OBJECTIVE PART

LESSON 19

1. Who was a Swiss psychologist known for his theories?

- a) Tylor
- b) Taba
- c) Bruner
- d) Pestalozzi

2. In which time period did America notice Pestalozzi's theories?

- a) 50's and 60's
- b) 70's and 80's
- c) 90's and 2000's
- d) 20's and 30's

3. According to the text, how should Pestalozzi's theories be taken?

- a) As fact
- b) As suggestive
- c) As proven
- d) As irrelevant

4. Which of the following educators were influenced by Pestalozzi's theories?

- a) Piaget and Vygotsky
- b) Kohlberg and Tylor
- c) Taba and Bruner
- d) Skinner and Bandura

5. Who focused on various assessments according to the paragraph?

- a) Tylor
- b) Taba
- c) Bruner
- d) Kohlberg

6. Who emphasized the need for making connections rather than focusing on facts?

- a) Tylor
- b) Taba
- c) Bruner
- d) Kohlberg

7. According to Bruner's stages, how are the stages revisited?

- a) They are skipped
- b) They are repeated identically
- c) They develop in complexity
- d) They become less relevant

8. Which theorist focused on moral stages?

- a) Piaget
- b) Vygotsky
- c) Kohlberg
- d) Pestalozzi

9. Which stage of Jean Piaget's cognitive development theory lasts from birth to 2 years?

- a) Preoperational
- b) Concrete Operational
- c) Sensorimotor
- d) Formal Operational

10. What does the child in the sensorimotor stage use to explore the environment?

- a) Language
- b) Imagination
- c) Senses and motor skills
- d) Abstract thinking

11. What does egocentric mean in the context of the sensorimotor stage?

- a) The child is aware of other people's perspectives
- b) The child can see other people's perspectives
- c) The child is only aware of himself and his own perspectives
- d) The child understands logical principles

12. What does assimilation mean in Jean Piaget's theory?

- a) Incorporating new ideas into existing schema
- b) Adapting existing ideas to fit new understandings
- c) Changing schemata to fit new information
- d) Filing information in an existing schema

13. What does accommodation mean in Jean Piaget's theory?

- a) Incorporating new ideas into existing schema
- b) Adapting existing ideas to fit new understandings
- c) Changing schemata to fit new information

d) Filing information in an existing schema

14. Which stage of cognitive development involves rapid expansion of vocabulary and grammatical structures?

a) Sensorimotor

b) Preoperational

c) Concrete Operational

d) Formal Operational

15. What type of thinking is characteristic of the preoperational stage?

a) Logical thinking

b) Concrete thinking

c) Abstract thinking

d) Egocentric thinking

16. At what age range does the concrete operational stage occur?

a) Birth to 2 years

b) 2 to 7 years

c) 7 to 11 years

d) 11 to 16 years

17. What does the concrete operational stage allow children to understand?

a) Abstract concepts

b) Cause and effect

- c) Other people's perspectives
- d) Symbolic thought

18. What does conservation mean in the concrete operational stage?

- a) The amount, weight, volume, and number of things stay the same
- b) The amount, weight, volume, and number of things change
- c) The amount, weight, volume, and number of things disappear
- d) The amount, weight, volume, and number of things transform

19. Which stage of cognitive development is characterized by simple math and measurement skills?

- a) Sensorimotor
- b) Preoperational
- c) Concrete Operational
- d) Formal Operational

20. What is an example of conservation in the concrete operational stage?

- a) A short glass of water is the same amount as a tall glass half full of water
- b) A short glass of water is different from a tall glass half full of water
- c) A short glass of water is larger than a tall glass half full of water
- d) A short glass of water is smaller than a tall glass half full of water

Q1: Who is the Swiss psychologist mentioned in the paragraph?

ANS: Pestalozzi.

Q2: In which decades did America take notice of Pestalozzi's theories?

ANS: The 50's and 60's.

Q3: How should Pestalozzi's theories be interpreted?

ANS: They should be taken as "suggestive" rather than facts.

Q4: Which educators were influenced by Pestalozzi's theories?

ANS: Tyler, Taba, Bruner, Kohlberg, and many more.

Q5: What were some of the criticisms or observations made about Tyler's approach?

ANS: Tyler employed various assessments.

Q6: What was Taba's criticism of education?

ANS: Taba believed there were too many facts and not enough connections.

Q7: How did Bruner's stages differ from Piaget's stages?

ANS: Bruner's stages, like Piaget's, involved development in complexity, but they were revisited.

Q8: Which psychologist is associated with moral stages?

ANS: Kohlberg.

Q9: What is the first stage of Jean Piaget's cognitive developmental stages and how long does it last?

ANS: The first stage is the sensorimotor stage, which lasts from birth to 2 years.

Q10: What are some characteristics of a child in the sensorimotor stage?

ANS: A child in the sensorimotor stage uses their senses and motor skills to explore the environment, begins using language to imitate and represent the environment, and is egocentric.

Q11: What is assimilation?

ANS: Assimilation refers to incorporating new ideas into an existing schema or concept.

Q12: What does accommodation mean?

ANS: Accommodation means adopting old schema and developing new schema for interacting with new information.

Q13: What is an example of acquisition in the sensorimotor stage?

ANS: An example is trial-and-error experimentation, where the child explores and manipulates objects to determine their properties.

Q14: What is the second stage of Jean Piaget's cognitive developmental stages and how long does it last?

ANS: The second stage is the preoperational stage, which lasts from 2 to 7 years.

Q15: What are some characteristics of a child in the preoperational stage?

ANS: A child in the preoperational stage can speak and print words, their memory and imagination develop, their thinking is often illogical, and they engage in egocentric thinking.

Q16: What is an example of acquisition in the preoperational stage?

ANS: An example is language development, where the child rapidly expands their vocabulary and grammatical structures.

Q17: What is the third stage of Jean Piaget's cognitive developmental stages and how long does it last?

ANS: The third stage is the concrete operational stage, which lasts from 7 to 11 years.

Q18: What are some characteristics of a child in the concrete operational stage?

ANS: A child in the concrete operational stage has the ability to do simple math and measurement with manipulatives, understands cause and effect, can think systematically about real, concrete things, but struggles with abstract concepts, and is no longer egocentric.

Q19: What is an example of acquisition in the concrete operational stage?

ANS: An example is the understanding of conservation, where the child realizes that the amount, weight, volume, and number of things stay the same despite changes in outward appearance.

CODE: EDU101

OBJECTIVE PART

LESSON 20

1. What is the main focus of the overview mentioned in the passage?

- a. Teaching reading skills in L1 settings
- b. Exploring research on reading instruction
- c. Comparing L1 and L2 reading processes
- d. Identifying factors impacting reading instruction success

2. According to the passage, learning to read requires:

- a. Natural cognitive skills
- b. Effort and a learning process
- c. Instructional materials and resources
- d. Motivation and institutional support

3. Which of the following is not mentioned as an influencing variable in reading instruction success?

- a. Student proficiency
- b. Teacher factors
- c. Age of the learner
- d. Cultural background

4. What does the passage state about L2 research on reading instruction?

- a. It contradicts L1 research findings.
- b. It is less comprehensive than L1 research.
- c. It provides additional insights similar to L1 research.
- d. It focuses solely on academically-oriented instructional issues.

5. Which of the following is NOT listed as an implication for effective reading instruction?

- a. Building reading fluency and rate
- b. Teaching individual reading strategies
- c. Promoting extensive reading
- d. Developing intrinsic motivation for reading

6. According to the passage, word recognition fluency is particularly important for:

- a. L1 readers
- b. Proficient L2 readers
- c. Young learners
- d. Reading comprehension abilities

7. What did the study by Segalowitz (1991) demonstrate about word recognition automaticity?

- a. It is not relevant for L2 readers.
- b. It improves with incidental vocabulary exposure.
- c. It is less important for advanced L2 readers.

d. It can be achieved through phonological awareness training.

8. The study by Tan and Nicholson (1997) showed that word recognition training also improved:

- a. Phonological awareness
- b. Reading fluency
- c. Passage comprehension
- d. General vocabulary knowledge

9. How can word recognition fluency be effectively taught?

- a. Through timed word recognition practice
- b. By promoting extensive reading only
- c. Via morphological awareness training
- d. Using only assisted reading activities

10. The relationship between vocabulary knowledge and reading comprehension is strong in:

- a. L1 and L2 contexts
- b. L1 but not L2 contexts
- c. L2 but not L1 contexts
- d. Neither L1 nor L2 contexts

11. According to Carver (2003), what is the relationship between vocabulary knowledge and reading comprehension?

- a. Perfectly correlated
- b. Moderately correlated

- c. Weakly correlated
- d. No correlation

12. The study by Droop and Verhoeven (2003) demonstrated a powerful relation between vocabulary knowledge and reading ability in:

- a. L1 readers
- b. Language minority children
- c. Dutch university students
- d. Language majority children

13. What is the role of background knowledge in reading comprehension?

- a. It is essential for all inferences and text model construction.
- b. It is only important for culturally familiar texts.
- c. It is irrelevant to the comprehension process.
- d. It is most beneficial for inexperienced readers.

14. Which of the following is an effective strategy for activating background knowledge?

- a. Pre-reading activities
- b. Using graphic organizers
- c. Question generating during reading
- d. Summarizing the text after reading

15. The passage suggests that reading comprehension strategies can:

- a. Be effective for L1 but not L2 readers
- b. Improve vocabulary knowledge only
- c. Enhance reading comprehension abilities
- d. Replace the need for vocabulary knowledge

16. The use of graphic organizers and mental imagery are examples of:

- a. Vocabulary-building strategies
- b. Comprehension monitoring strategies
- c. Word recognition fluency strategies
- d. Reading rate improvement strategies

17. Comprehension monitoring involves:

- a. Checking the accuracy of word recognition
- b. Reflecting on the understanding of the text
- c. Setting reading goals and purposes
- d. Assessing reading speed and fluency

18. According to the passage, what is the purpose of summarization as a comprehension strategy?

- a. To improve reading rate and fluency
- b. To identify key points and main ideas
- c. To enhance word recognition automaticity
- d. To activate background knowledge effectively

19. What does the passage suggest about the relationship between L1 and L2 reading instruction?

- a. They are entirely different processes.
- b. L1 research findings cannot be applied to L2 instruction.
- c. L1 research can provide insights for L2 instruction.
- d. L2 research is more comprehensive than L1 research.

20. Effective reading instruction should focus on developing:

- a. Vocabulary knowledge and phonological awareness
- b. Reading comprehension strategies and fluency
- c. Cultural familiarity and prior knowledge
- d. Independent reading skills and text models

21. Which of the following is NOT mentioned as an important component of language knowledge?

- a. Vocabulary knowledge
- b. Grammar knowledge
- c. Phonological awareness
- d. Background knowledge

22. What does the passage state about vocabulary knowledge?

- a. It is irrelevant to reading comprehension.
- b. It is only important for L1 readers.
- c. It is a key component of language knowledge.

d. It can be acquired solely through reading fluency.

23. In addition to vocabulary knowledge, language knowledge also includes:

- a. Reading fluency and cultural familiarity
- b. Phonological awareness and decoding skills
- c. Background knowledge and strategic reading skills
- d. Syntactic knowledge and morphological awareness

24. Which of the following strategies can contribute to effective reading instruction?

- a. Vocabulary learning and general comprehension skills
- b. Reading fluency and decoding abilities
- c. Background knowledge activation and question answering
- d. All of the above

25. According to the passage, what does effective reading instruction entail?

- a. Developing only vocabulary knowledge
- b. Focusing on text models and comprehension monitoring
- c. Enhancing word recognition fluency and reading comprehension
- d. Teaching decoding skills and phonological awareness

26. The passage states that reading is considered a complex cognitive activity because:

- a. It requires minimal cognitive effort

- b. It does not involve cognitive skills
- c. It is an inherently natural process
- d. It involves multiple cognitive processes

27. The main purpose of the overview mentioned in the passage is to:

- a. Highlight the importance of reading fluency
- b. Compare L1 and L2 reading processes
- c. Present research findings on effective reading instruction
- d. Identify factors impacting reading instruction success

28. What does the passage suggest about the relationship between reading fluency and reading comprehension?

- a. Reading fluency has no impact on reading comprehension.
- b. Reading fluency is essential for effective reading comprehension.
- c. Reading fluency is more important for L1 readers than L2 readers.
- d. Reading

CODE: EDU101

SUBJECTIVE PART

LESSON:20

1. What is reading described as in the passage?

Answer: Reading is described as a complex cognitive activity that requires cognitive skills used in new ways.

2. What is the difference between learning to read and learning to speak and listen in a first language?

Answer: Learning to read requires conscious effort and a structured learning process, unlike learning to speak and listen, which come naturally.

3. According to the passage, what factors impact the success of reading instruction?

Answer: Student proficiency, age, L1/L2 relations, motivation, cognitive processing factors, teacher factors, curriculum and materials resources, instructional setting, and institutional factors.

4. What are the reasons for optimism in exploring research on reading instruction?

Answer: Research on English L1 reading has made significant advances, research on L2 reading instruction provides additional insights, and there are similarities between L1 and L2 reading that allow for drawing implications from L1 research findings.

5. What is the focus of this overview on reading instruction?

Answer: The overview specifically focuses on learners who need to develop academic reading abilities in school settings.

6. According to the passage, what are some instructional implications for effective reading instruction?

Answer: Some instructional implications include ensuring word recognition fluency, emphasizing vocabulary learning, activating background knowledge, ensuring effective language knowledge and general comprehension skills, teaching text structures and discourse organization, promoting reading fluency and extensive reading, and developing intrinsic motivation for reading.

7. How is word recognition fluency related to reading comprehension in L2 settings?

Answer: Word recognition fluency is important for overall reading fluency, and research suggests that L2 learners who are more fluent readers tend to have better word recognition automaticity skills.

8. Has a causal connection between word recognition improvement and reading improvement been established in L2 settings?

Answer: No, a causal connection between word recognition improvement and reading improvement in L2 settings has not been demonstrated yet.

9. What is the relationship between vocabulary knowledge and reading comprehension?

Answer: There is a strong and reliable relationship between vocabulary knowledge and reading comprehension in both L1 and L2 contexts.

10. What role does background knowledge play in reading comprehension?

Answer: Background knowledge is important for comprehension, aiding in making inferences, constructing text models, resolving ambiguities, and improving overall comprehension.

11. What benefits can be derived from activating background knowledge in instructional texts?

Answer: Activation of specific relevant information leads to better comprehension compared to activating general background knowledge, according to research.

12. What are the two components required for text comprehension?

Answer: The two components required for text comprehension are language knowledge (including vocabulary and grammar knowledge) and recognition of key ideas and their relationships through comprehension strategies.

13. What is the relationship between grammar knowledge and reading abilities in L2 learners?

Answer: There is a strong correlation between grammar knowledge and reading abilities in L2 learners, as shown by various research studies.

14. What are some individual comprehension strategies that have a significant influence on reading comprehension?

Answer: Some individual comprehension strategies include prior knowledge activation, mental imagery, graphic organizers, text structure awareness, comprehension monitoring, question answering, question generating, mnemonic support practice, and summarization.

15. Is there sufficient recent research demonstrating the effectiveness of specific comprehension strategies in L2 settings?

Answer: No, there is relatively little recent research demonstrating the effectiveness of specific comprehension strategies in L2 settings, but it is reasonable to extrapolate from L1 research and earlier supporting L2 research to argue for the usefulness of certain comprehension strategies.

1. According to the paragraph, what is the role of teachers and others in scaffolding?

- a) Observing the learner's development
- b) Assessing the learner's abilities
- c) Supporting the learner's development
- d) Evaluating the learner's progress

2. What does scaffolding in an educational context refer to?

- a) Gradually shifting responsibility to the teacher
- b) Modeling learning strategies for students
- c) Providing feedback on students' tasks
- d) Giving students complete independence in learning

3. What is the purpose of scaffolding?

- a) Restricting the learner's progress
- b) Limiting the range of learner's abilities
- c) Extending the range of what a learner can do
- d) Eliminating the need for teacher guidance

4. When is scaffolding used in the educational context?

- a) Always required for every student
- b) Only when students request assistance
- c) Only when teachers are available
- d) Used only when needed

5.What is the Zone of Proximal Development (ZPD)?

- a) A distance between a student's performance with help and independent performance
- b) The area where students perform at their highest level
- c) A measure of student-teacher collaboration
- d) The range of tasks assigned to students

6.According to the paragraph, where does learning occur?

- a) Outside the Zone of Proximal Development (ZPD)
- b) In the Zone of Proximal Development (ZPD)
- c) During independent study only
- d) In teacher-led activities only

7.What is the main purpose of scaffolding according to the paragraph?

- a) Building on existing knowledge
- b) Limiting student independence
- c) Fostering competition among students
- d) Providing assistance in the ZPD

8.What did Vygotsky emphasize regarding learning in a school setting?

- a) Individual learning without external influences
- b) Completing tasks alone for better understanding
- c) Collaborative learning and group work
- d) Avoiding contextual learning

9. According to Vygotsky, how does learning relate to the context it is in?

- a) Learning is independent of the context
- b) Learning is influenced by the teacher's preferences
- c) Learning is tied to the context it is in
- d) Learning only occurs in a specific context

10. Which of the following is a general principle of cognitive development?

- a) Passively receiving knowledge
- b) Isolating new information from prior knowledge
- c) Relating new information to prior knowledge
- d) Thinking at the same level throughout childhood

11. According to the paragraph, what affects how well a task can promote cognitive development?

- a) The teacher's guidance
- b) The child's readiness
- c) The complexity of the task
- d) The child's prior knowledge

12. How are cognition and language related, according to the paragraph?

- a) Cognition and language have no connection
- b) Language development leads to cognitive development

- c) Cognition influences language development
- d) Cognition and language are closely intertwined

13.What is the emphasis of Piaget's theory?

