BIOLOGY MCQS WITH SOLVED ANSWERS

WWW.EASYMCQS.COM

BIOLOGY SOLVED MCQS NOTES FOR PPSC, NTS, CSS, PMS, OTS AND MANY OTHERS EXAMS JOBS PREPARATIONS WITH ONLINE QUIZ TESTS THAT ARE VERY HELPFUL FOR THE STUDENTS ONLINE MCQS PREPARATIONS.

Download PDF Books: WWW.EasyMCQs.Com

1. QUESTION: The Study of cells at molecular level is called

A. Morphology
B. Palaentology
C. Molecular Biology
D. Microbiology

CORRECT ANSWER IS: Molecular Biology

2. QUESTION: Microbiology deals with the study of

A. Algae, Bacteria
B. Fungi, Protozoa
C. Viruses
D. All of them

CORRECT ANSWER IS: All of them

3. QUESTION: Marine biology deals with the study of

A. Protozoa
B. Bacteria
C. Seas and Oceans
D. Algae, Fungi

CORRECT ANSWER IS: Seas and Oceans

4. QUESTION: Social Biology deals with the study of

A. Service Industries
B. Communalization
C. Social Behaviour
D. Both a and b

CORRECT ANSWER IS: Both a and b

5. QUESTION: Highly organized living organisms are composed of

WWW.EASYMCQS.COM

A. One or more cell
B. One cell
C. Two cells
D. Three cells

CORRECT ANSWER IS: One or more cell

6. QUESTION: Which can response to changes in their envoirnment

A. Living Organism
B. Non-Living Organism
C. Both a and b
D. None of a and b

CORRECT ANSWER IS: Both a and b

7. QUESTION: Environmental biology deals with the study of

A. Relationship of organisms with socitey
B. Relationship of organisms with their envoirnment
C. Relation of organisms with technology
D. None of the above

CORRECT ANSWER IS: Relationship of organisms with their envoirnment

8. QUESTION: Physical and chemical parameters of water bodies are the example of

A. Ecobilogy
B. Parasitology
C. Microbiology
D. Fresh water biology

CORRECT ANSWER IS: Fresh water biology

9. QUESTION: The Study of mode of transmission belongs to

A. human biology

WWW.EASYMCQS.COM

B. Biotechnology
C. Microbiology
D. Parasitology

CORRECT ANSWER IS: Parasitology

10. QUESTION: Number of natural occurring chemical element is

A. 92
B. 93
C. 94
D. 95

CORRECT ANSWER IS: 92

11. QUESTION: How many chemical reactions are present in simple organism for maintaining its life?

A. Hundreds
B. Thousands
C. Millions
D. Billions

CORRECT ANSWER IS: Hundreds

12. QUESTION: How many elements are used in forming the chemical compound

A. 92
B. 16
C. 94
D. 17

CORRECT ANSWER IS: 16

13. QUESTION: Highly structure protoplasm is

A. Genetical substance
B. Non-Living Substance
C. Living Substance

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. None of the above

CORRECT ANSWER IS: Living Substance

14. QUESTION: The Start of the study of biological organization at different level forms

A. Sub atomic particle
B. Community
C. Atomic Particles
D. Both a and c

CORRECT ANSWER IS: Both a and c

15. QUESTION: A combination of atom belong to

A. Atom
B. Micro Molecules
C. macro Molecules
D. None of the above

CORRECT ANSWER IS: None of the above

16. QUESTION: Organs are composed of _____.

A. Tissues
B. cells
C. units
D. None of the above

CORRECT ANSWER IS: Tissues

17. QUESTION: The properties of chemical elements differ from one another in

A. Non-living word
B. Living word
C. Both a and b
D. None of the above

WWW.EASYMCQS.COM

CORRECT ANSWER IS: Non-living word

18. QUESTION: Biological organization has

A. Number of processes
B. degree of complexity
C. Regulatory function
D. All of these

CORRECT ANSWER IS: All of these

19. QUESTION: Member of _____ species inhabiting the same area called population

A. One
B. Two
C. Three
D. More Than one

CORRECT ANSWER IS: One

20. QUESTION: Micro molecules having low molecule weight are

A. Oxygen
B. Strach
C. Proteins
D. CO2, H2O

CORRECT ANSWER IS: CO2, H2O

21. QUESTION: Glucose and amino acids are _____ Molecules

A. Organic
B. Inorganic
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Organic

WWW.EASYMCQS.COM

22. QUESTION: How cells and Organelles are formed

A. From a particular way of Macro molecules
B. from a particular way micro Molecules
C. Form particular way of macro and micro molecules
D. None of the above

CORRECT ANSWER IS: Form particular way of macro and micro molecules

23. QUESTION: Fungi animals and plants may consist of upto

A. Millions of cells
B. Billion of cells
C. Trillions of cells
D. None of the above

CORRECT ANSWER IS: Trillions of cells

24. QUESTION: A group of similar _____ is called tissue

A. Organs
B. Cells
C. Units
D. Structure

CORRECT ANSWER IS: Cella

25. QUESTION: _____ have a limited number of organelles

A. Prokaryotes
B. Eukaryotes
C. organ system
D. None of the above

CORRECT ANSWER IS: Prokarytoes

26. QUESTION: In animals coordination is achieved by the means of

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Respiratory System
B. Circulatory System
C. Digestive System
D. Nervous System

CORRECT ANSWER IS: Nervous System

27. QUESTION: Long term regulations of activities is brought in plants by

A. Harmones
B. Minerals
C. Salt
D. Organs

CORRECT ANSWER IS: Harmones

28. QUESTION: _____ have a rich number of organelles

A. Plants
B. Eukaryotes
C. Animals
D. Prokaryotes

CORRECT ANSWER IS: Eukaryotes

29. QUESTION: _____ are involved in anchoring inplants

A. Roots
B. Stem
C. Soil
D. Water

CORRECT ANSWER IS: Roots

30. QUESTION: Living word is _____ in size.

A. Long

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Same
C. Enormous
D. Short

CORRECT ANSWER IS: Enormous

31. QUESTION: The distribution of organisms in space can be studies by

A. Space Science
B. Astronomy
C. Biomes
D. Cosmology

CORRECT ANSWER IS: Biomes

32. QUESTION: Community of an ecosystem includes

A. Biotic Factor
B. Abiotic factor
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

33. QUESTION: The Shoots are _____ of the entire plant

A. Supporter
B. Primary organ
C. Procuring water
D. Food manufacturer

CORRECT ANSWER IS: Supporter

34. QUESTION: The study of _____ allow biologists to place organisms in a time sequence

A. Anatomy
B. Fossils
C. Social Biology

WWW.EASYMCQS.COM

D. Anatomy

CORRECT ANSWER IS: Fossils

35. QUESTION: what is the reason in decrease of population in community

A. Fluctuation in biotic factors
B. fluctuations in abiotic factors
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

36. QUESTION: Population of different species are living in

A. Different habits
B. Same habbits
C. Dynamic Habbits
D. None of the above

CORRECT ANSWER IS: Same Habbits

37. QUESTION: _____ is a group of living organisms of same specie

A. Popultion
B. Community
C. Tissue
D. None of the above

CORRECT ANSWER IS: Population

38. QUESTION: _____ are involved in producing net generation in plants

A. Roots
B. Leaves
C. Flowers
D. Stem

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Flowers

39. QUESTION: Biodiversity is

A. The number of variety of species
B. The number of variety of Groups
C. The number of variety of communities
D. The number of variety of Population

CORRECT ANSWER IS: The number of variety of Species

40. QUESTION: how many percentage of species of fungi, algae, are found in the world

A. 16.9 %
B. 8.5 %
C. 4.5 %
D. 9.4 %

CORRECT ANSWER IS: 9.4 %

41. QUESTION: How many senses are included to make observation

A. 1
B. 3
C. 4
D. 5

CORRECT ANSWER IS: 5

42. QUESTION: Tentative Explanation of Observation is

A. Hypotesis
B. Results
C. Statement
D. Experiment

CORRECT ANSWER IS: Hypotesis

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

43. QUESTION: Imagination forms

A. Experiment
B. Observation
C. Hypothesis
D. Statement

CORRECT ANSWER IS: Hypothesis

44. QUESTION: What type of reasoning is used to form a hypothesis

A. Inductive Reasoning
B. Deductive Reasoning
C. Both a and b
D. None of the Above

CORRECT ANSWER IS: Inductive Reasoning

45. QUESTION: Observation can be

A. Quantitative
B. Qualitative
C. Both a and b
D. None of the Above

CORRECT ANSWER IS: Both a and b

WWW.EASYMCQS.COM

46. QUESTION: How many percent of species of insects are found in the world

A. 19.9%
B. 16.9%
C. 10%
D. 12.4%

CORRECT ANSWER IS: 19.9%

47. QUESTION: How many species of organisms are found in the world

A. 4000000
B. 2500000
C. 2550000
D. 3000000

CORRECT ANSWER IS: 2500000

48. QUESTION: Science is based on _____inquiry

A. Hypothesis
B. Observation
C. Senses
D. Experimental

CORRECT ANSWER IS: Experimental

49. QUESTION: Science is _____ knowledge

A. Experimental
B. Methodolgy
C. Systematize
D. All of them

CORRECT ANSWER IS: All of them

50. QUESTION: _____ is an unbroken series of Species

A. Phyletic Lineage
B. Population
C. Biosphere
D. All of them

CORRECT ANSWER IS: Phyletic Lineage

51. QUESTION: _____ often produces new Species and increases biodiversity

A. Revolutionary

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Evolutionary
C. Environmental
D. None of Them

CORRECT ANSWER IS: Evolutionary

52. QUESTION: AIDS stands for

A. Acquired Immuno Deficiency Syndrome
B. Active Immuno Deficiency Syndrome
C. Efficient Immuno Deficiency Syndrome
D. None of Them

CORRECT ANSWER IS: Acquired Immuno Deficiency Syndrome

53. QUESTION: Hepatitis is caused by

A. Bacteria
B. HIV
C. Virus
D. H. Virus

CORRECT ANSWER IS: H. Virus

54. QUESTION: Vacca means

A. Dog
B. Cow
C. Bull
D. Fish

CORRECT ANSWER IS: Cow

55. QUESTION: Some _____ used as bio-pesticides.

A. Algae
B. Viruses
C. Bacteria

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. Fungi

CORRECT ANSWER IS: Bacteria

56. QUESTION: Antibiotics are useful in _____ Diseases.

A. Viral
B. Bacterial
C. Both a and b
D. None of the Above

CORRECT ANSWER IS: Bacterial

57. QUESTION: Cancer id cured by

A. Radiotherapy
B. Chemotherapy
C. Physiotheraphy
D. Both a and b

CORRECT ANSWER IS: Both a and b

58. QUESTION: Vaccination was developed in

A. 1775
B. 1795
C. 1785
D. 1805

CORRECT ANSWER IS: 1775

59. QUESTION: A series of _____ is called theory.

A. Experiment
B. Equations
C. Hypothesis
D. Scientific Method

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Equations

60. QUESTION: The Technique of incorporation of Foreign DNA is called

A. Transgenic Engineering
B. Clonning
C. Genetics
D. Genetic Engineering

CORRECT ANSWER IS: Transgenic Engineering

61. QUESTION: Which one is complex medium

A. Water
B. Soil
C. Cell wall
D. Protoplasm

CORRECT ANSWER IS: Soil

62. QUESTION: Experiment of vaccine of AIDS is conducted in

A. Animals
B. Birds
C. Sea Animals
D. Human

CORRECT ANSWER IS: Human

63. QUESTION: Production of identical copies of organisms is called

A. Special Technique
B. Clonning
C. Tissue Culture Technique
D. Culture Technique

CORRECT ANSWER IS: Clonning

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

64. QUESTION: Constant or uniform fact of nature is

A. Experiment
B. Theory
C. Scientific law
D. Art

CORRECT ANSWER IS: Scientific Law

65. QUESTION: What reduce pollution of heavy metal

A. Fungi
B. Algae
C. Toxic Mterial
D. None of Them

CORRECT ANSWER IS: Fungi

66. QUESTION: Animal cannot be reproduced by

A. Clonning
B. Gene Therpy
C. Eugenic aims
D. Tissue culture Technique

CORRECT ANSWER IS: Clonning

WWW.EASYMCQS.COM

67. QUESTION: The chemotherapy chemical may

A. Kill cancerous cells
B. kill Normal Cell
C. Both a and b
D. None of the Above

CORRECT ANSWER IS: Both a and b

68. QUESTION: Who discovered cell?

Download PDF Books: WWW.EasyMCQs.Com

A. Lorenz Oken
B. Schwann
C. Robert Brown
D. Robert Hook

CORRECT ANSWER IS: Robert Hook

69. QUESTION: Who discovered Nucleus?

A. Lorenz Oken
B. Schwann
C. Robert Brown
D. Robert Hook

CORRECT ANSWER IS: Robert Brown

70. QUESTION: Cell theory was put forth by

A. Lorenz Oken
B. Schwann
C. Robert Brown
D. Robert Hook

CORRECT ANSWER IS: Schwann

71. QUESTION: Activities of life are controlled by

A. Tissue
B. Cell
C. Heart
D. Brain

CORRECT ANSWER IS: Cell

72. QUESTION: New cells are formed by

A. Automatically

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Tissues
C. Pre-Existing Cells
D. All of them

CORRECT ANSWER IS: Pre-Existing Cells

73. QUESTION: Cell is made of

A. Nucleus
B. Cytoplasm
C. Cell Membrane
D. All of them

CORRECT ANSWER IS: All of them

74. QUESTION: Hypothesis of Virchow was supported by

A. Louis Pasteru
B. Schwann
C. Robert Brown
D. Robert Hook

CORRECT ANSWER IS: Louis Pasteru

75. QUESTION: The abiogenesis theory postulates that living things are formed from

A. Living things
B. Non-Living things
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Non-Living Things

76. QUESTION: ATP is essential for

A. Passive Transport
B. Active Transport
C. Both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. None of the above

CORRECT ANSWER IS: Active Transport

77. QUESTION: Fractional Components of cell membrane is

A. Lipids
B. Protines
C. Carbohydrates
D. All of them

CORRECT ANSWER IS: Carbohydrates

78. QUESTION: What is the percentage of lipids in Plasma Membrane

A. 100% to 120%
B. 70% to 80%
C. 20% to 40%
D. less than 10%

CORRECT ANSWER IS: 20% to 40%

79. QUESTION: Salt and water is conducted by

A. Sclerenchyma cells
B. Phloem cells
C. Xylem Cells
D. Cholenchyma cells

CORRECT ANSWER IS: Xylem Cells

80. QUESTION: Intake of solid particle by cell is termed as

A. Pinosytosis
B. Endosytosis
C. Phagosytosis
D. None of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Phagosytosis

81. QUESTION: What type of transport passes material through cell Membrane

A. Passive Transport
B. Active Transport
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and B

82. QUESTION: Which cell is responsible for the Growth of Plant

A. Sclerenchyma cells
B. Phloem cells
C. Meristematic cells
D. Cholenchyma cells

CORRECT ANSWER IS: Sclerenchyma cells

83. QUESTION: The ions which moves upward across the cells membrane are known as

A. Passive Transport
B. Active Transport
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Active Transport

84. QUESTION: The ions which moves downward across the cells membrane are known as

A. Passive Transport
B. Active Transport
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Passive Transport

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

85. QUESTION: What is the percentage of protein in plasma membrane?

A. 60% to 70%
B. 60% to 80%
C. 60% to 90%
D. 60% to 100%

CORRECT ANSWER IS: 60% to 80%

86. QUESTION: Which cell provide translocation of food in Plants?

A. Sclerenchyma cells
B. Phloem cells
C. Xylem Cells
D. Cholenchyma cells

CORRECT ANSWER IS: Xylem Cells

87. QUESTION: The process of photosynthesis in plan is performed in

A. Phloem cells
B. Cholenchyma cells
C. Xylem Cells
D. Sclerenchyma Cells

CORRECT ANSWER IS: Cholenchyma cells

WWW.EASYMCQS.COM

88. QUESTION: Support is provided by _____ cells in plants.

A. Sclerenchyma
B. Cholenchyma
C. Phloem
D. Xylem

CORRECT ANSWER IS: Sclerenchyma

89. QUESTION: Surplus food of plant is stored in_____ cells

A. Sclerenchyma
B. Cholenchyma
C. Parenchyma
D. None of the above

CORRECT ANSWER IS: Parenchyma

90. QUESTION: Chromatin material of eukaryotic cells is present in _____ .

A. Cytoplasm
B. Nucleus
C. cell wall
D. Absent

CORRECT ANSWER IS: Nucleus

91. QUESTION: Chromatin material of prokaryotic cells is present in _____ .

A. Cytoplasm
B. Nucleus
C. cell wall
D. Absent

CORRECT ANSWER IS: Cytoplasm

92. QUESTION: The pores of cell membrane through which material pass are _____.

A. Charged
B. Neutral
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Charged

93. QUESTION: Intake of material by in-folding of cell membrane is termed as _____

A. Phagocytosis

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Pinocytosis
C. Endocytosis
D. None of the above

CORRECT ANSWER IS: Endocytosis

94. QUESTION: Cell wall in animal cell is

A. Present
B. Absent
C. Partially developed
D. doubled

CORRECT ANSWER IS: Absent

95. QUESTION: Cell membrane transmit nerve impulses in _____.

A. Neuron
B. Muscle
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Neuron

96. QUESTION: Intake of liquid material by cell is called _____.

A. Phagocytosis
B. Pinocytosis
C. Endocytosis
D. None of the above

CORRECT ANSWER IS: Pinocytosis

97. QUESTION: cell wall is secreted by _____.

A. Cytoplasm
B. Protoplasm
C. Nucleus

WWW.EASYMCQS.COM

D. None of the above

CORRECT ANSWER IS: Protoplasm

98. QUESTION: Chitin is present in the cell wall of _____ cells.

A. Fungal
B. Eukaryotic
C. prokaryotic
D. None of the above

CORRECT ANSWER IS: Fungal

99. QUESTION: How many layers are there in cell wall?

A. 2
B. 3
C. 4
D. 5

CORRECT ANSWER IS: 3

100. QUESTION: Thickest layer of cell wall is

A. Primary wall
B. Secondary wall
C. Middle lamella
D. None of the above

CORRECT ANSWER IS: Secondary wall

101. QUESTION: Primary wall is composed of _____.

A. Cellulose, Hemicellulose, and Pectin
B. Hemicellulose, and Pectin
C. Cellulose, and Pectin
D. Cellulose, and Hemicellulose

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Cellulose, Hemicellulose, and Pectin

102. QUESTION: Cellulose is present in the cell wall of _____.

A. Fungal cells
B. Eukaryotic cells
C. prokaryotic cells
D. None of the above

CORRECT ANSWER IS: Eukaryotic cells

103. QUESTION: Murein is present in cell wall of _____.

A. Fungal cells
B. Eukaryotic cells
C. prokaryotic cells
D. None of the above

CORRECT ANSWER IS: prokaryotic cells

104. QUESTION: cellulose of prokaryotic cell wall is _____.

A. Present
B. Absent
C. Thick
D. Thin

CORRECT ANSWER IS: Absent

105. QUESTION: Soluble part of cytoplasm is termed as _____.

A. Sol
B. Gel
C. Colloidal Solution
D. Cytosol

CORRECT ANSWER IS: Cytosol

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

106. QUESTION: DNA stands for _____

A. Deoxyribonucleic acid
B. Deoxy-Nucleic Acid
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Deoxyribonucleic acid

107. QUESTION: rDNA stands for _____.

A. Ribosomal Deoxyribonucleic acid
B. Ribosomal Deoxy-Nucleic Acid
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Ribosomal Deoxyribonucleic acid

108. QUESTION: RNA stands for

A. Ribonucleic acid
B. Deoxyribonucleic Acid
C. Both a and b are same terms
D. None of the above

CORRECT ANSWER IS: Ribonucleic acid

WWW.EASYMCQS.COM

109. QUESTION: rDNA are present in _____.

A. Nuclear pores
B. Peripheral region of nucleolus
C. Central region of nucleolus
D. None of the above

CORRECT ANSWER IS: Central region of nucleolus

110. QUESTION: Genes are located on _____.

Download PDF Books: WWW.EasyMCQs.Com

A. Ribosomes
B. Nucleosomes
C. Chromosomes
D. None of the above

CORRECT ANSWER IS: Chromosomes

111. QUESTION: Size of prokaryotic ribosome is _____.

A. 65S
B. 70S
C. 75S
D. 80S

CORRECT ANSWER IS: 70S

112. QUESTION: Chromosome is composed of _____.

A. DNA only
B. Proteins only
C. DNA and Proteins
D. None of the above

CORRECT ANSWER IS: DNA and Proteins

113. QUESTION: Nucleus is usually obtained with _____.

A. Basic dye
B. Acidir dye
C. Neutral dye
D. None of the above

CORRECT ANSWER IS: Basic dye

114. QUESTION: Number of chromosomes in somatic cells are _____.

A. n

WWW.EASYMCQS.COM

B. 5n
C. 10n
D. 2n

CORRECT ANSWER IS: 2n

115. QUESTION: Number of chromosomes in frog cells are _____ .

A. 16
B. 26
C. 36
D. 46

CORRECT ANSWER IS: 26

116. QUESTION: What divides prokaryotic cells _____ .

A. Binary fission
B. Budding
C. Mitosis
D. Meiosis

CORRECT ANSWER IS: Binary fission

117. QUESTION: Cell wall of prokaryotic cell is composed of _____ .

A. Murein
B. Cellulose
C. Chitin
D. All of them

CORRECT ANSWER IS: Murein

118. QUESTION: Nucleolus synthesizes and stores _____.

A. rDNA
B. mRNA
C. tRNA

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. rRNA

CORRECT ANSWER IS: rRNA

119. QUESTION: Number of chromosomes in sex cells are _____.

A. n
B. 5n
C. 10n
D. None of the above

CORRECT ANSWER IS: n

120. QUESTION: Lysosomes are abundantly found in _____.

A. Phagocytic W.B.C
B. Nerve cells
C. Muscle cells
D. None of the above

CORRECT ANSWER IS: Phagocytic W.B.C

121. QUESTION: In human genome RER stands for _____.

A. Rough Endoplasmic Reticulum
B. Right Endoplasmic Reticulum
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Respiratory Exchange Ratio

122. QUESTION: In physiology RER stands for _____.

A. Respiratory Exchange Ratio
B. Respiratory Expanded Ratio
C. Both a and b
D. None of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Respiratory Exchange Ratio

123. QUESTION: In physiology SER stands for _____.

A. Smooth Endoplasmic Reticulum
B. Straight Endoplasmic Reticulum
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Smooth Endoplasmic Reticulum

124. QUESTION: What controls synthesis of protein?

A. SER
B. RER
C. Both a and b
D. None of the above

CORRECT ANSWER IS: RER

125. QUESTION: What controls lipid metabolism?

A. SER
B. RER
C. Both a and b
D. None of the above

CORRECT ANSWER IS: SER

126. QUESTION: Small molecules of cytosol forms _____

A. Gel
B. Sol
C. True solution
D. Colloidal solution

CORRECT ANSWER IS: True solution

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

127. QUESTION: Major component of cytoplasm consists of _____ .

A. Water
B. Fat
C. Protein
D. None of the above

CORRECT ANSWER IS: Water

128. QUESTION: Large molecules of cytosol forms _____.

A. Gel
B. Sol
C. True solution
D. Colloidal solution

CORRECT ANSWER IS: Colloidal solution

129. QUESTION: Nature of sol is _____.

A. Viscous
B. Non-Viscous
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Non-Viscous

130. QUESTION: Nature of gel is _____.

A. Viscous
B. Non-Viscous
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Viscous

131. QUESTION: Shape of cisternae is _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Spherical and Tubular
B. Spherical only
C. Tubular only
D. None of the above

CORRECT ANSWER IS: Spherical and Tubular

132. QUESTION: Cytoplasm is the site of _____.

A. Glycolysis
B. Krebs cycle
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Glycolysis

133. QUESTION: Cytoplasm serve as _____.

A. Store house
B. Transport
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Store house

WWW.EASYMCQS.COM

134. QUESTION: Cytoplasm serve as store house of _____.

A. Chemicals
B. Cell organelles
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

135. QUESTION: Ground substance of cytoplasm consist of _____.

A. Sol

Download PDF Books: WWW.EasyMCQs.Com

B. Gel
C. Cytosol
D. Colloidal solution

CORRECT ANSWER IS: Cytosol

136. QUESTION: Endoplasmic reticulum appears to be in contact with _____.

A. Cell Membrane only
B. Nuclear membrane only
C. Cell Membrane and Nuclear membrane
D. None of the above

CORRECT ANSWER IS: Cell Membrane and Nuclear membrane

137. QUESTION: Material of cytoplasm is separated from material of endoplasmic reticulum by _____.

A. Cisternae
B. Plasma membrane
C. Nuclear membrane
D. None of the above

CORRECT ANSWER IS: Cisternae

138. QUESTION: Number of membranes present in mitochondrion are _____.

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 2

139. QUESTION: Enzymes of lysosomes are synthesized by _____.

A. Ribososms
B. SER
C. RER

WWW.EASYMCQS.COM

D. None of the above

CORRECT ANSWER IS: RER

140. QUESTION: Shape of cell is determined by _____.

A. Microtubules
B. Microfilaments
C. Intermediate filaments
D. None of the above

CORRECT ANSWER IS: Intermediate filaments

141. QUESTION: Growth is an _____ in size.

A. Reversible increase
B. Reversible decrease
C. Irreversible decrease
D. Irreversible increase

CORRECT ANSWER IS: Irreversible increase

142. QUESTION: Theory of the transmutation of species is also known as theory of _____.

A. Cells
B. Evolution
C. Genetics
D. Inheritance

CORRECT ANSWER IS: Evolution

143. QUESTION: Theory of evolution for the first time was proposed by _____.

A. Robert Hooke
B. Charles Darwin
C. Alfred Russel Wallace
D. Jean-Baptiste Lamarck

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Jean-Baptiste Lamarck

144. QUESTION: The new evolutionary theory was presented by _____ and _____.

A. Jean-Baptiste Lamarck, Alfred Russel Wallace
B. Charles Darwin, Jean-Baptiste Lamarck
C. Alfred Russel Wallace, Charles Darwin
D. None of the above

CORRECT ANSWER IS: Alfred Russel Wallace, Charles Darwin

145. QUESTION: Golgi apparatus consists of _____.

A. Vesicles
B. Cisternae
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Both a & b

146. QUESTION: Vesicles of golgi complex are formed by process of _____

A. Budding
B. Photosynthesis
C. Multiple fission
D. fusion

CORRECT ANSWER IS: Budding

147. QUESTION: _____ produces cell secretions.

A. Nusleus
B. Ribosomes
C. Mitochondria
D. RNA

CORRECT ANSWER IS: Ribosomes

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

148. QUESTION: _____ converts the secretions into finished product.

A. Budding
B. Ribosomes
C. Golgi bodies
D. Mitochondria

CORRECT ANSWER IS: Golgi bodies

149. QUESTION: Ribosomes are composed of _____ and _____.

A. RNA, DNA
B. RNA, Protein
C. Protein and DNA
D. None of the above

CORRECT ANSWER IS: RNA, Protein

150. QUESTION: _____ is the process of digestion of foreign particle by cell.

A. Endocytosis
B. Phagocytosis
C. Pinocytosis
D. All of the above

CORRECT ANSWER IS: Phagocytosis

151. QUESTION: Polysomes are formed by _____ and _____.

A. mRNA, DNA
B. DNA, Protein
C. mRNA, Protein
D. mRNA, Ribosomes

CORRECT ANSWER IS: mRNA, Ribosomes

152. QUESTION: Mesosomes are found in _____ cells.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Prokaryotic
B. Eukaryotic
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Prokaryotic

153. QUESTION: Vesicles of Golgi bodies are derived from _____.

A. RER
B. SER
C. Mitochondria
D. All of the above

CORRECT ANSWER IS: SER

154. QUESTION: Ribosomes are synthesized in _____.

A. Nucleus
B. Nucleolus
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Nucleolus

155. QUESTION: Amount of _____ and _____ is similar in ribosomes of eukaryotic cells.

A. RNA, Protein
B. Protein, DNA
C. DNA, RNA
D. None of the above

CORRECT ANSWER IS: RNA, Protein

156. QUESTION: In golgi bodies _____ are converted to glycolipids.

A. Proteins

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Vitamins
C. Carbohydrates
D. All of the above

CORRECT ANSWER IS: Carbohydrates

157. QUESTION: Fusion is a process which forms _____.

A. Golgi bodies
B. Cisternae
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Cisternae

158. QUESTION: Largest ribosomal unit sediments at _____.

A. 40S
B. 50S
C. 60S
D. 70S

CORRECT ANSWER IS: 60S

159. QUESTION: _____ controls the attachment of sub-units of ribosomoes.

A. Fe++
B. Mg++
C. Ca++
D. None of the above

CORRECT ANSWER IS: Mg++

160. QUESTION: There is no _____ in animal cells.

A. Plastids
B. Nucleus
C. Centriole

WWW.EASYMCQS.COM

D. All of the above

CORRECT ANSWER IS: Plastids

161. QUESTION: There are _____ number of microtubules in centriole.

A. 7
B. 8
C. 9
D. 10

CORRECT ANSWER IS: 9

162. QUESTION: In higher plants centrioles are _____.

A. Absent
B. Present
C. Present in few higher plants
D. Absent in few higher plants

CORRECT ANSWER IS: Absent

163. QUESTION: _____ controls the turgor of plant cells.

A. Mitochondria
B. Vacoule
C. Nucleous
D. Centriole

CORRECT ANSWER IS: Plastids

164. QUESTION: _____ is the characteristic product of peroxisomes.

A. H2O2
B. NO2
C. CO
D. All of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: H2O2

165. QUESTION: _____ controls the movement of amoeboid.

A. Microflaments
B. Microtubles
C. Intermediate filaments
D. None of the above

CORRECT ANSWER IS: Microflaments

166. QUESTION: Enzymes of lysosomes are synthesized by _____.

A. RER
B. SER
C. Both a & b
D. None of the above

CORRECT ANSWER IS: RER

167. QUESTION: Glyoxisomes are _____ in plants.

A. Absent
B. Present
C. Absent in few plants only
D. Present in few plants only

CORRECT ANSWER IS: Present

168. QUESTION: Proteins present in microtubules are called _____.

A. trypsin
B. Tubulin
C. Actin
D. All of the above

CORRECT ANSWER IS: Tubulin

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

169. QUESTION: Proteins present in microfilaments are _____ and _____.

A. Actin, Myosin
B. Myosin, Tubulin
C. Tubulin, Actin
D. None of the above

CORRECT ANSWER IS: Actin, Myosin

170. QUESTION: Mitochondrial infoldings are also called _____.

A. Cristae
B. Cisternae
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Cisternae

171. QUESTION: F1 Particles are of _____ shape.

A. Spherical
B. triangular
C. Circular
D. Knob-like

CORRECT ANSWER IS: Knob-like

172. QUESTION: F1 particles arises from _____.

A. Mitochondria Matrix
B. Outer membrane of mitochondria
C. Cristae
D. None of the above

CORRECT ANSWER IS: Cristae

173. QUESTION: Cilia are originated from _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Microfilaments
B. Intermediate filaments
C. Microtubules
D. All of the above

CORRECT ANSWER IS: Microtubules

174. QUESTION: Kerbs cycle takes place in _____.

A. Cristae
B. Mitochondrial matrix
C. outer membrane of mitochondria
D. All of the above

CORRECT ANSWER IS: All of the above

175. QUESTION: There are _____ number of tubules in each microtubule.

A. 2
B. 3
C. 4
D. 5

CORRECT ANSWER IS: 3

176. QUESTION: There are _____numbers of centrioles in a cell.

A. 2
B. 3
C. 4
D. 5

CORRECT ANSWER IS: 2

177. QUESTION: Formation of cilia controls by _____.

A. Centriole

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Mitochondria
C. Nucleous
D. Vacule

