

Quizzes & subjective:

psy 511

remember me in ur prayers ☹️ ☹️

1. Which of the following advocates that the objects, persons, and settings are perceived as whole?
 - Geographical Determinism
 - Ecological Biology
 - Behaviorism
 - **Gestalt psychology**
2. Which of the following theories focus on environmental context in which behavior occurs and the person variables?
 - Geographical Determinism
 - Ecological Biology
 - **Behaviorism**
 - Gestalt psychology
3. Standing patterns of behavior represent what _____ of the group rather than just of a single individual.
 - **Collective behavior**
 - Collective conscious
 - Collective effort
 - Collective endeavor
4. Identify who argued that environment should be depicted in terms of measurements applied to the dimensions of intensity, novelty, complexity, temporal variation, surprisingness, and incongruity?
 - **Wohlwill**
 - Cohen

- William Whunt
 - Brehm and Brehm
5. Which of the following is NOT a common assumption of environmental psychologists?
- The earth is the only suitable habitat we have, and its resources are limited
 - The earth and many other planets are suitable habitat we have
 - The earth as a planet has been profoundly affected by life
 - Sustained life on earth is a characteristic of eco system and not of individual organisms and population
6. Which of the following theories has not a general approach?
- Ecological approach
 - Stimulus load approach
 - Behavioral constraint approach
 - Adaptation level approach
7. Stress theories emphasize the mediating role of _____ in the organism-environment interaction.
- Physiology
 - Emotion
 - Cognition
 - All of the given options
8. Suppose that in any setting the number of individuals is below the minimum requirement, therefore some or all of the inhabitants must perform more than their share of roles for te sake of maintaining behavior setting. This condition is called what?
- Overstaffed
 - Understaffing
 - Undermanning

- Overmanning

QUIZ #1:

1. Standing patterns of behavior represent what _____ of the group rather than just of a single individual. Select correct option:

- **Collective behavior**

- Collective conscious
- Collective effort
- Collective endeavor

2. While talking about the concepts of psycho-physics, which of the following questions related with recognition? Select correct option:

- "Is there anything out there?"
- "What is it?"
- **"Is this stimulus different from that one?"**
- "How much of it is there?"

3. According to which of the following the processes of perception and cognition are more important than overt behavior? Select correct option:

- Geographical Determinism
- Ecological Biology
- Behaviorism

- **Gestalt psychology**

4. The environment consists of both physical and social variables existing in _____ with behavior. Select correct option:

- **Reciprocal relationships**
- One sided relationship
- Prejudiced relationships

- Working relationship
5. Which of the following has the broadest scope with the concept of behavior setting?

Select correct option:

- **Ecological approach**
 - Stress approach
 - Adaptation level approach
 - Stimulus load theories
6. "Behavior is determined not by stimuli, but from the perception of those stimuli" this statement is supported by which of the following theories?

Select correct option:

- Geographical Determinism
 - Ecological Biology
 - Behaviorism
 - **Gestalt psychology**
7. Which of the following is Not a law of perceptual organization proposed by Gestalt psychologists? Select correct option:
- Proximity
 - Closure
 - **Bad formation**
 - Good form
8. Which of the following advocates that the objects, persons, and settings are perceived as whole? Select correct option:
- Geographical Determinism
 - Ecological Biology
 - Behaviorism

- **Gestalt psychology**

9. The environment on our earth has already received sufficient ↯_____to render the planet uninhabitable by the twenty-second century. Select correct option:

- Abuse
- Care
- Concern
- Attention

10. All environments carry a set of meanings acquired through their specific physical, social, cultural, aesthetic, and economic attributes. This statement is refereeing towards which of the following? Select correct option:

- **Cognitive Bases of Perception**

- Societal Bases of Perception
- Environmental Bases of Perception
- Lingual Bases of Perception

Quiz#03

1. Which of the following events would most likely because the largest increase in demand for smaller-sized houses?

- Increase in the average household size

- **Decrease in family size**

- Increase in two-earner households
- Steadily increasing national population

2. Which of the following is a type of mental processing composed of a series of psychological transformations by which an individual can acquire code, store, recall, and decode information about the relative locations and attributes of phenomena in their everyday or metaphorical spatial environment?

3. Which one of the following reasons explains why some areas are densely populated?
- Steep slopes
 - Few communications
 - Poor soils
 - **Moderate climate**
4. According to one research by Hagan who among following are being more tolerant of high density?
- British
 - Australian
 - **Asians**
 - Canadians
5. Who among the following reported that increased adrenocortical activity in males as a result of high social density?

