Use of Methylation PCR 2

1st Step of RT PCR 2

RQT PCR 3

Colony PCR 3

PCR Chemical Reactions 5

Allele and AFLP PCR 5

Write the names of chemical reagents used in the pcr and also define the reason of its use(5)

difference b/w methodology and application of AFLP pcr and Allel specific Pcr (3).

The method and assembly of Pcr. (3)

first step of RT pcr (2)

What is methylation PCR..? 2

Write the names of chemical reagents used in pcr and the reason of their use (5)

Difference between the methodology and applications of aflppcr and allele specific pcr (5)

Steps of ligation mediated pcr (3)

Principle of qrtpcr (3)

First step of rtpcr (2).

How inverse pcr is diff from the conventional pcr (2)

Write the names of chemical reagents used in pcr and the reason of their use (5)

Difference between the methodology and applications of aflppcr and allele specific pcr (5)

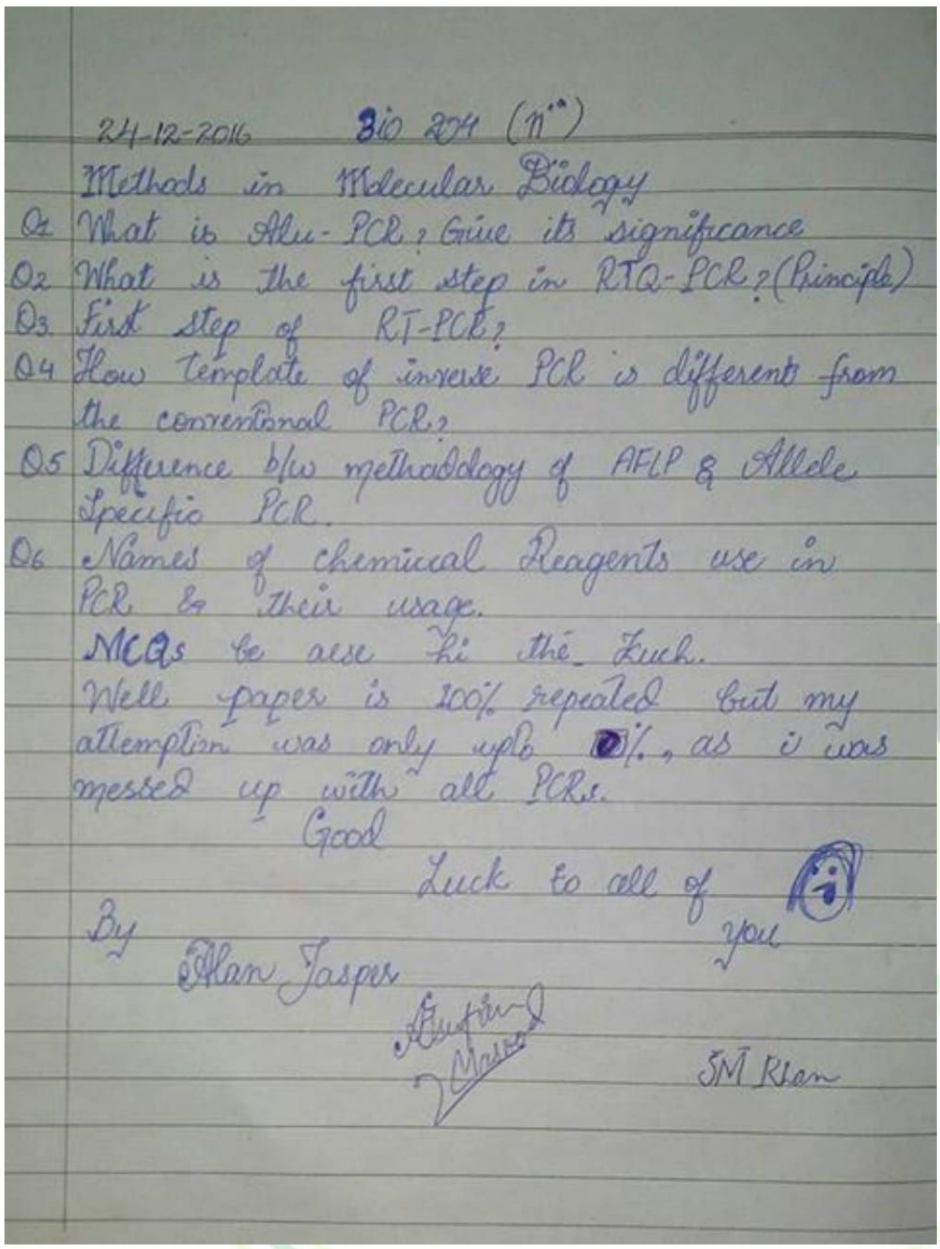

Steps of ligation mediated pcr (3)

Principle of qrtpcr (3)

How template in rtpcr is different from template of conventional pcr (2)

First step of rtpcr (2)

sign of bright future

24-12-2016 Bio 204 (N°)
Methods in Molecular Biology
Q1 What is Alu-PCR? Give its significance
Q2 What is the first step in RTQ-PCR? (Principle)
Q3 First step of RT-PCR?
Q4 How template of inverse PCR is different from the conventional PCR?
Q5 Difference b/w methaddogy of AFLP & Allele Specific PCR.
Q6 Names of chemical Reagents use in PCR & their usage.
MCQs te aise hi the Zuch.
Well paper is 100% repeated but my attemption was only upto 0%, as i was messed up with all PCRs.
Good Luck to all of you

Bio203

Use of Methylation PCR 2
1st Step of RT PCR 2
RQT PCR 3
Colony PCR 5
PCR Chemical Reactions 5
Allele and AFLP PCR 5

Bio203.

Write the names of chemical reagents used in the pcr and also define the reason of its use(5)
difference b/w methodology and application of AFLP pcr and Allel specific Pcr (5).
The method and assembly of Pcr. (3)
first step of RT pcr (2).
How inverse pcr is diff from the conventional pcr

BIO203
MCQS
1.In rtpcr__binds to specific target to produce fluroscence
2.Which PCR technique is used for large genomes.
3.In which Pcrtechnique,only one pair of orginal DNA is focused.
4.Which technique of pcr is used for finger printing
5.In which pcr technique clone genes are amplified
6.Allele specific pcr is used to amplify____
7.How many numbrs of bp are used in amplification
8.Palogentics term is used in which type of pcr.
9.DNA is digested in which type of pcr
10.During denaturation temperatuure is kept b/w_____
11.In nested pcr,how many pairs are used
12.Multiplex pcr targeted many sequences at__ONCE_____
Questions:
What is methylation PCR..? 2
Write the names of chemical reagents used in pcr and the reason of their use (5)
Difference between the methodology and applications of aflppcr and allele specific pcr (5)
Steps of ligation mediated pcr (3)
Principle of qrtpcr (3)
First step of rtpcr (2)

Rough Sheet

G MID/FINAL TERM 20 16 (Year) Date: 17/12/16 Superintendent S

Student S

e: Bio203

: VLHR01

1st step of RT-PCR
Methodology of Assembly PCR
Principle of RTQ-PCR method
Different chemical reagents used in a conventional PCR reaction mixture
Also [redacted] use of each ingredient.
Inverse PCR differ from conventional methodology and application b/w Allele specific PCR & APLP-PCR..