CORRECT ANSWER IS: Centriole

178. QUESTION: Mitochondria is self-replicating due to presence of _____.

A. DNA
B. Ribosomes
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Both a & b

179. QUESTION: Energy for cell function is produced in _____.

A. Nucleus
B. Mitochondria
C. Cytoplasam
D. All of the above

CORRECT ANSWER IS: Mitochondria

180. QUESTION: There are _____ numbers of membrane in a nuclear envelope.

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 2

181. QUESTION: Granum is of _____ color.

A. Yellow
B. Green
C. Black

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. Blue

CORRECT ANSWER IS: Green

182. QUESTION: _____ is the central atom of chlorophyll.

A. Fe++
B. Mg++
C. Ca++
D. All of the above

CORRECT ANSWER IS: Mg++

183. QUESTION: Leucoplasts is _____.

A. Green
B. Brown
C. Black
D. colorless

CORRECT ANSWER IS: Colorless

184. QUESTION: Thylakoid are surrounded by _____.

A. Stroma
B. Envelope
C. Granuma
D. All of the above

CORRECT ANSWER IS: Stroma

185. QUESTION: The membrane of nucleus is _____.

A. Absent
B. Well developed
C. Poorly developed
D. Rudimentary

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Absent

186. QUESTION: _____ stores the food of plant.

A. Chloroplast
B. Leucoplast
C. Choromoplasts
D. All of the above

CORRECT ANSWER IS: Leucoplast

187. QUESTION: Nature of enzymes of preoxisomes is _____.

A. Hydratases
B. Carboxylases
C. Oxidative
D. All of the above

CORRECT ANSWER IS: Oxidative

188. QUESTION: Cell stores _____and _____ intermediates in vacoule.

A. Water, protein
B. Water, metabolic
C. Metabolic, Protein
D. None of the above

CORRECT ANSWER IS: Water, metabolic

189. QUESTION: Granum is originated by arrangements of _____.

A. Envelope
B. Stroma
C. Thykaloid
D. All of the above

CORRECT ANSWER IS: Stroma

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

190. QUESTION: The green color of chloroplasts is due to _____.

A. chlorophyll
B. Choromophyll
C. Leucophyll
D. All of the above

CORRECT ANSWER IS: chlorophyll

191. QUESTION: The sunlight is trapped by _____ part of chloroplast.

A. Granum
B. Stroma
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Granum

192. QUESTION: Choromoplasts are present in _____ and _____.

A. Ripened fruit, Leaves
B. Ripened Fruit, Petals
C. Petals, leaves
D. None of the above

CORRECT ANSWER IS: Ripened Fruit, Petals

193. QUESTION: _____ facilitates the pollination.

A. Chromoplasts
B. Chloroplast
C. Leucoplasts
D. All of the above

CORRECT ANSWER IS: Chromoplasts

194. QUESTION: Leucoplasts are present in _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Roots
B. Stem
C. leaves
D. Flowers

CORRECT ANSWER IS: Roots

195. QUESTION: Number of nuclear pore are greater in _____.

A. Differentiated cell
B. Undifferentiated cell
C. Equal in both
D. None of the above

CORRECT ANSWER IS: Undifferentiated cell

196. QUESTION: Precursors of ribosomal sub-units are present in _____ region of nucleolus.

A. Peripheral
B. Centeral
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Peripheral

197. QUESTION: Glyoxisomes convert fatty acid into _____.

A. Proteins
B. Amines
C. Sugar
D. All of the above

CORRECT ANSWER IS: Sugar

198. QUESTION: Carbohydrates are obtained from fatty acid by _____.

A. Glycolysis

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Glyoxalate cycle
C. Cycle of kerbs
D. None of the above

CORRECT ANSWER IS: Glyoxalate cycle

199. QUESTION: Disease of Tay-Sach results in abnormal catabolism of _____.

A. Carbohydratas
B. Lipids
C. Proteins
D. None of the above

CORRECT ANSWER IS: Lipids

200. QUESTION: De-Duve discovered _____ and _____.

A. Lysosomes, Peroxisomes
B. Ribosomes, Peroxisomes
C. Ribosomes, Lysosomes
D. None of the above

CORRECT ANSWER IS: Lysosomes, Peroxisomes

201. QUESTION: The nature of enzymes is _____.

A. Fats
B. Carbohydrate
C. Vitamins
D. Proteins

CORRECT ANSWER IS: Proteins

202. QUESTION: Th function of enzymes is to speed up chemical _____.

A. Process
B. reaction
C. Both a & b

WWW.EASYMCQS.COM

D. None of the above

CORRECT ANSWER IS: reaction

203. QUESTION: Amylase is a kind of _____, found in saliva.

A. Enzymes
B. Coenzymes
C. Vitamins
D. None of the above

CORRECT ANSWER IS: Enzymes

204. QUESTION: _____ kinds of enzymes breaks down fats into molecules.

A. Amylase
B. Lipase
C. Nucleases
D. All of the above

CORRECT ANSWER IS: Lipase

205. QUESTION: Nucleases are the enzymes that cuts down _____.

A. Fats
B. Food
C. Vitamins
D. DNA or RNA

CORRECT ANSWER IS: DNA or RNA

206. QUESTION: Enzymes are composed of _____.

A. Amino Acids
B. Monosaccharides
C. disaccharides
D. None of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Amino Acids

207. QUESTION: _____ contains enzymes of photosynthesis.

A. Lecuplast
B. Chromoplast
C. Centriole
D. Chloroplast

CORRECT ANSWER IS: Chloroplast

208. QUESTION: Enzymes for respiration is found in _____.

A. Golgi complex
B. Ribosomes
C. Mitochondria
D. None of the above

CORRECT ANSWER IS: Mitochondria

209. QUESTION: Active sides of enzymes are _____.

A. Polar
B. Charged
C. Noncharged
D. Non-Polar

CORRECT ANSWER IS: Charged

210. QUESTION: Action of enzymes are _____.

A. Specific
B. General
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Specific

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

211. QUESTION: Enzymes molecules are _____ shaped.

A. Rod
B. Spiral
C. Globular
D. None of the above

CORRECT ANSWER IS: Globular

212. QUESTION: Enzymes are attached with _____ substance.

A. Reactant
B. Substrate
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Substrate

213. QUESTION: Enzyme is attached to substrate at _____.

A. Coenzymes
B. Cofactor
C. prosthetic group
D. Active site

CORRECT ANSWER IS: Active site

214. QUESTION: Bridge between substrate and enzymes are formed by _____.

A. Inhabitor
B. Co-factor
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Co-factor

215. QUESTION: The detachable co-factor is known as _____.

WWW.EASYMCQS.COM

A. Deactivator
B. Activator
C. Inhabitor
D. All of the above

CORRECT ANSWER IS: Activator

216. QUESTION: Nature of an activator is _____ ion.

A. Organic
B. Inorganic
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Inorganic

217. QUESTION: The inactive enzymes are _____.

A. Holoenzyme
B. Apoenzymes
C. Cofactor
D. All of the above

CORRECT ANSWER IS: Apoenzymes

218. QUESTION: Holoenzymes are the _____ enzymes.

A. Active
B. Inactive
C. Both a & b
D. None of the above

CORRECT ANSWER IS: Active

219. QUESTION: Holoenzymes = _____ + _____.

A. Apoenzymes, Cofactor

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Apoenzymes, only metal ion-activator
C. prosthetic group, metal ion-activator
D. None of the above

CORRECT ANSWER IS: Apoenzymes, Cofactor

220. QUESTION: Co-factor are consist of _____, _____ and _____.

A. Prosthetic group, metal ion-activator, coenzymes
B. Prosthetic group, Apoenzymes, Coenzymes
C. Metal ion-activator, Apoenzynmes, Coenzymes
D. None of the above

CORRECT ANSWER IS: Prosthetic group, metal ion-activator, coenzymes

221. QUESTION: Apoenzymes are _____ part of enzymes.

A. Protein
B. Non-Protein
C. Vitamins
D. None of the above

CORRECT ANSWER IS: Protein

222. QUESTION: Acording to ecological point of view fungi are _____

A. Decomposer
B. Producer
C. Reducer
D. None of the above

CORRECT ANSWER IS: Decomposer

223. QUESTION: Cell wall of fungi is composed of _____.

A. Chitin
B. Silica
C. Cellulose

WWW.EASYMCQS.COM

D. None of the above

CORRECT ANSWER IS: Chitin

224. QUESTION: _____ is called the body of fungi.

A. Rhizome
B. Trichome
C. Mycelium
D. None of the above

CORRECT ANSWER IS: Mycelium

225. QUESTION: Mycelium is composed of _____.

A. Rhizome
B. Hyphae
C. Trichome
D. Trachieds

CORRECT ANSWER IS: Hyphae

226. QUESTION: _____ contains septa.

A. Coenocytic Hyphae
B. Septate Hyphae
C. Non-septate hyphae
D. All of the above

CORRECT ANSWER IS: Septate Hyphae

227. QUESTION: _____ is called study of fungi.

A. Ecology
B. botony
C. Mycology
D. All of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Mycology

228. QUESTION: Kingdom of fungi is called _____.

A. Plantae
B. Monera
C. Fungi
D. Protista

CORRECT ANSWER IS: Fungi

229. QUESTION: Number of nuclei in each cell of septate hyphae are _____.

A. One or more than one
B. Two or more than two
C. Three or more than three
D. No cell

CORRECT ANSWER IS: One or more than one

230. QUESTION: Hyphae of fungi are _____.

A. Coenocytic
B. Septate
C. Non-septate
D. All of the above

CORRECT ANSWER IS: All of the above

231. QUESTION: Number of centrioles present in cells of fungi are _____.

A. 5
B. 6
C. 7
D. 8

CORRECT ANSWER IS: 8

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

232. QUESTION: According to mode of nutrition, fungi are _____.

A. Heterotrophs
B. Autotrophs
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Heterotrophs

233. QUESTION: Nuclei of fungi are _____.

A. Triploid
B. Tetrapolid
C. Diploid
D. Haploid

CORRECT ANSWER IS: Haploid

234. QUESTION: Fungi absorb food fromsubstratum by _____.

A. Hyphae
B. Tracheids
C. Roots
D. Rhizoids

CORRECT ANSWER IS: Hyphae

WWW.EASYMCQS.COM

235. QUESTION: Number of cells present in coenocytic hyphae are _____.

A. One or more than one
B. Two or more than two
C. Three or more than three
D. No cell

CORRECT ANSWER IS: One or more than one

236. QUESTION: Number of nuclei present in a cell of coenocytic hyphae are _____.

A. More than one
B. More than two
C. More than three No cell
d.

CORRECT ANSWER IS: More than one

237. QUESTION: Mitosis occuring in fungal cells is termed as _____.

A. Nuclear Mitosis
B. Simple Mitosis
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Nuclear Mitosis

238. QUESTION: Obligate parasites can grow on _____.

A. Culture medium
B. Living host
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Living host

239. QUESTION: _____ is the exampe of non-hyphal unicellular fungi.

A. Yeast
B. Morels
C. Mushroom
D. All of the above

CORRECT ANSWER IS: Yeast

240. QUESTION: Zygote of fungi are _____.

A. Triploid

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Tetrapolid
C. Diploid
D. Haploid

CORRECT ANSWER IS: Diploid

241. QUESTION: Pleurotus ostreatus is example of _____.

A. Decomposer fungi
B. Saprophytic fungi
C. Predator fungi
D. Parasytic fungi

CORRECT ANSWER IS: Predator fungi

242. QUESTION: Heterotrophic fungi are _____.

A. Decomposer
B. Saprophytes
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

243. QUESTION: Haustoria are characteristic feature of _____.

A. Decomposer fungi
B. Saprophytic fungi
C. Predator fungi
D. Parasytic fungi

CORRECT ANSWER IS: Parasytic fungi

244. QUESTION: Faculative parasites can grow on _____.

A. Culture medium
B. Living host
C. Both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. None of the above

CORRECT ANSWER IS: Both a and b

245. QUESTION: Anchoring fungi are termed as _____.

A. Rhizome
B. Rhizoids
C. Trichome
D. Trachieds

CORRECT ANSWER IS: Rhizoids

246. QUESTION: Food of oyster mushroom is _____.

A. Porotozoans
B. Poriferrans
C. Nematods
D. Arthopods

CORRECT ANSWER IS: Nematods

247. QUESTION: The alga in lichen is _____.

A. Green alga
B. Red alga
C. Brown alga
D. Golden alga

CORRECT ANSWER IS: Green alga

248. QUESTION: Mycelium penetrates soil in _____.

A. Endomycorrhizae
B. Ectomyccorhiza
C. Both a and b
D. None of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Both a and b

249. QUESTION: Fungi reproduce asexually by _____.

A. Budding
B. Fragmentation
C. Spore formation
D. All of the above

CORRECT ANSWER IS: All of the above

250. QUESTION: Constricting ring play an important role in _____.

A. Decomposition
B. Parasytism
C. Saprophytism
D. Predation

CORRECT ANSWER IS: Predation

251. QUESTION: Predator fungi fulfill their nitrogen requirments by _____.

A. Poriferrans
B. Wood
C. Arthopods
D. Nematodes

CORRECT ANSWER IS: Nematodes

252. QUESTION: Optimal habitat for fungi is _____.

A. Moist
B. Dry
C. Shady
D. None of the above

CORRECT ANSWER IS: Moist

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

253. QUESTION: Conidia are _____.

A. Sexual
B. Asexual
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Asexual

254. QUESTION: Fungal hyphae reproduce by _____.

A. Nuclear fusion
B. Cytoplasmic fusion
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

255. QUESTION: On the basis of number of chromosomes, ascospores are _____.

A. Hexaploid
B. Diploid
C. Triploid
D. Haploid

CORRECT ANSWER IS: Diploid

256. QUESTION: Spores are produced in _____.

A. Roots
B. Stem
C. Leaves
D. Sporangia

CORRECT ANSWER IS: Leaves

257. QUESTION: Fusion of cytoplasam is called _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Heterogamy
B. Homogamy
C. Karyogamy
D. Plasmogamy

CORRECT ANSWER IS: Heterogamy

258. QUESTION: Conidia are produced in _____.

A. Hyphae
B. Sporangia
C. Leaves
D. Conidiophores

CORRECT ANSWER IS: Conidiophores

259. QUESTION: Spores are produced by _____.

A. Asexual processes
B. Sexual processes
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Asexual processes

260. QUESTION: Fusion of nucleus is called as _____.

A. Heterogamy
B. Homogamy
C. Karyogamy
D. Plasmogamy

CORRECT ANSWER IS: Plasmogamy

261. QUESTION: Predator fungi fulfill their glucose requirments by _____.

A. Poriferrans

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Wood
C. Arthopods
D. Nematodes

CORRECT ANSWER IS: Wood

262. QUESTION: Lichen is a symbiotic relationship between _____.

A. Two fungi
B. Fungi and alga
C. Two algae
D. Fungi and roots of plant

CORRECT ANSWER IS: Fungi and alga

263. QUESTION: Surplus food of fungi stores as _____.

A. Glycogen
B. Lipid droplets
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

264. QUESTION: Hyphae do not penetrates the outer cell of plant root in _____.

A. Endomycorrhizae
B. Ectomyccorhiza
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Ectomyccorhiza

265. QUESTION: On basis of number of chromosomes, spores are _____.

A. Triploid
B. Tetrapolid
C. Diploid

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. Haploid

CORRECT ANSWER IS: Triploid

266. QUESTION: On the basis of number of chromosomes, basidiospores are _____.

A. Triploid
B. Tetrapolid
C. Diploid
D. Haploid

CORRECT ANSWER IS: Haploid

267. QUESTION: Hyphae are separated from sporangia by _____.

A. Septa
B. Stem
C. Roots
D. Leaves

CORRECT ANSWER IS: Septa

268. QUESTION: Absorptive function of mycorrhiza is provided by _____.

A. Fungi
B. Roots of vascular plants
C. Algae
D. None of the above

CORRECT ANSWER IS: Fungi

269. QUESTION: Asymmetrical division takes place in _____.

A. Conidia formation
B. Fragmentation
C. Spore formation
D. Budding

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Fragmentation

270. QUESTION: Symbiotic relationship is between _____ in mycorrhiza.

A. Fungi and roots of plants
B. Fungi and alga
C. Two fungi
D. Two alga

CORRECT ANSWER IS: Fungi and roots of plants

271. QUESTION: Hyphae penetrates the outer cell of plant root in _____.

A. Endomycorrhizae
B. Ectomyccorhiza
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Endomycorrhizae

272. QUESTION: Breaking of _____ takes place in fragmentation.

A. Mycelium
B. Hyphae
C. Sporangia
D. Conidiophores

CORRECT ANSWER IS: Conidiophores

273. QUESTION: Heterokaryotic fungal hyphae have _____ nuclei of different genetic types.

A. 1
B. 2
C. 4
D. 6

CORRECT ANSWER IS: 1

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

274. QUESTION: Hypae of bracket fungi are _____.

A. Multi-nucleated
B. Non-Septate
C. Sptate and dikaryotic
D. both a and b

CORRECT ANSWER IS: both a and b

275. QUESTION: Puccinia are included in _____ fungi.

A. Rust
B. Mold
C. Bracket
D. Smut

CORRECT ANSWER IS: Smut

276. QUESTION: Fungi are classified into _____ main groups.

A. 6
B. 7
C. 8
D. 9

CORRECT ANSWER IS: 6

277. QUESTION: Example of zygomycota is _____.

A. Puff balls
B. Pilobolus
C. Molds
D. All of the above

CORRECT ANSWER IS: Pilobolus

278. QUESTION: Hyphae of pilobolus are _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Multi-nucleated
B. Non-Septate
C. Sptate and dikaryotic
D. both a and b

CORRECT ANSWER IS: Multi-nucleated

279. QUESTION: Morels reproduce asexually by _____.

A. Ascospores
B. Conidia
C. Non-motile spores
D. Basidiospores

CORRECT ANSWER IS: Ascospores

280. QUESTION: Smuts reproduce asexually by _____.

A. Conidia
B. Asexua reproduction is uncommon
C. Ascospores
D. Non-motile spores

CORRECT ANSWER IS: Ascospores

281. QUESTION: Shape of basidiomycota is _____.

A. Rod-Shaped
B. Spherical
C. Club-shaped
D. Irregular

CORRECT ANSWER IS: Rod-Shaped

282. QUESTION: Example of Deuteromycota is _____.

A. Morels

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Mushrooms
C. Rhizopus
D. Penicillium

CORRECT ANSWER IS: Morels

283. QUESTION: Asospores are produced inside _____.

A. Asci
B. Sporangia
C. Gametangia
D. All of the above

CORRECT ANSWER IS: Gametangia

284. QUESTION: Fermentation is the function of _____.

A. Mushrooms
B. Rhizopus
C. Yeast
D. None of the above

CORRECT ANSWER IS: Mushrooms

285. QUESTION: Rhizopus reproduces asexually by _____.

A. Basidiospores
B. Non motile spores
C. Conidia
D. Ascospores

CORRECT ANSWER IS: Basidiospores

286. QUESTION: Rhizopus reproduces sexually by _____.

A. Ascospores
B. Zygospores
C. Basidiospores

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. Does not reproduce sexually

CORRECT ANSWER IS: Zygospores

287. QUESTION: _____ are macroscopic fruiting bodies.

A. Ascus
B. Acocarps
C. Ascospores
D. None of the above

CORRECT ANSWER IS: Ascus

288. QUESTION: Hyphae of yeast are _____.

A. Multi-nucleated
B. Non-Septate
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

289. QUESTION: Example of Basidiomycota is _____.

A. Mushrooms
B. Rhizopus
C. Yeast
D. None of the above

CORRECT ANSWER IS: Mushrooms

290. QUESTION: Example o ascomycota is _____.

A. Aspergillus
B. Rhizopus
C. Smuts
D. Morels

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Smuts

291. QUESTION: Aspergillus reproduce asexually by _____.

A. Conidia
B. Ascospores
C. Non-motile spores
D. Basidiospores

CORRECT ANSWER IS: Conidia

292. QUESTION: The greatest group of fungi is _____.

A. Zygomycota
B. Ascomycota
C. Basidiospores
D. All of the above

CORRECT ANSWER IS: Basidiospores

293. QUESTION: Basidiospores are produced by the process of _____.

A. Meiosis
B. Binary fission
C. Mitosis
D. All of the above

CORRECT ANSWER IS: Meiosis

294. QUESTION: Truffles reproduce sexually by _____.

A. Zygospores
B. Basidiospores
C. Ascospores
D. None of the above

CORRECT ANSWER IS: Basidiospores

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

295. QUESTION: Rusts reproduce sexually by _____.

A. Zygospores
B. Basidiospores
C. Ascospores
D. Does not reproduce sexually

CORRECT ANSWER IS: Does not reproduce sexually

296. QUESTION: Ascospores are produced by the process of _____.

A. Meiosis
B. Binary fission
C. Mitosis
D. Multiple fission

CORRECT ANSWER IS: Meiosis

297. QUESTION: Classification of fungi is primarily based on _____.

A. Type of reproductive system
B. Mode of locomotion
C. Structure of hyphae
D. None of the above

CORRECT ANSWER IS: Structure of hyphae

WWW.EASYMCQS.COM

298. QUESTION: _____ is followed by meosis in basidiomycota.

A. Mitosis
B. Cytoplasmic fusion
C. Nuclear fusion
D. Germination

CORRECT ANSWER IS: Nuclear fusion

299. QUESTION: Alterneria reporduce sexually by _____.

Download PDF Books: WWW.EasyMCQs.Com

A. Morels
B. Rhizopus
C. Mushrooms
D. Penicillium

CORRECT ANSWER IS: Morels

300. QUESTION: _____ basidiospores are produced on each basidium.

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 4

301. QUESTION: _____ ascopores are presented in each ascus-

A. 4
B. 5
C. 6
D. 7

CORRECT ANSWER IS: 6

302. QUESTION: _____ causes damage to timber of living trees.

A. Rhotorula
B. Shelf fungi
C. Barcket fungi
D. None of the above

CORRECT ANSWER IS: Rhotorula

303. QUESTION: Histoplasmosis is an infection of _____.

A. Eyes

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Skin
C. Lungs
D. All of the above

CORRECT ANSWER IS: Lungs

304. QUESTION: Fungal growth is inhibited by _____.

A. Ergotine
B. Lovastatin
C. Cyclosporine
D. Grieseofulvin

CORRECT ANSWER IS: Cyclosporine

305. QUESTION: _____ disease is caused by fungi in plants.

A. Red root of sugar cane
B. Powdery mildews
C. both a and b
D. None of the above

CORRECT ANSWER IS: Red root of sugar cane

306. QUESTION: _____ is superficial.

A. Athletes foot
B. Erggotism
C. Ringworm
D. All of the above

CORRECT ANSWER IS: Ringworm

307. QUESTION: _____ is used as antibiotic.

A. Lovastatin
B. Cyclosporine
C. Ergotine

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. Penicillium

CORRECT ANSWER IS: Lovastatin

308. QUESTION: _____ is used in organ transplantation.

A. Lovastatin
B. Cyclosporine
C. Ergotine
D. Penicillium

CORRECT ANSWER IS: Ergotine

309. QUESTION: _____ is used for treatment of headache.

A. Lovastatin
B. Cyclosporine
C. Ergotine
D. Penicillium

CORRECT ANSWER IS: Penicillium

310. QUESTION: Aflatoxins are produced by _____.

A. Yeast
B. Mushrooms
C. Aspergillus
D. Truffles

CORRECT ANSWER IS: Truffles

311. QUESTION: Candidosis is caused by _____.

A. Rust
B. Yeast
C. Morel
D. Smut

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Rust

312. QUESTION: _____ were firstly studied by genetic engineers.

A. Smut
B. Rhizopus
C. Yeast
D. Mushrooms

CORRECT ANSWER IS: Smut

313. QUESTION: _____ is used for lowering blood cholesterol.

A. Lovastatin
B. Cyclosporine
C. Ergotine
D. Penicillium

CORRECT ANSWER IS: Cyclosporine

314. QUESTION: _____ is used for producing soya sauce.

A. Yeast
B. Morel
C. Aspergillus
D. Penicillium

CORRECT ANSWER IS: Yeast

315. QUESTION: _____ are edible fungi.

A. Truffles
B. Mushrooms
C. Morels
D. All of the above

CORRECT ANSWER IS: Mushrooms

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

316. QUESTION: Shape of mycelial colony of pencillium is _____.

A. Rod shaped
B. Circular
C. Irregular
D. All of the above

CORRECT ANSWER IS: Irregular

317. QUESTION: On the basis of mode of nutrition, pencillium are _____.

A. Saprophytes
B. Parasites
C. Predators
D. None of the above

CORRECT ANSWER IS: Saprophytes

318. QUESTION: _____ are example of penicillium.

A. Brown molds
B. Golden molds
C. Blue molds
D. Black molds

CORRECT ANSWER IS: Brown molds

319. QUESTION: Ustilago are included in _____.

A. Smut
B. Mold
C. Rust
D. Bracket

CORRECT ANSWER IS: Smut

320. QUESTION: Arrangement of coindia of penicillium is _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Scale like
B. Tad pole like
C. Blush like
D. No arrangement

CORRECT ANSWER IS: Blush like

321. QUESTION: _____ is used in production of bread.

A. Penicillium
B. Yeast
C. Morel
D. All of the above

CORRECT ANSWER IS: Penicillium

322. QUESTION: Egg evolved due to heterogamy is _____.

A. Partially Motile
B. Motile
C. Non-Motile
D. None of the above

CORRECT ANSWER IS: Non-Motile

323. QUESTION: There are _____ Number of chromosomes in ospore.

A. n
B. 2n
C. 4n
D. 8n

CORRECT ANSWER IS: 2n

324. QUESTION: Foliar sporangia are ttached to _____ part of plant.

A. Flower

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Stem
C. Leaves
D. Root

CORRECT ANSWER IS: Leaves

325. QUESTION: Tracheophytes include _____.

A. Mosses
B. Horse tail
C. Horn eorts
D. None of the above

CORRECT ANSWER IS: Horse tail

326. QUESTION: Sphenopsida includes _____.

A. Angiospermae
B. Gymnospermae
C. Both a and b
D. None of the above

CORRECT ANSWER IS: None of the above

327. QUESTION: Circinate vernation is foun in _____.

A. Pteropsdia
B. Lycopsida
C. Sphenopsida
D. All of the above

CORRECT ANSWER IS: Pteropsdia

328. QUESTION: Transportation takes place in Bryophates through _____.

A. Phloem
B. Diffiusion
C. Xylem

WWW.EASYMCQS.COM

D. None of the above

CORRECT ANSWER IS: Diffiusion

329. QUESTION: The structure of protonema is like the structure of _____.

A. An yeast
B. An agla
C. A fungus
D. A mushroom

CORRECT ANSWER IS: An agla

330. QUESTION: The _____ process forms spores.

A. Binary Fission
B. Multiple fission
C. Mitosis
D. Meiosis

CORRECT ANSWER IS: Meiosis

331. QUESTION: Paraphyses are _____.

A. Adventitious root
B. Underground stem
C. Sterile hairs
D. lealets

CORRECT ANSWER IS: Sterile hairs

332. QUESTION: In Bryophytes, male sex cells are known as _____.

A. Archegonia
B. Antherozoids
C. Antheridia
D. None of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Antherozoids

333. QUESTION: In Bryophytes, gametophyte genertion is _____.

A. Dominant
B. Predominant
C. Recessive
D. None of the above

CORRECT ANSWER IS: Dominant

334. QUESTION: Abundance of ferns is found in _____.

A. Water bodies
B. Plains
C. Shades
D. Tropics

CORRECT ANSWER IS: Tropics

335. QUESTION: Total Number of Chromosomes in functionl megaspore are _____.

A. n
B. 0.5n
C. 2n
D. 4n

CORRECT ANSWER IS: n

336. QUESTION: Male gametophyte is produced from _____.

A. Oospore
B. Microspore
C. Megaspore
D. None of the above

CORRECT ANSWER IS: Microspore

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

337. QUESTION: Shape of prothallus looks like _____.

A. Lung
B. Heart
C. Kidney
D. Liver

CORRECT ANSWER IS: Heart

338. QUESTION: Dispersion of spores involves contraction of _____.

A. Annulus
B. Sporophylls
C. Ligule
D. Stomium

CORRECT ANSWER IS: Annulus

339. QUESTION: Functional megaspores within the megasporangium are _____.

A. 1
B. 2
C. 6
D. 8

CORRECT ANSWER IS: 1

340. QUESTION: The _____structure is absent in Gymnosperm.

A. Megasporophylls
B. Ovule
C. Ovary
D. None of the above

CORRECT ANSWER IS: Ovary

341. QUESTION: Pollen are transported in pinus by the means of _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Water
B. Wind
C. Insects
D. All of the above

CORRECT ANSWER IS: Wind

342. QUESTION: prothallus plant body is present in _____.

A. Gametophyte generation
B. Sporophyte generation
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Gametophyte generation

343. QUESTION: Oosphere of Adiantum is present in _____.

A. Venter
B. Stalk
C. Ligule
D. Stigma

CORRECT ANSWER IS: Venter

344. QUESTION: Protected covering Ovule is provided by _____.

A. Sporophylls
B. Capsule
C. Integument
D. Ramenta

CORRECT ANSWER IS: Integument

345. QUESTION: Growth of prothallus takes place at its _____.

A. Medial end

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Lateral end
C. Anterior end
D. Posterior end

CORRECT ANSWER IS: Anterior end

346. QUESTION: Female gametophyte is formed from functional megaspore by process of _____.

A. Meiosis
B. Mitosis
C. Budding
D. None of the above

CORRECT ANSWER IS: Mitosis

347. QUESTION: In monoecious plant, both male and femle sex organs appear on _____.

A. Same Plant
B. Different Plant
C. Absent
D. Both a and b

CORRECT ANSWER IS: Same Plant

348. QUESTION: Pollen is captured by megasporangium by modification of its _____.

A. Proximal end
B. Distal end
C. Dorsal end
D. Ventral end

CORRECT ANSWER IS: Distal end

349. QUESTION: Joints are present in _____.

A. Pteropsdia
B. Lycopsida
C. Sphenopsida

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. None of the above

CORRECT ANSWER IS: Sphenopsida

350. QUESTION: Function of rhizome is _____.

A. Anchorage
B. Absorption
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

351. QUESTION: Vascular tissues of Psilopsida is _____.

A. Absent
B. Narrow
C. Wide
D. Rudimentary

CORRECT ANSWER IS: Narrow

352. QUESTION: In overtopping the pattern of development of various branches is _____.

A. Absent
B. Equal
C. Unequal
D. None of the above

CORRECT ANSWER IS: Unequal

353. QUESTION: Sorus is a group of _____.

A. Sporophylls
B. Sporangia
C. Spores
D. Sporangiophore

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Sporangia

354. QUESTION: Webbing is done by a sheet of _____.

A. Chlorenchymal cells
B. Parenchmyal cells
C. Sclerenchymal cells
D. All of the above

CORRECT ANSWER IS: Parenchmyal cells

355. QUESTION: Colour of gametophyte generation of tmesipeteris is _____.

A. Green
B. Brown
C. Black
D. Colourless

CORRECT ANSWER IS: Colourless

356. QUESTION: Protection of stem is provided by _____.

A. Cuticle
B. Ligule
C. Capsule
D. Ramenta

CORRECT ANSWER IS: Ramenta

357. QUESTION: Single undivided vein is present in _____.

A. Microphyllous leaves
B. Megaphyllous Leaves
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Microphyllous leaves

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

358. QUESTION: Most primitive leaf was evolved in _____.

A. Mosses
B. Loverworts
C. Club mosses
D. Hornworts

CORRECT ANSWER IS: Club mosses

359. QUESTION: End of sporophyte generation takes place at _____.

A. Gametes
B. Spore mother cells
C. Gametophyte
D. Oopores

CORRECT ANSWER IS: Spore mother cells

360. QUESTION: Mycorrhizal association is found between _____.

A. Fungi and Agla
B. Trachcophtes and Agla
C. Trachreophyte and fungi
D. None of the above

CORRECT ANSWER IS: Trachreophyte and fungi

361. QUESTION: After fertilization ovule is converted to _____.

A. Seed
B. Zygot
C. Embryo
D. Egg

CORRECT ANSWER IS: Seed

362. QUESTION: Nucleus is present in _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Ovule
B. Ovary
C. Sepal
D. Stamen

CORRECT ANSWER IS: Ovule

363. QUESTION: Number of cells in male gametophyte of angiosperm are _____.

A. 3
B. 5
C. 7
D. 9

CORRECT ANSWER IS: 3

364. QUESTION: Number of cells in female gametophyte of angiosperm are _____.

A. 3
B. 5
C. 7
D. 9

CORRECT ANSWER IS: 7

365. QUESTION: Number of chromosomes in endosperm are _____.

A. n
B. 2n
C. 3n
D. 4n

CORRECT ANSWER IS: 3n

366. QUESTION: Sepals of rose family are _____.

A. United at base

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. United at apex
C. Free
D. None of the above