Heshka&Pylypuk

6. Which of the following is the consequence of social density according to Fleming, & colleagues (1987)?

Elevations in urinary catecholamine

7. According to the group dynamics theory groups engage in five specific stages of development they are forming, _____, norming, _____ and adjourning.
- Performing, storming
 - **Storming, performing**

- Suborning, conjoining
 - Conjoining, suborning
8. A group has the following characteristics: two or more people in social interaction, stable group structure, sharing of common goals and _____.
- Perceive themselves as members of the group
 - **Share a common physical environment**
 - Pay membership dues
 - Lack cohesiveness and shared vision
9. Political behavior is:
- Found in only large organization
 - Discouraged by upper management
 - Adversely affects the decision making process
 - **Not required as part of one's formal role within the organization**
10. Which of the following are NOT physiological symptoms of stress?
- Backache, elevated blood pressure, headache
 - Heart attack, hives
 - **Anxiety, depression**
 - Sweaty palms, difficulty sleeping, a pounding heart
11. An individual most likely to engage in political behavior would have all of the following EXCEPT:
- Need for power

- An internal locus of control
- An external locus of control
- High self-monitoring score

12. _____ frequently occurs in organizations' role expectations are inadequately defined or established for the employees.

- Role distortion
- Role ambiguity
- Role differentiation
- Role incumbency

13. _____ power is solely dependent on fear.

- Reward
- Personal
- Expert
- Coercive

14. Which of the following are examples of behavioural effects of stress?

- Increase heart and breathing rates, increase blood pressure, bring on headaches, and induce heart attacks
- Changes in eating habits, increased smoking or consumption of alcohol, rapid speech, fidgeting, sleep disorders,
- Anger, anxiety, depression, irritability, lower self esteem, resentment to supervision, lack of concentration
- All

15. _____ is the only power tactic that is effective across organizational levels.

- Consultation
- Rational persuasion
- Pressure
- Exchange

16. The power that the department manager has been granted by the organization over subordinates is referred to as _____ power.

Legitimate

17. Who among the following reported that increased adrenocortical activity in males as a result of high social density?

- Fleming & colleagues
- Heshka&Pylypuk
- Epstein and Karin
- McCain & colleagues

18. Which of the following is NOT an example of a density-dependent effect on population growth?

- Competition for food resources
- Competition for nesting sites
- Stress-related illness associated with overcrowding
- An extremely cold winter

19. Which of the following places afford us the opportunity to purchase all of our food needs in one location, but they also place limits on our ability to get in and get out quickly?

- Banks
- Bus depot

- Fast food restaurants

- **Supermarkets**

20. Fairfield claims that most public _____ are "drab, cramped, unimaginative, anxiety provoking and dehumanizing.

- **Waiting spaces**

- Visiting places
- Sitting spaces
- Working places

21. According to whom a good architecture is impossible until there is a change in the public attitude about architecture?

- Fairfield
- **C.M. Deasey**
- Domer
- Carswell

22. For a supermarket designer, a valuable source of information is the _____.

- Travelers
- **Shoppers**
- Workers
- By passers

23. Measures of blood pressure indicated a tendency for higher blood pressure levels in residents of:

- **Single rooms**
- Slums
- Proper Household
- Bangles

24. Which of the following is the consequence of social density according to Fleming, & colleagues (1987)?

- Elevations in urinary catecholamine
- Increased adrenocortical activity

- Thickness of skin
- Blood pressure

25. According to one research by Hagan who among following are being more tolerant of high density?

- British
- Australians
- **Asians**
- Canadians

26. Which of the following variables does not influence the fit between individuals and their environments?

- **Out door spaces**
- Individual's social space
- Individual's personal space
- None of the given options

1 May b

27. Who among the following reported that increased adrenocortical activity in males as a result of high social density?

- Fleming & colleagues
- **Heshka&Pylypuk**
- Epstein and Karin
- McCain & colleagues

28. Which of the following is NOT an example of a density-dependent effect on population growth?

- Competition for food resources
- Competition for nesting sites
- Stress-related illness associated with overcrowding
- An extremely cold winter

29. Which of the following places afford us the opportunity to purchase all of our food needs in one location, but they also place limits on our ability to get in and

get out quickly?

