

CS101 IMP MCQ's Solved BY HARRY

Harrylatif0002@gmail.com

1. Which of the following are the graphical objects used to represent commonly used application? choose the right option:

(A) Icons

(B) GUI

(C) Drivers

(D) Windows

2. What does multi-programming implement? choose the right option:

(A) time sharing

(B) batch processing

(C) real time processing

(D) Interactive processing

3. $1101 + 1110$ (in 2's complement) = _____ choose the right option:

(A) 111

(B) 1110

(C) 11011

(D) 1011

4. Which of the following is true about TCP in comparison to UDP? choose the right option:

(A) Less reliable and less efficient

(B) More reliable and more efficient

(C) More reliable but less efficient

(D) Less reliable but more efficient

5. Why does the lack of a centralized base of operation in the P2P model contribute to its popularity? choose the right option:

(A) It limits the liabilities faced due to copyright infringement.

(B) It discourages secure file sharing.

(C)it enhances system efficiency

(D)It simplifies legal efforts to enforce copyright laws.

6.How are hypertext documents typically transferred between browsers and web servers? choose the right option:

(A)Hypertext Transfer Protocol

(B)Web Transfer Protocol

(C)Internet Transfer Protocol

(D)File Transfer Protocol

7. Identify the intangible component from the following: choose the right option:

(A)Optical Disk

(B) hard disk

(C)computer mouse

(D)software

8. _____ is a situation where one process is waiting for the other process to release the allocated resource choose the right option:

(A)Deadlock

(B)Killing

(C)Spooling

(D)Conflict

9. CPUs compare memory references to designated limits stored in special-purpose registers to ensure _____. choose the right option:

(A)uninterrupted CPU control

(B)compliance with memory boundaries

(C)process-specific instruction sets

(D)file manager accessibility

10. "our self" button on the W3schools platform? . choose the right option:

(A)It displays the output of the HTML code on the right side of the code.

(B)It opens the page containing the explanation of HTML tags.

(C)It shows information about CSS.

(D)It redirects to another website.

11. Breaking the tasks into a number of subtasks compatible with the number of available processors is called _____. Choose the right option:

- (A) Interactive Processing
- (B) Scaling
- (C) Throughput

(D) Load Balancing

12. The _____ configuration is popular in wireless networks where communication is conducted by means of radio broadcast. Choose the right option.

- (A) star
- (B) ring
- (C) **bus**
- (D) mesh

13. Telnet is used to _____ between two systems. Choose the right option:

- (A) Establish a secure remote connection

(B) Establish a remote connection

- (C) Securely share information
- (D) Securely transfer files

14. The process of using DNS to perform an address translation is called a _____. Choose the right option

- (A) DNS table
- (B) DNS pattern

(C) DNS lookup

- (D) DNS translation

15. Internet is a collection of networks constructed by _____. Choose the right option:

- (A) Intranet Service Producer
- (B) Internet Service Producer
- (C) Intranet Server Provider

(D) Internet Service Provider

16. Which layer decide the direction of packet for sending. Choose the right option : (A) Link layer

(B) Network layer

(C)Application layer

(D) Data layer

17. Email is less time sensitive, so the mail servers use _____ to transfer email. Choose the right option

(A)HTTP

(B)UDP

(C)TCP

(D)SMTP

18. If 20 is divided by 5 using repetitive subtraction, how many steps it involves? Choose the right option (A)2

(B)3

(C)4

(D)0

19. Which protocol is suitable for wireless star networks?

(A)TCP/IP

(B)ETHERNET

(C) CSMA/CA

(D)CSMA/CD

20. CPU for multiprogramming system contain special- purpose register to _____

(A) Limit the administrator access

(B) contain the manager permission

(C) store process specific memory limits

(D) execute privileged instructions

21. _____ is a malware which gathers data about your activities on the system and forwards it to the outside party without your consent.

(A) Trojan Horse

(B)spyware

(C) worms

(D) virus

22. Each router maintains a _____ that contains the router's knowledge about the direction in which message should be sent.

(A) Knowledge table

(B) Algorithmic table

(C) **forwarding table**

(D) logarithmic table

23. What is the key distinction between a traditional hypertext document and a normal text file written in a text editor?

(A) Hypertext documents are longer than text file

(B) Hypertext documents are written in XML language

(C) Text file contains multimedia resources while hypertext documents do not

(D) **Text file uses ASCII or Unicode while hypertext documents use tags**

24. What is the primary function of VoIP?

(A) providing Visual Communication

(B) enhancing security protocols

(C) **facilitating voice communication over the internet**

(D) enabling file transfers

25. Malicious software is collectively called -----

(A) Multiwire

(B) none

(C) **Malware**

(D) Norm ware

26. Which of the following protocols are primarily involved in the exchange of email messages between email servers and clients? i SMTP ii IMAP iii MIME iv POP3 (A)

i, ii and iv

(B) ii and iv

(C) i and iv

(D) all of them

27. What do large scale multimedia streaming services use to distribute copies of content strategically around the internet for nearby users?