- a) Modeling and guided learning
- b) Discrete hierarchical stages of the individual
- c) Social interaction and collaboration
- d) Readiness and task complexity

14.According to the paragraph, what does Vygotsky's theory emphasize?

- a) Social learning and collaboration
- b) Modeling and guided learning
- c) Task readiness and complexity
- d) Discrete hierarchical stages of the individual

15.Which comes first according to Vygotsky, social learning or development?

- a) Social learning
- b) Development
- c) They occur simultaneously
- d) It depends on the specific context

16.In the example provided, what does the teacher do during the scaffolding process?

- a) Let students work independently from the beginning

- b) Provide constant assistance to students
- c) Gradually shift responsibility to the students
- d) Only model the desired learning strategy

17.What is the teacher's role in scaffolding, according to the example?

- a) Constantly monitoring students' progress
- b) Offering immediate solutions to students' challenges
- c) Providing feedback and guidance
- d) Avoiding interaction with students

18.How does the teacher help students in the example to complete the skill without guidance?

- a) Assigning more challenging tasks
- b) Encouraging competition among students
- c) Providing necessary resources
- d) Allowing peer collaboration

19.Which of the following best describes the Zone of Proximal Development (ZPD)?

- a) A measure of students' individual performance
- b) A range of tasks that students can complete independently
- c) A measure of students' collaboration skills
- d) A distance between a student's current abilities and potential abilities with help

20.What is the purpose of scaffolding in the classroom setting?

- a) To limit students' abilities
- b) To eliminate the need for teacher guidance
- c) To support students' learning and development
- d) To restrict students' collaboration with peers

21.According to the paragraph, what does scaffolding allow the learner to accomplish?

- a) Tasks that are impossible otherwise
- b) Tasks that are only possible with teacher intervention
- c) Tasks that require minimal effort
- d) Tasks that are beyond the learner's capability

22.When does scaffolding occur in an educational context?

- a) Only during teacher-led activities
- b) Only during independent study
- c) Throughout the learning process as needed
- d) Only during assessment tasks

23.What is the main benefit of scaffolding, according to the paragraph?

- a) Fostering independence in students
- b) Ensuring equal learning opportunities for all students
- c) Providing necessary support for learners' progression
- d) Reducing the role of teachers in the learning process

24.What does Vygotsky's theory emphasize regarding collaborative learning?

- a) It leads to better individual performance
- b) It hinders cognitive development
- c) It encourages competition among students
- d) It supports social learning and cognitive development

CODE: EDU101

SUBJECTIVE PART

LESSON:21

1.What is the definition of scaffolding in an educational context?

Answer: Scaffolding is an instructional structure where the teacher models the desired learning strategy or task and gradually shifts responsibility to the students.

2.What is the role of teachers and others in scaffolding?

Answer: They provide support structures and support the learner's development to help them reach the next stage or level.

3.What are the purposes of scaffolding?

Answer: Scaffolding provides support, extends the range of what a learner can do, and allows them to accomplish tasks that would otherwise be impossible.

4.When is scaffolding used?

Answer: Scaffolding is used only when needed.

5.Can you provide an example of scaffolding in a classroom setting?

Answer: An example could be a teacher initially instructing students on how to write a sentence using commas and conjunctions and gradually allowing them to practice and complete the skill independently.

6.What is the Zone of Proximal Development (ZPD)?

Answer: The Zone of Proximal Development is the distance between a student's performance with help and their performance independently.

7.Where does learning occur according to the Zone of Proximal Development (ZPD)?

Answer: Learning occurs within the Zone of Proximal Development.

8.Is scaffolding associated with building on existing knowledge or providing assistance in the Zone of Proximal Development (ZPD)?

Answer: Yes, scaffolding is the idea of building on existing knowledge or providing assistance within the Zone of Proximal Development.

9.What did Vygotsky emphasize regarding learning in a school setting?

Answer: Vygotsky emphasized social learning and collaborative activities such as group presentations and group work.

10.How does Vygotsky relate learning to the context it is in?

Answer: Vygotsky emphasized that learning is tied to the context it occurs in.

11.What are the general principles of cognitive development according to Vygotsky?

Answer: Children actively construct knowledge, social interaction supports cognitive development, and cognitive development involves relating new information to prior knowledge.

12.How does cognitive development occur according to Vygotsky?

Answer: Vygotsky proposed that cognitive development occurs through qualitatively different stages in which children think.

13.What role does a child's readiness play in promoting cognitive development?

Answer: A child's readiness affects how well a task can promote cognitive development.

14.How are cognition and language related according to Vygotsky?

Answer: Vygotsky believed that cognition and language are closely intertwined.

15.What is the difference between Piaget's and Vygotsky's emphasis?

Answer: Piaget emphasized discrete hierarchical stages of individual development, while Vygotsky focused on modeling and guided learning through social interaction.

CODE: EDU101

REVIEW EXERCISE

LESSON:19,20,21

❖ CHOOSE THE CORRECT OPTION:

1.According to the paragraph, what is the role of teachers and others in scaffolding?

- a) Observing the learner's development
- b) Assessing the learner's abilities
- c) Supporting the learner's development
- d) Evaluating the learner's progress

2.What does scaffolding in an educational context refer to?

- a) Gradually shifting responsibility to the teacher
- b) Modeling learning strategies for students
- c) Providing feedback on students' tasks
- d) Giving students complete independence in learning

3.What is the purpose of scaffolding?

- a) Restricting the learner's progress
- b) Limiting the range of learner's abilities
- c) Extending the range of what a learner can do
- d) Eliminating the need for teacher guidance

4.What is the Zone of Proximal Development (ZPD)?

- a) A distance between a student's performance with help and independent performance
- b) The area where students perform at their highest level
- c) A measure of student-teacher collaboration
- d) The range of tasks assigned to students

5.According to the paragraph, where does learning occur?

- a) Outside the Zone of Proximal Development (ZPD)
- b) In the Zone of Proximal Development (ZPD)
- c) During independent study only
- d) In teacher-led activities only

6.What is the main purpose of scaffolding according to the paragraph?

- a) Building on existing knowledge
- b) Limiting student independence
- c) Fostering competition among students
- d) Providing assistance in the ZPD

7.According to Vygotsky, how does learning relate to the context it is in?

- a) Learning is independent of the context
- b) Learning is influenced by the teacher's preferences
- c) Learning is tied to the context it is in
- d) Learning only occurs in a specific context

8.Which of the following is a general principle of cognitive development?

- a) Passively receiving knowledge
- b) Isolating new information from prior knowledge
- c) Relating new information to prior knowledge
- d) Thinking at the same level throughout childhood

9. According to the paragraph, what affects how well a task can promote cognitive development?

- a) The teacher's guidance
- b) The child's readiness
- c) The complexity of the task
- d) The child's prior knowledge

10. How are cognition and language related, according to the paragraph?

- a) Cognition and language have no connection
- b) Language development leads to cognitive development
- c) Cognition influences language development
- d) Cognition and language are closely intertwined

11. What is the emphasis of Piaget's theory?

- a) Modeling and guided learning
- b) Discrete hierarchical stages of the individual
- c) Social interaction and collaboration
- d) Readiness and task complexity

12. According to the paragraph, what does Vygotsky's theory emphasize?

- a) Social learning and collaboration
- b) Modeling and guided learning
- c) Task readiness and complexity
- d) Discrete hierarchical stages of the individual

13.Which comes first according to Vygotsky, social learning or development?

- a) Social learning
- b) Development
- c) They occur simultaneously
- d) It depends on the specific context

14.In the example provided, what does the teacher do during the scaffolding process?

- a) Let students work independently from the beginning
- b) Provide constant assistance to students
- c) Gradually shift responsibility to the students
- d) Only model the desired learning strategy

❖ **ANSWERS THE FOLLOWING QUESTIONS:**

- 1.Who is the Swiss psychologist mentioned in the paragraph?
- 2.In which decades did America take notice of Pestalozzi's theories?
- 3.How should Pestalozzi's theories be interpreted?
- 4.Which educators were influenced by Pestalozzi's theories?
- 5.What were some of the criticisms or observations made about Tyler's approach?
- 6.What was Taba's criticism of education?
- 7.How did Bruner's stages differ from Piaget's stages?
- 8.Which psychologist is associated with moral stages?

9.What is the first stage of Jean Piaget's cognitive developmental stages and how long does it last?

10.What are some characteristics of a child in the sensorimotor stage?

11.What is assimilation?

12.What does accommodation mean?

13.What is an example of acquisition in the sensorimotor stage?

14.What is the second stage of Jean Piaget's cognitive developmental stages and how long does it last?

15.What are some characteristics of a child in the preoperational stage?

CODE: EDU101

OBJECTIVE PART

LESSON:22

1.Phenomenology focuses on the systematic reflection and investigation of the structures of:

- A) External reality
- B) Scientific concepts
- C) Subjective experience and consciousness
- D) Social relationships

2.According to Husserl, the 'true' meaning behind actions can be found in:

- A) Scientific method
- B) Naturalistic thinking
- C) Consciousness
- D) Social structures

3.Schutz suggests that individuals coexist and have intertwined consciousness through:

- A) Observing others' experiences
- B) Accepting their own existence
- C) Reflecting on past memories
- D) Analyzing social structures

4.Schutz's concept of "united individualism" implies:

- A) Shared experiences but unique consciousness
- B) Identical experiences and consciousness
- C) Individual experiences without social connections
- D) Independent experiences with shared consciousness

5.According to Schutz, a social scientist should act as an observer to:

- A) Analyze historical events
- B) Eliminate biases
- C) Detach from personal experiences
- D) Challenge the existing preconditions

6.The distinction between things themselves and our experience of them is a central focus in:

- A) Schutz's contributions to Phenomenology
- B) Husserl's contributions to Phenomenology
- C) Common Threads of Phenomenology

D) Phenomenological methodology

7. Which approach to science does Phenomenology find limitations in?

A) Positivist approach

B) Naturalistic approach

C) Experimental approach

D) Historical approach

8. The goal of Phenomenology is to enhance the richness and vitality of:

A) Historical knowledge

B) Scientific concepts

C) Everyday lived experience

D) Aesthetic appreciation

9. According to Husserl, perception is based on:

A) Retention and memory

B) Scientific observations

C) External stimuli only

D) Social interactions

10. Schutz's contributions to Phenomenology emphasize the importance of:

A) Realist concepts

B) Individual subjectivity

C) Group understanding and unity

D) Scientific investigations

11. Phenomenology examines the pattern of subjective experience and consciousness based on:

A) External influences

B) Objective observations

C) Historical events

D) Consciousness itself

12. According to Husserl, past events influence one's present consciousness through:

A) Time consciousness

B) External stimuli

C) Scientific method

D) Social interactions

13. Schutz suggests that individuals can observe their own experiences:

A) In real-time

B) Through memory and reflection

C) By detaching from biases

D) Within social structures

14. Schutz's contributions to Phenomenology highlight the concept of "growing old together" as:

- A) Unique experiences
- B) Individual acts
- C) Shared consciousness
- D) Social relationships

15.The social world is viewed as a multiform structure in:

- A) Husserl's contributions to Phenomenology
- B) Schutz's contributions to Phenomenology
- C) Common Threads of Phenomenology
- D) Phenomenological methodology

16.Schutz's approach to Phenomenology suggests that individuals understand others with similar experiences through:

- A) Detaching from biases
- B) Group understanding and unity
- C) Observing others' experiences
- D) Analyzing social structures

17.The common threads of Phenomenology include a fear and avoidance of thinking that leads to doubting the existence of:

- A) Consciousness
- B) Social structures
- C) Historical events
- D) The 'outside' world

18. Phenomenology provides a methodological solution for the scientific investigation of:

- A) Realist concepts
- B) Aesthetic experiences
- C) Historical events
- D) Everyday lived experiences

19. According to Schutz, individuals must draw from their own experiences to fill in the blanks in:

- A) Scientific investigations
- B) Historical narratives
- C) Social interactions
- D) Phenomenological analyses

20. The goal of Phenomenology is to explain how perceptions are gained, molded, and used in:

- A) Scientific experiments
- B) Everyday life
- C) Aesthetic appreciation
- D) Social relationships

CODE: EDU101

SUBJECTIVE PART

LESSON:22

1. What does phenomenology examine?

Phenomenology examines patterns of subjective experience and consciousness.

2.What is the focus of phenomenology?

The focus is on systematic reflection and investigation of the structures of consciousness.

3.Is phenomenology based solely on consciousness?

Yes, phenomenology is based solely on consciousness.

4.Are individuals influenced by others in phenomenology?

Yes, individuals can be influenced by others, but they do not have the same experiences.

5.How does phenomenology view the social world?

Phenomenology views the social world as a multiform structure.

6.What is the concept of inner subjectivity in phenomenology?

Inner subjectivity refers to the individual's subjective experience of the world.

7.What is meant by group understanding/unity in phenomenology?

Group understanding/unity refers to the idea that individuals can have their consciousness intertwined, leading to a shared understanding within a social group.

8.According to Husserl, where can the true meaning behind actions be found?

According to Husserl, the true meaning behind actions can be found in consciousness.

9.What is time consciousness in Husserl's philosophy?

Time consciousness refers to the idea that past events influence one's present consciousness and perception.

10.How is perception influenced by retention and memory in Husserl's view?

Perception is influenced by past memories and reflections, shaping what one "sees" in the present.

11.According to Schutz, what must individuals accept?

Individuals must accept their own existence and the existence of others.

12.How does Schutz describe the coexistence of individuals' consciousness?

Schutz describes the coexistence of individuals' consciousness as intertwined or interconnected.

13.How does shared experience contribute to the social world, according to Schutz?

Shared experiences lead to the development of the social world and the understanding of "united individualism."

14.How should social scientists act according to Schutz?

Social scientists should act as observers, detaching themselves from biases.

15.What is the distinction between reality and our experience of reality in phenomenology?

Phenomenology explores the distinction between things themselves and our subjective experience of them.

16.How does phenomenology contribute to the understanding of social structure?

Phenomenology helps understand how social structures develop and why certain actions are formed by breaking down individuals and examining their experiences.

17.What is the aim of phenomenology in relation to everyday lived experience?

The aim is to enhance the richness and vitality of everyday lived experience.

18.What kind of thinking does phenomenology avoid?

Phenomenology avoids the kind of thinking that results in doubting the existence of the "outside" world.

19.What does phenomenology provide in terms of a scientific investigation?

Phenomenology provides a methodological solution for a scientific investigation of realist concepts.

20.What does phenomenology explain regarding perceptions in everyday life?

Phenomenology explains how perceptions are gained, molded, and used in everyday life.

CODE: EDU101

OBJECTIVE PART

LESSON:23

1.What is the relationship between schools and society?

- a) Schools are separate from society
- b) Schools are influenced by society
- c) Schools have no impact on society
- d) Schools create their own social context

2.What should schools consider regarding society's impact on education?

- a) How society affects schools and institutions
- b) Ignoring societal factors in education
- c) Isolating schools from society
- d) Changing society to fit educational needs

3.What is the importance of change in education?

- a) Change is unnecessary in education
- b) Education must change with society
- c) Change should be avoided in education
- d) Education should change society

4.How does society change?

- a) Society changes slowly
- b) Society remains static
- c) Society changes rapidly
- d) Society resists change

5.What makes preparing students for the world of tomorrow difficult?

- a) Lack of societal changes
- b) Slow educational progress
- c) Rapid societal changes
- d) Ineffective teaching methods

6.What are the three traditional aspects of literacy?

- a) Reading, writing, and arithmetic
- b) Reading, writing, and art
- c) Reading, writing, and technology
- d) Reading, writing, and science

7.What are some additional forms of literacy today?

- a) Cultural literacy, scientific literacy, and computer literacy
- b) Artistic literacy, athletic literacy, and culinary literacy
- c) Mathematical literacy, musical literacy, and linguistic literacy
- d) Historical literacy, political literacy, and geographical literacy

8.What role do schools play in promoting change?

- a) Schools resist change
- b) Schools are agents of change
- c) Schools are unaffected by change
- d) Schools slow down change

9.How do schools deal with diversity?

- a) By promoting segregation

- b) By ignoring diversity
- c) By embracing diversity
- d) By enforcing uniformity

10.What is the impact of globalization on schools?

- a) It leads to homogeneity
- b) It promotes cultural diversity
- c) It has no impact on schools
- d) It increases social inequalities

11.How does knowledge change over time?

- a) Knowledge remains constant
- b) Knowledge decreases in quantity
- c) Knowledge increases rapidly
- d) Knowledge is irrelevant to education

12.What determines the worth of knowledge?

- a) The age of the knowledge
- b) The quantity of knowledge
- c) The relevance of knowledge
- d) All knowledge is equally valuable

13.How is knowledge organized in schools?

- a) Knowledge is not organized in schools
- b) Knowledge is organized by subjects

- c) Knowledge is organized randomly
- d) Knowledge is organized by student interest

14.What are the main elements of the theories about school and society?

- a) Individual actions and their impact
- b) School's influence on social inequalities
- c) School processes and their effects
- d) All of the above

15.What is determinism?

- a) Acting based on personal choice
- b) Acting under external forces
- c) Ignoring societal norms
- d) Resisting social influences

16.What is voluntarism?

- a) Ignoring societal rules
- b) Acting based on personal choice
- c) Resisting external pressures
- d) Enforcing social norms

17.Which type of action is more common in society?

- a) Determinism
- b) Voluntarism

- c) Both are equally common
- d) Neither is common

18.How does the sociological perspective view individual actions?

- a) It denies the existence of free will
- b) It emphasizes the power of external circumstances
- c) It focuses on individual choices only
- d) It disregards societal influences

19.What influences an individual's behavior in determinism?

- a) External forces
- b) Personal beliefs
- c) Voluntary choices
- d) Genetic predispositions

20.Which perspective recognizes free will within societal constraints?

- a) Sociological perspective
- b) Psychological perspective
- c) Philosophical perspective
- d) Educational perspective

CODE: EDU101

SUBJECTIVE PART

LESSON:23

1.Where do schools exist?

