

FINAL TERM Exam Questions

BT101 Current SPRING 2021

MCQs from IMRAN File & Past Papers

1. Benefits of atmosphere.
2. K selected and r selected species.
3. Characteristics of mammalian s.
4. Features of mollusks.
5. Habitat fragmentation.
6. Composition of matrix.
7. Conventional aviation(2)
8. Heterotrophs(2)
9. Kind of speciation(3)
10. How echinoderms(3) regenerate
11. Feeding levels in food chain (5)
12. Methanogens and Halophiles

13. 5marks - Platehlminthes
14. 5 marks - Grazers and browsr
15. 3 marks - Cirulation of annelids
16. 3 marks- Protista
17. 2 marks - Height of mesosphere
18. .write a note on water pollution (5)
19. classification and characteristics of phylum platyhelminthes(5)
20. describe limits of selection (3)
21. role of mine in waste water (2)
22. steps of water cycle(3)
23. Habitat fragmentation effect (2)
24. Plasmodiym cycle (2)
25. Form of energy in ecosystem (3)
26. Composition of mitochondrial membranes (3)
27. Logistic population growth (5)
28. Evidence of Darwin theory (5)
29. Metameric segmentation 2
30. Habitat and its characteristics 2
31. University wisconn,s wala jo file ma ha wo tha 3 marks ka
32. Archaea characteristics 3
33. Logistic growth 5
34. Endomembrane system 5
35. what is aerosol
36. factors of ecosystem
37. three example of zoomatigophora
38. write note on mastigophora
39. differentiate between grazer and browsers?
40. Carbon dioxide gasoline wala
41. Why actinobacteria in great economic ..
42. R selected species
43. Origin of eukarota
44. Coevolution 2 marks,
45. When adaptations occur 2 marks.
46. Food chain 3 marks.

Email; mehwishshabirhussain07@gmail.com | .

47. order of amphibians 3 marks
48. r-selected species 5 marks
49. characteristics of mammals 5 marks
50. Flow of energy 5
51. Origion of eukaryota 5
52. Biological clocks
53. Net productivity of rainforest
54. Microfilaments
55. Global warming 2
56. Pollution classifications2
57. Water pollution 5
58. Nomen culture 5
59. Classes of arthripoda 3
60. Structure of Golgi apparatus 3
61. Holophile and methangens 5.
62. Parasites types 5.
63. Natural selcetion evdence 3.
64. Metamorphism 3.
65. Sub classes of eukaryota 2.
66. And what coelentratrate .
67. Flow of energy 2 or 5 dono marks k
68. Genetic drift with example...5 mark
69. Exponential growth 2 marks
70. Example of r- selected species
71. Economic imortance of myxozoa
72. Properties of r- selected species
73. land pollution
74. Gene pool promote or contrast evolutionary impact
75. Characteristics of animalia
76. Rate of evolution
77. Effect of global warming
78. Camouflage
79. Aestivation
80. .Natural selection

Email; mehwishshabirhussain07@gmail.com | .

81. Circulatory system in annelids
82. What is realised niche?
83. What is cytoskeleton?
84. Write a note on flow of energy in ecosystem?
85. What is the digestive system of phylum echinodermata?
86. What is the infra class of theria?
87. Theory of natural selection evidence? 5
88. Logistic growth? 5
89. Light pollution and effects? 3
90. Composition of rhizoids? 2
91. Composition of first atmosphere
92. Write note on rate of evolution?
93. Effact of global warming? Discuss in detail? 5 marks
94. What is two heat producing machanism in mammals?
95. Characteristic of phylum nemotoda
96. Height of stratosphere at equator and poles??
97. Plasmodium and it's life cycle. Two marks 2
98. the effects of exponential decline of chemical bond energy in trophic chain? Two marks
99. types of symbiosis three marks
100. different types of cells present in porifera three marks
101. types of parasites five marks 6 metamorphosis and it's types 5 marks
102. Digestive system of Phylum echinodeata(5)
103. Troposphere (5)
104. Secondary product of evolution (3)
105. Causes of land pollution 2)
106. Sympathetic speciation (3)
107. father of taxonomy 2
108. how many tons of carbon is present in the world 2
109. distinctive features of mollusca 3
110. habitat fragmentation 3
111. exponential growth 5
112. gene flow is good or bad for evolution 5

Email; mehwishshabirhussain07@gmail.com | .

113. gene drift
114. reproduction in orthropod
115. amount of carbon present in atmosphere in tons
116. reproduction in cilipora
117. evidence of theory of natural selection
118. characteristics of troposphere
119. Subjective signals of aposematism
120. Logistic growth population
121. Taxis,range of optimum
122. Composition of mitochondrial membrane
123. Sub phylum mastigophora
124. Pollution classifications2
125. Water pollution 5
126. Nomen culture 5
127. Classes of arthripoda 3
128. Structure of Golgi apparatus 3
129. Holophile and methangens 5.
130. Parasites types 5.
131. Natural selcetion evdence 3.
132. Metamorphism 3.
133. Sub classes of eukaryota 2.
134. And what coelentratrate .