CORRECT ANSWER IS: United at base

367. QUESTION: Number of stamens in didynamous condition is _____.

A. 2
B. 4
C. 6
D. 8

CORRECT ANSWER IS: 4

368. QUESTION: Seeds are formed in _____.

A. Angiospermae
B. Gymnospermae
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

369. QUESTION: Fruits are formed from _____.

A. Ovule
B. Ovary
C. Seeds
D. Cones

CORRECT ANSWER IS: Ovary

370. QUESTION: Angiosperms produce _____.

A. Fruits
B. Seeds
C. Flowers

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. All of the above

CORRECT ANSWER IS: All of the above

371. QUESTION: Integuments of ovule are converted to form _____.

A. Nucleus
B. Testa
C. Protonema
D. Endosperm

CORRECT ANSWER IS: Testa

372. QUESTION: Endosperm forms as a result of _____.

A. Fertilization
B. Double Fertilization
C. Metosis
D. Meosis

CORRECT ANSWER IS: Double Fertilization

373. QUESTION: The anterior petals of fabaceae are known as _____.

A. Wings
B. Standard
C. Carina
D. Vexillum

CORRECT ANSWER IS: Carina

374. QUESTION: Tobacco is obtained from _____ family.

A. Fabaceae
B. Poacae
C. Solanaceae
D. Rosacae

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Solanaceae

375. QUESTION: Pollan grains are present inside the _____.

A. Testa
B. Fruit
C. Embryo sac
D. Pollan sac

CORRECT ANSWER IS: Pollan sac

376. QUESTION: Floret consist of _____.

A. Palea
B. Flower
C. Lemma
D. All of Them

CORRECT ANSWER IS: All of Them

377. QUESTION: Skin Diseases are cured by using leaves of _____.

A. Cassia Obovata
B. Cassia alata
C. Cassia senna
D. Cassia fistula

CORRECT ANSWER IS: Cassia alata

378. QUESTION: Life on land is better adapted in _____.

A. Liverworts
B. Mosses
C. Ferns
D. Hornworts

CORRECT ANSWER IS: Hornworts

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

379. QUESTION: Two kinds of spores are produced by the phenomenon of _____.

A. Homospory
B. Heterospory
C. Meiosis
D. Mitosis

CORRECT ANSWER IS: Heterospory

380. QUESTION: One kind of spores are produced by the phenomenon of _____.

A. Homospory
B. Heterospory
C. Meiosis
D. Mitosis

CORRECT ANSWER IS: Homospory

381. QUESTION: Oospore is formed as a result of _____.

A. Fertilization
B. Meiosis
C. Mitosis
D. Germination

CORRECT ANSWER IS: Fertilization

382. QUESTION: Haploid choromosomes ar found in _____.

A. Megaspore
B. Microspore
C. Prothallus
D. All of Them

CORRECT ANSWER IS: Prothallus

383. QUESTION: False indusim is present in _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Filicineae
B. Angiospermae
C. Gynospermae
D. Mimosaceae

CORRECT ANSWER IS: Filicineae

384. QUESTION: Spikelets are arranged along _____.

A. Awns
B. Glumes
C. Rachilla
D. Palea

CORRECT ANSWER IS: Rachilla

385. QUESTION: Number of choromosomes in secondary nucleus of female gametophyte of angiosperm are _____.

A. n
B. 2n
C. 3n
D. 4n

CORRECT ANSWER IS: 2n

386. QUESTION: In acacia family stipules are modified to _____.

A. Thorns
B. Petiole
C. Legume
D. Pedicel

CORRECT ANSWER IS: Thorns

387. QUESTION: Chief food stuff of mankind is obtained from _____ family.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Solanaceae
B. Gramineae
C. Fabaceae
D. All of Them

CORRECT ANSWER IS: Gramineae

388. QUESTION: Male gametophyte of the angiosperm is _____.

A. Microspore
B. Embryo Sac
C. Germinate Pollan grain
D. Anther

CORRECT ANSWER IS: Germinate Pollan grain

389. QUESTION: Nutritionally self-supporting generation of moss is _____.

A. Gametophyte
B. Sporophyte
C. Both a and b
D. None of them

CORRECT ANSWER IS: Both a and b

390. QUESTION: A heterosporous plant gives grain to _____.

A. Male gametophyte
B. Female gametophyte
C. Both a and b
D. None of them

CORRECT ANSWER IS: Both a and b

391. QUESTION: Symmetry of adult ECHINODERM is _____.

A. Asymmetrical
B. Radial

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. Bilateral
D. None of the above

CORRECT ANSWER IS: Radial

392. QUESTION: Parazoa contains _____.

A. Organ System
B. Multicellular body
C. Tissues
D. None of the above

CORRECT ANSWER IS: Multicellular body

393. QUESTION: Body cavity of deuterostomes is formed from _____.

A. Ectoderm
B. Mesoderm
C. Endoderm
D. None of the above

CORRECT ANSWER IS: None of the above

394. QUESTION: In protostome, blastopore forms _____.

A. Stomach
B. Mouth
C. Anus
D. Oesophagus

CORRECT ANSWER IS: Mouth

395. QUESTION: Largest animals are included in _____.

A. Phylum Mollusca
B. Phylum Chordata
C. Phylum anthropoda
D. None of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Phylum Chordata

396. QUESTION: gametes produced in parazoa are _____.

A. Large
B. Motile
C. Similar
D. Dissimilar

CORRECT ANSWER IS: Similar

397. QUESTION: Metazoa contains _____.

A. Organ System
B. Multicellular body
C. Tissues
D. All of them

CORRECT ANSWER IS: All of them

398. QUESTION: Animals with radial symmetry are _____.

A. Diploblastic
B. Triploblstic
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Diploblastic

399. QUESTION: Simplest of EUMETAZOA are _____.

A. Cnidaria
B. Porifera
C. Protozoa
D. Hemichordata

CORRECT ANSWER IS: Cnidaria

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

400. QUESTION: Simplest of organism are included in _____.

A. Cnidaria
B. Porifera
C. Nematoda
D. None of the above

CORRECT ANSWER IS: Porifera

401. QUESTION: In deuterotomes, blastpore forms _____.

A. Stomach
B. Mouth
C. Anus
D. Oesophagus

CORRECT ANSWER IS: Anus

402. QUESTION: Animals with bilateral symmetry are _____.

A. Diploblastic
B. Triploblstic
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Diploblastic

403. QUESTION: Symmetry of Larvae of echinoderm is _____.

A. Radial
B. Bilateral
C. Asymmetrical
D. None of the above

CORRECT ANSWER IS: Radial

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

404. QUESTION: Transpoprt in diploblast takes place by _____.

A. Blood Vessel
B. Diffiusion
C. Lymph Vessele
D. All of them

CORRECT ANSWER IS: Diffiusion

405. QUESTION: Cleavage is radial in _____.

A. Proterostomes
B. Deuterostomes
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Deuterostomes

406. QUESTION: Cleavage is spiral in _____.

A. Proterostomes
B. Deuterostomes
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Proterostomes

WWW.EASYMCQS.COM

407. QUESTION: Mouth of diploblast performs _____ operations.

A. Ingestion
B. Excretion
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

408. QUESTION: Centeral nervous system in diploblasts is _____.

Download PDF Books: WWW.EasyMCQs.Com

A. Well developed
B. Absent
C. Poorly developed
D. None of the above

CORRECT ANSWER IS: Absent

409. QUESTION: Reproductive system is eveloved from _____.

A. Mesoglea
B. Mesoderm
C. Endoderm
D. Ectoderm

CORRECT ANSWER IS: Mesoderm

410. QUESTION: Integumentary system is eveloved from _____.

A. Mesoglea
B. Mesoderm
C. Endoderm
D. Ectoderm

CORRECT ANSWER IS: Ectoderm

411. QUESTION: Body cavity of proterostomes is formed from _____.

A. Ectoderm
B. Mesoderm
C. Endoderm
D. None of the above

CORRECT ANSWER IS: Mesoderm

412. QUESTION: Shape of digestive system of triploblast is _____.

A. Scale-Like

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Sac-Like
C. Coild
D. Tube-Like

CORRECT ANSWER IS: Tube-Like

413. QUESTION: Liver is evolved from _____.

A. Ectoderm
B. Mesoderm
C. Endoderm
D. None of the above

CORRECT ANSWER IS: Endoderm

414. QUESTION: Shape of digestive system of diploblast is _____.

A. Scale-Like
B. Sac-Like
C. Coild
D. Tube-Like

CORRECT ANSWER IS: Sac-Like

415. QUESTION: Mesoglea is found in _____.

A. Triploblast
B. Diploblasts
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Diploblasts

416. QUESTION: Usually mesoglea is _____ cellular.

A. Uni
B. Non

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. Multi
D. None of the above

CORRECT ANSWER IS: Non

417. QUESTION: Cavity of diploblasts is termed as _____.

A. Gastrovascular cavity
B. Buccal cavity
C. Coelom
D. Body Cavity

CORRECT ANSWER IS: Gastrovascular cavity

418. QUESTION: Sponge is a _____.

A. Parazoan
B. Protozoan
C. Metazoan
D. None of the above

CORRECT ANSWER IS: Parazoan

419. QUESTION: Flame cells are present in _____.

A. Coelomates
B. Acoelomates
C. Pseducoelomates
D. None of the above

CORRECT ANSWER IS: Acoelomates

420. QUESTION: Nervous system of acoelomates is _____.

A. Well developed
B. Absent
C. Poorly developed

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. Rudimentary

CORRECT ANSWER IS: Well developed

421. QUESTION: Mouth of triploblasts is present at _____.

A. Medial end
B. Lateral end
C. Posterior end
D. Anterior end

CORRECT ANSWER IS: Anterior end

422. QUESTION: Pseudocoelom is bounded externally by _____.

A. Mesoderm
B. Ectoderm
C. Muscles
D. None of the above

CORRECT ANSWER IS: Muscles

423. QUESTION: Pseudocoelom is bounded internally by _____.

A. Cuticle of intestine
B. Ectoderm
C. Muscles
D. None of the above

CORRECT ANSWER IS: Cuticle of intestine

424. QUESTION: Pseudocoelom has developed from _____.

A. Blastocoel
B. Endoderm
C. Ectoderm
D. Mesoderm

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Blastocoel

425. QUESTION: Choanoderm is _____ layer.

A. Inner
B. Outer
C. Middle
D. None of the above

CORRECT ANSWER IS: Inner

426. QUESTION: Pseudocoelom is the space between _____ and _____.

A. Ectoderm, Mesoderm
B. Ectoderm, Endoderm
C. Digestive Tube, body wall
D. None of the above

CORRECT ANSWER IS: Digestive Tube, body wall

427. QUESTION: Anus of triploblasts is present at _____ end.

A. Anterior
B. Medial
C. Posterior
D. Lateral

CORRECT ANSWER IS: Posterior

428. QUESTION: Pinacoderm is _____ layer.

A. Inner
B. Outer
C. Middle
D. None of the above

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Outer

429. QUESTION: Coelom is present between _____ and _____.

A. Ectoderm, Endoderm
B. Body wall, alimentary canal
C. Body wall, digestive tube
D. Body wall, ectoderm

CORRECT ANSWER IS: Body wall, alimentary canal

430. QUESTION: Visceral mesoderm covers _____.

A. Body wall
B. Alimentary canal
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Alimentary canal

431. QUESTION: Parietal mesoderm underlines _____.

A. Body wall
B. Alimentary canal
C. Viscera
D. None of the above

CORRECT ANSWER IS: Body wall

432. QUESTION: Cavity of parazoans is termed as _____.

A. Enteron
B. Coelem
C. Pseducoelom
D. Spongocoel

CORRECT ANSWER IS: Spongocoel

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

433. QUESTION: Gemmules are _____.

A. Hermaphrodites
B. Unisexual
C. Internal buds
D. External buds

CORRECT ANSWER IS: Internal buds

434. QUESTION: Choanocytes are _____ cells.

A. Collar
B. Ciliated
C. Pseudopodial
D. Flagellated

CORRECT ANSWER IS: Collar

435. QUESTION: Function of choanocytes is _____.

A. Offense
B. Egestion
C. Ingestion
D. Defense

CORRECT ANSWER IS: Ingestion

436. QUESTION: Poriferas reproduced asexually by _____.

A. Binary fission
B. Multiple fission
C. Budding
D. None of the above

CORRECT ANSWER IS: Budding

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

437. QUESTION: Water enter in sponges through _____.

A. Mouth
B. Anus
C. Osculum
D. Ostia

CORRECT ANSWER IS: Ostia

438. QUESTION: Water excretes in sponges through _____.

A. Mouth
B. Anus
C. Osculum
D. Ostia

CORRECT ANSWER IS: Osculum

439. QUESTION: Spicule may be _____.

A. Silicious
B. Calcareous
C. Both a and b
D. None of the above

CORRECT ANSWER IS: Both a and b

440. QUESTION: Skeleton of sycon is formed by _____.

A. Spongecoel
B. Spicule
C. Choanoocytes
D. Carbonates of lime

CORRECT ANSWER IS: Carbonates of lime

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

441. QUESTION: Enteron is a _____.

A. Body Cavity
B. Digestive cavity
C. Both a and b
D. None of them

CORRECT ANSWER IS: Both a and b

442. QUESTION: Protandrous are _____.

A. External Buds
B. Internal Buds
C. Unisexual
D. Hermaphrodites

CORRECT ANSWER IS: Hermaphrodites

443. QUESTION: _____ Is included in the evolution of Nematocysts.

A. Mesoderm
B. Mesoglea
C. Endoderm
D. Ectoderm

CORRECT ANSWER IS: Ectoderm

444. QUESTION: Cniocytes are present in _____.

A. Coelonterata
B. Mollusca
C. Porifera
D. Platyhelminthes

CORRECT ANSWER IS: Coelonterata

445. QUESTION: _____ is increased by cnidocytes.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Pinacocytes
B. Flame cell
C. Choanocytes
D. Nematocytes

CORRECT ANSWER IS: Nematocytes

446. QUESTION: _____ forms exoskeletton of coelenterates.

A. Mesoderm
B. Mesoglea
C. Endoderm
D. Ectoderm

CORRECT ANSWER IS: Ectoderm

447. QUESTION: Exoskeletton of coelenterates is made up of _____.

A. SiO2
B. CaCO3
C. Ca(HCO3)2
D. None of them

CORRECT ANSWER IS: CaCO3

448. QUESTION: Gonads are present in _____.

A. Medusae
B. Polyp
C. Both a and b
D. None of them

CORRECT ANSWER IS: Medusae

449. QUESTION: Mouth ofHydra performs the function of _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Ingestion
B. Digestion
C. Excretion
D. Both a and c

CORRECT ANSWER IS: Both a and c

450. QUESTION: _____ forms the coral reefs.

A. Coelonterata
B. Mollusca
C. Porifera
D. Platyhelminthes

CORRECT ANSWER IS: Coelonterata

451. QUESTION: Body of flatworms is compressed _____.

A. Anteromedially
B. Posterolaterally
C. Dorsoventrally
D. Ventrodorsally

CORRECT ANSWER IS: Dorsoventrally

452. QUESTION: Polyps performe function of _____.

A. Circulation
B. Respiration
C. Excretion
D. Nutrition

CORRECT ANSWER IS: Nutrition

453. QUESTION: _____ is the cause of circulation in coelenterates.

A. Lymph Vessels

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Blood Vessels
C. Diffusion
D. Both a and b

CORRECT ANSWER IS: Diffusion

454. QUESTION: Diploid generation of coelonterata are _____.

A. Polyps
B. Medusae
C. Both a and b
D. None of them

CORRECT ANSWER IS: Both a and b

455. QUESTION: Nematocyst performs the function of _____.

A. Offense
B. Defense
C. Both a and b
D. None of them

CORRECT ANSWER IS: Both a and b

456. QUESTION: Individual member of Coelenterate colony is termed as _____.

A. Polyps
B. Medusae
C. Both a and b
D. Zooid

CORRECT ANSWER IS: Zooid

457. QUESTION: Gonozooids reproduces _____.

A. Asexually
B. Sexually

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. Both a and b
D. None of them

CORRECT ANSWER IS: Asexually

458. QUESTION: Blastostyle reproduces _____.

A. Asexually
B. Sexually
C. Both a and b
D. None of them

CORRECT ANSWER IS: Both a and b

459. QUESTION: Gastrozoids reproduces _____.

A. Asexually
B. Sexually
C. Both a and b
D. None of them

CORRECT ANSWER IS: Asexually

460. QUESTION: There are _____ number of longitudinally running excretory canal in nematods.

A. 2
B. 4
C. 6
D. 8

CORRECT ANSWER IS: 4

461. QUESTION: There are _____ number of hooks present in embryo of tapeworm.

A. 4
B. 6
C. 14

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. 16

CORRECT ANSWER IS: 6

462. QUESTION: Planaria feeds on _____.

A. Small animals
B. Dead animals
C. Decaying animals
D. All of them

CORRECT ANSWER IS: All of them

463. QUESTION: Shape of tapeworm embryo is _____.

A. Slender
B. Scale-Like
C. Round
D. None of them

CORRECT ANSWER IS: Round

464. QUESTION: Anus of nematodes is present at _____.

A. Anterior end
B. Posterior end
C. Antero-Posterior end
D. Absent

CORRECT ANSWER IS: Posterior end

465. QUESTION: Hooks of tapeworm are made up of _____.

A. Chitin
B. CaCO3
C. Silica
D. None of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Chitin

466. QUESTION: Plathyelminthes move by _____.

A. Flagella
B. Tube feet
C. Cilia
D. Pseudopdia

CORRECT ANSWER IS: Cilia

467. QUESTION: Body cavity of round worms is evolved from _____.

A. Mesoderm
B. Blastocoel
C. Archenteron
D. Chorion

CORRECT ANSWER IS: Blastocoel

468. QUESTION: Nematoda means _____.

A. Pointed ends
B. Tape worm
C. Round worm
D. Flat Worms

CORRECT ANSWER IS: Pointed ends

469. QUESTION: _____ prfoem excretion in tapeworms.

A. Flame cells
B. Mouth
C. Anus
D. None of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Flame cells

470. QUESTION: Nervous system of liver fluke consist of _____.

A. Ganglia
B. Nerves
C. Both a and b
D. Brain

CORRECT ANSWER IS: Both a and b

471. QUESTION: Embryo of tapeworm is developed In _____ part of body.

A. Fallopian tube
B. Oviduct
C. Ovary
D. Uterus

CORRECT ANSWER IS: Uterus

472. QUESTION: Tape worm reproduces asexually by _____.

A. Multiple fission
B. Binary fission
C. Budding
D. Regeneration

CORRECT ANSWER IS: Regeneration

473. QUESTION: Epidermis of parasites is _____.

A. Well delveloped
B. Poorly developed
C. Absent
D. None of them

CORRECT ANSWER IS: Absent

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

474. QUESTION: Respiration in leech takes place in _____.

A. Lungs
B. Skin
C. Alveoli
D. Trachea

CORRECT ANSWER IS: Skin

475. QUESTION: Papillae are _____.

A. Sensory organs
B. Organs of locomotion
C. Digestive glands
D. Reproductive cells

CORRECT ANSWER IS: Sensory organs

476. QUESTION: Papillae are present in _____ part of body.

A. Eyes
B. Lips
C. Ears
D. Nose

CORRECT ANSWER IS: Lips

477. QUESTION: There are _____ numbers of bands of muscles in Ascaies are _____.

A. 2
B. 4
C. 6
D. 8

CORRECT ANSWER IS: 4

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

478. QUESTION: Prostomium is a part of _____ system.

A. Nerveous system
B. Respiratory system
C. Digestive system
D. None of them

CORRECT ANSWER IS: Digestive system

479. QUESTION: Brain of Nereis is _____.

A. Well delveloped
B. Poorly developed
C. Simple
D. Absent

CORRECT ANSWER IS: Simple

480. QUESTION: Excretory pore of nematodes is present on _____ surface.

A. Anterior
B. Dorsal
C. Posterior
D. Ventral

CORRECT ANSWER IS: Ventral

481. QUESTION: Nerve ring of nematodes is present around _____.

A. Pharynx
B. Stomach
C. Oesophagus
D. None of them

CORRECT ANSWER IS: Pharynx

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

482. QUESTION: Circulation of earth worm takes place by _____.

A. Diffiusion
B. Blood Vessels
C. Lymph vessels
D. Active transport

CORRECT ANSWER IS: Blood Vessels

483. QUESTION: Bands of muscles are arranged in rund worm _____.

A. Dorso Lateral
B. Dorso Medial
C. Ventro lateral
D. Both a and c

CORRECT ANSWER IS: Both a and c

484. QUESTION: Nerves of segmented worms arise from _____.

A. Brain
B. Spinal Cord
C. Nerve Cord
D. Ganglion

CORRECT ANSWER IS: Nerve Cord

485. QUESTION: Hydrostatic skeleton of annelids is formed by _____.

A. Coelomic Fluid
B. Mesoglea
C. Mesoderm
D. All of them

CORRECT ANSWER IS: Coelomic Fluid

486. QUESTION: Nereis excretes with the help of _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Nephridia
B. Anus
C. Flame cells
D. Mouth

CORRECT ANSWER IS: Nephridia

487. QUESTION: Circular muscles of ascaris are _____.

A. Well delveloped
B. Poorly developed
C. Rudimentary
D. Absent

CORRECT ANSWER IS: Absent

488. QUESTION: Fertilization in annelids is _____.

A. Internal
B. External
C. Absent
D. Both a and b

CORRECT ANSWER IS: Both a and b

489. QUESTION: Nereis move with the help of _____.

A. Pseudopodia
B. Cilia
C. Flagella
D. Setae

CORRECT ANSWER IS: Pseudopodia

490. QUESTION: Annelids move with the help of _____.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Pseudopodia
B. Cilia
C. Flagella
D. Setae

CORRECT ANSWER IS: Setae

491. QUESTION: Appendages are found in _____.

A. Annelids
B. Arthropods
C. Parazons
D. Both a and b

CORRECT ANSWER IS: Both a and b

492. QUESTION: Setae are made up of _____.

A. Chitin
B. CaCO3
C. SiO2
D. Lignin

CORRECT ANSWER IS: Chitin

493. QUESTION: Suckers are present in _____.

A. Oligochaeta
B. Polychaeta
C. Hirudinea
D. All of them

CORRECT ANSWER IS: Hirudinea

494. QUESTION: Distinct head is present in _____.

A. Oligochaeta

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Polychaeta
C. Hirudinea
D. All of them

CORRECT ANSWER IS: Polychaeta

495. QUESTION: Annuli are present in _____.

A. Oligochaeta
B. Polychaeta
C. Hirudinea
D. All of them

CORRECT ANSWER IS: Hirudinea

496. QUESTION: Palps are present around _____.

A. Abdomen
B. Head
C. Tail
D. Neck

CORRECT ANSWER IS: Head

497. QUESTION: Most diverse phyla are _____.

A. Nematodes
B. Arthropods
C. Echinodermts
D. Molluscas

CORRECT ANSWER IS: Arthropods

498. QUESTION: Segmentation in Oligochaeta is _____-.

A. Internal
B. External

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. Absent
D. Both a and b

CORRECT ANSWER IS: Both a and b

499. QUESTION: Oligochacta moves by _____.

A. Parapodia
B. Setae
C. Cilia
D. Pesudopodia

CORRECT ANSWER IS: Setae

500. QUESTION: Polychaeta moves by _____.

A. Setae
B. Parapodia
C. Pseudopodia
D. Cilia

CORRECT ANSWER IS: Parapodia

501. QUESTION: Nucleus is not present in

A. bacteria
B. fungi
C. virus
D. algae

CORRECT ANSWER IS: bacteria

502. QUESTION: Flagella are originated from

A. cell wall
B. cell membrane
C. basal body

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. nucleus

CORRECT ANSWER IS: basal body

503. QUESTION: Major component of gram positive bacterial cell wall is

A. peptidoglycan
B. lipid component
C. techoic acid
D. polysaccharides

CORRECT ANSWER IS: peptidoglycan

504. QUESTION: Respiratory enzymes are present on

A. ribosome
B. mesosome
C. nucleosome
D. all of them

CORRECT ANSWER IS: mesosome

505. QUESTION: Bacterial growth is maximum during

A. lag phase
B. log phase
C. stationary phase
D. decline phase

CORRECT ANSWER IS: log phase

506. QUESTION: Prokaryotic cell lacks

A. nucleus
B. Golgi bodies
C. endoplasmic reticulum
D. all of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: all of them

507. QUESTION: Filaments of cyanobacteria are surrounded by

A. chitinous sheath
B. mucilaginous sheath
C. cuticle
D. wax

CORRECT ANSWER IS: mucilaginous sheath

508. QUESTION: Flagella are composed of

A. flagellin
B. pilin
C. tubulin
D. chromatin

CORRECT ANSWER IS: flagellin

509. QUESTION: Size of bacterium ranhes (in micrometers) from

A. 1 - 600
B. 1 - 6
C. 0.1 - 600
D. 0.1 - 60

CORRECT ANSWER IS: 0.1 - 60

510. QUESTION: Major component of gram negative bacterial cell wall is

A. peptidoglycan
B. lipid component
C. techoic acid
D. polysaccharides

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: lipid component

511. QUESTION: Chromatin material of prokaryotic cell is present in

A. nucleus
B. cytoplasm
C. cell membrane
D. Golgi apparatus

CORRECT ANSWER IS: cytoplasm

512. QUESTION: Excretory material of bacteria consists of

A. alcohol
B. lactic acid
C. acetic acid
D. all of them

CORRECT ANSWER IS: all of them

513. QUESTION: Death rate becomes equal to reproduction rate during

A. lag phase
B. log phase
C. stationary phase
D. death phase

CORRECT ANSWER IS: stationary phase

514. QUESTION: Cell wall of cyanobacteria is

A. gram positive
B. gram negative
C. gram neutral
D. gram polar

CORRECT ANSWER IS: gram negative

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

515. QUESTION: Flagella are absent in

A. atrichous bacteria
B. monotrichous bacteria
C. lophotrichous bacteria
D. peritrichous bacteria

CORRECT ANSWER IS: atrichous bacteria

516. QUESTION: Photosynthetic bacteria obtain hydrogen from

A. H2O
B. H2S
C. H2O2
D. NH3

CORRECT ANSWER IS: H2S

517. QUESTION: True bacteria are termed as

A. cyanobacteria
B. eubacteria
C. archaebacterial
D. all of them

CORRECT ANSWER IS: eubacteria

518. QUESTION: Spores external to vegetative cells are termed as

A. exospores
B. endospores
C. mesospores
D. none of them

CORRECT ANSWER IS: exospores

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

519. QUESTION: Overall thickness is greater in

A. gram positive bacteria
B. gram negative bacteria
C. equal in both
D. none of them

CORRECT ANSWER IS: gram positive bacteria

520. QUESTION: Death rate becomes greater than reproduction rate during

A. log phase
B. lag phase
C. stationary phase
D. decline phase

CORRECT ANSWER IS: decline phase

521. QUESTION: One flagellum is present in

A. atrichous bacteria
B. monotrichous bacteria
C. lophotrichous bacteria
D. amphitrichous bacteria

CORRECT ANSWER IS: monotrichous bacteria

522. QUESTION: Cyanobacteria move with the help of

A. cilia
B. flagella
C. pseudopodia
D. gas vacuoles

CORRECT ANSWER IS: gas vacuoles

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

523. QUESTION: Ancient bacteria are known as

A. cyanobacteria
B. eubacteria
C. archaebacterial
D. all of them

CORRECT ANSWER IS: archaebacterial

524. QUESTION: Spores internal to vegetative cells are termed as

A. exospores
B. endospores
C. mesospores
D. none of them

CORRECT ANSWER IS: endospores

525. QUESTION: Permeability is facilitated by

A. gram positive bacteria
B. gram negative bacteria
C. equal in both
D. none of them

CORRECT ANSWER IS: gram positive bacteria

526. QUESTION: In bacteria, conjugation is performed with the help of

A. flagella
B. pili
C. capsule
D. mesosomes

CORRECT ANSWER IS: pili

527. QUESTION: Flagella are present on one pole in

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. monotrichous bacteria
B. lophotrichous bacteria
C. amphitrichous bacteria
D. peritrichous bacteria

CORRECT ANSWER IS: lophotrichous bacteria

528. QUESTION: Phycobilins serve as

A. necessary pigment
B. accessory pigment
C. necessary dye
D. accessory due

CORRECT ANSWER IS: accessory pigment

529. QUESTION: "Germ theory of disease" was put forth by

A. Leeuwen Hooke
B. Pasteur
C. Robert Koch
D. Robert Brown

CORRECT ANSWER IS: Robert Koch

530. QUESTION: Facultative bacteria respire

A. in the presence of O2
B. in the absence of O2
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

531. QUESTION: Spores are produced at _____ stage of cell growth

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. early
B. middle
C. late
D. none of them

CORRECT ANSWER IS: late

532. QUESTION: Conjugation is facilitated by

A. flagella
B. pili
C. slime
D. cell wall

CORRECT ANSWER IS: pili

533. QUESTION: Flagella are present on both poles in

A. monotrichous bacteria
B. lophotrichous bacteria
C. amphitrichous bacteria
D. peritrichous bacteria

CORRECT ANSWER IS: amphitrichous bacteria

534. QUESTION: Bacterial growth is inhabited by

A. pasteurization
B. sterilization
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

535. QUESTION: Bacteria are found in

A. air

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. land
C. water
D. all of them

CORRECT ANSWER IS: all of them

536. QUESTION: Photosynthetic pigments are found in

A. envelope
B. stroma
C. thylakoid membrane
D. none of them

CORRECT ANSWER IS: thylakoid membrane

537. QUESTION: Bacterial chlorophyll is present in

A. chloroplast
B. nucleus
C. cytoplasm
D. mesosomes

CORRECT ANSWER IS: cytoplasm

538. QUESTION: Peptidoglycan is absent in the cell wall of

A. archaeobacteria
B. eubacteria
C. mycoplasmas
D. pseudomonas

CORRECT ANSWER IS: archaeobacteria

539. QUESTION: Flagella surround whole body in

A. amphitrichous bacteria
B. lophotrichous bacteria

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. atrichous bacteria
D. peritrichous bacteria

CORRECT ANSWER IS: peritrichous bacteria

540. QUESTION: Chemical constituents of bacteria are oxidized by

A. dry heat
B. moist heat
C. both a and b
D. all of them

CORRECT ANSWER IS: dry heat

541. QUESTION: Smallest of bacteria are

A. mycoplasmas
B. eschernia Coli
C. staphylococci
D. streptococci

CORRECT ANSWER IS: mycoplasmas

542. QUESTION: Color od phycocyanin pigment is

A. red
B. blue
C. green
D. colorless

CORRECT ANSWER IS: blue

543. QUESTION: Nitrification is performed by

A. photosynthetic bacteria
B. chemosynthetic bacteria
C. both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: chemosynthetic bacteria