- Banks
- Bus depot
- Fast food restaurants
- **Supermarkets**

30. Fairfield claims that most public _____ are "drab, cramped, unimaginative, anxiety provoking and dehumanizing.

- **Waiting spaces**
- Visiting places
- Sitting spaces
- Working places

31. According to whom a good architecture is impossible until there is a change in the public attitude about architecture?

- Fairfield
- **C.M. Deasey**
- Domer
- Carswell

32. For a supermarket designer, a valuable source of information is the

_____.

- Travelers
- **Shoppers**
- Workers
- By passers

33. Measures of blood pressure indicated a tendency for higher blood pressure levels in residents of:

- **Single rooms**
- Slums
- Proper Household
- Bangles

34. Which of the following is the consequence of social density according to

Fleming, & colleagues (1987)?

- Elevations in urinary catecholamine
- Increased adrenocortical activity
- Thickness of skin
- Blood pressure

35. According to one research by Hagan who among following are being more tolerant of high density?

- British
- Australians
- **Asians**
- Canadians

36. Which of the following variables does not influence the fit between individuals and their environments?

Out door spaces

Individual's social space

Individual's personal space

None of the given options

1 May b

psy511 quiz #4

1. Who suggested that punitive measures only serve to increase the likelihood of more serious self-destructive behaviors?
 - Osmond
 - **Holley & Arboleda-Florez**
 - Proshansky & Rivlin
 - Sommer
2. Which of the following models include libraries, auto repair shops, truck-driving academies, food preparation laboratories, work cottages, facilities for conjugal visits, etc. in prison?
 - Model of reform

- Model of rehabilitation
 - **Model of integration**
 - Model of incapacitation
3. Because of their training, architects and designers are primarily concerned with the _____ aspect (s) of their designs.
- Mechanical
 - Economical
 - Structural
 - All of the given options
4. The effect of color on physiological responding, on mood, and on attitudes may have some _____ effect on the way students view ' their classrooms, and thus on the amount and nature of learning that takes place.
- Direct
 - **Indirect**
 - Neutral
 - Positive
5. The life of a prisoner is in many ways similar to the life of a _____.
- **Hospital patient**
 - School teacher
 - A shopper
 - Non
6. Which of the following models aims at only that the offender be physically removed from society, requires little more than cages?
- Model of integration
 - Model of deterrence
 - Model of rehabilitation
 - **Model of incapacitation**
7. The notion how easily can the design be modified or adjusted to account for expansion or changing use is known as what?
- **Flexibility**

- Compatibility
- Performance
- Safety

8. Which of the following is correct?

Preparation---Information---Evaluation---Creativity

Selection---Information---Evaluation---

Creativity---Preparation---Information--- Evaluation

Preparation---Information---Evaluation---Creativity

Information---Evaluation---Creativity---Preparation

Preparation---Information---Evaluation---Creativity

9. Which of the following variables does not influence the fit between individuals and their environments?

- Out door spaces
- Individual's social space
- Individual's personal space
- None

10. _____ prediction is a matter of observing trends and then extrapolating from those trends.

- Cyclic
- **Analog**
- Associative
- Trajectory

QUIZZES

1. Classroom behavior, performance, as well as learning will be influenced by which of the following environmental conditions? Select correct option:

- Temperature

- Noise
 - Crowding
 - All of the given option
2. Who proved/supported the notion that the violence in prisons which has been linked with density is less a matter of cognitive confusion and tension (i.e., stress) as some have claimed than it is a matter of control? Select correct option:
- Ekland
 - Goetting
 - Howsen
 - All of the given options
3. The effect of color on physiological responding, on mood, and on attitudes may have some _____ effect on the way students view ' their classrooms, and thus on the amount and nature of learning that takes place. Select correct option:
- Direct
 - Indirect
 - Neutral
 - Positive
4. If additional light stems from a source closer to the direction in which we are look-ing and is sufficiently greater than the illumination to which our eyes have adapted, then we say there is_____. Select correct option:
- Visual glare
 - Visual discomfort
 - Visual agony
 - Visual distress
5. Fairfield claims that most public _____are "drab, cramped, unimagina-tive, anxiety provoking and dehumanizing. Select correct option:

- **Waiting spaces**

- Visiting places
- Sitting spaces
- Working places

6. _____ are subjected to control by others, to highly ritualized routines, and to a great many rules and regulations with very little mobility, very little space, and virtually no privacy. Select correct option:

- **Prisoners**

- Patients
- Students
- By passers

7. Which of the following is a type of mental processing composed of a series of psychological transformations by which an individual can acquire code, store, recall, and decode information about the relative locations and attributes of phenomena in their everyday or metaphorical spatial environment? Select correct option:

