

ENG524 Quiz

File

Glossary

- **Coherence:** Coherence refers to the quality of being logical and consistent, e.g., 'This essay, on the whole, lacks coherence'.
- **Context Models:** Context models are special kinds of experience models. They represent communicative episodes in which we participate, often as part of other everyday episodes (conversation at breakfast, meeting at work, etc.).
- **Conversation Analysis:** Conversation analysis (CA) is an approach to the study of social interaction, embracing both verbal and non-verbal conduct, in situations of everyday life.
- **Critical Linguistics:** Critical Linguistics (CL) is “an approach to language study which uses linguistic techniques to investigate the ideologies (value systems and sets of beliefs) which underlie texts”
- **Dialectical Relational Approach:** According to Dialectical Relational Approach CDA is based upon a view of semiosis as an irreducible element of all material social processes (Williams 1977). Semiosis is viewed as an element of the social process which is dialectically related to others.
- **Dialectics:** The art or practice of arriving at the truth by the exchange of logical arguments.
- **Discourse:** Discourse is a unit of language usually longer than a sentence but the deduced meaning is beyond the level of sentence.
- **Interpersonal Meanings:** The interpersonal meanings are concerned with the interaction between speaker(s) and addressee(s).

- **Lexicon:** A lexicon is the knowledge that a native speaker has about a language.
- **Mental Model:** A mental model is an explanation of someone's thought process about how something works in the real world.
- **SFL:** Systemic Functional Linguistics (SFL) is an approach to linguistics that considers language as a social semiotic system.
- **Situation Models:** Situation models represent the situation a discourse is about, refers to and hence may also be called semantic models.
- **Systematic Functional Linguistics:** Systemic functional linguistics (SFL) is an approach to linguistics that considers language as a social semiotic system.
- **The Discourse-Historical Approach:** The Discourse-Historical Approach considers discourse analysis not just to be a method of language analysis, but a multidimensional project incorporating theory, methods, methodology and empirically based research practices that yield concrete social applications.
- **Turn taking:** The end of one speaker's turn and the beginning of the next's frequently latch on to each other with almost perfect precision and split-second timing.

ENG524 Quiz 1

1. Collective narrative is a narrative that forms part of a group's _____. (identity)
2. How many assumptions of discourse analysis are there? (four)
3. It aims to depict the social object as just, rational and worthy of support. This strategy of Normalization is called _____. (justification)
4. The term "critical discourse analysis" was introduced in the _____. (1980s)
5. Critical Discourse Studies (CDs) developed historically out of _____ an approach to language study developed of the University of East Anglia (Critical Linguistics)
6. The most important thing that makes a text has to make sense is _____. (meaning)
7. According to Fairclough, the category of _____ should be kept in mind while doing discourse analysis. (power, social class, ideology, all of the given options)
8. The Discourse Historical Approach is _____ oriented. (problem)
9. The process by which ends are related to means, intentions to capabilities, and objective to resources is called _____. (strategy)

10. Discourse undergoes historical change relating to _____ change (social)
11. The process by which text and context come together in the creation of meaning is referred to as _____. (contextualization)
12. The key notion of Critical Discourse Studies (CDS) is _____. (context)
13. CNA stands for _____. (Critical Narrative Analysis)
14. The acronym “DHA” stands for (Discourse-Historical Approach)
15. Conversation views _____ as constructed moment by moment through conversational moves (context)
16. One of the main tenets of CDA is that _____ relations are discursive. (power)
17. MMDA stands for _____. (Multi-Modal Discourse Analysis)
18. How many assumptions of discourse analysis are there? (four)
19. The term discourse analysis was first introduced by _____. (Zelling Harris)

ENG524 Quiz 2

1. The presupposition that merely presuppose the existence of something is called presupposition (Existential)
2. Position of information in the text, and how the text fits with the overall knowledge in the related epistemic/discourse community is dealt with at _____ level. (discourse)
3. The _____ is about procedural knowledge of how to ‘make sense’ of discourse and the world. (pragmatic meta-level)
4. The concept of ‘communicative competence’ was proposed by _____ (Dell Hymes)
5. CDA could include the documentation of: ()minority discourses, diasporic voices, emergent discourses, (all of the given)
6. The implicature derived from a particular context, rather than from the use of the words alone is termed as _____ implicature. (particularized)
7. Stibbe (2014) argued that the term ‘critical discourse analysis’ does not imply being (negative)
8. The acronym CADs stand for (Corpus-Assisted Discourse Studies)

9. An utterance that a speaker makes to achieve an intended effect (perlocutionary act)
10. Do not say that for which you lack adequate evidence, is Grice's maxim of _____.
(quality)