- (A) N unicast technology
- (B) multicast technology
- (C) internet routers
- (D) **content delivery networks**

28. Which of the following is intangible component? (A) optical disk

- (B) computer mouse
- (C) **software**
- (D) hard disk

29. cloud computing services provide reasonable guarantees of _____

- (A) **reliability, privacy**
- (B) Scalabilities, reliability
- (C) Scalabilities, security
- (D) Privacy, security

30. LAN stand for _____

- (A) Local adapter Network
- (B) Local Additional network
- (C) Local access network

(D) **Local area network**

31. what does a shortened URL Like "https://www.vuedu.edu.pk" typically lead

- (A) A specific document on the server
- (B) delivery path of the server
- (C) A random document on the server
- (D) **The home page of the website**

32. Ethernet based network for bus topology makes use of _____

- (A) CSMA/AC
- (B) CSMA/CE
- (C) CSMA/CA
- (D) **CSMA/CD**

33. How are networks classified based on their topology?

- (A) based on the network speed
- (B) based on the number of connected protocol
- (C) Based on the communicate protocol
- (D) **Based on the pattern in which the machines are connected**

34. Software designed for task specifically related to machine utilization is known as _____

- (A) utility software
- (B) **application software**
- (C) system software
- (D) device driver

35. In enhancing computer performance, which component is a notable assist?

- (A) Direct memory access (DMA)
- (B) **CPU**
- (C) memory bus
- (D) Main memory

36. Which of the following is not Malware?

- (A) Trojan Horse
- (B) Spy ware
- (C) worms
- (D) **Antivirus**

37. VoIP consists of two processes on different machines transferring audio data via the _____

- (A) P2P
- (B) P2Q
- (C) **P2P**
- (D) P2R

38. User fail to enhance security by importing _____

- (A) **Secure (not sure)**
- (B) trusted
- (C) unauthorized

(D) Approved

39. The Browser Use information which is provided by the _____

(A) Host Link

(B) URL

(C) Goggle

(D) www

40. which of the following language is used for client side scripting?

(A) ASP. net

(B) Python

(C) Java Script

(D) PHP

41. what is the term used to describe the communication between different process on computer with in a network or on the same machine?

(A) intra-process communication

(B) inter- network communication

(C) inter- system communication

(D) inter process communication

42. Which type of similar instruction is executed by the CPU to store the bit pattern in the controller?

(A) Jump instruction

(B) Load instruction

(C) Receive instruction **(D) Store**

instruction

43. _____ is a type of malware that can replicate its self into other connected to a network.

(A) Worm

(B) Spyware

(C) Virus

(D) Trojan Horse

44. _____ refers to the address of a file (resources) accessible on the internet.

(A) Protocol

(B) Web Browser

(C) Uniform Resources locator (URL)

(D) HTML

45. What is the purpose of tags in a hypertext documents?

(A) To encode text character by character

(B) to describe how the documents should appear on a display screen

(C) To link documents to each other

(D) to replace ASCII and Unicode encoding

46. The _____ uses the transport layer is to send and receive message over the internet.

(A) link layer

(B) Net

(C) Data layer

(D) Application layer

47. Which of the following is not the advantage of TCP over UDP?

(A) Connection establishment

(B) Flow control

(C) Efficiently

(D) Congestion Control

48. If two process demand the same resources simultaneously, it can lead to _____ in resources allocation.

(A) Efficiently Utilization

(B) process Synchronization

(C) Improved performance

(D) resources Contention

49. What is the term for the concurrent execution of multiple jobs in a single user system?

(A) Multitasking

(B) Multischeduling

(C) Multiprogramming

(D) Multi processing

50. What does the lack of a centralized base of operation in the P2P Model contribute to its popularity?

(A) it discourages secure file sharing

(B) it limits the liabilities faced

(C) it simplifies legal efforts to enforce copyright

(D) it enhances system efficiency.

