ERFLY

FINAL TERM MCQS

(BT101)

PREPARE BY: ASHAM

TOPIC NO # 01

1. The external factors, which control the ecosystem, are _ of internal factors. **Independent**
2. Distinct biological communities Formed in response to specific external factors in that environment. **Biomes**

TOPIC NO # 2

3. Animal use ------- energy to make organic molecules. **(Chemical energy)**
4. Plants use direct sunlight in process of **Photosynthesis.**

TOPIC NO # 3

5. What is the example of chemoautotrophs? **Microbes & muscles.**

TOPIC NO # 4

6. Termites is the example of **xylophages**
7. Primary food source is both plant and animal-based. **Omnivores.**

TOPIC NO # 5

8. Fungi is ____ decomposer. **Primary.**

TOPIC NO # 6

9. …of an organism is position it occupies in a food chain. **Trophic level**

TOPIC NO # 7

10. The net of direct and indirect relationship is called tropic cascades. **(Effect)**

TOPIC NO # 8

11. The rate that new organic matter by means of individual growth and reproduction in all herbivores. **Secondary productivity.**
12. Rate at new organic matter formed in all herbivores. **Secondary productivity**

ERFLY

13. Gross primary production (GPP) is the amount of ---------- energy as biomass that primary producers create in a given length of time. **(Chemical energy)**

TOPIC NO # 9

14. The ------ of solar energy (1%) is consumed in photosynthesis. **(Small fraction)**

TOPIC NO # 11

15. The orientation toward a factor are called **Taxis.**

TOPIC NO # 12

16. Example of winter sleep. **Bear**
17. Winter Sleep occurs in large animals to … reserves. **Energy**
18. Hibernating animals have **low body temperature.**
19. Decreased metabolism. Lowered body temperature. **Torpor**

TOPIC NO # 14

20. Variety of tools to track size of population in one tool. **Survivorship curve**
21. Y-axis is a logarithmic plot of numbers of survivors X-axis is a linear plot. **(Age).**
22. Environment's maximal load is called **Carrying Capacity.**

TOPIC NO # 18

23. When a population reach a ____ there are more individual trying to use the same quantity of resources. **High density**.

TOPIC NO # 20

24. ---------- Competition occurs between two species to use the same resources. **Interspecific.**
25. The ----- organism occupies is the total of all the ways it uses the resources of its environment. **Niche**

TOPIC NO # 21

26. Complexity of ecosystem make it more **Stable.**
27. Each successional stage is called **a seral stage.**
28. The first community to become establish in an area is called the …community. **Pioneer.**
29. The final community is the ….community. **Climax**

TOPIC NO # 22

ERFLY

30. Consumers of plants are _____ and physiologically adapted to eating plant material. **(Anatomically)**

TOPIC NO # 24

31. Interspecific Between members of **different species.**

32. The specific competition within species is called **intraspecific competition.**

TOPIC NO # 25

33. Two or more species living in same habitat reciprocally each other evolution. **(Affect)**

TOPIC NO # 26

34. Symbiosis relationship between. **Different species**

35. One species gain benefits while those of the other species are neither benefited nor harmed. **Commensalism.**

36. One species gain benefit other species is harmed. **Parasitism**

37. In …which consist of fungal and photosynthetic symbionts, the fungal partners cannot live on their own. **Lichens**

38. Example of endo-parasite is **tap worm, liver fluke, nematode**

TOPIC NO # 28

39. Camouflage use of any combination of---------- **Coloration.**

40. Camouflage use of any combination of materials coloration or. **(Illumination)**

TOPIC NO # 29

41. Animal changes its color rapidly. **Chameleon**

42. Shadow makes upper side darker and underside lighter .Countershading graded color to counteract the effect of self-shadowing. Creating an illusion of flatness. Makes animal darker below and lighter above is called **countershading.**

TOPIC NO # 32

43. Aposematism coloration is called **warning coloration.**

44. Some animals protect themselvesby being dangerous or distasteful to predator by using prominent coloration. The color pattern are known as **warning or aposematic coloration.**

