- 1) IPv6 topic.**
- 2) Subnetting.**
- 3) Topologies.**
- 4) Nat concept.**
- 5) Size of IPv6.**
- 6) UDP vs TCP.**
- 7) Protocol tools.**
- 8) Crisp vs fuzzy.**
- 9) CIRD notation.**
- 10) What is OSPF?**
- 11) Feature of IPv6.**
- 12) Multiple headers.**
- 13) Multicast routing.**
- 14) Types of messages.**
- 15) Whose largest routs?**
- 16) What is networking?**
- 17) Ipv6 datagram format.**

- 18) Whose smallest routs?**
- 19) Types of address masks.**
- 20) Dotted decimal notation.**
- 21) What are dynamic routs?**
- 22) Internet protocol routings.**
- 23) Can have roots are router?**
- 24) What is static and dynamic.**
- 25) LAN bridge aur switch uses.**
- 26) Layering and TCP/IP protocols.**
- 27) Original Classes of IP addresses.**
- 28) Datagram transmission and frames.**
- 29) Factor of Network communication.**
- 30) Different b/w Destination and source?**
- 31) Classification of internet routing protocols.**
- 32) Packet loss and retransmission page 125-127**

- 33) Write the names of five Multicast Routing Protocols.
- 34) Consider the IP address: 178.200.127.5 and the corresponding subnet mask.
- 35) In ARS the protocol addresses independent of hardware address which technique use?
- 36) A company ABC have LAN network contact to gather with bridge how can send message.