544. QUESTION: Cell membrane of bacteria lacks

A. sugar
B. amides
C. peptides
D. sterols

CORRECT ANSWER IS: sterols

545. QUESTION: Flagella perform the function of

A. locomotion
B. chemotaxis
C. both a and b
D. attachment to lost

CORRECT ANSWER IS: both a and b

546. QUESTION: Largest of bacteria are

A. mycoplasmas
B. eschernia Coli
C. staphylococci
D. streptococci

CORRECT ANSWER IS: eschernia Coli

547. QUESTION: Range of wavelengths of electromagnetic rays for killing microorganisms lies at

A. 300 nm
B. above 300 nm
C. below 300 nm
D. 300 m

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: below 300 nm

548. QUESTION: Reverse food of cyanobacteria is stored in the form of

A. proteins
B. fats
C. glycogen
D. acylglecerol

CORRECT ANSWER IS: glycogen

549. QUESTION: Green Sulphur bacteria are

A. photosynthetic
B. chemosynthetic
C. parastatic
D. saprophytic

CORRECT ANSWER IS: photosynthetic

550. QUESTION: By nature, pili are

A. hollow
B. non-helical
C. filamentous
D. all of them

CORRECT ANSWER IS: all of them

551. QUESTION: Respiratory enzymes are present in

A. cell wall
B. cell membrane
C. slime
D. capsule

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: cell membrane

552. QUESTION: Shape of pleomorphic bacteria is

A. spherical
B. rod-shaped
C. helical
D. all of them

CORRECT ANSWER IS: all of them

553. QUESTION: Cyanobacteria are reproduced by

A. mitosis
B. meiosis
C. binary fission
D. fertilization

CORRECT ANSWER IS: binary fission

554. QUESTION: Microbial growth can be controlled by

A. antiseptics
B. disinfectants
C. chemotherapy
D. all of them

CORRECT ANSWER IS: all of them

555. QUESTION: Oxygen is needed for the respiration of

A. aerobic bacteria
B. anaerobic bacteria
C. both a and b
D. facultative bacteria

CORRECT ANSWER IS: aerobic bacteria

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

556. QUESTION: Pili are composed of

A. flagellin
B. pilin
C. tubulin
D. actin

CORRECT ANSWER IS: pilin

557. QUESTION: Nitrogen fixation is performed by

A. heterocyst
B. hormogonia
C. spores
D. trichome

CORRECT ANSWER IS: heterocyst

558. QUESTION: Shape of a coccus is

A. spherical
B. rod-shaped
C. helical
D. all of them

CORRECT ANSWER IS: spherical

559. QUESTION: Cytoplasmic matrix is present between

A. two plasma membranes
B. two nucleoids
C. plasma membrane and nucleoid
D. all of them

CORRECT ANSWER IS: plasma membrane and nucleoid

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

560. QUESTION: Nature of disinfectants is

A. oxidizing
B. reducing
C. both a and b
D. hydrolyzing

CORRECT ANSWER IS: both a and b

561. QUESTION: Oxygen is not needed for the respiration of

A. aerobic bacteria
B. anaerobic bacteria
C. facultative bacteria
D. microaerophilic bacteria

CORRECT ANSWER IS: anaerobic bacteria

562. QUESTION: Pili take part in

A. locomotion
B. reproduction
C. respiration
D. circulation

CORRECT ANSWER IS: reproduction

563. QUESTION: Example of a population indicator is

A. prions
B. pseudomonas
C. mycoplasmas
D. oscillatoria

CORRECT ANSWER IS: oscillatoria

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

564. QUESTION: Shape of a bacillus is

A. spherical
B. rod-shaped
C. helical
D. none of them

CORRECT ANSWER IS: rod-shaped

565. QUESTION: Procedures to reduce or eliminate the possibility of infection are termed as

A. immunization
B. vaccination
C. antisepsis
D. chemotherapy

CORRECT ANSWER IS: antisepsis

566. QUESTION: Protoplast consists of

A. plasma membrane
B. structures inside plasma membrane
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

WWW.EASYMCQS.COM

567. QUESTION: Low oxygen concentration is required by

A. aerobic bacteria
B. anaerobic bacteria
C. facultative bacteria
D. microaerophilic bacteria

CORRECT ANSWER IS: microaerophilic bacteria

568. QUESTION: Cell envelope of a bacterial cell is made up of

Download PDF Books: WWW.EasyMCQs.Com

A. capsule
B. cell wall
C. slime
D. all of them

CORRECT ANSWER IS: all of them

569. QUESTION: Trichomes of Nostoc contain

A. one branch
B. three branches
C. many branches
D. no branch

CORRECT ANSWER IS: no branch

570. QUESTION: Shape of Spirilla is

A. spherical
B. rod-shaped
C. helical
D. irregular

CORRECT ANSWER IS: helical

571. QUESTION: Vaccine for hydrophobia was made by

A. Jenner
B. Phipps
C. Pasteur
D. James

CORRECT ANSWER IS: Pasteur

572. QUESTION: Bacterial DNA consists of

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. one strand
B. two strands
C. three strands
D. four strands

CORRECT ANSWER IS: two strands

573. QUESTION: Example of an aerobic bacterium is

A. pseudomonas
B. spirochaeta
C. E.coli
D. campylobacter

CORRECT ANSWER IS: pseudomonas

574. QUESTION: Capsule of bacteria is composed of

A. polysaccharide
B. proteins
C. both a and b
D. all of them

CORRECT ANSWER IS: all of them

575. QUESTION: One plane is present in

A. streptococcus
B. sarcina
C. staphylococcus
D. none of them

CORRECT ANSWER IS: streptococcus

576. QUESTION: Shape of Nostoc cells is

A. spherical

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. barrel shaped
C. cylindrical
D. all of them

CORRECT ANSWER IS: all of them

577. QUESTION: Antibiotics are originated from

A. living cells
B. dead cells
C. both a and b
D. none of them

CORRECT ANSWER IS: living cells

578. QUESTION: Shape of bacterial DNA is

A. rectangular
B. circular
C. triangular
D. irregular

CORRECT ANSWER IS: circular

579. QUESTION: Slime is composed of

A. micromolecules
B. megamolecules
C. macromolecules
D. none of them

CORRECT ANSWER IS: macromolecules

580. QUESTION: Color of heterocyst is

A. light pink
B. light yellow

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. light green
D. light brown

CORRECT ANSWER IS: light yellow

581. QUESTION: Two planes are present in

A. diplococcus
B. tetrad
C. sarcina
D. streptococcus

CORRECT ANSWER IS: tetrad

582. QUESTION: Example of an anaerobic bacterium is

A. pseudomonas
B. spirochaeta
C. E.coli
D. campylobacter

CORRECT ANSWER IS: spirochaeta

583. QUESTION: Allergic reactions occur due to misuse of

A. tetracycline
B. streptomycin
C. penicillin
D. all of them

CORRECT ANSWER IS: penicillin

584. QUESTION: Number of chromosome in bacterial cell is

A. n
B. 2n
C. 3n

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. 4n

CORRECT ANSWER IS: n

585. QUESTION: Osmotic lysis is avoided by

A. capsule
B. slime
C. cell wall
D. cell membrane

CORRECT ANSWER IS: cell wall

586. QUESTION: Sexual reproduction is absent in

A. vibrio
B. mycoplasma
C. Nostoc
D. none of them

CORRECT ANSWER IS: Nostoc

587. QUESTION: Three planes are present in

A. staphylococcus
B. tetrad
C. sarcina
D. streptococcus

CORRECT ANSWER IS: sarcina

588. QUESTION: Discoloration of teeth occurs due to misuse of

A. tetracycline
B. streptomycin
C. penicillin
D. all of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: tetracycline

589. QUESTION: Example of a facultative bacterium is

A. pseudomonas
B. spirochaeta
C. E.coli
D. campylobacter

CORRECT ANSWER IS: E.coli

590. QUESTION: Plasmids are composed of

A. DNA
B. RNA
C. both a and b
D. none of them

CORRECT ANSWER IS: DNA

591. QUESTION: Cell wall is absent in

A. eschernia Coli
B. mycoplasmas
C. hypomicrobium
D. pseudomonas

CORRECT ANSWER IS: mycoplasmas

592. QUESTION: Example of bloom forming organism is

A. pseudomonas
B. spirochaeta
C. oscillatoria
D. campylobacter

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: oscillatoria

593. QUESTION: Number of cocci present in sarcina are

A. 2
B. 4
C. 6
D. 8

CORRECT ANSWER IS: 4

594. QUESTION: Auditory nerve is affected by misuse of

A. tetracycline
B. streptomycin
C. penicillin
D. erythrosine

CORRECT ANSWER IS: streptomycin

595. QUESTION: Example of a microaerophilic bacterium is

A. pseudomonas
B. spirochaeta
C. E.coli
D. campylobacter

CORRECT ANSWER IS: campylobacter

596. QUESTION: Plasmids play an important role in

A. bacterial growth
B. metabolism
C. immunity
D. all of them

CORRECT ANSWER IS: immunity

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

597. QUESTION: Color of stain of gram positive bacteria is

A. red
B. purple
C. pink
D. blue

CORRECT ANSWER IS: purple

598. QUESTION: Cocci are arranged randomly in

A. Streptococci
B. tetrad
C. staphylococci
D. sarcina

CORRECT ANSWER IS: staphylococci

599. QUESTION: Antibiotics are used to kill

A. bacteria
B. cyanobacteria
C. virus
D. all of them

CORRECT ANSWER IS: bacteria

600. QUESTION: Example of most diverse photosynthetic bacteria is

A. hypomicrobium
B. E.coli
C. pseudomonas
D. Cyano bacteria

CORRECT ANSWER IS: Cyano bacteria

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

601. QUESTION: Bacteria are reproduced by

A. mitosis
B. meiosis
C. binary fission
D. budding

CORRECT ANSWER IS: binary fission

602. QUESTION: Bacterial ribosomes are attached with

A. RER
B. plasma membrane
C. both a and b
D. mesosomes

CORRECT ANSWER IS: both a and b

603. QUESTION: Bacteria of pneumonia are

A. streptococci
B. staphylococci
C. diplococci
D. tetrad

CORRECT ANSWER IS: diplococci

604. QUESTION: Electron donor of oxygenic photosynthesis is

A. CO2
B. H2O
C. C6H12O6
D. Chlorophyll

CORRECT ANSWER IS: C6H12O6

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

605. QUESTION: Animalcules is the term for the description of

A. bacteria
B. protozoa
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

606. QUESTION: Color of stain of gram negative bacteria is

A. red
B. purple
C. blue
D. pink

CORRECT ANSWER IS: pink

607. QUESTION: Size of cyanobacteria ranges (in micrometer) from

A. 1 - 10
B. 1 - 15
C. 1 - 20
D. 1 - 100

CORRECT ANSWER IS: 1 - 10

608. QUESTION: Generation time is the time interval

A. between two divisions
B. between three divisions
C. between four divisions
D. none of them

CORRECT ANSWER IS: between two divisions

609. QUESTION: Number of planes present in bacilli are

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. 1
B. 2
C. 3
D. many

CORRECT ANSWER IS: 1

610. QUESTION: Mesosomes are originated from

A. cell membrane
B. cell wall
C. cytoplasm
D. RER

CORRECT ANSWER IS: cell membrane

611. QUESTION: Pathogenicity of bacteria was increased by

A. cell wall
B. cell membrane
C. slime
D. capsule

CORRECT ANSWER IS: slime

612. QUESTION: Number of major layers present in gram positive bacteria are

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 1

613. QUESTION: Filament of cyanobacteria consists of

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. colonies
B. unicellular unit
C. Trichomes
D. none of them

CORRECT ANSWER IS: Trichomes

614. QUESTION: Growth rate of bacteria is nill in

A. lag phase
B. log phase
C. stationary phase
D. death phase

CORRECT ANSWER IS: lag phase

615. QUESTION: Shape of vibrio is

A. rod-shaped
B. round
C. comma shaped rod
D. irregular

CORRECT ANSWER IS: comma shaped rod

616. QUESTION: Calvin cycle performs the function of

A. generation of O2
B. assimilation of CO2
C. transport of electron
D. trapping of sunlight

CORRECT ANSWER IS: assimilation of CO2

617. QUESTION: Mesosomes are involved in

A. tissue metabolism

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. cell division
C. locomotion
D. all of them

CORRECT ANSWER IS: cell division

618. QUESTION: Number of layers present in gram negative bacteria are

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 2

619. QUESTION: Flexibility s found in

A. spirillum
B. spirochete
C. tetrad
D. all of them

CORRECT ANSWER IS: spirochete

620. QUESTION: Cell organization of Protista is

A. eukaryotic
B. prokaryotic
C. both a and b
D. none of them

CORRECT ANSWER IS: eukaryotic

621. QUESTION: Organ of locomotion of forams is

A. flagella
B. cilia

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. pseudopodia
D. none of them

CORRECT ANSWER IS: pseudopodia

622. QUESTION: Example of free living sessile flagellate is

A. trichonympha
B. Trypanosoma
C. euglena
D. chaonoflagellate

CORRECT ANSWER IS: chaonoflagellate

623. QUESTION: Anticomplexans move by

A. flagella
B. cilia
C. pseudopodia
D. flexing their body

CORRECT ANSWER IS: flexing their body

624. QUESTION: Number of flagella present in 'Ceratium' are

A. 1
B. 2
C. many
D. none of them

CORRECT ANSWER IS: 2

625. QUESTION: Macrocytic are included in

A. Rhodophyta
B. phyrrophyta
C. phaephyta

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. chrysophyta

CORRECT ANSWER IS: phaephyta

626. QUESTION: Protista are believed to be originated from

A. Monera
B. fungi
C. Animalia
D. plantae

CORRECT ANSWER IS: Monera

627. QUESTION: Fucoxanthin is present in

A. phyrrophyta
B. phaephyta
C. chrysophyta
D. all of them

CORRECT ANSWER IS: all of them

628. QUESTION: Organ of locomotion of Trypanosoma is

A. flagella
B. cilia
C. pseudopodia
D. none of them

CORRECT ANSWER IS: flagella

629. QUESTION: Plasmodium is transmitted by the bites of

A. female anopheles mosquito
B. male culex mosquito
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: female anopheles mosquito

630. QUESTION: Chaonoflagellate show resemblance with

A. phylum porifera
B. phylum coelenterate
C. phylum nematoda
D. phylum Arthropoda

CORRECT ANSWER IS: phylum porifera

631. QUESTION: Chondrus are included in

A. Rhodophyta
B. phyrrophyta
C. phaephyta
D. chrysophyta

CORRECT ANSWER IS: Rhodophyta

632. QUESTION: Protista are believed as precursors of

A. bacteria
B. cyanobacteria
C. blue green algae
D. plants

CORRECT ANSWER IS: plants

633. QUESTION: Number of flagella present in 'Pinnularia' are

A. 1
B. 2
C. many
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: none of them

634. QUESTION: Body of plasmodium is

A. uninucleate
B. binucleate
C. multinucleate
D. uninucleate

CORRECT ANSWER IS: multinucleate

635. QUESTION: Organ of locomotion of Entamoeba is

A. flagella
B. cilia
C. pseudopodia
D. none of them

CORRECT ANSWER IS: pseudopodia

636. QUESTION: In human, plasmodium first enters in

A. R.B.C
B. W.B.C
C. platelets
D. liver cells

CORRECT ANSWER IS: liver cells

637. QUESTION: Outer covering of ciliates is termed as

A. slime
B. capsule
C. pellicle
D. mucilaginous sheath

CORRECT ANSWER IS: pellicle

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

638. QUESTION: Ceratium is included in

A. Rhodophyta
B. phyrrophyta
C. phaephyta
D. chrysophyta

CORRECT ANSWER IS: phyrrophyta

639. QUESTION: Body of Protista is

A. colonial
B. unicellular
C. multicellular
D. all of them

CORRECT ANSWER IS: all of them

640. QUESTION: Number of flagella present in 'Focus' are

A. 1
B. 2
C. many
D. none of them

CORRECT ANSWER IS: 2

641. QUESTION: Plasmodium obtains food from

A. bacteria
B. yeasts
C. spores
D. all of them

CORRECT ANSWER IS: all of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

642. QUESTION: Habitat of free living amoeba is

A. fresh water
B. marine
C. soil
D. all of them

CORRECT ANSWER IS: all of them

643. QUESTION: Water regulation of ciliates is controlled by

A. cilia
B. nucleus
C. contractile vacuole
D. cytoplasm

CORRECT ANSWER IS: contractile vacuole

644. QUESTION: Multiplication of plasmodium takes place in

A. R.B.C
B. W.B.C
C. platelets
D. liver cells

CORRECT ANSWER IS: R.B.C

645. QUESTION: Example of Protista is

A. protozoans
B. algae
C. slime molds
D. all of them

CORRECT ANSWER IS: all of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

646. QUESTION: Euglena is example of

A. Rhodophyta
B. phyrrophyta
C. euglenophyta
D. chrysophyta

CORRECT ANSWER IS: euglenophyta

647. QUESTION: Number of flagella present in 'Chondrus' are

A. 1
B. 2
C. many
D. none of them

CORRECT ANSWER IS: none of them

648. QUESTION: Body is unicellular in

A. ciliates
B. actinopods
C. foraminifera
D. all of them

CORRECT ANSWER IS: all of them

649. QUESTION: Spores of plasmodium are

A. haploid
B. diploid
C. triploid
D. tetraploid

CORRECT ANSWER IS: haploid

650. QUESTION: Function of micronuclei is

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. reproduction
B. growth
C. metabolism
D. both b and c

CORRECT ANSWER IS: reproduction

651. QUESTION: Bacteria were placed in kingdom Protista by

A. John Hogg
B. Ernst Haeckel
C. Herbert Copeland
D. Robert Whittaker

CORRECT ANSWER IS: Ernst Haeckel

652. QUESTION: Gametocytes of plasmodium are produced in

A. mosquito
B. man
C. both a and b
D. sparrow

CORRECT ANSWER IS: man

653. QUESTION: Common name of euglenophyta is

A. euglenoids
B. dinoflagellates
C. diatoms
D. red algae

CORRECT ANSWER IS: euglenoids

654. QUESTION: Number of flagella present in ulva are

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. 1
B. 2
C. many
D. none of them

CORRECT ANSWER IS: many

655. QUESTION: Body is multicellular in

A. ciliates
B. apicomplexans
C. foraminifera
D. all of them

CORRECT ANSWER IS: all of them

656. QUESTION: Zygote of plasmodium is

A. haploid
B. diploid
C. triploid
D. tetraploid

CORRECT ANSWER IS: diploid

657. QUESTION: Function of macronuclei is

A. reproduction
B. growth
C. metabolism
D. both b and c

CORRECT ANSWER IS: both b and c

658. QUESTION: The status of kingdom was given to prokaryotes by

A. John Hogg

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Ernst Haeckel
C. Herbert Copeland
D. Robert Whittaker

CORRECT ANSWER IS: Herbert Copeland

659. QUESTION: Common name of Chrysophyta is

A. euglenoids
B. dinoflagellates
C. diatoms
D. red algae

CORRECT ANSWER IS: diatoms

660. QUESTION: Fertilization of plasmodium takes place in

A. mosquito
B. man
C. both a and b
D. sparrow

CORRECT ANSWER IS: mosquito

661. QUESTION: Shape of body of amoeba is

A. round
B. rod shaped
C. spiral
D. no shape

CORRECT ANSWER IS: no shape

662. QUESTION: Body form of Euglena is

A. unicellular
B. multicellular

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. both a and b
D. colonial

CORRECT ANSWER IS: unicellular

663. QUESTION: Plasmodium forms spores by the process of

A. mitosis
B. meiosis
C. binary fission
D. multiple fission

CORRECT ANSWER IS: meiosis

664. QUESTION: Number of phyla listed by Schwartz are

A. 23
B. 25
C. 27
D. 29

CORRECT ANSWER IS: 27

665. QUESTION: Common name of Rhodophyta is

A. euglenoids
B. dinoflagellates
C. diatoms
D. red algae

CORRECT ANSWER IS: red algae

666. QUESTION: Micronuclei are

A. monoploid
B. diploid
C. triploid

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. polyploid

CORRECT ANSWER IS: diploid

667. QUESTION: Example of photosynthetic Protista is

A. fungi
B. algae
C. Anticomplexans
D. actinopods

CORRECT ANSWER IS: algae

668. QUESTION: Body organization is colonial in

A. paramecium
B. plasmodium
C. Entamoeba
D. Trypanosoma

CORRECT ANSWER IS: Trypanosoma

669. QUESTION: Body form of Gonyaulax is

A. unicellular
B. multicellular
C. both a and b
D. colonial

CORRECT ANSWER IS: unicellular

670. QUESTION: Example of zooflagellates is

A. plasmodium
B. forams
C. Trypanosoma
D. Stentor

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Trypanosoma

671. QUESTION: Spores are formed within

A. sporangia
B. leaves
C. stem
D. all of them

CORRECT ANSWER IS: sporangia

672. QUESTION: Common name of Phyrrophyta is

A. euglenoids
B. dinoflagellates
C. diatoms
D. red algae

CORRECT ANSWER IS: dinoflagellates

673. QUESTION: Macronuclei are

A. monoploid
B. diploid
C. triploid
D. polyploid

CORRECT ANSWER IS: polyploid

674. QUESTION: Shape of Trypanosoma is

A. spherical
B. elongated
C. both a and b
D. no shape

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: both a and b

675. QUESTION: Maximum photosynthesis dong plants are

A. fungi
B. algae
C. gymnospormae
D. angiosperm

CORRECT ANSWER IS: algae

676. QUESTION: Vorticella is the example of

A. amoebas
B. actinopods
C. ciliates
D. foraminifera

CORRECT ANSWER IS: ciliates

677. QUESTION: Cells germinating from spores move by

A. flagella
B. pseudopodia
C. both a and b
D. cilia

CORRECT ANSWER IS: both a and b

678. QUESTION: Body form of Frequilaria is

A. unicellular
B. multicellular
C. both a and b
D. colonial

CORRECT ANSWER IS: unicellular

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

679. QUESTION: Ciliates reproduce sexually by

A. internal fertilization
B. external fertilization
C. conjugation
D. transduction

CORRECT ANSWER IS: conjugation

680. QUESTION: Flagella of zooflagellates are present at

A. anterior end
B. posterior end
C. median end
D. lateral end

CORRECT ANSWER IS: anterior end

681. QUESTION: Common name of Phaephyta is

A. red algae
B. green algae
C. blue green algae
D. brown algae

CORRECT ANSWER IS: brown algae

682. QUESTION: Entamoeba is included in

A. apicomplexans
B. ciliates
C. amoebas
D. actinopods

CORRECT ANSWER IS: amoebas

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

683. QUESTION: Sex organs of algae are

A. unicellular
B. multicellular
C. a cellular
D. none of them

CORRECT ANSWER IS: unicellular

684. QUESTION: Hyphae of Oomycotes are

A. septate
B. aseptate
C. rudimentary
D. absent

CORRECT ANSWER IS: aseptate

685. QUESTION: Habitat of actinopods is

A. fresh water
B. marine
C. soil
D. trees

CORRECT ANSWER IS: marine

686. QUESTION: Position of nucleus of zooflagellates is

A. peripheral
B. central
C. both a and b
D. none of them

CORRECT ANSWER IS: central

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

687. QUESTION: Body form of macrocystis is

A. unicellular
B. multicellular
C. both a and b
D. colonial

CORRECT ANSWER IS: multicellular

688. QUESTION: Actinopods include

A. euglena
B. plasmodium
C. paramecium
D. radiolarians

CORRECT ANSWER IS: radiolarians

689. QUESTION: Common name of chlorophyta is

A. red algae
B. green algae
C. blue green algae
D. brown algae

CORRECT ANSWER IS: green algae

690. QUESTION: Coenocytes contain

A. one nucleus
B. two nuclei
C. many nuclei
D. no nucleus

CORRECT ANSWER IS: many nuclei

691. QUESTION: Shell of foraminiferans is composed of

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. calcium
B. silica
C. magnesium
D. sodium

CORRECT ANSWER IS: calcium

692. QUESTION: Amoebic dysentery is caused by

A. amoeba
B. Entamoeba
C. trichonymphas
D. euglena

CORRECT ANSWER IS: Entamoeba

693. QUESTION: Body form of polysiphonia is

A. unicellular
B. multicellular
C. both a and b
D. colonial

CORRECT ANSWER IS: both a and b

694. QUESTION: Forams are included in

A. amoebas
B. zooflagellates
C. ciliates
D. foraminifera

CORRECT ANSWER IS: foraminifera

695. QUESTION: Carotenoids are present in

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. euglenophyta
B. phyrrophyta
C. chrysophyta
D. phaeophyta

CORRECT ANSWER IS: euglenophyta

696. QUESTION: Cross walls of coenocytes are

A. large
B. small
C. rudimentary
D. absent

CORRECT ANSWER IS: absent

697. QUESTION: Shell od actinopods is composed of

A. calcium
B. silica
C. magnesium
D. sodium

CORRECT ANSWER IS: silica

698. QUESTION: On the basis of mode of nutrition, zooflagellates are

A. free living
B. parasites
C. saprophytes
D. all of them

CORRECT ANSWER IS: all of them

699. QUESTION: Body form of spirogyra is

A. unicellular

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. multicellular
C. colonial
D. all of them

CORRECT ANSWER IS: all of them

700. QUESTION: Apicomplexans included

A. Entamoeba
B. paramecium
C. plasmodium
D. staner

CORRECT ANSWER IS: plasmodium

701. QUESTION: Chlorophyll 'a' and 'b' are present in

A. euglenophyta
B. chlorophyta
C. chrysophyta
D. phaeophyta

CORRECT ANSWER IS: euglenophyta

702. QUESTION: Plant body of algae is

A. vascular
B. embryophyte
C. thallus
D. none of them

CORRECT ANSWER IS: thallus

703. QUESTION: Function of cytoplasmic extension of actinopods is

A. digestion
B. excretion

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. locomotion
D. capture of prey

CORRECT ANSWER IS: capture of prey

704. QUESTION: Digestion of dry wood is assisted by

A. Trypanosoma
B. euglena
C. trichonympha
D. Entamoeba

CORRECT ANSWER IS: trichonympha

705. QUESTION: Organ of locomotion of paramecium is

A. flagella
B. pseudopodia
C. cilia
D. none of them

CORRECT ANSWER IS: cilia

706. QUESTION: Only chlorophyll 'a' is present in

A. euglenopht
B. chlorophyta
C. both a and b
D. Rhodophyta

CORRECT ANSWER IS: Rhodophyta

707. QUESTION: Acetabularia are included in

A. euglenophyta
B. phyrrophyta
C. Rhodophyta

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. chlorophyta

CORRECT ANSWER IS: chlorophyta

708. QUESTION: Thallus is devoid of

A. vascular tissue
B. true root
C. true shoot
D. all of them

CORRECT ANSWER IS: all of them

709. QUESTION: Sleeping sickness is caused by

A. trichonymphas
B. paramecium
C. Trypanosoma
D. euglena

CORRECT ANSWER IS: Trypanosoma

710. QUESTION: Example of water molds is

A. spirogyra
B. pinnularia
C. phytophthora infestans
D. plasmodium

CORRECT ANSWER IS: phytophthora infestans

711. QUESTION: Organ of locomotion of radiolarians is

A. flagella
B. pseudopodia
C. cilia
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: pseudopodia

712. QUESTION: Chalk is believed to be evolved from

A. zooflagellates
B. ciliates
C. actinopods
D. foraminiferans

CORRECT ANSWER IS: foraminiferans

713. QUESTION: Chlorophyll 'a' and 'c' are present n

A. phyrrophyta
B. phaeophyta
C. chrysophyta
D. all of them

CORRECT ANSWER IS: all of them

714. QUESTION: Diatoms are example of

A. phaephyta
B. chrysophyta
C. Rhodophyta
D. phyrrophyta

CORRECT ANSWER IS: chrysophyta

715. QUESTION: Number of flagella present in 'Euglena' are

A. 1
B. 2
C. many
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: 2

716. QUESTION: Trypanosoma is transmitted by bites of

A. snake venom
B. tsetse fly
C. honey bee
D. mosquito

CORRECT ANSWER IS: tsetse fly

717. QUESTION: Phytophthora infestans drastically infects

A. tomato
B. potato
C. tobacco
D. grass

CORRECT ANSWER IS: potato

718. QUESTION: Cause of malaria is

A. actinopods
B. cilia
C. apicomplexans
D. ciliates

CORRECT ANSWER IS: apicomplexans

719. QUESTION: Organ of locomotion of plasmodium is

A. flagella
B. pseudopodia
C. cilia
D. none of them

CORRECT ANSWER IS: none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

720. QUESTION: Cuticle is made up of

A. CaCO3
B. SiO2
C. Chitin
D. Lignin

CORRECT ANSWER IS: Chitin

721. QUESTION: Antennae are absent in

A. myriapoda
B. Arachnida
C. insecta
D. crustacea

CORRECT ANSWER IS: Arachnida

722. QUESTION: Mollusca moves by

A. appendages
B. parapodia
C. feet
D. setae

CORRECT ANSWER IS: feet

723. QUESTION: Hemichordates respire by

A. lungs
B. skin
C. gill slits
D. all of them

CORRECT ANSWER IS: gill slits

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

724. QUESTION: Amphibians are evolved from

A. bony fishes
B. dipnoi
C. chondrichthyes
D. none of them

CORRECT ANSWER IS: dipnoi

725. QUESTION: Urine of birds is excreted in

A. liquid form
B. solid form
C. semi solid form
D. gaseous form

CORRECT ANSWER IS: semi solid form

726. QUESTION: Cuticle is secreted by

A. Ectoderm
B. mesoderm
C. endoderm
D. epidermis

CORRECT ANSWER IS: epidermis

727. QUESTION: Function of book lungs is

A. digestion
B. excretion
C. reproduction
D. respiration

CORRECT ANSWER IS: respiration

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

728. QUESTION: Body of pelecypoda is compressed

A. dorsally
B. ventrally
C. medially
D. laterally

CORRECT ANSWER IS: laterally

729. QUESTION: Vacuolated cells of notochord consists of

A. carbohydrates
B. proteins
C. fats
D. all of them

CORRECT ANSWER IS: proteins

730. QUESTION: Number of functional ovaries of birds is

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 1

731. QUESTION: Body cavity of arthropods is termed as

A. coelom
B. pseudocoelom
C. spongocoel
D. haemocoel

CORRECT ANSWER IS: haemocoel

732. QUESTION: The oldest vertebrates are considered to be

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. amphibians
B. aves
C. pices
D. reptiles

CORRECT ANSWER IS: amphibians

733. QUESTION: Chitin is made up of

A. carbohydrates
B. proteins
C. both a and b
D. CaCO3

CORRECT ANSWER IS: both a and b

734. QUESTION: Most reduced shell is present in

A. gastropoda
B. pelecypoda
C. cephalopoda
D. myriapoda

CORRECT ANSWER IS: cephalopoda

735. QUESTION: Position of nervous system of chordates is

A. dorsal
B. ventral
C. medial
D. lateral

CORRECT ANSWER IS: dorsal

736. QUESTION: Haemocoel Communicates with

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. blood vascular system
B. digestive system
C. respiratory system
D. excretory system

CORRECT ANSWER IS: blood vascular system

737. QUESTION: Gizzard takes part in

A. digestion
B. respiration
C. locomotion
D. reproduction

CORRECT ANSWER IS: digestion

738. QUESTION: Number of pair of limbs present in tetrapods are

A. 2
B. 4
C. 6
D. 8

CORRECT ANSWER IS: 4

739. QUESTION: In ecdysis the exoskeleton

A. sheds off
B. regenerates
C. becomes thick
D. becomes thin

CORRECT ANSWER IS: sheds off

740. QUESTION: Animals with spiny skin are included in

A. Arthropoda

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Mollusca
C. Echinodermata
D. hemichordata