TOPIC NO # 33

45. Solar nebula (disc of dirt and gases). **First Atmosphere**

TOPIC NO # 34

ERFLY

46. 541 million years ago, O2 made stable of atmosphere. **15%**

TOPIC NO # 35

47. Near the surface of earth ozone concentration about ___ ppm. **0.04-0.15**

TOPIC NO # 36

48. Atmosphere can be divided into… layers. **Five**

TOPIC NO # 37

49. The total average height of troposphere is _____km. **13Km**

TOPIC NO # 38

50. The second major layer of Earth's atmosphere is. **(Stratosphere)**

TOPIC NO # 40

51. Above thermosphere is. **Exosphere**

52. Ionosphere produced in. **(Thermosphere)**

TOPIC NO # 41

53. ------- is responsible for sustaining life on earth. **Atmosphere**

TOPIC NO # 42

54. Amount of CO2 made by breakdown of …compounds almost matches the amount of CO2 used. **Organic**

TOPIC NO # 43

55. Adult human body contain _____ of water. **60%**

56. Water cycle consist of **evaporation, condensation, precipitation, surface runoff**

TOPIC NO # 44

57. This process of evaporation through plant leave is called---------- **Transpiration**

TOPIC NO # 45

58. All living organism 16% nitrogen by weight atmosphere is ….nitrogen by volume. **78%**

TOPIC NO # 46

59. Nitrogen Fixation require. **Soybeans, legumes**

TOPIC NO # 47

60. Like nitrogen, increased use of fertilizers increases phosphorus runoff into our waterways and contributes to **eutrophication.**

TOPIC NO # 48

ERFLY

61. Disruption of ecosystem interaction is an important cause of ------ **(Habitat loss)**

TOPIC NO # 49

62. ------ is removal of forest or stand of trees from land, which is then converted to a non-forest use. **Deforestation.**

TOPIC NO # 51

63. Natural selection prefers-------- population size. **Large**

TOPIC NO # 52

64. ….Species are species that occur outside of their natural ranges because of human activity. **Exotic**

TOPIC NO # 53

65. Cascade Effect Removal of..……in environment. **Apex predator**

TOPIC NO # 55

66. Land pollution ----- affects the respiratory system of human beings. **Indirectly**

TOPIC NO # 59

67. Hydrocarbons consists carbons is **CH4.**

68. Hydrocarbons Diverse group of organic compounds that contain only ……and carbon. **Hydrogen**

69. CFCs destroys the … level in the atmosphere. **Ozone**

TOPIC NO # 60

70. -------- are strongly affected by light pollution. **Reptiles**

TOPIC NO # 61

71. Sound that is unwanted or disrupts one's quality of life is called as. **Noise**

TOPIC NO # 62

72. Form of precipitations that is ---------- acidic .It has elevate levels of hydrogen ions (low ph.) **Unusually.**

73. Form of precipitation that is unusually acidic **acid rain.**

TOPIC NO # 65

74. Three Oxygen atom form **Ozone.**

75. Ozone made up of **O3.**

TOPIC NO # 66

76. The average temperature of earth increase day by day due to in concentration of greenhouse gases in the atmosphere is called **global warming.**

TOPIC NO # 68

77. Rise in mean temperature of 0.6-1.0°C in arid coastal areas, arid mountains and hyper arid plains. **Pakistan**

TOPIC NO # 69

78. ----- is process of increasing concentration of toxic substance.
Bio magnifications

TOPIC NO # 70

79. Storm water runoff is the number cause of stream impairment in urban areas.
One

TOPIC NO # 71

80. Industrial ….may contain acids, alkalis, salts, poisons, oils and in some cases harmful bacteria. **Effluents**

TOPIC NO # 73

81. Activated sludge-sewage mixture is called mixed **liquor.**

TOPIC NO # 74

82. Pere David's deer was a native species of **China.**

TOPIC NO # 75

83. First evolutionary scheme was proposed by jean Baptiste Lamarck in **1809**

TOPIC NO # 76

84. Region with identical climate have…..fauna and flora according to Buffon's law. **Different**

TOPIC NO # 77

85. Any preserved remains, impression, or trace of any once-living thing from a past geological age. **Fossil**

TOPIC NO # 80

86. Changes only in the germ cells…. are transferred to next generation. **DNA**

TOPIC NO # 81

87. He joined --------- of medicine Scotland in 1825 but he was not interested in being physician. **School**

TOPIC NO # 82

88. Theory of uniformitarianism planted two ideas in Darwin's mind the earth could be much older than **6,000 years.**

ERFLY

TOPIC NO # 83

89. Extinct hippopotamus like. **Taxodon.**

TOPIC NO # 84

90. Formation of new forms from an ancestral species, usually in response to the opening of new habitats is called **adaptive radiations.**

TOPIC NO # 87

91. Traits that promote successful reproduction are said to be **adaptive.**

92. Maladaptive traits become….frequent in a population and eventually are eliminate. **Less**

TOPIC NO # 88

93. --------- are characteristics that increase the potential of an organism or species to successfully reproduce in a specified environment. **Adaptation**

