AL-JUNAID TECH INSTITUTE

1. Bill Inmon argues that requirements are well understood only after
 - a. They are documented
 - b. They extracted and verified
 - c. Data warehouse is populated** **page 285**
 - d. All the schemas are defined
2. Spiral model is _____
 - a. Sequence of waterfall model** **page 284**
 - b. Risk oriented model
 - c. An iterative model
 - d. All of the given options
3. Waterfall is a/an _____ model
 - a. Iterative
 - b. Simple linear sequential** **page 284**
 - c. Object oriented
 - d. Rapid development
4. An effective user education program includes, among others, the following guideline(s);
 - a. Understand the audience, don't overwhelm
 - b. Train after delivery of data and analytic applications
 - c. Postpone education, if DWH not ready
 - d. All of the given options** **page 308**
5. One of the drawbacks of waterfall model is that:
 - a. Customers can not review the product during development
 - b. It does not work when the resources are limited
 - c. It does not define the project timeline/schedule
 - d. All of the given options** **page 284**
6. As per Bill Inmon, a data warehouse, in contrast with classical applications is:
 - a. Data driven** **page 285**
 - b. Resource driven
 - c. Requirement driven
 - d. Time sensitive
7. Horizontally wide data means:
 - a. Dataset has large no. of attributes** **page 330**
 - b. Dataset has large no. of records
 - c. Dataset has attribute skews
 - d. Dataset has partitioning skews
8. In context of requirement definition phase of Kimball's DWH development approach, is positioned as a findings review and prioritization meeting.
 - a. System analysis
 - b. Scope definition
 - c. Requirement configuration

AL-JUNAID TECH INSTITUTE

d. Requirements wrap-up presentation page 297

9. In analytical application development phase, we follow standards for:

- a. Naming conventions
- b. Standard for calculations
- c. Standard for libraries

d. All of the given options page 307

10. In lifecycle data track, we begin with translating the requirements into dimensional model, which then transforms into_____.

- a. Physical structure** page 290
- b. Logical structure
- c. Conceptual structure
- d. System structure

11. Technical architecture design supports the communication about technical requirements:

- I. Within the team
- II. Upward to management
- III. Outward to vendors
- a. (I) Only
- b. (II) Only
- c. (III) Only
- d. (I), (II) and (III)** page 300

12. A top down implementation approach is useful when

- a. Technology is mature and well understood** page 283
- b. Organization can not implement latest technologies
- c. Business objectives are unclear
- d. Problem to be solved are not well documented

13. Which of the following is NOT one of the possible pitfalls in DWH LifeCycle & Development?

- a. Not having multiple servers
- b. Low priority OLAP Cube Construction
- c. Improper documentation

d. None of the given options page 312, 313, 314

14. Goal driven approach of data warehouse development was result of _____ work.

- a. Bill Inmon
- b. Ralph Kimball

c. Bohnlein and Ulbrich-vom page 285

- d. Westerman

15. Which of the following is/are included in the list of Top-7 key steps for smooth DWH implementation?

- a. Consider handing-off project management

AL-JUNAID TECH INSTITUTE

b. Assign significant resources for ETL

c. Be a diplomat NOT a technologist

d. All of the given options **page 318, 319**

16. A typical cycle of implementing the change in DWH comprises of the sequence:

a. Production -> QA -> Development

b. Development -> QA -> Production **page 314**

c. Development -> Production -> QA

d. Production -> Development -> QA

17. In _____ phase of a fundamental data warehouse life cycle model, a working model of data warehouse is deployed for a selective set of users

a. Design

b. Prototype **page 287**

c. Deployment

d. Operation

18. In context of requirement definition phase in Kimball's DWH development approach, activities like debriefing, documentation, and prioritization are considered to be the part of

a. Requirement preplanning

b. Business requirements collection

c. Post collection **page 294**

d. None of the given options

19. Which of the following is NOT one of the three parallel tracks in Kimball's approach?

c. Lifecycle technology track

d. Lifecycle data track

e. Lifecycle analytical applications track

d. Lifecycle maintenance track **page 299**

19. Normally the term "DWH face to the business user" refers to:

a. Lifecycle technology track

b. Lifecycle data track

c. Lifecycle analytical applications track **page 306**

d. Lifecycle maintenance track

20. In Four Cell Quadrant Technique. The quadrant's vertical axis refers to:

a. Scope

b. Feasibility

c. Resources available

d. The potential impact or value to the business **page 297**

21. Improper documentation results in the problem(s) like:

a. Maintenance issue

b. New developers unable to configure already existing code

c. Lot of time required for enhancing the code

d. All of the given options

22. A bottom up implementation approach is useful when

AL-JUNAID TECH INSTITUTE

- a. Technology is mature and well understood
- b. Organization can not implement latest technologies
- c. The business objectives are very much clear

d. All the requirements are well documented page 283

23. As per Kimball, _____ is the main operational process

- a. Requirement extraction
- b. Goal design

c. Business process page 285

- d. Schema design

24. Which of the following is NOT one of the top-10 mistakes that should be avoided during DWH development?

- a. Not interacting directly with end user

b. Not being an accommodating person page 316, 317

- c. Isolating IT support people from business users
- d. Training the users with dummy data and considering it success

