ECO403 MID TERM PAPER SHARED BY STUDENT

ON MAY 28, 2016 AT 11:01PM

today's ECO403 Midterm ppr ! :)

Q1. Suppose general price level rises in economy of Korea, what would its effect on the people of Korea. (3 marks)

Q2. The price of bread in Japan is 700 yen while the price of bread in USA is 7\$ and real exchange rate is 2.5. Calculate Nominal exchange rate. (3 marks)

Q3. A hypothetical economy describes:

$$Y = C + I + G + NX$$

$$Y = 5000$$

$$G = 1000$$

$$T = 100$$

$$C = 250 + 0.75(Y - T)$$

$$I = 1000 - 50r$$

$$R = 5$$

$$NX = 500 - 500e$$

Keeping in view this data calculate:

a) National income

b) Investment. (5 marks)

Q4. Quantity equation ka table tha jismay price find out karni thi and we have to comment on our answer too (5 Marks)

Q5. Gross domestic product is the necessary element of the economy. GDP is calculated in two terms, economists use the value of final goods or the value added concept. Explain these two concepts with example. (5 marks)

ECO403 MID TERM PAPER SHARED BY STUDENT

ON DECEMBER 29, 2015 AT 6:14PM

My Today paper of ECO 403

18 MCQs from handouts and slides

Subjective

- Define the term Money and explain why economists take money differ from everyday use? 3 marks
- Prove $Y=C+I+G$ 3 marks
- Table were given and we have to find the missing value which are. 5 marks
- ♣ Find CPI
- ♣ Inflation rate
- ♣ Cost of basket
- We have to find the inflation rate and real interest rate?
- Real GDP, money stock growth and nominal interest rate were given in a scenario of Bangladeshi economy. 5 marks
- Diagram were given of Solow growth model and we have to tell. 5 marks
- ♣ What will be the impact of increase in population growth rate (N)
- ♣ Golden rule level of capital stock.

Good luck guys.

ECO403 MID TERM PAPER SHARED BY STUDENT

Q:define solow growth model?

The Solow Growth Model is designed to show how growth in the capital stock, growth in the labor force, and advances in technology interact in an economy, and how they affect a nation's total output of goods and services.

2: $Y = C + I + G$ ko prove krna ta?

3: $C = (Y - T)$ ki equation ti.

or 2 problems solve krni ti.

23 Questions
18 MCQs
5 Subjectives.

1. Define Inflation Tax and Describe the relationship between Nominal Interest Rate and Inflation Rate.
2. Values are given and we have to compute the Equilibrium level of Output.
3. Describe PPP and why PPP doesn't hold in real world.
4. Real GDP grows 9% per year , Nominal Interest Rate 11% , Money Stock grow 14% per year. Compute the Real Interest Rate.
5. Forget one question

ECO403 MID TERM PAPER SHARED BY STUDENT

ON JANUARY 13, 2015 AT 12:50PM

eco403 paper was today
19 mcqs
6 short some of 3 marks some of 5 marks..
real exchange rate compute krna tha...
solow model ki picture describe krna tha
solow model k key points
aik aur numerical tha interest rate and income equilibrium se related

ECO403 MID TERM PAPER SHARED BY STUDENT

ON JANUARY 20, 2015 AT 11:01AM

Very tough paper tha friends....

Be careful

Q- Suppose, the price of burger in Japan (P^*) is 400 Yen, price of burger in USA (P) is \$5 and the nominal exchange rate is 240 Yen/\$. From this information, calculate the real exchange rate. What does this exchange rate show?

Q- In the following equation of motion of Solow growth model:

$$\Delta k = s f(k) - (d + n + g) k$$

What do the Δk , nk and gk show in this equation?

Q- Consider an economy described by the following equations:

$$Y = C + I + G$$

$$G = 100$$

$$T = 100$$

$$C = 125 + 0.70(Y - T)$$

$$I = 50$$

In this economy, compute the equilibrium level of output.

Q- How we can differentiate between real variables and nominal variables? Explain with the help of examples.

ECO403 MID TERM PAPER SHARED BY STUDENT

CO403 Current Midterm Papers Fall 2014 - 2015 Starting from Monday, January 12, 2015

Shared and Thanks to Irfan Khan MSCS:

My Today's Paper:

Total Questions: 27

Total MCQs of 1 Mark: 22

Total Short Subjective Question of 3 Marks:3

Total Long Subjective Question of 5 Marks:2

Q1:The following data was given

Saving rate = 0.3

Depreciation = 0.1

Output = $y = f(k) = k^{1/2}$

$\Delta k = sfk - sk$.Calculate the steady state level of capital k^* .(3 marks)

Q2 : You are an economic advisor writing a bill to index social security and federal pensions.That is your bill will adjust these benefits to offset changes in the cost of living .Will you use GDP deflator or CPI? Why?(3 marks)

Q3 : How can nation close saving gap? (1 mark) options were given

Q4: Working age population = 85000

Unemployed workers = 8000

Discouraged workers = 1000

Calculate the labour force.(3 marks)

Q5 : Calculate real interest from the given data.

Real GDP growing at 5 %

Money growing at = 14 %

Nominal interest rate growing at = 11%

Real interest = ?

