

Lesson 1: Positive Psychology

1. What does Positive Psychology focus on?

- a) Treating mental illnesses
- b) Enhancing human strengths
- c) Studying only negative emotions
- d) Diagnosing psychological disorders

Answer: b) Enhancing human strengths

2. Who is known as the father of Positive Psychology?

- a) Carl Jung
- b) Sigmund Freud
- c) Martin Seligman
- d) Abraham Maslow

Answer: c) Martin Seligman

3. What is a key goal of Positive Psychology?

- a) To focus solely on curing mental illnesses
- b) To prevent mental disorders
- c) To build positive qualities and strengths
- d) To analyze historical theories

Answer: c) To build positive qualities and strengths

Lesson 2: Introduction

4. What is the traditional focus of psychology?

- a) Positive qualities
- b) Pathology and illness

- c) Human potential
- d) Community well-being

Answer: b) Pathology and illness

5. According to Positive Psychology, what buffers against mental illness?

- a) Wealth
- b) Positive human strengths like courage and hope
- c) Avoiding challenges
- d) Medical treatments

Answer: b) Positive human strengths like courage and hope

6. Which philosopher highlighted the need for “strength and virtue” in psychology?

- a) Plato
- b) Aristotle
- c) Martin Seligman
- d) Sigmund Freud

Answer: c) Martin Seligman

Lesson 3: Perspectives on Positive Psychology

7. What is the central idea of Aristotle’s concept of “Eudaimonia”?

- a) Seeking pleasure
- b) Living a virtuous life
- c) Avoiding challenges
- d) Material success

Answer: b) Living a virtuous life

8. Which religious perspective ties happiness to closeness with God?

- a) Hinduism
- b) Buddhism
- c) Christianity
- d) Islam

Answer: d) Islam

9. What does Buddhism identify as the root cause of suffering?

- a) Wealth
- b) Ignorance and craving
- c) Physical illness
- d) Material loss

Answer: b) Ignorance and craving

Lesson 4: Classification of Human Strengths

10. What is the focus of the VIA Classification of Strengths?

- a) Diagnosing disorders
- b) Identifying positive character traits
- c) Measuring intelligence
- d) Promoting subjective well-being

Answer: b) Identifying positive character traits

11. Which of the following is a virtue included in the VIA classification?

- a) Creativity
- b) Patience
- c) Wisdom

d) Wealth

Answer: c) Wisdom

Lesson 5: Measures of Human Strengths

12. What is the primary purpose of the Clifton StrengthsFinder?

a) Measuring mental illnesses

b) Identifying personal talents and strengths

c) Diagnosing anxiety disorders

d) Assessing emotional intelligence

Answer: b) Identifying personal talents and strengths

13. What does the Satisfaction with Life Scale measure?

a) Stress levels

b) Subjective well-being

c) Career satisfaction

d) Interpersonal relationships

Answer: b

Lesson 1: Positive Psychology

1. What is Positive Psychology primarily concerned with?

a) Negative human behaviors

b) Optimal human functioning

c) Theories of intelligence

d) Diagnosis of mental illnesses

Answer: b) Optimal human functioning

2. What is the main aim of Positive Psychology?

- a) To study emotional disorders
- b) To promote human strengths
- c) To cure psychological issues
- d) To focus on social problems

Answer: b) To promote human strengths

3. Positive Psychology aims to shift focus from illness to which of the following?

- a) Social theories
- b) Building positive qualities
- c) Treating genetic disorders
- d) Analyzing emotional trauma

Answer: b) Building positive qualities

4. Who coined the term “Positive Psychology”?

- a) Martin Seligman
- b) Abraham Maslow
- c) Carl Rogers
- d) Sigmund Freud

Answer: a) Martin Seligman

5. Which of the following is NOT a focus of Positive Psychology?

- a) Emotional intelligence
- b) Strength-based interventions
- c) Diagnosing mental illnesses
- d) Promoting life satisfaction

Answer: c) Diagnosing mental illnesses

Lesson 2: Introduction

6. What percentage of psychological research historically focused on negative emotions?

- a) 50%
- b) 80%
- c) 90%
- d) 14:1 ratio compared to positive emotions

Answer: d) 14:1 ratio compared to positive emotions

7. According to Positive Psychology, what are likely buffers against mental illnesses?

- a) Strengths like courage and hope
- b) Financial stability
- c) Avoiding challenges
- d) Medical advancements