Schools exist within society.

2.What is the importance of considering society's impact on schools?

It is important to look at how society impacts what happens or should happen within schools and educational institutions.

3.How does society change?

Society changes rapidly.

4.What can make preparing students for the world of tomorrow difficult?

Sometimes education cannot cope up with the fast-changing society, making it difficult to prepare students for the world of tomorrow.

5.What are the different types of literacy today?

Cultural literacy, scientific literacy, computer literacy, technological literacy, electronic/media literacy, and information literacy.

6.Which level should the teaching of literacy be incorporated?

The teaching of literacy should be incorporated at the school level.

7.What are some of the challenges schools face in dealing with diversity?

Schools have to deal with diversity of culture, the impact of globalization, and issues related to race, class, and gender.

8.How has knowledge grown over time?

Knowledge has grown significantly over time.

9.What is the impact of the explosion of knowledge?

The quantity of material that teachers are expected to teach has increased significantly.

10.What is the need for organizing knowledge?

Due to the growth of knowledge, it has been organized into subjects like English, physics, mathematics, etc.

11.What should schools guide students in?

Schools should guide students in areas of knowledge based on their keen interest.

12.What are some main elements of the sociological foundations of education?

Theories about the relation between school and society, the impact of schooling on individuals' lives, the influence of schools on social inequalities, and the effects of school processes on children, teachers, and other adults.

13.What are the two types of individual actions?

Determinism and voluntarism.

14.What is determinism?

Determinism refers to behaving in a particular way due to external forces.

15.What is voluntarism?

Voluntarism refers to behaving in a particular way based on personal knowledge and understanding.

16.Which type of action is more commonly observed in society?

Determinism is more commonly observed in society.

17.What does the sociological perspective recognize?

The sociological perspective recognizes free will within the context of the power of external circumstances.

18.Why is it important for schools to adapt to societal changes?

Schools need to adapt to societal changes in order to meet the needs of students effectively.

19.How does society impact the education system?

Society impacts the education system by shaping its policies, curriculum, and expectations.

20.What are the salient features that affect schools within society?

The salient features that affect schools within society include social context, societal changes, diversity, and the growth of knowledge.

CODE: EDU101

OBJECTIVE PART

LESSON:24

1.Which theoretical perspective emphasizes the interdependence of the social system?

- a) Functional Theories
- b) Conflict Theories
- c) Interactional Theories
- d) Achievement Ideology

2. According to Emile Durkheim, what is the critical importance of education in societies?

- a) Creating moral unity
- b) Encouraging social conflict
- c) Promoting economic inequality
- d) Fostering individualism

3. According to functionalists, what represents a breakdown of shared values in society?

- a) Consensus
- b) Education
- c) Conflict
- d) Economic power

4. Which sociologist is considered the intellectual founder of conflict theories?

- a) Emile Durkheim
- b) Karl Marx
- c) Max Weber
- d) Émile Durkheim

5.What is the primary focus of conflict theorists in explaining social order?

- a) Cohesion
- b) Struggle
- c) Harmony
- d) Consensus

6.What does the "Achievement Ideology" of schools disguise, according to conflict theorists?

- a) Power struggles
- b) Economic inequality
- c) Cultural capital
- d) Social identities

7.According to conflict theorists, what are educational credentials primarily seen as?

- a) Indicators of actual achievement
- b) Status symbols
- c) Routes to employment
- d) Symbols of social structure

8.Which perspective critiques and extends functional and conflict perspectives?

- a) Interactional Theories
- b) Achievement Ideology

- c) Sociological Foundations
- d) Emile Durkheim's Perspective

9.What is the most problematic aspect at a deep level, according to interactional theories?

- a) School organization
- b) Teacher expectations
- c) Labeling of students
- d) Speech patterns

10.According to the paragraph, what are the three effects of schooling on individuals?

- a) Knowledge, attitudes, and employment
- b) Income, status, and power
- c) Socialization, conformity, and rebellion
- d) Achievement, motivation, and self-esteem

11.According to the paragraph, what do schools develop that profoundly influence those in them?

- a) Competitiveness
- b) Cultural capital
- c) Cultures and traditions
- d) Economic opportunities

12.How many interpersonal contacts does a teacher have with students each day, according to the paragraph?

- a) 100
- b) 500
- c) 1,000
- d) 5,000

13.What can multiple roles performed by a teacher lead to?

- a) Role strain
- b) Role conflict
- c) Role ambiguity
- d) Role overload

14.Which type of college students are most likely to join a rebellious subculture?

- a) Careerists
- b) Intellectuals
- c) Strivers
- d) Vocational students

15.How many television murderers has the average 12-year-old seen, according to the paragraph?

- a) 1,800
- b) 18,000
- c) 180,000
- d) 1,800,000

16.What is the Pakistani society turning into, according to the paragraph?

- a) A bipolar society
- b) A utopian society
- c) A harmonious society
- d) A socialist society

17.What must be eliminated from society to bring equality, according to the paragraph?

- a) Inadequate schools
- b) Tracking
- c) De facto segregation
- d) Gender discrimination

Answer: All of the above

18.According to the paragraph, what represents the glue of society in conflict theories?

- a) Moral values
- b) Social cohesion
- c) Economic, political, cultural, and military power
- d) Interdependence of the social system

19.What is the aim of educational reform according to functionalists?

- a) Encouraging social unity
- b) Promoting conflict

- c) Reducing inequality
- d) Creating moral unity

20. Which sociological perspective emphasizes struggle in explaining social order?

- a) Functional Theories
- b) Interactional Theories
- c) Conflict Theories
- d) Achievement Ideology

CODE: EDU101

SUBJECTIVE PART

LESSON:24

1. What is the focus of functional theories in education?

The interdependence of the social system and integration of its parts.

2. According to Emile Durkheim, what is the importance of education in societies?

Education is of critical importance in creating moral unity, social cohesion, and harmony. Moral values are the foundations of society.

3. What do functionalists assume about consensus and conflict in society?

They assume that consensus is the normal state in society, while conflict represents a breakdown of shared values.

4. What is the goal of educational reform according to functionalists?

To create structures, programs, and curricula that are technically advanced, rational, and encourage social unity.

5. According to conflict theories, what is the basis of social order?

Social order is based on the ability of dominant groups to impose their will on subordinate groups through force, cooptation, and manipulation.

6. Who is the intellectual founder of conflict theories?

Karl Marx.

7. What does the "Achievement Ideology" of schools disguise according to conflict theorists?

It disguises the real power struggle that corresponds to the power struggles in the larger society.

8. What is the primary focus of interactional theories?

Critiquing and extending the functional and conflict perspectives.

9. What are the three effects that schooling should have on individuals?

Knowledge, attitudes, and employment.

10. How does education relate to mobility for different social classes?

For the middle class, education may be linked to mobility, but for the rich and the poor, it may have very little to do with it.

11. What are some organizational aspects of schools?

School size and curriculum expression of culture.

12. Is tracking more common in public schools or private schools?

Tracking is more common in public schools and rarely found in private schools.

13. How many interpersonal contacts does a teacher have with students each day?

A teacher has 1000 interpersonal contacts with students each day.

14. What are some factors that influence teacher expectations for different students?

Factors that influence teacher expectations can be based on various criteria, but the paragraph does not specify which ones.

15. What are the four major types of college students mentioned?

Careerists, intellectuals, strivers, unconnected.

16. What are some consequences of students in vocational programs heading towards low-status jobs?

They are more likely to join a rebellious subculture.

17. How many television murderers has an average 12-year-old seen?

An average 12-year-old has seen 18,000 television murderers.

18. Apart from individuals, what do schools develop?

Schools develop cultures, traditions, and restraints that profoundly influence those in them.

19. According to the paragraph, what are some factors that contribute to education inequality?

Inadequate schools, tracking, de facto segregation, and gender discrimination.

20. What is happening to income differences in Pakistani society according to the paragraph?

Income differences are becoming wider, leading to a "bipolar" society with great wealth, great poverty, and a shrinking middle class.

CODE: EDU101

OBJECTIVE PART

LESSON:25

1. According to Bernstein, code refers to a regulatory mechanism that determines what happens where in which two aspects of education?

- a) Assessment and evaluation
- b) Pedagogy and curriculum
- c) Discipline and classroom management
- d) Textbook selection and implementation

2. What does curriculum define according to Bernstein?

- a) Valid transmission of knowledge
- b) Valid realization of knowledge
- c) Valid knowledge itself
- d) Valid assessment of knowledge

3. Bernstein's work on pedagogic discourse is concerned with the production, distribution, and reproduction of what?

- a) Official knowledge
- b) Unofficial knowledge
- c) Informal knowledge
- d) Personal knowledge

4. According to the paragraph, how do changes in the division of labor influence the meaning systems and code?

- a) They lead to consensus and equal power relations.
- b) They create conflict and unequal power relations.
- c) They eliminate power relations altogether.
- d) They have no impact on the meaning systems and code.

5. What is the consequence of labeling students and designing expectations based on diverse variables?

- a) Students perform better academically.
- b) Students are provided equal opportunities.
- c) Most students are put at a disadvantage.
- d) Teachers become more efficient in their teaching.

6. According to the labeling theory, what influences the options available to a student within a school?

- a) Social class
- b) Physical appearance

c) Evaluative tags

d) Teacher expectations

7.What does labeling theory focus on in relation to deviance?

a) The consequences of deviant behavior

b) The causes of deviant behavior

c) The process of labeling deviant individuals

d) The eradication of deviant behavior

8.How does social control affect deviant behavior according to the paragraph?

a) It eradicates deviant behavior completely.

b) It generates more deviant behavior.

c) It has no impact on deviant behavior.

d) It clarifies group boundaries.

9.According to the paragraph, how does labeling affect a person's identity?

a) It has no impact on a person's identity.

b) It defines a person's social status.

c) It influences a person's behavior.

d) It becomes a central part of a person's identity.

10.What factors play a powerful role in generating teacher expectations?

a) Native ability and physical appearance

b) Race and ethnicity

- c) Test scores and school records
- d) Social class and language patterns

11. When do teacher expectations for students begin to form, according to the paragraph?

- a) During middle school
- b) During high school
- c) During the first few days of school
- d) During the final year of school

12. What is a self-fulfilling prophecy?

- a) A prophecy made by oneself
- b) A prophecy that cannot be fulfilled
- c) A prophecy that leads to deviant behavior
- d) A prophecy that becomes true because it is believed

13. According to the paragraph, who plays a role in defining what forms of conduct should be singled out for attention?

- a) Parents
- b) Students
- c) Teachers
- d) Community members

14. In terms of school priorities, what should be the focus according to the paragraph?

- a) Education for All

- b) Focus on academically talented students
- c) Curriculum to challenge "smart" students
- d) Focus on disadvantaged students

15. According to the paragraph, how can students with dyslexia benefit from their peers?

- a) By receiving individualized instruction
- b) By being labeled as "bright" or "slow"
- c) By being grouped with students of mixed abilities
- d) By receiving extra time for tasks

16. Why should the aims of education change over time according to the paragraph?

- a) To adapt to technological advancements
- b) To maintain a paper-pencil culture
- c) To keep the world static
- d) To align with the kingdom of God

17. What should the curriculum consider according to the paragraph?

- a) The changing world
- b) The stability of the world
- c) The kingdom of God
- d) The aims of education

18. According to the paragraph, what should not be forgotten in the ideological curriculum?

- a) Preparing students for the kingdom of God
- b) Preparing students for the hereafter
- c) Preparing students for the paperless classroom culture
- d) Preparing students for technological advancements

19.What does the paragraph suggest about the teacher's role in school achievement?

- a) Teachers have no impact on school achievement.
- b) Teachers are solely responsible for school achievement.
- c) School achievement depends on a child's native ability only.
- d) Teachers play a significant role in school achievement.

20.According to the paragraph, what influences the willingness to diagnose behavioral traits as serious illness?

- a) Social status
- b) Academic achievement
- c) Native ability
- d) Teacher expectations

CODE: EDU101

SUBJECTIVE PART

LESSON:25

1.According to Bernstein, what does code determine in education?

Code determines what happens in curriculum and pedagogy.

2.What is the definition of code according to Bernstein?

Code refers to a regulative principle underlying curriculum and pedagogy.

3.How does the same textbook result in different teaching approaches?

Teachers interpret and teach the curriculum differently.

4.What does curriculum define and what does pedagogy define?

Curriculum defines valid knowledge, while pedagogy defines valid transmission of knowledge.

5.What is Bernstein's focus in his work on pedagogic discourse?

Bernstein focuses on the production, distribution, and reproduction of official knowledge and its relation to power relations.

6.What does Bernstein argue about schools in relation to their ideological commitment?

Schools reproduce what they are ideologically committed to eradicating.

7.What does the code incorporate, according to Bernstein?

The code incorporates a conflict model of unequal power relations.

8.What is the outcome of the functioning described by Bernstein?

The functioning leads to privilege and domination rather than consensus.

9.What are some variables attributed to the origins of social expectations in schools?

Variables such as social class, physical appearance, test scores, sex, race, language patterns, and school records.

10.How does labeling theory relate to education?

Labeling theory can explain social deviance within schools.

11.How can teachers help students who require more time to complete tasks?

Teachers should provide sufficient time for students who need it to perform tasks.

12.What disadvantage do diverse variables and labeling put students at?

They put most students at a disadvantage.

13.What is the labeling approach interested in understanding?

The labeling approach is interested in understanding why people are labeled and who does the labeling.

14.How do evaluative tags influence a student's options within a school?

Over time, evaluative tags affect the options available to a student within a school.

15.What effect can social control have according to labeling theory?

Social control can paradoxically generate more of the behavior it aims to eradicate.

16.What role does labeling play in clarifying group boundaries?

Labeling deviant behavior helps clarify group boundaries.

17.How does labeling affect an individual's life and identity?

Being labeled as deviant can shape a person's life and identity.

18.What factors influence teacher expectations in relation to school achievement?

Race and ethnicity are powerful factors in generating teacher expectations.

19.When can teacher expectations be generated, and how stable are they?

Teacher expectations can be generated in the first few days of school and remain stable thereafter.

20.Should the aims of education be changeable? Why?

Yes, the aims of education should be changeable to adapt to technological progress and the evolving world.

CODE: EDU101

OBJECTIVE PART

LESSON:26

1.In which societies did oral communication play a significant role in transmitting information?

- a) Pre-literate societies
- b) Chinese society
- c) Ancient Indian society

d) Egyptian society

2.What were the goals of education in pre-literate societies?

a) Teach survival skills

b) Teach group harmony

c) Both a and b

d) None of the above

3.Who were the students in pre-literate societies?

a) Only children

b) Grouped according to age

c) All children

d) Only adults

4.What instructional methods were used in pre-literate societies?

a) Formal methods

b) Children imitate adults

c) Both a and b

d) None of the above

5.Which agents played a role in pre-literate societies' education?

a) Parents

b) Liberal leaders

c) Religious leaders

d) All of the above

6. During the Chinese influence, who received education?

- a) All males
- b) Lower-class individuals
- c) Males of the upper class
- d) Females of the upper class

7. What were the educational goals during the Chinese influence?

- a) Prepare elites to govern the empire according to Confucian principles
- b) Teach survival skills
- c) Promote creativity and innovation
- d) None of the above

8. What instructional method was primarily used during the Chinese influence?

- a) Memorization and recitation
- b) Group discussions
- c) Hands-on experiments
- d) None of the above

9. What curriculum was followed during the Chinese influence?

- a) Vedas and religious texts
- b) Confucian Classics
- c) Practice hunting and fishing

d) Religious or technical texts

10. Which agents were responsible for education during the Chinese influence?

a) Government officials

b) Brahmin priest scholars

c) Parents

d) Liberal leaders

11. In ancient Indian society, who were the students?

a) Males of the upper class

b) Females of the upper class

c) All children

d) Lower-class individuals

12. What instructional methods were used in ancient Indian society?

a) Memorization and recitation

b) Hands-on experiments

c) Oral storytelling

d) None of the above

13. What curriculum was followed in ancient Indian society?

a) Vedas and religious texts

b) Confucian Classics

c) Practice hunting and fishing

d) Religious or technical texts

14. Who were the agents responsible for education in ancient Indian society?

a) Government officials

b) Brahmin priest scholars

c) Parents

d) Liberal leaders

15. During the Egyptian influence, who received education?

a) All males

b) Lower-class individuals

c) Males of the upper class

d) Females of the upper class

16. What instructional methods were used during the Egyptian influence?

a) Memorization and recitation

b) Group discussions

c) Hands-on experiments

d) None of the above

17. What curriculum was followed during the Egyptian influence?

a) Vedas and religious texts

b) Confucian Classics

c) Religious or technical texts

d) Athens: reading, writing, arithmetic, drama, poetry, music, Sparta: Drill, military, songs, and tactics

18. Which agents were responsible for education during the Egyptian influence?

- a) Government officials
- b) Brahmin priest scholars
- c) Parents
- d) Priest and scribes

19. During the Greek influence, who were the students?

- a) All children
- b) Lower-class individuals
- c) Male children ages 7 to 20 years
- d) Female children ages 7 to 20 years

20. What were the educational goals during the Greek influence?

- a) Prepare elites to govern the empire according to Confucian principles
- b) Teach survival skills
- c) Cultivate civic responsibility
- d) None of the above

1.What is a pre-literate society?

A pre-literate society is a society that existed before the advent of writing.

2.How was information transmitted in pre-literate societies?

Information was transmitted orally through spoken language.

3.What were the goals of education in pre-literate societies?

The goals of education in pre-literate societies were to teach survival skills and promote group harmony.

4.Who were the students in pre-literate societies?

All children were considered students in pre-literate societies, and there was no grouping according to age.

5.What were the instructional methods used in pre-literate societies?

The instructional methods were informal, and children imitated adults.

6.What subjects were included in the curriculum of pre-literate societies?

The curriculum of pre-literate societies included practices such as hunting, fishing, songs, poems, and dances.

7.Who were the agents of education in pre-literate societies?