51. Which of the following in the correct sequence of the network layers for the flow of message at the sender side.

(A) Link Layer to Network Layer to transport layer to Application layer

(B) Application layer to Link Layer to Network Layer to transport layer

(C) Application layer to transport layer to Network Layer to Link Layer

(D) Network Layer to Link Layer to transport layer to Application layer

52. If two processes demand the same resources simultaneously, it can lead _____ in resources allocation.

(A) Process synchronization

(B) Improved performance

(C) Resources Contention

(D) Efficient Utilization

53. UDP is a protocol used for communicates the full form of UDP is

(A) User datagram protocol

(B) User data graph protocol

(C) User defined protocol

(D) User data protocol

54. In non-privileged mode CPU have to access _____ instructions.

(A) non- executable

(B) all machine language

(C) limited acceptable

(D) Privileged only

55. What is the full form of CGI?

(A) Common Gateway Interface

(B) Collaborative Gateway Interface

(C) Collection Gateway Interface

(D) Console Gateway Interface

56. What pf the Following is one of the Major drawbacks of Skype?

(A) it uses computer resources without owner's awareness

(B) it takes a huge space on local drive

(C) Call quality is not good

(D) Free version is not easy available

57. The Major tool for maintaining security in operating system involves _____

(A) File manager Supervision

(B) Altering memory cell

(C) changing privilege levels

(D) extending time slices

58. According to the statics which Two Sever were consuming more than half of the internet sandwich in 2014?

(A) NNTP and FTP

(B) SSH and IM

(C) Netflix and YouTube

(D) HTTP and VoIP

59. Which of the following is intangible component?

(A) Optical Disk

(B) Computer Mouse

(C) Software

(D) Hard Disk

60. Which of the following software's help us optimizing the various business processes of an organization as a single system instead of a number of loosely coupled standalone systems? (A) OS

(B) Vector Graphics

(C) ERP (D) DSS

61. To move from one page to other page on the web, a hyperlink is given which is

(A) Of blue color

(B) underlined

(C) Of red color

(D) Of blue color and underlined

62. A data cell of a table contains

(A) only text

(B) images

(C) tables

(D) all of the given

63. Trial ware Software's are used for

(A) short period

(B) long period

(C) life time

(D) None of the given

64. The first programming language designed for the non-technical users was:

(A) Visual Basic

(B) Ada

(C) Basic

(D) Cobol

65. Which is the correct format to find out a value from any given list?

(A) Search()

(B) ()search

(C) Search<>

(D) To search

66. Binary notation is a way of representing numeric values using only the _____.

(A) Digits 0 and 1

(B) Digits 0 and 0 (C) Digits

0 and 2

(D) Digits 2 and 1

67. In excess notation _____ of bits are used to represent each value.

(A) Simple number

(B) Fixed number

(C) Variable number

(D) Constant number

68. _____ is a short version of binary digit, a smallest unit to store data.

(A) Bit

(B) Byte

(C) Pattern

(D) Mega Byte

69. Which tag is used to create a list item?

(A)

(B) <item>

(C) ****

(D) <list>

70. _____ loop structure referred to as a posttest loop.

(A) While

(B) Repeat

(C) For

(D) For each

71. A program that is believed to be correct and a program that is correct. The two are (A) Same

(B) Not same

(C) Not necessarily same

(D) Totally same

72. The set of tasks that ensures the software correctly implements a specific function is known as _____

(A) Modularity

(B) Verification

(C)Validation

(D)Requirement gathering

73.You can use _____ search engine for searching images, movies, games or educational content.

(A)Bing

(B)Google

(C)Yahoo

(D)One Search

74.Which of the following is the component name of iterative structures in which initial stage is established. (A)Modify

(B)Initialize

(C)Test

(D)Declaration

75._____ was the first to implement the web.

(A)Tim Berners-Lee

(B)Steve Jobs

(C)Alan Turing

(D)Charles Babbage

76.Which of these describes stepwise refinement?

(A)It is a bottom up approach

(B)Greedy Approach

(C)It is a top down approach

(D)Depth First Search

77. FTP _____ could check all incoming files for the presence of known viruses and block all infected files.

(A)File server

(B)Proxy server

(C)Web server

(D)Shared server

78.When an application wants to display something on the screen, it notifies the _____.

(A)Window manager

(B)Application

(C)User software

(D)Programming

79. Process is a _____ activity.

(A)Botting activity

(B)Dynamic activity

(C)Static activity

(D)Shifting activity

90. $0011 + 0010 =$ _____

(A)0000

(B)0101

(C) 1111

(D) 1010

81. Which type of registers is used in program execution?

(A)General purpose

(B)CPU register

(C)Special purpose (D)Memory

address register

82. RISC is abbreviation of _____?

(A)Redundant instruction set computer (B)Reduced

instructive set computer (C)Reduced

instructive set controller

(D)Reduced instruction set computer

83. _____ is used to store colorful images.

(A)RGB

(B)Pixel

(C)Bitmap (D)Scaling

84. Generally how many steps a machine cycle have?

(A)Two

(B)Three

(C)Four

(D)Two or more

85. Bit is:

(A)Basic unit of storage

(B)Basic program of storage

(C)Secondary unit of storage

(D)Not a unit of storage

86. _____ can store unique pattern of 21 bits.

(A)ASCII

(B)ANSI

(C)Unicode

(D)UTF-8

87.TLD stands for _____.