Answer: a) Strengths like courage and hope

8. Who stated that psychology should focus on “strength and virtue”?

- a) Sigmund Freud
- b) Martin Seligman
- c) Abraham Maslow
- d) William James

Answer: b) Martin Seligman

9. Positive Psychology emphasizes nurturing what?

- a) Emotional disorders

- b) Positive emotions and strengths
- c) Genetic predispositions
- d) Behavioral patterns

Answer: b) Positive emotions and strengths

10. What does Positive Psychology advocate for?

- a) Avoiding stress
- b) Developing human potential
- c) Relying on external factors
- d) Ignoring mental illnesses

Answer: b) Developing human potential

Lesson 3: Perspectives on Positive Psychology

11. What is the central focus of “Eudaimonia” as per Aristotle?

- a) Pleasure and happiness
- b) Living a virtuous life
- c) Accumulating wealth
- d) Avoiding challenges

Answer: b) Living a virtuous life

12. According to Islam, what is the key to happiness?

- a) Wealth and status
- b) Closeness to God
- c) Social interactions
- d) Political success

Answer: b) Closeness to God

13. What is the final state in Buddhist philosophy that represents ultimate peace?

- a) Karma
- b) Reincarnation
- c) Nirvana
- d) Meditation

Answer: c) Nirvana

14. In Hinduism, what is the path to enlightenment?

- a) Material success
- b) Avoiding all challenges
- c) Achieving ultimate knowledge
- d) Following rituals

Answer: c) Achieving ultimate knowledge

15. What does “Positive Psychology Today” focus on?

- a) Diagnosing disorders
- b) Strengths and life outcomes
- c) Genetic predispositions
- d) Cultural pessimism

Answer: b) Strengths and life outcomes

Lesson 4: Classification and Measures of Human Strengths

16. What does the VIA Classification measure?

- a) Human disorders
- b) Character strengths

- c) Emotional intelligence
- d) Social conformity

Answer: b) Character strengths

17. Which is NOT one of the six virtues in VIA Classification?

- a) Wisdom
- b) Courage
- c) Wealth
- d) Temperance

Answer: c) Wealth

18. What is the main purpose of the Gallup StrengthsFinder?

- a) Identifying personal talents
- b) Measuring intelligence
- c) Diagnosing anxiety
- d) Evaluating personality disorders

Answer: a) Identifying personal talents

19. How many core themes does the Gallup StrengthsFinder include?

- a) 24
- b) 34
- c) 40
- d) 50

Answer: b) 34

20. Which classification system includes the “40 Developmental Assets”?

- a) VIA Inventory
- b) DSM-IV
- c) Search Institute
- d) Clifton StrengthsFinder

Answer: c) Search institute-

Lesson 5: Measures of Human Strengths

21. What does the VIA Inventory of Strengths measure?

- a) Negative traits
- b) Character strengths
- c) Mental disorders
- d) Academic performance

Answer: b) Character strengths

22. What is the primary goal of the Satisfaction with Life Scale?

- a) To measure happiness
- b) To analyze anxiety
- c) To track emotional disorders
- d) To predict career success

Answer: a) To measure happiness

23. What are the three components of subjective well-being?

- a) Stress, anxiety, depression
- b) Happiness, optimism, resilience
- c) Life satisfaction, positive affect, absence of negative affect
- d) Wealth, relationships, work satisfaction

Answer: c) Life satisfaction, positive affect, absence of negative affect

24. What is the diagnostic criteria for “flourishing”?

- a) High mental illness
- b) Low social well-being
- c) High levels of emotional, psychological, and social well-being
- d) High income levels

Answer: c) High levels of emotional, psychological, and social well-being

25. Which researcher is associated with the concept of “flourishing”?

- a) Abraham Maslow
- b) Barbara Fredrickson
- c) Ed Diener
- d) Martin Seligman

Answer: d) Martin Seligman

Lesson 6: Positive Emotions

26. What does Isen’s theory emphasize about positive emotions?

- a) They narrow thought processes
- b) They expand cognitive and social resources
- c) They reduce physical health
- d) They limit decision-making