The agents of education in pre-literate societies were parents, liberal leaders, and religious leaders.

8.What was the educational goal during the influence of Chinese education?

The educational goal during the influence of Chinese education was to prepare elites to govern the empire according to Confucian principles.

9.Who were the students during the influence of Chinese education?

The students during the influence of Chinese education were males of the upper class.

10.What instructional methods were used during the influence of Chinese education?

The instructional methods used were memorization and recitation.

11.What was the curriculum during the influence of Chinese education?

The curriculum consisted of the Confucian Classics.

12.Who were the agents of education during the influence of Chinese education?

The government officials were the agents of education during the influence of Chinese education.

13.What were the educational goals in ancient Indian society?

The educational goals in ancient Indian society were to learn behavior and rituals based on the Vedas.

14.Who were the students in ancient Indian society?

The students in ancient Indian society were males of the upper classes.

15.What instructional methods were used in ancient Indian society?

The instructional methods used were memorizing and interpreting sacred texts.

16.What was the curriculum in ancient Indian society?

The curriculum consisted of the Vedas and religious texts.

17.Who were the agents of education in ancient Indian society?

The Brahmin Priest scholars were the agents of education in ancient Indian society.

18.What were the educational goals during the influence of Egyptians?

The educational goals during the influence of Egyptians were to prepare priests and scribes for the empire.

19.Who were the students during the influence of Egyptians?

The students during the influence of Egyptians were males of the upper class.

20.What instructional methods were used during the influence of Egyptians?

The instructional methods used were memorization and copying texts.

1.What were the educational goals during the influence of Romans?

- a) Cultivate religious commitment
- b) Develop civic responsibility for the empire**
- c) Expertise in mathematics and science
- d) Establish social order

2.Which age group of children were the primary students during the influence of Romans?

- a) Male children ages 7-20**
- b) Male children of upper class ages 7-20
- c) Male children of aristocracy and upper classes, ages 7-20
- d) Boys and girls ages 7-12 in vernacular schools

3.What were the instructional methods used during the influence of Romans?

- a) Memorization and recitation in primary schools, imitation and discussion in higher schools
- b) Reading, writing, arithmetic, law, and philosophy
- c) Memorization and recitation in ludus, declamation in rhetorical schools**
- d) Memorization drill, indoctrination, catechetical instruction in vernacular schools

4.Which agents played a role in the educational system during the influence of Romans?

- a) Mosques and court schools
- b) Private schools and teachers, schools of rhetoric**

- c) Parish, chantry, cathedral schools, universities, knighthood
- d) Classical Humanists educators and schools like Lycee, gymnasium, and Latin school

5.What was the influence on education during the influence of Romans?

- a) Practical administrative skills
- b) Cultivate religious commitment to Islamic beliefs
- c) Structure and organization of the University
- d) Emphasis on literary knowledge and excellence in classical literature

6.Which age group of children were the primary students during the influence of Arabic Society?

- a) Male children ages 7-20
- b) Male children of upper class ages 7-20
- c) Male children of aristocracy and upper classes, ages 7-20
- d) Male children of upper class ages 7-20 and girls and women entering religious community ages 7-20

7.What were the educational goals during the influence of Arabic Society?

- a) Develop civic responsibility for the empire
- b) Cultivate religious commitment to Islamic beliefs
- c) Develop religious commitment, knowledge, and ritual
- d) Cultivate Humanist experts in Greek and Latin classes

8.What were the instructional methods used during the influence of Arabic Society?

- a) Memorization and recitation in primary schools, imitation and discussion in higher schools
- b) Reading, writing, arithmetic, religious literature, scientific studies
- c) Memorization and recitation in lower schools, text analysis discussion in higher school and universities
- d) Memorization and translation, and analysis of Greek and Roman classes, classical literature, poetry, and art

9.Which agents played a role in the educational system during the influence of Arabic Society?

- a) Mosques and court schools
- b) Private schools and teachers, schools of rhetoric
- c) Parish, chantry, cathedral schools, universities, knighthood
- d) Mosques, court schools

10.What was the influence on education during the influence of Arabic Society?

- a) Practical administrative skills
- b) Cultivate religious commitment to Islamic beliefs
- c) Structure and organization of the University
- d) Emphasis on literary knowledge and excellence in classical literature

11.What were the educational goals during the influence of Medieval period?

- a) Cultivate religious commitment to Islamic beliefs

- b) Develop civic responsibility for the empire
- c) Develop religious commitment, knowledge, and ritual
- d) Cultivate Humanist experts in Greek and Latin classes

12. Which age group of children were the primary students during the influence of Medieval period?

- a) Male children ages 7-20
- b) Male children of upper class ages 7-20
- c) Male children of aristocracy and upper classes, ages 7-20
- d) Male children of upper class and girls and women entering religious community ages 7-20

13. What were the instructional methods used during the influence of Medieval period?

- a) Memorization and recitation in primary schools, imitation and discussion in higher schools
- b) Reading, writing, arithmetic, religious literature, scientific studies
- c) Memorization and recitation in lower schools, text analysis discussion in higher school and universities
- d) Memorization and translation, and analysis of Greek and Roman classes, classical literature, poetry, and art

14. Which agents played a role in the educational system during the influence of Medieval period?

- a) Mosques and court schools
- b) Private schools and teachers, schools of rhetoric
- c) Parish, chantry, cathedral schools, universities, knighthood

d) Classical Humanists educators and schools like Lycee, gymnasium, and Latin school

15.What was the influence on education during the influence of Medieval period?

- a) Practical administrative skills
- b) Cultivate religious commitment to Islamic beliefs
- c) Structure and organization of the University
- d) Institutionalization of knowledge

16.What were the educational goals during the influence of Renaissance Period?

- a) Cultivate religious commitment to Islamic beliefs
- b) Develop civic responsibility for the empire
- c) Cultivate Humanist experts in Greek and Latin classes
- d) Cultivate a commitment to a particular religious denomination and general literacy

17.Which age group of children were the primary students during the influence of Renaissance Period?

- a) Male children ages 7-20
- b) Male children of upper class ages 7-20
- c) Male children of aristocracy and upper classes, ages 7-20
- d) Male children of aristocracy and upper classes, ages 7-20, and girls and women entering religious community ages 7-20

18.What were the instructional methods used during the influence of Renaissance Period?

- a) Memorization and recitation in primary schools, imitation and discussion in higher schools
- b) Reading, writing, arithmetic, religious literature, scientific studies
- c) Memorization and recitation in lower schools, text analysis discussion in higher school and universities
- d) Memorization and translation, and analysis of Greek and Roman classes, classical literature, poetry, and art

LESSON:28

1.Who developed an ethical system based on hierarchy, human relations, and roles?

A) Confucius

B) Socrates

C) Plato

D) Aristotle

2.According to Confucius, what do human beings need in society?

A) Stability

B) Self-examination

C) Intellectual capabilities

D) Rationality

3.Which philosopher defined humans by self-examination?

A) Confucius

B) Socrates

C) Plato

D) Aristotle

4.Plato's philosophy can be described as:

A) Philosophical idealism

B) Realists

C) Social conservation

D) Views society based on observation

5.According to Aristotle, what power do humans possess to guide their conduct?

A) Stability

B) Self-examination

C) Intellectual capabilities

D) Rationality

6.What concept encapsulated education during the period of Ancient Turks (before Islam)?

A) Alp

B) God

C) Absolute truth

D) Gender difference

7.When did Turks accept Islam?

A) 10th Century

B) 1st Century

- C) 5th Century
- D) 15th Century

8. Which subjects were taught in the madrasas opened in Samerkant, Bukhara, Tashkent, and Kashgar?

- A) Religion and social studies
- B) Philosophy and mathematics
- C) Science and art
- D) Literature and history

9. Farabi believed that the base for human nature is:

- A) Knowledge
- B) Morality
- C) Religion
- D) Wisdom

10. According to Farabi, what is the ultimate knowledge?

- A) Innate knowledge
- B) Scientific knowledge
- C) Artistic knowledge
- D) Moral knowledge

11. Ibn-e-Sina believed that children should be taught moral values because they are:

- A) Innocent and clean from the start

- B) Intelligent and wise
- C) Creative and imaginative
- D) Curious and explorative

12. Which Eastern philosopher emphasized the importance of learning and respecting each other's language, religion, traditions, and thinking?

- A) Confucius
- B) Socrates
- C) Plato
- D) Biruni

13. Biruni's educational philosophy emphasized the removal of:

- A) Magic and superstition
- B) Intellectual capabilities
- C) Self-examination
- D) Order and stability

14. What was the oldest Turkish written texts period before?

- A) Christianity
- B) Islam
- C) Confucianism
- D) Buddhism

15. Which educational theorists believed in gaining knowledge from ancestors and old wise people?

- A) Confucius

- B) Socrates
- C) Plato
- D) Ancient Turks

16. Which agents were raised in the madrasas opened during the Islamic period of Ancient Turks?

- A) Confucius and Socrates
- B) Plato and Aristotle
- C) Farabi, Ibn-e-Sina, and Biruni

- a) To train workers for the empire
- b) To provide education for non-Muslim families
- c) To focus on military training
- d) To train talented children of non-Muslim families

11.Which language was primarily used for education during the Ottoman Period?

- a) Arabic only
- b) Turkish only
- c) Persian only
- d) Arabic, Turkish, and Persian

12.What major change in education was brought about by the French Revolution?

- a) Introduction of new teaching methods
- b) Expansion of technology and machinery
- c) Increase in the number of schools and universities
- d) Shift towards free thinking and new philosophies

13.What type of workers emerged during the Industrialization period?

- a) Factory workers
- b) Farmers and agricultural workers
- c) Artisans and craftsmen
- d) Government officials and administrators

14.What were some popular systems that gained popularity during this period?

- a) Democracy and monarchy
- b) Socialism, communism, liberalism, and capitalism
- c) Feudalism and autocracy

d) Anarchism and totalitarianism

15.What were some new philosophies that emerged during this period?

a) Idealism and existentialism

b) Materialism, socialism, positivism, etc.

c) Stoicism and hedonism

d) Pragmatism and skepticism

16.Who believed that education should be for everyone during the Industrialization period?

a) Pestalozzi

b) Herbart

c) Froebel

d) Rousseau

17.According to Herbart, what is the purpose of education?

a) Serving the society

b) Discovering individual talents

c) Promoting social justice

d) Managing, educating, and disciplining young people

18.What age range did Froebel emphasize for education?

a) 6-12 years

b) 12-18 years

- c) 3-4 years
- d) 18-22 years

19. Who founded the concept of "Kindergarten"?

- a) Pestalozzi
- b) Herbart
- c) Frobel
- d) Rousseau

20. What type of learning did social education emphasize?

- a) Rote memorization
- b) Experimental learning
- c) Lecture-based learning
- d) Independent study

CODE: EDU101

SUBJECTIVE PART

LESSON:29

Q1: What were some of the methods used to teach in the Selcuks period?

A: Memorization and discussion were used as teaching methods.

LESSON:30

Topic: 161 Theorists of this Period (Industrialization)-2

1. Who believed in Education for freedom?

A) Tolstoy

B) John Dewey

C) Maria Montessori

D) Al Mahmut

2. According to Tolstoy, what kind of relationship did he suggest for teacher-student?

A) Master-apprentice

B) Dictator-subordinate

C) Parent-child

D) Supervisor-employee

3. John Dewey emphasized that education is not just preparation for life; instead, it is:

A) Employment-oriented

B) Life itself

C) A journey

D) A means to an end

4. Who advocated the concept of learning through self-discovery and interest?

A) Tolstoy

B) John Dewey

C) Maria Montessori

D) Al Mahmut

5.Which theorist emphasized the use of sensory education, especially in early years education?

- A) Tolstoy
- B) John Dewey
- C) Maria Montessori
- D) Al Mahmut

6.What did the reform period in Ottoman education occur between?

- A) 16th and 17th centuries
- B) 17th and 18th centuries
- C) 18th and 19th centuries
- D) 19th and 20th centuries

7.In the Ottoman Empire, what was the first type of education introduced during the reform period?

- A) Military education
- B) Religious education
- C) Vocational education
- D) Industrial education

8.In 1824, who made primary education mandatory in the Ottoman Empire?

- A) Al Mahmut
- B) Rustiye
- C) Idadiye
- D) Sultani

9.What was the name of the highest level of education (university) in the Ottoman Empire?

- A) Rustiye mekteplerie
- B) Idadi
- C) Sultani
- D) Darulfunun

10.Which Sultan's period saw changes in education through the Islahat Farmani?

- A) Abdul Hamit
- B) Al Mahmut
- C) Rustiye
- D) John Dewey

Topic: 162 – Ottoman Education-1

11.Which document mandated that education is for everyone in the Ottoman Empire?

- A) Kanun-I-Esasi
- B) Islahat Farmani
- C) Rustiye mekteplerie
- D) Darulfunun

12.During which Sultan's period did education gain importance after losing the Russian war?

A) Abdul Hamit

B) Al Mahmut

C) Rustiye

D) John Dewey

- d) Mahmood Ghaznavi

2.Which dynasty was characterized by a focus on spreading Islamic education?

- a) Ghaznavi Dynasty
- b) Ghauri Dynasty
- c) Slave Dynasty
- d) Khilji Dynasty

3.Who built many mosques and cities during the Slave Dynasty?

- a) Qutab-ud-Din Aibak
- b) Altumush
- c) Ghais-ud-din Balban
- d) Muhammad Ghauri

4. Who set up a library in Delhi during the Khilji Dynasty?

- a) Jala-ud-Din Khilji
- b) Amir Khusru
- c) Ala-ud-Din Khilji
- d) Ibn-e-Batuta

5. Who wrote extensively about his findings and discoveries during his tour of India?

- a) Firdousi
- b) Attabi
- c) Ibn-e-Batuta
- d) Mahmood Ghaznavi

6. Which dynasty suffered from lawlessness and disorder, leading to a decline in art and literature?

- a) Ghaznavi Dynasty
- b) Ghauri Dynasty
- c) Slave Dynasty
- d) Syed Dynasty

7. During which dynasty was the book "Kitab-ul-Hind" written?

- a) Ghaznavi Dynasty
- b) Ghauri Dynasty
- c) Slave Dynasty
- d) Tughlaq Dynasty

8. Who patronized art and literature despite being illiterate during the Khilji Dynasty?

- a) Firdousi

b) Jala-ud-Din Khilji

c) Alberuni

d) Altumush

9. Who was appointed as the supervisor of the library in Delhi during the Khilji Dynasty?

a) Amir Khusru

b) Qutab-ud-Din Aibak

c) Ghais-ud-din Balban

d) Ibn-e-Batuta

10. Which dynasty was founded by Ghias-ud-Din Tughlaq?

a) Tughlaq Dynasty

b) Ghaznavi Dynasty

c) Ghauri Dynasty

d) Slave Dynasty

11. During the Ghaznavi Dynasty, which area saw the flourishing of architecture, art, and literature?

a) Education

b) Science

c) Religion

d) Court

12. Who was fond of art and literature during the Slave Dynasty?

a) Qutab-ud-Din Aibak

b) Altumush

- c) Ghais-ud-din Balban
- d) Muhammad Ghauri

13. Which dynasty had a reputation for repressing revolts and neglecting art and literature?

- a) Ghaznavi Dynasty
- b) Ghauri Dynasty
- c) Slave Dynasty
- d) Tughlaq Dynasty

14. Which dynasty had a focus on training slaves?

- a) Ghaznavi Dynasty
- b) Ghauri Dynasty
- c) Slave Dynasty
- d) Tughlaq Dynasty

15. Who was the famous historian who toured India and wrote extensively during the Tughlaq Dynasty?

- a) Firdousi
- b) Attabi
- c) Ibn-e-Batuta
- d) Mahmood Ghaznavi

16. Who was appreciative of scholars and religious saints during the Slave Dynasty?

- a) Qutab-ud-Din Aibak
- b) Altumush
- c) Ghais-ud-din Balban
- d) Muhammad Ghauri

17. Who wrote the book "Kitab-ul-Yameeni" during the Ghaznavi Dynasty?

- a) Firdousi
- b) Attabi
- c) Alberuni
- d) Mahmood Ghaznavi

18. Which dynasty encouraged young people to choose their own area of interest for education?

- a) Ghaznavi Dynasty
- b) Ghauri Dynasty
- c) Slave Dynasty
- d) Khilji Dynasty

19. Who was not fond of art and literature but focused on spreading Islamic education during the Ghauri Dynasty?

- a) Firdousi
- b) Jala-ud-Din Khilji
- c) Muhammad Ghauri
- d) Altumush

20. Which dynasty was characterized by lawlessness and disorder, leading to a decline in art and literature?

- a) Tughlaq Dynasty
- b) Syed Dynasty
- c) Slave Dynasty
- d) Khilji Dynasty

CODE: EDU101

SUBJECTIVE PART

LESSON:31

1. Who were the glory of the court of Mahmood Ghaznavi?

Answer: About 400 scholars, poets, scientists, and geographers were the glory of the court of Mahmood Ghaznavi.

2. What fields flourished during the Ghaznavi Dynasty?

Answer: During the Ghaznavi Dynasty, architecture, art, and literature flourished.

