiency, and economic growth.

Capitalism has contributed to industrial development and rising living standards.

Critics argue capitalism can increase inequality and environmental problems.

Pakistan follows a predominantly capitalist economy with increasing private investment and government regulation.

The relationship between the state and the economy involves taxation, regulation, development, and wealth distribution.

The study of capitalism helps explain economic growth, poverty, inequality, and social mobility.

20 Statement-Based MCQs

1. Politics is the process through which people acquire and exercise power.

- A) Religious worship
- B) Acquisition and exercise of power ✓
- C) Economic planning only
- D) Cultural exchange

Answer: B

2. According to Max Weber, power is the ability to achieve one's will despite resistance.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Physical strength only
- B) Ability to realize one's will despite resistance ✓
- C) Public popularity only
- D) Financial investment only

Answer: B

3. Authority causes people to obey because they recognize its legitimacy.

- A) Fear only
- B) Legitimate right to command ✓
- C) Personal friendship only
- D) Financial rewards only

Answer: B

4. Coercion refers to the actual use of force or threats.

- A) Voluntary cooperation
- B) Actual use of force or threats ✓
- C) Peaceful negotiation only
- D) Democratic voting

Answer: B

5. The state claims a monopoly over the legitimate use of force.

- A) Private companies
- B) The state ✓
- C) Religious groups
- D) Political parties

Answer: B

6. One major function of the state is maintaining law and order.

- A) Entertainment only
- B) Maintaining law and order ✓
- C) Sports management
- D) Tourism promotion

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

7. Public education and healthcare are examples of state public services.

- A) Military operations only
- B) Public education and healthcare ✓
- C) Private business only
- D) Stock exchange management

Answer: B

8. Social welfare programs support vulnerable members of society.

- A) Foreign governments only
- B) Vulnerable citizens ✓
- C) Large corporations only
- D) Political parties only

Answer: B

9. Autocracy concentrates power in a single ruler or small group.

- A) Public assembly
- B) Single ruler or small group ✓
- C) Independent judiciary only
- D) Free media only

Answer: B

10. Dictatorship is government by one individual with unrestricted authority.

- A) Parliament only
- B) Single ruler ✓
- C) Religious council
- D) Supreme court

Answer: B

11. Oligarchy is government controlled by a small elite group.

- A) Entire population
- B) Small elite group ✓
- C) Students only
- D) Judges only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

12. Totalitarian governments attempt to control all aspects of society.

- A) Economic activity only
- B) All aspects of society ✓
- C) Agriculture only
- D) Tourism only

Answer: B

13. Democracy is based on popular participation in decision-making.

- A) Military rule
- B) Popular participation ✓
- C) Rule by kings only
- D) Rule by judges only

Answer: B

14. Advanced economic development supports democratic stability.

- A) Political violence only
- B) Advanced economic development ✓
- C) Military expansion only
- D) Religious conflict only

Answer: B

15. Free and independent media strengthen democracy.

- A) Secret propaganda only
- B) Free and independent media ✓
- C) Military censorship only
- D) Foreign control only

Answer: B

16. Capitalism is based on private ownership of the means of production.

- A) Government ownership only
- B) Private ownership ✓
- C) Religious ownership
- D) Community ownership only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

17. Profit is the main driving force of capitalism.

- A) Charity only
- B) Profit ✓
- C) Political campaigns
- D) Religious activities

Answer: B

18. Laissez-faire means minimal government interference in the economy.

- A) Complete government control
- B) Minimal government interference ✓
- C) Military control
- D) Religious regulation

Answer: B

19. Market competition encourages innovation and efficiency.

- A) Corruption only
- B) Innovation and efficiency ✓
- C) Population decline
- D) Cultural isolation

Answer: B

20. Pakistan follows a predominantly capitalist economic system with government regulation.

- A) Pure socialism
- B) Predominantly capitalist economy ✓
- C) Complete communism
- D) Feudal economy only

Answer: B

Lesson-34: GOVERNMENT AND ECONOMY-II

IMPORTANT EXAM POINTS

Socialism is an economic system based on public ownership, central planning, and distribution without a profit motive.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

The three essential components of socialism are public ownership of the means of production, central planning, and distribution of goods according to need.

In socialism, the government owns major industries, natural resources, factories, land, railways, and mines.

A central planning committee decides what goods will be produced, their quantity, prices, and distribution.

Unlike capitalism, socialism eliminates market competition and the profit motive.

The primary objective of socialism is to promote the common welfare rather than private profit.

Goods in socialist economies are distributed according to people's needs instead of their ability to pay.

Most workers, managers, and planners in socialist economies are government employees.

Socialist countries generally reduce income inequality by narrowing salary differences.

According to socialist ideology, collective welfare is more important than individual interests.

Karl Marx viewed socialism as a transitional stage toward a communist society.

Democratic socialism seeks to achieve socialist goals through democratic and constitutional methods.

Pakistan has experienced the influence of socialist ideas through labor unions and political movements.

Capitalists believe that free-market capitalism is the most efficient system for economic growth.

Capitalists argue that competition promotes innovation, efficiency, and better-quality products.

Private property and individual economic freedom are central principles of capitalism.

Capitalists believe profit provides incentives for entrepreneurship and technological advancement.

According to the capitalist view, centralized planning often leads to inefficiency and bureaucracy.

Capitalists criticize socialism for reducing competition, innovation, and economic incentives.

Democratic socialism combines public ownership of key industries with private ownership of other sectors.

Countries such as Sweden and Denmark are examples of democratic socialism or welfare socialism.

Democratic socialism supports both economic equality and democratic political participation.

In democratic socialism, governments usually own strategic industries while private businesses continue operating.

A strong social safety net is an important feature of democratic socialism.

Political change refers to changes in political institutions, governments, or systems.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Institutionalized political change occurs through elections, constitutional amendments, and legal reforms.

Institutionalized political change is gradual, peaceful, and follows constitutional procedures.

Rebellions involve organized resistance against established political authorities.

Rebellions may include peaceful protests or armed resistance.

Revolutions are major political transformations that replace existing political systems.

Revolutions usually involve widespread public participation and often use violent methods.

Political change in Pakistan includes transitions from military rule to civilian democracy.

The Balochistan conflict and Pashtun Tahafuz Movement are examples of rebellion-related political challenges in Pakistan.

Authority is legitimate power accepted by society because people believe it is rightful.

Max Weber identified three major types of authority: traditional, legal-rational, and charismatic.

Traditional authority is based on customs, traditions, and long-established social practices.

Traditional authority is often hereditary and linked with religion, age, or family status.

Legal-rational authority is based on laws, formal rules, qualifications, and official positions.

Modern governments, courts, and bureaucracies mainly operate through legal-rational authority.

Charismatic authority is based on a leader's extraordinary personal qualities and ability to inspire followers.

Charismatic authority is often temporary and may disappear after the leader's death or loss of public confidence.

Muhammad Ali Jinnah and Zulfikar Ali Bhutto are examples of charismatic authority in Pakistan.

Understanding authority helps explain how power, leadership, and obedience function in society.

20 Statement-Based MCQs

1. Socialism is based on public ownership of the means of production.

- A) Private ownership only
- B) Public ownership of production ✓
- C) Foreign ownership only
- D) Individual ownership only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

2. In socialism, production decisions are made through central planning.

- A) Consumer voting
- B) Central planning ✓
- C) Market competition only
- D) Private companies only

Answer: B

3. The main goal of socialism is to promote the common welfare.

- A) Private profit only
- B) Common welfare ✓
- C) Luxury consumption
- D) International trade only

Answer: B

4. Capitalists believe free-market competition increases efficiency.

- A) Reduces efficiency
- B) Increases efficiency ✓
- C) Eliminates production
- D) Prevents innovation

Answer: B

5. Profit is considered the main incentive in capitalism.

- A) Charity only
- B) Profit ✓
- C) Government planning
- D) Population growth

Answer: B

6. Capitalists criticize socialism because it reduces competition.

- A) Increases competition
- B) Reduces competition ✓
- C) Promotes free markets only
- D) Encourages private monopolies only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

7. Democratic socialism combines public and private ownership.

- A) Public ownership only
- B) Private ownership only
- C) Both public and private ownership ✓
- D) Foreign ownership only

Answer: C

8. Sweden and Denmark are commonly associated with democratic socialism.

- A) Japan and China
- B) Sweden and Denmark ✓
- C) India and Nepal
- D) Brazil and Argentina

Answer: B

9. Institutionalized political change usually occurs through elections and reforms.

- A) Military coups only
- B) Elections and legal reforms ✓
- C) Civil wars only
- D) Foreign invasions only

Answer: B

10. Rebellions involve organized resistance against political authorities.

- A) Economic reforms only
- B) Organized resistance ✓
- C) Peace treaties only
- D) Tax collection only

Answer: B

11. Revolutions seek fundamental political and social transformation.

- A) Minor policy changes only
- B) Fundamental transformation ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Administrative transfers only
- D) Population control only

Answer: B

12. Authority is legitimate power accepted by society.

- A) Illegal force
- B) Legitimate power ✓
- C) Military strength only
- D) Wealth only

Answer: B

13. Traditional authority is mainly based on customs and traditions.

- A) Elections only
- B) Customs and traditions ✓
- C) Written laws only
- D) Scientific knowledge only

Answer: B

14. Legal-rational authority depends upon laws and official rules.

- A) Family traditions
- B) Laws and regulations ✓
- C) Religious miracles
- D) Personal friendship

Answer: B

15. Charismatic authority is based on extraordinary personal qualities.

- A) Wealth only
- B) Personal charisma ✓
- C) Hereditary rights only
- D) Legal appointment only

Answer: B

16. Max Weber identified three major types of authority.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Karl Marx
- B) Max Weber ✓
- C) Auguste Comte
- D) Emile Durkheim

Answer: B

17. Pakistan's transition from military rule to civilian democracy is an example of institutionalized political change.

- A) Revolution only
- B) Institutionalized political change ✓
- C) Colonial rule
- D) Religious reform only

Answer: B

18. Muhammad Ali Jinnah is commonly regarded as an example of charismatic authority.

- A) Traditional authority only
- B) Charismatic authority ✓
- C) Legal-rational authority only
- D) Bureaucratic authority only

Answer: B

19. Socialist economies aim to distribute resources according to need.

- A) Ability to pay only
- B) Need ✓
- C) Personal wealth only
- D) Political influence only

Answer: B

20. Understanding authority helps explain how leadership and obedience operate in society.

- A) Climate change
- B) Leadership and obedience ✓
- C) Population growth only
- D) Industrial production only

Answer: B

Lesson-35: GENDER: A SOCIAL CONSTRUCTION

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

IMPORTANT EXAM POINTS

Sex refers to the biological characteristics that distinguish males and females.