(A)Top Loud Domain

(B)Top Level Domain

(C)Top Lower Domain

(D)Top low domain

88.TIFF is abbreviation of _____?

(A)Toggle Image File Format

(B)Template Image File Format

(C)Tagged Image File Frame

(D)Tagged Image File Format

89.Digits on left side of point represent the

(A)Whole number

(B)Factorial

90.User can see directories or files by using _____.

(A)Microsoft Explorer

(B)Internet Explorer

(C)Window explorer

(D)User interface

91.The device that is used to store data is called:

(A)Input Device

(B)Output Device

(C)Storage Device

(D)None of the given

92. What does MIDI stand for?

(A)Magnetic information design interface

(B)Musical information disk interface

(C)Musical instrument digital interface

(D)Music information disk interrogator

93.What is the full form of JSP?

(A)Java Server Pages

(B)Java Script Pages

(C)Java Semantic Pages

(D)Java Source Pages

94.If the test for termination of a loop is executed after the execution of body then loop is known as _____.

(A)Post-test loop

(B)Pre-test loop

(C)Termination loop

(D)Final loop

95.On social media, sometimes, a particular _____ is very popular.

(A)Hash tag (B)Symbol

(C)Operator

(D)Word

96.What does VoIP stands for _____.

(A)Virtually Over Internet Protocol

(B)Voice Over Internet Protocol

(C)Voice of Internet Protocol

(D)Voice of International Protocol

97.Which of the following is not true about firewall?

(A)Firewall protects the entire network from inside intrusion

(B)Firewall protects the entire domain from outside intrusion

(C)Firewall protects the individual computer from outside intrusion

(D)Firewall protects the individual computer from inside intrusion

98.While sending a message it is the _____ layer's responsibility to provide an address that is compatible with the Internet infrastructure.

(A)Application

(B)Network

(C)Link

(D)Transport

99. SDS (Secure Digital Memory Cards) provide up to

(A)10 gbs of storage

(B)100 gbs of storage (C)Few gbs of storage

(D)1000 gbs of storage

100.The binary search algorithm uses _____.

(A)Linear search

(B)Divide and conquer method

(C)Bubble sort technique

(D) Quick sort technique

101.In _____ digits on right side represent the fractional part.

(A)Fraction **(B)Decimal**

(C)Hexadecimal

(D)Binary

102. Most _____ codes used today are Huffman codes.

(A) Relative encoding

(B) Frequency dependent

(C) Run-length encoding

(D) Differential encoding

103. A clear flag state indicates that the resource is _____.

(A) Available

(B) Unavailable

(C) Currently allocated

(D) Ready

104. Which of the following is used to store data in a computer?

(A) Hard Disk

(B) Floppy Disk

(C) Optical Disk

(D) All of the given

105. If you are interested to search a query for a specific file type, you can include such _____ in the query.

(A) File type

(B) Version

(C) Program type

(D) Typing

106. OR operator is also represented by _____ sign.

(A) }

(B) |

(C) @ (D) *

107. The hackers normally add many _____ to such websites as the information seeker of free music.

(A) Viruses

(B) Messages

(C) Song

(D)Alert

108.In binary search, first of all value check at a point

(A)Most left

(B)Middle

(C)Most right

(D)Beginning

109.One of the major uses of the _____ operation is for placing 0s in one part of a bit pattern while not disturbing the other part.

(A)AND

(B)OR

(C)XOR

(D)NOR

110._____ is the most demanded job in United State.

(A)System Agent

(B)IT Administrator

(C)Software Developer

(D)Graphic Designer

111.Cloud computing services provide reasonable guarantees of _____ and _____.

(A)Scalability, Reliability

(B)Reliability, Privacy

(C)Privacy, Security

(D)Scalability, Security

112.What is the full form of ASP?

(A)Active Start Pages

(B)Active Server Pages

(C)Alternate Server Pages

(D)Alternate Start Pages

113.A single algorithm can be represented in _____ way(s).

(A)Single **(B)Many**

(C)Malicious

(D)Modern

114. An algorithm is _____ and distinct from its representation.

(A)Abstract

(B)Clear

(C)Vision (D)Visual

115. What will be the output of following pseudo code?

def. Find Factorial ():

fact = 2 i=1;

While (i<=7)

fact=fact*i;

i=i+1; print(fact)

(A) 5040

(B) **10080**

(C) 120

(D) 980

116. By using 16 bits in 2's complement notation how many maximum positive number can be represented **(A)32768**

(B)32678 (C)32867

(D)32868

117. In _____ one user can be executing several tasks simultaneously.

(A)Multiple program

(B)Multilevel

(C)Multitasking

(D)Simple tasking

119. The hexadecimal notation for: 111010000101010100010111

(A)Is E85517

(B)Is E855

(C)Is F985517

(D)Is E5517

120.In main memory each cell has unique _____ address.