25. The _____ phase of fundamental data warehouse life cycle model includes data warehouse daily maintenance activities

- a. Deployment

b. Operation page 288

- c. Enhancement
- d. Maintenance

26. In context of the most fundamental data warehouse life cycle model, which of the following is NOT one of the data warehouse design activities?

- a. End-user interviews and re-interviews
- b. Source system cataloguing
- c. Definition of key performance indicators

d. System vision development page 287

27. Which of the following is NOT one of the methodologies for Data Warehouse project development?

- a. Goal Driven
- b. Data Driven
- c. User Driven

d. System Driven page 283

28. In context of analytical applications track, the application development activity can begin after:

- a. Database design is complete
- b. A subset of historical data has been loaded
- c. The data access tools and metadata are installed

d. All of the given options page 307

29. Waterfall model is appropriate when

- a. When the budget is low

AL-JUNAID TECH INSTITUTE

- b. When the deadline is strict
- c. When resources are limited

d. Requirements are clearly defined page 284

30. Users do not care, how advance the front end of your DWH is, what they care is that:

- a. Tables should be properly Denormalized
- b. Proper partitioning technique should be used
- c. At least star or snowflake schema should be implemented

d. They should get information in timely manner and the way they want
page 314

31. Which of the following activity executes parallel with all other activities in Kimball's DWH development approach?

- a. Requirement elicitation
- b. Project planning
- c. **Project management**
- d. Deployment

My Point of View

32. Which of the following is the most ignored step during data warehouse development

- a. The requirement verification
- b. The vision definition
- c. Schema validation

d. Success criteria development **My Point of View**

33. Which of the following is NOT one of the activities of "Maintenance and Growth" phase in Kimball's DWH development approach?

- a. Education
- b. Technical Education
- c. Program Support

d. Interface Deployment page 309

34. In _____ phase of Kimball's approach, we identify the components needed now and in future.

- a. Requirement definition

b. Architectural design page 300

- c. Product development
- d. Analytical application development

35. Implementation of a data warehouse requires _____ activities

- a. Highly integrated
- b. Loosely integrated
- c. Tightly decoupled

d. None of the given page 289

36. Which of the following activity/activities is/are part of project planning phase in Kimball's DWH development approach?

- ❖ Obtain resources

AL-JUNAID TECH INSTITUTE

- ❖ Establish the preliminary scope and justification
- ❖ Assess organization's readiness for a data warehouse initiative

d. All of the given options **page 290**

AL-JUNAID TECH INSTITUTE

37. says that as far as company goals are concerned, the entire company pursues in the same direction

a. Westerman page 285

- b. Bill Inmon
- c. Kimball
- d. Bohnlein

38. A dense index, if fits into memory, costs only _____ disk I/O access to locate a record by given key.

➤ **One PG # 223**

- Two
- $\lg(n)$
- n

39. __, if fits into memory, costs only one disk I/O access to locate a record by given key.

➤ **A Dense Index PG # 223**

- A Sparse Index
- An Inverted Index
- None of These

40. __, if too big and doesn't fit into the memory will be expensive when used to find a record by given key.

➤ **A Dense Index PG # 223**

- A Sparse Index
- An Inverted Index
- None of these

41. __ operator is conservative in that it assigns to the dimension an aggregate value no higher than the value of its weakest data quality indicator.

➤ **The Min PG # 188**

- The Simple Ratio
- The Weighted Average
- None of these

42. Parallel execution dramatically reduces response time for _____ operations on large databases typically associated with Decision Support Systems (DSS) and data warehouses.

➤ **Data-Intensive PG # 201**

- Quality-Intensive

AL-JUNAID TECH INSTITUTE

- Analysis-Intensive

43. Data dependencies between different phases of computation introduce synchronization requirements that force _____ execution.