OBJECTIVE PART

LESSON:32

1. Who patronized literary activities during the Lodhi Dynasty?

- A) Bahlol Lodhi
- B) Sikander Lodhi
- C) Ibrahim Lodhi
- D) None of the above

2. Which language flourished during Sikander Lodhi's reign?

- A) Persian
- B) Sanskrit
- C) Arabic
- D) Urdu

3. Who was known for his ideal nature during the Lodhi Dynasty?

- A) Bahlol Lodhi
- B) Sikander Lodhi
- C) Ibrahim Lodhi
- D) None of the above

4. During which dynasty did art and literature flourish?

- A) Lodhi Dynasty
- B) Mughal Dynasty
- C) Sufi Dynasty
- D) None of the above

5. Which language were numerous books translated into during the Mughal Dynasty?

- A) Persian
- B) Sanskrit
- C) Arabic
- D) English

6. What kind of books were written during the Mughal Dynasty?

- A) Novels and short stories
- B) Biographies and historical events
- C) Science fiction
- D) Poetry collections

7. Who played an important role in spreading Islamic education in India?

- A) Mughal emperors
- B) Muslim Sufis
- C) Scholars from Europe

D) Indian saints

8. Where did scholars and religious saints come from to India?

A) India and Pakistan

B) Afghanistan, Iran, Turkistan, Arabia, Syria, and Egypt

C) China and Japan

D) North America and Europe

9. Which civilization is not discussed in the paragraph?

A) Ancient civilizations

B) European civilization

C) Pakistani civilization

D) Islamic civilization

10. Which educational conference took place in Karachi in December 1947?

A) 1947 Educational Conference

B) Educational Reform Conference

C) Quaid-e-Azam Conference

D) None of the above

11. Whose vision led to the first educational conference in Pakistan?

A) Bahlol Lodhi

B) Sikander Lodhi

C) Ibrahim Lodhi

D) Quaid-e-Azam Muhammad Ali Jinnah

12. What theory formed the basis for Pakistan's creation?

A) Two Nation Theory

B) Islamic Theory

- C) Democratic Theory
- D) Socialism Theory

13.What did the conference recommend regarding the educational system?

- A) It should reflect Islamic education
- B) It should prioritize foreign languages
- C) It should promote scientific education
- D) None of the above

14.What was the literacy rate of Pakistan at its creation?

- A) Higher than advanced countries
- B) Equal to advanced countries
- C) Lower than advanced countries
- D) None of the above

15.How was the conference's recommendation to raise the literacy rate?

- A) Through primary and adult education programs
- B) Through foreign language courses
- C) Through vocational training
- D) Through political reforms

16.What subject was recommended as compulsory during the conference?

- A) Mathematics
- B) Religious education based on Quran and Sunnah
- C) Science
- D) Art and music

17.What is the main focus of the paragraph?

- A) Lodhi Dynasty's literary activities
- B) Mughal Dynasty's art and literature
- C) Role of Sufis in spreading education
- D) Historical foundations of education in Pakistan

18.How does the paragraph emphasize improving literacy in Pakistan?

- A) By promoting vocational education
- B) By establishing more universities
- C) By focusing on primary and adult education programs
- D) By introducing foreign language courses

19.Which leader's vision is mentioned in the paragraph?

- A) Bahlol Lodhi
- B) Sikander Lodhi
- C) Ibrahim Lodhi
- D) Quaid-e-Azam Muhammad Ali Jinnah

20.What is the main goal of Pakistani education based on the paragraph?

- A) To achieve universal literacy
- B) To promote secular education
- C) To prioritize foreign language learning
- D) None of the above

CODE: EDU101

OBJECTIVE PART

LESSON:32

Q1: Who was Bahlol Lodhi, and how did he contribute to education?

A: Bahlol Lodhi was the ruler of the Lodhi Dynasty. Although he was not literate himself, he greatly appreciated scholars of various disciplines and rewarded them.

Q2: What did Sikander Lodhi do to promote literature during his reign?

A: Sikander Lodhi had a high literary taste, and Persian language flourished in his reign. Many books in Sanskrit were translated into Persian.

Q3: What was the literary focus during Ibrahim Lodhi's reign?

A: Not much attention was given to literary works during Ibrahim Lodhi's reign.

A: With the creation of Pakistan, there was a need to assess existing educational facilities and find ways to improve them.

Q10: When and where was the first educational conference held in Pakistan?

A: The first educational conference in Pakistan was held in Karachi in December 1947.

Q11: What principle did the conference recommend for the educational system in Pakistan?

A: The conference recommended that the educational system in Pakistan should be based on the Two Nation Theory and reflect Islamic education.

Q12: What was the goal of the conference regarding literacy in Pakistan?

A: The conference recommended raising the literacy rate in Pakistan to 100% through primary and adult education programs.

Q13: Which subject was recommended as compulsory in the conference's educational recommendations?

A: The conference recommended making religious education, specifically the study of the Quran and Sunnah, a compulsory subject.

Q14: What was the state of literacy in Pakistan when it was created?

A: The literacy rate in Pakistan was lower than that of advanced and progressive countries at the time of its creation.

Q15: Besides literacy, what did the conference emphasize as a compulsory education subject?

A: Along with literacy, the conference recommended making religious education a compulsory subject.

CODE: EDU101

OBJECTIVE PART

LESSON:33

1.What was one of the main goals emphasized during the 1947 Educational Conference?

- a) Promoting national unity
- b) Abolishing English language
- c) Reorganizing technical education
- d) Increasing the period of primary education

2.Why was Urdu recommended as the medium of instruction at the conference?

- a) It was the only language spoken and understood in the subcontinent.
- b) It was considered superior to other languages in the region.
- c) It was the language of the English rule over India.

d) It was the most widely spoken language among the provinces.

3.What was the purpose of establishing a Central Educational Consultation Board?

- a) To promote national unity among provinces
- b) To train citizens in civic matters
- c) To plan the educational system and devise programs
- d) To coordinate the programs of universities in the country

4.What did the conference recommend regarding the use of English as a medium of instruction?

- a) Gradual abolishment of English language
- b) Immediate abolishment of English language
- c) Expansion of English language teaching
- d) Retention of English as the primary medium of instruction

5.What was one of the key recommendations made to improve education in Pakistan?

- a) Reorganization of technical education
- b) Increase in the period of primary education
- c) Focus on women's education
- d) Implementation of compulsory religious education

6.Which objective of education was emphasized during the conference?

- a) Preservation of Nazaria Pakistan
- b) Abolition of illiteracy in the country
- c) Compulsory primary education for all
- d) Gradual abolition of English as a medium of instruction

7.What was the conference's view on adult education?

a) It should be given high priority to increase literacy rates.

b) It was not necessary and should be abolished.

c) It should only focus on technical education.

d) It should be provided alongside primary education.

8. Which recommendation aimed at promoting a democratic society?

a) Training for good citizenship

b) Establishment of a Central Educational Consultation Board

c) Setting up an Interdisciplinary Board

d) Reorganization of technical education

9. What change did the conference suggest for the period of primary education?

a) Increase from four years to five years

b) Decrease from five years to four years

c) Make it compulsory for all age groups

d) Eliminate primary education altogether

10. Why was coeducation at the primary stage recommended by the conference?

a) To promote a sense of good citizenship

b) To improve the quality of education

c) To increase female enrollment in schools

d) To train teachers in modern teaching methods

11. Which language was recommended to be gradually abolished as a medium of instruction?

a) Urdu

b) English

c) Hindi

d) Arabic

12.What was the purpose of recommending the training of teachers?

a) To promote national unity

b) To improve the quality of education

c) To establish a democratic society

d) To coordinate university programs

13.What did the conference recommend to avoid damage by provincial prejudices?

a) Establishment of a democratic society

b) Formation of a Central Educational Consultation Board

c) Adoption of Urdu as a medium of instruction

d) Promotion of national unity

14.What was the conference's view on the period of primary education?

a) It should be reduced to three years.

b) It should be made optional for students.

c) It should be increased from four to five years.

d) It should remain unchanged at four years.

15.Which objective of education was highlighted by the conference?

a) Promotion of national unity

b) Abolition of literacy in the country

c) Compulsory religious education

d) Gradual abolition of Urdu as a medium of instruction

16.What was the purpose of setting up an Interdisciplinary Board?

a) To promote national unity

- b) To train citizens in civic matters
- c) To coordinate university programs
- d) To reorganize technical education

17. Which recommendation aimed at promoting women's education?

- a) Establishment of a democratic society
- b) Reorganization of technical education
- c) Increase in the period of primary education
- d) Stress on coeducation at the primary stage

18. What did the conference stress regarding adult education?

- a) It should be provided alongside primary education.
- b) It should be given high priority for speedy implementation.
- c) It should focus only on technical education.
- d) It should be abolished to focus on children's education.

19. What was the recommendation regarding the formation of a Central Educational Consultation Board?

- a) It should comprise provincial ministers of education and DPs.
- b) It should focus on promoting national unity.
- c) It should abolish English language as a medium of instruction.
- d) It should prioritize the training of teachers.

20. What was the conference's view on the use of English as a medium of instruction?

- a) It should be immediately abolished.
- b) It should be expanded in all educational programs.
- c) It should be gradually abolished after independence.
- d) It should be retained as the primary medium of instruction.

1.What was the main objective of the Educational Conference of 1947?

Answer: The main objective was to promote national unity among all people of the provinces.

2.What was recommended to avoid damage caused by provincial prejudices?

Answer: The conference recommended promoting a passion of national unity.

3.What did the conference suggest regarding the establishment of a society?

Answer: The conference recommended setting up a democratic society.

4.Why was training in civic matters emphasized?

Answer: Training in civic matters was emphasized so that citizens could be aware of their rights and duties.

5.Why did the conference recommend adopting Urdu as a medium of instruction?

Answer: Urdu was recommended as a means of unity among provinces since it was the only language spoken and understood widely.

Answer: English was seen as a memory of British rule, so there was a need to abolish it after gaining independence.

7.What was the proposed solution to abolish English as a medium of instruction?

Answer: The conference recommended gradually abolishing the use of English language.

8.Who did the conference recommend to be part of the Central Educational Consultation Board?

Answer: The board was recommended to comprise provincial ministers of education, DPIs, members of the National Assembly, and eminent educationists.

9.What was the role of the Central Educational Consultation Board?

Answer: The board was responsible for planning the educational system and designing educational programs for the provinces.

10.Why was teacher training considered important?

Answer: Teacher training was necessary to utilize modern teaching methods effectively.

11.What was the objective of training children in good citizenship?

Answer: The objective was to create a sense of good citizenship and promote an exemplary society.

12.What was the purpose of the proposed Inter University Board?

Answer: The board was intended to coordinate educational and research programs across universities in the country.

13.What did the conference recommend regarding technical education in Pakistan?

Answer: The conference advised reorganizing technical education and establishing an Industrial Research Council and Technical Education.

14.How did the conference propose to increase the period of primary education?

Answer: The conference recommended increasing the period from four years to five years.

15.What was the emphasis of the conference regarding women education?

Answer: The conference stressed the importance of women education and recommended coeducation at the primary stage.

CODE: EDU101

OBJECTIVE PART

LESSON:34

1.According to the National Education Commission 1959, what is one of the objectives of primary education?

- a) To promote physical growth
- b) To teach foreign languages
- c) To encourage artistic abilities
- d) To enhance technical skills

2.What is one of the objectives of primary education according to the Commission?

- a) To create a sense of good citizenship

- b) To focus on academic achievements only
- c) To encourage specialization in various fields
- d) To prioritize vocational training

3. Which level of government is responsible for meeting half of the total expenditure of primary education?

- a) Federal government
- b) Provincial governments
- c) Local government
- d) Private organizations

4. What is one of the recommended facilities for teachers in primary education according to the Commission?

- a) Higher salary for male teachers
- b) Priority given to male teachers in hiring
- c) Professional training for teachers
- d) Limited working hours for teachers

5. According to the National Education Commission, what should be the duration of the secondary education year?

- a) 30 weeks
- b) 36 weeks
- c) 40 weeks
- d) 52 weeks

6. What percentage of marks is based on external examination in the recommended examination system for higher education?

- a) 10%
- b) 25%
- c) 50%

d) 75%

7.What is one of the objectives of higher education according to the Commission?

- a) To create a sense of social responsibility
- b) To focus solely on academic achievements
- c) To discourage research and curiosity
- d) To limit students' choices in career paths

8.What is one of the recommended service conditions for university teachers in higher education?

- a) Decreasing the academic year to 30 weeks
- b) Decreasing the workload for teaching
- c) Promoting teachers based on seniority
- d) Providing necessary facilities for research work

9.According to the National Education Commission, what should be the standard for admission to medical college?

- a) FSc. (pre-medical)
- b) BA/BSc
- c) FSc. (Pre-Engineering)
- d) No specific standard

10.What is one of the recommendations of the Commission regarding technical education?

- a) Upgrading vocational schools to technical colleges
- b) Decreasing the emphasis on technical skills
- c) Eliminating technical education from the system
- d) Setting up separate Technical Education Boards

11.What was one of the criticisms of the National Education Commission's recommendations?

- a) Neglecting the Islamic objectives of education
- b) Focusing too much on vocational training
- c) Ignoring the needs of the elites in society
- d) Proposing a revolutionary change in administrative structure

12.Which system of education did the Commission recommend that was criticized for not reflecting an Islamic State like Pakistan?

- a) British colonial system
- b) American education system
- c) Chinese education system
- d) Indian education system

13.What was one of the recommendations of the Commission regarding public schools?

- a) Making them accessible to all social classes
- b) Prioritizing education for rural areas
- c) Promoting privatization of education
- d) Limiting access to certain classes of society

14.According to the Commission, which level of government should oversee the work of provincial committees?

- a) Federal government
- b) Local government
- c) Autonomous Board
- d) Central committee

15.What is one of the objectives of secondary education according to the Commission?

- a) To prioritize technical skills over academic achievements
- b) To encourage specialization in specific fields
- c) To create a sense of leadership among students
- d) To eliminate physical education from the curriculum

16.What should be the duration of the PhD research period according to the Commission's recommendations?

- a) One year
- b) Two years
- c) Three years
- d) Five years

17.How should the examination system assess students' abilities according to the Commission?

- a) Emphasize memory-based tests
- b) Focus on objective tests
- c) Use subjective tests only
- d) Eliminate examinations altogether

18.What is one of the recommended service conditions for university teachers in higher education?

- a) Decreasing the workload for teaching
- b) Increasing the duration of winter vacations
- c) Providing facility of provident fund
- d) Promoting teachers based on popularity

19.What should the curriculum of higher education be prepared according to?

- a) Historical needs

b) Industrial needs

c) Cultural needs

d) Personal needs

20. What should be the standard for admission to law colleges according to the Commission's recommendations?

a) FSc. (pre-medical)

b) BA/BSc

c) FSc. (Pre-Engineering)

d) No specific standard

CODE: EDU101

OBJECTIVE PART

LESSON:34

Question1: What were the objectives of primary education according to the National Education Commission 1959?

Answer: The objectives of primary education were to enable students to read and write, promote their mental, social, moral, and physical growth, create a sense of good citizenship, foster self-confidence and curiosity, instill a passion for hard work, and equip them with information and skills.

Question2: What was the recommended curriculum for primary education in 1959?

Answer: The curriculum for primary education was supposed to be tailored to the needs and abilities of the child. Practical and planning methods were to be used for teaching, and the national language was to be taught to all children. Additionally, a sense of dignity for manual work and a passion for patriotism were to be instilled in the curriculum.

Question3: How was primary education organized at the district level according to the National Education Commission 1959?

Answer: Primary education was organized at the district level, with an education committee established in each district. The committee consisted of the Deputy Commissioner as its Chairman, the District Education Officer, and four members. The district was further divided into Union Committees responsible for teacher transfers.

Question4.: What was the proposed financing model for primary education in 1959?

Answer: According to the National Education Commission, the responsibility for the land, property, and equipment of primary schools lay with the people. Half of the total expenditure of primary education was to be borne by the provincial governments, while the other half was to be met through district taxes. Provincial and central committees were established to meet educational needs and supervise the work.

Question5: What facilities were recommended for teachers in primary education according to the 1959 commission?

Answer: The recommendations included providing professional training for primary education teachers, arranging refresher courses, improving the service conditions for teachers, rewarding teachers showing better performance, preferring female teachers for the first three classes, and making residence arrangements for female teachers.

Question6.: How did the National Education Commission envision secondary education in 1959?

Answer: The commission recommended organizing secondary education as a separate unit from elementary and higher education. The objectives of secondary education were to promote freedom of thinking, research and curiosity, leadership skills, coping with adolescence needs, aesthetic sense, love for art and culture, and interest in games. It also aimed to develop a sense of social responsibility, cooperation, and patriotism.

Question7.: What duration was proposed for secondary education according to the 1959 commission?

Answer: The education from class ninth to twelfth was recommended as secondary education, with three stages: middle (sixth to eighth class), secondary (ninth to tenth class), and higher secondary (eleventh to twelfth class).

Question8.: What were the key recommendations for the curriculum of secondary education in 1959?

Answer: The curriculum was recommended to consist of compulsory and optional subjects. Optional subjects were to be grouped so that students could choose based on their interests. English was to be taught practically, with emphasis on science, mathematics, and the national language. Religious education was made compulsory at the middle stage, and skills like woodwork, agriculture, economics, typing, and mental work were to be introduced at the secondary stage.

Question9: How was the examination system proposed to be reorganized for secondary education in 1959?

Answer: The examination system was recommended to be held after the tenth and twelfth classes. Examination records were to be kept safe, and Secondary Education Boards were allowed to issue certificates. Private students were to have the same syllabus as regular students and would be allowed to sit in the examination.

Question10.: What were the suggested service conditions for teachers in secondary education according to the 1959 commission?

Answer: The recommendations included appointing trained teachers, conducting refresher courses, providing better pay and benefits, having a 40-week education year with vacation periods, dividing the workload

between teaching and guidance, and providing necessary facilities to secondary schools.

Question11.: What objectives did the National Education Commission set for higher education in 1959?

Answer: The objectives for higher education included creating freedom of thinking, fostering research and curiosity, developing leadership skills, enabling students to cope with practical life needs, consolidating habits of honesty and hard work, promoting the dignity of work, and providing professional guidance for skill and career choices.

Question12: How was the duration of higher education proposed to be structured according to the 1959 commission?

Answer: The commission recommended that intermediate classes be handed over to Secondary Education Boards, and each university should set its own standards for admission.

Question13: What recommendations were made for the syllabus of higher education in 1959?