Gender refers to the socially constructed roles, behaviors, attitudes, and expectations associated with being male or female.

Sex is inherited, while gender is learned through the process of socialization.

Masculinity refers to socially accepted characteristics associated with males.

Femininity refers to socially accepted characteristics associated with females.

Gender expectations vary across societies and cultures.

Many sociologists prefer the terms masculinities and femininities because gender differs across cultures.

Gender is a structural feature of society that influences power, prestige, and opportunities.

Gender shapes life experiences, access to resources, and social status.

The binary construction assumes only two sexes and two genders.

The binary model is criticized because it ignores the diversity of human identities and experiences.

Traditional gender roles in Pakistan strongly influence individual behavior and identity.

Margaret Mead argued that gender differences are largely shaped by culture rather than biology.

Margaret Mead studied the Arapesh, Mundugumor, and Tchambuli societies in New Guinea.

Among the Arapesh, both men and women displayed gentle and cooperative behavior.

Among the Mundugumor, both men and women were aggressive and competitive.

Among the Tchambuli, traditional gender roles were largely reversed compared to Western societies.

Mead concluded that culture plays a greater role than biology in shaping gender behavior.

Some later researchers criticized Mead's conclusions, especially regarding the Tchambuli society.

Biological differences exist between males and females but do not fully explain gender roles.

Gender and sex are socially constructed through culture, social interaction, and socialization.

Children begin learning gender roles from birth through family, school, media, and society.

Gender roles influence clothing, language, behavior, occupations, and social relationships.

Masculinity and femininity are products of social and cultural interpretation.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Gender roles affect almost every aspect of life, including education, politics, religion, and careers.

Traditional gender expectations remain deeply rooted in Pakistani society.

Femininity includes traits such as passivity, emotionality, and nurturing in many societies.

Masculinity includes traits such as dominance, independence, competitiveness, and leadership.

Research shows children recognize gender stereotypes by around four years of age.

Gender identity develops through continuous interaction with society.

Research indicates that aggression is influenced by social conditions as much as biology.

Names, clothing, toys, communication styles, and play activities reinforce gender identities.

Gender relations differ across cultures and historical periods.

Gender inequalities arise from social structures rather than biological differences alone.

Sexism is the belief that one sex is naturally superior or inferior to the other.

Sexism produces both prejudice (attitudes) and discrimination (actions).

Sexism affects both women and men, although women experience it more frequently.

Gender-based violence is one of the major consequences of gender inequality.

Women in Pakistan often face unequal access to education, healthcare, employment, and political participation.

Understanding gender requires perspectives from sociology, biology, psychology, anthropology, and cultural studies.

Promoting gender equality requires recognizing the diversity and complexity of human identities.

Social justice depends on reducing gender discrimination and ensuring equal opportunities for all.

20 Statement-Based MCQs

1. Sex refers to biological differences between males and females.

- A) Cultural traditions
- B) Biological differences ✓
- C) Political beliefs
- D) Economic status

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

2. Gender refers to socially constructed roles and behaviors.

- A) Genetic inheritance
- B) Socially constructed roles ✓
- C) Blood group
- D) Physical appearance only

Answer: B

3. Gender is learned through socialization.

- A) Through genetics only
- B) Through socialization ✓
- C) Through climate
- D) Through hormones alone

Answer: B

4. Margaret Mead concluded that culture strongly shapes gender behavior.

- A) Genetics alone
- B) Culture ✓
- C) Climate only
- D) Technology only

Answer: B

5. The Arapesh society was known for cooperative behavior among both sexes.

- A) Aggressive behavior
- B) Cooperative behavior ✓
- C) Military culture
- D) Industrial work

Answer: B

6. In the Mundugumor society, both males and females were generally aggressive.

- A) Passive
- B) Aggressive ✓
- C) Timid
- D) Dependent

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

7. The Tchambuli society reversed many traditional Western gender roles.

- A) Reinforced Western roles
- B) Reversed many Western gender roles ✓
- C) Eliminated gender entirely
- D) Focused only on religion

Answer: B

8. Gender roles are socially constructed rather than purely biological.

- A) Socially constructed ✓
- B) Entirely genetic
- C) Weather-based
- D) Random

Answer: A

9. Masculinity refers to socially accepted characteristics associated with males.

- A) Childhood only
- B) Male social characteristics ✓
- C) Female behavior
- D) Religious authority

Answer: B

10. Femininity refers to socially accepted characteristics associated with females.

- A) Male behavior
- B) Female social characteristics ✓
- C) Economic class
- D) Political authority

Answer: B

11. Children begin recognizing gender stereotypes at an early age.

- A) Around four years old ✓
- B) Around twenty years old
- C) After retirement
- D) Only during university

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: A

12. Gender roles influence clothing, language, and behavior.

- A) Food only
- B) Clothing, language, and behavior ✓
- C) Climate only
- D) Geography only

Answer: B

13. Gender identity develops through continuous social interaction.

- A) Through isolation
- B) Through social interaction ✓
- C) Through genetics alone
- D) Through weather conditions

Answer: B

14. Research suggests aggression is influenced by social conditions as well as biology.

- A) Biology only
- B) Social conditions and biology ✓
- C) Luck only
- D) Climate only

Answer: B

15. Gender relations vary across cultures and historical periods.

- A) Never change
- B) Vary across cultures and history ✓
- C) Depend only on biology
- D) Are legally fixed everywhere

Answer: B

16. Sexism is the belief that one sex is superior or inferior to the other.

- A) Equality
- B) Sexism ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Democracy
- D) Social mobility

Answer: B

17. Sexism results in prejudice and discrimination.

- A) Cooperation only
- B) Prejudice and discrimination ✓
- C) Scientific progress only
- D) Economic equality only

Answer: B

18. Gender-based violence is linked to gender inequality.

- A) Weather changes
- B) Gender inequality ✓
- C) Population growth only
- D) Industrialization only

Answer: B

19. Traditional gender roles in Pakistan often influence education and employment opportunities.

- A) Sports only
- B) Education and employment opportunities ✓
- C) Climate only
- D) Transportation only

Answer: B

20. Promoting gender equality requires equal opportunities for all individuals.

- A) Social inequality
- B) Equal opportunities for all ✓
- C) Gender discrimination
- D) Political favoritism

Answer: B

Lesson-36: FUNCTIONS OF SCHOOLING

IMPORTANT EXAM POINTS

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

The functionalist perspective views education as an institution that promotes stability and social order.

Schools perform important manifest and latent functions for society.

Manifest functions are the intended and recognized benefits of education.

Latent functions are the unintended but beneficial consequences of education.

Schools socialize students into society's norms, values, and beliefs.

Education transmits culture from one generation to the next.

Schools promote social integration by bringing together students from different backgrounds.

Education helps develop a common national identity and social cohesion.

Schools teach essential knowledge and skills such as literacy, numeracy, and computer literacy.

Modern societies depend on highly educated individuals to fill specialized occupations.

Industrial societies are often called credential societies because degrees determine job eligibility.

Employers use diplomas and degrees as indicators of competence and responsibility.

Professional occupations such as doctors, engineers, and pilots require certified educational qualifications.

Schools transmit cultural values such as patriotism, discipline, and respect for national institutions.

Education strengthens political stability by encouraging loyalty to the state.

Schools help immigrants and diverse populations integrate into mainstream society.

Gatekeeping is the educational process of determining who qualifies for different occupations.

Credentialing uses diplomas and degrees to open or restrict employment opportunities.

Tracking places students into different educational programs according to their perceived abilities.

Functionalists Talcott Parsons, Kingsley Davis, and Wilbert Moore supported the idea of social placement.

Social placement matches individuals to occupations according to ability and achievement.

High-income and prestigious careers require greater education, skill, and delayed gratification.

Schools increasingly perform family functions such as childcare.

Many schools provide childcare before and after school hours.

Schools also serve as places where lifelong friendships and marriage partners are formed.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Education creates valuable professional and social networks.

Schools reduce unemployment by keeping young people in education rather than the labor market.

Education also creates employment opportunities for teachers, administrators, and support staff.

Innovation refers to creating new ideas, technologies, products, and knowledge.

Educational institutions play an important role in scientific research and technological advancement.

Research universities are major centers of innovation and knowledge creation.

Innovation in education includes new teaching methods, technology, and updated curricula.

Educational innovation promotes economic growth, productivity, and national development.

Schools must balance preserving traditions with encouraging innovation and cultural change.

Pakistan has introduced research universities and educational technology to promote innovation.

Many students postpone job hunting to obtain higher education and improve career opportunities.

Further education increases skills, qualifications, and competitiveness in the job market.

Delaying employment may also result in delayed income and increased educational expenses.

Higher education is widely viewed as a path to social mobility and better employment in Pakistan.

Anticipatory socialization prepares students for future occupational and social roles.

Schools teach discipline, responsibility, teamwork, punctuality, and professional behavior.

Vocational training, internships, and classroom learning support anticipatory socialization.

Parents also contribute to anticipatory socialization through structured learning activities.

Modern economies require schools to prepare students for highly specialized occupations.

Rapid technological change sometimes creates shortages or oversupplies of skilled professionals.

Latent functions of schooling include friendship formation, networking, childcare, and delayed unemployment.

Education unintentionally creates social networks that benefit careers and personal life.

Researchers found that individuals with higher levels of education generally have longer life expectancy.

Education improves health awareness, employment opportunities, and overall quality of life.