- **Sequential** **PG # 204**
- Parallel
- Analogous
- Interactive Parallel

44. Maintaining locking consistency over all nodes can become a problem in large clusters. This is the disadvantage of

- **Shared Disk Approach** **PG # 209**
- Local Memory Approach
- Distributed Memory Approach

45. Performance is dictated by the _____ stage in the pipeline.

- **Slowest** **PG # 217**
- Fastest
- Smallest
- Largest

46. An optimized structure which is built primarily for retrieval, with update being only a secondary consideration is

- **Inverted Index** **PG # 232**
- OLTP
- OLAP
- DSS

47. During business hours, most _____ systems should probably not use parallel execution.

- **OLTP** **PG # 206**
- OLAP
- DSS
- Data Mining

48. There are many variants of the traditional nested-loop join. If there is an index and that index is exploited, then it is called

- Naive nested-loop join
- **Index nested-loop join** **PG # 243**

AL-JUNAID TECH INSTITUTE

- Temporary index nested-loop join
- None of these

49. There are many variants of the traditional nested-loop join. If the index is built as part of the query plan and subsequently dropped, it is called

- Naive nested-loop join
- Index nested-loop join

➤ **Temporary index nested-loop join** **PG # 243**

- None of these

50. There are many variants of the traditional nested-loop join. When the entire table is scanned it is called

➤ **Naive nested-loop join** **PG # 243**

- Index nested-loop join
- Temporary index nested-loop join
- None of these

51. If someone told you that he had a good model to predict customer usage, the first thing you might try would be to ask him to apply his model to your customer_____, where you already knew the answer.

- **Base**
- Drive
- File
- Log

52. Data mining is a/an_____ approach, where browsing through data using data mining techniques may reveal something that might be of interest to the user as information that was unknown previously.

➤ **Exploratory** **PG # 249**

- Non-Exploratory
- Computer Science

53. Data mining uses_____ algorithms to discover patterns and regularities in data.

➤ **Statistical** **PG # 251**

- Mathematical
- Computational

54. Classification consists of examining the properties of a newly presented observation and assigning it to a predefined_____.

➤ **Class** **PG # 259**

- Object

AL-JUNAID TECH INSTITUTE

- Container
- Subject

55. As opposed to the outcome of classification, estimation deal with _____ valued outcome.

- **Continuous** **PG # 260**

- Discrete
- Isolated
- Distinct

67. is the technique in which existing heterogeneous segments are reshuffled, relocated into homogeneous segments.

- **Clustering** **PG # 264**

- Aggregation
- Segmentation
- Partitioning

68. Giving the least time to _____ can prove suicidal to the DWH project.

- OLAP
- De-normalization

- **ETL** **PG # 313**

- None of these

69. In DWH project, it is assured that _____ environment is similar to the production environment

- Designing

- **Development** **PG # 314**

- Analysis
- Implementation

70. The application development quality-assurance activities cannot be completed until the data is__.

- **Stabilized** **PG # 308**

- Identified
- Finalized
- Computerized

71. Many data warehouse project teams waste enormous amounts of time searching in vain for a ____.

- **Silver Bullet** **PG # 315**

- Golden Bullet
- Suitable Hardware

AL-JUNAID TECH INSTITUTE

- Compatible Product

72. Focusing on data warehouse delivery only often end up_____.

- **Rebuilding** **PG # 315**
- Success
- Good Stable Product
- None of these

73. Investing years in architecture and forgetting the primary purpose of solving business problems, results in inefficient application. This is the example of_mistake.

- Extreme Technology Design
- Extreme Architecture Design

- **None of these**

74. Division is cotton hub of Punjab.

- Lahore
- Faisalabad
- **Multan**
- Bahawalpur

75. in agriculture extension is that pest population beyond which the benefit of spraying outweighs its cost.

- None of these
- Profit Threshold Level
- **Economic Threshold Level** **PG # 332**
- Medicine Threshold Level

76. _____ is a process which involves gathering of information about column through execution of certain queries with intention to identify erroneous records.

- **Data profiling** **PG # 439**
- Data Anomaly Detection
- Record Duplicate Detection
- None of these

77. Execution can be completed successfully or it may be stopped due to some error. In case of successful completion of execution all the transactions will be ____

- **Committed to the database** **PG # 419**
- Rolled back

78. If some error occurs, execution will be terminated abnormally and all transactions will be rolled back. In this case when we will access the database we will find it in the state that was before the_____.

AL-JUNAID TECH INSTITUTE

➤ Execution of package

PG # 419

- Creation of package
- Connection of package

79. Execution can be completed successfully or it may be stopped due to some error. If some error occurs, execution will be terminated abnormally and all transactions will be ____

- Committed to the database

➤ Rolled back

PG # 419

80. To identify the degree of transformation required we need to perform ____.

➤ Data Profiling

PG # 437

- Data Anomaly Detection
- Data Cleansing
- None of The Given

81. To identify the ____ required we need to perform data profiling

➤ Degree of Transformation

PG # 437

- Complexity
- Cost
- Time

82. To judge effectiveness we perform data profiling twice.

- One before Extraction and the other after Extraction

➤ One before Transformation and the other after Transformation

PG

441

- One before Loading and the other after Loading

83. If the dates are missing, we must need to consult ____.

➤ Golden Copy

PG # 456

- Default System Date
- Silver Copy
- None of the given

84. After implementing Change Data Capture, the advantage we have is that, data is able to be integrated and transformed ____

➤ In-flight

PG # 152

- Off-flight
- Stored Data
- Over-flight

85. All data is ____ of something real.

I An Abstraction

AL-JUNAID TECH INSTITUTE

II A Representation

Which of the
following
option is
true?