Answer: The syllabus was suggested to be prepared according to the needs of the modern age, including teaching world languages important for industrial, commercial, administrative, and defense needs. Modern disciplines such as Business Administration, Journalism, Sociology, and Home Economics were to be taught in harmony with the requirements of the modern age.

Question14: How was the examination system proposed for higher education in 1959?

Answer: The examination system was recommended to allocate 75% marks based on external examinations and 25% based on internal assessment. Marks gained in the internal and external assessments were

to be entered separately on certificates and degrees. Objective tests were to be introduced to assess student abilities.

Question15: What suggestions were made regarding research and training in higher education according to the 1959 commission?

Answer: Research work was recommended to be made compulsory for university teachers, and study committees were to be set up in each university for research and teaching programs. Research conducted in other universities was to be shared for the benefit of teachers, and an autonomous board of eminent scientists and educationists was to be established to coordinate national research.

Question16: What service conditions and facilities were proposed for university teachers in higher education in 1959?

Answer: Necessary facilities were to be provided for university teachers and students engaged in research work. The academic year was to consist of 36 weeks, and teachers were expected to devote a certain number of hours to teaching. Promotion based on performance, substantive pay, and the facility of a provident fund were recommended for teachers.

Question17: What recommendations were made for professional education in higher education according to the 1959 commission?

Answer: Admission standards for professional education, such as medical and engineering colleges, were suggested. The teaching of additional engineering subjects like Chemical, Petroleum, and Mining engineering was recommended. The education period for law colleges was proposed to be extended, and commerce institutions for teaching official matters, banking, and insurance were suggested.

Question18: How was technical education proposed to be integrated into the education system according to the 1959 commission?

Answer: Technical education was recommended to be made part of the education system, with the upgrade of polytechnics to technical colleges and the widespread establishment of vocational schools. Technical education directors and examination boards for technical subjects were also proposed.

Question19: What options were given to students in technical education according to the 1959 commission?

Answer: Students were allowed to choose between general and technical education after completing general education up to the eighth class. The curriculum included professional courses in various fields, such as radio repairing, tool marking, pipe fitting, watch repairing, motor mechanics, furniture works, pottery, paper manufacturing, printing technology, and motor body making.

20.Question: What critical analysis was presented regarding the National Education Commission's recommendations in 1959?

Answer: The critical analysis highlighted that while the recommendations addressed various educational needs and helped harmonize the education system with national objectives and modern trends, there were some concerns. These included the neglect of Islamic objectives, the resemblance to the British colonial system, the limited access to public schools, the lack of administrative revolution, and the need for a solid proposal to promote Muslim identity.

OBJECTIVE PART

LESSON:35

1.Who is credited with extensive work in formulating the National Education Policy 1970?

a) Noor Khan

b) National Unity

- c) The Teacher
- d) The Government

2. According to the policy, what role should education play?

- a) Economic development
- b) National unity and Islamic values
- c) Scientific and technical progress
- d) Decentralization of powers

3. What is the recommended target for the number of students to be educated in the plan of 1970?

- a) 198,000
- b) 430,000
- c) 138,000
- d) 150,000

4. What is one of the objectives for reorganizing the curriculum?

- a) Encouraging adult education
- b) Including scientific and technical education
- c) Reforming the examination system
- d) Training teachers

5. Which language is recommended to be made the medium of instruction?

- a) English
- b) Urdu
- c) National language
- d) Regional language

6. What is the purpose of establishing Scientific Research Centers in the country?

- a) Training teachers
- b) Promoting university education
- c) Encouraging adult education
- d) Advancing scientific research

7.What is the primary goal of the University Grants Commission?

- a) Holding communications with all universities
- b) Training teachers during services
- c) Determining the financial needs of universities
- d) Promoting scientific and professional education

8.According to the policy, what should be the focus of secondary education?

- a) Reorganizing the curriculum
- b) Opening new colleges for science education
- c) Encouraging adult education
- d) Training teachers

9.Which level of education did the policy aim to make common up to class eight by 1980?

- a) Secondary education
- b) Higher education
- c) Adult education
- d) Primary education

10.What is one of the proposed measures for improving higher education?

- a) Opening training centers in industries
- b) Decentralizing educational administrative control
- c) Establishing new universities

d) Establishing the University Grants Commission

11. According to the policy, what is the role of the teacher in improving education standards?

a) Decentralizing educational administrative control

b) Training teachers during services

c) Including scientific and technical education in the curriculum

d) Reorganizing the curriculum

12. What has been recommended to measure the ability of students instead of the existing examination system?

a) Opening training centers in industries

b) Decentralizing educational administrative control

c) Reorganizing the curriculum

d) Reforming and restructuring the examination system

13. What is one of the objectives for the decentralization of powers for educational administrative control?

a) Fulfilling the economic needs of the country

b) Improving higher education

c) Getting financial independence and educational freedom

d) Encouraging adult education

14. What has been stressed to be reorganized in order to improve higher education?

a) Training centers in industries

b) Curriculum Research Committee centers

c) Secondary schools

d) Adult education

15.What has been recommended to be included in the curriculum as an optional subject?

- a) National unity and Islamic values
- b) Scientific and technical education
- c) Training of teachers
- d) University Grant Commission

16.According to the policy, what should be the focus of adult education?

- a) Reorganizing the curriculum
- b) Establishing Scientific Research Centers
- c) Opening new colleges for science education
- d) Setting up an Education Corps

17.What is one of the proposed duties of the University Grants Commission?

- a) Encouraging adult education
- b) Promoting scientific and professional education
- c) Reviewing the development plans of universities
- d) Opening training centers in industries

18.According to the policy, what should be the medium of instruction in education?

- a) English
- b) Urdu
- c) Regional language
- d) National language

19.What is the purpose of opening new universities according to the policy?

- a) Fulfilling the economic needs of the country
- b) Reorganizing the curriculum
- c) Advancing scientific research
- d) Meeting the increased number of students in secondary schools

20.What is the recommended target for the number of teachers to be provided training?

- a) 138,000
- b) 150,000
- c) 198,000
- d) 430,000

CODE: EDU101

SUBJECTIVE PART

LESSON:35

1.Who is often referred to as "The Noor Khan Report"?

Answer: The National Education Policy 1970 - 1 is often referred to as "The Noor Khan Report".

2.What is the guiding principle regarding the role of education in the National Education Policy 1970 - 1?

Answer: The guiding principle is that education should play a central role in sustaining Islamic values and national unity.

3.What aspect of education is emphasized to fulfill the economic needs of the country in the National Education Policy 1970 - 1?

Answer: Scientific and technical education is emphasized to fulfill the economic needs of the country.

4. According to the National Education Policy 1970 - 1, who plays a decisive role in improving the standards of education?

Answer: The teacher plays a decisive role in improving the standards of education.

5. What is the recommended approach for educational administrative control in the National Education Policy 1970 - 1?

Answer: The policy recommends decentralization of powers for educational administrative control to achieve financial independence and educational freedom.

6. What is the basic principle of the government policy regarding primary education in the National Education Policy 1970 - 2?

Answer: The basic principle is to make primary education common up to class five by 1980 and then raise it to the level of class eight.

7. What is the target for education in the plan of 1970 mentioned in the National Education Policy 1970 - 2?

Answer: The target is to provide education to four hundred thirty thousand (430,000) students.

8. What is the emphasis in higher education according to the National Education Policy 1970 - 2?

Answer: The curriculum is stressed to be reorganized to improve higher education, and new colleges for science education are recommended.

9. In the National Education Policy 1970 - 2, what is the focus of adult education and what recommendation is made?

Answer: Adult education is emphasized, and the setting up of an Education Corps is recommended.

10. What is the key recommendation regarding the reorganization of the curriculum in the National Education Policy 1970 - 3?

Answer: The recommendation is to set up Curriculum Research Committee centers at the provincial level and include scientific and technical education at every stage.

11. Why is the existing examination system considered unsatisfactory in the National Education Policy 1970 - 3?

Answer: The existing examination system is considered unsatisfactory because it does not measure the ability of students.

12. What is the proposed measure for the training of teachers in the National Education Policy 1970 - 4?

Answer: The proposal is to provide training to one hundred and thirty-eight thousand (138,000) teachers and train one hundred and fifty thousand (150,000) teachers during services.

13. What recommendation is made regarding the medium of instruction in the National Education Policy 1970 - 4?

Answer: A commission is recommended to be set up to make the national language the medium of instruction, and textbooks should be published in Urdu language.

14.What measures are proposed for scientific and professional education in the National Education Policy 1970 - 5?

Answer: The measures include setting up scientific research centers in the country and opening training centers in industries for professional education.

15.What is the purpose of establishing a University Grants Commission in the National Education Policy 1970 - 5?

Answer: The purpose is to hold communications with all universities, determine the financial needs of universities and distribute grants, review the development plans of universities, and plan to promote university education.

1.What were the objectives of education according to the National Education Policy 1972-1980?

- a) To promote foreign ideologies
- b) To establish cultural diversity
- c) To preserve and promote the ideology of Pakistan
- d) To eliminate social changes and technical advancements

2.What was one of the objectives of the National Education Policy 1972-1980?

- a) To promote inequality among students
- b) To create a sense of dignity of labor
- c) To discourage qualities of leadership
- d) To eliminate technical education

3.When was education made compulsory at the primary level according to the policy?

a) October 1972

b) October 1974

c) October 1980

d) October 1970

4.What was recommended to upgrade to polytechnic colleges?

a) Primary schools

b) Secondary schools

c) University colleges

d) Polytechnic institutions

5.How many years of practical training were recommended for students after passing a three-year diploma course?

a) 1 year

b) 2 years

c) 3 years

d) 4 years

6.Which subjects were recommended to be introduced in technical schools?

a) Literature and history

b) Industrial arts, weaving, tannery, woodwork, masonry, glass making

c) Mathematics and physics

d) Biology and chemistry

7.What was the status of private institutions after October 1, 1972?

a) They were nationalized

b) They were closed down

c) They were financially compensated

d) They were given autonomy

8.What did the policy recommend for the pay and allowances of the servants of nationalized institutions?

a) No compensation

b) Reduced pay and allowances

c) Increased pay and allowances

d) Equal pay and allowances as government institutions

9.What did the policy propose to establish for the training of teachers?

a) Refresher courses

b) Training abroad

c) School Service Academy

d) All of the above

10.How many teachers were estimated to be trained by existing institutions by 1980?

a) 60,000

b) 104,000

c) 160,000

d) 198,000

11.What were the recommended facilities for students in the policy?

a) Free education up to matric level

b) Scholarship opportunities

c) Traveling facilities

d) All of the above

12.How many universities were there in the country in 1972?

a) 1

b) 3

c) 5

d) 7

13. Which institution was opened in Baluchistan as part of the policy?

a) Jamia Islamia, Bahawalpur

b) Agriculture College Tando Jam

c) NED College Karachi

d) Engineering College of Jamshoro

14. What was the aim of the Centers of Excellence established in universities?

a) To provide chance and facility of research to able and intelligent students

b) To produce experts in various fields

c) To provide advanced courses

d) To promote cultural diversity

15. What was the purpose of the University Grants Commission?

a) To coordinate universities in research work

b) To plan educational projects

c) To distribute grants to universities

d) All of the above

16. What subject was made compulsory up to matric level?

a) Mathematics

b) English

c) Islamiyat

d) Science

17.What was the reason for setting up new boards according to the policy?

- a) To make the examination system more challenging
- b) To make the examination system easier and effective**
- c) To increase government control over education
- d) To reduce the number of students appearing for exams

- a) To eliminate student representation in higher learning institutions
- b) To restore the autonomous position of universities**
- c) To increase government interference in university affairs
- d) To reduce the number of universities

19.What was the purpose of the National Book Foundation?

- a) To provide scholarships to students
- b) To supply cheap and quality books**
- c) To establish research centers
- d) To promote literacy

20.What system of examination was introduced in educational institutions?

- a) Annual examination system
- b) Semester system**
- c) Continuous assessment system
- d) Grading system

CODE: EDU101

SUBJECTIVE PART

LESSON:36

1.What were the objectives of education during the National Education Policy 1972-1980?

The objectives of education were to preserve and promote the ideology of Pakistan, establish national unity by promoting social and cultural unity through education, prepare individuals with awareness of technical and social changes and a sense of betterment, promote qualities of leadership among students, and create a sense of dignity of labor.

2.What was the policy regarding free and compulsory education during the National Education Policy 1972-1980?

Education was made compulsory at the primary level, and it was announced that education up to the middle level would be made free in October 1972. In October 1974, it was further declared that education would be free up to the matriculation level.

3.What recommendations were made regarding technical education during the National Education Policy 1972-1980?

It was recommended to upgrade polytechnic institutions to polytechnic colleges. Students would receive two years of practical training after completing a three-year diploma course. Subjects like Industrial Arts, Weaving, Tannery, Woodwork, Masonry, and Glass making were to be introduced in technical schools. Diploma holders from polytechnics would be allowed to pursue a BTech degree after completing a one-year course.

4.What happened to private institutions under the National Education Policy 1972-1980?

All private institutions were nationalized on October 1, 1972, without providing any monetary compensation to the owners. The servants of these institutions were given the same pay and allowances as those in government institutions.

5.What measures were taken for the training and facilities of teachers during the National Education Policy 1972-1980?

Refresher courses and training abroad were to be arranged for teachers. A School Service Academy was proposed to be established. The existing institutions for teacher training were expected to train an additional 104,000 teachers by 1980. Education as a subject was given proper attention, and graduates in this subject

were provided with teaching jobs. The National Education Corps included retired civil servants, military service people, and university students. Better pay scales and leave salary were recommended for teachers.

6.What facilities were provided to students under the National Education Policy 1972-1980?

Education up to the matriculation level was made free for all students. Scholarships were allotted, and students were allowed to take loans from banks to be repaid in installments after obtaining jobs. Additional facilities included travel assistance, medical check-ups, and book banks. Welfare committees were established for students, and they were allowed to elect members from among themselves.

7.What steps were taken regarding the setting up of new universities during the National Education Policy 1972-1980?

A university was opened in Baluchistan, and NED College Karachi, Agriculture College of Tando Jam (Sindh), and Engineering College of Jamshoro were granted university status. Additionally, three new medical colleges were opened in Karachi, Larkana, and Nawab Shah. Centers of Excellence were established in universities to facilitate research in various fields.

8.What was the aim of the National Professorship plan during the National Education Policy 1972-1980?

The aim of the National Professorship plan was to prevent able and intelligent professors from leaving teaching jobs due to low salaries. The plan aimed to provide them with benefits comparable to administrative posts.

9.What changes were made regarding the Secondary Boards of Education under the National Education Policy 1972-1980?

It was decided to set up new boards in addition to the existing Secondary Boards of Education to make the examination system more efficient and accessible.

10.What was the purpose of the University Grants Commission under the National Education Policy 1972-1980?

The University Grants Commission was established to coordinate research work among universities, plan educational projects, and distribute grants to universities based on research needs.

11.What was the policy regarding religious education during the National Education Policy 1972-1980?

Islamiyat (Islamic studies) was made compulsory up to the matriculation level, and it was ensured that textbooks did not contain anything contradictory to Islamic teachings.

12.What are some critical analyses of the National Education Policy 1972-1980?

Public schools were opened for the middle class instead of the elite class, many new universities were established, privately managed schools were nationalized, the National Book Foundation was established, and the semester system was introduced. Compulsory military training increased the passion for national service, adult education centers were set up to combat illiteracy, and new universities were granted university status.

- d) To eliminate the teaching of Islamiyat and Pakistan Studies.

2.According to the National Education Policy 1978, what was the aim of the educational system in Pakistan?

- a) To promote scientific and technical education.
- b) To provide basic education to all citizens.

c) To mold the character of individuals into the Islamic world.

d) To restrict education to the Muslim community.

3.What was the target number of primary schools to be opened by 1992, as per the National Education Policy 1978?

a) 13,000

b) 5,000

c) 1,000

d) 500

4.primary education, what other type of education was planned to be provided through Masjid schools?

a) Technical education

b) Higher education

c) Religious education

d) Professional education

5.What was the aim of opening workshop schools as part of the National Education Policy 1978?

a) To teach children different domestic handicrafts and skills.

b) To focus on physical education and sports.

c) To provide vocational training to adults.

d) To establish research centers at the university level.

6.How many middle schools were planned to be upgraded to secondary schools as part of the National Education Policy 1978?

a) 1,000

b) 200

c) 500

d) 100

7. According to the National Education Policy 1978, what was the objective of promoting science education at the secondary and higher secondary stages?

a) To create a love and affinity for Pakistan.

b) To prepare citizens well-equipped with the Ideology of Pakistan.

c) To provide basic education without discrimination of religion.

d) To increase the number of students in universities.

8. What measures were proposed to encourage research at the university level?

a) Providing new buildings and necessary equipment.

b) Increasing the number of teachers.

c) Reducing the expenditures of universities.

d) Establishing new universities.

9. Which subjects were made compulsory at the intermediate level according to the National Education Policy 1978?

a) Mathematics and Physics

b) English and Urdu

c) Islamiat and Pakistan Studies

d) Science and Technology

10. Why was the teaching of Arabic considered necessary according to the National Education Policy 1978?

a) To promote cultural heritage.

b) To attract foreign students.

c) To improve language skills.

d) To comply with international standards.

11. How many centers for adult education were proposed to be opened according to the National Education Policy 1978?

- a) 1,000
- b) 5,000
- c) 10,000
- d) 13,000

12. Which organization was expected to provide necessary equipment for adult education centers?

- a) UNESCO
- b) World Bank
- c) UNICEF
- d) World Health Organization

13. What was the target literacy rate expected to be achieved by 1992 according to the National Education Policy 1978?

- a) 35%
- b) 50%
- c) 75%
- d) 100%

14. According to Ibrahim Lincoln, what is the impact of educating a woman?

- a) It benefits the entire family.
- b) It benefits the individual only.
- c) It benefits the community at large.
- d) It has no significant impact.