Functionalists view education as essential for maintaining social stability, economic development, and social progress.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

20 Statement-Based MCQs

1. The functionalist perspective views education as promoting social stability.

- A) Social conflict only
- B) Social stability ✓
- C) Political revolution
- D) Economic collapse

Answer: B

2. Manifest functions are the intended benefits of education.

- A) Hidden consequences
- B) Intended benefits ✓
- C) Political changes
- D) Economic losses

Answer: B

3. Latent functions are unintended consequences of schooling.

- A) Planned outcomes only
- B) Unintended consequences ✓
- C) Government policies
- D) Religious beliefs

Answer: B

4. Schools promote social integration by bringing together students from different backgrounds.

- A) Social isolation
- B) Social integration ✓
- C) Social conflict
- D) Social segregation only

Answer: B

5. Randall Collins described modern societies as credential societies.

- A) Agricultural societies
- B) Credential societies ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Military societies
- D) Tribal societies

Answer: B

6. Credentialing uses educational qualifications to determine job eligibility.

- A) Family background only
- B) Educational qualifications ✓
- C) Physical appearance
- D) Religious affiliation

Answer: B

7. Gatekeeping determines who qualifies for different occupations.

- A) Voting rights
- B) Occupational entry ✓
- C) Marriage decisions
- D) Religious leadership

Answer: B

8. Talcott Parsons supported the concept of social placement.

- A) Social isolation
- B) Social placement ✓
- C) Social conflict
- D) Cultural diffusion

Answer: B

9. Schools increasingly perform childcare functions.

- A) Military functions
- B) Childcare functions ✓
- C) Industrial production
- D) Agricultural work

Answer: B

10. Schools often help students develop lifelong friendships and social networks.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Political parties only
- B) Friendships and social networks ✓
- C) Sports clubs only
- D) Religious movements only

Answer: B

11. Innovation means creating new ideas, products, or technologies.

- A) Preserving traditions only
- B) Creating new ideas and technologies ✓
- C) Avoiding change
- D) Increasing taxes

Answer: B

12. Research universities play an important role in innovation.

- A) Research universities ✓
- B) Shopping malls
- C) Factories only
- D) Banks only

Answer: A

13. Educational innovation includes new teaching methods and technology.

- A) New teaching methods and technology ✓
- B) Military training only
- C) Religious ceremonies only
- D) Tax collection only

Answer: A

14. Many students postpone job hunting to obtain higher education.

- A) Travel only
- B) Higher education ✓
- C) Sports competitions
- D) Entertainment careers only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

15. Higher education generally improves employment opportunities.

- A) Reduces employment opportunities
- B) Improves employment opportunities ✓
- C) Eliminates education
- D) Increases unemployment permanently

Answer: B

16. Anticipatory socialization prepares students for future roles.

- A) Childhood games only
- B) Future social and occupational roles ✓
- C) Retirement planning only
- D) Political campaigns only

Answer: B

17. Vocational training is an example of anticipatory socialization.

- A) Vocational training ✓
- B) Voting only
- C) Tourism only
- D) Sports entertainment only

Answer: A

18. Technological advancement increases the demand for specialized workers.

- A) Unskilled workers only
- B) Specialized workers ✓
- C) Fewer educated workers
- D) No workers

Answer: B

19. One latent function of schooling is creating valuable social networks.

- A) Social networks ✓
- B) Inflation
- C) Tax collection
- D) Political dictatorship

Answer: A

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

20. Research shows people with higher education generally live longer.

- A) Lower education always increases lifespan
- B) Higher education is associated with longer life expectancy ✓
- C) Education has no effect on health
- D) Only wealth determines lifespan

Answer: B

Lesson-37: FUNCTIONS OF SCHOOLING-II

IMPORTANT EXAM POINTS

The conflict perspective views education as a system that maintains power, inequality, and social control.

Social control refers to the enforcement of social norms through rules, authority, punishment, and institutions.

Conflict theorists believe schools preserve existing social hierarchies rather than eliminate inequality.

Education acts as a mechanism for maintaining the interests of dominant social groups.

In Pakistan, social control may include censorship, restrictions on speech, and suppression of political opposition.

Conflict theorists argue that education often benefits privileged groups more than disadvantaged groups.

Social stratification occurs when educational opportunities are distributed unequally among different social classes.

Students from wealthy families usually receive better educational resources and opportunities.

Karl Marx and Friedrich Engels supported free and equal access to education for everyone.

Marx believed limited access to education allowed the bourgeoisie to dominate the proletariat.

Mass education does not always guarantee equal educational opportunities.

Schools often reproduce existing social inequalities across generations.

Reproduction of social inequality means students' social backgrounds strongly influence their educational success.

Conflict theorists argue that education legitimizes the existing social order.

Schools teach obedience, conformity, and acceptance of authority.

The education system controls knowledge by deciding what should be taught.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Control of knowledge may suppress alternative viewpoints and critical thinking.

Schools prepare students for different positions in the workforce according to their social class.

Education reinforces the division of labor and occupational class distinctions.

Schools may perform repressive functions by discouraging criticism and independent thinking.

Students and teachers can resist inequality through educational reforms and inclusive practices.

Intelligence tests may contain cultural bias that favors students from privileged backgrounds.

The Correspondence Principle was introduced by Samuel Bowles and Herbert Gintis.

The Correspondence Principle states that schools reflect the structure and values of society.

Family background often predicts college attendance more accurately than intelligence test scores.

Students from wealthy families are more likely to attend prestigious universities.

Elite education provides better career opportunities and higher-paying jobs.

The hidden curriculum consists of unwritten values, attitudes, and behaviors taught in schools.

Examples of the hidden curriculum include discipline, obedience, conformity, punctuality, and respect for authority.

Schools prepare students for social roles similar to those of their parents.

Middle-class schools emphasize proper language and manners, while disadvantaged schools often emphasize obedience.

Screening and allocation refer to sorting individuals into different educational and occupational positions.

Conflict theorists believe screening often favors students with greater social and economic resources.

Educational credentials include grades, certificates, diplomas, and degrees.

A credentialed society places great importance on formal educational qualifications.

Schools act as screening devices by awarding credentials that determine future opportunities.

Educational credentials do not always reflect ability alone; social background also influences success.

Vocational training and apprenticeships provide alternatives to traditional academic credentials.

The interactionist perspective focuses on daily interactions between students, teachers, and administrators.

The Pygmalion Effect occurs when teachers' expectations influence students' actual performance.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Labelling students often creates a self-fulfilling prophecy.

A self-fulfilling prophecy occurs when expectations influence behavior until those expectations become reality.

Positive labels encourage confidence and achievement.

Negative labels reduce motivation and academic performance.

Students may be labelled as gifted, slow learners, troublemakers, or intelligent based on teachers' perceptions.

Labels based on race, gender, or social class can reinforce inequality.

Labelling affects both academic achievement and social relationships within schools.

Changing stereotypes and prejudices can reduce the negative effects of self-fulfilling prophecies.

The interactionist perspective explains how everyday classroom interactions influence educational outcomes.

Conflict theorists emphasize educational inequality, while interactionists focus on classroom behavior and labelling.

20 Statement-Based MCQs

1. According to the conflict perspective, education mainly maintains existing power structures.

- A) Eliminates inequality
- B) Maintains power structures ✓
- C) Promotes complete equality
- D) Removes social classes

Answer: B

2. Social control refers to enforcing social norms and expectations.

- A) Economic planning
- B) Social norms enforcement ✓
- C) Population growth
- D) Industrial production

Answer: B

3. Karl Marx believed free education should be available to everyone.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Only elites
- B) Everyone ✓
- C) Government officials only
- D) Business owners only

Answer: B

4. Social stratification in education results from unequal educational opportunities.

- A) Equal opportunities
- B) Unequal opportunities ✓
- C) Religious freedom
- D) Political participation

Answer: B

5. Conflict theorists argue schools reproduce social inequality.

- A) Remove inequality
- B) Reproduce inequality ✓
- C) End poverty completely
- D) Prevent education

Answer: B

6. Schools legitimize the existing social order by teaching obedience and conformity.

- A) Rebellion
- B) Obedience and conformity ✓
- C) Revolution
- D) Political protests

Answer: B

7. The hidden curriculum mainly teaches unwritten social values and behaviors.

- A) Mathematics only
- B) Unwritten behaviors and values ✓
- C) Science experiments
- D) Foreign languages only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

8. Intelligence tests may favor certain social groups because of cultural bias.

- A) Physical strength
- B) Cultural bias ✓
- C) Age differences
- D) Weather conditions

Answer: B

9. The Correspondence Principle was proposed by Samuel Bowles and Herbert Gintis.

- A) Karl Marx
- B) Samuel Bowles and Herbert Gintis ✓
- C) Max Weber
- D) Emile Durkheim

Answer: B

10. Family background often predicts college attendance better than test scores.

- A) Test scores only
- B) Family background ✓
- C) Physical fitness
- D) Sports performance

Answer: B

11. Schools act as screening devices by awarding educational credentials.

- A) Sports medals
- B) Educational credentials ✓
- C) Birth certificates
- D) Driver licenses

Answer: B

12. A credentialed society values formal educational qualifications.

- A) Family wealth only
- B) Educational qualifications ✓
- C) Physical appearance
- D) Political opinions

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

13. Screening and allocation sort individuals into educational and occupational positions.

- A) Entertainment careers only
- B) Educational and occupational positions ✓
- C) Political parties only
- D) Religious organizations only

Answer: B

14. The interactionist perspective studies everyday classroom interactions.

- A) Government policies only
- B) Everyday classroom interactions ✓
- C) International trade
- D) Military systems

Answer: B

15. The Pygmalion Effect occurs when teachers' expectations influence student performance.

- A) Student attendance
- B) Teacher expectations ✓
- C) Government funding
- D) School buildings

Answer: B

16. A self-fulfilling prophecy means expectations eventually become reality.

- A) Expectations become reality ✓
- B) Random success
- C) Political change
- D) Economic recession

Answer: A

17. Positive labelling usually improves student confidence and achievement.

- A) Reduces achievement
- B) Improves achievement ✓
- C) Has no effect
- D) Causes unemployment

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

18. Negative labels may decrease students' motivation and academic success.

- A) Increase confidence
- B) Decrease motivation ✓
- C) Improve intelligence
- D) Increase attendance only

Answer: B

19. Conflict theorists believe educational inequality mainly benefits privileged social groups.

- A) Poor families only
- B) Privileged social groups ✓
- C) All citizens equally
- D) Rural populations only

Answer: B

20. The interactionist perspective explains how labelling influences students' future behavior.

- A) Economic inflation
- B) Student behavior through labelling ✓
- C) Population growth
- D) Industrial development

Answer: B

Lesson-38: POPULATION STUDY AND ITS SIGNIFICANCE

IMPORTANT EXAM POINTS

Population study (Demography) is the scientific study of population size, composition, distribution, and changes.