Quizzes collected from Assessments

1. One of the assumptions of Critical Discourse Analysis is that language is always '_____.'
(in the world)
2. The study of the social functions of different kinds of texts is called _____ analysis.
(genre)
3. Van Dijk concentrates on _____ as the meaning part between text and society. (social cognition)
4. Discourse Historical Approach has a focus on the historical dimension of discourse formation and _____ politics. (identity)
5. Teamwork is one of the significant features of _____ approach. (Discourse Historical)
6. DHA does not just look at the historical dimensions of discourse but also at _____ in the discourse. (discrimination)
7. One of discursive strategies in DHA is _____. it focuses on the discursive construction.
(nomination)
8. The term critical discourse analysis was introduced in 1980s to mark difference with an allegedly _____ discourse analysis. (descriptive)
9. Discourse is a socially constituted as well as _____ practice. (constitutive semiotic)
10. One of the key notions of Critical Discourse studies is _____ as it is one of the defining moments of CDs. (context)
11. The four validity claims distinguished by Habermas are truth, _____, normative rightness and comprehensibility. (truthfulness)
12. Fairclough's 3D model consists of three stages: description, _____ and explanation. (interpretation)

13. Fairclough mentions government talk and political policies in the _____ domain of discourse. (macro)
14. Textual analysis in social researches comprises two different forms of analysis: linguistic analysis and _____ analysis. (intertextual)
15. Blommaert (2005: 251) defines _____ as “the totality of conditions under which discourse is being produced, circulated and interpreted” (context)
16. Genre is a type of _____ event, e.g. story, joke, lecture, etc. (speech)
17. Corpus linguistics has been criticized for _____ data and for limiting the analysis to a bottom-up type of investigation. (decontextualizing)
18. Martin’s (1984 : 25) defines _____ as ‘a staged, goal-oriented, purposeful activity in which speakers engage as members of our culture’. (genre)
19. Genres are open to change and _____, but it is not a case of ‘free for all’ or ‘anything goes’. (dynamic)
20. The term _____ was first coined by the linguist Zellig Harris (1959) to describe the way in which a writer or speaker tries to guide their audience’s perception of their text (meta-discourse)
21. The ways in which writers present themselves and convey their judgements, opinions and commitments to their own and other people’s work are named as _____ in CDA. (Stance)
22. According to Fairclough (1989: 29–37), each social domain has an associated “of discourse” or a structured collection of discursive practices connected with particular social domain. (order)
23. Two different perspectives can be offered on the structure of texts: one that identifies the text’s generic structure based on its genre category and another that describes its _____ structure (rhetorical).
24. The kind of analysis made for speeches and other political genres, such as debates and interviews which can be broadcasted on YouTube as short fragments or in their entirety and leads to reshaping their genres is titled _____ analysis. (genre)
25. Luke (1996), argues that teaching ‘genres of _____’ such as academic essays or dissertations leads to uncritical reproduction of text and does not necessarily provide the kind of access we hope it might provide for our learners. (power)
26. The modes which are simultaneously used to say something about the world are called _____ modes. (semiotic)

27. A strand of multimodality is _____. Analysis, developed mainly through the innovative work of Scollon and Norris (2004, 2011): This strand of multimodality is a form of ethnographic work that draws attention to the way that meaning making is done through a highly subtle interplay of different semiotic resources. (Interactional)
28. The Re contextualization of social practice is useful as it draws particular attention to the _____ of activity. (sequences)
29. In CDA, It has been argued that multimodality must avoid the '_____ vision' (Forceville 2010; Machin 2013) of seeing all research matters through one single theory of language. (tunnel)
30. The rhetorical structure is made up of 'background' (the image) and '_____' (the title of the article) which adds extra information to the image. (elaboration)
31. Iedema (2001) provides a framework for the analysis of films and television by drawing on work in film theory and genre theory: The levels of analysis he proposes are frame, shot, scene, sequence (from film theory), _____ and work as a whole. (generic stage)
32. While looking at socialsemiotic meanings, we also need to focus on _____ relations between participants and textual meanings that how the message is organized. (interpersonal)
33. (DIMENSIONS OF THER SAMPLES)
34. (TO provide linguistic analysis using computer programs)
35. According to text selection procedure, which type of corpora consists of full texts? (full text corpora)
36. According to medium, which type of corpora includes both written and spoken material? (mixed corpora)
37. What is the purpose of well-designed corpus? (to study language)
38. Martin's (1984 : 25) defines _____ as 'a staged, goal-oriented, purposeful activity in which speakers engage as members of our culture'. (genre)
39. Genres are open to change and _____, but it is not a case of 'free for all' or 'anything goes'. (dynamic)
40. The term _____ was first coined by the linguist Zellig Harris (1959) to describe the way in which a writer or speaker tries to guide their audience's perception of their text. (meta-discourse)