15. How many mohalla schools were opened to educate girls as part of the National Education Policy 1978?

- a) 100
- b) 500
- c) 1,000
- d) 5,000

16. What was the proposed increase in the number of girls getting admission to educational institutes according to the National Education Policy 1978?

- a) 5%
- b) 10%
- c) 20%
- d) 50%

17. What was the recommendation in the National Education Policy 1978 regarding postgraduate classes for women?

- a) To reduce the number of postgraduate classes.
- b) To increase the number of postgraduate classes.
- c) To make postgraduate classes compulsory for women.
- d) No recommendation was made regarding postgraduate classes.

18. Who was proposed to be part of the National Education Council at the higher stage?

- a) University professors only.
- b) Ministry of Education officials only.
- c) A committee consisting of nine members.
- d) The President of Pakistan.

19.What measures were proposed in the National Education Policy 1978 to make disabled individuals useful members of society?

a) Arranging suitable skills training for disabled individuals.

b) Providing financial support to disabled individuals.

c) Establishing special schools for disabled individuals.

d) Offering free healthcare to disabled individuals.

20.What was recommended in the National Education Policy 1978 regarding technical education?

a) The establishment of a National Technical Teacher Training College.

b) The closure of technical schools.

c) The reduction of technical courses.

d) The promotion of arts and humanities education.

CODE: EDU101

SUBJECTIVE PART

LESSON:37

1.What are the objectives of education according to the National Education Policy 1978?

Answer: The objectives of education according to the National Education Policy 1978 include creating love and affinity for Pakistan, instilling a sense of belonging to the Islamic world, preparing citizens with the Ideology of Pakistan, building character based on Quran and Hadith, providing equal educational opportunities without discrimination, promoting individual abilities, and offering basic education to all citizens regardless of caste and sect.

1.According to the National Education Policy 1992, which of the following is NOT an aim of education?

- a) Promoting Islamic values through education
- b) Preparing educated individuals for societal changes
- c) Reorganizing the educational system on modern lines
- d) Focusing on rote learning instead of critical thinking

2.What type of education is emphasized in the National Education Policy 1992?

- a) Religious education
- b) Vocational education
- c) Liberal arts education
- d) Practical education

3.According to the policy, what should be the status of primary education?

- a) Optional and paid
- b) Compulsory and paid
- c) Compulsory and free
- d) Optional and free

4.How many teachers should be present in a primary school, according to the National Education Policy 1992?

- a) Two
- b) Three
- c) Four
- d) Five

5.What is the desired duration of the syllabus from class 1 to high school education?

- a) 10 years
- b) 12 years
- c) 14 years
- d) 16 years

6.What is the suggested approach for higher secondary education?

- a) Delegating it to colleges
- b) Delegating it to universities
- c) Delegating it to school section
- d) Delegating it to professional institutions

7.According to the policy, what should be established separately in high schools for science subjects?

- a) Libraries
- b) Laboratories
- c) Auditoriums
- d) Sports facilities

8.How many books should be prescribed for high-level stage education?

- a) One
- b) Two

c) Three

d) Four

9.What is the recommended method to strengthen the relationship between Pakistani universities and foreign universities?

a) Providing special funds

b) Opening new universities

c) Setting up a National Council

d) Cooperating with local industries

10.What is the purpose of the National Council of Academic Awards and Accreditation?

a) Research funding

b) Equipment and library funding

c) Authenticating and transparent process

d) Strengthening relationships with foreign universities

11.What type of courses are recommended at the degree level?

a) Two years honors courses

b) Three years honors courses

c) Four years honors courses

d) Five years honors courses

12.How will educational technology be used to promote education?

a) By introducing vocational courses

b) By providing formal education only

c) By integrating educational equipment and information technology

d) By conducting formal and informal exams

13.Which aspect of the education system does the policy aim to check?

- a) Curriculum development
- b) Teacher recruitment
- c) Examination malpractices
- d) Educational infrastructure

14.What subject will be introduced in rural colleges and universities?

- a) Urban Development
- b) Rural Uplift
- c) Agriculture
- d) Technical Skills

15.What will be the role of the National Testing Service?

- a) Conducting professional institution admission tests
- b) Setting up rural colleges
- c) Checking examination malpractices
- d) Coordinating foreign experts' cooperation

16.Since when has the National Education Policy been implemented for admission to medical and engineering colleges and universities?

- a) 1992
- b) 2003
- c) 2010
- d) 2021

17.According to the policy, what will be the medium of instruction in institutions?

- a) Provincial languages

b) National language

c) English

d) Both provincial and national languages

18.What is the suggested approach for dealing with privately managed primary schools?

a) Encouraging their businesslike attitude

b) Framing strict rules to check their businesslike attitude

c) Establishing an education foundation

d) Allowing them to adopt provincial or national languages as mediums of instruction

19.What is the recommended approach to the relationship between local industries and universities?

a) Establishing research laboratories

b) Appointing professors as industry advisors

c) Creating a committee with professors and investors from different industries

d) Setting up vocational courses in universities

20.What is the purpose of setting up twenty new universities in the private sector?

a) Strengthening the relationship with foreign universities

b) Providing special funds for research work

c) Improving the cooperation between industries and universities

d) Expanding the higher education sector

2.What were the proposed changes for primary education according to the National Education Policy 1992?

Answer: The proposed changes for primary education according to the National Education Policy 1992 were:

Making primary education compulsory and free for all.

Ensuring 100% admissions of children in primary schools within 10 years.

Having at least two rooms and five teachers in each primary school.

Gradually appointing women teachers to replace male teachers.

Converting primary education into basic education over time.

Encouraging privately managed primary schools while implementing strict rules to prevent a business-like attitude.

Establishing an education foundation at provincial and federal levels to promote education in privately managed institutions.

Allowing provinces to choose the medium of instruction as either the provincial or national language or English.

3.What were the proposed changes for secondary education according to the National Education Policy 1992?

Answer: The proposed changes for secondary education according to the National Education Policy 1992 were:

Establishing two types of institutions at the school level: high schools for general education and high schools for professional education.

Designing a twelve-year duration syllabus from class 1 to high school.

Delegating higher secondary education to the school section instead of colleges.

Establishing separate laboratories for science subjects in high schools.

Prescribing more than one book at the high level stage, allowing schools to choose among them.

4.What were the proposed changes for higher education according to the National Education Policy 1992?

Answer: The proposed changes for higher education according to the National Education Policy 1992 were:

Providing special funds for departments engaged in research work.

Allocating substantial funds to colleges and universities to equip research laboratories and libraries.

Opening twenty new private sector universities in the next ten years.

Establishing a National Council of Academic Awards and Accreditation to ensure authenticity and transparency.

Strengthening the cooperation and relationship between Pakistani universities and foreign universities.

Providing a research allowance to professors supervising and guiding students for PhD and MPhil.

Establishing a committee that includes professors and investors from different industries to strengthen the relationship between local industries and universities.

5.What changes were proposed for the education system according to the National Education Policy 1992?

Answer: The National Education Policy 1992 proposed the following changes for the education system:

Implementing revolutionary proposals to curb malpractices in the examination branch, examination system, and examination centers.

What was the focus of education for rural development according to the National Education Policy 1992?

Answer: According to the National Education Policy 1992, the focus of education for rural development was to provide the same facilities in backward and rural areas as enjoyed by urban areas. It proposed introducing a subject called "Education for Rural Uplift" in rural colleges and universities.

6.What was the purpose of the National Testing Service according to the National Education Policy 1992?

Answer: The purpose of the National Testing Service, as proposed in the National Education Policy 1992, was to hold tests for admission into professional institutions. It aimed to prepare different trials to prevent malpractices by Intermediate Boards and involve the cooperation of local and foreign experts. This policy has been in effect since 2003 for admission to medical and engineering colleges and universities.

CODE: EDU101

OBJECTIVE PART

LESSON:39,40

1.What is one of the objectives of the National Education Policy 1998?

a) Promote universal elementary education

- b) Eliminate gender disparities in higher education
- c) Increase the education budget to 5% of GDP
- d) Introduce vocational training in primary schools

2. According to the National Education Policy 1998, what should be an integral part of the curriculum at all levels?

- a) Computer education
- b) Sports and physical education
- c) Quranic, Islamic, and spiritual education
- d) Art and music education

3. What is the aim of raising the standard of technical education according to the National Education Policy 1998?

- a) Increase employment opportunities for skilled individuals
- b) Improve the quality of research in technical fields
- c) Provide equal education opportunities for all students
- d) Establish more technical and professional institutions

4. What is one of the objectives of the National Education Policy 1998 regarding teaching and research?

- a) Ensure international standard education
- b) Provide free books and notebooks to poor students
- c) Promote information technology in schools
- d) Increase the number of trained teachers

5. According to the National Education Policy 1998, at which level should computer education be introduced?

- a) Elementary level
- b) Secondary level

- c) Higher education level
- d) Technical and professional institutions

6.What is one of the measures proposed in the National Education Policy 1998 to improve elementary education?

- a) Provide free textbooks to all students
- b) Introduce project-based learning in schools
- c) Ensure employment of teachers based on merit
- d) Establish Centers for Advanced Studies and Research

7.According to the National Education Policy 1998, what subjects should be included in the elementary curriculum?

- a) Environmental studies and computer literacy
- b) Quranic studies and moral values
- c) Art and music education
- d) Physical education and population planning

8.What is one of the objectives of the National Education Policy 1998 regarding secondary education?

- a) Open a model high school in every district
- b) Introduce compulsory subjects for all students
- c) Increase the education budget to 5% of GNP
- d) Establish more technical and professional institutions

9.According to the National Education Policy 1998, what measure will be taken for the recruitment of teachers?

- a) Introduction of an Education Service Commission
- b) Issuance of education cards for needy students
- c) Implementation of honors programs at BA/BSc level

d) Affiliation of degree colleges with universities

10. What is one of the objectives of the National Education Policy 1998 regarding higher education?

a) Increase the number of colleges with good reputation

b) Ensure admission on a merit basis using NTS test

c) Establish Centers for Advanced Studies and Research

d) Allow colleges to have their own syllabus

11. What is one of the proposed measures in the National Education Policy 1998 to promote gender equality in education?

a) Revision of textbooks and school programs

b) Introduction of honors programs at BA/BSc level

c) Establishment of Centers for Advanced Studies and Research

d) Affiliation of degree colleges with universities

12. According to the Constitution of the Islamic Republic of Pakistan, what is the state's responsibility regarding education?

a) Ensure free and compulsory secondary education

b) Promote gender equality in education

c) Remove illiteracy and provide free primary education

d) Improve the quality of technical and vocational education

13. Which legislative list may include curriculum, syllabus, and policy related to education?

a) Exclusive Legislative List

b) Concurrent Legislative List

c) Federal Legislative List

d) Residual Legislative List

14. According to the Millennium Development Goals, what is one of the targets for education?

- a) Ensuring access to and completion of primary education
- b) Eliminating gender disparities in higher education
- c) Increasing the education budget to 5% of GDP
- d) Promoting information technology in schools

15. How does Pakistan rank on the Human Development Index (HDI) in terms of education among the listed countries?

- a) Highest ranking in education
- b) Second highest ranking in education
- c) Lowest ranking in education
- d) Second lowest ranking in education

16. According to the EFA Global Monitoring Report 2008, what percentage of GDP was allocated to education in Pakistan in 2005-06?

- a) 2.21%
- b) 2.44%
- c) 3.8%
- d) 7.5%

17. What is one of the issues mentioned in the Problems and Issues in Education?

- a) Inequality of rights between men and women
- b) Lack of gender awareness in education
- c) Insufficient budget allocation for education
- d) Lack of technical and professional institutions

18.Which of the following stages is not part of the key stages of Education for All?

- a) United Nations Convention on the Elimination of All Forms of Discrimination against Women
- b) World Declaration on Education for All
- c) Convention against Discrimination in Education
- d) Plan for Action of the World Program for Human Rights Education

19.What does the Convention against Discrimination in Education aim to eliminate?

- a) Discrimination based on gender
- b) Discrimination based on race
- c) Discrimination based on economic condition
- d) Discrimination based on language

20.According to the United Nations Convention on the Elimination of All Forms of Discrimination against Women, where should equality in education be ensured?

- a) Primary education only
- b) Technical and professional education only
- c) All levels of education
- d) Higher education only

CODE: EDU101

SUBJECTIVE PART

LESSON:39,40

1.What are the objectives of the National Education Policy 1998?

Answer: The objectives include promoting universal elementary education, incorporating Quranic, Islamic, and spiritual education, raising the standard of

technical education, and improving teaching and research to meet international standards.

2.What is the importance of computer education according to the National Education Policy 1998?

Answer: The policy emphasizes the promotion of computer education at the middle and matric levels, and the availability of computer facilities in all schools for instructional purposes.

3.How does the National Education Policy 1998 aim to improve technical and . education?

Answer: The policy aims to establish more technical and professional institutions to provide trained manpower for the country's industrial progress.

4.What is the current educational budget as a percentage of the GNP according to the National Education Policy 1998?

Answer: The educational budget is currently 2% of the GNP of the country.

5.How does the National Education Policy 1998 address primary education?

Answer: The policy focuses on utilizing existing facilities and providing new ones, using media for promoting elementary education, ensuring equal chances of education for all, and including subjects like cleanliness, computer usage, population planning, moral values, and basic health in the curriculum.

6.What measures will be taken to improve the terms and conditions of service for teachers according to the National Education Policy 1998?

Answer: The policy aims to make the terms and conditions of service for teachers better, ensure employment based on merit, and appoint teachers near their residences whenever possible.

7.How does the National Education Policy 1998 suggest promoting equal opportunities for education?

Answer: The policy aims to uproot all types of social injustice and work towards providing equal chances of education for all, particularly by promoting elementary education through formal and informal resources.

8.What is the objective of opening a model high school or higher secondary school in every district according to the National Education Policy 1998?

Answer: The objective is to provide O and A level education in every district.

9.What will be the focus of secondary education reform according to the National Education Policy 1998?

Answer: The policy emphasizes the reform and innovation of the curriculum in secondary and higher secondary schools, introduction of project-based teaching methods, and conducting examinations on the same date and time.

10.How will the recruitment of teachers be handled according to the National Education Policy 1998?

Answer: The policy states that an Education Service Commission will be established for the recruitment of teachers.

11.What is the aim of admission in higher education institutes based on merit according to the National Education Policy 1998?

Answer: The aim is to ensure equal rights for all students and admission based on merit, using an NTS test for selection.

12.How does the National Education Policy 1998 address the expansion of professional institutions?

Answer: The policy aims to increase the quantity and quality of professional institutions.

13.What flexibility will be given to colleges according to the National Education Policy 1998?

Answer: Colleges with a good reputation will be allowed to have their own syllabus.

14.How will higher education institutes be affiliated according to the National Education Policy 1998?

Answer: Degree colleges will be allowed to affiliate themselves with a university of their choice.

15.How does the National Education Policy 1998 plan to improve the recruitment process for government posts?

Answer: The policy suggests renewing the recruitment policy for government posts, increasing the level of standards, and setting an honors degree as an educational requirement at a suitable time.

16.What is the significance of honors programs at the BA/BSc level according to the National Education Policy 1998?

Answer: Honors programs will be introduced, and holders of such degrees will be preferred during university admissions.

17.What is the constitutional obligation regarding education in Pakistan?

Answer: According to Article 37-b of the 1973 Constitution of Pakistan, the state is obligated to remove illiteracy and provide free and compulsory secondary education within the minimum possible period.

18.What are the Millennium Development Goals related to education?

Answer: The Millennium Development Goals include ensuring access to and completing free and compulsory primary education of good quality for all children, eliminating gender disparities in primary and secondary education, and achieving gender equality in education.

19.How does Pakistan compare with other countries in the region in terms of the Human Development Index related to education?

Answer: Pakistan ranks lower than several countries in the region, including Iran, Sri Lanka, Maldives, India, Bhutan, and Bangladesh, in terms of the Human Development Index related to education.

20.What is the education budget as a percentage of GDP for Pakistan compared to other South Asian countries in 2005-06?

Answer: Pakistan's education budget as a percentage of GDP was 2.21% in 2005-06, which is lower compared to Iran (4.7%), India (3.8%), Bangladesh (2.4%), and Maldives (7.5%).

21.What is the issue of "Education for All"?

Answer: "Education for All" focuses on ensuring equality of rights between men and women, particularly in access to education, eliminating gender disparities, and promoting social justice.

22.What are some key stages and declarations in the process of achieving Education for All?

Answer: Key stages and declarations include the Convention against Discrimination in Education (1960), United Nations Convention on the Elimination of All Forms of Discrimination against Women (1979), World Declaration on Education for All (1990), and the Dakar Framework for Action (2000).

23.How is discrimination defined in the Convention against Discrimination in Education?

Answer: Discrimination in education includes any distinction, exclusion, limitation, or preference based on various factors that nullifies or impairs equality of treatment in education.

24.What measures are recommended in the United Nations Convention on the Elimination of All Forms of Discrimination against Women to ensure gender equality in education?

Answer: The convention calls for equal rights and conditions in terms of access, curriculum, examinations, teaching staff, and school premises and equipment. It also emphasizes the elimination of gender stereotypes in education.

15.What are the objectives mentioned in the World Declaration on Education for All?

Answer: The objectives include ensuring access to and improving the quality of education for girls and women, eliminating gender disparities in education,

promoting gender equality, and addressing gender biases in curricula and teaching materials.

CODE: EDU101

OBJECTIVE PART

LESSON:41,42

1.According to the paragraph, what is insufficient for promoting gender equality?

- A) Monitoring of characters
- B) Elimination of stereotypes
- C) Analysis of text and illustrations
- D) Representation of men and women

2.What is the main focus for taking action in promoting gender equality?

- A) Gender-neutral text
- B) Inconsistent illustrations
- C) Characters in textbooks
- D) Grammatical gender of pronouns

3.How should characters be gendered in texts?

- A) Using pronouns and first names
- B) Indicating social identity
- C) Varying designations of male and female characters
- D) All of the above

4.In illustrations, how should characters be gendered?