The three major demographic variables are fertility, mortality, and migration.

Fertility refers to the number of live births per woman during her reproductive years.

Fertility rate is the average number of children born to a woman during her lifetime.

Fecundity refers to the biological ability of women to bear children.

Crude Birth Rate (CBR) is the annual number of live births per 1,000 population.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Factors affecting fertility include age at marriage, access to contraception, education, culture, religion, and economic conditions.

Women's education and employment generally reduce fertility rates.

Pakistan's fertility rate has declined but remains high compared to many neighboring countries.

Mortality refers to the occurrence of deaths in a population.

Crude Death Rate (CDR) is the annual number of deaths per 1,000 population.

Life expectancy is an important indicator of mortality.

Mortality is influenced by healthcare, nutrition, sanitation, clean water, and socioeconomic conditions.

Improved healthcare reduces mortality and increases life expectancy.

Pakistan has reduced mortality rates but maternal and infant mortality remain significant concerns.

Migration is the movement of people from one place to another.

The two major types of migration are internal migration and international migration.

Internal migration occurs within the same country.

International migration occurs between different countries.

Net Migration Rate is the difference between immigrants and emigrants per 1,000 population.

Push factors include poverty, unemployment, conflict, political persecution, and natural disasters.

Pull factors include better jobs, education, security, higher income, and improved living conditions.

Migration changes population distribution but does not change the total world population.

Population composition refers to the characteristics of a population such as age, sex, race, and ethnicity.

Population density means the number of people living within a specific geographic area.

Sex ratio is the number of males per 100 females.

Age-sex pyramids are used to study the age and gender structure of a population.

Urban areas generally have higher population density than rural areas.

Karachi and Lahore are among Pakistan's most densely populated cities.

Population growth refers to the increase in the number of people over time.

Population Growth Rate is the annual percentage increase or decrease in population.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Doubling Time is the number of years required for a population to double in size.

Higher growth rates result in shorter doubling times.

Rapid population growth increases pressure on healthcare, education, housing, employment, and natural resources.

Family planning is an effective method of controlling population growth.

Family planning improves maternal and child health.

Family planning empowers women by giving them control over reproductive choices.

Smaller families improve living standards and economic opportunities.

Family planning contributes to sustainable development and environmental protection.

Population forecasting uses the demographic equation.

Growth Rate = Births – Deaths + Net Migration

Forecasting population growth is difficult because wars, epidemics, migration, economic conditions, disasters, and government policies continuously affect birth and death rates.

Government population policies can increase or decrease birth rates depending on national objectives.

Accurate demographic data is essential for planning healthcare, education, infrastructure, and economic development.

20 Statement-Based MCQs

1. Fertility refers to the number of live births per woman during her reproductive years.

- A) Number of deaths
- B) Number of live births per woman ✓
- C) Number of marriages
- D) Number of immigrants

Answer: B

2. Fecundity refers to a woman's biological ability to bear children.

- A) Mortality rate
- B) Biological ability to bear children ✓
- C) Population density
- D) Migration rate

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

3. Crude Birth Rate measures annual live births per 1,000 population.

- A) Deaths per 1,000 people
- B) Live births per 1,000 people ✓
- C) Marriages per 1,000 people
- D) Migrants per 1,000 people

Answer: B

4. Women's education generally contributes to lower fertility rates.

- A) Higher fertility always
- B) Lower fertility rates ✓
- C) Higher mortality rates
- D) Increased migration only

Answer: B

5. Mortality refers to the occurrence of deaths within a population.

- A) Births only
- B) Deaths within a population ✓
- C) Marriage rates
- D) Employment rates

Answer: B

6. Crude Death Rate measures annual deaths per 1,000 population.

- A) Births per 1,000 people
- B) Deaths per 1,000 people ✓
- C) Immigrants per 1,000 people
- D) Emigrants per 1,000 people

Answer: B

7. Internal migration occurs within the same country.

- A) Between continents only
- B) Within the same country ✓
- C) Between planets
- D) Between oceans only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

8. International migration involves movement from one country to another.

- A) Within one village
- B) From one country to another ✓
- C) Between classrooms
- D) Between schools only

Answer: B

9. Push factors encourage people to leave their place of residence.

- A) Better employment only
- B) Poverty and conflict ✓
- C) Tourist attractions
- D) Better climate only

Answer: B

10. Pull factors attract people to a new location.

- A) Better jobs and education ✓
- B) Natural disasters
- C) Political violence
- D) Disease outbreaks

Answer: A

11. Population composition includes characteristics such as age and sex.

- A) Mountains only
- B) Age and sex ✓
- C) Weather only
- D) Rivers only

Answer: B

12. Population density refers to the number of people living in a specific area.

- A) Literacy rate
- B) Number of people per area ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Number of schools
- D) Number of hospitals

Answer: B

13. The sex ratio is the number of males per 100 females.

- A) Females per 100 males
- B) Males per 100 females ✓
- C) Births per family
- D) Children per household

Answer: B

14. Population Growth Rate is expressed as an annual percentage.

- A) Daily percentage only
- B) Annual percentage ✓
- C) Monthly percentage only
- D) Weekly percentage only

Answer: B

15. Doubling Time refers to the years required for a population to double in size.

- A) Population decline
- B) Years required to double population ✓
- C) Number of births
- D) Migration period

Answer: B

16. Family planning improves maternal and child health.

- A) Reduces education
- B) Improves maternal and child health ✓
- C) Increases mortality
- D) Reduces employment

Answer: B

17. Family planning contributes to women's empowerment.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Women's empowerment ✓
- B) Higher mortality
- C) Increased unemployment
- D) Lower literacy only

Answer: A

18. Population forecasting uses the demographic equation.

- A) Newton's Law
- B) Demographic equation ✓
- C) Pythagoras theorem
- D) Ohm's law

Answer: B

19. The demographic equation is $\text{Growth Rate} = \text{Births} - \text{Deaths} + \text{Net Migration}$.

- A) Births + Deaths + Migration
- B) Births - Deaths + Net Migration ✓
- C) Births × Deaths
- D) Migration - Births

Answer: B

20. Wars, epidemics, migration, and government policies make population forecasting difficult.

- A) School examinations only
- B) Wars, epidemics, migration, and government policies ✓
- C) Sports competitions
- D) Weather forecasts only

Answer: B

Lesson-39: THEORIES OF POPULATION GROWTH

IMPORTANT EXAM POINTS

Population growth theories explain the causes, consequences, and control of population increase.

Thomas Robert Malthus presented the Malthusian Theory of Population Growth in 1798.

Malthus stated that population grows geometrically while food production grows arithmetically.

According to Malthus, unchecked population growth eventually causes famine, disease, and poverty.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Malthus believed natural checks such as war, famine, epidemics, and starvation reduce population growth.

Preventive checks include delayed marriage and moral restraint to reduce birth rates.

The Malthusian theory became famous through *An Essay on the Principle of Population*.

Paul Ehrlich revived Malthusian ideas in 1968 through his book *The Population Bomb*.

Ehrlich argued that rapid population growth threatens food supplies and environmental resources.

The Population Bomb emphasized shortages of clean water, clean air, and natural resources in addition to food.

Demographic Transition Theory explains population growth through three stages of development.

Stage 1 has high birth rates and high death rates, resulting in slow population growth.

Stage 2 has high birth rates and low death rates, causing rapid population growth.

Stage 3 has low birth rates and low death rates, leading to stable or slow population growth.

Industrialization, urbanization, education, and family planning help countries move into Stage 3.

Demographic Transition Theory predicts that most countries eventually achieve population stability.

Marx and Engels rejected Malthus' claim that overpopulation is the main cause of poverty.

Marxian Theory argues that poverty results from capitalism and unequal distribution of wealth.

According to Marx, science and technology can increase production to meet population needs.

Marx believed population growth should increase wealth if resources are distributed fairly.

The Second Demographic Transition refers to modern changes in family behavior since the mid-20th century.

The Second Demographic Transition includes delayed marriage, delayed childbearing, lower fertility, and changing family structures.

Greater access to contraception and changing social values contributed to the Second Demographic Transition.

The Neo-Malthusians believe rapid population growth will eventually exceed available resources.

Neo-Malthusians support stronger population control and family planning programs.

Neo-Malthusians warn that exponential population growth threatens future food security.

Anti-Malthusians believe technological progress and demographic transition will solve population problems.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Anti-Malthusians argue that birth rates naturally decline as countries become more developed.

Europe's demographic transition is considered evidence supporting the Anti-Malthusian view.

Developing countries are expected to experience declining birth rates as modernization continues.

Marx argued that capitalism creates unemployment by replacing workers with machines.

According to Marx, population growth itself is not responsible for poverty.

Technology, improved agriculture, and scientific innovation increase food production.

Population theories help governments design policies for sustainable development and resource management.

Family planning, education, and economic development are important tools for controlling population growth.

Pakistan faces challenges related to rapid population growth, resource allocation, and sustainable development.