41. the ways in which writers present themselves and convey their judgements, opinions and commitments to their own and other people's work are name as _____ in CDA. (stance)
42. According to Fairclough (1989: 29–37), each social domain has an associated “of discourse” or a structured collection of discursive practices connected with particular social domain. (order)
43. Two different perspectives, can be offered on the structure of texts: one that identifies the text's generic structure based on its genre category and another that describes its _____ structure. (rhetorical)
44. The kind of analysis made for speeches and other political genres, such as debates and interviews which are broadcasted on YouTube as short fragments or in their reshaping their genres is tilted _____ analysis. (genre)
45. Luke (1996), argues that teaching ‘genres of _____’ such as academic essays or dissertations leads to uncritical reproduction of text and does not necessarily provide the kind of access we hope it might provide for our learners. (power)
46. The modes which are simultaneously used to say something about the world are called _____ modes. (Semiotic)
47. As scholars began to introduce visual, sound and material design alongside their analysis of texts, the feature of _____ has become very common in CDA. (Multi-modality)
48. A strand of multimodality is _____ Analysis, developed mainly through the innovative work of Scollon and Norris (2004, 2011): This strand of multimodality is a form of ethnographic work that draws attention to the way that meaning making is done through a highly subtle interplay of different semiotic resources. (Interactional)
49. The re-contextualization of social practice is useful as it draws particular attention to the _____ of activity, or ‘scripts’ that can be understood as the ‘doing’ of discourse. (sequence)
50. In CDA, it has been argued that multimodality must avoid the ‘_____ vision’ (Forceville 2010; Machin 2013) of seeing all research matters through one single theory of language. (tunnel)
51. The rhetorical structure is equally simple, made up of ‘background’ (the image) and ‘_____’ (the title of the article) which adds extra information to the image. (elaboration)
52. Iedema (2001) provides a framework for the analysis of films and television by drawing on work in film theory and genre theory: The levels of analysis he proposes are frame, shot, scene, sequence (from film theory), _____ and work as a whole. (generic stage)

53. While looking at socialsemiotic meanings, we also need to focus on ____ relations between participants and textual meanings that how the message is organized.
(interpersonal)

54. According to medium, which type of corpora both written and spoken material?
(mixed)

55. Which two characteristics of a corpus are of particular concern for corpus linguists?
(Size and representativeness)

Post-Assessment

Question # 1 of 3

According to Rogers and Mosley Wetzel (2013), what role does the teacher play in literary education for marginalized groups?

Select the correct option

☐	Neutral facilitator
☐	Irrelevant participant
☒	Change agent
☐	Passive observer

56.

Post-Assessment

Question # 2 of 3

According to Bartlett (2012), which of the following can be documented as part of Critical Discourse Analysis (CDA)?

Select the correct option

☐	Idiosyncratic local uptakes where human subjects reinterpret and revoice dominant texts.
☐	Emergent discourses of hybrid identity generated by learners and other marginalized groups.
☐	Minority discourses, diasporic voices, and texts marginalized by dominant institutions.
☒	All of the given options

57.

Post-Assessment

Question # 3 of 3

According to Martin (2012), what is required to produce a healthy and socially useful Critical Discourse Analysis (CDA)?

Select the correct option

☐	Deconstructive activity only
☐	Constructive activity only
☒	Both deconstructive and constructive activity
☐	Critique and struggle against power

58.

Post-Assessment

Question # 2 of 3

Conditional or modal expressions stating facts contrary to how the world is are termed as:

Select the correct option

☐	Contrastives
☐	Factuals
☐	Temporals
☒	Counterfactuals

59. 59

60. 60

Post-Assessment

Question # 3 of 3

According to speech act theory, which type of act focuses on the effect of an utterance on the thoughts or actions of the other person?

Select the correct option

☐	Illocutionary act
☐	Locutionary act
☒	Perlocutionary act
☐	Direct speech act

Post-Assessment

Question # 1 of 3

According to Searle, felicity conditions of an utterance are considered as:

Select the correct option

☒	Constitutive rules
☐	Discourse analysis
☐	Speech acts
☐	Communicative functions

61. 61

Post-Assessment

Question # 3 of 3

Which component of context is related to the social action taking place?