➤ **I Only** **PG # 180**

- II Only
- Both I & II
- None of I & II

86. In the Information Age, the _____ learning organization is at a distinct disadvantage. This term means "impaired functioning"

- Functional

➤ **Dysfunctional** **PG #181**

- Purposeful
- Serviceable

87. Many DW projects do not deliver to full potential because they treat data quality as a one-time undertaking as part of UAT. Here UAT stands for

➤ **User Acceptance Testing** **PG # 193**

- Uninterrupted Availability of Testing
- Universal Acceptance Test
- Universal Applied Test

88. NUMA stands for _____

➤ **Non-uniform Memory Access** **PG # 206**

- Non-updateable Memory Architecture
- New Universal Memory Architecture

89. Parallelism can _____ system performance on over-utilized systems or systems with small I/O bandwidth.

➤ **Reduce** **PG # 202**

- Enhance
- Maintain
- Boost

90. Data mining evolve as a mechanism to cater the limitations of _____ systems to deal massive data sets with high dimensionality, new data types, multiple heterogeneous data resources etc.

➤ **OLTP** **PG # 254**

- OLAP
- DSS

AL-JUNAID TECH INSTITUTE

➤ DWH

91. In contrast to data mining, statistics is _____ driven.

➤ **Assumption**

PG # 255

- Knowledge
- Discovery
- Database

92. A _____ implementation approach is generally useful for projects where the technology is mature and well understood, as well as where the business problems that must be solved are clear and well understood.

➤ **Top Down**

PG # 283

- Bottom Up
- Waterfall
- Spiral

93. Implementing a data warehouse requires _____ integrated activities.

- Loosely

➤ **Tightly**

PG # 289

- Slackly
- Lethargically

94. The Kimball's iterative data warehouse development approach drew on decades of experience to develop the _____.

- OLAP Dimension
- Business Definition Lifecycle

➤ **Business Dimensional Lifecycle**

PG # 289

- Data Warehouse Dimension

95. Pipeline parallelism focuses on increasing throughput of task execution, NOT on _____ sub-task execution time.

- Increasing

➤ **Decreasing**

PG # 215

- Maintaining
- None of these

96. Pipeline parallelism focuses on increasing _____ of task execution.

➤ **Throughput**

PG # 215

- Non I/O Portion
- I/O Speed
- None of these

97. One needs to slot the alternative tools into categories that allow for meaningful comparison in order to _____.

AL-JUNAID TECH INSTITUTE

➤ Evaluate Tools

PG # 315

- Reduce Cost
- None of these

98. Pakistan is one of the five major _____ countries in the world.

➤ Cotton-growing

PG # 330

- Rice-growing
- Weapon Producing

99. _____ is a systematic field sampling process that provide field specific information on pest pressure and crop injury.

➤ Pest Scouting

PG # 333

- Soil Survey
- Seed Survey
- Water Survey

100. Data Transformation Services (DTS) provide a set of _____ that lets you extract, transform, and transformation required we need to perform into single or multiple destinations supported by DTS connectivity.

➤ Tools

PG # 373

- Documentations
- Guidelines

101. Data Transformation Services (DTS) provide a set of tools that lets you extract, transform, and consolidate data from disparate sources into _____ supported by DTS connectivity.

- Single Destination
- Multiple Destinations

➤ Single or Multiple Destinations

PG # 373

102. Data Transformation Services (DTS) provide a set of _____ that lets you extract, transform, and consolidated data from disparate sources into single or multiple destinations supported by DTS connectivity.

➤ Tools

PG # 373

- Documentations
- Guidelines

103. The _____ measures the ratio of desired outcomes to total outcomes.

➤ Simple Ratio

PG # 187

- Min Operation
- Max Operation
- Weighted Average

104. In 1972 the Mitsubishi Shipyards in Kobe developed a technique in which customer

AL-JUNAID TECH INSTITUTE

wants were linked to productspecifications via a matrix format. This technique is known today as:

- The Matrix of Quality
- **The House of Quality** PG # 194
- The Base Structure of Quality
- None of these

105. improve the overall data design and use data standards.

- Process Improvement
- System Improvement
- Policy & Procedure Improvement
- **Data Design Improvement** PG # 196

106. Which is the least appropriate join operation for Pipeline parallelism?

- Inner Join
- Inner Join
- **Sort-Merge Join**
- Hash Join

107. It must be ensured that, there are enough computing resources, Query-coordinator is very fast as compared toquery servers, Work done in each partition almost same to avoid performance bottlenecks

- To get a speed-up of N with M partitions
- To get a speed-up of N with N^2 partitions
- **To get a speed-up of N with N partitions** PG # 213
- To get a speed-up of N with $N/2$ partitions

108. The automated, prospective analyses offered by data mining move beyond the analyses of past events provided by_____tools typical of decision support systems.