20 Statement-Based MCQs

1. Thomas Malthus argued that population grows geometrically while food supply grows arithmetically.

- A) Karl Marx
- B) Thomas Malthus ✓
- C) Paul Ehrlich
- D) Max Weber

Answer: B

2. According to Malthus, food production increases in an _____ pattern.

- A) Geometric
- B) Exponential
- C) Arithmetic ✓
- D) Circular

Answer: C

3. Malthus predicted that unchecked population growth would eventually cause famine and poverty.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Peace and prosperity
- B) Famine and poverty ✓
- C) Industrialization only
- D) Urbanization only

Answer: B

4. Paul Ehrlich revived Malthusian ideas through his book ____.

- A) Wealth of Nations
- B) The Population Bomb ✓
- C) Das Kapital
- D) The Social Contract

Answer: B

5. Ehrlich emphasized that environmental resources are also threatened by rapid population growth.

- A) Sports facilities
- B) Environmental resources ✓
- C) Luxury goods
- D) Tourism only

Answer: B

6. Stage 1 of Demographic Transition Theory is characterized by high birth rates and high death rates.

- A) High birth and high death rates ✓
- B) Low birth and low death rates
- C) High birth and low death rates
- D) Low birth and high death rates

Answer: A

7. Stage 2 of Demographic Transition Theory results in rapid population growth.

- A) Stable population
- B) Population decline
- C) Rapid population growth ✓
- D) Zero population growth

Answer: C

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

8. Stage 3 of Demographic Transition Theory is marked by low birth rates and low death rates.

- A) High birth and high death rates
- B) High birth and low death rates
- C) Low birth and low death rates ✓
- D) High migration only

Answer: C

9. Karl Marx believed poverty is mainly caused by capitalism rather than overpopulation.

- A) Climate change
- B) Capitalism ✓
- C) Religion
- D) Geography

Answer: B

10. Marx argued that science and technology can increase production to support population growth.

- A) Science and technology ✓
- B) War only
- C) Religion only
- D) Migration only

Answer: A

11. The Second Demographic Transition includes delayed marriage and delayed childbearing.

- A) Early marriage only
- B) Delayed marriage and childbearing ✓
- C) Increased mortality
- D) Increased warfare

Answer: B

12. The Neo-Malthusians believe exponential population growth threatens future food supplies.

- A) Neo-Malthusians ✓
- B) Functionalists
- C) Symbolic Interactionists
- D) Conflict Theorists

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: A

13. Neo-Malthusians strongly support family planning programs.

- A) Family planning ✓
- B) Higher taxes only
- C) Military expansion
- D) Urban migration only

Answer: A

14. Anti-Malthusians believe modernization naturally reduces birth rates.

- A) Modernization ✓
- B) Increased wars
- C) Disease outbreaks
- D) Less education

Answer: A

15. Europe is often used as an example supporting the Anti-Malthusian view.

- A) Europe ✓
- B) Antarctica
- C) Australia only
- D) Greenland

Answer: A

16. According to Marx, machines replacing workers can increase unemployment.

- A) Increase employment only
- B) Increase unemployment ✓
- C) Eliminate poverty immediately
- D) Reduce industrialization

Answer: B

17. Demographic Transition Theory predicts that countries eventually achieve population stability.

- A) Permanent population explosion
- B) Population stability ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Constant migration only
- D) Permanent high birth rates

Answer: B

18. The Malthusian Theory mainly focuses on the relationship between population and food supply.

- A) Population and food supply ✓
- B) Population and sports
- C) Population and tourism
- D) Population and entertainment

Answer: A

19. Family planning is considered an important strategy for sustainable population management.

- A) Family planning ✓
- B) Higher taxes only
- C) Military service
- D) International tourism

Answer: A

20. Pakistan continues to face challenges related to rapid population growth and resource allocation.

- A) Resource allocation ✓
- B) Space exploration only
- C) Polar climate
- D) Ocean pollution only

Answer: A

Lesson-40: ENVIRONMENT AND SOCIETY

IMPORTANT EXAM POINTS

Environment refers to the interaction between the natural world and human society.

Nature includes land, air, water, soil, plants, animals, and all natural resources necessary for life.

Ecology is the scientific study of the interaction between living organisms and their natural environment.

Environmental Sociology is the branch of sociology that studies the relationship between society and the environment.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Environmental problems are considered social problems because they result mainly from human activities.

The Ecological Footprint measures the amount of natural resources consumed by an individual, community, or society.

A larger ecological footprint indicates greater pressure on natural resources.

The Earth functions as a single global ecosystem in which all living organisms are interconnected.

Changes in one part of the ecosystem can affect the entire world.

Deforestation contributes to climate change, biodiversity loss, and environmental degradation.

Environmental sociology emphasizes that the physical environment should be an important variable in sociological research.

Human beings are only one species among many that depend on the natural environment.

Human actions often produce unintended environmental consequences.

The Earth has finite natural resources; therefore, unlimited economic growth is impossible.

Economic growth usually requires greater extraction of natural resources.

Excessive extraction of natural resources causes ecological problems.

Environmental degradation eventually limits economic growth.

Governments may contribute to environmental problems by encouraging excessive industrialization and capital accumulation.

The main goal of environmental sociology is to understand the interaction between society and the environment.

Technology improves living standards but can also damage the environment if not properly controlled.

Sustainable industrialization balances economic development with environmental protection.

Proper waste management and pollution control are essential for environmental conservation.

Structural Functionalism explains that environmental institutions help maintain social stability.

Conflict Theory argues that powerful groups benefit from natural resources while poorer communities suffer environmental damage.

Symbolic Interactionism explains how people's beliefs, values, and attitudes influence environmental behavior.

Ecological Modernization believes technological innovation can solve environmental problems.

Human Ecology studies the relationship between human populations and their environment.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Environmental Sociology focuses specifically on environmental attitudes, behavior, movements, and public policies.

Risk Society Theory was developed by **Ulrich Beck**.

Risk Society Theory explains that modern technology creates new environmental risks.

The concept of **Limits to Growth** states that unlimited population and economic growth cannot continue because Earth's resources are limited.

The **Tragedy of the Commons** explains how shared resources become depleted when individuals pursue their own self-interest.

The **Club of Rome** published the famous report **Limits to Growth (1972)**.

The report concluded that continued industrial growth and population growth would eventually create environmental crises.

Green movements encourage conservation, biodiversity protection, pollution control, and sustainable resource use.

Sustainable Development was introduced in the **United Nations report "Our Common Future" (1987)**.

Sustainable Development means meeting present needs without compromising the ability of future generations to meet their own needs.

Sustainable development promotes renewable resource use, biodiversity conservation, and pollution reduction.

The **Rio Earth Summit (1992)** promoted sustainable development worldwide.

Sustainable Development became one of the **Millennium Development Goals (MDGs)**.

Technology is a double-edged sword because it can both increase and reduce environmental risks.

Clean technologies reduce pollution and support sustainable development.

Environmental risks are distributed unequally, with poorer communities usually suffering greater environmental damage.

Government policies and environmental regulations help reduce pollution and environmental risks.

Pakistan's **Ten Billion Tree Tsunami** is an example of environmental conservation efforts.

Air pollution is one of Pakistan's most serious environmental problems.

Major causes of air pollution include vehicle emissions, industrial smoke, and burning solid waste.

Water scarcity in Pakistan is caused by climate change, population growth, and poor water management.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Deforestation results in soil erosion, biodiversity loss, and climate imbalance.

Land degradation includes soil erosion, salinity, and desertification.

Climate change has increased floods, droughts, glacier melting, and extreme weather events in Pakistan.

Poor waste management contributes to environmental pollution and health hazards.

Loss of biodiversity threatens Pakistan's wildlife and ecosystems.

Pakistan's energy crisis increases dependence on fossil fuels and greenhouse gas emissions.

Illegal wildlife trade threatens endangered species and ecological balance.

Rapid urbanization increases pollution, resource consumption, and environmental pressure.

Environmental protection requires cooperation between governments, industries, and individuals.

Environmental sustainability is essential for long-term economic and social development.

20 Statement-Based MCQs

1. Ecology is the scientific study of the interaction between living organisms and their environment.

- A) Human history only
- B) Interaction between living organisms and the environment ✓
- C) Political systems
- D) Economic development only

Answer: B

2. Environmental sociology studies the relationship between society and the environment.

- A) Society and environment ✓
- B) Only economics
- C) Only politics
- D) Only psychology

Answer: A

3. Environmental problems are mainly caused by human activities.

- A) Human activities ✓
- B) Natural disasters only

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- C) Planetary movements
- D) Ocean tides only

Answer: A

4. The Ecological Footprint measures human consumption of natural resources.

- A) Population density
- B) Human resource consumption ✓
- C) Economic growth only
- D) Climate only

Answer: B

5. The Earth functions as one interconnected global ecosystem.

- A) Independent ecosystems only
- B) One interconnected global ecosystem ✓
- C) Separate national ecosystems
- D) Artificial ecosystems only

Answer: B

6. Human actions often create unintended environmental consequences.

- A) Only intended effects
- B) Unintended environmental consequences ✓
- C) No environmental effects
- D) Only economic benefits

Answer: B

7. Conflict Theory states that environmental resources are distributed unequally.

- A) Equally distributed resources
- B) Unequal distribution of resources ✓
- C) Equal wealth for all
- D) No environmental issues

Answer: B

8. Risk Society Theory was developed by Ulrich Beck.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Karl Marx
- B) Max Weber
- C) Ulrich Beck ✓
- D) Emile Durkheim

Answer: C

9. The Club of Rome published the report "Limits to Growth."

- A) World Bank
- B) Club of Rome ✓
- C) UNESCO
- D) IMF

Answer: B

10. The concept of Limits to Growth argues that Earth's resources are finite.

- A) Unlimited resources
- B) Earth's resources are finite ✓
- C) Population never increases
- D) Pollution is unlimited

Answer: B

11. The Tragedy of the Commons explains the overuse of shared resources.

- A) Equal use of resources
- B) Overuse of shared resources ✓
- C) Population decline
- D) Economic inflation

Answer: B

12. Sustainable Development was introduced in the report "Our Common Future."

- A) Silent Spring
- B) Our Common Future ✓
- C) Green Revolution
- D) Earth Science Report

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

13. Sustainable Development aims to protect resources for future generations.

- A) Future generations ✓
- B) Present generation only
- C) Industries only
- D) Urban populations only

Answer: A

14. Ecological Modernization believes technology can help solve environmental problems.

- A) Technology worsens all problems
- B) Technology can support sustainability ✓
- C) Technology should be banned
- D) Technology has no role

Answer: B

15. Air pollution in Pakistan is mainly caused by vehicles, industries, and waste burning.

- A) Vehicles, industries, and waste burning ✓
- B) Rivers only
- C) Forests only
- D) Mountains only

Answer: A

16. Water scarcity in Pakistan is increased by climate change and poor water management.

- A) Climate change and poor water management ✓
- B) Tourism only
- C) Sports activities
- D) Education policies

Answer: A

17. Deforestation causes biodiversity loss and soil erosion.

- A) Better climate only
- B) Biodiversity loss and soil erosion ✓
- C) Increased rainfall only
- D) Population decline only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

18. Clean technology helps reduce environmental pollution.

- A) Increases pollution
- B) Reduces environmental pollution ✓
- C) Stops economic growth
- D) Eliminates industries

Answer: B

19. Pakistan's Ten Billion Tree Tsunami is an environmental conservation initiative.

- A) Agricultural project only
- B) Environmental conservation initiative ✓
- C) Energy project only
- D) Trade agreement

Answer: B

20. Rapid urbanization increases pressure on natural resources and the environment.

- A) Reduces pollution completely
- B) Increases environmental pressure ✓
- C) Eliminates climate change
- D) Stops population growth

Answer: B

Lesson-41: SOCIAL CHANGE

IMPORTANT EXAM POINTS

Social change is the process through which patterns of social behavior, relationships, institutions, and social structures change over time.