Select the correct option

☐	Genre
☐	Mode
☒	Field
☐	Tenor

62. 62

63. The pragmatic purpose of using counterfactual expressions in language is (to state facts contrary to reality).

64. What is the primary function of presupposition in discourse? (to emphasize foregrounded knowledge, to present background information, to challenge existing assumptions, to introduce new ideas)

65. What does presupposition help reveal in discourse? (manipulative functions of discourse)

66. What is the primary function of lexical choices in language? (to frame referents in particular ways)

67. The pragmatic purpose of using counterfactual expressions in language is (to challenge existing beliefs, to state facts contrary to reality, to emphasize known facts, to provide historical context).

68. Cross-cultural Pragmatics (CCP) is primarily concerned with: (interactions between people from different cultural backgrounds)

69. In Cross-Cultural Pragmatics (CCP) in Education, what does “mismatch of interactional norms” refer to: (difference in communication expectations between home and school)
70. Which of the following is NOT one of Lakoff’s (1973) three maxims of politeness? (be brief)
71. Particularized conversational implicature results from the maxim of: (relation)
72. What are the four maxims associated with Grice’s Cooperative principle? (quantity, quality, relation, manner)
73. In the context of politeness, “face” is: (a person’s emotional and social sense of self)
74. Cross-Cultural Pragmatics (CCP) is primarily concerned with: (interactions between people from different cultural backgrounds)
75. Which objection does Van Dijk (2008) have to SFL as a framework for discourse analysis? (it involves too much linguistic sentence grammar)
76. In SFL, the “textual component” is concerned with: (constructing cohesive and coherent language chunks)
77. The primary emphasis in neo-capitalist discourse, as pointed out by Fairclough is: (the process are presented with accountable human agents)
78. Which meta-function are central to the semantic system of SFL? (IDEATIONAL, interpersonal and textual)
79. The primary focus of systematic functional linguistics (SFL) is: (the meaning-making resources of language)
80. What role does metaphor play in critical discourse studies (CDS)? (metaphor is constitutive of reality and has ideological significance)
81. What is the possible origin of conceptual metaphors, according to Conceptual Metaphor Theory (CMT)? (they originate in our embodied experiences)
82. Visual and multi-modal metaphor contribute to communication by: (enhancing communication effectiveness)
83. Which of the given is NOT a dimension of Steen’s (2008, 2011) ‘three-dimensional modal of metaphor’: (paralinguistic)
84. How many argumentative schemes are integrated into the new rhetoric’s typology?

85. Which of the following is NOT one of the three types of proof mentioned in classical rhetoric? (Mythos)
86. According to New Rhetoric what is the “universal audience” (the totality of all normal adult human beings)
87. What does Aristotle primarily conceive rhetoric as? (theory of argumentation)
88. What does Douglas Walton’s “new Dialectic” primarily focus on? (study of fallacies)
89. Which philosopher is associated with the positive version of ‘Pragmatic argument’ in political discourse analysis? (Kienpointner)
90. The general goal of Pragma-Dialectics as described by van Eemeren and Grootendorst is: (to enhance argumentative competence)
91. According to Lin (2014), which of the following is not one of the areas where CDS can be deployed in applied linguistics? (analysis of medical discourse)
92. According to Thurlow, which domains are often underrepresented in CDS research? (dialect coaches, voice-over artists, speech writers)
93. According to Deleuze (1997), what is the requirement for a theory to have value? (it must function and be useful to those who employ it)
94. What is a common criticism of critical discourse studies (CDS) according to Breeze (2011)? (it reinforces the belief in elite power locations)
95. According to Koselleck (2004), how does the variation of scales in historiography operate? (it eliminates the need for semiotic work in constructing the past, it conceals lasting structure within the past, it allows for an exclusive focus on micro-history, it reveals what continually changes and what is new)
96. The key characteristic of meanings in contested pasts is that: (they are co-constructed and validated by a community)
97. According to Achugar, why is historiographical CDA important for understanding historical processes? (to situate historical moments in larger landscape of time and space)
98. What according to Flowerdew is the main objective of a historiographical approach to critical discourse analysis (CDA)? (to explore the dialectics of understanding the past)
99. The Discourse-Historical Method in CDA introduced by Wodak (1999) is used: (to trace the development of constructions of the past across time and space)
100. What according to Flowerdew is the main objective of a historiographical approach to critical discourse analysis (CDA)? (to explore the dialectics of understanding the past)

ENG524 Mid-Term Solved

1. What are the assumptions of discourse analysis?

- a. Language is ambiguous - What things mean is never absolutely clear. All communication involves interpreting what other people mean.
- b. Language is always 'in the world' - what language means is always a matter of where and when it is used and what it is used to do.
- c. The way we use language is inseparable from who we are and the different social groups to which we belong. We use language to display different kinds of social identities.
- d. Language is never used all by itself. It is always combined with other things such as our tone of voice, facial expressions and gestures when we speak, and the fonts, layout and graphics we use in written texts.