(A)Byte

(B)Bits

(C)RAM

(D)Cell

121.Repeated erasing slowly _____ the silicon dioxide chambers.

(A)Damages

(B)Enhance

(C)Increase

(D)Decrease

122.In binary Notation 11111111 is

(A) 128

(B) **255**

(C) 567

(D) 127

123.What will be the output of following OR expression 1010 OR 1111?

(A)1111

(B)0101 (C)0000

(D)1010

124.Data were stored in memory; programs were part of the _____.

(A)CPU

(B)Cable

(D)BUS

(D)CACHE

125.UTF-8 uses 24 to _____ bits.

(A)32

(B)30 (C)21

(D)90

126.To identify individual cells in a Computer's main memory, each cell is assigned a unique "name", called its _____.

(A)Path

(B)Address

(C)Place holder

(D)Location

127.The repetitive use of an instruction or sequence of instructions is called _____.

(A)Loop

(B)Statement

(C)Condition

(D)Pseudocode

128.This finding maximum number function will keep on going until we reach at the last value

[12, 18, 299, 38, 999, 89, 101, 500, 801, 45]

(A) 45 each time

(B) 801 each time

(C) 12 each time

(D) 38 each time

129.Dynamic ram - Stores bits as tiny electric Charge.

(A)Refreshes no times a second

(B)Refreshes many times a second

(C)Refreshes one times a second

(D)Refreshes two times a second

130.If you want to search for an exact phrase on Google then enclose it in _____.

(A)@

(B)" "

(C)*

(D)#

131. A pseudocode must have a consistent, concise notation for representing recurring _____ structures.

(A) Non-Semantic

(B) Semantic

(C) Markup

(D) Text

132. If a process is allowed to access memory cells outside its allotted area, it can _____ data being used by other process. **(A) Alter and store**

(B) Access and alter

(C) Read and write

(D) Read and alter

133. The Binary Search Algorithm, what will be mid value in second level of recursion in the following array.

{45, 77, 89, 90, 94, 99, 100} and key = 99

(A) 89

(B) 90 (C) 94

(D) 99

134. Robots can be guided by an

(A) An external control device or the control may be embedded within

(B) An internal control device or the control may be embedded within

(C) Remote

(D) Application

135. Which of the following language is used for server side scripting?

(A) HTML

(B) JavaScript

(C) CSS

(D) PHP

136. Process states include the value of the program counter as well as the contents of the _____.

(A) Related memory cells

(B) Registers and related memory cells

(C)Registers

(D)Registers and cache memory cells

137.How many iterations are required to find 88 in the following array?

{5, 6, 77, 88, 99}

(A)1

(B)2

(C)3

(D)4

138. 10.011 added to 100.11 produces

(A) 111.088

(B) 111.007 (C)111.001

(D)111.099

139.The instruction code to halt machine cycle is

(A)C400

(B)C100

(C)C000

(D)35CE0

140.Which Excess notation is used to represent 100 as Zero?

(A)Excess 4

(B)Excess 8 (C)Excess

2

(D)Excess 16

141. _____ tag is used to write paragraph in HTML document.

(A)<p>

(B)<pr>

(C)<pa>

(D)<pg>

142.Let a list Fred, Alex, Diana, Byron, Carol After sorted first sub list our list would be

(A)Alex, Fred, Diana, Byron, Carol

- (B) Fred, Alex, Diana, Byron, Carol (C) Alex,
Diana, Fred, Byron, Carol
(D) Alex, Fred, Byron, Diana, Carol

143. Which of the following is not true about pseudo code?

- (A) Pseudo code is an unambiguous representation
(B) Pseudo code is an informal representation
(C) Pseudo code is an algorithms representation

(D) Pseudo code is an ambiguous representation

144. Which of the following statement is true?

- (A) Repeater is more complex than a bridge.
(B) Bridge is more complex than a repeater.
(C) Bridge and repeater both are complex.
(D) Bridge and repeater both are not complex.

145. The storage of a value with a fractional part requires that we store not only the pattern of 0s and 1s representing its binary representation but also the position of the _____.

- (A) Decimal point

(B) Radix point

- (C) Number
(D) Factorial

146. Software packages that allow users to access hypertext on the Internet are called _____.

- (A) Hypersofts

(B) Browsers

- (C) Linkers
(D) Routers

147. _____ is also consider as character.

- (A) Numbers (B) Small
caps (C) Large caps

(D) Space

148. Word processor like Microsoft Word is an application that

(A)Build editable word documents.

(B)Build editable Program.

(C)Build editable Questions.

(D)Build editable excel files.

149._____ keyword is used in python language to define a word.

(A)Define

(B)Def

(C)Dfi

(D)Dfn

150.Appearance of each pixel is encoded to form _____.