CORRECT ANSWER IS: Echinodermata

741. QUESTION: Excretory system of arthropods consists of

A. flame cells
B. naphredia
C. malpighian tubules
D. none of them

CORRECT ANSWER IS: malpighian tubules

742. QUESTION: Gill slits are functional in embryonic life in

A. amphibians
B. Pisces
C. both a and b
D. man

CORRECT ANSWER IS: both a and b

743. QUESTION: The nourishment of mammal's foetus is provided by

A. mother
B. ovum
C. sperm
D. all of them

CORRECT ANSWER IS: mother

744. QUESTION: Chromatophores are present in

A. blood
B. brain

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. skin
D. lungs

CORRECT ANSWER IS: skin

745. QUESTION: Trypanosoma causes

A. cholera
B. hepatitis
C. diarrhea
D. skin diseases

CORRECT ANSWER IS: skin diseases

746. QUESTION: Skeleton of echinoderms is secreted by

A. exodermal cells
B. endodermal cells
C. mesodermal cells
D. epidermis

CORRECT ANSWER IS: mesodermal cells

747. QUESTION: Mosquito excretes nitrogenous wastes in the form of

A. Urea
B. uric acid
C. NO
D. NO2

CORRECT ANSWER IS: NO2

748. QUESTION: Simplest of the chordates are

A. amphioxus
B. molgula
C. fishes

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. frog

CORRECT ANSWER IS: amphioxus

749. QUESTION: Mammals are evolved from

A. amphibians
B. birds
C. fishes
D. reptiles

CORRECT ANSWER IS: reptiles

750. QUESTION: Largest invertebrate animal is

A. sycon
B. squid
C. jelly fish
D. whale

CORRECT ANSWER IS: squid

751. QUESTION: Heart of tetrapods contains

A. 2 chambers
B. 3 chambers
C. 4 chambers
D. 5 chambers

CORRECT ANSWER IS: 3 chambers

752. QUESTION: Nerves of butterflies arise from

A. Brain
B. Nerve Coral
C. Spinal coral
D. ganglia

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: ganglia

753. QUESTION: Mouth of echinodermis is present on

A. upper surface
B. lower surface
C. dorsal surface
D. ventral surface

CORRECT ANSWER IS: lower surface

754. QUESTION: Cranium originates from

A. nerve cord
B. notochord
C. spinal cord
D. all of them

CORRECT ANSWER IS: notochord

755. QUESTION: Cotylosaurs are an example of

A. mammals
B. birds
C. reptiles
D. amphibians

CORRECT ANSWER IS: reptiles

756. QUESTION: Mantle is the characteristic feature of

A. anthropoda
B. echinodermata
C. Mollusca
D. hemichordata

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Mollusca

757. QUESTION: Fertilization of toads is

A. internal
B. external
C. both a and b
D. none of them

CORRECT ANSWER IS: external

758. QUESTION: Antennae of grasshopper are

A. digestive glands
B. reproductive organs
C. respiratory tubes
D. sense organs

CORRECT ANSWER IS: sense organs

759. QUESTION: Anus of echinoderms is present on

A. upper surface
B. lower surface
C. dorsal surface
D. ventral surface

CORRECT ANSWER IS: upper surface

760. QUESTION: Mammals became dominant during

A. Jurassic period
B. Devonian period
C. Cretaceous period
D. Cenozoic period

CORRECT ANSWER IS: Cenozoic period

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

761. QUESTION: Tunio is protective covering of

A. amphioxus
B. molgula
C. both a and b
D. tods

CORRECT ANSWER IS: molgula

762. QUESTION: Functionally mantle serves as

A. an enzyme
B. a co-enzyme
C. a hormone
D. a gland

CORRECT ANSWER IS: a gland

763. QUESTION: Amnion of amphibians is

A. well developed
B. poorly developed
C. rudimentary
D. absent

CORRECT ANSWER IS: absent

764. QUESTION: Respiratory system of arthropods consists of

A. malpighian tubules
B. lungs
C. bronchi
D. tracheae

CORRECT ANSWER IS: tracheae

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

765. QUESTION: Exclusively marine phyla are

A. porifera
B. coelonterata
C. Arthropoda
D. echinodermata

CORRECT ANSWER IS: echinodermata

766. QUESTION: Number of bones present in lower jaw of mammals are

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 1

767. QUESTION: Function of mantle is

A. reproduction
B. respiration
C. locomotion
D. protection

CORRECT ANSWER IS: protection

768. QUESTION: Function of cranium is to enclose

A. brain
B. spinal cord
C. digestive system
D. reproductive system

CORRECT ANSWER IS: brain

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

769. QUESTION: Trachea opens to exterior through

A. nose
B. mouth
C. spiracle
D. osculum

CORRECT ANSWER IS: spiracle

770. QUESTION: Ventricle of crocodile is divided into

A. 2
B. 3
C. 4
D. undivided

CORRECT ANSWER IS: 2

771. QUESTION: Water enters in brittle stars through

A. ostia
B. osculum
C. madreporite
D. spiracle

CORRECT ANSWER IS: madreporite

WWW.EASYMCQS.COM

772. QUESTION: Secretions of mantle consists of

A. CaCO3
B. SiO2
C. Chitin
D. all of them

CORRECT ANSWER IS: CaCO3

773. QUESTION: Ear consists of

Download PDF Books: WWW.EasyMCQs.Com

A. incus
B. stapes
C. malleus
D. all of them

CORRECT ANSWER IS: all of them

774. QUESTION: Aquatic arthropods respire through

A. lungs
B. skin
C. gills
D. all of them

CORRECT ANSWER IS: gills

775. QUESTION: Function of vertebral column is to enclose

A. brain
B. spinal cord
C. digestive system
D. reproductive system

CORRECT ANSWER IS: spinal cord

776. QUESTION: Madrepore is present on

A. oral surface
B. aboral surface
C. medial surface
D. lateral surface

CORRECT ANSWER IS: aboral surface

777. QUESTION: Foot of Mollusca lies

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. dorsally
B. ventrally
C. medially
D. laterally

CORRECT ANSWER IS: ventrally

778. QUESTION: The earliest birds are considered to be

A. archaeopteryx
B. archeornix
C. amphoxiosu
D. cheropteryx

CORRECT ANSWER IS: archaeopteryx

779. QUESTION: The larva resembling the adult is termed as

A. trochopore larva
B. nymph
C. both a and b
D. none of them

CORRECT ANSWER IS: nymph

780. QUESTION: Aortic arch of mammals is

A. right
B. left
C. both a and b
D. none of them

CORRECT ANSWER IS: left

781. QUESTION: Body is fusiform in

A. chondrichthyes

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. bony fish
C. amphibians
D. all of them

CORRECT ANSWER IS: chondrichthyes

782. QUESTION: Echinoder moves by

A. parapodia
B. tube feet
C. cilia
D. cheate

CORRECT ANSWER IS: tube feet

783. QUESTION: Viscera of snail lies

A. dorsally
B. ventrally
C. medially
D. laterally

CORRECT ANSWER IS: dorsally

784. QUESTION: Each wing of archaeopteryx consists of

A. one claw
B. two claws
C. three claws
D. four claws

CORRECT ANSWER IS: three claws

785. QUESTION: Arthropods move by

A. parapodia
B. setae

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. paired wings
D. cilia

CORRECT ANSWER IS: paired wings

786. QUESTION: Characteristic of prototheria resembles to mammals and

A. birds
B. reptiles
C. Amphibia
D. none of them

CORRECT ANSWER IS: reptiles

787. QUESTION: Position of sharks mouth is

A. dorsal
B. ventral
C. dorsomedial
D. dorsolateral

CORRECT ANSWER IS: ventral

788. QUESTION: Brain of echinoderms is

A. well developed
B. poorly developed
C. rudimentary
D. absent

CORRECT ANSWER IS: absent

789. QUESTION: Radula is the characteristic feature of

A. sycon
B. spiders
C. squids

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. all of them

CORRECT ANSWER IS: squids

790. QUESTION: Wings are evolved from

A. fore limb
B. hind limb
C. both a and b
D. none of them

CORRECT ANSWER IS: fore limb

791. QUESTION: Carapace is the part of

A. exoskeleton
B. endoskeleton
C. hydroskeletn
D. all of them

CORRECT ANSWER IS: exoskeleton

792. QUESTION: Function of prototherian choaca is

A. excretory
B. reproduction
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

793. QUESTION: Endoskeleton of rays is made up of

A. bones
B. cartilages
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: cartilages

794. QUESTION: Larvae of echinoderms are termed as

A. bipinnaria
B. brachiolaria
C. both a and b
D. trochophore larva

CORRECT ANSWER IS: both a and b

795. QUESTION: Radula serves as a

A. digestive gland
B. respiratory tube
C. protective covering
D. rasping tongue

CORRECT ANSWER IS: rasping tongue

796. QUESTION: Running is performed by

A. fore limbs
B. hind limbs
C. both a and b
D. none of them

CORRECT ANSWER IS: hind limbs

797. QUESTION: Appendages are modified to perform

A. locomotion
B. respiration
C. reproduction
D. all of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: all of them

798. QUESTION: Marsupium is characteristic feature of

A. prototheria
B. metatheria
C. eutheria
D. all of them

CORRECT ANSWER IS: metatheria

799. QUESTION: Circulatory system of chondrichthyes consists of

A. lymph vessels
B. pulmonary vessels
C. aortic arches
D. none of them

CORRECT ANSWER IS: aortic arches

800. QUESTION: Symmetry of bipinnaria is

A. bilateral
B. radial
C. both a and b
D. asymmetrical

CORRECT ANSWER IS: bilateral

801. QUESTION: Cephalopods excretes by

A. flame cells
B. nephridia
C. malpighian tubules
D. spiracles

CORRECT ANSWER IS: nephridia

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

802. QUESTION: Highly developed mammals are considered to be

A. prototheria
B. metatheria
C. eutheria
D. all of them

CORRECT ANSWER IS: eutheria

803. QUESTION: Mandibles are present on

A. head
B. neck
C. abdomen
D. all of them

CORRECT ANSWER IS: head

804. QUESTION: The heart of birds consists of

A. two chambers
B. three chambers
C. four chambers
D. five chambers

CORRECT ANSWER IS: four chambers

805. QUESTION: Operculum serves as

A. an organ of locomotion
B. a covering
C. respiratory organ
D. digestive gland

CORRECT ANSWER IS: a covering

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

806. QUESTION: Cleavage of echinoderm zygote is

A. spiral
B. radial
C. both a and b
D. absent

CORRECT ANSWER IS: radial

807. QUESTION: Color of haemocyanin is

A. red
B. purple
C. blue
D. colorless

CORRECT ANSWER IS: blue

808. QUESTION: Highly developed mammals are considered to be

A. prototheria
B. metatheria
C. eutheria
D. all of them

CORRECT ANSWER IS: eutheria

809. QUESTION: Largest group of animals are placed in class

A. Amphibia
B. insecta
C. crustacea
D. myriapoda

CORRECT ANSWER IS: insecta

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

810. QUESTION: Aorta of birds is present on

A. right side
B. left side
C. both sides
D. absent

CORRECT ANSWER IS: right side

811. QUESTION: Swim bladder of chondrichthyes is

A. well developed
B. poorly developed
C. rudimentary
D. absent

CORRECT ANSWER IS: absent

812. QUESTION: Blastopore of invertebrates gives rise to

A. mouth
B. anus
C. exoskeleton
D. reproductive system

CORRECT ANSWER IS: mouth

WWW.EASYMCQS.COM

813. QUESTION: Haemocyanin is a

A. digestive enzyme
B. endocrine hormone
C. respiratory pigment
D. anticoagulant

CORRECT ANSWER IS: respiratory pigment

814. QUESTION: Placenta is the characteristic feature of

Download PDF Books: WWW.EasyMCQs.Com

A. prototheria
B. metatheria
C. eutheria
D. all of them

CORRECT ANSWER IS: eutheria

815. QUESTION: Three segments of insects are present on

A. abdomen
B. thorax
C. pelvis
D. heael

CORRECT ANSWER IS: thorax

816. QUESTION: Air sacs of birds are present in the

A. skin
B. brain
C. lungs
D. stomach

CORRECT ANSWER IS: lungs

817. QUESTION: Number of nerves present in bony fishes are

A. 10
B. 20
C. 30
D. 40

CORRECT ANSWER IS: 20

818. QUESTION: The characteristics of hemichordates belong to

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. chordates
B. invertebrates
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

819. QUESTION: Number of pair of Ganglia present in snail are

A. 0
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 3

820. QUESTION: Position of nerve cords of insects is

A. dorsal
B. ventral
C. medial
D. lateral

CORRECT ANSWER IS: ventral

821. QUESTION: Syrinx serves as

A. organ of locomotion
B. organ of voice
C. protective covering
D. digestive gland

CORRECT ANSWER IS: organ of voice

822. QUESTION: Epidermis of hemichordates secretes

A. $CaCO_3$

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. SiO2
C. Chitin
D. Mucus

CORRECT ANSWER IS: Mucus

823. QUESTION: Lungs of terrestrial gastropods are evolved from

A. radula
B. mantle
C. haemocyanin
D. bronchi

CORRECT ANSWER IS: mantle

824. QUESTION: Locomotion of fish is stimulated by

A. swim bladder
B. streamlined body
C. fins
D. all of them

CORRECT ANSWER IS: all of them

825. QUESTION: Cephalothorax is formed by fusion of

A. anterior segment
B. posterior segment
C. medial segment
D. lateral segment

CORRECT ANSWER IS: anterior segment

826. QUESTION: Who first observed chromosomes inside the nucleus?

A. Mendel
B. Walther Fleming

WWW.EASYMCQS.COM

C. Sutton
D. none of them

CORRECT ANSWER IS: Walther Fleming

827. QUESTION: Walter Sutton was _____ scientist.

A. American
B. German
C. Japanese
D. none of them

CORRECT ANSWER IS: American

828. QUESTION: Who showed that the amount of adenine in DNA always equals the amount of thymine?

A. Erwin Chargaff
B. Erwin Schrodinger
C. Sutton
D. all of them

CORRECT ANSWER IS: Erwin Chargaff

829. QUESTION: Who confirmed Watson and Crick model?

A. Meselson
B. Stahl
C. Sutton
D. both a and b

CORRECT ANSWER IS: both a and b

830. QUESTION: Transfer of information from DNA to RNA which occurs when a mRNA copy of the gene is produceD. This is called

A. transduction
B. transformation

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. transcription
D. none of them

CORRECT ANSWER IS: transcription

831. QUESTION: Who tested 65 codons by making artificial mRNAs?

A. Crick
B. Mendel
C. M. Nirenberg, P. Leader, H.G. Khorana
D. none of them

CORRECT ANSWER IS: M. Nirenberg, P. Leader, H.G. Khorana

832. QUESTION: When chromosomes were observed?

A. 1881
B. 1862
C. 1883
D. none of them

CORRECT ANSWER IS: 1862

833. QUESTION: Alteration involves only one or a few base pairs in the coding sequence which is called

A. chromosomal change
B. mutational change
C. point mutation
D. none of them

CORRECT ANSWER IS: point mutation

834. QUESTION: Sperm contains little amount of

A. yolk
B. cytoplasm
C. nucleus

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: cytoplasm

835. QUESTION: A _____ chemist Rosalind Franklin carried on an X-ray diffraction analysis of DNA.

A. German
B. British
C. American
D. none of them

CORRECT ANSWER IS: British

836. QUESTION: How many DNA polymerases are present in bacteria?

A. 2
B. 3
C. 4
D. none of them

CORRECT ANSWER IS: 3

837. QUESTION: Chromosomes were first observed in

A. Salamander Larvae
B. human
C. frog larvae
D. none of them

CORRECT ANSWER IS: Salamander Larvae

838. QUESTION: During translation, _____ provides the site where polypeptides are assembled.

A. mRNA
B. tRNA
C. rRNA
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: rRNA

839. QUESTION: When full genetic code was determined?

A. 60's
B. 70's
C. 80's
D. none of them

CORRECT ANSWER IS: 60's

840. QUESTION: DNA molecule had a shape of a helix with a diameter of

A. 2 nm
B. 2 mm
C. 2 cm
D. none of them

CORRECT ANSWER IS: 2 nm

841. QUESTION: In _____, Thomas Hunt Morgan studied the fruit fly.

A. 1910
B. 1900
C. 1901
D. 1902

CORRECT ANSWER IS: 1910

842. QUESTION: Which of the following play supporting role in DNA replication of bacteria?

A. DNA polymerase I
B. DNA polymerase II
C. DNA polymerase III
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: DNA polymerase I

843. QUESTION: How many chromosomes are present in corn?

A. 29
B. 28
C. 20
D. none of them

CORRECT ANSWER IS: 20

844. QUESTION: Which of the following is the well known example of point mutation?

A. Down's syndrome
B. Sickle cell anemia
C. Phenylketonuria
D. both b and c

CORRECT ANSWER IS: both b and c

845. QUESTION: How many kinds of tRNA are present in human cells?

A. 40
B. 45
C. 450
D. none of them

CORRECT ANSWER IS: 45

846. QUESTION: Complete helical turn appears after every

A. 3.4 cm
B. 3.4 nm
C. 3.4 mm
D. none of them

CORRECT ANSWER IS: 3.4 nm

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

847. QUESTION: When mutant male is crossed with normal female, all F1 progeny had

A. white eye
B. red eye
C. pink eye
D. both a and b

CORRECT ANSWER IS: red eye

848. QUESTION: Which of the following are called nonsense codon?

A. UAA, UAG, UGA
B. UAA, UGC, UGC
C. UTA, UAA
D. none of them

CORRECT ANSWER IS: UAA, UAG, UGA

849. QUESTION: Which of the following enzymes is 10 times larger and far more complex in structure?

A. DNA polymerase I
B. DNA polymerase II
C. DNA polymerase III
D. all of them

CORRECT ANSWER IS: DNA polymerase I

850. QUESTION: How many chromosomes are present in penicillium?

A. 1
B. 2
C. 100
D. 10

CORRECT ANSWER IS: 1

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

851. QUESTION: One of the two strands of DNA is transcribed, the strand is called

A. template
B. antisense
C. coding
D. both a and b

CORRECT ANSWER IS: both a and b

852. QUESTION: Who worked out on structure of the DNA molecule?

A. James Watson
B. Franklin
C. Francis Crick
D. both a and c

CORRECT ANSWER IS: Franklin

853. QUESTION: How many white eyed flies were studied in 4252 progeny?

A. 784
B. 782
C. 786
D. none of them

CORRECT ANSWER IS: 782

854. QUESTION: Two parents strands of a DNA molecule are

A. parallel
B. antiparallel
C. side to side
D. none of them

CORRECT ANSWER IS: antiparallel

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

855. QUESTION: The particular array of chromosomes that an individual possesses is called

A. karyotype
B. karyokinesis
C. Cytokinesis
D. none of them

CORRECT ANSWER IS: karyotype

856. QUESTION: Is genetic code same in almost all the organisms?

A. no
B. yes
C. may be
D. none of them

CORRECT ANSWER IS: yes

857. QUESTION: Coding strand is also called

A. template strand
B. antisense strand
C. sense strand
D. none of them

CORRECT ANSWER IS: sense strand

858. QUESTION: Purines and Pyrimidines molecules have constant diameter of

A. 4 nm
B. 2 nm
C. 4 mm
D. 2 mm

CORRECT ANSWER IS: 2 nm

859. QUESTION: According to Mendel traits of Drosophila assort

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. independently
B. dependently
C. didn't assort
D. none of them

CORRECT ANSWER IS: independently

860. QUESTION: Loss of one or a few base is called

A. insertion
B. deletion
C. both a and b
D. point mutation

CORRECT ANSWER IS: point mutation

861. QUESTION: Which of the following has centromere at one end?

A. telocentric
B. acrocentric
C. metacentric
D. sub-metacentric

CORRECT ANSWER IS: telocentric

862. QUESTION: How much long is Okazaki fragment in eukaryotes?

A. 1000 - 2000 nucleotides
B. 100 - 200 nucleotides
C. 150 - 200 nucleotides
D. none of them

CORRECT ANSWER IS: 100 - 200 nucleotides

863. QUESTION: How many types of RNA are present in prokaryotes which are responsible for the synthesis of all three kinds of RNAs?

WWW.EASYMCQS.COM

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 1

864. QUESTION: Guanine form _____ hydrogen bonds with cytosine.

A. 2
B. 3
C. 4
D. none of them

CORRECT ANSWER IS: 3

865. QUESTION: Who gave first evidence of hereditary nature of DNA?

A. Sutton
B. Waldyer
C. Fredrick Griffith
D. none of them

CORRECT ANSWER IS: Fredrick Griffith

866. QUESTION: Which of the following showed that genetic code is not universal?

A. ribosomal DNA
B. ribosomal RNA
C. mitochondrial DNA
D. mitochondrial RNA

CORRECT ANSWER IS: mitochondrial DNA

867. QUESTION: what %age of DNA is present in chromosomes?

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. 40
B. 60
C. 20
D. 80

CORRECT ANSWER IS: 40

868. QUESTION: Substitution of one or a few base is called

A. base substitution
B. deletion
C. point mutation
D. none of them

CORRECT ANSWER IS: base substitution

869. QUESTION: How much long is Okazaki fragment is prokaryotes?

A. 1000 - 2000 nucleotides
B. 100 - 200 nucleotides
C. 150 - 200 nucleotides
D. none of them

CORRECT ANSWER IS: 1000 - 2000 nucleotides

870. QUESTION: Transcription starts at the RNA polymerase binding site called _____ on the DNA template strand.

A. promoter
B. code
C. anticode
D. both b and c

CORRECT ANSWER IS: promoter

871. QUESTION: _____ will not form proper hydrogen bonds with cytosine.

A. Adenine

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. Guanine
C. Thymine
D. all of them

CORRECT ANSWER IS: Adenine

872. QUESTION: Through smooth type pneumonia, mice

A. remained alive
B. died
C. became ill
D. none of them

CORRECT ANSWER IS: died

873. QUESTION: UGA codon is _____ codon.

A. stop
B. sense
C. non sense
D. none of them

CORRECT ANSWER IS: stop

874. QUESTION: A typical human chromosome contains about _____ nucleotides in its DNA.

A. 140 millions
B. 1.4*108
C. 1400 million
D. both a and b

CORRECT ANSWER IS: both a and b

875. QUESTION: Phenylalanine consequently accumulates in the cells leading to

A. sexual disorder
B. mental retardation

WWW.EASYMCQS.COM

C. chromosomal disorder
D. none of them

CORRECT ANSWER IS: mental retardation

876. QUESTION: Who concluded that certain diseases among their patients were more prevalent in particular families?

A. A. Garrod
B. W. Bateson
C. Sutton
D. both a and b

CORRECT ANSWER IS: both a and b

877. QUESTION: _____ will always occur in the same proportion in any DNA molecule

A. adenine and thymine
B. adenine and guanine
C. cytosine and thymine
D. none of them

CORRECT ANSWER IS: adenine and thymine

878. QUESTION: The agent responsible for transforming streptococcus was discovered in

A. 1944
B. 1844
C. 1865
D. none of them

CORRECT ANSWER IS: 1944

879. QUESTION: What TTGACA sites in prokaryotes are called?

A. 10 - sequence
B. 35 - sequence
C. 37 - sequence

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: 35 - sequence

880. QUESTION: The amount of information, which one chromosome contains, would fill about _____ printed books.

A. 1000
B. 280
C. 2800
D. 100

CORRECT ANSWER IS: 280

881. QUESTION: In mitochondria UGA reads as

A. arginine
B. glycine
C. aspartate
D. tryptophan

CORRECT ANSWER IS: tryptophan

882. QUESTION: George Beadle and Edward Tatum both were

A. geneticists
B. chemists
C. physicists
D. none of them

CORRECT ANSWER IS: geneticists

883. QUESTION: "The parental double helix would remain intact and generate DNA copies consisting of entirely new molecules" is

A. replication model
B. conservative model
C. semi conservative model

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: conservative model

884. QUESTION: Transforming principle was proposed by

A. Oswald Avery
B. Colin Macleod
C. Maclyn McCarty
D. all of them

CORRECT ANSWER IS: all of them

885. QUESTION: 10 - sequence in prokaryote is

A. TTGACA
B. TATGCA
C. TATAAT
D. TGAACT

CORRECT ANSWER IS: TATAAT

886. QUESTION: When single chromosome is laid put in a straight line it would be about _____ long.

A. 5 cm
B. 5 mm
C. 50 cm
D. 500 cm

CORRECT ANSWER IS: 5 cm

887. QUESTION: In _____, translation begins when the initial portion of mRNA molecules binds to rRNA.

A. eukaryotes
B. prokaryotes
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: prokaryotes

888. QUESTION: The small change in the structure of DNA is called

A. mutation
B. mutant
C. allelic change
D. none of them

CORRECT ANSWER IS: mutation

889. QUESTION: The three hypothesis of DNA replication were evaluated by

A. Mathew Meselson
B. Franklin Stahl
C. Franklin Mathew
D. both a and b

CORRECT ANSWER IS: Franklin Stahl

890. QUESTION: Avery's conclusion was provided in

A. 1950
B. 1852
C. 1952
D. none of them

CORRECT ANSWER IS: 1952

891. QUESTION: The binding of RNA polymerase to the promoter is _____ step in gene transcription.

A. first
B. second
C. third
D. forth

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: first

892. QUESTION: For every 200 nucleotides, the DNA duplex is coiled around a core of _____ bistone proteins.

A. 8
B. 18
C. 10
D. none of them

CORRECT ANSWER IS: 8

893. QUESTION: Modified methionine is also called

A. N-formyl methionine
B. M-formyl methionine
C. unmodified methionine
D. none of them

CORRECT ANSWER IS: N-formyl methionine

894. QUESTION: Beadle and Tatum placed substructures of individual fungal cells on a

A. maximal medium
B. minimal medium
C. both a and b
D. none of them

CORRECT ANSWER IS: minimal medium

895. QUESTION: Where three hypothesis of DNA replication were evaluated?

A. Cambridge University
B. California Institute of Technology
C. Oxford University
D. none of them

CORRECT ANSWER IS: California Institute of Technology

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

896. QUESTION: Friedrich Miescher was a _____ scientist.

A. German
B. Japanese
C. American
D. none of them

CORRECT ANSWER IS: German

897. QUESTION: GC base pair is followed by

A. AC
B. AT
C. GA
D. none of them

CORRECT ANSWER IS: AT

898. QUESTION: Which of the following amino acids is present in histone molecule in large amount?

A. arginine
B. lysine
C. methionine
D. both a and b

CORRECT ANSWER IS: both a and b

899. QUESTION: For UAA anticodon is

A. AUU
B. ACG
C. AGG
D. none of them

CORRECT ANSWER IS: AUU

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

900. QUESTION: Who described the complete sequence of amino acids of Insulin?

A. Sanger
B. Beadle
C. Tatum
D. Garrod

CORRECT ANSWER IS: Sanger

901. QUESTION: Bacteria were grown in a medium containing heavy isotopes of

A. N15
B. N14
C. N13
D. none of them

CORRECT ANSWER IS: N15

902. QUESTION: Friedrich Miescher discovered DNA in

A. 1869
B. 1889
C. 1769
D. none of them

CORRECT ANSWER IS: 1869

903. QUESTION: The U-ribonucleotide cause RNA polymerase to stop

A. transcription
B. synthesis
C. transduction
D. none of them

CORRECT ANSWER IS: none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

904. QUESTION: Phosphate groups of the DNA are

A. positively charged
B. negatively changed
C. neutral
D. none of them

CORRECT ANSWER IS: negatively changed

905. QUESTION: The cells of eukaryotes contain an enormous amount of

A. DNA
B. RNA
C. mRNA
D. tRNA

CORRECT ANSWER IS: DNA

906. QUESTION: Frederick Sanger was _____ biochemist.

A. American
B. Japanese
C. Chinese
D. English

CORRECT ANSWER IS: English

907. QUESTION: Who transferred the bacteria from the N15 medium to the N14 medium and collected the DNA at various intervals?

A. Meselson
B. Stahl
C. Michelson
D. both a and b

CORRECT ANSWER IS: both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

908. QUESTION: Who extracted the white substance from the nuclei of human cells and fish sperm?

A. Sutton
B. Miescher
C. Walther Fleming
D. all of them

CORRECT ANSWER IS: Miescher

909. QUESTION: Where mRNA is released in bacteria?

A. nucleus
B. ribosome
C. cytoplasm
D. none of them

CORRECT ANSWER IS: cytoplasm

910. QUESTION: Histone core acts as

A. magnetic form
B. negative form
C. positive form
D. neutral form

CORRECT ANSWER IS: magnetic form

911. QUESTION: If the DNA in all of the cells of an adult human were lined up end to end what is the distance from Earth to Jupiter?

A. 60 times the 100 million kilometer
B. 60 times the 100 kilometer
C. 60 times the 100 billion kilometer
D. none of them

CORRECT ANSWER IS: 60 times the 100 billion kilometer

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

912. QUESTION: When molecular basis of sickle cell anemia was discovered?

A. 1956
B. 1958
C. 1856
D. 1858

CORRECT ANSWER IS: 1956

913. QUESTION: For how many years, biologists did little research on the nucleic acid?

A. 60 years
B. 50 years
C. 70 years
D. none of them

CORRECT ANSWER IS: 50 years

914. QUESTION: In Meselon-Stahl experiment DNA was dissolved in

A. calcium chloride
B. cesium chloride
C. Aluminium chloride
D. none of them

CORRECT ANSWER IS: cesium chloride

915. QUESTION: When the string of nucleosomes wraps up into higher order coils then what happens?

A. further coiling occurs
B. coiling stops
C. uncoiling of string
D. none of them

CORRECT ANSWER IS: further coiling occurs

916. QUESTION: 7 methyl GTP is linked _____ with the first nucleotide.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. 3' to 5'
B. 5' to 3'
C. 5' to 5'
D. 3' to 3'

CORRECT ANSWER IS: 5' to 5'

917. QUESTION: Mutations can broadly be classified as

A. chromosomal aberration
B. gene aberration
C. point mutation
D. both a and c

CORRECT ANSWER IS: both a and c

918. QUESTION: In sickle cell anemia, Glutamic acid converts the position to

A. valine
B. ornithine
C. citruline
D. arginine

CORRECT ANSWER IS: valine

WWW.EASYMCQS.COM

919. QUESTION: The basic structure of nucleic acid was determined by the biochemist

A. Miescher
B. Sutton
C. P.A. Levene
D. none of them

CORRECT ANSWER IS: P.A. Levene

920. QUESTION: N15 strands are _____ than N14 strands

Download PDF Books: WWW.EasyMCQs.Com

A. rarer
B. denser
C. thicker
D. none of them

CORRECT ANSWER IS: denser

921. QUESTION: Highly condensed portions of the chromatin are called

A. euchromatin
B. heterochromatin
C. both a and b
D. none of them

CORRECT ANSWER IS: heterochromatin

922. QUESTION: How many nucleotides are present in genetic code?

A. 2
B. 3
C. 4
D. 5

CORRECT ANSWER IS: 3

923. QUESTION: Chromosomal aberration lead to

A. Down's syndrome
B. Klinefelter's syndrome
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

924. QUESTION: The sequence of nucleotides that determines the amino acid sequence of a protein is called

A. chromosome

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. allele
C. gene
D. none of them

CORRECT ANSWER IS: gene

925. QUESTION: In a nucleotide, nitrogen base is attached to _____ of pentose sugar.

A. Carbon number 1
B. Carbon number 3
C. Carbon number 5
D. none of them

CORRECT ANSWER IS: Carbon number 1

926. QUESTION: Who first suggested the central role of chromosomes?

A. Sutton
B. Hutton and Lyell
C. Karl Correns
D. both a and b

CORRECT ANSWER IS: Karl Correns

927. QUESTION: Point mutations are

A. chromosomal changes
B. mutational changes
C. both a and b
D. none of them

CORRECT ANSWER IS: mutational changes

928. QUESTION: How many chromosomes are present in sugar cane?

A. 60
B. 70

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. 90
D. 80

CORRECT ANSWER IS: 80

929. QUESTION: There are three nucleotides in

A. anticodon
B. codon
C. both a and b
D. none of them

CORRECT ANSWER IS: codon

930. QUESTION: Hydroxyl group is attached to the ____ atom of a pentose sugar.

A. 2 Carbon
B. 3 Carbon
C. 5 Carbon
D. none of them

CORRECT ANSWER IS: 3 Carbon

931. QUESTION: Which of the following come first from proline in normal hemoglobin beta Bchain?

A. threonine
B. leucine
C. histidine
D. none of them

CORRECT ANSWER IS: threonine

932. QUESTION: Chromosome pairs with one another during

A. meiosis
B. mitosis
C. budding

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: meiosis

933. QUESTION: How many kinds of amino acids are present?

A. 20,000
B. 2000
C. 20
D. 3000

CORRECT ANSWER IS: 20

934. QUESTION: How many chromosomes are present in honeybee?

A. 50
B. 65
C. 32
D. 80

CORRECT ANSWER IS: 32

935. QUESTION: Who first formulated chromosomal theory of inheritance?

A. Walter Sutton
B. Mendel
C. Walthyer
D. Karl Correns

CORRECT ANSWER IS: Walter Sutton

936. QUESTION: The basic unit of biological information is

A. gene
B. chromosome
C. allele
D. all of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: gene

937. QUESTION: 1/16 ratio in Mendel's law of independent assortment is for

A. round yellow
B. round green
C. wrinkled yellow
D. wrinkled green

CORRECT ANSWER IS: wrinkled yellow

938. QUESTION: How many multiple alleles of ABO blood group are there?

A. 2
B. 3
C. 4
D. 5

CORRECT ANSWER IS: 3

939. QUESTION: Environmental variation makes the distribution of phenotypes more

A. rough and continuous
B. smooth and rough
C. smooth and continuous
D. none of them

CORRECT ANSWER IS: smooth and continuous

940. QUESTION: ____ is smaller in size with black rounded abdomen.

A. male drosophila
B. female drosophila
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: male drosophila

941. QUESTION: A woman can be bald when she will be

A. homozygous
B. heterozygous
C. both a and b
D. none of them

CORRECT ANSWER IS: homozygous

942. QUESTION: The position of the gene on the chromosome is called

A. position
B. locality
C. habitat
D. locus

CORRECT ANSWER IS: locus

943. QUESTION: A sudden change in the structure of gene is called

A. change in structure
B. change in gene
C. mutation
D. all of them

CORRECT ANSWER IS: mutation

944. QUESTION: The location of gene on chromosome is always

A. ordinary
B. specific
C. changing
D. none of them

CORRECT ANSWER IS: changing

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

945. QUESTION: A and B antigen can also be present in _____ and other body fluids.

A. saliva
B. blood
C. bile pigment
D. none of them

CORRECT ANSWER IS: saliva

946. QUESTION: Human skin color is

A. qualitative trait
B. quantitative trait
C. both a and b
D. none of them

CORRECT ANSWER IS: quantitative trait

947. QUESTION: Two alleles on one locus can be

A. identical
B. different
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

948. QUESTION: _____ is larger with pointed abdomen

A. male drosophila
B. female drosophila
C. both a and b
D. none of them

CORRECT ANSWER IS: female drosophila

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

949. QUESTION: _____ is an example of multifactorial trait

A. blood pressure
B. jaundice
C. fever
D. all of them

CORRECT ANSWER IS: blood pressure

950. QUESTION: Pea has seven _____ pairs of chromosome.

A. homologous
B. heterozygous
C. homozygous
D. none of them

CORRECT ANSWER IS: homologous

951. QUESTION: The modern _____ finger printing test is more seriously considered for a legal decision

A. RNA
B. DNA
C. mRNA
D. none of them

CORRECT ANSWER IS: DNA

952. QUESTION: What is called the appearance of trait?

A. genotype
B. phenotype
C. both a and b
D. none of them

CORRECT ANSWER IS: phenotype

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

953. QUESTION: What will be the color of the skin when the number of pigments specifying the genes are greater?

A. brown
B. white
C. dark
D. none of them

CORRECT ANSWER IS: dark

954. QUESTION: Drosophila has generation time of

A. one week
B. three weeks
C. two weeks
D. none of them

CORRECT ANSWER IS: two weeks

955. QUESTION: Mendel studied seven characters of pea in _____ homologous pair of chromosomes

A. same
B. different
C. both a and b
D. none of them

CORRECT ANSWER IS: different

956. QUESTION: What is non-Insulin dependent?

A. diabetes Mellitus type I
B. diabetes mellitus type II
C. both a and b
D. none of them

CORRECT ANSWER IS: diabetes mellitus type II

957. QUESTION: Color of the flower is called

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. trait
B. phenotype
C. genotype
D. none of them