Answer: b) They expand cognitive and social resources

27. Positive emotions can lead to all of the following EXCEPT:

- a) Better problem-solving

- b) Improved relationships
- c) Increased physical illness
- d) Enhanced creativity

Answer: c) Increased physical illness

28. What is the “undoing hypothesis”?

- a) Negative emotions erase positive emotions
- b) Positive emotions undo the effects of negative emotions
- c) Negative emotions increase stress levels
- d) Positive emotions lead to financial success

Answer: b) Positive emotions undo the effects of negative emotions

29. Who proposed the broaden-and-build theory of positive emotions?

- a) Ed Diener
- b) Barbara Fredrickson
- c) Martin Seligman
- d) Carl Rogers

Answer: b) Barbara Fredrickson

30. What is one key outcome of experiencing joy?

- a) Reduced energy levels
- b) Increased problem-solving abilities
- c) Avoidance of relationships
- d) Narrowed thought-action repertoires

Answer: b) Increased problem-solving abilities

Lesson 7: Positive Emotions (Broad and Build Theory)

31. What is the main idea of the broaden-and-build theory?

- a) Positive emotions narrow behavior
- b) Positive emotions build lasting resources
- c) Negative emotions create resilience
- d) Emotions are irrelevant to success

Answer: b) Positive emotions build lasting resources

32. What does “playfulness” induced by positive emotions result in?

- a) Lower creativity
- b) Stronger social bonds
- c) Reduced intellectual resources
- d) Increased stress levels

Answer: b) Stronger social bonds

33. Positive emotions promote all of the following EXCEPT:

- a) Building resources
- b) Undoing negative emotions
- c) Social isolation
- d) Playfulness

Answer: c) Social isolation

34. According to Fredrickson, what is a key indicator of flourishing?

- a) High income
- b) High ratio of positive to negative emotions
- c) Avoidance of challenges

d) Constant stress levels

Answer: b) High ratio of positive to negative emotions

35. Which of the following best describes the “upward spiral” of positive emotions?

a) Negative emotions increasing stress

b) Positive emotions leading to greater well-being

c) Emotional states remaining neutral

d) Stress dominating behavior

Answer: b) Positive emotions leading to greater well-being

Lesson 8: Happiness and Subjective Well-Being

36. According to Ed Diener, what is a key component of subjective well-being?

a) Material wealth

b) Life satisfaction

c) Social isolation

d) Academic achievement

Answer: b) Life satisfaction

37. Which theory emphasizes happiness as a result of need satisfaction?

a) Process/Activity Theories

b) Need/Goal Satisfaction Theories

c) Genetic Theories

d) Hedonic Theories

Answer: b) Need/Goal Satisfaction Theories

38. What is the core idea of the “hedonic treadmill”?

- a) Happiness levels adjust to circumstances
- b) Wealth leads to constant happiness
- c) Negative events have lasting impacts
- d) Positive events create permanent joy

Answer: a) Happiness levels adjust to circumstances

39. What does “Eudaimonia” emphasize according to Aristotle?

- a) Temporary pleasure
- b) Virtuous living and long-term fulfillment
- c) Avoidance of responsibilities
- d) Wealth accumulation

Answer: b) Virtuous living and long-term fulfillment

40. What are the three factors in Lyubomirsky’s happiness model?

- a) Genetics, circumstances, activities
- b) Wealth, relationships, success
- c) Emotions, resilience, creativity
- d) Strengths, intelligence, well-being

Answer: a) Genetics, circumstances, activities

Lesson 9: Determinants of Subjective Well-Being

41. What percentage of happiness is influenced by genetics according to studies?

- a) 10%
- b) 40-50%
- c) 60%
- d) 80%

Answer: b) 40-50%

42. Which of the following traits is commonly found in happy people?

- a) Hostility
- b) Self-focus
- c) Optimism
- d) Social withdrawal

Answer: c) Optimism

43. How does wealth impact happiness in poor countries?

- a) It has no effect.
- b) It strongly predicts well-being.
- c) It reduces stress but not happiness.
- d) It creates dissatisfaction.

Answer: b) It strongly predicts well-being.