All societies experience continuous social change, but the speed of change differs from one society to another.

Industrialization greatly accelerated the pace of social change.

Macro-change refers to gradual, large-scale social changes that occur over long periods.

Modernization is a major example of macro-change.

Modernization transforms societies from simple social structures into more complex institutions.

The shift from industrial society to post-industrial society is an example of macro-change.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Pakistan's transition from an agriculture-based economy to a service and industrial economy is an example of macro-change.

Micro-change consists of small, rapid changes that occur through everyday human interactions.

Small individual decisions collectively contribute to large social changes.

People may either welcome or resist social change depending on how it affects their interests.

Social change often produces unintended social consequences.

Societies move toward the future while being influenced by their traditions and past experiences.

Cyclical theories believe history and societies move in repeating cycles.

Oswald Spengler believed civilizations pass through stages of birth, growth, decline, and death.

Arnold Toynbee believed civilizations can survive decline through creative human efforts.

Pitirim Sorokin identified three cultural mentalities: ideational, sensate, and idealistic.

Contemporary cyclical theories explain recurring changes in fashion, politics, public opinion, and social trends.

Functionalist and evolutionary perspectives believe societies generally move from simple to complex forms.

Linear theories argue that social progress moves forward rather than repeating itself.

Auguste Comte proposed three stages of development: theological, metaphysical, and positivistic.

Herbert Spencer introduced the concept of "Survival of the Fittest."

Spencer believed societies survive by adapting to changing environments.

Émile Durkheim introduced the concepts of mechanical solidarity and organic solidarity.

Mechanical solidarity exists in simple societies with similar beliefs and occupations.

Organic solidarity develops in modern societies through specialization and interdependence.

Karl Marx believed conflict is the major force behind social change.

According to Marx, class conflict between capitalists and workers drives historical development.

Marx believed capitalism would eventually be replaced by a classless society.

Modern conflict theorists study conflicts based on class, race, ethnicity, religion, gender, and age.

Contemporary sociologists believe social change results from the interaction of many internal and external factors.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Major sources of social change include the physical environment, technology, population, cultural innovation, and social conflict.

Technology improves living standards but also creates new challenges such as surveillance and social control.

Population growth, migration, and demographic changes strongly influence society.

Discovery, invention, and diffusion are important sources of cultural innovation.

Social movements are organized collective efforts to promote or resist social change.

Social movements operate outside established institutions.

Civil rights, feminist, and environmental movements have produced significant social reforms.

Social movements increase public awareness, challenge injustice, and influence government policies.

Grassroots movements empower communities and encourage democratic participation.

Modern societies increasingly rely on social movements to achieve political, cultural, and social reforms.

20 Statement-Based MCQs

1. Social change refers to changes in social behavior, institutions, and relationships over time.

A) Biological evolution only

B) Changes in social behavior and institutions ✓

C) Weather patterns

D) Economic inflation only

Answer: B

2. Macro-change occurs gradually and affects society on a large scale.

A) Personal habits only

B) Large-scale gradual social change ✓

C) Individual emotions

D) Daily routines only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

3. Modernization is an example of macro-change.

- A) Population census
- B) Modernization ✓**
- C) Family dinner
- D) Classroom discussion

Answer: B

4. Micro-change results from everyday interactions and individual decisions.

- A) Government policies only
- B) Everyday interactions and decisions ✓**
- C) Natural disasters
- D) International wars only

Answer: B

5. Small individual actions can collectively produce major social change.

- A) Only government actions matter
- B) Individual actions collectively change society ✓**
- C) Technology alone changes society
- D) Social change never occurs

Answer: B

6. Cyclical theories argue that societies move in repeating cycles.

- A) Straight-line progress only
- B) Repeating cycles of change ✓**
- C) Random development

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

D) No social change

Answer: B

7. Pitirim Sorokin identified three cultural mentalities.

A) Economic, political, and social

B) Ideational, sensate, and idealistic ✓

C) Urban, rural, and tribal

D) Capitalist, socialist, and communist

Answer: B

8. Arnold Toynbee believed civilizations could survive through creative efforts.

A) Karl Marx

B) Arnold Toynbee ✓

C) Herbert Spencer

D) Émile Durkheim

Answer: B

9. Functionalist theory believes societies develop from simple to complex forms.

A) From complex to simple

B) From simple to complex ✓

C) Without development

D) Through random change only

Answer: B

10. Auguste Comte proposed the theological, metaphysical, and positivistic stages.

A) Economic stages

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

B) Theological, metaphysical, and positivistic ✓

C) Mechanical stages

D) Political stages

Answer: B

11. Herbert Spencer introduced the phrase "Survival of the Fittest."

A) Karl Marx

B) Max Weber

C) Herbert Spencer ✓

D) Auguste Comte

Answer: C

12. Durkheim's organic solidarity develops through specialization and interdependence.

A) Equal occupations

B) Specialization and interdependence ✓

C) Tribal traditions only

D) Military rule

Answer: B

13. Karl Marx believed class conflict is the driving force of social change.

A) Religion

B) Technology

C) Class conflict ✓

D) Education

Answer: C

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

14. Contemporary sociologists explain social change through multiple interacting factors.

- A) One factor only
- B) Multiple interacting factors ✓**
- C) Luck alone
- D) Geography only

Answer: B

15. Technology is an important source of social change.

- A) Technology ✓**
- B) Climate only
- C) Geography only
- D) Sports only

Answer: A

16. Population growth and migration contribute to social change.

- A) Population growth and migration ✓**
- B) Earthquakes only
- C) Currency exchange
- D) Weather forecasting

Answer: A

17. Cultural innovation includes discovery, invention, and diffusion.

- A) Discovery, invention, and diffusion ✓**
- B) Population and migration
- C) Climate and rainfall
- D) Inflation and trade

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: A

18. Social movements are organized efforts to promote or resist social change.

- A) Organized social change efforts ✓
- B) Individual hobbies
- C) Family traditions only
- D) Government departments

Answer: A

19. Civil rights and feminist movements are examples of successful social movements.

- A) Sports organizations
- B) Civil rights and feminist movements ✓**
- C) Banking institutions
- D) Military alliances

Answer: B

20. Social movements help create social reforms by raising awareness and influencing society.

- A) Prevent all change
- B) Promote social reforms ✓**
- C) Reduce education
- D) Eliminate democracy

Answer: B

Lesson-42: SOCIAL CHANGE – II

IMPORTANT EXAM POINTS

Global social change refers to the transformation of societies, cultures, and human behavior on a worldwide scale.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Global social change is driven by technological advancements, economic globalization, cultural exchange, political movements, environmental challenges, and demographic shifts.

Global social change highlights the increasing interdependence of countries and societies.

International cooperation is necessary to solve global social, economic, and environmental challenges.

Social change is a continuous process that affects social, cultural, political, economic, and technological life.

Social crises occur when normal social functioning is disrupted by instability, conflict, or rapid change.

Rapid and disruptive social change can create inequalities, conflicts, and social unrest.

Resistance to change often results in protests, violence, and political instability.

Political revolutions and regime changes may lead to widespread social crises.

Economic recessions increase unemployment and poverty, while rapid economic growth may increase inequality.

Technological and cultural changes can create conflicts by challenging traditional values.

Environmental changes such as climate change and natural disasters can cause displacement and social instability.

Social change in Pakistan is influenced by urbanization, education, globalization, technology, politics, religion, and economic development.

Urbanization has changed lifestyles, occupations, and social relationships in Pakistan.

Educational expansion has improved literacy, awareness, and critical thinking.

Women's empowerment has increased through legal reforms and advocacy for gender equality.

Technology and media have increased political and social awareness in Pakistan.

Political transitions between civilian and military governments have significantly influenced Pakistan's social development.

General Zia-ul-Haq promoted religious conservatism, while General Pervez Musharraf promoted enlightened moderation.

Industrialization, globalization, and urbanization have transformed cities such as Karachi and Lahore.

The three major internal sources of social change are invention, discovery, and diffusion.

Invention creates new technologies, ideas, and social patterns.

Discovery increases knowledge about existing facts and improves society.

Diffusion spreads ideas, technology, products, and culture from one society to another.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Material culture usually changes faster than non-material culture.

Demographic changes such as population growth, migration, ageing, and changing family size promote social change.

Migration contributes to urbanization and changes social structure.

External sources of social change include technology, economy, politics, media, environment, education, international relations, and crisis events.

Technological advancements transform communication, education, healthcare, and business.

Globalization increases cultural exchange and economic interdependence.

Political movements and government policies bring legal and social reforms.

Media plays an important role in spreading new ideas, beliefs, and lifestyles.

Environmental challenges encourage changes in environmental policies and sustainable practices.

Educational institutions shape beliefs, values, attitudes, and social behavior.

Max Weber believed that ideas are the major driving force behind social change.

Weber emphasized that religion and the Protestant work ethic contributed to the rise of industrial capitalism.

Charismatic leaders can inspire people and transform society through ideas.

Karl Marx believed inequality and class conflict are the major causes of social change.

According to Marx, conflict between capitalists and workers drives historical development.

Marx argued that social conflict leads to reforms that improve the lives of disadvantaged groups.

Both Weber and Marx agreed that society changes continuously but explained its causes differently.