- Introspective
- Intuitive
- Reminiscent
- **Retrospective**

109. The automated, prospective analyses offered by data mining move beyond the analyses of past events provided byretrospective tools typical of_____.

- **Decision Support Systems**
- OLTP
- OLAP
- Initial Data Mining Systems

110. The most recent attack is the_____attack on the cotton crop during 2003-04,

AL-JUNAID TECH INSTITUTE

resulting in a loss of nearly 0.5million bales.

➤ Cotton Worm

➤ **Boll Worm** PG # 333

➤ Purple Worm

➤ Blue Worm

111. Data recorded by pest scouts consists of two parts:

➤ **Static and Dynamic** PG # 342

➤ Valid and Invalid

➤ Volatile and Non-Volatile

112. DTS allows us to connect through any data source or destination that is supported by _

➤ **OLE DB** PG # 373

➤ OLAP

➤ OLTP

➤ Data Warehouse

113. Merging information is one of the major types of _____

➤ **Transformation** PG # 152 , 153

➤ Extraction

➤ Loading

➤ None of these

114. The goal of _____ is to look at as few block as possible to find the matching records.

➤ **Indexing** PG # 222

➤ Partitioning

➤ Joining

115. If every key in the data file is represented in the index file then index is

➤ **Dense Index** PG # 223

➤ Sparse Index

➤ Inverted Index

➤ None of these

116. _____ means meeting customer's needs, not necessarily exceeding them.

➤ **Quality** PG # 180

➤ Marketing

➤ DSS

➤ OLAP

AL-JUNAID TECH INSTITUTE

117. The purpose of the House of Quality technique is to reduce _____ types of risk

➤ **Two** **PG # 194 , 195**

- Three
- Four
- All

118. Majority of data warehouse projects fail due to the complexity of the _____

➤ **Development Process** **PG # 283**

- Analytical Process of Cube
- Query Complexity
- Index Complexity

119. For a DWH project, the key requirement are _____ and product experience.

- Tools

➤ **Industry** **PG # 320**

- Software
- None of these

120. The goal of _____ is to look at as few blocks as possible to find the matching records(s).

➤ **Indexing** **PG # 222**

- Partitioning
- Joining

121. After performing most of the transformation and cleansing steps, especially after having cleaned single-source error and conflicting representations, we perform _____ task.

➤ **Duplicate Elimination** **PG # 165**

- Duplicate Identification
- Duplicate Classification
- Duplicate Categorization

122. _____ improve the functional processes used to create, manage, access, and use data.

➤ **Process Improvement** **PG # 196**

- System Improvement
- Policy & Procedure Improvement
- Data Design Improvement

123. Non uniform distribution, when the data is distributed across the processors, is called _____.

➤ **Skew in Partition** **PG # 218**

- Pipeline Distribution
- Distributed Distribution
- Uncontrolled Distribution

AL-JUNAID TECH INSTITUTE

124. In nested-loop join case, if there are „M“ rows in outer table and „N“ rows in inner table, time complexity is

➤ $O(M \log N)$

➤ $O(M \log N)$

➤ **$O(MN)$**

PG # 240

➤ $O(M^N)$

125. There are different DWH implementation strategies, Kimball's Approach for data warehouse implementation is

➤ Data-Driven

➤ **Goal-Driven**

PG # 289

➤ User-Driven

➤ None of these

126. If w is the window size and n is the size of data set, then the complexity of merging phase in BSN method is ____

➤ $O(n)$

➤ $O(w)$

➤ **$O(w n)$**

PG # 171

➤ $O(w \log n)$

127. Within the data warehousing field, data _____ is applied especially when several databases are merged.

➤ Extraction

➤ Loading

➤ **Cleansing**

PG # 168

➤ Join

128. Every operation cannot be parallelized, there are some preconditions and one of them is

➤ **The operations to be parallelized can be implemented independent of each other.**

PG # 201

➤ The operations to be parallelized can be implemented dependent on each other.

➤ The operation to be parallelized has dependent sub-operations.