44. Which factor has a more significant impact on happiness in wealthy nations?

- a) Material possessions

- b) Positive relationships
- c) Economic status
- d) Career success

Answer: b) Positive relationships

45. What is the main finding about life satisfaction across nations?

- a) Wealthy nations are always the happiest.
- b) Economic stability contributes to higher satisfaction.
- c) Poor nations consistently report higher satisfaction.
- d) Life satisfaction is unrelated to wealth.

Answer: b) Economic stability contributes to higher satisfaction.

Lesson 10: Life Satisfaction and Happiness

46. What is the correlation between wealth and happiness in wealthy nations?

- a) Strong correlation
- b) Moderate correlation
- c) Weak correlation
- d) No correlation

Answer: c) Weak correlation

47. What factor is considered essential for life satisfaction?

- a) Education
- b) Strong social connections
- c) Personal income
- d) Cultural background

Answer: b) Strong social connections

48. Who conducted research linking positive emotions to better health outcomes?

- a) Martin Seligman
- b) Barbara Fredrickson
- c) Sheldon Cohen
- d) Abraham Maslow

Answer: c) Sheldon Cohen

49. What is one reason for the lower happiness levels in some affluent countries like Japan?

- a) Cultural pressures and high expectations
- b) Lack of basic needs
- c) Weak social bonds
- d) Economic instability

Answer: a) Cultural pressures and high expectations

50. What is the main finding about age and happiness?

- a) Older adults are always less happy.
- b) Age has no significant effect on happiness.
- c) Happiness declines with age.
- d) Young people report higher happiness levels.

Answer: b) Age has no significant effect on happiness.

Lesson 11: Emotion-Focused Coping

51. What is the goal of emotion-focused coping?

- a) Solving external problems

- b) Regulating emotional responses
- c) Avoiding emotional experiences
- d) Suppressing negative feelings

Answer: b) Regulating emotional responses

52. Which of the following is an example of emotion-focused coping?

- a) Problem-solving
- b) Seeking social support
- c) Expressing emotions
- d) Ignoring issues

Answer: c) Expressing emotions

53. Who is most likely to use emotion-focused coping?

- a) People with high resilience
- b) Individuals in controllable situations
- c) People facing uncontrollable stressors
- d) High-performing individuals

Answer: c) People facing uncontrollable stressors

54. What is a primary drawback of emotion-focused coping?

- a) Increased anxiety
- b) Lack of problem resolution
- c) Overdependence on others
- d) Avoidance of positive emotions

Answer: b) Lack of problem resolution

55. What does effective emotion-focused coping improve?

- a) Problem-solving skills
- b) Physical health
- c) Emotional well-being
- d) Decision-making abilities

Answer: c) Emotional well-being

Lesson 12: Emotional Intelligence

56. Emotional intelligence involves the ability to do which of the following?

- a) Suppress emotions
- b) Manipulate others
- c) Recognize and regulate emotions
- d) Avoid difficult conversations

Answer: c) Recognize and regulate emotions

57. Which of the following is NOT a component of emotional intelligence?

- a) Self-awareness
- b) Social skills
- c) Academic intelligence
- d) Empathy

Answer: c) Academic intelligence

58. What is the primary benefit of high emotional intelligence?

- a) Increased academic success
- b) Enhanced interpersonal relationships
- c) Higher income levels

d) Reduced cognitive abilities

Answer: b) Enhanced interpersonal relationships

59. Who popularized the concept of emotional intelligence?

a) Daniel Goleman

b) Martin Seligman

c) Carl Rogers

d) Sigmund Freud

Answer: a) Daniel Goleman

60. Which component of emotional intelligence focuses on understanding others' feelings?

a) Self-regulation

b) Empathy

c) Motivation

d) Social awareness

Answer: b) Empathy

61. What is the primary focus of Socioemotional Selectivity Theory?

- a) Increasing social circles
- b) Understanding time-related emotional goals
- c) Reducing emotional dependence
- d) Enhancing intelligence

Answer: b) Understanding time-related emotional goals

62. According to Socioemotional Selectivity Theory, what do older adults prioritize?

- a) Financial stability
- b) Emotional well-being and close relationships
- c) Career advancements
- d) Learning new skills

Answer: b) Emotional well-being and close relationships

63. Who proposed the Socioemotional Selectivity Theory?

- a) Martin Seligman
- b) Laura Carstensen
- c) Abraham Maslow
- d) Barbara Fredrickson

Answer: b) Laura Carstensen

64. How do younger adults differ from older adults in their social goals?

- a) Younger adults focus on emotional closeness.
- b) Younger adults focus on knowledge and future gains.
- c) Younger adults avoid social interactions.
- d) Younger adults prioritize time over relationships.

