BT102-Microbiology Current Papers. (23/06/2018)

1. Types of microscopes.
2. Magnification/Resolution
3. Why do we need to stain microbes
4. Advantages of staining
5. Acid-fast technique
6. Structure and function of flagella
7. Structure and function of cell membrane
8. Lipopolysaccharide (LPS)
9. Damage to cell wall
10. Metachromatic granules
11. Endosporesandit'slayers
12. Classification of bacteria
13. Steps of respiration
14. Types of bacteria with respect to the use of oxygen
15. Agarforsolidification
16. Uses of ethylene oxide
17. Use of phenol and phenolics
18. Typesofspiralbacteria
19. Typesofmediaonthebasisoffunction
20. Advantagesofsolidmedium