ON JUNE 7, 2014 AT 12:59PM

My today's ECO 403 paper:

Total Marks:44

Total Qs: 32

Total Mcqs: 28

The subjective Qs are as follows:

1. Diff. b/w nominal exchange rate and real exchange rate (3 marks)
2. Population is growing at 3%, $L = 1000$, calculate change in L (3 marks)
3. A production function was given, per worker production function was to be found (5 marks)
4. a) diff. b/w net foreign investment and trade balance (2 marks)
b) show the relationship b/w net foreign investment and trade balance using $Y = C + I + G + NX$ (3 marks)

ECO403 MID TERM PAPER SHARED BY STUDENT

ON JUNE 11, 2014 AT 10:12AM

10 se 12 mcqs past se the baki handouts se total 28 question the short answer 2,3 number 2,5 number k define the Real variable vs Nominal variable ,
dife the $Y = f(k, L)$
1 swal tha unemployment rate nikalna tha
1 swal tha jis mein us ne infalton rate diya wa tha or reall rate b diya wa tha bs nominal rate nikalna tha.

ECO403 MID TERM PAPER SHARED BY STUDENT

on June 13, 2014 at 6:10pm

My yesterday 2014 paper

Total 28 MCQS, most of them were conceptual and came from handouts.

Subjective questions were:

- If $L = 1000$ and the population is growing at 5% Find the Labor Force (3 marks)(Page 63)
- You bought Rs 20,000 worth of stock on 01/01/2003 then you sold the stock on 12/31/2003 for Rs 25,000 and inflation is 20% in 2003 (5 marks)(Page 35)

Find the nominal capital gain in percentage? (2.5)

What will be your real capital gain? (2.5)

ECO403 MID TERM PAPER SHARED BY STUDENT

ON JUNE 15, 2014 AT 1:08PM

Mcqs were conceptual

Q1 diff btw real exchange rate and nominal exchange rate

Q2. difference btw minimum wage and labour union

Q3 there was a graph n u have to explain it

Q4 find $MPK-d=n$

ECO403 MID TERM PAPER SHARED BY STUDENT

ON DECEMBER 21, 2013 AT 4:08PM

My Today's paper of ECO 403

22 mcq's and 5 questions.

Just 5 to 6 mcq's came from past papers

Questions:

1. Write the difference between real and nominal variable with examples. (5 marks)
2. Write the effects of unemployment benefits on unemployment rate and waiting time?

1. $Y = C + I + G$

Where, $Y = 7,000$, $G = 1,000$, $T = 1,000$

$$C = 250 + 0.75(Y - T)$$

In this economy, compute public saving.

Define classical dichotomy and money neutrality

2. last wala yaad nahi aa raha... sorry

ECO403 MID TERM PAPER SHARED BY STUDENT

ON DECEMBER 22, 2013 AT 11:52AM

My paper

5 marks

1) Calculate real interest from the given data.

Real GDP growing at 5 %

Money growing at = 14 %

Nominal interest rate growing at = 11%

Real interest = ?

2) Assume your economy has following production function... $Y = F(y, L) = K^{0.4} L^{0.6}$

derive per worker production function

3 marks.

1) unemployment insurance and its benefits

2) Money & its functions

3) Expected inflation is 2% $r = 5\%$ find nominal interest rate

=====

mcqs zyada last 3 lect main sy thy

ECO403 MID TERM PAPER SHARED BY STUDENT

ON DECEMBER 24, 2013 AT 10:01AM

My today's paper

real gdp 5%

money growing at 14%

nominal gdp = 11% find real interest rate = ? 5marks

$Y = F(k, l)$ $k^{0.5} l^{0.5}$

find the productivity per labour

5marks

now for 3 marks

labor force 1000

increase in population 5%

find change in labor force

why CPI overstates the inflation?

dif real and nominal exchange rate

Please don't go for past paper in case of mcQs

all mcqs were new and conceptual but reading handouts with deep concentration clarifies paper

best of luck

ECO403 MID TERM PAPER SHARED BY STUDENT

DECEMBER 26, 2013 AT 4:58PM

my today's paper.....

question# 1:- find natural rate of un employment? (3)

question # 2:- find real exchange rate? (3)

question # 3:- differentiate between real variable and nominal variable with examples? (5)

question # 4:- three reasons why real wage are rigid? (5)

ECO403 TODAY'S PAPER 25-05-2013

Total marks 41

Total 27 Questions

Total 22 MCQs

3 questions of 3 marks each

2 Questions of 5 marks each

1-the Steady State graph was given .3 marks. ans on page55

2-inflation tax & relation b/w nominal interest rate & inflation rate. 3 marks. Ans on page32.

3-employment & labor force was given,find unemployment rate. 3 marks. Formula on page 17.

4-the growth rate of a product equals the sum of the growth rates. Give the formula of the quantity equation in growth rates and solve inflation rate. 5 marks. Ans on page 30

5-a diagram was given. What is the golden level in figure and state golden level. Don't know the ans..

ECO403 MID TERM PAPER SHARED BY STUDENT

ON MAY 25, 2013 AT 6:06PM

MSQ WERE CONCEPTUAL

Clarify what will happen to the size of both M1 and M2 in each of the following situations.

a. Ali, a millionaire, withdraws Rs.500, 000 from his money market account to buy a famous painting.

a. Bilal transfers Rs.10, 000 from his checking account to his savings account.

a. Sara takes Rs.5, 000 out of her checking account to buy IBM stock.

(Marks: 1+1+1)

Suppose that 3% of employed workers lose their jobs each month ($s=0.03$) and 27% of unemployed workers find new jobs ($f=0.27$). Find the natural rate of unemployment from this information.

Consider an economy described by the following equations:

$$Y=C+I+G$$

Where, $Y = 7,000$, $G = 1,000$, $T = 1,000$

$$C = 250 + 0.75 (Y-T)$$

In this economy, compute public saving.

How we can differentiate between real variables and nominal variables? Explain with the help of examples.

Assume an economy has the following production function:

$$Y = F(K, L) = K^{0.5}L^{0.5}$$

Find out the per-worker production function.

(Note: Write down all the steps involved)