CORRECT ANSWER IS: trait

958. QUESTION: What is more complex polygenic trait?

A. skin color
B. human height
C. both a and b
D. none of them

CORRECT ANSWER IS: human height

959. QUESTION: Mr. and Mrs. Ali both have blood group A. Their child would be

A. O
B. B
C. both a and b
D. none of them

CORRECT ANSWER IS: O

960. QUESTION: Who observed white eyed mutant male fly?

A. Calvin Bridges
B. Mendel
C. Sutton
D. none of them

CORRECT ANSWER IS: Calvin Bridges

961. QUESTION: Mendel presented his findings to Brunn Society for the study of Natural Science in

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. 1862
B. 1863
C. 1864
D. 1865

CORRECT ANSWER IS: 1865

962. QUESTION: In how many diabetic patients, diabetes mellitus type II is present?

A. 70%
B. 80%
C. 90%
D. 100%

CORRECT ANSWER IS: 90%

963. QUESTION: Red and white colors of the flowers are called as

A. trait
B. phenotype
C. genotype
D. none of them

CORRECT ANSWER IS: phenotype

964. QUESTION: About _____ of diabetes mellitus type II get the disease early in life before 25 years of age.

A. 2% - 5%
B. 3% - 7%
C. 2% - 6%
D. none of them

CORRECT ANSWER IS: 2% - 5%

965. QUESTION: What would be the height when large number of alleles of height are present in man?

A. short

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. tall
C. moderate
D. none of them

CORRECT ANSWER IS: short

966. QUESTION: Mr. Bilal has blood group A and Mrs. Bilal has blood group AB, their child would be

A. O
B. B
C. A
D. none of them

CORRECT ANSWER IS: B

967. QUESTION: Mendel's work was published in the proceedings of the Society in

A. 1865
B. 1866
C. 1867
D. none of them

CORRECT ANSWER IS: 1866

968. QUESTION: The gene for eye color is located on

A. X chromosome
B. Y chromosome
C. both a and b
D. none of them

CORRECT ANSWER IS: X chromosome

969. QUESTION: Jumping genes _____ settle peacefully on their loci.

A. do not
B. do

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. can
D. none of them

CORRECT ANSWER IS: do not

970. QUESTION: About _____ of cases of MODY are caused by mutations in Glucokinase gene

A. 50%
B. 60%
C. 70%
D. 80%

CORRECT ANSWER IS: 50%

971. QUESTION: For Gigantism, how many alleles are required?

A. large number
B. small number
C. moderate number
D. none of them

CORRECT ANSWER IS: small number

972. QUESTION: Rh factor is named after

A. rhesus monkey
B. rhesus bear
C. rhesus donkey
D. none of them

CORRECT ANSWER IS: rhesus monkey

973. QUESTION: Mendel's work was neglected for about _____ years

A. 31
B. 32
C. 33

WWW.EASYMCQS.COM

D. 34

CORRECT ANSWER IS: 34

974. QUESTION: There is no allele for the trait on

A. X chromosome
B. Y chromosome
C. both a and b
D. none of them

CORRECT ANSWER IS: Y chromosome

975. QUESTION: The group of sexually interbreeding organism of the same species that exist together in both time and space is called

A. gene pool
B. population
C. both a and b
D. none of them

CORRECT ANSWER IS: population

976. QUESTION: With how many genes human skin color is controlled?

A. 3 - 6
B. 2 - 6
C. 3 - 7
D. none of them

CORRECT ANSWER IS: 3 - 6

977. QUESTION: Rolling of tongue is due to

A. dominant gene
B. recessive gene
C. both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: dominant gene

978. QUESTION: When Rh antigen was discovered?

A. 1927
B. 1928
C. 1929
D. 1930

CORRECT ANSWER IS: 1930

979. QUESTION: After Mendel's death, who acknowledged or rediscovered his work?

A. Correns
B. De Varies
C. Tschermach
D. all of them

CORRECT ANSWER IS: all of them

980. QUESTION: X linked trait are commonly referred as

A. sex linkage
B. sex linked trait
C. both a and b
D. none of them

CORRECT ANSWER IS: sex linked trait

981. QUESTION: All the genes or alleles found in a breeding population at a given time are collectively called

A. gene pool
B. population
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: gene pool

982. QUESTION: What is the maximum height (in feet) of garden pea?

A. 6 - 7
B. 6 - 8
C. 7 - 8
D. none of them

CORRECT ANSWER IS: 6 - 7

983. QUESTION: Rolling of tongue is due to _____ dominant gene.

A. single
B. double
C. triple
D. none of them

CORRECT ANSWER IS: single

984. QUESTION: Who first discovered Rh antigen?

A. Bernstein
B. Levine
C. Landsteiner
D. none of them

CORRECT ANSWER IS: Landsteiner

985. QUESTION: Albinism is a _____ trait in humans.

A. dominant
B. recessive
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: recessive

986. QUESTION: Who discovered the sex linked inheritance?

A. Mendel
B. Sutton
C. Morgan
D. none of them

CORRECT ANSWER IS: Morgan

987. QUESTION: What is the total genetic information encoded in a total genes in a breeding population existing at a given time?

A. gene pool
B. population
C. both a and b
D. none of them

CORRECT ANSWER IS: gene pool

988. QUESTION: The minimum height of Garden pea is

A. 9 - 18 feet
B. 9 - 18 inches
C. 9 - 18 cm
D. none of them

CORRECT ANSWER IS: 9 - 18 inches

989. QUESTION: The staying together of all the genes of chromosome is called

A. gum
B. link
C. linkage
D. none of them

WWW.EASYMCQS.COM

CORRECT ANSWER IS: linkage

990. QUESTION: Rh blood group system is encoded by how many genes?

A. 3
B. 4
C. 5
D. 6

CORRECT ANSWER IS: 3

991. QUESTION: How many types of dominance relations are there among alleles?

A. 2
B. 3
C. 4
D. 5

CORRECT ANSWER IS: 4

992. QUESTION: When T.H. Morgan was awarded a Nobel prize for his contributions of genetics?

A. 1931
B. 1932
C. 1933
D. 1934

CORRECT ANSWER IS: 1933

993. QUESTION: Who laid the foundation of classical genetics by formulating two laws of hereditary?

A. G.J. Mendel
B. George Anthony
C. Aristotle
D. none of them

CORRECT ANSWER IS: G.J. Mendel

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

994. QUESTION: The blood serum containing antibodies is called

A. serum
B. antiserum
C. blood serum
D. none of them

CORRECT ANSWER IS: antiserum

995. QUESTION: Linked genes don't obey

A. Law of segregation
B. Law of Independent Assortment
C. both a and b
D. none of them

CORRECT ANSWER IS: Law of segregation

996. QUESTION: When an Rh- woman marries to an RH+ man, they conceive a child who would be

A. Rh-
B. Rh+
C. both a and b
D. none of them

CORRECT ANSWER IS: Rh+

997. QUESTION: The contrasting pairs of alleles for all the seven characters chosen by Mendel, showed

A. complete dominance
B. co-dominance
C. both a and b
D. none of them

CORRECT ANSWER IS: complete dominance

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

998. QUESTION: _____ chromosome is not completely insert?

A. X chromosome
B. Y chromosome
C. both a and b
D. none of them

CORRECT ANSWER IS: Y chromosome

999. QUESTION: Pisum Sativum is a biological name of

A. sweet pea
B. garden pea
C. carrot
D. none of them

CORRECT ANSWER IS: garden pea

1000. QUESTION: The _____ allele "h" cannot insert sugar molecule to glycoprotein

A. dominant
B. homozygous
C. recessive
D. none of them

CORRECT ANSWER IS: recessive

1001. QUESTION: Gene linkage _____ the chances of genetic recombination and variation among off springs.

A. maximizes
B. minimizes
C. moderates
D. none of them

CORRECT ANSWER IS: minimizes

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1002. QUESTION: Mother and foetus have connection in the uterus through

A. pipe
B. placenta
C. vein
D. none of them

CORRECT ANSWER IS: placenta

1003. QUESTION: When one allele is completely dominant over the other, presence of the recessive allele is functionally hidden, this is

A. complete dominance
B. incomplete dominance
C. co-dominance
D. over dominance

CORRECT ANSWER IS: complete dominance

1004. QUESTION: The flowers of garden pea are

A. unisexual
B. bisexual
C. hermaphrodite
D. none of them

CORRECT ANSWER IS: hermaphrodite

1005. QUESTION: In humans, hemophilia and color blindness are

A. dominant
B. recessive
C. both a and b
D. none of them

CORRECT ANSWER IS: recessive

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1006. QUESTION: The quantitative variations are _____ and less striking.

A. small
B. large
C. moderate
D. none of them

CORRECT ANSWER IS: small

1007. QUESTION: Crossing over is an example of segments between _____ chromatids of homologous chromosomes during meiosis.

A. sister
B. non-sister
C. both a and b
D. none of them

CORRECT ANSWER IS: non-sister

1008. QUESTION: Who worked on flowering plant name 4 O' clock in 1899?

A. Carl Charles
B. Carl Corrnes
C. Mendel
D. none of them

CORRECT ANSWER IS: Carl Corrnes

1009. QUESTION: How many pairs of garden pea are focused by Mendel?

A. 2
B. 3
C. 5
D. 7

CORRECT ANSWER IS: 7

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1010. QUESTION: The interaction between different genes occupying the different locus is called as

A. epistasis
B. dominance
C. both a and b
D. none of them

CORRECT ANSWER IS: epistasis

1011. QUESTION: Who studied the genetics of wheat grain color?

A. Mendel
B. W.S. Sutton
C. Nilsson Ehle
D. none of them

CORRECT ANSWER IS: Nilsson Ehle

1012. QUESTION: In humans, hypophosphatemic or Vitamin D resistant rickets are

A. dominant
B. recessive
C. both a and b
D. none of them

CORRECT ANSWER IS: dominant

1013. QUESTION: When the phenotype of heterozygous is intermediate between phenotype of the two homozogous then it is called

A. complete dominance
B. incomplete dominance
C. co-dominance
D. over dominance

CORRECT ANSWER IS: over dominance

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1014. QUESTION: When the alleles of a gene pair in an organism is same than organism is called

A. heterozygous
B. homozygous
C. both a and b
D. none of them

CORRECT ANSWER IS: homozygous

1015. QUESTION: How homologous chromosomes pair up lengthwise?

A. point to point
B. locus to locus
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1016. QUESTION: How many gene pairs contribute to the wheat grain color?

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 3

1017. QUESTION: Relationship between alleles of the same gene occupying the same locus is called

A. epistasis
B. dominance
C. both a and b
D. none of them

CORRECT ANSWER IS: dominance

1018. QUESTION: Experimental mattings are not practically possible in

WWW.EASYMCQS.COM

A. bats
B. rats
C. humans
D. all of them

CORRECT ANSWER IS: humans

1019. QUESTION: In 4 O'clock flowering plant when red flower is crossed with white flower, the generation produced is

A. pink
B. white
C. red
D. none of them

CORRECT ANSWER IS: pink

1020. QUESTION: When the two alleles of a gene pair in an organism is different than organism is called

A. heterozygous
B. homozygous
C. both a and b
D. none of them

CORRECT ANSWER IS: heterozygous

1021. QUESTION: Crossing over occurs at _____ stage between non-sister chromatids.

A. 3 - standard
B. 4 - standard
C. 5 - standard
D. none of them

CORRECT ANSWER IS: 4 - standard

1022. QUESTION: Who discovered WZ, ZZ type?

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. Mendel
B. J. Seiler
C. Marian John
D. none of them

CORRECT ANSWER IS: J. Seiler

1023. QUESTION: ABO locus is on which of the chromosome

A. 8th
B. 19th
C. 10th
D. 9th

CORRECT ANSWER IS: 9th

1024. QUESTION: _____ is a rare X linked recessive trait

A. hemophilia
B. color blindness
C. both a and b
D. none of them

CORRECT ANSWER IS: hemophilia

1025. QUESTION: Different alleles of a gene that are both expressed in a heterozygous condition are called

A. complete dominant
B. incomplete dominant
C. co-dominant
D. over-dominant

CORRECT ANSWER IS: co-dominant

1026. QUESTION: In Mendel's law of segregation, phenotypic ratio is

A. 3 : 1

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. 1 : 2 : 1
C. 1 : 3
D. none of them

CORRECT ANSWER IS: 3 : 1

1027. QUESTION: XX, XY type was discovered in

A. 1914
B. 1918
C. 1920
D. none of them

CORRECT ANSWER IS: 1914

1028. QUESTION: The search for mechanism of inheritance of sex started after discovery of Mendel's work in

A. 1901
B. 1902
C. 1900
D. 1906

CORRECT ANSWER IS: 1900

1029. QUESTION: On which of the chromosome H locus is present?

A. 8th
B. 19th
C. 10th
D. 9th

CORRECT ANSWER IS: 19th

1030. QUESTION: Red blindness is named as

A. protanopia
B. deuteranopia

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. tritanopia
D. all of them

CORRECT ANSWER IS: protanopia

1031. QUESTION: Who discovered MN blood types in man?

A. Landsteiner
B. Levine
C. both a and b
D. none of them

CORRECT ANSWER:

1032. QUESTION: What is the genotypic ratio in Mendel's law of segregation?

A. 3 : 1
B. 1 : 2 : 1
C. 1 :3
D. none of them

CORRECT ANSWER IS: 1 : 2 : 1

1033. QUESTION: Who discovered that pollens of certain plants were sex determining?

A. Correns
B. J. Seiler
C. Mendel
D. none of them

CORRECT ANSWER IS: Correns

1034. QUESTION: Many spices of _____ microorganism don't have sex chromosome

A. eukaryotic
B. prokaryotic
C. both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: eukaryotic

1035. QUESTION: Drosophila melanogaster is a biological name of

A. fruit fly
B. bee
C. mosquito
D. none of them

CORRECT ANSWER IS: fruit fly

1036. QUESTION: Bombay phenotype results from

A. epistasis
B. pleiotropy
C. both a and b
D. none of them

CORRECT ANSWER IS: epistasis

1037. QUESTION: There are three general phototypes in MN blood group that are

A. M, N, MN
B. M, N, NN
C. MN, M, MM
D. none of them

CORRECT ANSWER IS: M, N, MN

1038. QUESTION: Law of segregation was proposed by

A. W.S. Sutton
B. Waldyer
C. Mendel
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Mendel

1039. QUESTION: What is blue blindness called

A. protanopia
B. deuteranopia
C. tritanopia
D. all of them

CORRECT ANSWER IS: tritanopia

1040. QUESTION: When XX woman marries with color blind man XY then the chances that their children would be

A. 25% color blind
B. 50% color blind
C. 75% color blind
D. none of them

CORRECT ANSWER IS: 25% color blind

1041. QUESTION: X and Y chromosomes are called

A. sex chromosomes
B. autosomes
C. sex linkage
D. none of them

CORRECT ANSWER IS: sex chromosomes

1042. QUESTION: Genes that affect growth rate in humans, also influence

A. weight
B. height
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: both a and b

1043. QUESTION: If a man of M blood group marries a woman of N blood group then all the children will have _____ blood group.

A. MN
B. M
C. N
D. none of them

CORRECT ANSWER IS: MN

1044. QUESTION: The law in which when an individual showing a dominant genotype is crossed with an individual showing its recessive phenotype is called

A. Law of segregation
B. Test Cross
C. Law of Independent Assortment
D. none of them

CORRECT ANSWER IS: Test Cross

1045. QUESTION: Green blindness is named as

A. protanopia
B. deuteranopia
C. tritanopia
D. none of them

CORRECT ANSWER IS: deuteranopia

1046. QUESTION: Morgan and his colleagues studied patterns of inheritance of more than _____ traits of Drosophila.

A. 86
B. 87
C. 85
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: 85

1047. QUESTION: _____ don't carry any sex determine gene.

A. sex chromosomes
B. autosomes
C. both a and b
D. none of them

CORRECT ANSWER IS: autosomes

1048. QUESTION: In cats, the dominant allele W makes fur

A. black
B. brown
C. white
D. none of them

CORRECT ANSWER IS: white

1049. QUESTION: All such alternative form of genes whose number is more than two is called

A. dominant alleles
B. recessive alleles
C. multiple alleles
D. none of them

CORRECT ANSWER IS: multiple alleles

1050. QUESTION: Homozygous or heterozygous nature of the phenotype is found out by

A. Law of segregation
B. Test Cross
C. Law of Independent Assortment
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: Test Cross

1051. QUESTION: _____ is a true blindness

A. tritanopia
B. monochromacy
C. deuteranopia
D. protanopia

CORRECT ANSWER IS: monochromacy

1052. QUESTION: For about how many years, Pisum Sativum was under experiment in Mendel's monastery garden?

A. 12
B. 9
C. 11
D. none of them

CORRECT ANSWER IS: 11

1053. QUESTION: SRY is the _____ determining gene

A. female
B. male
C. hermaphrodites
D. none of them

CORRECT ANSWER IS: male

1054. QUESTION: In cats, melanocyte failure causes

A. white fur
B. deafness
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1055. QUESTION: Who experienced the genetic basis of ABO blood types?

A. Bernstein
B. Landsteiner
C. Levine
D. none of them

CORRECT ANSWER IS: Bernstein

1056. QUESTION: What generation is produced when RR and rr is crossed?

A. RR
B. rr
C. Rr
D. none of them

CORRECT ANSWER IS: Rr

1057. QUESTION: Dietary Rickets is controlled by

A. Vitamin A
B. Vitamin B
C. Vitamin C
D. Vitamin D

CORRECT ANSWER IS: Vitamin D

1058. QUESTION: In which of the following form of pairs Ascaris incurva has 42 chromosomes?

A. 8 pairs along 13 pairs of autosomes
B. 9 pairs, 12 pairs
C. 7 pairs with 14 pairs
D. none of them

CORRECT ANSWER IS: 8 pairs along 13 pairs of autosomes

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1059. QUESTION: When the genetic basis of ABO system was proposed?

A. 1924
B. 1925
C. 1926
D. 1927

CORRECT ANSWER IS: 1925

1060. QUESTION: What generation is produced when Rr and rr is crossed?

A. Rr, rr
B. rr, RR
C. both a and b
D. none of them

CORRECT ANSWER IS: Rr, rr

1061. QUESTION: Phenotype expression of traits has _____ aspects

A. qualitative
B. quantitative
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1062. QUESTION: A heterozygous female

A. can be bald
B. cannot be bald
C. may be bald
D. none of them

CORRECT ANSWER IS: cannot be bald

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1063. QUESTION: 9/16 ratio in Mendel's law of independent assortment is for

A. round yellow
B. round green
C. wrinkled yellow
D. wrinkled green

CORRECT ANSWER IS: round yellow

1064. QUESTION: A person neither having antigen A nor antigen B has blood group

A. A
B. B
C. O
D. none of them

CORRECT ANSWER IS: O

1065. QUESTION: A gamete without any sex chromosome is called

A. nill gamete
B. nullo gamete
C. both a and b
D. none of them

CORRECT ANSWER IS: nullo gamete

WWW.EASYMCQS.COM

1066. QUESTION: Qualitative difference in phenotypic expression of traits is

A. large
B. small
C. middle
D. none of them

CORRECT ANSWER IS: large

1067. QUESTION: 3/16 ratio in Mendel's law of independent assortment is for

Download PDF Books: WWW.EasyMCQs.Com

A. round green
B. wrinkled yellow
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1068. QUESTION: In the stem, the function is shared by

A. one cell
B. two cells
C. three cells
D. several cells

CORRECT ANSWER IS: several cells

1069. QUESTION: Roots show

A. positive phototropism
B. positive geotropism
C. both a and b
D. negative geotropism

CORRECT ANSWER IS: positive geotropism

1070. QUESTION: Snails and mussels crawl slowly by their

A. pseudopodia
B. feet
C. setae
D. none of them

CORRECT ANSWER IS: feet

1071. QUESTION: Shoulder joint is

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. hinge joint
B. ball and socket joint
C. both a and b
D. none of them

CORRECT ANSWER IS: ball and socket joint

1072. QUESTION: Soft callus begins to form in

A. 1 - 4 weeks
B. 2 - 4 weeks
C. 3 - 4 weeks
D. 4 - 8 weeks

CORRECT ANSWER IS: 3 - 4 weeks

1073. QUESTION: The living cells of epidermis, cortex and pith take in water by

A. diffusion
B. osmosis
C. active transport
D. none of them

CORRECT ANSWER IS: osmosis

1074. QUESTION: Paramecium moves in water with the help of

A. cilia
B. pseudopodia
C. flagella
D. none of them

CORRECT ANSWER IS: cilia

1075. QUESTION: Shoots show

A. negative geotropism

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. negative phototropism
C. both a and b
D. positive geotropism

CORRECT ANSWER IS: negative geotropism

1076. QUESTION: One of the contractile proteins in muscle is

A. histidine
B. fibrinogen
C. oxytocin
D. myosin

CORRECT ANSWER IS: myosin

1077. QUESTION: The seven interior vertebrate lie in the neck region are called

A. thoractic
B. lumber
C. cervical
D. none of them

CORRECT ANSWER IS: cervical

1078. QUESTION: The turgor presence in plants maintains

A. flaccidity in plants
B. turgidity in plants
C. both a and b
D. none of them

CORRECT ANSWER IS: turgidity in plants

1079. QUESTION: Elbow joint is

A. hinge joint
B. ball and socket joint

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. both a and b
D. none of them

CORRECT ANSWER IS: hinge joint

1080. QUESTION: The diameter (in micrometers) of skeletal muscle fiber is

A. 10 - 50
B. 1 - 10
C. 10 - 100
D. 100

CORRECT ANSWER IS: 10 - 100

1081. QUESTION: The non-directional movements of parts of plants in response to external stimuli are called

A. tropic movements
B. turgor movements
C. nastic movements
D. none of them

CORRECT ANSWER IS: nastic movements

1082. QUESTION: Brachioradialis uplift is caused by

A. radius
B. ulna
C. both a and b
D. humerus

CORRECT ANSWER IS: humerus

1083. QUESTION: In cortex and xylem tissue, the heavily lignified cells are

A. collenchyma cells
B. sclerenchyma cells
C. both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: both a and b

1084. QUESTION: Starfish moves with the help of

A. setae
B. foot
C. tube feet
D. cilia

CORRECT ANSWER IS: tube feet

1085. QUESTION: The chest cage comprises of

A. 10 pairs of ribs
B. 12 pairs of ribs
C. 14 pairs of ribs
D. 16 pairs of ribs

CORRECT ANSWER IS: 12 pairs of ribs

1086. QUESTION: Which of the following joints fixes teeth into the jaws?

A. fibrous joints
B. cartilaginous joints
C. synovial joints
D. none of them

CORRECT ANSWER IS: fibrous joints

1087. QUESTION: The hormone responsible for leaf fall in plants is

A. cytokinin
B. auxin
C. kinetin
D. cibberellin

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: auxin

1088. QUESTION: Most of the sclerenchyma cells are

A. living
B. non-living
C. both a and b
D. none of them

CORRECT ANSWER IS: non-living

1089. QUESTION: The diameter (in micrometers) of myofibrils is

A. 1 - 2
B. 1 - 3
C. 1 - 4
D. 2 - 4

CORRECT ANSWER IS: 1 - 2

1090. QUESTION: Cardiac muscles are

A. voluntary
B. involuntary
C. both a and b
D. none of them

CORRECT ANSWER IS: involuntary

1091. QUESTION: Muscle fatigue is caused by

A. lactic acid
B. fumaric acid
C. acetic acid
D. carbon dioxide

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: lactic acid

1092. QUESTION: Apical dominance is due to

A. auxin
B. gibberellin
C. cytokinins
D. ABA

CORRECT ANSWER IS: cytokinins

1093. QUESTION: Which of the following is the first vertebrae of vertebral column?

A. atlas vertebrae
B. axis vertebrae
C. lumber vertebrae
D. cervical vertebrae

CORRECT ANSWER IS: atlas vertebrae

1094. QUESTION: Which one of the following exists as bundle caps?

A. tracheids
B. sclerides
C. vessels
D. none of them

CORRECT ANSWER IS: tracheids

1095. QUESTION: The bones at the elbow joint is bent by the contraction of

A. flexor muscle
B. extensor muscle
C. smooth muscle
D. ligament

CORRECT ANSWER IS: flexor muscle

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1096. QUESTION: The diameter of myosin is

A. 15 mm
B. 16 mm
C. 12 mm
D. 14 mm

CORRECT ANSWER IS: 16 mm

1097. QUESTION: The joints that allow movements in several directions are

A. hinge joints
B. ball and socket joints
C. both a and b
D. none of them

CORRECT ANSWER IS: ball and socket joints

1098. QUESTION: In earthworm, the hydrostatic skeleton consists of fluid filled compartments separated by

A. coelom
B. septa
C. both a and b
D. none of them

CORRECT ANSWER IS: septa

1099. QUESTION: Earthworm shows accordion like movement in which _____ are involved.

A. setae
B. muscles
C. setae and muscles
D. none of them

CORRECT ANSWER IS: setae and muscles

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1100. QUESTION: Which one of the following are found in seed coats?

A. tracheids
B. sclerides
C. vessels
D. none of them

CORRECT ANSWER IS: sclerides

1101. QUESTION: Tibia and fibula form a joint at their distal end with

A. tarsals
B. metatarsals
C. carpals
D. metacarpals

CORRECT ANSWER IS: tarsals

1102. QUESTION: Which one of the following modifications could you consider the most suitable for swift movement?

A. unguligrades
B. bipedals
C. plantigrades
D. digitigrades

CORRECT ANSWER IS: unguligrades

1103. QUESTION: The diameter of actin is

A. 5 - 8 mm
B. 7 - 8 mm
C. 6 - 8 mm
D. 4 - 8 mm

CORRECT ANSWER IS: 7 - 8 mm

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1104. QUESTION: Epicuticle is composed of

A. proteins
B. lipoproteins
C. carbohydrate
D. lipids

CORRECT ANSWER IS: lipoproteins

1105. QUESTION: The cranium encases and supports

A. brain
B. spinal cord
C. lungs
D. all of them

CORRECT ANSWER IS: brain

1106. QUESTION: Which one of the following cells lacks secondary wall?

A. sclerenchyma cells
B. collenchyma cells
C. both a and b
D. none of them

CORRECT ANSWER IS: collenchyma cells

WWW.EASYMCQS.COM

1107. QUESTION: Which of these is a direct source of energy for muscle contraction?

A. ATP
B. creatine phosphate
C. lactic acid
D. both a and b

CORRECT ANSWER IS: ATP

1108. QUESTION: The sacrum is formed by the fusion of anterior _____ vertebrae.

Download PDF Books: WWW.EasyMCQs.Com

A. four
B. five
C. seven
D. none of them

CORRECT ANSWER IS: five

1109. QUESTION: Smooth muscles are present in

A. blood vessels
B. digestive tract and other organs
C. heart
D. both b and c

CORRECT ANSWER IS: both b and c

1110. QUESTION: Some bivalvia and snail have shell composed of crystals of

A. calcium carbonate
B. potassium phosphate
C. sodium phosphate
D. none of them

CORRECT ANSWER IS: calcium carbonate

1111. QUESTION: The only muscle that causes extension at elbow is

A. biceps brachii
B. triceps brachii
C. brachioradii
D. none of them

CORRECT ANSWER IS: triceps brachii

1112. QUESTION: In trees, the active portion is called

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. heartwood
B. sapwood
C. both a and b
D. none of them

CORRECT ANSWER IS: sapwood

1113. QUESTION: The vertebral column in man consists of

A. 22 vertebrae
B. 29 vertebrae
C. 33 vertebrae
D. 39 vertebrae

CORRECT ANSWER IS: 33 vertebrae

1114. QUESTION: Thin filament is called

A. actin
B. myosin
C. actin and myosin
D. none of them

CORRECT ANSWER IS: actin

1115. QUESTION: Pectoral girdle of man connects

A. arms to the trunk
B. arms to the neck
C. arms to the clavicle
D. legs to the trunk

CORRECT ANSWER IS: arms to the trunk

1116. QUESTION: The simplest example of an exoskeleton is the shell of

A. arthropods

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. mollusks
C. Platyhelminthes
D. none of them

CORRECT ANSWER IS: mollusks

1117. QUESTION: Hydra can sometimes move from place to place by

A. creeping
B. creeping and somersaulting
C. somersaulting
D. gliding

CORRECT ANSWER IS: creeping and somersaulting

1118. QUESTION: The inactive non-conducting wood is called

A. sapwood
B. heartwood
C. both a and b
D. none of them

CORRECT ANSWER IS: heartwood

1119. QUESTION: Vertebral column includes

A. sacrum
B. coccyx
C. cervical, thoracic and lumber
D. all of them

CORRECT ANSWER IS: all of them

1120. QUESTION: The pelvic griddle is composed of

A. 2 coxal bone
B. 3 coxal bone

WWW.EASYMCQS.COM

C. 4 coxal bone
D. none of them

CORRECT ANSWER IS: 3 coxal bone

1121. QUESTION: Which of the following bones are present in forearms of man?

A. radius and ulna
B. tibia and fibula
C. sternum and fibula
D. femur and fibula

CORRECT ANSWER IS: radius and ulna

1122. QUESTION: The moulting is composed by a hormone

A. polysome
B. hydrosome
C. ecdysone
D. none of them

CORRECT ANSWER IS: ecdysone

1123. QUESTION: The mammals which walk on the tips of their toes are called

A. digitigrades
B. plantigrades
C. brachiation
D. unguligrades

CORRECT ANSWER IS: unguligrades

1124. QUESTION: Which of the following appears as a cylinder of actively dividing cells between primary xylem and primary phloem?