20 Statement-Based MCQs

1. Global social change refers to worldwide transformation in societies and human behavior.

A) Local cultural festivals only

B) Worldwide transformation of societies and human behavior ✓

C) Population decline only

D) Political elections only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

2. Global social change is mainly driven by technology, globalization, and cultural exchange.

- A) Technology, globalization, and cultural exchange ✓
- B) Weather conditions only
- C) Sports competitions
- D) Geological movements

Answer: A

3. Social crises occur when normal social functioning is disrupted.

- A) Stable social life
- B) Breakdown of normal social functioning ✓**
- C) Increased agricultural production
- D) Higher literacy only

Answer: B

4. Rapid social change may create inequality and social unrest.

- A) Equal opportunities only
- B) Inequality and social unrest ✓**
- C) No social effects
- D) Political stability only

Answer: B

5. Resistance to change often leads to protests and conflicts.

- A) Economic development only
- B) Protests and social conflict ✓**
- C) Higher birth rates

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

D) Climate stability

Answer: B

6. Urbanization is one of the major causes of social change in Pakistan.

A) Urbanization ✓

B) Desertification only

C) Ocean currents

D) Volcanic activity

Answer: A

7. General Zia-ul-Haq's era promoted religious conservatism.

A) Industrial capitalism

B) Liberal democracy only

C) Religious conservatism ✓

D) Globalization

Answer: C

8. The three major internal sources of social change are invention, discovery, and diffusion.

A) Migration, trade, and tourism

B) Invention, discovery, and diffusion ✓

C) Politics, religion, and economy

D) Education, media, and health

Answer: B

9. Diffusion refers to the spread of ideas and culture from one society to another.

A) Population growth

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

B) Spread of ideas and culture ✓

C) Climate change

D) Industrial decline

Answer: B

10. Demographic change includes migration, ageing, and population changes.

A) Currency exchange

B) Migration and population changes ✓

C) Industrial output

D) Foreign investment

Answer: B

11. Technological advancement is an important external source of social change.

A) Religious rituals

B) Technological advancement ✓

C) Earthquakes only

D) Tribal customs only

Answer: B

12. Globalization increases cultural and economic interdependence among nations.

A) National isolation

B) Cultural and economic interdependence ✓

C) Population decline

D) Agricultural production only

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

13. Media influences society by spreading new ideas and values.

- A) Population growth
- B) Spreading ideas and values ✓**
- C) Geological changes
- D) Rainfall patterns

Answer: B

14. Educational institutions shape people's beliefs, attitudes, and behavior.

- A) Transportation only
- B) Beliefs, attitudes, and behavior ✓**
- C) Weather forecasting
- D) Agricultural production

Answer: B

15. Max Weber believed ideas are the main force behind social change.

- A) Karl Marx
- B) Max Weber ✓**
- C) Auguste Comte
- D) Herbert Spencer

Answer: B

16. Weber linked the Protestant work ethic with the rise of industrial capitalism.

- A) Feudalism
- B) Industrial capitalism ✓**
- C) Socialism
- D) Communism

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

17. Karl Marx believed class conflict drives social change.

- A) Religion
- B) Education
- C) Class conflict ✓**
- D) Migration

Answer: C

18. According to Karl Marx, inequality creates pressure for social reforms.

- A) Equality
- B) Inequality ✓**
- C) Industrial growth only
- D) Climate change

Answer: B

19. Migration contributes to urbanization and changes in social structure.

- A) Decreases population permanently
- B) Changes social structure ✓**
- C) Eliminates cities
- D) Stops industrialization

Answer: B

20. Both Max Weber and Karl Marx explained different causes of social change.

- A) They believed society never changes.
- B) They explained different causes of social change. ✓**

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

C) They opposed sociology.

D) They focused only on biology.

Answer: B

Lesson-43: COLLECTIVE BEHAVIOR

IMPORTANT EXAM POINTS

Collective behavior refers to the spontaneous, temporary, and unstructured behavior of people responding to a common event or situation.

Collective behavior challenges the idea that society is always orderly and predictable.

Interactionism explains that collective behavior develops through shared meanings and interpretations.

The major forms of collective behavior include crowds, masses, publics, riots, and social movements.

Crowds involve people gathered in the same physical location.

Masses consist of large numbers of people who are geographically dispersed but connected through communication.

Social movements are organized, long-term efforts to promote or resist social change.

The Lawyers' Movement (2007–2009) in Pakistan is an example of a successful social movement.

Structural Strain Theory states that collective behavior occurs when there is a gap between social goals and the means to achieve them.

Relative Deprivation Theory explains that people engage in collective behavior when they feel deprived compared to others.

Collective behavior often creates emergent norms that develop spontaneously in new situations.

Collective behavior has played a major role in historical changes such as the Civil Rights Movement and anti-Apartheid movement.

Contagion Theory was proposed by Gustave Le Bon.

Contagion Theory argues that crowd emotions spread rapidly through suggestion and anonymity.

Convergence Theory states that people with similar beliefs and attitudes gather together and act collectively.

Emergent Norm Theory explains that people create new group norms while interacting in unfamiliar situations.

Value-Added Theory was developed by Neil J. Smelser.

Value-Added Theory identifies five conditions necessary for collective behavior.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

The five conditions are structural conduciveness, social control factors, structural strains, generalized beliefs, and mobilization for action.

Structural conduciveness means society allows conditions that make collective behavior possible.

Structural strains include poverty, injustice, discrimination, and economic uncertainty.

Mobilization for action occurs when leaders organize people into collective action.

Crowds involve direct face-to-face interaction, whereas masses influence each other indirectly through media.

Mass suicide is one of the rarest forms of collective behavior.

The Jonestown tragedy (1978) is a famous example of mass suicide.

Mass media plays an important role in promoting or discouraging collective behavior.

Fads are short-term, unconventional, and rapidly changing forms of collective behavior.

Fashions are long-lasting and widely accepted styles that often return in cycles.

Rumors are unverified pieces of information spread by word of mouth or media.

Rumors usually emerge during periods of uncertainty or lack of reliable information.

Public opinion represents the collective beliefs and attitudes of society.

Mass hysteria involves widespread fear, panic, or anxiety spreading rapidly among people.

Social movements are organized, goal-directed, and relatively permanent compared to crowds and riots.

Social movement organizations operate outside formal political institutions.

Relative Deprivation Theory explains that social movements begin when people feel unfairly deprived.

Resource Mobilization Theory argues that successful movements depend on leadership, money, organization, media, and resources.

Frame Alignment refers to matching people's beliefs with the goals of a social movement.

Social movements are classified into reform, utopian, revolutionary, and resistance movements.

Reform movements seek limited improvements within existing institutions.

Utopian movements attempt to create ideal societies.

Revolutionary movements aim to replace existing institutions with entirely new systems.

Resistance movements oppose or reverse social change.

The life cycle of a social movement consists of five stages.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

The five stages are unrest and agitation, resource mobilization, organization, institutionalization, and decline.

Institutionalization occurs when movements develop bureaucratic structures.

Many social movements eventually decline because public support decreases.

Dispersed collective behavior includes fads, fashions, rumors, public opinion, and mass hysteria.

Social tolerance means accepting and respecting people with different beliefs, cultures, and identities.

Social tolerance promotes peaceful coexistence, equality, and social harmony.

Social intelligence is the ability to understand others, communicate effectively, and build positive relationships.

Empathy is one of the most important components of social intelligence.

Social intelligence includes communication skills, conflict resolution, perspective-taking, leadership, networking, and awareness of social norms.

Social intelligence improves both personal and professional relationships.

20 Statement-Based MCQs

1. Collective behavior is spontaneous, temporary, and unstructured group behavior.

- A) Permanent organized behavior
- B) Spontaneous temporary group behavior ✓
- C) Formal government activity
- D) Economic planning only

Answer: B

2. Interactionism explains collective behavior through shared meanings.

- A) Shared meanings and interpretations ✓
- B) Economic competition
- C) Biological evolution
- D) Political systems

Answer: A

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

3. Crowds consist of people gathered in the same physical location.

- A) Same physical location ✓
- B) Different countries only
- C) Online communication only
- D) Government offices

Answer: A

4. Relative Deprivation Theory explains collective behavior through perceived inequality.

- A) Equal opportunities
- B) Perceived deprivation compared to others ✓
- C) Climate change
- D) Population growth

Answer: B

5. Contagion Theory was proposed by Gustave Le Bon.

- A) Karl Marx
- B) Neil Smelser
- C) Gustave Le Bon ✓
- D) Max Weber

Answer: C

6. Emergent Norm Theory states that new norms develop during collective interaction.

- A) Old laws control all behavior
- B) New group norms emerge ✓
- C) No norms exist

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

D) Only government rules matter

Answer: B

7. Value-Added Theory was developed by Neil J. Smelser.

A) Neil J. Smelser ✓

B) Herbert Spencer

C) Durkheim

D) Sorokin

Answer: A

8. Structural strains include poverty, injustice, and discrimination.

A) Entertainment

B) Structural strains ✓

C) Recreation

D) Tourism

Answer: B

9. Masses influence one another mainly through communication media.

A) Face-to-face meetings only

B) Communication media ✓

C) Sports events only

D) Religious ceremonies only

Answer: B

10. Fads are short-lived and rapidly changing collective behaviors.

A) Permanent traditions

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

B) Short-lived trends ✓

C) Religious laws

D) Government policies

Answer: B

11. Fashions usually remain popular longer than fads.

A) Longer-lasting styles ✓

B) Instant disappearance

C) Illegal behavior

D) Scientific discoveries

Answer: A

12. Rumors are unverified information spread among people.

A) Verified facts

B) Unverified information ✓

C) Government reports

D) Court judgments

Answer: B

13. Resource Mobilization Theory emphasizes leadership and resources.

A) Natural disasters

B) Leadership and resources ✓

C) Weather conditions

D) Religious rituals

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

14. Reform movements seek limited improvements within existing institutions.

- A) Complete revolution
- B) Limited institutional reforms ✓
- C) Military rule
- D) Economic collapse

Answer: B

15. Revolutionary movements aim to replace existing institutions completely.

- A) Preserve all traditions
- B) Replace existing institutions ✓
- C) Improve sports
- D) Promote tourism

Answer: B

16. The life cycle of social movements includes five stages.

- A) Two stages
- B) Three stages
- C) Five stages ✓
- D) Ten stages

Answer: C

17. Mass hysteria involves widespread fear spreading rapidly among people.

- A) Peaceful discussion
- B) Widespread fear and panic ✓
- C) Economic planning
- D) Scientific research

19. Empathy is a key component of social intelligence.

- A) Empathy ✓
- B) Aggression
- C) Isolation
- D) Prejudice

Answer: A

20. Social intelligence improves communication and relationships.

- A) Creates conflict
- B) Improves communication and relationships ✓
- C) Reduces cooperation
- D) Increases discrimination

Answer: B

Lesson-44: MODERNITY AND POSTMODERNITY

IMPORTANT EXAM POINTS

Modernity refers to the social, economic, political, and cultural changes associated with industrialization and modernization.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Premodern societies can be grouped into hunters and gatherers, pastoral and agrarian societies, and non-industrial civilizations.