Answer: b) Younger adults focus on knowledge and future gains.

65. What does Socioemotional Selectivity Theory suggest about limited time perception?

- A) It decreases emotional satisfaction.
- b) It increases focus on meaningful goals.
- c) It reduces motivation.
- d) It broadens social connections.

Answer: b) It increases focus on meaningful goals.

Lesson 14: Self-Efficacy

66. What is the definition of self-efficacy?

- a) Belief in one's ability to succeed in specific tasks
- b) Confidence in others' abilities
- c) Dependence on external validation
- d) Avoidance of challenging situations

Answer: a) Belief in one's ability to succeed in specific tasks

67. Who introduced the concept of self-efficacy?

- a) Albert Bandura
- b) Carl Rogers
- c) Martin Seligman
- d) Abraham Maslow

Answer: a) Albert Bandura

68. Which of the following enhances self-efficacy?

- a) Frequent failures

- b) Negative feedback
- c) Mastery experiences
- d) Avoidance of challenges

Answer: c) Mastery experiences

69. Self-efficacy is most related to which type of motivation?

- a) Extrinsic motivation
- b) Intrinsic motivation
- c) Financial motivation
- d) Social motivation

Answer: b) Intrinsic motivation

70. Which of the following is a benefit of high self-efficacy?

- a) Increased anxiety
- b) Enhanced resilience and persistence
- c) Reduced risk-taking behavior
- d) Focus on external rewards

Answer: b) Enhanced resilience and persistence

Lesson 15: Optimism

71. What does optimism refer to?

- a) Expecting negative outcomes
- b) Believing in positive future possibilities
- c) Avoiding risks and challenges
- d) Depending on external factors for success

Answer: b) Believing in positive future possibilities

72. Who proposed the theory of “Learned Optimism”?

- a) Albert Ellis
- b) Martin Seligman
- c) Daniel Goleman
- d) Carl Jung

Answer: b) Martin Seligman

73. What is a key characteristic of optimistic individuals?

- a) They focus on external problems.
- b) They believe challenges are temporary.
- c) They avoid goal setting.
- d) They blame others for failures.

Answer: b) They believe challenges are temporary.

74. How does optimism benefit physical health?

- a) Reduces stress and improves immunity
- b) Increases anxiety
- c) Creates unrealistic expectations
- d) Weakens problem-solving skills

Answer: a) Reduces stress and improves immunity

75. What is the opposite of optimism?

- a) Hope
- b) Resilience
- c) Pessimism

d) Confidence

Answer: c) Pessimism

Lesson 16: Hope

76. What are the two main components of hope theory?

a) Willpower and waypower

b) Strength and resilience

c) Optimism and positivity

d) Motivation and action

Answer: a) Willpower and waypower

77. Who developed the Hope Theory?

a) Carl Rogers

b) C.R. Snyder

c) Martin Seligman

d) Albert Bandura

Answer: b) C.R. Snyder

78. What does “waypower” in hope theory refer to?

a) Avoiding challenges

b) Finding pathways to achieve goals

c) Building emotional intelligence

d) Developing self-control

Answer: b) Finding pathways to achieve goals

79. Hopeful individuals are more likely to:

- a) Give up under pressure
- b) Persist through obstacles
- c) Avoid setting goals
- d) Depend on others for success

Answer: b) Persist through obstacles

80. What is a practical way to increase hope?

- a) Focus on failures
- b) Develop clear goals and strategies
- c) Avoid challenges
- d) Depend solely on willpower

Answer: b) Develop clear goals and strategies

Lesson 17: Resilience

81. What is resilience?

- a) Avoiding stress and challenges
- b) Bouncing back from adversity

- c) Depending on external support
- d) Ignoring problems

Answer: b) Bouncing back from adversity

82. Which of the following is NOT a characteristic of resilient individuals?

- a) Optimism
- b) Emotional regulation
- c) Avoidance of risks
- d) Problem-solving skills