- Cognitive pattern
- Rationalism
- Cognitive map
- Intellectualism

8. Which of the following models include libraries, auto repair shops, truck-driving academies, food preparation laboratories, work cottages, facilities for conjugal visits, etc. in prison? Select correct option:

- Model of reform
- Model of rehabilitation
- **Model of integration**
- Model of incapacitation

9. Measures of blood pressure indicated a tendency for higher blood pressure levels in residents of: Select correct option:

- Single rooms
- Slums
- Proper household
- Bangles

10. For a supermarket designer, a valuable source of information is the _____. Select correct option:

- Travelers
- Shoppers
- Workers
- By passers

11. Which of the following ethnic community comes from the farmlands of Pennsylvania; believe that their separation from the rest of society actually helps to strengthen their community? Select correct option:

- Amish
- Milesians
- Dunkers
- Mennonites

12. According to one research by Hagan who among following are being more tolerant of high density? Select correct option:

- British
- Australian
- Asians
- Canadians

13. According to whom a good architecture is impossible until there is a change in the public attitude about architecture? Select correct option:

- Fairfield
- C.M. Deasey
- Domer
- Carswell

14. Which of the following events would most likely because the largest increase in demand for smaller-sized houses? Select correct option:

- Increase in the average household size
- Decrease in family size
- Increase in two-earner households
- Steadily increasing national population

15. Which h of the following is known as the most urbanized province of Pakistan? Select correct option:

- Punjab
- Sindh
- Sarhad
- Balochistan

16. The public need not change its attitudes about architecture, but must certainly _____what's wrong if they expect designers to serve them better. Select correct option:

- Work out to know
- Should not care
- Let designers know
- Struggle to find out

17. Measures of blood pressure indicated a tendency for higher blood pressure levels in residents of: Select correct option:

- Single rooms

- Slums
- Proper household
- Bangles

18. In which of the following South Asian country level of urbanization is highest?
Select correct option:

- Bhutan
- Pakistan
- India
- Maldives

19. Which of the following is the consequence of social density according to Fleming, & colleagues (1987)? Select correct option:

- Elevations in urinary catecholamine
- Increased adrenocortical activity
- Thickness of skin
- Blood pressure

20. In which of the following era, the human population was approximately 5 million?
Select correct option:

- 1650 A.D
- 7000 B.C
- 7500 B.C
- 6000 B.C

Mid Term subjective

1. Which factors are related with the sense of the environment?
2. What is the primary motif of environmental psychology?
3. Describe yourself on the following traits:
Thick skinned or sensitive
Outgoing or shy
Timid or aggressive
Emotional or not
4. Do you think that our attitudes have some social basis? Discuss your any attitude which is stemmed out by social basis.
5. What is anchor-response theory? Also explain any two responses which are the result of a novel environment

December 26, 2013

6. What are cognitive maps? Enlist a few personal cognitive maps
7. Attitude mediates behavior. Explain one of your behaviors that is harmful and one of your behaviors that is beneficial for our environment. (3 Marks)
8. Enlist the attributes through which we attach meaning to our environments.
9. Discuss the Reasoned Action Model in detail.
10. What do you know about the "Anchor- Point' hypothesis? Exemplify.

More

11. All environments carry a specific set of meanings based on specific attributes. Enlist those attributes. (3)
12. Main postulates of learning theory. (3)
13. Enlist any three causes of stress in students. (3)
14. Attitudes are learnt by many ways. One of them is operant conditioning. State it with examples. (5)
15. U get a new job. How will u behave in new environment of job? (5)
16. Write the main characteristics of the cognitive map? (5)
17. How the agricultural cultures are different form the Nomadic Cultures? (5)
18. There are some signboards on the highways like X city located to right and the Y

city locate to left. What is the basic assumption behind this thing? (3)

19. All environments carry a specific set of meanings based on specific attributes. Enlist those attributes. (3)

20. Write the Environmental changes from the periods of our grandparents to now? (3)

Final Term subjective

1. What do you know about conformity? Recall the moments where you have conformed and why? (5)
2. Density impacts the altruistic behavior. Do you agree with this or not? (5)
3. What do you know about open space class rooms? Give an example and enlist some of its advantages. (5)
4. Enlist the five measures of density given by Schmitt. (5)
5. What can you do to progress in Pakistan ... was related to energy consumption. (3)
6. What natural ways can you adopt to replace energy sources as ACs and heaters? (3)