➤ None of these

129. As per Kimball, _____ is the main operational process

➤ Requirement extraction

➤ Goal design

➤ **Business process**

PG # 285

➤ Schema design

AL-JUNAID TECH INSTITUTE

130. In context of data parallelism, the work done by query processor should be:

- Almost zero
- **Maximum**
- Pipelined
- Filtered across partitions

131. “More resources means proportionally less time for given amount of data”. The statement refers to:

- Scale-Up
- **Speed-Up**
- Size-up
- Over-utilized system

132. “If resources increase in proportion to increase in data size, time is constant”. The

statement refers to:

- **Scale-Up**
- Speed-Up
- Size-up
- Over-utilized system

133. Waterfall is a/an _____ model.

- Iterative
- **Simple linear sequential**
- Object Oriented
- Rapid development

134. Spiral model is _____

- Sequence of waterfall model
- Risk oriented model
- An iterative model
- **All of the given options**

135. In contrast to statistics, data mining is _____ driven.

- Assumption
- **Knowledge** **PG # 255**
- Discovery
- Database

136. In the context of Business Development Lifecycle (Kimball's approach), the

first task in technology track is _____ Technical

- **Architecture Design** **PG # 299**
- Requirement Specification Development

AL-JUNAID TECH INSTITUTE

- Requirement Analysis
- Lifecycle Model Selection

137. SMP Stands for _____.

➤ **Symmetric multi-processors** **PG # 2**

- **Sufficient multi-processors**

138. Identify the TRUE statement about Hypertext Transfer Protocol (HTTP).

➤ **HTTP is stateless protocol** **PG # 364**

- HTTP is not a word wide web protocol
- HTTP is used to maintain sessions
- HTTP is message routing protocol

139. _____ contribute(s) to an under-utilization of valuable and expensive historical data, and inevitably results in a limited capability to provide decision support and analysis.

➤ **The lack of data integration and standardization** **PG # 330**

- Less number of frequent updates
- Minimum aggregation level
- Low cube cardinality

140. For a given data set, to get a local view in un-supervised learning we use

➤ One-way Clustering

➤ **Bi-clustering** **PG # 271**

- Pearson correlation
- Euclidean distance

141. One-way and Two-way clustering are types of

- Supervised
- Semi-Supervised

➤ **Un-Supervised** **PG # 271**

- Reinforcement

142. If we apply Run Length Encoding on the input "111100001111", the output will be.

➤ **14#04#14** **PG # 234**

- 41#40#41
- 18#04
- 81#40

143. PTCL is one of the examples of the following data warehouse organization

➤ **Telecommunications** **PG # 323**

- Financial service/insurance
- Transportation
- Government

144. _____ can be placed in front of our enterprise's Web servers to help them offload requests

for frequently accessed content.

➤ **Reverse Proxy** **PG # 369**

AL-JUNAID TECH INSTITUTE

- Forward Proxy

145. a small piece of information generated by the Web server and stored on the client.

- **Cookie** **PG # 359**

146. In context of web warehousing, which of the following is NOT one of the way to identify the session?

- Using Transient Cookies
- Using Time-contiguous Log Entries
- Using HTTP's secure sockets layer (SSL)

- **Using Simple Session Protocol (SSP)** **PG #364**

147. The i th bit is set to 1 if the i th row of the base table has the value for the indexed column. This statement refers to:

- Inverted index
- **Bitmap index** **PG233**
- Cluster index
- join index

148. Which of the following is NOT one of the issues of Clickstream data?

- Identifying the visitor origin
- Identifying the session
- Identifying the visitor

- **Identify the domain server** **PG # 363**

149. Which of the following is/are drawback(s) of traditional web searches?

- Limited to keyword-based matching
- Cannot distinguish between the contexts in which a link is used
- Coupling of files has to be done manually

- **All of the given options** **PG # 351**

150. Classification consists of examining the properties of a newly presented observation and assigning it to a predefined _____

- Object
- **Class**
- Container
- Subjects

151. In context of clustering the term "distance" means

- The relation of a record with corresponding records in child table
- None of these
- The difference between the primary keys of two records
- **Similarity dissimilarity of record**

152. In contrast to data mining statistics is _____ driven

- Discovery
- Knowledge
- Database
- **Assumption**

AL-JUNAID TECH INSTITUTE

153. _____ is the technique in which existing heterogeneous segments are reshuffled, relocated into homogenous segments.

- **Clustering**
- Partitioning
- Aggregation
- Segmentation

154. In context of data mining definition, the term “Value” means.

- **Importance of hidden pattern discovered**
- The primary key of table
- The index location of record
- Numerical or string measure assigned to an attributes

155. As oppose to the outcome of classification, estimation deal with _____ valued outcomes

- Discrete
- **Continuous**
- Isolated
- distinct

156. _____ incorporates the concept of product quality, process control, quality assurance, and quality improvement.

- **Total Quality Management**
- Intrinsic Data Quality Management
- Realistic Data Quality Management
- Strong Data Quality Management

157. The extent to which data is in appropriate languages, symbols and units, and the definitions are clear is known as _____.

