Team Zoology LEGENDS

Zoology Legends

1. All organisms need energy to function.

2. First evolutionary scheme was proposed by jean Baptiste Lamarck in 1809 .

3.. One species gain benefit other species is harmed in parasitisam.

4. species that occur outside of their natural ranges because of human activity
Exotic Species .

5. Rise in mean temperature of 0.6-1.0°C in arid coastal areas, arid mountains

and hyper arid plains Pakistan .

6. Nitrogen fixing microbes requires enzyme nitrogenase

7. Near the surface of earth ozone concentration about _0.04-0.15 ppm

8.The resemblance of one species to another for protective or aggressive

purposes is Mimicry

9. The second major layer of Earth's atmosphere is (Stratosphere)

11. Regions with identical climate have different floras and faunas (Buffon's Law).

12. Organic Compounds that contain Carbon atoms.

13. The atmospheric concentration of CO2 measured from Antarctic ice core data implies that Earth's climate has being pretty stable over the past 400,000 years.

14. Form of precipitation that is unusually acidic. Acid rain

15. Secondary Treatment
is a Biological process.

16. Natural selection prefers large population.

17. Only change in DNA are transferred to next generations.

18. Winter Sleep

Occurs in large animals for large energy reserves.

19. In preedation one animal kills and eats another animal one is predator and other is prey.

20. Intraspecific competition
between members of same species for same resources.

21. Conventional aviation takes place in troposphere.

22. Decomposers absorb nutrients directly through chemical and biological processes without ingestion.

23. Productivity is the

rate at which the organisms in the trophic level collectively synthesize new organic matter.

24. Rate of reproduction of common Carp is 300,000 / years.

25. Land pollution indirectly affects the respiratory system of human beings.

26. Average Height of troposphere is 13 km .

27. Which specie can survive beyond the carrying capacity

A) r- selected species

B) K- selected species

C) N- selected species

D) none.

1. Adult human body contains --- 60% -- of water by weight.

2. - community --- is a group of population occupying same space in a particular time.

3. First evolutionary scheme was proposed by jean Baptiste Lamarck in - 1809 -

4. 541 million years ago, O2 made stable - 15%-of atmosphere.

5. ----is Removal of a forest or stand of trees from land which is then converted to a non-forest use. - Deforestation-

6. The second major layer of Earth's atmosphere is -(Stratosphere)-

7. Rise in mean temperature of 0.6-1.0°C in arid coastal areas, arid mountains and hyper arid plains - Pakistan -

8. 3 oxygen atom form -(ozone .)-

9. Which layer of atmosphere is above thermosphere --- exosphere ---

10. Organisms that kill and eat another organisms is called -- predator -- and other is called prey.

11. - predator -- indirectly increase plant growth.

12. Complexity of ecosystem is a ---

13. When a population reaches a high - density -, there are more individuals trying to use the same quantity of resources.

14. Complexity of ecosystem makes it more - stable-

15. Variety of causes, independently or in concert, are responsible for - extinctions-

Nitrogen is in atmosphere is __ 78 %

Response of an organism towards an abiotic stimuli __

Taxi (Light)

Y-axis is a logarithmic plot of numbers of survivors X-axis Is a linear plot of __

Age

Exotic Species are species that occur outside of their natural ranges because of humanactivity

172. 541 million years ago, O2 made stable --------0f atmosphere-----15 %

Are strongly affected by light pollution….Reptiles

CH4, Nitrous oxide, CO2 are----

 greenhouse gas solar nebula is ---------- of dirt and gases….Disc

Any physical or chemical --------in water that adversely affects the health of humans and other organisms Change?? _

Rise in mean temperature of 0.6-1.0°C in arid coastal areas, arid mountains and hyper arid plains….. Pakistan

Any preserved remains, impression, or trace of any once-living thing from a past geological age….Fossil

Variations come from --------and causes biodiversity…Evolution

One species gain benefit other species is ____ in parasitism..

Harmed

One is prey other is .... Predator

Aik precipitate wala tha jis ka answer acid rain tha

2 atmosphere sy related thy like stretosphere k bad konsi layer h

Mesosphere

Or aik ka answer atmosphere tha mtlb k life k liy important h is trha tha kuch.
