Youtube
@Biotechbrainybunch

1. Copolymetric sorbent
2. Working of ICP
3. What happen when condensed rings increase
4. IR applications
5. Non polar interaction UV spectroscopy parts
6. Mcqs mean,
7. Electron inversion time,SPE mean
8. Complemantry colour
9. Hplc chromatography
10. What is the best value of carboxlyic acid and ester
11. 3 properties of iR spectrosocpy
12. Extraction of solid phase ...esa e tha ab yd nhi
13. McQ
14. Kuch ppts sy kuch quiz file sy
15. TLC py note

16. IR spectroscopy ke application ye sb ko ata ha
17. Non-polar interaction of Solid phase extraction
18. Component name of vu sprctrophoter
19. Application of IR spectrophotometer
20. Complementary colors
21. Working of ICP
22. What are the base value of carbolic acid and ester? 2
23. What happened when condensed ring increase? 2
24. What is SPE? 3
25. Radiation of spectroscopy asy e tha kuch. 3
26. Auxochrome. 5
27. What type of light is emitted by Tungsten lamp and Deuterium lamp?
28. What are the requirements of paper chromatography?
29. What the parts of UV Spectrophotometer?
30. What is the function of Alumina in chromatography?
31. Write three applications of IR spectrometry.
32. Define the following:

Sorbent, Matrix, Analyte , Washing, Elution Solvent

REMEMBER IN YOUR PRAYERS