- **Interpretability**
- Uniqueness
- Accessibility
- Consistency

158. The degree to which values are present in the attributes that require them is known as _____.

- **Completeness**
- Uniqueness
- Accessibility
- Consistency

159. The _____ dimension represents data correctness.

- **Free-of-error**
- Completeness
- Consistency
- Correctness

160. In B-tree index, the lowest level index blocks are called leaf blocks, and these blocks contain:

- NULL value to make the leaf terminal node
- **Every indexed data value and a corresponding ROWID**

AL-JUNAID TECH INSTITUTE

- Every indexed data value and pointer to next level block
- Every indexed data value and pointer to root block

161. Data is the _____ on which a Data Warehouse (DWH) runs.

- **Fuel**
- Element
- Component
- Entity

162. Mining Multi dimensional databases allow users to:

- Categorize the data
- Summarize the data
- **Analyze the data**
- All of the given

163. In context of data parallelism to get a speed-up of N with N partitions, it must be ensured that:

- There are enough computing resources
- Query-coordinator is very fast as compared to query servers
- Work done in each partition almost same
- **All of the given options**

164. Which of the following is not an activity of Data Quality Analysis Project?

- "Define"
- "Measure"
- "Analyze"
- **"Compression"**

165. Which of the following is not a Data Quality Validation Technique?

- Referential Integrity
- Using Data Quality Rules
- Data Histograming
- **Indexes**

166. One of the preconditions to decide about operations to be parallelized is that

- **Operation can be implemented independent of each other**
- Output of one operation becomes input of other
- Operations share same memory location
- Operations share same namespace

167. _____ do not (typically) keep the index values in sorted order

- Dense index
- Sparse index
- B-Tree Index
- **Hash Based index**

168. Parallelism can be exploited, if there is :

- Symmetric multi processors (SMP)
- Sufficient I/O bandwidth

AL-JUNAID TECH INSTITUTE

➤ Underutilized or intermittently used CPUs

➤ **All of the given options**

169. Which of the following is NOT one of the parallel hardware architectures?

- Symmetric Multi-Processing
- Massively Parallel Processing
- Non-uniform Memory Access
- **Shared Memory**

170. Two interesting examples of quality dimensions that can make use of them in operator are _____.

- Believability and Consistency
- **Believability and appropriate amount of data**
- Believability and Redundancy
- Reliability and appropriate amount of data

171. As the number of processors increase the speedup should also increase. Thus we should have linear speedup. Which of the following is NOT one of the barriers to achieve this linear speed-up?

- Amdahl Law
- Start-up
- **No Interference**
- Skew

172. In _____ index, the i th bit is set to "1" if the i th row of the base table has the value for the indexed column

- Inverted index
- **Bitmap index**
- Cluster index
- Join index

173. _____ lists each term in the collection only once and then shows a list of all the documents that contain the given term.

- **Inverted index**
- Bitmap index
- Cluster index
- Join index

174. . The exact formula for Speed-up is:

- **$(\text{Time on Serial Processor}) / (\text{Time on parallel processors})$**
- $(\text{Time on Serial Processor}) * (\text{Time on parallel processors})$
- $(\text{Time on Serial Processor}) + (\text{Time on parallel processors})$
- $(\text{Time on Serial Processor}) - (\text{Time on parallel processors})$

175. is the degree to which data accurately reflects the real-world object that the data represents

- Realistic data quality
- Strong data quality
- **Intrinsic data quality**
- Weak data quality

176. Assume a company with a multi-million row customer table i.e. n rows.

AL-JUNAID TECH INSTITUTE

Checking for Referential Integrity (RI), using a smart technique with some kind of a tree data structure would require_____ time.

- **$O(\log n)$**
- $O(n)$
- $O(1)$
- None of the given

177. Which of the following is NOT one of the variants of Nested-loop join?

- Naive nested-loop join
- Indexed nested-loop join
- Temporary index nested-loop join
- **Binary index nested-loop join**

178. “More resources means proportionally less time for given amount of data” that statement refers to

- Scale-Up
- **Speed-Up**
- Size-Up
- Over-Utilized system

179. The optimizer uses a hash join to join two tables if they are joined using an equijoin and

- outer table has less number of rows
- inner table has less number of rows
- cardinality of table is equal
- **large amount of data needs to be joined**

180. “If resources increase in proportion to increase in data size, time is constant”. The statement refers to

- **Scale-up**
- Speed-up
- Size-up
- Over-utilized system

181. If a product meets formally defined “requirement specifications”, yet fails to be a quality product from the customer’s perspective, this means the requirements were_____.

- **Defective**
- Unclear
- Unrefined
- Undefined

182. _____ is the extent to which data is regarded as true and credible.

- **Believability**
- Completeness

- Accessibility
- consistency

183. Which is not a/an data quality validation technique?

- **Consistency integrity**
- Referential integrity
- Attribute domain

AL-JUNAID TECH INSTITUTE

- Using data quality rules

184. Which of the following is not an “Orr’s law of data quality”?

- Data that Is not used is cannot be correct
- Data quality is function of its use not its collection
- Data will be no better than its most stringent use
- **Data duplication can be harmful for the organization**

185. is known as state of being only one of its kind or being without anequal or parallel.