TOPIC NO # 89

94. There can be outflow or inflow….in a gene pool **(Genes)**

95. Genes of all traits are present in a population in form of **alleles.**

TOPIC NO # 90

96. Decreases in genetic diversity make populations …likely to withstand environmental stress. **Less**

TOPIC NO # 93

97. Fitness is quantified as …success. **Reproductive**

TOPIC NO # 95

98. Natural selection ---------- variations from a population by favoring one allele over other at a gene locus. **Removes**

TOPIC NO # 96

99. In some cases, selection …one phenotype at one time and another phenotype at another time. **Favors**

TOPIC NO # 99

100. Gene interactions … fitness of alleles. **Affect**

TOPIC NO # 100

101. Different populations of ….species are geographically isolated. **Same**

TOPIC NO # 101

ERFLY

102. If reproductive isolation due to reproducing at different times it is. **Temporal Isolation**

103. Unsuccessful fertilization and development do not occur in. **Post-mating isolation**

104. In.....Isolationgeographicalbarrierspreventsmatingofindividuals. **Premating isolation**

105. Conditions in the reproductive of a female may not support the sperm of male. **Tract**

106. In isolation courtship, behavior patterns of two animals are not mutually appropriate for each **Mechanical.**

107. Developmental failures of the fertilized egg or embryo are the kind of isolation. **Post mating**

TOPIC NO # 102

108. If a geographic barrier separates the species population, it is __ **Allopatric speciation**

109. Evolution of 14 species of finches from the original seedeater finches from mainland is the example of speciation. **Allopatric**

TOPIC NO # 103

110. Parapatric speciation occurs in small, local populations, called. **Demes**

111. All of the frogs in a particular pond or all of the sea urchins in a particular tide pool make up a **deme**

112. Occurs in small, local populations, called demes, which is not completely isolated from each other **Parapatric.**

TOPIC NO # 104

113. This speciation occurs within a single population. **Sympatric Speciation.**

114. Between 30% to 50%of species are formed by sympatric speciation. **Angiosperms**

TOPIC NO #105

115. According of ---- model of evolution. Species do not change significantly over millions of years. **Phyletic gradualism.**

116. Selection characterizes the periods of stasis. Stabilizing

117. Evolutionary changes are occurring --- over millions of years. Gradually

TOPIC NO # 106

ERFLY

118. Which of the following protein is present in the cellular respiration pathways in all eukaryotic organisms. **Cytochrome c**

119. Cytochrome c is a protein is presenting the cellular respiration pathways in Organisms. **All eukaryotic.**

120. Which of the following proteins are useful for looking at relationships among more closely related animals. **Less conserved.**

121. Evolutionary changes whether over long period of rapid are result of changes in ---- make up. Genetics

TOPIC NO #107

122. Nondisjunctionatasinglechromosomeresultsinanabnormalnumberofchromosomes. **Aneuploidy**

123. New genetic material is generated during evolution. **Molecular evolution.**

124. Major mechanism through which genetic material is generated during molecular evolution. **(New)**

TOPIC NO # 108

125. In ….Legs have been modified for Wading. **Stork**

126. Legs have been modified for Perching in. **sparrow**

127. Wings of the birds have not been modified for **Walking**

128. Legs have been modified for swimming. **Penguin**

129. Wings have been modified for soaring in. **Eagle**

130. In wings have been modified for hovering. **Humming bird.**

131. Which of the following is a highly conserved structure in birds. **Feathers.**

132. A species is a ….of different molecules and structures that have evolved at different rates. **Mosaic**

TOPIC NO # 109

133. Who is the Father of taxonomy and systematics? **Carl Linnaeus**

134. Who developed the three and five kingdom system? **Robert Whittaker**

135. Carl Linnaeus presented the criteria of classification in. **1735**

TOPIC NO # 110

136. The hypothetical lineage shown in figure is called a **cladogram.**

137. Cladogram depict a sequence in the of derived characters. **Origin**

138. Members of the … group can be traced to separate ancestors. **Polyphyletic**

139. The groups should include a single ancestral species and all of its descendants. _**Monophyletic**

ERFLY

140. Characters that all members of a group share are referred to as. **Symplesiomorphies**.

141. Which of the following group include some, but not all, members of a lineage? **Paraphyletic**

TOPIC NO # 111

142. Halophile can live in water with salt concentrations exceeding **15%.**

143. The salt concentration in oceans is roughly. **4%.**

144. Thermoacidophiles in superheated water with temperatures. **750oF**

145. Thermoacidophiles lives in the environment with ----- ph. **1 to3**

146. Members of the domain ….live in extreme environments. **Archaea**

147. Cell wall of bacteria consists of**. No peptidoglycan**

148. Approximately, tons of sodium chloride is extracted from the Great Salt Lake. **2.5million**

TOPIC NO #112

149. Actinobacteria are …bacteria. **Gram-positive**

150. Photosynthesizing bacteria that are related to the chloroplasts of eukaryotic plants and algae are called. **Blue green algae.**