2. What are three important aspects of genres?

- Genres are communicative events
- Conventions and Constraints
- Creativity

3. What are the aims of CDA?

To help reveal hidden and 'often out of sight' values, positions and perspectives underlying texts (Paltridge, 2008). To unmask the strategies of discriminatory inclusion and exclusion in language in use (Wodak, 1992). The use of discourse in relation to social and cultural issues such as race, gender, politics, identity, ideology, etc.

4. What are the assumptions of CDA?

Language use is always social. Discourse both reflects and constructs the social world. Discourses 'are always socially, politically, racially and economically loaded'

5. Name any three scholars of CDA

- Norman Fairclough
- Ruth Wodak
- Teun A. Van Dijk

6. Name the approaches of CDA

- Socio-cultural approach
- Socio-cognitive approach

- Discourse-historical Approach

7. **How did Fairclough and Wodak summarized the main tenets of CDA? Or What are the main tenets of CDA? OR Who summarized the tenets of CDA?**

- CDA addresses social problems
- Power relations are discursive
- Discourse constitutes society and culture
- Discourse does ideological work
- Discourse is historical
- The link between text and society is mediated
- Discourse analysis is interpretative and explanatory
- Discourse is a form of social action.
- Critical discourse analysts take explicit position, and thus want to understand, expose, and ultimately resist social inequality.
- CDA has a purpose, clear-cut and strong message/ Socially Critical and analytical

8. **What are the general principles of CCDA?**

a) No text is independent of its cultural contexts. Rather than the deconstruction of linguistic structures, CCDA shall aim to uncover the cultural and cross-cultural codes embedded in discourse.

b) CCDA employs tools and methodologies taken from the discipline of Cultural Studies, such as the heuristic of decoding cultural codes.

c) Cross-cultural or multi-cultural perspectives facilitate the identification of unique elements of specific cultural codes and thus contribute to the process of decoding them.

d) Decoding cultural codes demands not only intimate familiarity with a community's language, culture and history, but also special awareness of the idea that "social and historical creation. . . is treated as a natural event or as the inevitable outcome of natural characteristics" (Thompson 1990: 66).

e) CCDA demonstrates that as far as the rhetoric of power is concerned, there is no difference between small and large cultural communities

9. **WHAT ARE THE STRATEGIES OF NORMALIZATION?**

- Euphemization – aims to color the social object in positive tones, in terms of its appearance, character, or valuation;
- Naturalization – aims to represent the social object as a force or event independent of human agency, or as an inevitable outcome of the laws of nature;
- Justification – aims to depict the social object as just, rational, worthy of support.

10. **Explain any five of the stage programs that DHA follows?**

- Literature review, activation of theoretical knowledge (i.e., recollection, reading, and discussion of previous research);
- Systematic collection of data and context information (depending on the research questions, various discourses, genres, and texts are focused on);
- Selection and preparation of data for specific analyses (selection and downsizing of data, etc.);
- Specification of the research questions and formulation of assumptions (on the basis of the literature review and a first skimming of the data);
- Qualitative pilot analysis (this allows for testing categories and first assumptions as well as for the further specification of assumptions)

11. **Three dimensions of DHA?**

- Specific contents or topics of a specific discourse are identified;
- discursive strategies are investigated;
- linguistic means are examined as types, and the specific, context-dependent linguistic realizations are examined as tokens.

12. **Name the discursive strategies in DHA?**

- Nomination
- Predication
- Argumentation
- Perspectivization
- Mitigation and Intensification

13. **What are the theoretical sources that are relevant for the understanding of “critique”?**

- Critical Theory of the first generation
- The relationship to Foucault can be characterized as a relationship of strong interest with various reservations.
- Further central points of reference are the later Critical Theory of Jurgen Habermas, his discourse ethics and his theory of deliberative democracy (see Forchtner 2010, 2011).

14. **What are Three forms of critique in the DHA?**

- the text or discourse immanent critique,
- the socio-diagnostic critique
- the prospective critique

15. **The Concept of Discourse**

- (i) Discourse is socially constituted as well as constitutive semiotic practice. In order to grasp the practical character of discourses, functionally oriented pragmatics is central.
- (ii) (With respect to its socially constitutive character, discourse represents, creates, reproduces and changes social reality.