- Completeness
- **Uniqueness**
- Accessibility
- Consistency

186. Which is not a/an characteristics of data quality?

- **Reliability**
- Uniqueness
- Accessibility
- Consistency

187. If every key in the data file is represented in the index file then it is called

- **Dense Index**
- Sparse Index
- Inverted Index
- A Multi level Sparse Index

188. One of the main reasons for the failure of DWH deployment is _____

- **Data quality**
- Data integrity
- Data duplication
- Data anomaly

189. The _____ operator is conservative in that it assigns to the dimension an aggregate value no higher than the value of its weakest data quality indicator.

- **Max**
- **Min**
- Min and Max
- None of given

190. _____ is making all efforts to increase effectiveness in meeting and deficiency in meeting except customer expectations

- Quality assurance
- **Quality improvement**
- Quality maintenance
- Quality establishment

191. Most DWH implantations today do not use _____ enforced by the database, but as TQM method improved overall data quality and database optimizers.

- Consistency integrity
- **Referential integrity**

AL-JUNAID TECH INSTITUTE

- Attribute domain
- Using data quality rules

192. If a task takes “T” time units to execute on a single data item, then execution of the Task on “N” data items will take _____ time units.

- N/T
- N+T
- **N*T**
- N-T

193. An optimized structure which is built primarily for retrieval, with update being only a secondary consideration is

- OLTP
- OLAP
- DSS
- **Inverted Index**

194. _ refers to “Parallel execution of single data operation across multiple partitions of data”

- Hardware parallelism
- Software parallelism
- **Data parallelism**
- Operational parallelism

195. _ in a database or data warehouse has no actual value, it only has potential value.

- **Data**
- Entity
- Flat tables
- Data marts

196. Which of the following tasks can NOT be parallelized?

- Large table scans and joins
- Creation of large indexes
- Partitioned index scans
- **None of the given options**

197.

A join is identified by multiple tables in the _____ clause

- **FROM**
- SELECT
- GROUP BY
- SORT BY

198. _____ index stores first value in each block in the sequential file and a pointer to the block.

- Dense
- **Sparse**
- B-Tree
- Hash

AL-JUNAID TECH INSTITUTE

199. _____ is a/an measure of how current or up to date the data is

- **Timeliness** page 185
- b. Completeness
- Accessibility
- Consistency

200. _____ In context of data parallelism, the work done by query processor should be:

- **Almost zero** Goggle
- Maximum
- Pipelined
- Filtered across partitions

201.

In context of joining tables, the join condition is specified in _____ clause

- FORM
- SELECT
- **WHERE**
- GROUP BY

202. A _____ index, if fits in the memory, costs only one disk I/O access to locate a record given a key.

- **Dense**
- Sparse
- B-Tree
- Hash

203. _____ index uses even less space than _____ index, but the block has to be searched, even for unsuccessful searches.

- Dense, sparse
- **Sparse, dense**
- Dense, inverted
- Sparse, inverted

204. _____ is the degree of utility and value the data has to support the enterprise processes that enable accomplishing enterprise objectives.

- Intrinsic Data Quality
- **Realistic Data Quality**
- Strong Data Quality
- Weak Data Quality

205. _____ is a system of activities that assures conformance of product to pre-established requirements.

- **Quality assurance**
- Quality improvement
- Quality maintenance
- Quality establishment

206. In context of nested-loop join actual number of matching rows returned as a result of the join would be _____ of the order of tables

- Dependent
- **Independent**

AL-JUNAID TECH INSTITUTE

- Superset
- Subset

207. In context of bitmap index, the length of the bit vector is:

- The possible number of domain values in corresponding field (column)
- **The number of records in the base table**
- The possible number of bitmap tables formed for corresponding field (column)
- None of the given options

208. The _____ operator proves useful in more complex metric applicable to the dimensions of timeliness and accessibility.

- **Max**
- Min
- Min and Max
- None of given

209. In nested-loop join case, if there are 'M' rows in outer table and 'N' rows in inner table, time complexity is

- $O(M \log N)$
- $O(\log MN)$
- **$O(MN)$**
- $O(M + N)$

210. Assume a company with a multi-million row customer table i.e. n rows. Checking for Referential Integrity (RI), using naïve approach would take _____ time.

- **$O(n)$**
- $O(1)$
- $O(\log n)$
- None of the given

211. Bitmap index is appropriate for:

- **Low cardinality data**
- High cardinality data
- Clustered data
- Aggregated data

212. For a given data set, to get a global view in un-supervised learning we use

- **One-way Clustering (Page 271)**
- Bi-clustering
- Pearson correlation
- Euclidean distance