Answer: c) Avoidance of risks

83. Who is known for their research on resilience?

- a) Martin Seligman
- b) Emmy Werner
- c) Abraham Maslow
- d) Carl Rogers

Answer: b) Emmy Werner

84. Resilience can be enhanced through which of the following?

- a) Building social connections
- b) Avoiding all risks
- c) Ignoring emotional well-being
- d) Relying solely on external support

Answer: a) Building social connections

85. What role does resilience play in mental health?

- a) Increases vulnerability to stress
- b) Reduces the impact of negative experiences
- c) Eliminates all emotional struggles
- d) Focuses only on external factors

Answer: b) Reduces the impact of negative experiences

Lesson 18: Hope

86. According to Hope Theory, what does “willpower” represent?

- a) The motivation to achieve goals
- b) Avoidance of obstacles
- c) Emotional intelligence
- d) The ability to adapt to change

Answer: a) The motivation to achieve goals

87. Which strategy is effective in increasing hope?

- a) Setting specific, achievable goals
- b) Ignoring potential challenges
- c) Depending entirely on others
- d) Avoiding emotional engagement

Answer: a) Setting specific, achievable goals

88. What is the relationship between hope and mental health?

- a) Hope decreases anxiety and depression
- b) Hope has no impact on mental health
- c) Hope increases stress
- d) Hope eliminates the need for therapy

Answer: a) Hope decreases anxiety and depression

89. How does hope influence goal achievement?

- a) It ensures automatic success.
- b) It creates a clear pathway to achieve goals.
- c) It prevents failure completely.
- d) It discourages taking risks.

Answer: b) It creates a clear pathway to achieve goals.

90. Who introduced the “Hope Scale”?

- a) Martin Seligman
- b) C.R. Snyder
- c) Barbara Fredrickson
- d) Daniel Goleman

Answer: b) C.R. Snyder

Lesson 19: Resilience and Well-Being

91. What is the main focus of resilience research?

- a) Preventing failure entirely
- b) Understanding how individuals cope with adversity
- c) Enhancing emotional intelligence
- d) Eliminating all challenges

Answer: b) Understanding how individuals cope with adversity

92. Which factor contributes the most to building resilience?

- a) Avoiding difficult situations

- b) Strong social support systems
- c) High levels of stress
- d) Dependence on external resources

Answer: b) Strong social support systems

93. What does “adaptive coping” mean in resilience?

- a) Avoiding stress altogether
- b) Adjusting positively to challenges
- c) Ignoring emotional struggles
- d) Overcoming all problems independently

Answer: b) Adjusting positively to challenges

94. Which of the following is an outcome of high resilience?

- a) Increased stress levels
- b) Better problem-solving skills
- c) Complete avoidance of adversity
- d) Dependence on others for motivation

Answer: b) Better problem-solving skills

95. Which practice is most effective for enhancing resilience?

- a) Practicing mindfulness
- b) Avoiding emotional expression
- c) Ignoring social connections
- d) Suppressing negative emotions

Answer: a) Practicing mindfulness

General Positive Psychology Concepts

96. What is the primary objective of Positive Psychology interventions?

- a) Treating mental illness
- b) Enhancing well-being and happiness
- c) Reducing social relationships
- d) Diagnosing emotional disorders

Answer: b) Enhancing well-being and happiness

97. What does the term “flourishing” refer to in Positive Psychology?

- a) High levels of mental health and well-being
- b) Avoiding stress completely
- c) Strong financial stability
- d) Emotional suppression

Answer: a) High levels of mental health and well-being

98. Which of the following is NOT a key factor in subjective well-being?

- a) Positive emotions
- b) Life satisfaction
- c) Absence of negative emotions
- d) Financial independence

Answer: d) Financial independence

99. What is the significance of “signature strengths” in Positive Psychology?

- a) They identify areas of weakness.
- b) They help individuals focus on their core competencies.
- c) They reduce the need for goal-setting.

d) They eliminate negative emotions.

Answer: b) They help individuals focus on their core competencies.