151. Which of the following bacteria can fix atmospheric nitrogen in anaerobic conditions. **Cyanobacteria**

152. Which of the following are also called blue green algae. Cyanobacteria

153. Many bioactive metabolites are produced by ……. **Species.** Actinobacteria.

154. Which of the following type of bacteria cause Syphilis and Lyme disease. **Spirochetes**

TOPIC NO # 113

155. Which of the following structure protects bacteria from being phagocytized by cells of the host's immune system? **Capsule**

156. In bacteria, capsules are composed of. **Polysaccharides**

TOPIC NO # 114

157. Number of Pilli in bacterial cell. **1 –10**

158. Average diameter of bacteria ranges from_____µm. **0.5 - 2.0**

159. Bacteria Use in conjugation for exchange of genetic material. **Pilli**

160. Short protein appendages smaller than flagella is called. **Pilli**

ERFLY

161. Which of the following bacteria have a single flagellum at one ends? **Lophotrichous**

162. Which of the following bacteria have a single flagellum at both ends? **Amphitrichous**

TOPIC NO # 115

163. According to Endosymbiotic theory evolved from endocytosis of aerobic bacteria, **Mitochondria**

164. Kingdom Protista consists of. **Unicellular eukaryotes.**

165. Which of the following Organisms have cells consisting of a nucleus enclosed within membranes. **Eukaryotes.**

166. Domain eukaryote evolved ---------- billion years ago. **(2.7)**

TOPIC NO # 116

167. Genetic material is organized as DNA molecules, along with a variety of…..to form chromosomes. **Proteins.**

TOPIC NO # 118

168. RER has **ribosomes attached.**

TOPIC NO # 119

169. Camillo Golgi country is **Italian.**

TOPIC NO # 120

170. Lysosome were discovered by the Belgian cytologist de Duve in by **(1950s)**

TOPIC NO # 121

171. …allow molecules to freely diffuse from one side of the membrane to the other. **Porins**

TOPIC NO # 122

172. Own circular…, mostly attached to inner membrane. **DNA**

TOPIC NO # 123

173. Christian de Duve (1967) Isolated from cells by centrifugation. **Liver**

TOPIC NO # 124

174. ---------- was first isolated and named in 1817. **Chloroplast**

TOPIC NO # 125

175. Cytoskeleton provides support and shape to **cell.**

TOPIC NO # 126

ERFLY

176. Intermediate Filaments Intermediate in size **8-12 nm.**

TOPIC NO # 127

177. Genomic DNA sequence of an Archaean and ------were first compared in 1996. **Bacterium.**

TOPIC NO # 128

178. There are …type of Mastigophora. **2**

TOPIC NO # 130

179. Subphylum Sarcodina are the **amoebae.**

TOPIC NO # 131

180. They engulf food by --------using pseudopodia. **Phagocytosis**

181. Amoeba belong to **Subphylum Sarcodinia**

TOPIC NO # 134

182. Toxoplasmosis caused by toxoplasma virulent in immune suppressed individually. **AIDS.**

TOPIC NO # 136

183. Nosema bombicus parasitizes …Causing the disease pebrine or pepper disease. **Silkworms**

TOPIC NO # 137

184. Acetospora consists exclusively of … extracellular parasites. **Obligatory.**

TOPIC NO #144

185. The cnidocyte has a modified ….called a cnidocil. **Cilium**

TOPIC NO #146

186. The organ of excretion in Platyhelminthes is … cell. **Flame**

TOPIC NO #147

187. Ventral gland cells called ---------- **Renette**

TOPIC NO #149

188. Sense organs widely dispersed in. **Annelida**

TOPIC NO # 150

189. Rasping structure called radula Consist of Chitinous belts. **Curved teeth**

TOPIC NO # 154

190. Skeleton of Echinodermata consists of a series of calcium carbonate plates called **Ossicles**

TOPIC NO # 156

ERFLY

191. In Hemichordate Larvae feed on plankton.

TOPIC NO # 158

192. Osmoregulation is a Physiological adaptation to conserve. **Water / fluid**

TOPIC NO # 159

193. First vertebrates possess amitotic eggs. **Reptile**

194. Most reptiles excrete **uric acid.**

TOPIC NO # 160

195. Covering of … is called a plumage. **Feathers**

TOPIC NO # 161

196. Bird's Voice box, called. **Syrinx.**

TOPIC NO # 164

197. Mosses are the example of plant. **Non-vascular**

Erfly
