GRAND QUIZZES	27 December 2020
BT102	MICROBIOLOGY

Effort by SHAKEEL AHMAD

1. Which of the following group of microbes strictly need oxygen for growth…… **Obligates Aerobes.**
2. Which of the following is required to see microorganisms….. **All of the given options.**
3. A DNA segment which encodes protein is known as……. **Gene.**
4. The alcohol ethanol isopropanol are used for the denaturation of….. **Protein.**
5. After gram staining, Gram positive bacteria appear…… **Purple.**
6. Which of the following gas is used the microbial removal….. **Ehylene oxide.**
7. ……..work ended the spontaneous generation controversy….. **Louis Pasteur.**
8. Which of the following bacteria formed endospores….. **All of the given option.**
9. Salt composed of a positive and negative ions are known as…. **Stains,**
10. Motile and Unicellular organisms, these characteristics related to which of the following…… **Protozoa.**
11. Oxygen is toxic for…….. **Obligate Anaerobes.**
12. Flagella move…….for forward thrust……**Counter Clochwise.**
13. Half the dry weight of microbes is……. **Carbon.**
14. 70s ribosomes consists of two subunits….. **50s and 30s.**
15. There are…. Kingdom in domain Archea…. **1.**
16. How we can fix the smear….. **Both Physical and Chemical method.**
17. The basal body of flagellum of gram positive bacteria consist of…..rings…. **2.**
18. The theory of spontaneous generation was proposed by…. **Aristotle.**
19. Which of the following is correct about E. coli……**Facultative Anaerobes.**
20. Prokaryotes and Eukaryotes are ……similar….**Chemically.**
21. ……Are live mostly in extreme conditions…. **Archea.**
22. Substances that absorb short wavelength of light and emit longer wavelength are known as….. **Fluorochromes.**
23. Which of the following structure used for moving…. **Flagella.**
24. The oil immersion lense microscope is of……power… **100x.**
25. First drawing of microbes was published by…….**Robert Hooks.**
26. Buffer are used to maintain…… in the medium…. **PH.**
27. Ability of the lens to distinguish between two closely lying objects as separate is known as……. **none of the given option.**
28. Photo autotrophs used…….. as a source of energy…… **Light.**

29. Which of the following pH is acidic…… **all of the given option.**
30. Rigid layer outside the plasma membrane is called……. **cell wall.**
31. Bacteria utilise oxygen for…… **decomposition**
32. Phenol and phenolic compound first widely used antiseptics for disruption….. **plasma membrane.**
33. Facilitated diffusion is done with the help of…… **integral protein.**
34. Kingdom Monera includes both…….. **bacteria and Archea.**
35. Photoautotrophs use carbon from…….. **CO2**.
36. Chemoheterotrophs use carbon from ……. **carbohydrates**
37. Bacteria need ……. for the synthesis of protein and nucleic acids……**Carbon.**
38. Which of the following is used for DNA transfer…… **Pili.**
39. O2 has no effect on…….. **Aerotolerant Aerobes.**
40. Removal of electrons from an atom is known as…… **oxidation.**
41. Which of the following is the physical method of microbial control……. **radiation**
42. Which of the following gas is used for microbial removal……. **ethylene oxide**
43. Naming of the organisms introduced by…….. **linnaeus.**
44. ……. Are used for twitching motility…… **pili.**
45. Which of the following is the most important structure in prokaryotes….. **cell wall.**
46. Rigid layer outside the plasma membrane is….. **cell wall.**
47. Monitoring of diseases in population is known as…… **Epidemiology.**
48. Which of the following bacteria has waxy material in their cell wall…… **Mycobacterium Tuberculosis.**
49. Soluble antigen binds with antibody is is known as as…… **Precipitation Test.**
50. NADH and FADH2 during krebs cycle oxidized where electron transport chain in generate……. ATP molecule….. **38.**
51. Capsule is responsible for….. **Virulence.**
52. …. Is transfer of DNA by a virus called bacteriophages……. **transduction.**
53. Which of the following is used for plasma membrane is description…… **Phenol.**
54. Bacteria get nitrogen from….. **All of the given options.**
55. Which of the following staining is done for acid fast bacteria….. **Ziehl Neelsonn Staining.**
56. Which of the following is used for catalyst test…. **Hydrogen peroxide.**
57. Which of the following is the advantage of staining the microbes…… **All of the given options.**
58. All organic compounds contain…. **CARBON.**
59. The multicellular form of Fungi is known as….. **mold.**

60. There are…….. kingdoms in Domain Eukarya…… **5.**
61. Which of the following is not present in bacteria….. **Both Histone and Nuclear membrane.**
62. Microbes are placed in ……kingdoms….. **Monera Protista and fungi.**
63. Which of the following enzymes catalyse the conversion of hydrogen peroxide into water and oxygen… **Catalase**
64. The study of microbes is known as…… **microbiology.**
65. Psychrophiles are extremophilic organisms that are capable of growth and reproduction in temperature around……. **25 to 40 centigrade.**
66. Which of the following is hyperthermophile in nature….. **Archae.**
67. Which of the following is the cellular energy for most of the microbes……. **All of the given options**

Still Working On it…..

SHAKEEL AHMAD from DISTRICT MANSEHRA.