100. Which practice is commonly recommended for increasing happiness?

a) Gratitude journaling

b) Avoiding all risks

c) Emotional suppression

d) Focusing on material wealth

Answer: a) Gratitude journaling

Lesson 1: Positive Psychology

126. What aspect of human functioning does Positive Psychology study?

a) Illness and mental disorders

b) Optimal human functioning and strengths

c) Cognitive dissonance

d) Genetic traits

Answer: b) Optimal human functioning and strengths

127. What is the key difference between traditional psychology and Positive Psychology?

A) Positive Psychology focuses on human weaknesses.

b) Positive Psychology focuses on positive human strengths and well-being.

c) Traditional psychology avoids studying human traits.

d) Traditional psychology focuses on economic problems.

Answer: b) Positive Psychology focuses on positive human strengths and well-being.

128. Which of the following is emphasized in Positive Psychology?

a) Treating mental disorders

- b) Enhancing life satisfaction
- c) Ignoring human strengths
- d) Focusing only on pathology

Answer: b) Enhancing life satisfaction

Lesson 2: Introduction

129. Which emotion is most emphasized in Positive Psychology?

- a) Anger
- b) Happiness
- c) Fear
- d) Anxiety

Answer: b) Happiness

130. What does Positive Psychology suggest for improving personal well-being?

- a) Focusing solely on financial success
- b) Developing emotional intelligence and personal strengths
- c) Ignoring stress
- d) Focusing only on social status

Answer: b) Developing emotional intelligence and personal strengths

131. What is a characteristic of individuals who have a high level of subjective well-being?

- a) They are often unhappy.
- b) They experience positive emotions and life satisfaction.
- c) They avoid social interactions.
- d) They rely on external validation.

Answer: b) They experience positive emotions and life satisfaction.

Lesson 3: Perspectives on Positive Psychology

132. Which of the following philosophers is associated with the idea of “Eudaimonia”?

- a) Sigmund Freud
- b) Aristotle
- c) John Locke
- d) Carl Jung

Answer: b) Aristotle

133. In Positive Psychology, what does “Eudaimonia” emphasize?

- a) Short-term pleasure
- b) The pursuit of long-term meaningful goals and virtue
- c) Accumulating wealth
- d) Avoiding any form of hardship

Answer: b) The pursuit of long-term meaningful goals and virtue

134. What did the Greeks contribute to Positive Psychology?

- a) Focus on mental illness
- b) Emphasis on rationality and understanding of happiness through virtue
- c) Study of external wealth
- d) Disregard for emotional well-being

Answer: b) Emphasis on rationality and understanding of happiness through virtue

Lesson 4: Classification and Measures of Human Strengths

135. Which of the following classification systems focuses on 24 character strengths?

- a) VIA Classification

- b) Gallup StrengthsFinder
- c) DSM-IV
- d) Myers-Briggs Type Indicator

Answer: a) VIA Classification

136. The VIA Classification of Strengths categorizes strengths under how many virtues?

- a) 3
- b) 6
- c) 12
- d) 24

Answer: b) 6

137. What is a strength identified in the VIA Classification?

- a) Wealth
- b) Empathy
- c) Competition
- d) Intelligence

Answer: b) Empathy

Lesson 5: Measures of Human Strengths

138. What does the “Satisfaction with Life Scale” measure?

- a) Emotional intelligence
- b) Self-esteem
- c) Life satisfaction and happiness
- d) Academic achievement

Answer: c) Life satisfaction and happiness

139. What is a key feature of the VIA Inventory of Strengths?

- a) It focuses only on negative traits.
- b) It assesses emotional intelligence.
- c) It measures an individual's character strengths.
- d) It analyzes intelligence and academic performance.

Answer: c) It measures an individual's character strengths.

140. Which of the following is NOT a key element of subjective well-being?

- a) Positive emotions
- b) Life satisfaction
- c) Wealth accumulation
- d) Absence of negative emotions

Answer: c) Wealth accumulation

Lesson 6: Positive Emotions

141. Which emotion is most linked to better problem-solving and decision-making?

- a) Fear
- b) Happiness
- c) Anger
- d) Anxiety

Answer: b) Happiness

142. According to Fredrickson's Broaden-and-Build Theory, positive emotions do what?

- a) Narrow cognitive focus
- b) Increase focus on short-term goals