(A)Pixel

(B)Geometric Structures

(C)Bitmap

(D)Scaling

151.Average amount of time required for the desired data to rotate around to the read/write head once the head has been positioned over the desired track.

(A)Random TIME

(B)Access time

(C)Seek time

(D)Rotational delay

152.Which of the following is true about problem solving?

(A)Ability to solve problems remains more of an artistic skill to be developed

(B)Ability to solve problems remains more of a non-artistic to be developed

(C)Ability to solve problems remains more of a rational skill to be developed

(D)Ability to solve problems remains more of a non-rational skill to be developed

153.When you search in the Google by typing Google finds all those pages which contains

(A)All the terms given in the query

(B)None of the terms given in the query

(C)Some of the terms given in the query

(D)Random

154.Non terminating expansions may also be a source of _____.

(A)Logical error

(B)Truncation errors

(C)Overflow

(D)Syntax error

155.Which of the following is not the advantage of TCP over UDP?

(A)Congestion control

(B)Flow control

(C)Connection establishment

(D)Efficiency

156.Phase 1 of problem-solving steps is _____.

(A)Formulate the algorithm and represent it as a program

(B)Evaluate the program for accuracy and for its potential as a tool for solving other problems

(C)Understand the problem

(D)Get an idea of how an algorithmic function might solve the problem

157.Which unit transfers the data from memory into the general purpose registers?

(A)Control unit

(B)Arithmetic unit

(C)Logical unit (D)Shift

158.Time required to move the read/write heads from one track to another.

(A)Random time

(B)Access time

(C)Seek time (D)Rational

time

159.RAM stands for:

(A)Random access memory

(B)Random archive memory

(C)Random memory

(D)Random accountable memory

160.If we are interested to see the map of some location, we can use map operator in the following way:

(A)Location: map

(B)Map: Location

(C)Mph: map

(D)Locations

161. If right circular shift is performed on a _____ eight times, same bit pattern is obtained as it is started.

(A)Bite size byte pattern

(B)Byte pattern

(C)Byte size bit pattern

(D)Bit pattern

162. Quantity associated with each position is _____ the quantity associated with the position to its right.

(A)Twice

(B)Single time

(C)Thrice (D)Forth

163.According to famous Job market website most of the jobs are available in _____.

(A)Economics

(B)Computer Science

(C)Mathematics

(D)Biology

164.We can use Boolean operators specially to find relevant pages.

(A)"is ""am"

(B)"And" "Or"

(C)Is "it"

(D)If else

165.Main memory is also called _____.

(A)ROM

(B)RAM

(C)Bits

(D)Cache

166.In binary Addition $1+1$ is =

(A)10

(B)2 (C)5

(D)11

167.Hexadecimal notation uses a _____ symbol to represent a pattern of four bits.

(A)Quad

(B)SINGLE

(C)Double

(D)Triple

168.One term could mean more than one thing for example word: "Jaguar" is used in two meanings such as:

(A)Car and helicopter

(B)Car and bus

(C)Animal and car

(D)Car and Cat

169. ENIAC stands for:

(A)Electronic numerical integrator and calculator

(B)Electronic numbers and integrator and calculator

(C)Electronic numerical integer and calculations

(D)Electronic numbers integer and calculations

170. HDTV is the abbreviation of _____.

(A)High demanded television

(B)High defined television

(C)High definition television

(D)High demand television videos

171. The most popular system for representing integers within today's computers is _____'s complement notation.

(A)Three

(B)Two

(C)0

(D)One

172. Each sound has a _____.

(A)Pixel

(B)Geometric Structures

(C)Wave

(D)Scaling

173. Binary notation has _____ representation.

(A)One

(B)Two

(C)Three

(D)Four

174. In CS, we store and link data in an organized way using

(A)SDLC

(B)MSDB (C)DMBS

(D)DBMS

175. The binary of 8 in 2's complement notation will be 1000, what will be the binary of -8?

(A)1001

(B)0000 (C)1000

(D)0100

176. Approximately how many entries a typical dictionary in a word processor can contain?

(A)25,000 entries

(B)250,000 entries (C)25,0000

entries

(D)More than 250,000 entries

177. Computer hardware is the collection of

(A)Partials

(B)Physical parts of a computer system

(C)Software

(D)Program

178.The _____ consists of the instructions that tell the control unit to request an activity within the arithmetic/logic unit.

(A)Arithmetic/logic group

(B)Control unit group

(C)RISC group

(D)RISC/CISC group

179.CPU required at least _____ to fetch the instruction from memory.

(A)Two nanosecond

(B)Nanosecond

(C)Three nanosecond

(D)One billion second

180.One bit can contain only _____ value.