- A) Using symbols to indicate gender
- B) Following cultural contexts
- C) Avoiding biases in clothing choices

D) All of the above

5.What should be ensured in all parts of the textbooks for promoting gender equality?

A) Gender balance between men and women

B) Consistency in character size and position

C) Inclusion of well-known figures

D) Avoidance of ridicule or demeaning roles

6.At the Tbilisi Conference in 1977, what objectives were proposed for environmental education?

A) Creating awareness and disseminating knowledge

B) Developing interdisciplinary views

C) Promoting sustainable growth

D) All of the above

7.What are the educational objectives of environmental education?

A) Bringing attitudinal and behavioral changes

B) Creating awareness about environmental considerations

C) Exchanging knowledge and experience

D) All of the above

8.According to the paragraph, what human rights should be mainstreamed in environmental education?

A) Right to health services and fresh air

B) Right to safe drinking water and sanitation

C) Right to food, education, shelter, and security

D) All of the above

9.What is the role of English in Pakistan according to the paragraph?

- A) National language and lingua franca
- B) Official language and gatekeeper
- C) Passport to success and upward social mobility
- D) All of the above

10.What is the key issue related to linguistic inequality in Pakistan?

- A) Medium of instruction
- B) Tracking at secondary and post-secondary level
- C) Educational practices in Pakistan
- D) All of the above

11.What is the need for promoting linguistic equality in Pakistan?

- A) Systematic situation analysis
- B) Debate and dialogue about language roles
- C) Improving the quality of English teaching
- D) All of the above

12.According to the paragraph, which language has the status of the National Language of Pakistan?

- A) Urdu
- B) English
- C) Regional languages
- D) Arabic

13.What is the main focus of the Urdu-English medium divide in Pakistan?

- A) Regional languages
- B) Official language status
- C) Linguistic and social inequality

D) Educational institutions and practices

14. Which educational system is mainly operated by the state in Pakistan?

A) Urdu-medium schools

B) English-medium schools

C) Elitist schools

D) Madrasas

15. What is the issue related to medium of instruction in Pakistan?

A) Lack of regional languages

B) Tracking at the secondary level

C) Linguistic and social inequality

D) Lack of quality teaching in English

16. What is the suggested approach for improving linguistic equality in Pakistan?

A) Increasing the status of regional languages

B) Analyzing educational practices systematically

C) Promoting Urdu as the national language

D) Implementing a uniform medium of instruction

17. What are the two tracks within English-medium schools in Pakistan?

A) Urdu and English levels

B) O/A level and Matric/Intermediate

C) Elitist and non-elitist levels

D) Arabic and English levels

18. What is the objective of integrating environment in teacher's training in Pakistan?

A) Positive change in living environment

- B) Expanding and protecting forests and natural resources
- C) Greening Pakistan and cleaning mega industries

D) All of the above

19.What are the mega issues mentioned in the paragraph related to Pakistan?

- A) Water conservation and climate change impact
- B) Surging population and food security
- C) Increase in water storage capacity and clean energy

D) All of the above

20.What is the role of responsible media in promoting environmental education?

- A) Raising environmental issues at the right time
- B) Sensitizing decision makers to plan friendly policies
- C) Research and development for environmental excellence
- D) All of the above

CODE: EDU101

SUBJECTIVE PART

LESSON:41,42

1.What is the significance of monitoring representations of men, women, boys, and girls?

Monitoring representations ensures the elimination of stereotypes and blatant sexism.

2.What should action be taken on in relation to promoting gender equality?

Action should be taken on characters that embody representations of male and female.

3.How are gendered representations of male and female in textbooks monitored?

Gendered representations of male and female in both text and illustrations must be monitored.

4.Which representations are easier to monitor, illustrations or text?

Illustrations may seem easier to monitor in terms of the number of characters, but this doesn't guarantee more balanced representations.

5.What should be analyzed carefully in the connection between text and illustrations?

The connection between text and illustrations should be analyzed for consistency and potential inconsistencies.

6.How should characters be gendered in texts?

A character's sex is indicated by the grammatical gender of pronouns, proper nouns, or common nouns.

7.What types of designations can be combined to gender characters in texts?

Various types of designations can be combined, such as pronouns, first names, surnames, family relationships, other relationships, and professions/occupations.

8.How should male and female characters be designated in texts?

The same type of designation should be used for male and female characters. For example, if "mother" is used, "father" should also be used.

9.What should be considered when designating male and female characters in texts?

Vary the designation of male and female characters and place them in a variety of spheres and social functions.

10.What should be the starting point when both male and female characters appear in the same text?

Do not automatically start with the male character.

11.How should masculine and feminine forms be used in texts?

Use the masculine and feminine forms in the case of masculine plural nouns, such as "sportsmen" and "sportswomen."

12.What form should be used for titles and functions in texts?

Use a neutral form if one exists, such as "chairperson."

13.What should be avoided when selecting words for characters in texts?

Pay attention to the meanings of the words employed and avoid words that ridicule, demean, or imprison a character in a role.

14.How should characters be gendered in illustrations?

Gendering characters in illustrations is complex and requires careful thought, considering cultural contexts and the balance between tradition and modernity.

15.What must be ensured between men, women, girls, and boys in both text and illustrations?

Purity must be ensured in the representations of gender in both text and illustrations.

16. Where should gender equality be ensured in textbooks?

Gender equality should be ensured in all parts of the textbooks, including lessons, passages of text, exercises, and the casting of "hero" characters and minor figures.

17. What objectives were proposed at the Tbilisi Conference on Environmental Education?

The objectives proposed were to create environmental awareness, disseminate knowledge and skills, initiate new behavioral approaches towards the environment, develop an interdisciplinary view of the environment, promote environmentally sound development, and foster national and international cooperation.

18. What are the educational objectives of environmental education?

The educational objectives include bringing about positive attitudinal and behavioral changes in teachers and students, creating awareness about environmental considerations, disseminating information and exchanging knowledge, and developing critical thinking skills.

19. What are the main issues addressed in Lesson 42 on environmental education?

The main issues include mainstreaming human rights, integrating environment in teacher's training, and addressing mega issues like greening Pakistan, cleaning Pakistan, and strategic planning for long-term challenges.

20.What role does English play in Pakistan's educational context?

English is the official language and acts as a gatekeeper for entry into prestigious higher education institutions and high-salaried jobs. It is also the language of the military and bureaucracy.

21.What truisms exist regarding the importance of English in Pakistan?

English is seen as necessary for individual and national development, a passport to success and upward social mobility, and a key to national progress.

22.What are the three parallel systems of education in Pakistan?

The three parallel systems of education in Pakistan are Urdu-medium schools (mainly state-operated), English-medium schools (mainly private), and Madrasas (mainly Arabic).

23.What issues are related to linguistic and social inequality in Pakistan's educational institutions?

The issues include the medium of instruction, tracking at secondary and post-secondary levels, and the need for systematic analysis, debate, and dialogue about the role and status of Urdu, English, and regional languages.

24.What is the role and status of Urdu and English in Pakistan?

Urdu is the national language and lingua franca, while English is the official language and associated with prestigious opportunities, such as higher education and high-salaried jobs.

25.What is needed to improve the teaching and learning of English in schools and higher education institutions in Pakistan?

Systematic situation analysis, debate, and dialogue about language roles and status, as well as efforts to improve the quality of teaching and learning of English, are required.

CODE: EDU101

SUBJECTIVE PART

LESSON:43,44

1.What is inclusive education?

Inclusive education is when every child is welcomed and valued regardless of ability or disability.

2.What does inclusive education mean?

Inclusive education means that the doors to school, classroom, and school activities are open to every child, with a focus on giving them the help they need to learn.

3.What is special education?

Special education refers to individualized supports that give children with disabilities the extra help they need to learn from the general curriculum.

4.What are some examples of inclusive education practices?

Examples of inclusive education practices include physical therapy, curriculum adaptation, communication boards, behavior plans, and environmental accommodations.

5.Why is access to the general curriculum important?

All students, including those in segregated classes, must have access to the general curriculum for their age and grade level.

6.What is the difference between accommodation and modification?

Accommodations are changes in teaching methods or the learning environment that help students learn the same curricular content, while modifications involve changes in the content itself, such as assignments or tests.

7.What are accommodations in education?

Accommodations in education refer to changes in teaching methods, such as when and how you teach, who teaches, how the student can respond, and the materials used.

8.How can accommodations be translated in a practical scenario?

In the given scenario, B is two grades apart from A, who is in the 4th grade. Therefore, B would be in the 2nd grade.

9.What are some examples of room accommodations?

Examples of room accommodations include special chairs and cushions, different lighting, proximity to the blackboard or teacher, visual cues, and visual organization of the room and supplies.

10.How can teachers accommodate students?

Teachers can accommodate students by varying teaching methods, offering alternative activities, giving instructions step by step, dividing the class, setting up lessons, and changing learning goals.

11.Is "pull out" the best approach for teaching students with disabilities?

The effectiveness of the "pull out" approach depends on various factors. It's important to consider whether the skill can be taught in the general classroom and how to help the student catch up on missed classroom activities.

12.What are some considerations when using educational assistants?

Considerations include ensuring that having an assistant doesn't make the student overly dependent, hinder communication and choices, or limit interaction with peers. The student should also have some opportunities to be alone with peers.

13.How can accommodations positively impact students' behavior and learning?

Accommodations can lead to positive changes such as improved behavior, increased participation, better attention span, and enhanced social interactions.

14.How can disability lead to poverty?

Disability can lead to poverty due to factors such as loss of income, additional costs for disability management, exclusion from services and community activities, reduced work opportunities, low expectations regarding learning capacity, and lack of support and access to essential services.

15.How can poverty lead to disability?

Poverty can increase the risk of disability through factors like lack of basic needs fulfillment, poor nutrition and healthcare, illiteracy, hazardous working conditions, unemployment, and limited access to preventive measures.

16.Why is inclusive education important?

Inclusive education is crucial for achieving the goal of 100% enrollment and addressing the educational needs of children with disabilities. Special schools have failed to provide natural growth due to social segregation, making inclusive education a more cost-effective solution.

17.What are the barriers to inclusive education in Pakistan?

The two dominant barriers to inclusive education in Pakistan are the attitudes of ordinary school teachers and special education teachers. Ordinary teachers may feel unsupported and believe that including special needs children will lower educational standards. Students and parents may also resist the shift.

18.Why do some ordinary school teachers resist inclusive education?

Some ordinary school teachers may resist inclusive education due to perceived lack of competence and support for the shift, concerns about deteriorating educational quality, and criticism of low standards in public schools.

19. How can inclusive education be seen as a school improvement plan?

Inclusive education, when implemented effectively, can be viewed as a school improvement plan by enhancing diversity, promoting inclusivity, and fostering a supportive learning environment for all students.

20. What are the challenges in implementing inclusive education?

Challenges in implementing inclusive education include providing adequate support and training for teachers, addressing attitudinal barriers, ensuring appropriate resources and accommodations, and overcoming resistance from various stakeholders.

21. How can inclusive education benefit students?

Inclusive education benefits students by promoting a sense of belonging, fostering positive social interactions, improving learning outcomes for all students, and preparing them for a diverse and inclusive society.

22. What is the cost difference between special education and inclusive education?

Special education costs approximately Rs. 30,000 per child per year, while inclusive education in an ordinary school costs around Rs. 2500 per child per year, making it a more economical option.

23. What are the goals of inclusive education?

The goals of inclusive education include providing equal opportunities for all students, promoting diversity and inclusion, ensuring access to the general curriculum, and fostering a supportive and inclusive learning environment.

24.How can inclusive education contribute to societal development?

Inclusive education contributes to societal development by empowering individuals with disabilities, promoting social cohesion and empathy, reducing discrimination, and preparing a more inclusive workforce for the future.

25.How can inclusive education be supported and encouraged?

Inclusive education can be supported and encouraged by providing training and professional development for teachers, implementing inclusive policies and legislation, allocating adequate resources, fostering collaboration among stakeholders, and raising awareness about the benefits of inclusive education.

CODE: EDU101

OBJECTIVE PART

LESSON:45

1.According to the attitudes of special education teachers, what kind of care do special needs children require?

- A) Clinical care
- B) Personal care
- C) Educational care
- D) Restricted care

2.What is one concern special education teachers have about inclusive education?

- A) Lack of resources

B) Limited job opportunities

- C) Increased bullying incidents
- D) Inadequate teacher training

3.What is one major challenge in the education system mentioned in the paragraph?

- A) Lack of infrastructure
- B) Insufficient funding
- C) Gender disparity
- D) Outdated curriculum

4.According to the paragraph, which gender has a higher literacy rate in Pakistan?

- A) Males
- B) Females
- C) No significant difference
- D) Data not provided

5.What are some factors contributing to low enrollment in schools?

- A) Lack of qualified teachers
- B) Limited access to transportation
- C) Irrelevant curriculum

D) All of the above

6.Which challenge in the education system relates to the static nature of the curriculum?

- A) Challenge No 2
- B) Challenge No 3
- C) Challenge No 4
- D) Challenge No 5

7.What is the objective of mainstreaming Deeni madras with modern schools?

- A) Improve curriculum quality
- B) Promote religious education
- C) Enhance teacher training

D) Facilitate integration and alignment

8.How are private sector and civil society organizations involved in education services?

- A) Financing and management
- B) Curriculum development
- C) Teacher training programs

D) All of the above

9.Which challenge in the education system addresses the issue of unemployment among educated youth?

- A) Challenge No 6
- B) Challenge No 7**
- C) Challenge No 8
- D) Challenge No 9

10.What is the primary focus of revamping science education mentioned in the paragraph?

- A) Providing science equipment
- B) Improving science laboratories**
- C) Developing mathematics curriculum
- D) Enhancing teacher training

11.What is the need for a strong management information system (MIS) in education?

- A) Accurate data analysis for policy decisions
- B) Improvement of district information system
- C) Inclusion of qualitative educational growth indicators

D) All of the above

12.What initiatives are mentioned to promote gender equality and women empowerment?

- A) Monetary incentives for female teachers
- B) Conversion of primary schools to co-education
- C) Gender-sensitive portrayal in textbooks

D) All of the above

13.Which initiative is related to the quality assurance challenge in the education system?

- A) Establishment of educational assessment system
- B) Improvement in infrastructure provision
- C) Upgrading of teacher training institutions

D) All of the above

14.What is one initiative mentioned to develop a monitoring and evaluation mechanism?

- A) Allocation of funds for program monitoring
- B) Mandatory quarterly program reviews
- C) Creation of a monitoring cell in the Ministry of Education

D) All of the above

15.What percentage of funds is allocated for education sector reforms monitoring?

- A) 1%

B) 2%

C) 3%

D) 4%

CODE: EDU101

SUBJECTIVE PART

LESSON:45

1.What are some arguments made by special education teachers regarding the inclusion of special needs children in public schools?

They argue that special needs children require a type of "clinical care" that will never be possible in a free and least restricted environment of public school.

2.What concerns do special education teachers have regarding inclusive education in Pakistan?

They fear that in case inclusive education is successfully implemented in Pakistan, they will be out of jobs.

3.What is the current literacy rate in Pakistan, and what is the gender disparity in literacy rates?

The current literacy rate in Pakistan is 51.6%, with male literacy at 63.7% and female literacy at 39.25%.

4.What are some factors contributing to low enrollment in primary schools in Pakistan?

Some major factors for low enrollment are poverty, long distance from school, poor physical infrastructure, functional problems, and lack of relevance to market demands.

5.How is the curriculum in schools described, and what is the proposed initiative to address it?

The curriculum is described as static, inert, and non-responsive to socio-economic needs. The proposed initiative is the revision of the curriculum to align it with the needs of modern times, socio-economic needs, and desired knowledge, skills, and behavior.

6.What is the objective of evolving an integrated system of national education in Pakistan?

The objective is to bring Deeni madrasas and modern schools closer in terms of curriculum and the scheme of studies.

7.What initiatives have been planned to mainstream Deeni madrasas in Pakistan?

The initiatives include introducing formal subjects such as English, Math, Social Studies, and Computer Science in all madrasas, providing grants for teacher salaries, textbooks, training, and equipment, and setting up a Madarassah Education Board to regulate curriculum and examinations.

8.What is the challenge related to unemployment among educated youth, and what initiatives are being taken to address it?

The challenge is rampant unemployment among educated youth, particularly due to a focus on general education rather than technical and vocational education. The initiatives include introducing a technical stream in the secondary school system, establishing vocational and technical education centers in major towns, involving the industry in setting up technical training institutes, and teaching science subjects in English in Urdu medium schools.

9.How is science education being revamped, and what are the areas of improvement?

Science education is being revamped through improvements in science laboratories, provision of science equipment, revision of science curricula, and professional development of science and mathematics teachers.

10.What is the need for a strong management information system in education, and what initiatives are being taken to address it?

The need for a strong management information system is to have accurate data for education indicators, analysis for policy decisions, and informed planning. Initiatives include setting up a national education management information system (NEMIS), strengthening existing education management information systems at provincial and district levels, and conducting comprehensive censuses of educational institutions.

11.How is gender equality and women's empowerment being promoted in primary schools in Pakistan?

All primary schools are being converted to co-education, and new primary schools are required to have a ratio of 60 to 40 boys and girls. There is also a promotion of 70% female teachers to 30% male teachers at the primary level.

12.What initiatives are being taken to ensure quality assurance in education?

Initiatives include improving infrastructure and human resources, providing improved curriculum and teaching-learning materials, focusing on continuous professional development of teachers, establishing an educational assessment system, strengthening and upgrading teacher training institutions, setting up examination boards in the private sector, and developing a national strategy for information communication technologies (ICTs).

13.How is the monitoring and evaluation of education programs being addressed?

A monitoring cell has been established in the Ministry of Education, and 3% of funds allocated for education sector reforms are being spent on monitoring programs in provinces. Monitoring of development programs has become mandatory, and quarterly reviews are conducted to improve program efficiency.
