MTH100 QUIZ 1 SOLVED BY IQRA AZHAR

If the "common ratio =3" ,for the following geometric sequence:(x-1),(x-1)(x-1),(x-1)(x-1)(x-1)-----,then the value of ‘x’ is .....

4.

Sum of first 999 terms of the sequence:{-1,1,-1,1,….}is-----.

1.

If first term=a=2, common difference=d=4 and term number=n=10; then what is the value of 10th term in an arithmetic sequence?

10th term in the arithmetic sequence is 38.

Cramer`s rule fails for

If the determinant of the coefficient matrix zero

sequence can be finite or infinite

true

false

True.

number in sequence always get bigger

MTH100 QUIZ 1 SOLVED BY IQRA AZHAR

true

false

Which of the following matrix has an inverse? singular non singular

"non-singular

Two matrices of same order can be.....

added and subtracter.

If the difference between successive terms of a series is a constant, then the series is said to be a/an _____ series.

arithmetic series.

MATH ZONE FOR VU

Two matrices A and B are multiplied to get AB if no. of columns of A is equal to no. of rows of B

To add two matrices, order of matrices must be

same.

MTH100 QUIZ 1 SOLVED BY IQRA AZHAR

Determinant is a process of attaching a real number to every ..... matrix.

square

What is the 31st term of the arithmetic sequence: 1, 4, 7, 10, …?

91.

A Square matrix with ones on the diagonal and zeros elsewhere is called a/an ..... matrix

"identity matrix."

If the first term=a=1, common ratio=r=1/2; then which term of geometric sequence is 1/4?

6

If the sum of first n natural numbers is n(n+1)/2, Then their average will be------.

(n+1)/2

MTH100 QUIZ 1 SOLVED BY IQRA AZHAR

For the sequence 5, 10, 20, 40, . . ., eighth term will be _____. Select the correct option

640.

For a geometric sequence:{1,b, b.b, b.b.b---},if its common ratio is ‘3’ then value of ‘b’ is ----

b is 3.