(A)Zero

(B)One

(C)Two

(D)Threw

181.RGB stands for

(A)Roman, green, blue

(B)Red, Green, Blue

(C)Red, blue, yellow

(D)Red, white, black

182.If you search on Google that "how can I hack?", then it would be so _____ for your security.

(A)Difficult

(B)Dangerous

(C)Insecure (D)Grateful

183.CPU and RAM are connected with _____ to communicate with each other.

(A)Controller

(B)BUS

(C)Cables

(D)Ports

184. _____ tells how many places are required to move radix point.

(A)Exponent field

(B)Sign bit

(C)Significant bit

(D)Mantissa field

185.how Instruction can be fetched from the main memory to CPU?

(A)By using Controller

(B)By using Modem

(C)By using Bus

(D)By using Special wiring

186.There are _____ Basic Boolean operations are.

(A)1

(B)2

(C)3

(D) 4

187.We need _____ memory to store data permanently.

(A)Volatile

(B)RAM

(C)Non-Volatile

(D)Address

188.In 16 bits _____ can be store only.

(A) 100

(B) 99

(C) 98

(D) 97

189.The process involved in a _____ is like copying the data rather than moving it.

(A)Transfer instruction

(B)Load instruction

(C)Move instruction

(D)Shifting data

190.George Boole, who was a pioneer in the field of mathematics called _____. (A)Subtraction

(B)Algebra

(C)Logic

(D)Progression

191. A CPU consists of three parts _____.

(A)ALU/ control unit, register

(B)ALU/MJPEJ/CU

(C)CIRCUIT /Mp3 /CU

(D)Ram/cache/ dram

192.George Boole invented the _____ operations.

(A)Bit

(B)Logical

(C)Byte

(D)Boolean

193.Over which type of bus CPU can fetches its instructions from memory?

(A)Memory bus

(B)System bus

(C)Address bus

(D)Central bus

194._____ tag only shows the particular pages related to it.

(A)@

(B)*

(C)" " **(D)#**

195.Which registers act as temporary holding places for data being manipulated by the CPU?

(C)Memory address register

(B)Special purpose

(C)General purpose

(D)Memory buffer

196. Leibniz's machines were achieved by observing the _____ positions.

(A)Third gear

(B)First gear

(C)Final gear

(D)Second gear

197. Information available on the web is:

(A)Mostly Free of any cost

(B)Costly

(C)Totally free (D)Not accessible

at all

198. CD stands for:

(A)Computer Disc

(B)Computer Data

(C)Compact Disc

(D)Compact Data

199. Smallest unit of storage is:

(A)Bit

(B)Byte

(C)Mega Byte

(D)None of the given

200. Disk operating system is _____ operating system

(A)Menu driven

(B)Graphical user interface

(C)Command driven

(D)None of the given

201. Which of the following is a Significant asset to a computer's performance?

(A) CPU

(B) Direct memory Access (DMA)

(C) Main Memory

(D) Memory Bus

202. Google drive is the example of _____

(A) Cluster computing

(B) **cloud computing**

(C) grid computing

(D) grid and cluster computing

203. First Software was implement the web page was related in ____ (A)

December 1990

(B) September 1990

(C) October 1990

(D) November 1990

204. XML stand for _____

(A) Extra markup language

(B) **Extensible markup language**

(C) Extensible Marco language

(D) Excel Marco language

205. An important task of the transport layer is to _ messages from the application layer.

(A) Reject

(B) **Send**

(C) check

(D) **Accept**

206. An attempt to execute a privileged instruction in non-privileged mode causes _____ (A) An OS shutdown

(B) A memory dump

(C) a CPU restart

(D) **an interrupt**

207. What are the software units that communicate with the controller or sometimes directly with peripheral devices? (A) System Software

(B) Utility program

(C) **Device driver**

(D) operating system

208. In CSMA/CA what action does a machine take if it need to transmit a message and finds the channel silent?

(A) it waits for another machine to start transmitting first.

(B) it switches to a different communication channel.

(C) it immediately starts transmitting

(D) **it waits for a predetermined time before transmitting.**

209. OSI stand for_____

(A) **open system interconnection**

(B) optimal service interconnection

(C) open service for interconnection

(D) optical System for interconnection

210. For a network to function reliably, it is important to establish rules by which activities are conducted. Such rules are called_____

(A) **Protocols**

(B) Properties

(C) Premises

(D) Patterns

211. CPU compare memory references to designated limits stored in special purpose registers to ensure_____

(A) file manager accessibility

(B) process- specific instruction sets

(C) uninterrupted CPU control

(D) **Compliance with memory boundaries**

212. XML is a simplified derivative of an older set of standards called the_____

- (A) standard Generic Makeup Language
- (B) **standard generalized markup language**
- (C) standard Genetic Markup Language
- (D) standard generalized makeup language