- (iii) With respect to its semiotic and pragmatic character, a discourse is a communicative and interactional macro-unit that transcends the unit of a single text or conversation.
- (iv) A discourse is composed of specific groups of actual texts, conversations, interactions and other semiotic events as well as action units. These concrete semiotic units are tokens, i.e., singular signs (in Peirce's terms, sinsigns). They serve specific purposes in social contexts, and are produced by somebody, distributed by somebody and received by somebody.
- (v) These actual discursive units relate to specific genres and other semiotic action patterns, i.e., to types (in Peirce's terms, legisigns)

16. How The Discourse Historical Approach distinguishes among four dimensions of "context"?

- (i) The immediate, language internal co-text and co-discourse regards thematic and syntactic coherences, lexical solidarities, collocations, connotations, implications, presuppositions and local interactive processes.
- (ii) The intertextual and interdiscursive relationship between utterances, texts, genres and discourses (e.g. with respect to discourse representation, allusions, evocations) is a further contextual research dimension.
- (iii) Social factors and institutional frames of a specific context of situation include: Degree of formality, place, time, occasion, addressees, interactive and political roles, political and ideological orientation, gender, age, profession, level of education, ethnic, regional, national, religious identities, etc.

17. Explain the three stages of Fairclough's 3D model

- In the first stage description, the text should be described as rigorously and as comprehensively as possible relative to the analytical focus.
- The focus in the interpretation stage is concerned with the ways to hypothesize the cognition of readers/listeners, how they might mentally interact with the text.
- In explanation, CDA critically explains connections between texts and discourse circulating in the wider social and cultural context; the 'sociocultural practice'.

18. What are the speaking mnemonics proposed by Hymes?

- Setting: Physical or abstract setting (e.g. office service)
- Participants: Speaker, hearer, overhearer
- Ends: purpose, goals and outcomes.
- Act Sequence: form the event taken place, ordering of speech acts, etc.
- Key: Tone, manner, spirit of the speech acts.

19. Difference between stance and engagement

Stance is the ways in which writers present themselves and convey their judgements, opinions and commitments to their own and other people's work. In doing this, a writer may either

‘intrude to stamp their personal authority onto their arguments, or step back and disguise their involvement’.

Engagement is the strategy writers use to acknowledge and recognize the presence of their readers, ‘pulling them along with their argument, focusing their attention, acknowledging their uncertainties, including them as discourse participants and guiding them to interpretations

20. **What is multi-modality?**

Multimodality refers to the use of multiple modes or forms of communication or representation to convey information. These modes can include visual, auditory, kinesthetic, gestural, linguistic, and spatial elements, among others. In various fields like education, technology, and communication, multimodality acknowledges that individuals perceive and understand information differently. For example, a presentation might include visuals (like slides), spoken words, gestures, and interactive elements to cater to different learning styles and enhance comprehension for a broader audience.

21. **Examples of Multi-modality**

- (i) Reading images: The grammar of visual design - Kress (2010)
- (ii) Multimodality: A social semiotic approach to contemporary communication - van Leeuwen’s (2005).
- (iii) Introducing social semiotics - O’Halloran’s (2004)
- (iv) Multimodal discourse analysis and Painter - Martin and Unsworth’s (2012) Reading visual narratives.
- (v) Machin and van Leeuwen (2007) discuss multimodality in relation to global media discourse.

22. **What are the three considerations that must attend to in deciding a sampling policy?**

- The orientation to the language or variety to be sampled.
- The criteria on which we will choose samples.
- The nature and dimensions of the samples.

23. **How does Stibbe (2014) defines relationship as questioning the stories that underpin current unsustainable civilization?**

- exposing stories that are clearly not working, that are leading to ecological destruction and social injustice;
- finding new stories that work better in the conditions of the world that we face”.

24. **five counter discursive strategies considered by Macgilchrist**

- (i) logical inversion: a straight counter to the stated facts. “countering a dominant frame with logical arguments does not work”. It can simply be ignored or disbelieved.