A. Cork Cambium
B. Vascular Cambium

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. both a and b
D. none of them

CORRECT ANSWER IS: Vascular Cambium

1125. QUESTION: Thick filament is also called

A. myosin
B. actin
C. actin and myosin
D. none of them

CORRECT ANSWER IS: myosin

1126. QUESTION: The flagella are similar in their structure to cilia except that they are

A. more in number
B. relatively large in size
C. few in number
D. both b and c

CORRECT ANSWER IS: both b and c

1127. QUESTION: The skeleton is useful to animal in

A. support
B. protection
C. locomotion
D. all of them

CORRECT ANSWER IS: all of them

1128. QUESTION: Bone forming cells are

A. osteoclast
B. osteocyte
C. osteoblast

WWW.EASYMCQS.COM

D. none of them

CORRECT ANSWER IS: osteoblast

1129. QUESTION: The joint that allows the movements in two directions is called

A. ball and socket joint
B. hinge joint
C. both a and b
D. none of them

CORRECT ANSWER IS: hinge joint

1130. QUESTION: The growth movements of plants induced by the external stimuli are called

A. nastic movements
B. paratonic movements
C. autonomic movements
D. tropic movements

CORRECT ANSWER IS: autonomic movements

1131. QUESTION: The mammals which walk on their soles are called

A. plantigrades
B. unguligrades
C. brachiation
D. digitigrades

CORRECT ANSWER IS: plantigrades

1132. QUESTION: Which of the following animals moves on the tips of its digits?

A. beer
B. rabbit
C. apes
D. deer

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: deer

1133. QUESTION: The total number of skeletal muscles in the human body are

A. 590
B. 625
C. 650
D. 685

CORRECT ANSWER IS: 650

1134. QUESTION: Bone dissolving cells are

A. osteoblast
B. osteoclast
C. osteocyte
D. both a and b

CORRECT ANSWER IS: both a and b

1135. QUESTION: The only muscle that causes relaxation at elbow is

A. biceps brachii
B. triceps brachii
C. both a and b
D. none of them

CORRECT ANSWER IS: biceps brachii

1136. QUESTION: The growth movements which occurs in response to the stimuli of contact with a solid object is termed as

A. thigmotropsim
B. geotropism
C. heliotropism
D. chemotropism

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: thigmotropsim

1137. QUESTION: Arthritis covers _____ types of inflammatory diseases that damage the joints.

A. 50
B. 100
C. 20
D. 150

CORRECT ANSWER IS: 100

1138. QUESTION: The locomotary organs of protozoans are

A. pseudopodia
B. flagella
C. cilia
D. flagella and cilia

CORRECT ANSWER IS: flagella and cilia

1139. QUESTION: Which of the following constitutes the wrist of man?

A. metatarsals
B. carpals
C. metacarpals
D. tarsals

CORRECT ANSWER IS: carpals

1140. QUESTION: The cranium consists of

A. seven bones
B. eight bones
C. nine bones
D. eleven bones

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: eight bones

1141. QUESTION: Tube feet are the locomotary organs of

A. jellyfish
B. snail
C. cuttlefish
D. starfish

CORRECT ANSWER IS: starfish

1142. QUESTION: Daily opening and closing of flowers represent

A. nastic movement
B. tropic movement
C. nutation movement
D. autonomic movement

CORRECT ANSWER IS: nastic movement

1143. QUESTION: The muscles that are attached to the skeleton and are associated with movements of bones are

A. striped
B. cardiac
C. smooth
D. none of them

CORRECT ANSWER IS: striped

1144. QUESTION: The abnormal development of a small skull is known as

A. microcephaly
B. macrocephaly
C. megacephaly
D. mesocephaly

CORRECT ANSWER IS: microcephaly

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1145. QUESTION: Cardiac muscles don't have

A. actin or myosin
B. voluntary system
C. centrally located nuclei
D. none of them

CORRECT ANSWER IS: actin or myosin

1146. QUESTION: Brain is protected by

A. cranium
B. skull
C. orbits
D. all of them

CORRECT ANSWER IS: skull

1147. QUESTION: Which of the following muscles are involuntary?

A. skeletal muscles
B. cardiac muscles
C. smooth muscles
D. both b and c

CORRECT ANSWER IS: both b and c

1148. QUESTION: Phototropism is associated with

A. phytochrome
B. auxin
C. gibberellins
D. kinetin

CORRECT ANSWER IS: auxin

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1149. QUESTION: The five vertebrae of the lower region of the back of man are known as

A. cervical vertebrae
B. sacral vertebrae
C. lumber vertebrae
D. caudal vertebrae

CORRECT ANSWER IS: lumber vertebrae

1150. QUESTION: Rickets is caused by the deficiency of

A. vitamin K
B. vitamin D
C. Vitamin C
D. vitamin A

CORRECT ANSWER IS: vitamin D

1151. QUESTION: Which of the following animals is fast moving?

A. planaria
B. earthworm
C. cockroach
D. snail

CORRECT ANSWER IS: cockroach

WWW.EASYMCQS.COM

1152. QUESTION: There are _____ facial bones.

A. 14
B. 16
C. 9
D. 8

CORRECT ANSWER IS: 16

Download PDF Books: WWW.EasyMCQs.Com

1153. QUESTION: The skeleton is highly advanced in

A. lizard
B. fish
C. spiny anteater
D. penguin

CORRECT ANSWER IS: spiny anteater

1154. QUESTION: Thigmotropsim is exhibited by

A. primary root
B. flower
C. tendrils
D. coleoptile cells

CORRECT ANSWER IS: tendrils

1155. QUESTION: The growing tip of young stem moves in zig zag fashion due to alternate changes in growth on opposite side of the apex is called

A. epinasty
B. nutation
C. hyponasty
D. none of them

CORRECT ANSWER IS: nutation

1156. QUESTION: Healing time (in weeks) for normal persons is

A. 9 - 12
B. 8 - 12
C. 10 - 12
D. none of them

CORRECT ANSWER IS: 8 - 12

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1157. QUESTION: Earthworm moves with the help of

A. setae
B. feet
C. tentacles
D. arms

CORRECT ANSWER IS: setae

1158. QUESTION: Bones are attached to the muscle by

A. tendons
B. ligaments
C. both a and b
D. none of them

CORRECT ANSWER IS: tendons

1159. QUESTION: The movement in response to some chemicals is called

A. thigmotropsim
B. chemotropism
C. phototropism
D. nastic

CORRECT ANSWER IS: chemotropism

1160. QUESTION: The main purpose of respiration is the production of

A. food
B. oxygen
C. energy
D. all of them

CORRECT ANSWER IS: energy

1161. QUESTION: Photorespiration occurs during _____ time.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. night
B. day
C. both a and b
D. none of them

CORRECT ANSWER IS: day

1162. QUESTION: Cockroach has _____ organ

A. specialized
B. non-specialized
C. complex
D. simple

CORRECT ANSWER IS: specialized

1163. QUESTION: From _____ oxygenated blood is carried to all parts of body in fish

A. mouth
B. gills
C. both a and b
D. none of them

CORRECT ANSWER IS: gills

1164. QUESTION: Current gaseous exchange _____ the amount of oxygen

A. increases
B. decreases
C. both a and b
D. none of them

CORRECT ANSWER IS: increases

1165. QUESTION: Which is the energy rich compound produced during respiration?

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. GTP
B. UTP
C. ATP
D. ADP

CORRECT ANSWER IS: ATP

1166. QUESTION: Chest cavity is bounded by

A. muscles
B. ribs
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1167. QUESTION: The respiratory system of cockroach consists of ____ system

A. circulatory
B. complex
C. specialized
D. branching

CORRECT ANSWER IS: branching

1168. QUESTION: Which reaction is carried out by ribulose?

A. addition of oxygen
B. removal of carbon dioxide
C. addition of carbon dioxide
D. removal of oxygen

CORRECT ANSWER IS: addition of oxygen

1169. QUESTION: Water enters through _____ in fish

A. mouth

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. gills
C. nostrils
D. none of them

CORRECT ANSWER IS: mouth

1170. QUESTION: By which process gases are exchanged during respiration?

A. diffusion
B. active transpiration
C. osmosis
D. all of them

CORRECT ANSWER IS: diffusion

1171. QUESTION: Diaphragm is

A. boundary of lungs
B. floor of the chest
C. sheet of cartilage
D. none of them

CORRECT ANSWER IS: floor of the chest

1172. QUESTION: The extensions developed by lungs are known as

A. parabronchi
B. trachea
C. spiracles
D. air sacs

CORRECT ANSWER IS: air sacs

1173. QUESTION: Air tubules are called

A. spiracles
B. tracheoles

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. tracheae
D. none of them

CORRECT ANSWER IS: tracheae

1174. QUESTION: By nature, ribulose is

A. carbohydrate
B. protein
C. vitamin
D. fat

CORRECT ANSWER IS: protein

1175. QUESTION: Which is better medium for respiration?

A. air
B. water
C. both a and b
D. none of them

CORRECT ANSWER IS: air

1176. QUESTION: Gaseous exchange in frog occurs through

A. lungs
B. skin
C. buccal chamber
D. all of them

CORRECT ANSWER IS: all of them

1177. QUESTION: Air saces are _____ in number

A. 4
B. 6
C. 7

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. 9

CORRECT ANSWER IS: 9

1178. QUESTION: How many pairs of spiracles are present in cockroach?

A. 50
B. 60
C. 20
D. 10

CORRECT ANSWER IS: 10

1179. QUESTION: Rubisco serves as

A. carboxylase
B. oxygenase
C. both a and b
D. dehydratase

CORRECT ANSWER IS: both a and b

1180. QUESTION: Pleura is

A. covering of pharynx
B. covering of lungs
C. covering of larynx
D. covering of sacs

CORRECT ANSWER IS: covering of lungs

1181. QUESTION: Oxygen content is greater in

A. air
B. water
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: air

1182. QUESTION: Gaseous exchange through skin is called as

A. cartilaginous respiration
B. pulmonary respiration
C. inspiration
D. cutaneous respiration

CORRECT ANSWER IS: cutaneous respiration

1183. QUESTION: Air passage ways consist of

A. trachea
B. nasal cavities
C. alveolar ducts
D. all of them

CORRECT ANSWER IS: all of them

1184. QUESTION: How many pars of spiracles are present in thorax?

A. 5
B. 10
C. 2
D. 60

CORRECT ANSWER IS: 2

1185. QUESTION: _____ is obtained by hydrolysis of glycolate

A. histidine
B. bproline
C. glycine
D. lycine

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: glycine

1186. QUESTION: Breathing is a _____ process

A. mechanical
B. chemical
C. both a and b
D. none of them

CORRECT ANSWER IS: mechanical

1187. QUESTION: What is the amount of oxygen in one liter of water?

A. 20 ml
B. less than 10 ml
C. 10 ml
D. 200 ml

CORRECT ANSWER IS: less than 10 ml

1188. QUESTION: Nasal cavity is subdivided into ____ passage

A. 4
B. 5
C. 2
D. 3

CORRECT ANSWER IS: 3

1189. QUESTION: Gaseous exchange through the lungs is called

A. pulmonary respiration
B. cutaneous respiration
C. inhalation
D. none of them

CORRECT ANSWER IS: pulmonary respiration

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1190. QUESTION: In which part of tracheoles oxygen dissolves?

A. blind ducts
B. lateral sides
C. epidermal cells
D. all of them

CORRECT ANSWER IS: blind ducts

1191. QUESTION: In which organelle glycine is converted in serine?

A. cytoplasm
B. nucleus
C. ribosomes
D. mitochondria

CORRECT ANSWER IS: mitochondria

1192. QUESTION: In _____ times rhythmical breathing occurs per minute in humans.

A. 19 to 22
B. 8 to 9
C. 6 to 8
D. 15 to 20

CORRECT ANSWER IS: 15 to 20

1193. QUESTION: What is the amount of oxygen in one liter of fresh air?

A. 50 ml
B. 150 ml
C. 100 ml
D. 200 ml

CORRECT ANSWER IS: 200 ml

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1194. QUESTION: By two internal openings nasal cavity leads into

A. throat
B. larynx
C. lungs
D. pharynx

CORRECT ANSWER IS: pharynx

1195. QUESTION: Lungs in frog are _____ sacs.

A. complex
B. large
C. small
D. simple

CORRECT ANSWER IS: simple

1196. QUESTION: The movement of air through the _____ trunks transfer gases through inspiration and expiration.

A. tracheoles
B. tracheal
C. spiracle
D. all of them

CORRECT ANSWER IS: tracheal

1197. QUESTION: Serine is obtained form which process during

A. dark reaction
B. Calvin cycle
C. photorespiration
D. photosynthesis

CORRECT ANSWER IS: photorespiration

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1198. QUESTION: Lungs are _____ in nature.

A. sac like
B. tubular
C. spongy
D. all of them

CORRECT ANSWER IS: spongy

1199. QUESTION: Oxygen diffuses _____ time quickly in air than in water.

A. 5000
B. 4000
C. 8000
D. 9000

CORRECT ANSWER IS: 8000

1200. QUESTION: Larynx is ____ structures

A. ciliated
B. simple
C. cartilaginous
D. muscularly

CORRECT ANSWER IS: cartilaginous

WWW.EASYMCQS.COM

1201. QUESTION: By thin walled air chambers, the inner surface of lungs is

A. decreased
B. increased
C. greater
D. none of them

CORRECT ANSWER IS: increased

1202. QUESTION: How many posterior spiracle pairs open when four pairs of anterior spiracle pairs are closed?

Download PDF Books: WWW.EasyMCQs.Com

A. five pairs
B. two pairs
C. three pairs
D. four pairs

CORRECT ANSWER IS: four pairs

1203. QUESTION: Diaphragm becomes less domelike in shape

A. when its muscles are relaxed
B. when its muscles are contract
C. when its muscles are not in working
D. none of them

CORRECT ANSWER IS: when its muscles are contract

1204. QUESTION: How much distance should take place in which diffusion occur?

A. should be large
B. should be little
C. should be long
D. all of them

CORRECT ANSWER IS: should be little

1205. QUESTION: Epiglottis is the automatic covering of

A. pharynx
B. throat
C. larynx
D. nostrils

CORRECT ANSWER IS: larynx

1206. QUESTION: Water is ____ time viscous than air.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. 60
B. 90
C. 50
D. 80

CORRECT ANSWER IS: 50

1207. QUESTION: The removal of air out of the lungs is called

A. inspiration or inhalation
B. exhalation or expiration
C. both a and b
D. none of them

CORRECT ANSWER IS: exhalation or expiration

1208. QUESTION: _____ is not involved in transport of gases

A. tissue cell
B. organ
C. plasma
D. blood

CORRECT ANSWER IS: blood

1209. QUESTION: During expiration muscles of ribs are

A. contracted
B. relaxed
C. domelike
D. less domelike

CORRECT ANSWER IS: relaxed

1210. QUESTION: The epithelium is only _____ called think

A. 3

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. 4
C. 1
D. 2

CORRECT ANSWER IS: 2

1211. QUESTION: Trachea is a ____ structure

A. complex
B. simple
C. cartilaginous
D. tubular

CORRECT ANSWER IS: tubular

1212. QUESTION: What is the main source of gaseous exchange in plants?

A. xylem vessels
B. stomata
C. phloem vessels
D. all of them

CORRECT ANSWER IS: stomata

1213. QUESTION: Fish has _____ for respiration

A. skin
B. lungs
C. nostrils
D. gills

CORRECT ANSWER IS: gills

1214. QUESTION: In birds, the metabolic rate is

A. low
B. high

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. active
D. elaborate

CORRECT ANSWER IS: high

1215. QUESTION: Carbonic anhydrase are enzyme present in

A. W.B.C
B. R.B.C
C. nucleus
D. plasma

CORRECT ANSWER IS: R.B.C

1216. QUESTION: Hydra has ____ organ for respiration

A. specialized
B. non-specialized
C. simple
D. none of them

CORRECT ANSWER IS: non-specialized

1217. QUESTION: A series of ____ shaped cartilage rings are present in trachea.

A. D
B. C
C. U
D. V

CORRECT ANSWER IS: C

1218. QUESTION: Lenticels perform the function of

A. energy production
B. food production
C. gaseous exchange

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. transport of food directly

CORRECT ANSWER IS: gaseous exchange

1219. QUESTION: Gills are ____ structures

A. non paired
B. simple
C. paired
D. complex

CORRECT ANSWER IS: paired

1220. QUESTION: Which one of the following is more soluble in blood?

A. hydrogen
B. carbon dioxide
C. oxygen
D. nitrogen

CORRECT ANSWER IS: carbon dioxide

1221. QUESTION: The metabolic rate of birds needs _____ amount of oxygen

A. small
B. greater
C. little
D. large

CORRECT ANSWER IS: large

1222. QUESTION: Gaseous exchange occurs through the

A. entire surface of body in contact with water
B. cells lining of the digestive cavity
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: both a and b

1223. QUESTION: When bronchi attain a diameter of ____ they are called bronchioles

A. 2 mm
B. 3 mm
C. 4 mm
D. 1 mm

CORRECT ANSWER IS: 1 mm

1224. QUESTION: Land plants obtain oxygen from

A. air
B. soil
C. water
D. all of them

CORRECT ANSWER IS: air

1225. QUESTION: At the junction of _____ gills are present

A. head
B. trunk
C. head and trunk
D. none of them

CORRECT ANSWER IS: head and trunk

1226. QUESTION: Venous blood has

A. 59 ml of oxygen
B. 94 ml of carbon dioxide
C. 54 ml of carbon dioxide
D. 70 ml of oxygen

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: 54 ml of carbon dioxide

1227. QUESTION: Air is renewed after _____ in birds

A. expiration
B. inspiration
C. both a and b
D. none of them

CORRECT ANSWER IS: inspiration

1228. QUESTION: Earthworm is much complex than

A. cockroach
B. fish
C. frog
D. hydra

CORRECT ANSWER IS: hydra

1229. QUESTION: _____ have the same cartilage

A. trachea
B. bronchioles
C. larynx
D. bronchi

CORRECT ANSWER IS: bronchi

1230. QUESTION: What is the number of stomata situated on 1 square centimeter of leaf surface in tobacco plant?

A. 15000
B. 16000
C. 12000
D. 19000

CORRECT ANSWER IS: 12000

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1231. QUESTION: How many pairs may open through girl sets?

A. 6 to 7
B. 9 to 10
C. 1 to 3
D. 4 to 5

CORRECT ANSWER IS: 4 to 5

1232. QUESTION: Asthma is _____ respiratory disease

A. simple
B. normal
C. serious
D. all of them

CORRECT ANSWER IS: serious

1233. QUESTION: Thin walled ducts present in birds are called

A. bronchi
B. tracheoles
C. bronchioles
D. parabronchi

CORRECT ANSWER IS: parabronchi

1234. QUESTION: The respiratory system is more efficient in

A. man
B. fish
C. birds
D. frog

CORRECT ANSWER IS: man

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1235. QUESTION: Stomata communicates with the spaces present between

A. xylem
B. mesophyll
C. phloem
D. all of them

CORRECT ANSWER IS: mesophyll

1236. QUESTION: Air sacs is the _____ unit of the lungs

A. basic
B. functional
C. both a and b
D. none of them

CORRECT ANSWER IS: functional

1237. QUESTION: Gills have _____ surface area for gaseous exchange

A. small
B. large
C. little
D. all of them

CORRECT ANSWER IS: large

1238. QUESTION: Emphysema is a breakdown of

A. lungs
B. bronchi
C. alveoli
D. mucous membrane

CORRECT ANSWER IS: alveoli

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1239. QUESTION: Parabronchi open at

A. one end
B. posterior end
C. interior end
D. both ends

CORRECT ANSWER IS: both ends

1240. QUESTION: What is the percentage of air spaces present in leaves?

A. 20%
B. 30%
C. 60%
D. 40%

CORRECT ANSWER IS: 40%

1241. QUESTION: Alveoli are _____ layered structure

A. double
B. single
C. triple
D. all of them

CORRECT ANSWER IS: single

WWW.EASYMCQS.COM

1242. QUESTION: In which animal respiration takes place by skin?

A. earthworm
B. frog
C. both a and b
D. fish

CORRECT ANSWER IS: both a and b

1243. QUESTION: The heart of fish is

Download PDF Books: WWW.EasyMCQs.Com

A. single circuit
B. double circuit
C. both a and b
D. none of them

CORRECT ANSWER IS: single circuit

1244. QUESTION: Hemoglobin is most important

A. enzyme
B. protein
C. carbonate ion
D. excretory pigment

CORRECT ANSWER IS: protein

1245. QUESTION: The blood flow in lungs is _____ to the air flow in birds

A. same
B. opposite
C. different
D. reverse

CORRECT ANSWER IS: opposite

1246. QUESTION: The roots of the land plants get their oxygen from

A. air present in soil
B. air present in sea water
C. air present in land water
D. air present in marine water

CORRECT ANSWER IS: air present in sea water

1247. QUESTION: The lungs are _____ sacs.

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. opened
B. small
C. large
D. closed

CORRECT ANSWER IS: closed

1248. QUESTION: From where oxygen passes into blood?

A. skin's epidermal cells
B. cuticle
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1249. QUESTION: From which source aquatic plants obtain their oxygen/

A. present in air
B. present in water
C. dissolved in water
D. none of them

CORRECT ANSWER IS: dissolved in water

1250. QUESTION: Surface area of absorption is _____ in roots by extensive branching

A. increased
B. decreased
C. remained same
D. none of them

CORRECT ANSWER IS: increased

1251. QUESTION: If a plasmolysed cell is placed in distilled water then _____ occurs.

A. further plasmolysis

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. deplasmolysis
C. imbibition
D. all of them

CORRECT ANSWER IS: deplasmolysis

1252. QUESTION: ____ % of total transpiration occurs by lenticular transpiration

A. 1 - 2
B. 5 - 7
C. 90
D. 0

CORRECT ANSWER IS: 1 - 2

1253. QUESTION: Metabolism of nutrients take place in

A. sources
B. sinks
C. both a and b
D. none of them

CORRECT ANSWER IS: sinks

1254. QUESTION: Heart functions as double circuit in

A. reptiles
B. birds
C. mammals
D. all of them

CORRECT ANSWER IS: all of them

1255. QUESTION: Root hairs are extensions of _____ cells of roots.

A. epidermal
B. mesodermal

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. endodermal
D. cortical

CORRECT ANSWER IS: epidermal

1256. QUESTION: Which one of the following red cells inactivates inflammation producing substances?

A. neutrophils
B. eosinophils
C. basophils
D. monocytes

CORRECT ANSWER IS: eosinophils

1257. QUESTION: Incipient point is the point at which

A. plasmolysis is about to happen
B. deplasmolysis is about to happen
C. plasmolysis is about to end
D. deplasmolysis is about to end

CORRECT ANSWER IS: plasmolysis is about to happen

1258. QUESTION: In isobilateral leaves stomata are present on _____ epidermis

A. upper
B. lower
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1259. QUESTION: The weight of blood in our body is about

A. 2/12th
B. 1/12th
C. 3/12th

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. 4/12th

CORRECT ANSWER IS: 1/12th

1260. QUESTION: How excess of minerals enter in the root hairs?

A. by simple diffusion
B. by active transport
C. along with water in bulk flow
D. by osmosis

CORRECT ANSWER IS: along with water in bulk flow

1261. QUESTION: What is the average velocity of sugar in phloem?

A. 1 cm/hr
B. 1 m/hr
C. 1 km/hr
D. 1m/min

CORRECT ANSWER IS: 1 m/hr

1262. QUESTION: Which one of the following red blood cells produces antibodies?

A. epsinophils
B. basophils
C. monocytes
D. lymphocytes

CORRECT ANSWER IS: lymphocytes

1263. QUESTION: Endosmosis causes pressure potential to

A. increase
B. decrease
C. do not change
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: increase

1264. QUESTION: In dorsiventral leaves stomata are present on _____ epidermis

A. upper
B. lower
C. both a and b
D. none of them

CORRECT ANSWER IS: lower

1265. QUESTION: Minerals can only be absorbed by plant roots, if they exist in _____ form

A. bonded with soil particles
B. solution
C. solute
D. solvent

CORRECT ANSWER IS: solution

1266. QUESTION: Blood pressure constitutes _____ by volume of blood

A. 35%
B. 45%
C. 55%
D. 65%

CORRECT ANSWER IS: 55%

1267. QUESTION: What is the habitat of hydra?

A. marine water
B. fresh water
C. damp water
D. dap rocks

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: fresh water

1268. QUESTION: Which one of the following blood cells performs blood clotting?

A. red blood cells
B. white blood cells
C. platelets
D. none of them

CORRECT ANSWER IS: platelets

1269. QUESTION: Value of pressure potential becomes _____ when cell is placed in distilled water.

A. positive
B. negative
C. maximum
D. minimum

CORRECT ANSWER IS: maximum

1270. QUESTION: _____ process is required for uptake of minerals in roots of plants

A. active transport
B. diffusion
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1271. QUESTION: What is the shape of guard cells?

A. spiral shaped
B. red shaped
C. dumble shaped
D. triangular

CORRECT ANSWER IS: dumble shaped

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1272. QUESTION: Blood cells constitute _____ by volume of blood

A. 35%
B. 45%
C. 55%
D. 65%

CORRECT ANSWER IS: 45%

1273. QUESTION: ____ process is involved in ingestion in hydra.

A. osmosis
B. diffusion
C. exocytosis
D. endocytosis

CORRECT ANSWER IS: endocytosis

1274. QUESTION: Cohesion tension theory was proposed by

A. Dixon
B. Munch
C. Sacks
D. H. Van. Mohl

CORRECT ANSWER IS: Dixon

1275. QUESTION: How many lymphocytes are present in white blood cells?

A. 62%
B. 32%
C. 22%
D. 11%

CORRECT ANSWER IS: 32%

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1276. QUESTION: Ions moving in apoplast can only reach

A. epidermis
B. cortex
C. mesodermis
D. endodermis

CORRECT ANSWER IS: endodermis

1277. QUESTION: _____ % of transpiration occurs by stomata

A. 1 - 2
B. 5 - 7
C. 90
D. 0

CORRECT ANSWER IS: 90

1278. QUESTION: Water constitutes _____ by volume of blood plasma.

A. 70%
B. 80%
C. 90%
D. 98%

CORRECT ANSWER IS: 90%

1279. QUESTION: _____ process is involved in removal of indigestible waste in hydra.

A. osmosis
B. diffusion
C. exocytosis
D. endocytosis

CORRECT ANSWER IS: exocytosis

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1280. QUESTION: Cohesion is force of attraction between

A. water molecules among themselves
B. water molecules and xylem cells
C. water molecules and phloem cells
D. water molecules and cortex

CORRECT ANSWER IS: water molecules among themselves

1281. QUESTION: Tonoplast is membrane of

A. Golgi bodies
B. mitochondria
C. vacuole
D. endoplasmic reticulum

CORRECT ANSWER IS: vacuole

1282. QUESTION: Genetically transmitted hemoglobin abnormality is

A. leucaemia
B. thalassemia
C. both a and b
D. none of them

CORRECT ANSWER IS: thalassemia

WWW.EASYMCQS.COM

1283. QUESTION: Proteins produced by blood to protect our body from nucleic acids of invading organism is

A. heparin
B. histamine
C. interferon
D. none of them

CORRECT ANSWER IS: interferon

1284. QUESTION: Who proposed that guard cells are only photosynthesizing cells of epidermis of leaf?

Download PDF Books: WWW.EasyMCQs.Com

A. Dixon
B. Munch
C. Sacks
D. Mohl

CORRECT ANSWER IS: Mohl

1285. QUESTION: Which bonds are formed in cohesion?

A. H - bonds
B. ionic bond
C. covalent bond
D. coordinate covalent bond

CORRECT ANSWER IS: H - bonds

1286. QUESTION: Which process is involved in movement of food material in planaria?

A. diffusion
B. osmosis
C. exocytosis
D. endocytosis

CORRECT ANSWER IS: diffusion

WWW.EASYMCQS.COM

1287. QUESTION: Active transport is dependent on

A. breathing
B. inhaling
C. exhaling
D. respiration

CORRECT ANSWER IS: respiration

1288. QUESTION: What is the percentage of inorganic ions and salts in blood plasma?

Download PDF Books: WWW.EasyMCQs.Com

A. 0.20%
B. 0.50%
C. 0.70%
D. 0.90%

CORRECT ANSWER IS: 0.90%

1289. QUESTION: Extracellular oedema is caused by

A. abnormal leakage of fluid from blood capillaries
B. failure of lymphatic system
C. renal retention of salts and water
D. all of them

CORRECT ANSWER IS: all of them

1290. QUESTION: Increased in sugar level causes stomata to

A. close
B. open
C. rupture
D. germinate

CORRECT ANSWER IS: open

1291. QUESTION: Energy for tension is provided by

A. imbibition
B. transpiration
C. plasmolysis
D. osmosis

CORRECT ANSWER IS: transpiration

1292. QUESTION: _____ type of transport requires carriers for its progress

A. simple diffusion

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. facilitated diffusion
C. active transport
D. osmosis

CORRECT ANSWER IS: facilitated diffusion

1293. QUESTION: Relaxed period of heart chamber is called

A. diastole
B. systole
C. both a and b
D. none of them

CORRECT ANSWER IS: diastole

1294. QUESTION: Transport system of planaria is

A. highly developed
B. poorly developed
C. rudimentary
D. absent

CORRECT ANSWER IS: absent

1295. QUESTION: Normal pH of blood is

A. 7.2
B. 7.4
C. 5.2
D. 5.4

CORRECT ANSWER IS: 7.4

1296. QUESTION: Force of attraction between water molecules and xylem cells is called as

A. cohesion
B. adhesion

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. tension
D. none of them

CORRECT ANSWER IS: adhesion

1297. QUESTION: Rate of transpiration is greater in _____ light

A. strong
B. dim
C. equal in both a and b
D. zero in both a and b

CORRECT ANSWER IS: strong

1298. QUESTION: Carriers for facilitated diffusion are composed of

A. protein
B. carbohydrates
C. fats
D. vitamins

CORRECT ANSWER IS: protein

1299. QUESTION: Contraction period of heart chamber is called

A. diastole
B. systole
C. both a and b
D. none of them

CORRECT ANSWER IS: systole

1300. QUESTION: Circulatory fluid of cockroach is

A. blood
B. lymph
C. hemolymph

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. serum

CORRECT ANSWER IS: hemolymph

1301. QUESTION: _____ component of cell wall has maximum affinity with water.

A. pectin
B. lignin
C. cellulose
D. hemicellulose

CORRECT ANSWER IS: cellulose

1302. QUESTION: What is the percentage by weight of plasma proteins in blood?

A. 2 - 5
B. 5 - 7
C. 7 - 9
D. 9 - 11

CORRECT ANSWER IS: 7 - 9

1303. QUESTION: Movement of water molecules from their higher concentration towards lower concentration through a selectively permeable membrane is called

A. active transport
B. simple diffusion
C. osmosis
D. facilitated diffusion

CORRECT ANSWER IS: osmosis

1304. QUESTION: By increasing temperature to 10 degree centigrade rate of transpiration occurs by _____ times

A. 10
B. 20
C. 2

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. 4

CORRECT ANSWER IS: 2

1305. QUESTION: Heart sound "DUBB" is made by closure of

A. tricuspid valve
B. bicuspid valve
C. both a and b
D. semilunar valve

CORRECT ANSWER IS: both a and b

1306. QUESTION: Sinus around viscera is termed as

A. perivisceral sinus
B. perivisceral sinus
C. perineural sinus
D. paraneural sinus

CORRECT ANSWER IS: perivisceral sinus

1307. QUESTION: Strength of cell wall of xylem cells is provided by

A. pectin, lignin
B. pectin, cellulose
C. lignin, cellulose
D. none of them

CORRECT ANSWER IS: lignin, cellulose

1308. QUESTION: Water reaches xylem tissue by

A. apoplast pathway
B. vacuolar pathway
C. symplast pathway
D. all of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: all of them

1309. QUESTION: Which one of the following proteins acts as catalyst in blood clotting process?

A. thrombin
B. fibrinogen
C. prothrombin
D. none of them

CORRECT ANSWER IS: prothrombin

1310. QUESTION: Heart sound "LUBB" is made by closure of

A. tricuspid valve
B. bicuspid valve
C. both a and b
D. semilunar valve

CORRECT ANSWER IS: semilunar valve

1311. QUESTION: Low concentration of carbon dioxide gas causes stomata to

A. open
B. close
C. rupture
D. germinate

CORRECT ANSWER IS: open

1312. QUESTION: Evaporation of water from aerial parts of plant is called

A. transpiration
B. transportation
C. translocation
D. transduction

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: transpiration

1313. QUESTION: ____ is respiratory pigment

A. actin
B. myosin
C. tropomyosin
D. hemoglobin

CORRECT ANSWER IS: hemoglobin

1314. QUESTION: _____ pathway involves system of adjacent cell walls.

A. apoplast
B. symplast
C. vacuolar
D. all of them

CORRECT ANSWER IS: apoplast

1315. QUESTION: ____ plays important role in body's defense against diseases

A. fibrinogen
B. prothrombin
C. immunoglobulin
D. none of them

CORRECT ANSWER IS: immunoglobulin

1316. QUESTION: Duration of one complete heart cycle is

A. 0.2 seconds
B. 0.4 seconds
C. 0.6 seconds
D. 0.8 seconds

CORRECT ANSWER IS: 0.8 seconds

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1317. QUESTION: Level of carbon dioxide rises at _____ in plants

A. day
B. night
C. evening
D. morning

CORRECT ANSWER IS: night

1318. QUESTION: What is the effect of transpiration on water potential?

A. it increases
B. it decreases
C. it does not change
D. it becomes zero

CORRECT ANSWER IS: it decreases

1319. QUESTION: What is the blood color of cockroach?

A. red
B. green
C. black
D. colorless

CORRECT ANSWER IS: colorless

1320. QUESTION: Apoplast pathway becomes discontinuous in

A. epidermis
B. mesodermis
C. endodermis
D. all of them

CORRECT ANSWER IS: endodermis

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1321. QUESTION: How many erythrocytes are present in one cubic millimeter blood of males?