213. Software units that communicate with controller or sometime directly to peripheral devices called _____

- (A) **Device driver**
- (B) Utility Program
- (C) Operating System
- (D) System Software

214. In enhancing computer performance which component is a notable asset?

- (A) Direct Memory Access
- (B) **CPU**
- (C) Memory Bus
- (D) Main Memory

215. Why does the lack of a centralized based of operation in P2P model contribute to its popularity.

- (A) it discourages secure file haring
- (B) it limits the liabilities faced due to copyright infringement
- (C) **its simplifies legal efforts to enforce copy right laws**
- (D) its enhance system efficiently

216. The Major tool for maintaining security in operating system involves _____

- (A) File manager supervision
- (B) altering memory cells
- (C) **changing privilege levels**
- (D) extending time slices

217. it is the responsibility of the transport layer to:

- (A) determine the direction in which to forward packets
- (B) provide an address that is compatible with the internet infrastructure
- (C) **Add sequence number to the small segments of a message**

(D) Use the services of the name service to translate mnemonic addresses in to IP address

218. What distinguishes the internet from proprietary systems developed by companies like Novel Inc.?

(A) higher security in the proprietary system

(B) licensing agreements for TCP/IP usage

(C) openness and free usage of TCP/IP standards

(D) Exclusive access to TCP/ IP for certain used

219. choose the lowest heading level HTML tag from the given option.

(A) h1

(B) h4 **(C) h6**

(D) h2

220. How does the P2P model alleviate the burden on the server in streaming systems?

(A) By relying on multicast exclusively

(B) By expanding the server's capabilities

(C) By implement N- unicast technology

(D) By transferring data distribution to the peers

221. deadlock occurs when two or more process ae blocked because each is waiting for a resource to

(A) another process

(B) the operating system (C) mass storage

222. which of the following can be the basic purpose of using the www.w3school.com website?

(A) to learn web development

(B) to access a collection of cooking recipes

(C) to watch entertainment videos and movies

(D) to explore travel and tourism information

223. The component (S) include in the first prototype of the world wide web by Tim Berners- lee were.

i. Hypertext document format ii. Network protocol iii Server process iiiii. Image and video processing

(A) All of the given

(B) i and ii

(C) i only

(D) **i, ii and iii**

224. The major responsibilities of _____ software is protecting from unauthorized access.

(A) Application

(B) **Operating system**

(C) device drivers

(D) super user

225. FIFO stand for _____

(A) For in for out

(B) First in First occupied

(C) **First in first out**

(D) first initiate first out

226. IN the transportation of the gift the user level mean _____ (A)
the connection line

(B) the airlines

(C) **you and your friend**

(D) the shipping accompanies

227. If a right circular shift of 7 bits is applied to an 8- bit string what is the corresponding number of bits for a left circular shift to process.

(A) **8** (doubt in option a)

(B) 4

(C) 5

(D) 1

228. Techniques that convert non-sharable into sharable ones are part of _____

(A) **Deadlock avoidance**

(B) Process management

(C) **Resource allocation**

(D) Deadlock detection

229. the term used for removing process from process table is called__

(A) Dropping

- (B) Deleting
- (C) Removing
- (D) **Killing**

230. The Application Layer used the _____ to send and receive message over the internet.

- (A) Link layer
- (B) Network layer
- (C) **Transport layer**
- (D) desktop layer

231. which of the following network layer is responsible to recognize that the packet has reached its destination?

- (A) Transport layer
- (B) application layer
- (C) link layer
- (D) **Network layer**

232. A properly implement flag used for mutual exclusions referred to as a _____

- (A) watching
- (B) blocker
- (C) **semaphore**
- (D) gatekeeper

233. each on demand stream is effectively _____ from a media server that stores the content user that wishes to retrieve it.

- (A) Any cast
- (B) **Unicast**
- (C) multicast
- (D) N-unicast

234. why do some governments view VoIP as a threat?

- (A) **it challenges traditional telephone system**
- (B) its lacks security features
- (C) it is difficult to implement
- (D) it consumes too much bandwidth

234. _____ tag is used to write paragraph in HTML documents

- (A) <xmp> <pg> text</pg></xmp>
- (B) <xmp> <pr> text</pr></xmp>
- (C) **<xmp> <p> text</p></xmp>**
- (D) <xmp> <pa> text</pa></xmp>

235. Simultaneous transfer of signals on separate line characterize which type of communication? (A)
Network communication

- (B) Serial communication
- (C) Computer communication
- (D) **Parallel communication**

236. what does the term “hypertext” refer to in the context of the world wide web?

- (A) Text without any formatting
- (B) encrypted text
- (C) **text with hyperlinks to other documents**
- (D) text with multimedia content only

237. the material that is displayed on the screen is contained in the ____ of the HTML documents

- (A) frame
- (B) head
- (C) **body**
- (D) title