24-02-13

7. Identify some factors that are bringing change in the rural areas. (3)
8. We want to learn the children to keep their environment clean. How principle of positive reinforcement can help us? Describe. (3)
9. How population change has caused depletion of resources and their deterioration? (3)
10. How operant conditioning can be used in learning and changing the attitudes and behaviors. Exemplify. (2+3)
11. Your car is to bump into another car. What physiological and behavioral changes can occur during this increased state of readiness? (5)
12. Enlist few urbanization related problems. (5)
13. Highlight Robert Sommer's observations about the mental hospitals? (5)
14. What is energy conservation? Explain three types of energy conservation. (5)

PSY511 (17-08-2017)

15. Compare urban and rural environment in term of affiliation, prosocial and antisocial behavior.
16. Prisoners tend to commit crime due to impulsive behavior. As a environmental psychologist what skills will you use to reduce their impulsivity?
17. TV cartoons promote fashion. These cartoons have any impact on children mind? Name and explain the theory involved.
18. What three things you use daily to maintain optimal level of arousal?
19. 3 basic life styles for energy conversation
20. How culture is learnt through process of enculturation and acculturation?
21. Density can affect altruism behavior. Are you agree or not?
22. How behavior of individual is affected by reciprocal relationships of both physical and social variables? Also give an example
23. What are the detriments of energy use in homes and in homes construction?

More from different dates

24. Define First Postulate.
25. Define Intensity and Duration
26. Task Performance
27. Solar energy + types of solar energy
28. Changing attitude to protect Pakistani Environment
29. three type of energy conservation 3
30. Ali has lost his sister due to chronic illness and experience stress? What type he experience and Coping methods? 5
31. Define Energy Conservation and explain three types. 5
32. Alcoholism is problem orrural area or Urban? justify 5
33. write about saegert and Mackintosh study about task performance 5
34. Lahore ki negative environmentalchallenges k lye Plan banana and main parts of the Planning 5
35. Population Boom relation with resource depletion and environmental deterioration
36. Learning theory postulates

37. how stress can lead to physical illness
38. as Pakistan nation what is our general assumption about JEWS
39. What is mean by urbanization? How and why slums are developed?
40. difference b/w overstaffing and understaffing
41. Purpose of prisons?
42. What you know about ambient stressors?
43. Compare solar energy system?
44. Impact of density related to altruism?
45. "Intensity" and "Duration" of Stress.
46. Five measure of Schmitt describe "Density".
47. Why people influence social norms. Describe three benefits of Conformity.
48. The constant stress is producing any Physical illness. Justify with your logical reasons.
49. You have save any electric resources in your life if your answer is yes then describe how can save you electric resource in the future.
50. How can you improve the structure of open class rooms?
51. How you can culture learn through "Enculturation" and "Acculturation"
52. What is Urban Sprawl and identify the some cities in our country which is Urban Sprawl.
53. Describe some recommendations for the owner of superstore to minimize the time of customer waiting.
54. What is urbanization? Define the more and less urbanized cities of Pakistan. 5
55. Define intensity and duration of stressor? 5
56. How architectural design can affect our environmental feelings? 3
57. How energy consumption techniques can be used in construction and building? 5
58. Enlist 3 energy friendly techniques in building design. 3
59. A case of 2 girls who went to see a horror movie, one is afraid of blood and darkness and the other is not then defines the behavior of both? 5

My paper of PSY511 (20 Aug 2017)

60. When the individual and group conflict increase how conformity will be affected

and why?

61. every day new model of cell phone arise in the market .what your attitude toward
3.buying the new model ?you want to buy every new model or you hold on old one
if it fulfill your need?
62. hansselye 3 stages of stress appraisal ?this question was asked by presenting a
Scenario
63. Sara always came late to office .today she also was late due to traffic jam but
her boss consider that her personal fault.what attribution error was comitted by
her boss name and explain it
64. define urban sprawl and why it is important to study ??3
65. Describe the functions of RAS reticular activating system?3
66. Desor definition of density and how it apply to shopping behavior??5.

PSY511 Paper 19-08-17

67. Two type of cognitive map? 5 marks
68. If you a bump a car another cars physiology and behavioural. 5 marks
69. What is your best quality effect on environment
70. Population growth impact on resources Pakistan
71. What do you control attitude change energy resources(electricity, air
conditionairetc)
72. What is purpose of prison? 5 points
73. Explain Collins crowding and effects? 5 marks
74. Influence behavior and cognitive process