A. 5 - 5.5 millions
B. 4 - 4.5 million
C. 5 - 5.5 billion
D. 4 - 4.5 billions

CORRECT ANSWER IS: 5 - 5.5 millions

1322. QUESTION: What is the blood flow rate in aorta?

A. 200 - 300 mm per second
B. 400 - 500 mm per second
C. 100 - 200 mm per second
D. 200 - 300 mm per second

CORRECT ANSWER IS: 400 - 500 mm per second

1323. QUESTION: Transpiration is greater in ___ air

A. dry
B. humid
C. dusty
D. both a and c

CORRECT ANSWER IS: dry

WWW.EASYMCQS.COM

1324. QUESTION: How many pairs of lateral hearts are present in earthworm?

A. 1
B. 11
C. 0
D. 4

CORRECT ANSWER IS: 4

Download PDF Books: WWW.EasyMCQs.Com

1325. QUESTION: _____ is active force in ascent of sap during day time

A. root pressure
B. transpiration
C. transpiration pull
D. none of them

CORRECT ANSWER IS: transpiration pull

1326. QUESTION: Normal systolic pressure of individual is

A. 900 mm Hg
B. 100 mm Hg
C. 110 mm Hg
D. 120 mm Hg

CORRECT ANSWER IS: 120 mm Hg

1327. QUESTION: What are plasmodesmata?

A. nuclear granules
B. cytoplasmic granules
C. vacuolar membrane
D. cytoplasmic strands

CORRECT ANSWER IS: cytoplasmic strands

WWW.EASYMCQS.COM

1328. QUESTION: How many erythrocytes are present in one cubic millimeter blood of females?

A. 5 - 5.5 millions
B. 4 - 4.5 million
C. 5 - 5.5 billions
D. 4 - 4.5 billions

CORRECT ANSWER IS: 4 - 4.5 million

1329. QUESTION: How many chambers are present in heart of cockroach?

Download PDF Books: WWW.EasyMCQs.Com

A. 3
B. 5
C. 13
D. 7

CORRECT ANSWER IS: 13

1330. QUESTION: Rate of transpiration is less in

A. wind
B. still air
C. air in motion
D. both a and c

CORRECT ANSWER IS: still air

1331. QUESTION: Range of hydrostatic pressure generated by root pressure is

A. 100 - 200 Kpa
B. 200 - 400 Kpa
C. 600 - 800 Kpa
D. 350 - 550 Kpa

CORRECT ANSWER IS: 100 - 200 Kpa

1332. QUESTION: Normal diastolic pressure of individual is

A. 65 - 75 mm Hg
B. 75 - 85 mm Hg
C. 85 - 95 mm Hg
D. 95 - 105 mm Hg

CORRECT ANSWER IS: 75 - 85 mm Hg

1333. QUESTION: Thrombus formation is caused by

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. pneumonia
B. tuberculosis
C. emphysema
D. all of them

CORRECT ANSWER IS: all of them

1334. QUESTION: Function of plasmodesmata is

A. transport of food
B. transport of water
C. interconnection of neighboring cells
D. none of them

CORRECT ANSWER IS: interconnection of neighboring cells

1335. QUESTION: Circulatory system of vertebras is of _____ type.

A. open
B. close
C. both a and b
D. none of them

CORRECT ANSWER IS: close

1336. QUESTION: ____ causes conduction of water in tall plants

A. root pressure
B. transpiration
C. transpiration pull
D. transpiration stream

CORRECT ANSWER IS: transpiration pull

1337. QUESTION: Average life span of red blood cell is about

A. 40 days

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. 60 days
C. 80 days
D. 120 days

CORRECT ANSWER IS: 120 days

1338. QUESTION: _____ is lost during guttation

A. minerals
B. food
C. water
D. none of them

CORRECT ANSWER IS: water

1339. QUESTION: Blockage of blood vessel in heart by an embolus causes

A. heart attack
B. stroke
C. both a and b
D. none of them

CORRECT ANSWER IS: heart attack

1340. QUESTION: Water moves by _____ process in vacuolar pathway

A. active transport
B. osmosis
C. simple diffusion
D. facilitated diffusion

CORRECT ANSWER IS: osmosis

1341. QUESTION: Exchange of material between blood and tissues takes place in

A. arteries
B. veins

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. capillaries
D. all of them

CORRECT ANSWER IS: capillaries

1342. QUESTION: _____ causes distribution of minerals throughout body

A. root pressure
B. transpiration
C. transpiration pull
D. transpiration stream

CORRECT ANSWER IS: transpiration stream

1343. QUESTION: How many white blood cells are present in one cubic millimeter of blood?

A. 7000 - 8000
B. 8000 - 9000
C. 9000 -11000
D. 11000 - 13000

CORRECT ANSWER IS: 7000 - 8000

1344. QUESTION: Guttation occurs from

A. stomata
B. lenticels
C. hydathodes
D. all of them

CORRECT ANSWER IS: hydathodes

1345. QUESTION: Blockage of blood vessel in brain by an embolus causes

A. heart attack
B. stroke
C. both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: stroke

1346. QUESTION: Solute concentration is also termed as

A. pressure potential
B. water potential
C. osmotic potential
D. none of them

CORRECT ANSWER IS: osmotic potential

1347. QUESTION: Conus arterious is part of

A. atrium
B. ventricle
C. aorta
D. pulmonary vein

CORRECT ANSWER IS: aorta

1348. QUESTION: _____ surface is more suitable for gaseous exchange

A. wet
B. dry
C. moist
D. both a and c

CORRECT ANSWER IS: both a and c

1349. QUESTION: Eosinophil belongs to

A. granulocytes
B. agranulocytes
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: granulocytes

1350. QUESTION: Who produced that water moves along xylem vessels by imbibition?

A. Dixon
B. Munch
C. Sacks
D. Mohl

CORRECT ANSWER IS: Sacks

1351. QUESTION: _____ is present in wall of cloaca of young birds.

A. thymus gland
B. bursa of fabricius
C. both a and b
D. none of them

CORRECT ANSWER IS: bursa of fabricius

1352. QUESTION: Which form of water has maximum potential?

A. sugar solution
B. salt solution
C. electrolyte colution
D. pure water

CORRECT ANSWER IS: pure water

1353. QUESTION: Which arteries supply blood to heart?

A. subclavian
B. iliac
C. axillary
D. coronary

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: coronary

1354. QUESTION: Monocyte belongs to

A. granulocytes
B. agranulocytes
C. both a and b
D. none of them

CORRECT ANSWER IS: agranulocytes

1355. QUESTION: Which tissues are responsible for transpiration of organic solutes in plants?

A. phloem
B. xylem
C. chlorenchyma
D. sclerenchyma

CORRECT ANSWER IS: phloem

1356. QUESTION: Imbibition causes volume of dry seed to increase about _____ times.

A. 10
B. 20
C. 100
D. 200

CORRECT ANSWER IS: 200

1357. QUESTION: Maximum value of water potential is

A. 1000
B. 1
C. 2
D. 0

CORRECT ANSWER IS: 0

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1358. QUESTION: Lymph nodes are present in

A. neck region
B. axilia
C. groin
D. all of them

CORRECT ANSWER IS: all of them

1359. QUESTION: Blood from sinus venoses enters in

A. ventricle
B. aorta
C. atrium
D. gills

CORRECT ANSWER IS: atrium

1360. QUESTION: Which part of bark is constituted by phloem?

A. outer
B. inner
C. middle
D. all of them

CORRECT ANSWER IS: inner

1361. QUESTION: What is the diameter (in micrometers) of red blood cells?

A. 8
B. 7
C. 6
D. 5

CORRECT ANSWER IS: 8

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1362. QUESTION: Osmotic potential depends on

A. number of water molecules
B. KE of water molecules
C. solute concentration
D. solvent density

CORRECT ANSWER IS: solute concentration

1363. QUESTION: Bleeding of plants occurs from _____ parts

A. aerated
B. wounded
C. growing
D. cuticular

CORRECT ANSWER IS: wounded

1364. QUESTION: Branches of lymph capillaries within villi of intestine are called

A. nodes
B. ducts
C. lacteals
D. all of them

CORRECT ANSWER IS: lacteals

1365. QUESTION: Blood from ventral aorta enters in _____ in fish.

A. dorsal aorta
B. sinus venosus
C. gills
D. conus arteriosus

CORRECT ANSWER IS: gills

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1366. QUESTION: Sieve elements are functional cells of

A. phloem
B. xylem
C. chlorenchyma
D. sclerenchyma

CORRECT ANSWER IS: phloem

1367. QUESTION: Heparin is released by

A. neutrophils
B. eosinophils
C. basophils
D. monocytes

CORRECT ANSWER IS: basophils

1368. QUESTION: During plasmolysis, volume of cells is

A. increased
B. decreased
C. not changed
D. becomes zero

CORRECT ANSWER IS: decreased

WWW.EASYMCQS.COM

1369. QUESTION: Mass flow systems are absent in

A. unicellular organisms
B. simple multicellular organisms
C. complex multicellular organisms
D. both a and b

CORRECT ANSWER IS: both a and b

1370. QUESTION: Flow of sap due to bleeding ranges from

Download PDF Books: WWW.EasyMCQs.Com

A. 10 - 15 liters / hr
B. 10 - 15 liters / day
C. 10 - 15 milliliters / day
D. 1 liter / day

CORRECT ANSWER IS: 10 - 15 liters / day

1371. QUESTION: Which one of the following red blood cell destroys small particles by phagocytosis?

A. neutrophils
B. eosinophils
C. basophils
D. monocytes

CORRECT ANSWER IS: neutrophils

1372. QUESTION: How many heart chambers are present in amphibians?

A. 3
B. 4
C. 5
D. 6

CORRECT ANSWER IS: 5

1373. QUESTION: Communication between sieve tubes and companion cells is formed by

A. cell wall
B. cell membrane
C. nucleus
D. cytoplasm

CORRECT ANSWER IS: cytoplasm

1374. QUESTION: Plasmolysis occurs due to

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. endosmosis
B. exosmosis
C. active transport
D. diffusion

CORRECT ANSWER IS: exosmosis

1375. QUESTION: Which one of the following red blood cell destroys large particles by phagocytosis?

A. neutrophils
B. eosinophils
C. basophils
D. monocytes

CORRECT ANSWER IS: monocytes

1376. QUESTION: Transcription can take place through

A. stomata
B. lenticels
C. cuticle
D. all of them

CORRECT ANSWER IS: all of them

1377. QUESTION: How many heart chambers are present in reptiles and amniotes?

A. 2
B. 3
C. 4
D. 5

CORRECT ANSWER IS: 4

1378. QUESTION: Which substances, are supplied by companion cells to sieve tubes?

A. vitamins and minerals

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. carbohydrates and fats
C. ATP and proteins
D. water and iron

CORRECT ANSWER IS: ATP and proteins

1379. QUESTION: If a cell is placed in solution having low water potential then _____ occurs.

A. plasmolysis
B. deplasmolysis
C. imbibition
D. none of them

CORRECT ANSWER IS: plasmolysis

1380. QUESTION: In organisms, methods of reproduction are

A. same
B. varied and complex
C. simple
D. all of them

CORRECT ANSWER IS: varied and complex

1381. QUESTION: Pollen tube acts as vehicle for ____ gametes.

A. male
B. female
C. both a and b
D. none of them

CORRECT ANSWER IS: male

1382. QUESTION: In nature the conversion of _____ takes place in day light

A. P 660 to P 739
B. P 731 to P 669

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. P 730 to P 660
D. all of them

CORRECT ANSWER IS: P 730 to P 660

1383. QUESTION: In sexual reproduction, offspring are

A. identical to parents
B. non-identical to parents
C. have no gametes
D. micro-organisms

CORRECT ANSWER IS: non-identical to parents

1384. QUESTION: Primary oocyte divides by

A. meiosis
B. mitosis
C. both a and b
D. none of them

CORRECT ANSWER IS: meiosis

1385. QUESTION: Reproduction is the mechanism that produces

A. new generation
B. maintain a species
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1386. QUESTION: A special structure modified after release of egg is called as

A. endometrium
B. gonadotropin
C. corpus luteum

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. follicle

CORRECT ANSWER IS: corpus luteum

1387. QUESTION: Red light inhibits flowering of the short day plants but promotes flowering in _____ plants

A. short day
B. long day
C. light day
D. dark day

CORRECT ANSWER IS: long day

1388. QUESTION: In parathenocarpy, _____ formation takes place.

A. no seed
B. seed
C. fruit
D. none of them

CORRECT ANSWER IS: no seed

1389. QUESTION: One ovum is discharged from ovary by

A. one time
B. more than one time
C. two times
D. more than two times

CORRECT ANSWER IS: one time

1390. QUESTION: Union of gametes is called

A. internal fertilization
B. genetic recombination
C. fertilization
D. external fertilization

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: fertilization

1391. QUESTION: How many types of reproduction are there?

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 2

1392. QUESTION: Corpus luteum is _____ in color.

A. red
B. yellow
C. white
D. pink

CORRECT ANSWER IS: yellow

1393. QUESTION: "Florigen" is a

A. protein
B. plant name
C. hormone
D. none of them

CORRECT ANSWER IS: hormone

1394. QUESTION: Which one is parathenocarpy fruit?

A. pineapple
B. banana
C. orange
D. all of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: banana

1395. QUESTION: Oviduct is also called as

A. fallopian tube
B. uterine tube
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1396. QUESTION: In which reproduction, the offspring gives rise by mitotic cell division?

A. sexual
B. asexual
C. both a and b
D. none of them

CORRECT ANSWER IS: asexual

1397. QUESTION: External fertilization occurs in ____ animals.

A. land
B. aquatic
C. both a and b
D. none of them

CORRECT ANSWER IS: aquatic

1398. QUESTION: _____ hormone maintains the pregnancy.

A. FSH
B. LH
C. progesterone
D. testosterone

CORRECT ANSWER IS: progesterone

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1399. QUESTION: The process of vernalization occurs in _____ plants

A. perennial
B. biennials
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1400. QUESTION: Parathenocarpy occurs due to

A. low auxin levels in ovaries
B. medium auxin levels in ovaries
C. high auxin levels in ovaries
D. none of them

CORRECT ANSWER IS: high auxin levels in ovaries

1401. QUESTION: _____ ovum enters the uterus

A. non-fertilized
B. fertilized
C. both a and b
D. none of them

CORRECT ANSWER IS: fertilized

1402. QUESTION: In which cell division, the chromosome number is replicated and pass on?

A. mitotic cell division
B. meiosis cell division
C. both a and b
D. none of them

CORRECT ANSWER IS: mitotic cell division

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1403. QUESTION: Those animals which can lay shelled eggs to protect the developing embryo are called

A. oviparous
B. viviparous
C. placental animals
D. all of them

CORRECT ANSWER IS: oviparous

1404. QUESTION: Which of the following hormones stimulates mammary development in preparation for lactation?

A. LTH
B. placental lactogen
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1405. QUESTION: _____ temperature is required for vernalization

A. low
B. high
C. both a and b
D. none of them

CORRECT ANSWER IS: low

1406. QUESTION: Seed dolmary is the special condition

A. embryo
B. fertilized egg
C. hormonal imbalance
D. rest

CORRECT ANSWER IS: rest

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1407. QUESTION: Placenta is established between

A. uterine walls
B. foetal tissues
C. uterine and foetal tissues
D. none of them

CORRECT ANSWER IS: uterine and foetal tissues

1408. QUESTION: Methods of asexual reproduction are

A. parthenogenesis
B. fission
C. sporulation
D. none of them

CORRECT ANSWER IS: none of them

1409. QUESTION: Those animals which give birth to young one are called

A. oviparous
B. viviparous
C. placental animals
D. all of them

CORRECT ANSWER IS: viviparous

1410. QUESTION: In which month of pregnancy the human embryo is referred to as the foetus?

A. 4th
B. 5th
C. 6th
D. 3rd

CORRECT ANSWER IS: 3rd

1411. QUESTION: How much temperature (degree centigrade) is found very effective in vernalization?

WWW.EASYMCQS.COM

A. 60
B. 80
C. 90
D. 40

CORRECT ANSWER IS: 40

1412. QUESTION: More auxin is produced by the tissues of style and ovary due to

A. germinating pollen grains
B. germinating pollen tubes
C. spermatophytes
D. spore formation

CORRECT ANSWER IS: germinating pollen grains

1413. QUESTION: Uterus opens into the vagina through

A. fallopian tube
B. uterine tube
C. foetal tube
D. cervix

CORRECT ANSWER IS: fallopian tube

1414. QUESTION: How many parents are involved in sexual reproduction?

A. 2
B. more than 2
C. 1
D. 4

CORRECT ANSWER IS: 2

1415. QUESTION: In which week of pregnancy, the major organs are formed?

WWW.EASYMCQS.COM

A. 13th week
B. 11th week
C. 14th week
D. 12th week

CORRECT ANSWER IS: 12th week

1416. QUESTION: Male reproductive system consists of _____ genitalia

A. external
B. internal
C. both a and b
D. all of them

CORRECT ANSWER IS: external

1417. QUESTION: Which type of reproduction is more common in plants?

A. asexually
B. sexually
C. both a and b
D. none of them

CORRECT ANSWER IS: asexually

1418. QUESTION: What is the characteristic feature of photoperiod?

A. it does not affect flowering
B. affects flowering
C. affects light production
D. none of them

CORRECT ANSWER IS: affects flowering

1419. QUESTION: Production of egg is a _____ activity

A. cyclic

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. non-cyclic
C. both a and b
D. none of them

CORRECT ANSWER IS: none of them

1420. QUESTION: Fertilized egg is produced through

A. union of mitotic division
B. union of meiotic division
C. both a and b
D. none of them

CORRECT ANSWER IS: union of meiotic division

1421. QUESTION: Pituitary gland produces _____ hormone which induces labor pains.

A. FSH
B. LH
C. progesterone
D. oxytocin

CORRECT ANSWER IS: oxytocin

1422. QUESTION: Genitalia consists of ____ in males

A. two pairs of testes
B. three pairs of testes
C. one pair of testes
D. four pairs of testes

CORRECT ANSWER IS: one pair of testes

1423. QUESTION: In honey bee, male is

A. diploid
B. haploid

WWW.EASYMCQS.COM

C. both a and b
D. none of them

CORRECT ANSWER IS: haploid

1424. QUESTION: In _____ effect of photo-periodism was first studied

A. 1960
B. 1942
C. 1953
D. 1920

CORRECT ANSWER IS: 1920

1425. QUESTION: In human females, the reproductive cycle is completed in

A. 27 days
B. 28 days
C. 29 days
D. 30 days

CORRECT ANSWER IS: 28 days

1426. QUESTION: In which division, reshuffling of genes leads to new recombination of genes?

A. mitotic division
B. meiotic division
C. both a and b
D. none of them

CORRECT ANSWER IS: meiotic division

1427. QUESTION: In _____ minutes after birth, uterus contracts and separates placenta.

A. 20 - 45
B. 15 - 45
C. 14 - 45

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. 10 - 45

CORRECT ANSWER IS: 10 - 45

1428. QUESTION: The shape of scrotum is

A. round
B. rod like
C. sac like
D. all of them

CORRECT ANSWER IS: sac like

1429. QUESTION: In "Apomixes" the ovule from the nucleus, develops into an embryo in the

A. presence of male gamete
B. absence of male gamete
C. presence of both male and female gametes
D. absence of both gametes

CORRECT ANSWER IS: absence of male gamete

1430. QUESTION: Short-day plants are really

A. short night plants
B. long night plants
C. short-day and night plants
D. none of them

CORRECT ANSWER IS: long night plants

1431. QUESTION: Meiosis occurs in plants during

A. spore formation
B. alteration of generation
C. adaptation of species
D. genetic variation

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: spore formation

1432. QUESTION: Menstrual cycle can be divided into _____ phases

A. 2
B. 3
C. 8
D. 4

CORRECT ANSWER IS: 4

1433. QUESTION: Testis consists of a _____ system

A. complex duct system
B. simple duct system
C. complex genitalia
D. simple ganitalia

CORRECT ANSWER IS: complex duct system

1434. QUESTION: _____ excises from plants in tissue culturing

A. epidermal tissue
B. cortex
C. vascular
D. cambium

CORRECT ANSWER IS: cambium

1435. QUESTION: Gonorrhea is caused by ____ bacteria

A. gram negative
B. gram positive
C. both a and b
D. none of them

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: gram positive

1436. QUESTION: _____ light promotes germination of some seeds

A. white light
B. sunlight
C. dark light
D. red light

CORRECT ANSWER IS: red light

1437. QUESTION: Follicle stimulating hormone releases from

A. parathyroid glands
B. thyroid glands
C. pituitary glands
D. none of them

CORRECT ANSWER IS: pituitary glands

1438. QUESTION: Which of the following is produced by the cell division of Epithelium cells?

A. seminiferous tubules
B. spermatogonia
C. sperms
D. scrotum

CORRECT ANSWER IS: scrotum

1439. QUESTION: Alteration of generation occurs in plants

A. between a diploid sporophyte
B. in haploid gametophyte
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1440. QUESTION: IAA stands for

A. Idole Acetic Acid
B. Idole Acetate Acid
C. both a and b
D. none of them

CORRECT ANSWER IS: Idole Acetic Acid

1441. QUESTION: Newborn infant acquires serious eye infections due to _____ disease.

A. syphilis
B. genital herpes
C. gonorrhea
D. none of them

CORRECT ANSWER IS: gonorrhea

1442. QUESTION: Follicle hormone is

A. FGH
B. FCH
C. FJH
D. FSH

CORRECT ANSWER IS: FSH

1443. QUESTION: Cocklebur is a _____ day plant

A. long
B. short
C. both a and b
D. none of them

CORRECT ANSWER IS: short

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1444. QUESTION: Fluid is secreted by _____ cells

A. spermatids
B. spermatocytes
C. scrotum
D. sertoli

CORRECT ANSWER IS: sertoli

1445. QUESTION: In plants, reproduction occurs by

A. sexually
B. asexually
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1446. QUESTION: _____ are produced from a single cell by sub-culturing.

A. clones
B. twins
C. parthenocarps
D. all of them

CORRECT ANSWER IS: clones

1447. QUESTION: Ovary produces _____ hormone

A. testosterone
B. estrogen
C. auxin
D. all of them

CORRECT ANSWER IS: estrogen

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1448. QUESTION: Syphilis damages the

A. reproductive organs
B. eye bones joints
C. central nervous system
D. all of them

CORRECT ANSWER IS: all of them

1449. QUESTION: A blue light sensitive protein pigment is called as

A. phytochromes
B. xanthium
C. chrysanthemum
D. all of them

CORRECT ANSWER IS: phytochromes

1450. QUESTION: How many pairs of ovaries lie within the bidy of a female?

A. 2
B. 3
C. 4
D. 1

CORRECT ANSWER IS: 1

1451. QUESTION: Plants have _____ with alternating diploid sporophyte and haploid gametophyte generation

A. diploplontic life cycle
B. diploteroplantic life cycle
C. isomorphic life cycle
D. diplohaplontic life cycle

CORRECT ANSWER IS: diplohaplontic life cycle

1452. QUESTION: Cloned cells allow the _____ study

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. quantitative
B. qualitative
C. both a and b
D. none of them

CORRECT ANSWER IS: quantitative

1453. QUESTION: Genital Herpes is caused by

A. bacteria
B. virus
C. both a and b
D. fungi

CORRECT ANSWER IS: virus

1454. QUESTION: Which one induces ovulation the release of ovum from the follicle?

A. FSH
B. oxytocin
C. LH
D. prolactin

CORRECT ANSWER IS: prolactin

1455. QUESTION: Protein pigments exist in _____ form

A. 1
B. 2
C. 3
D. 4

CORRECT ANSWER IS: 2

1456. QUESTION: Two similar generation are referred to as

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. heteromorphic
B. isomorphic
C. haploid generation
D. none of them

CORRECT ANSWER IS: isomorphic

1457. QUESTION: Oogonia divides by

A. meiosis
B. mitosis
C. both a and b
D. none of them

CORRECT ANSWER IS: mitosis

1458. QUESTION: In higher vertebrates, the _____ cell division occurs.

A. meiotic
B. mitotic
C. both a and b
D. none of them

CORRECT ANSWER IS: mitotic

1459. QUESTION: Seed plants are predominantly present due to their reproduction

A. sexually
B. asexually
C. artificial
D. all of them

CORRECT ANSWER IS: sexually

1460. QUESTION: The progressive changes which are undergone before an organism acquired its adult's form constitute

A. life cycle

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. growth
C. embryonic development
D. none of them

CORRECT ANSWER IS: embryonic development

1461. QUESTION: Lateral meristems are present in

A. dicots
B. monocots
C. both a and b
D. none of them

CORRECT ANSWER IS: monocots

1462. QUESTION: The growth rate is influenced by

A. external factor
B. internal factor
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1463. QUESTION: _____ supplies energy for growth of plants.

A. vitamin
B. water
C. hormone
D. nutrition

CORRECT ANSWER IS: nutrition

1464. QUESTION: During organogenesis, _____ of cells occurs.

A. body organ formation
B. cell interaction

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

C. differentiation
D. all of them

CORRECT ANSWER IS: cell interaction

1465. QUESTION: ____ produces larval epidermis.

A. yellow cytoplasm
B. gray vegetal cytoplasm
C. clear cytoplasm
D. gray equatorial cytoplasm

CORRECT ANSWER IS: clear cytoplasm

1466. QUESTION: Plant growth and development involve

A. cell division
B. elongation of cells in tissue
C. difference of cells in tissues
D. all of them

CORRECT ANSWER IS: all of them

1467. QUESTION: _____ are the example of lateral meristems

A. vascular cambium
B. cork cambium
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1468. QUESTION: _____ in intensity of light increases number of cell division

A. decrease
B. increase
C. both a and b

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

D. none of them

CORRECT ANSWER IS: increase

1469. QUESTION: Vitamins are _____ compounds.

A. inorganic
B. organic
C. both a and b
D. none of them

CORRECT ANSWER IS: organic

1470. QUESTION: Germ layers are formed in

A. fertilization
B. gastrulation
C. cleavage
D. growth

CORRECT ANSWER IS: growth

1471. QUESTION: _____ cytoplasm gives rise to gut

A. clear
B. yellow
C. gray vegetal
D. gray equatorial

CORRECT ANSWER IS: gray vegetal

1472. QUESTION: Growth is an _____ in size

A. irreversible increase
B. irreversible decrease
C. reversible increase
D. reversible decrease

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: irreversible increase

1473. QUESTION: _____ play role in the increase in diameter of stem and root.

A. intercalary meristems
B. lateral meristems
C. apical meristems
D. meristems

CORRECT ANSWER IS: lateral meristems

1474. QUESTION: _____ light favors elongation of cells.

A. red
B. blue
C. white
D. none of them

CORRECT ANSWER IS: red

1475. QUESTION: _____ controls the development of lateral buds.

A. active root apex
B. active shoot apex
C. leaves
D. none of them

CORRECT ANSWER IS: active shoot apex

1476. QUESTION: Cleavage results in the formation of

A. blastula
B. gastrula
C. morula
D. embryo

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

CORRECT ANSWER IS: morula

1477. QUESTION: _____ cytoplasm gives rise to muscle cells

A. clear
B. yellow
C. gray vegetal
D. gray equatorial

CORRECT ANSWER IS: yellow

1478. QUESTION: A plant has a growth pattern which is called

A. closed growth
B. open growth
C. both a and b
D. none of them

CORRECT ANSWER IS: open growth

1479. QUESTION: How many types of growth are present in plants?

A. 2
B. 4
C. 6
D. 8

CORRECT ANSWER IS: 2

1480. QUESTION: ____ light enhances cell division

A. red
B. white
C. blue
D. none of them

CORRECT ANSWER IS: blue

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1481. QUESTION: The removal of apex which releases the lateral buds from apical dominance is called

A. inhibitory effects
B. compensatory effects
C. correlation
D. all of them

CORRECT ANSWER IS: compensatory effects

1482. QUESTION: _____ is characterized by the movement and rearrangement of cells in embryo.

A. organogenesis
B. cleavage
C. growth
D. gastrulation

CORRECT ANSWER IS: cleavage

1483. QUESTION: Growth rate is influence by

A. hormones
B. vitamin
C. water
D. all of them

CORRECT ANSWER IS: all of them

1484. QUESTION: In _____ , growth occurs through the activity of meristems.

A. land plants
B. marine plants
C. vascular plants
D. all of them

CORRECT ANSWER IS: land plants

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1485. QUESTION: Growth of _____ plants is divided into four phases.

A. unicellular
B. bicellular
C. multicellular
D. none of them

CORRECT ANSWER IS: multicellular

1486. QUESTION: Without _____ , no metabolic activity is possible.

A. carbon dioxide
B. oxygen
C. both a and b
D. nitrogen

CORRECT ANSWER IS: oxygen

1487. QUESTION: Which one can play role in apical dominance?

A. auxin
B. cytokinins
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1488. QUESTION: Blastoderm splits into _____ layers.

A. 3
B. 2
C. 4
D. 5

CORRECT ANSWER IS: 2

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

1489. QUESTION: Meristems are young tissues or cells that retain the potential to

A. divide
B. grow
C. both a and b
D. none of them

CORRECT ANSWER IS: divide

1490. QUESTION: During cell division, the number of cells increase by

A. meiosis
B. mitosis
C. simple cell division
D. none of them

CORRECT ANSWER IS: mitosis

1491. QUESTION: Without _____, the process of photosynthesis does not take place.

A. carbon dioxide
B. oxygen
C. both a and b
D. none of them

CORRECT ANSWER IS: carbon dioxide

WWW.EASYMCQS.COM

1492. QUESTION: Development is an ordered sequence of _____ step

A. reversible
B. irreversible
C. growth
D. division

CORRECT ANSWER IS: irreversible

1493. QUESTION: Peripheral part of Blastoderm where the cells lie un-separated from the yolk is termed as

Download PDF Books: WWW.EasyMCQs.Com

A. area opaca
B. area pellucida
C. epiblast
D. hypoblast

CORRECT ANSWER IS: area opaca

1494. QUESTION: Example of regeneration is

A. healing of fracture
B. repair of skin
C. wound repairing
D. all of them

CORRECT ANSWER IS: all of them

1495. QUESTION: Apical meristems play important role in

A. secondary growth
B. primary growth
C. tertiary growth
D. none of them

CORRECT ANSWER IS: primary growth

1496. QUESTION: Cell division occurs at the tip of

A. shoot
B. root
C. both a and b
D. leaves

CORRECT ANSWER IS: both a and b

1497. QUESTION: Which one is the plant hormone?

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

A. IAA
B. Indole 3 acetic acid
C. both a and b
D. acetic acid

CORRECT ANSWER IS: both a and b

1498. QUESTION: During _____, zygote is divided

A. fertilization
B. gastrulation
C. cleavage
D. growth

CORRECT ANSWER IS: cleavage

1499. QUESTION: Primitive streak represents the _____ lips of blastopore.

A. dorsal
B. lateral
C. both a and b
D. none of them

CORRECT ANSWER IS: both a and b

1500. QUESTION: Zone of elongation is only of

A. few millimeters in length
B. few millimeters in breath
C. both a and b
D. none of them

CORRECT ANSWER IS: few millimeters in length

1501. QUESTION: _____ play role in the production of leaves and flowers

A. primary meristems

WWW.EASYMCQS.COM

Download PDF Books: WWW.EasyMCQs.Com

B. lateral meristems
C. intercalary meristems
D. apical meristems

CORRECT ANSWER IS: intercalary meristems