- (ii) parody: a mocking questioning of presupposed knowledge which Macgilchrist considers a form of logical inversion with a limited scope for uptake.
- (iii) complexification: a two-sided account in which aspects of a story that do not fit the dominant frame are not filtered. E.g. very few casual readers get beyond the headlines and first paragraphs if they are not written by expert writers or journalists.
- (iv) partial reframing: in which a mainstream frame may be temporarily countered through the use of alternative frames, i.e. we may not focus on the mainstream view that frames the article.
- (v) radical reframing: it includes the dialogue not only with other frames as partial framing, but also includes an inversion of the mainstream view of the issue” (Macgilchrist 2007). He considers it a more general phenomenon, applicable to other news media topics or indeed to other forms of social interaction”

25. **The purview of CDA could include the documentation of?**

- minority discourses, diasporic voices, texts, and statements that are ‘written out’ and over by dominant institutions.
- emergent discourses of hybrid identity generated by learners [or other marginal groups] counter to dominant pedagogic [and other] discourses;
- idiosyncratic local uptakes, where human subjects take centrally broadcast or dominant texts and discourses and reinterpret, recycle and revoice them in particular ways that serve their local political interests; and this may involve “translating” outside discourses into locally amenable terms
- those micropolitical strategies of interruption, resistance, and counter-discourse undertaken by speakers in face-to-face institutional and interpersonal settings.

26. **How would you explain the letters in SPEAKING?**

S setting/scene temporal and physical circumstances, subjective definition of an occasion

P participant speaker/sender/addressor/ receiver/audience/addressee

E ends purposes and goals, outcomes

A act sequence message form and content

K key tone, manner

I instrumentalities channel (verbal, nonverbal)

N norms specific interactional and interpretational properties normally attached to speaking

G genre textual categories

27. **Malinowski and Firth proposed a three-part model of context. For them, context consists of?**

- Field: The social action that is taking place.

- Tenor: The participants, their roles and relationships.
- Mode: The symbolic or rhetorical channel and the role which language plays in the situation

28. What does a context may include?

- Physical context, the social context and the mental worlds and roles of the people involved in the interaction. Social, political and cultural understanding that are relevant to the particular communication. Background knowledge context: cultural and interpersonal knowledge
- Linguistic context (Co-text). The co-text of a word is the set of other words used in the same phrase or sentence.

29. Define the three kinds of Acts given by Austin

- Locutionary Act Literal meanings of the actual words
- Illocutionary Act Speaker's intention in uttering the words
- Perlocutionary Act The effect of an utterance on the thoughts or actions of the other person.e.g. 'Bus Driver: This bus won't move until you boys move in out of the doorway' (taken from Paltridge, 2006)

30. Difference between direct and indirect speech?

Direct Speech Acts

The intended meanings may be quite different from the literal meaning. e.g. 'bring a plate' 'Can I take your order now please?' 'can I have a cheese burger?' 'I'll have two pieces of chicken and a coke'

Indirect Speech Acts

May be difficult for second language learners e.g. 'This room is a real mess' 'would you mind helping me move this table'

Examples of Direct Speech

When a specific sentence structure performs its direct function. 'Did you eat the pizza?'
Interrogative – Question 'Eat the pizza' (please)! Imperative – Command (Request) 'You ate the pizza.'
Declarative – Statement

Examples of Indirect Speech

'Can you pass the salt?'

'You left the door open'

31. Examples of clause/ sentence level presuppositions

Examples of Clause/sentence level Presupposition

Temporal clauses: *before X, since X, after X, whenever X, as X, during X, ...*

During the War of 1812, the British burned down the White House

>> There was a War of 1812

Cleft sentences: *it was X that Y* (cleft)

What John ate was chicken burger

>> John ate something

Contrastives: *contrastive intonation, too, back, in return; comparative as-clause.*

John hit Mary back.

>> Mary hit John.

Counterfactuals: *conditional or modal expressions stating facts contrary to how the world is.*

If John had entered the raffle, he would have won.

>> John didn't enter the raffle.

32. What are the Piller's (2012: 8) three-way division?

- Comparative analyses of two or more cultures.
- Analyses of interactions between speakers from different cultural backgrounds.
- The discursive creation of culture.

33. Why CCP is important?

In a world that is getting smaller when people from different societies and cultures interact with greater and greater frequency, a “harmonious” cross-cultural interaction is essential. Power relation in this global interaction.

CCP in Education

Mismatch of interactional norms between home and school in order to empower children to succeed. Possibility of language to have sexual/biased connotation in different cultures. Differences in terms of group power. In the sociolinguistic approach to pragmatics, “culture”

is not Culture with a capital C, that is literature, music and art of one speech community or grouping of people. Rather it is culture as a reflection of the values and beliefs about the world, held by the members of a community which form, in effect the substratum of their everyday life.

34. **Three Maxims of Politeness (Lakoff, 1973)**

- ‘Don’t impose’ – ‘I’m sorry to bother you but....’
- ‘Give options’ – ‘Do you think you could possibly come pick me up’.
- ‘Make your hearer feel good’ – ‘You’re better at this than me’; ‘Oh that’d be great’.