Hunters and gatherers depended on hunting, fishing, and collecting wild plants for survival.

Hunter-gatherer societies had little social inequality and limited material wealth.

Pastoral societies relied mainly on domesticated animals for their livelihood.

Agrarian societies depended primarily on farming and crop cultivation.

Many early societies combined both pastoral and agrarian economies.

Non-industrial civilizations emerged around 6000 BCE with the development of cities.

Traditional civilizations were characterized by writing, science, art, and centralized political authority.

The earliest civilizations developed mainly in the fertile river valleys of the Middle East.

Industrialized societies are also known as advanced or developed societies.

Industrialization transformed societies from agriculture-based economies to manufacturing and service-based economies.

Factories, mechanization, and mass production are key features of industrialization.

Technological advancement is one of the major characteristics of modern societies.

Information technology, transportation, communication, and healthcare have greatly improved modern life.

Industrialization led to rapid urbanization and the growth of cities.

Industrialized societies generally enjoy higher standards of living and economic prosperity.

Education and skilled human capital are essential components of knowledge-based economies.

Modern societies have advanced healthcare systems that improve life expectancy and public health.

Social welfare systems provide unemployment benefits, healthcare, and pension programs.

Industrialized societies are culturally diverse and encourage cultural exchange.

Political stability, democracy, and the rule of law support economic and social development.

Industrialization also creates environmental challenges such as pollution and resource depletion.

Globalization has connected industrialized societies through trade, communication, and finance.

Modern societies provide greater opportunities for social mobility, although income inequality still exists.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Mass media and information technology play a major role in shaping public opinion and culture.

Science and secular thinking have promoted rational decision-making in modern societies.

Modern societies question traditions and seek logical explanations for social practices.

Ideas such as freedom, equality, democracy, and self-improvement are products of modernity.

These ideals have inspired revolutions and social reforms around the world.

Industrial capitalism is the most influential economic force behind modern social change.

Capitalism promotes continuous production, technological innovation, and wealth accumulation.

Unlike traditional economies, capitalism encourages constant economic expansion.

Science and technology are closely linked to industrial capitalism.

Political developments are another major source of modern social change.

Governments influence economic growth through policies and state intervention.

Modern governments have a greater impact on citizens' lives than traditional rulers.

Political competition among nations has accelerated modernization and economic development.

Late modern societies are characterized by globalization and technological advancement.

Late modern societies are highly complex and interconnected.

Individualization allows people greater freedom in choosing lifestyles and identities.

Identity diversity is a defining feature of late modern societies.

Digital technology and online communication shape modern social interactions.

Consumerism plays an important role in late modern societies.

Environmental sustainability has become a major concern in modern societies.

Political polarization is a growing challenge in many late modern societies.

Understanding late modernity requires recognizing the effects of globalization, technology, and social diversity on individuals and communities.

20 Statement-Based MCQs

1. Hunters and gatherers depended mainly on hunting, fishing, and gathering wild plants.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Manufacturing industries
- B) Hunting, fishing, and gathering ✓
- C) Banking services
- D) Information technology

Answer: B

2. Pastoral societies rely mainly on domesticated animals.

- A) Crop farming only
- B) Domesticated livestock ✓
- C) Industrial production
- D) International trade

Answer: B

3. Agrarian societies primarily depend on crop cultivation.

- A) Manufacturing
- B) Crop farming ✓
- C) Tourism
- D) Banking

Answer: B

4. Non-industrial civilizations developed cities and systems of writing.

- A) Cities and writing ✓
- B) Computers only
- C) Factories only
- D) Railways only

Answer: A

20. Late modern societies are characterized by globalization, diversity, and technological change.

- A) Globalization and technology ✓
- B) Isolation and simplicity
- C) Tribal migration only
- D) Agricultural dependence only

Answer: A

Lesson-45: MODERNITY AND POSTMODERNITY-II

IMPORTANT EXAM POINTS

Postmodernism questions universal truths and rejects grand theories that attempt to explain all societies.

Michel Foucault is one of the leading thinkers associated with postmodern thought.

Foucault believed that knowledge and power are closely connected.

Modern institutions such as prisons, schools, and hospitals exercise discipline and surveillance over individuals.

Foucault argued that concepts like sexuality, madness, and normality are socially constructed rather than natural.

Foucault developed the Archaeological approach to study the historical origins of present-day beliefs and institutions.

He believed societies cannot be explained through one universal theory but through historical fragments.

Jurgen Habermas emphasized the importance of reason and democratic dialogue.

Habermas developed the Theory of Communicative Action.

Communicative Action encourages solving social problems through rational discussion.

Habermas believed public dialogue should promote equality rather than domination.

He criticized modern society for increasing economic inequality and political indifference.

Habermas introduced the concept of the Post-Secular Society.

Post-Secular Society recognizes that religion continues to influence modern societies.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Ulrich Beck rejected the idea that society has moved beyond modernity.

Beck introduced the concept of the Second Modernity.

Second Modernity refers to globalization and the weakening of traditional customs.

Ulrich Beck described modern society as a Risk Society.

Risk Society is characterized by global risks such as climate change, terrorism, pollution, and pandemics.

Managing uncertainty has become a central feature of modern societies.

Manuel Castells introduced the concept of the Network Society.

According to Castells, power lies in information networks rather than traditional institutions.

The digital revolution transformed communication, politics, and the economy.

Castells argued that global networks are replacing the dominance of nation-states.

The concept of Space of Flows explains that global connections are becoming more important than geographical location.

The Digital Divide creates inequality between those who have access to technology and those who do not.

Castells described Informational Capitalism as replacing traditional industrial capitalism.

Anthony Giddens introduced Structuration Theory.

Structuration explains that society shapes individuals while individuals continuously recreate society.

Giddens emphasized the relationship between structure and human agency.

Disembedding refers to lifting social relations from local settings and extending them across time and space.

Reflexivity means societies constantly monitor and revise themselves using new knowledge.

Giddens argued that modern societies depend on both Risk and Trust.

Global events such as the COVID-19 pandemic demonstrate the importance of trust in scientific institutions.

Postmodernism rejects single cultural identities and accepts multiple identities.

Pakistan reflects postmodernism through cultural diversity and multiple ethnic identities.

Globalization has increased the influence of foreign cultures, products, and technology in Pakistan.

Pakistan's media has shifted from state-controlled narratives to multiple viewpoints.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Social media has become a major source of public opinion and identity formation.

Postmodernism focuses on individual experiences rather than universal explanations.

Baudrillard's concept of Simulacrum explains that media representations may become more influential than reality itself.

Hyperreality occurs when people experience representations as more real than actual events.

20 Statement-Based MCQs

1. Michel Foucault argued that knowledge and power are closely related.

- A) Wealth and power
- B) Knowledge and power ✓
- C) Religion and politics
- D) Culture and language

Answer: B

2. According to Foucault, prisons, schools, and hospitals mainly function as institutions of surveillance and discipline.

- A) Entertainment
- B) Recreation
- C) Surveillance and discipline ✓
- D) Agriculture

Answer: C

3. Foucault's Archaeological approach studies the historical origins of present-day beliefs.

- A) Future predictions
- B) Historical origins of beliefs ✓
- C) Economic policies
- D) Political elections

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

Answer: B

4. Jurgen Habermas developed the Theory of Communicative Action.

- A) Social Exchange Theory
- B) Conflict Theory
- C) Communicative Action ✓
- D) Labeling Theory

Answer: C

5. Habermas believed social problems should be solved through rational public discussion.

- A) Violence
- B) Rational dialogue ✓
- C) Military action
- D) Isolation

Answer: B

6. Habermas introduced the concept of the Post-Secular Society.

- A) Industrial Society
- B) Risk Society
- C) Post-Secular Society ✓
- D) Agricultural Society

Answer: C

7. Ulrich Beck introduced the concept of the Second Modernity.

- A) First Civilization
- B) Second Modernity ✓

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

C) Mechanical Society

D) Primitive Society

Answer: B

8. According to Ulrich Beck, modern society has become a Risk Society.

A) Tribal Society

B) Risk Society ✓

C) Feudal Society

D) Nomadic Society

Answer: B

9. Manuel Castells is best known for the concept of the Network Society.

A) Mechanical Society

B) Organic Society

C) Network Society ✓

D) Industrial Army

Answer: C

10. According to Castells, power lies mainly in information networks.

A) Military forces

B) Information networks ✓

C) Agriculture

D) Religion

Answer: B

11. The Digital Divide refers to unequal access to digital technology.

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

- A) Equal education
- B) Unequal access to technology ✓
- C) Political conflict
- D) Urbanization

Answer: B

12. Anthony Giddens developed Structuration Theory.

- A) Exchange Theory
- B) Structuration Theory ✓
- C) Dependency Theory
- D) Evolutionary Theory

Answer: B

13. Structuration Theory explains the interaction between social structures and human agency.

- A) Human agency and structures ✓
- B) Weather and society
- C) Religion and politics
- D) Economy and trade

Answer: A

14. Reflexivity means societies continuously revise themselves using new knowledge.

- A) Ignoring change
- B) Continuous self-monitoring ✓
- C) Following traditions only
- D) Rejecting science

Answer: B

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

15. Giddens argued that modern societies depend on both risk and trust.

- A) Risk and trust ✓
- B) Religion only
- C) Military power
- D) Agriculture

Answer: A

16. Postmodernism rejects grand narratives and universal explanations.

- A) Grand narratives ✓
- B) Democracy
- C) Education
- D) Science only

Answer: A

17. Pakistan reflects postmodernism through cultural diversity and multiple identities.

- A) Cultural diversity ✓
- B) One single culture
- C) No traditions
- D) Complete isolation

Answer: A

18. Social media has become an important source of identity formation in postmodern societies.

- A) Agriculture
- B) Social media ✓
- C) Hunting

SOC101 IMPORTANT NOTES + EXAM KEY POINTS + LECTURE WISE MCQS

D) Nomadism

Answer: B

19. Baudrillard used the concept of Simulacrum to explain media representations replacing reality.

A) Simulacrum ✓

B) Bureaucracy

C) Capitalism

D) Functionalism

Answer: A

20. Hyperreality refers to a condition where representations become more influential than reality itself.

A) Traditional society

B) Hyperreality ✓

C) Mechanical solidarity

D) Organic solidarity

Answer: B