35. Difference between face-threatening act and face-saving act

Face-threatening Act

If you say something that represents a threat to another person’s self-image, that is called a face-threatening act. e.g. ‘Give me that paper’

Face-saving Act

‘Could you pass me that paper’

‘I’m dying for a drink

Yes it’s really hot. Isn’t it?’

36. **How did Halliday and Webster (2014) illustrate the analysis of texts using?**

- Analysis of the linguistic elements that express experience of the world and of our own consciousness. They used Process, and Participant and Circumstances analysis which are the main components of the transitivity system enable us to organize, represent and understand our perceptions of the world. They form what is known as the ideational component.
- Analysis of the linguistic elements that express roles, attitudes, demands and social & personal relations including mood, modality, appraisal, politeness. This interpersonal component is seen as ‘acting out social relationships’.
- Analysis of the linguistic elements that serve to construct cohesive and coherent chunks of language in use including means of reference, rhetorical structure theory and thematic structure. This is known as the textual component.

37. **SFL tools include**

- Statistical comparison techniques
- Comparisons of lexical density and frequency
- Rhetorical Structure Theory
- Corpus linguistics

38. How metaphor is seen as a cognitive process?

Metaphor is seen as a cognitive process that involves conceptualizing one thing in terms of another. The metaphorical expressions found in language are, therefore, deemed to be the realizations of the kinds of concepts held at the cognitive level. Metaphor, in this regard, is at once a process of the mind and its signification in the form of linguistic or semiotic realizations. Our ordinary conceptual system, in terms of thinking and acting is fundamentally metaphorical in nature. Thus, metaphor exists in our thinking, and expressed unconsciously in text and talk.

39. Discuss five “estates” of research suggested by the Grootendorst.

- In the philosophical estate, the concept of “reasonableness” has to be clarified, because it is fundamental to all argumentation theories and provides them with a philosophical basis.
- In the theoretical estate, a theory is derived from the philosophical premises. In the case of Pragma Dialectics, the theory regards each argumentation as a critical discussion between parties who try to resolve a difference of opinion by testing the acceptability of the standpoints concerned” (van Eemeren and Grootendorst 2004).
- In the analytical estate, the systematic application of “reconstruction transformations” (deletion, addition, substitution, permutation) helps to reconstruct the argumentative structure of a given text, by deleting speech acts which are not relevant for the resolution of a conflict of opinion (e.g., greetings). Or by adding relevant material that has been left implicit (e.g., premises), by substituting confusingly ambiguous expressions by unequivocal formulations, for example, rhetorical questions by statements.
- In the empirical estate, qualitative research is carried out in order to show how argumentative moves e.g. the expression of standpoints, arguments and doubt and argument structure (complex argumentation) can be reconstructed on the basis of different types of argumentative indicators i.e. connectives, particles, adverbs, verbs (Snoeck Henkemans 2007).
- In the practical estate, Pragma-Dialecticians try to enhance argumentative competence by furthering reflection about argumentation by making its results accessible to a wider public.

40. What are the three areas where CDS being deployed in applied linguistics given by Lin (2014)

- i) studies of textbooks and school curricula,
- ii) school leadership and student identities
- iii) public-media discourse.

41. CDA from a historiographical approach needs to?

- contextualize representations of the past in social practices

- locate the context of production of historical discourse.
- investigate the context of reception of discourse about the past.
- explore varying scales and indexical meanings of discourses about the past.
- consider claims to legitimacy, valuing and social distribution of discourse about the past.

42. What is Macro versus Micro?

Fairclough mentions macro domain of discourse, i.e. political talk, government policies while, keeps discourse at place work in micro-domain. He has used a term “technologization of discourse” as top-down intervention to change discursive within orders of discourse, i.e. from politics (macro) to ‘work place (micro). Fairclough has argued that the link between sociocultural practice and the other two dimensions involves the integration of 'macro' and 'micro' analysis of discursive events, where the former includes analysis of discourse technologization processes (Fairclough, 1995).

On one side, no instance of discursive practice can be interpreted without reference to its context; On the other hand, 'macro' phenomena such as technologization of discourse cannot be properly analyzed without the evidence of their actual effects on practice, which comes from analysis of discursive events. Specifically, he considers the role of discourse in a range of major contemporary cultural changes which have been thematized in recent sociological analysis: shifts towards 'post traditional' forms of social life, more reflexive forms of social life, and a 'promotional culture'

43. Explain briefly about public discourse

- Its interdisciplinarity and, especially, historical alignment
- Teamwork
- Triangulation of data, theories, as well as methods
- The attempt to practically apply the findings
